Grammichele (*Gram-mi-kā′le*), a town of Sicily, 33 miles SW. of Catania, on a mountain-ridge, 1768 feet above sea-level. Pop. 15,800.

Grammont (Fr.; Belg. *Geeraerdsbergen*), a small town in the Belgian province of East Flanders, on the Dender, 14 miles by rail S. by E. of Ghent. Pop. 15,000.

Grampians, a name very loosely applied to the mountain-system of the Scottish Highlands. Some, for instance, restrict it to a 'chain' of heights bordering the Lowland plain from Dumbarton to Stonehaven, whilst others include a 'range' extending from Stonehaven to Ben Nevis, as well as the Cairngorm group, Schiehallion, &c. Hector Boece adopted the name in 1527 from Tacitus's *Mons Graupius* or *Granpius*, the scene in 86 A.D. of Agricola's crushing defeat of Galgacus. Where that battle was fought has itself been hotly contested. Ardoch, Dalginross, near Comrie, and Urie, near Stonehaven, are among the sites named, but Dr Skene prefers the peninsula formed by the Isla's junction with the Tay.—Grampians is also the name of a range of Australian mountains, rising to 5600 feet, in the west of Victoria (q.v.).

Grampound, a decayed Cornish market-town, 7 miles SW. of St Austell, till 1824 returning two M.P.'s. Pop. 400.

Gran, a town of Hungary, on the right bank of the Danube, 25 miles NW. of Budapest, and opposite the mouth of the river Gran (length, 150 miles). Its great domed cathedral (1821–56), on the castle hill, rivals in its magnificent proportions St Peter's at Rome. Near is the palace of the prince-archbishop, who is primate of Hungary. The warm mineral springs of Gran have also some fame. Pop. 20,000. Here St Stephen, the first king, was born in 979, and baptised and crowned in 1000; soon it became the greatest commercial town in the kingdom, but never recovered from the storming by the Tartars in 1241. The old name, *Istrogranum* ('Danube grain-town'), appears now in the Magyar *Esztergom*.

Grana′da, an ancient Moorish kingdom of Spain, embracing the south-eastern portion of Andalusia, and now divided into the three modern provinces of Granada, Almeria, and Malaga. Area, over 11,000 sq. m., with a population of 1,500,000. Except in the narrow strip of coast-region along the Mediterranean, the surface is a succession of mountain and plateau rising in the centre to the snow-capped Sierra Nevada; but the soil is fertile, and the ancient Granada, which became an independent kingdom after the fall of the caliphate of Cordova in 1236, supported a population of 3 millions, and sent 100,000 men into the field, but in 1492 was conquered by the Spaniards. Area of the modern province, 4928 sq. m.; pop. 505,000.

Granada, the town, has sadly declined since the days of its Moorish masters, but still ranks as one of the larger cities of Spain. It lies at the foot of the Sierra Nevada, on and between two hills, the southernmost being the site of the famous Alhambra (q.v.), and is 2245 feet above sea-level, and 126 (by rail 179) miles E. by S. of Seville. It overlooks a fertile and extensive plain, and stands on the right bank of the Jenil. The modern town is commonplace and dull, with wide streets and open squares; but the old houses, with their flat roofs, turrets, parti-coloured awnings, balconies, and fountains, preserve a half oriental aspect, and the labyrinths of narrow, tortuous, ill-paved, ancient streets offer picturesque views. Granada is the seat of an archbishop, and has a university (1531) attended by nearly 1000 students. The cathedral, begun in 1529, contains the tombs of Ferdinand and Isabella, and of Philip I. and his consort Juana, fine specimens of Italian Renaissance sculpture. In the monastery of San Geronimo the 'Great Captain,' Gonsalvo di Cordova, is buried. The industry and trade of the town are inconsiderable. Population, about 77,000. Granada was founded by the Moors in the 8th century, not far from the ruins of an ancient Celtiberian town, Illiberis, and rapidly rose to distinction as a wealthy trading city and as a seat of arts.

Granada, the capital of a Nicaraguan dep., founded in 1522, stands on the north-west side of Lake Nicaragua, and is connected with Managua by rail. Pop. 25,000.

Granard, a town of County Longford, 3 miles W. of Ballywillan station. Pop. 1500.

Gran Chaco, an extensive central tract of South America, extending from the southern tropic to 29° S. lat., and bounded on the E. by the Paraguay and Paraná, and on the W. by the Argentine provinces of Santiago del Estero and Salta. Its area, about 180,000 sq. m., exceeds that of Great Britain and Ireland by one-half. The portion south of the Pilcomayo belongs to Argentina, and the remaining third to Paraguay. Since 1885 many agricultural settlements have been made.

Grand Bassam, See Gold Coast.

Grand Cañon. See Colorado.

Grand'-combe, La, a coal-mining town in the French dep. of Gard, 41 miles NNW. of Nîmes. Pop. 11,500.

Grand Forks, capital of Grand Forks county, North Dakota, on the Red River of the North, opposite the mouth of Red Lake River, is 55 miles N. of Fargo. It has flour and saw mills and ironworks. Pop. 12,000.

Grand Haven, capital of Ottawa county, Michigan, on Lake Michigan, and on the south bank of Grand River, 31 miles W. by N. of Grand Rapids by rail. It has a medicinal spring and a harbour, shipping lumber and grain. Pop. 5823.

Grand Lahou. See Gold Coast.

Grand Popo, a French settlement in Guinea, on the Slave Coast, 25 miles W. of Whydah.

Grandpré, a village in the French dep. of Ardennes, on the Aire, 40 miles NNE. of Châlons. Here, in 1792, Dumouriez was defeated by the Allies.

Grand Rapids, capital of Kent county, Michigan, stands at the head of steamboat navigation on Grand River, here crossed by six bridges, 60 miles WNW. of Lansing. The river, which enters Lake Michigan 40 miles below, here falls 18 feet in a mile, and across it extend the rapids which give name to the town. Conducted by canals, it supplies motive-power to numerous sawmills and manufactories of furniture and wooden ware, farming implements, flour, machinery, &c., though steam is now in use in most of the factories. Stucco-plaster and white bricks are largely made here. The city is the seat of an Episcopal bishop. Pop. (1870) 16,507; (1880) 32,016; (1900) 87,565; (1910) 112,571.

Grangemouth, a rising port in Stirlingshire, 3 miles ENE. of Falkirk. Founded in 1777, and erected into a police-burgh in 1872, Grangemouth has extensive quays and warehouses, docks (including a large one opened in 1882), a graving-dock, and shipbuilding yards. The trade of the port has risen very rapidly. In 1840 the shipping entering and clearing it was 31,686 tons annually; in 1876, 840,326; since 1910 it has exceeded 2,330,000 tons—the port then ranking fifth in importance in Scotland. Since 1887 there has been a regular line of passenger-steamers between Grangemouth and London, owned by the Carron Iron Company, whose works are within 2 miles of the port. The principal imports are timber, hemp, flax, tallow, deals, iron, and grain; and the exports are manufactured iron, and coal. At Grangemouth some of the earliest experiments in steam-navigation were made, the *Charlotte Dundas* being built there in 1801. Pop. (1831) 1155; (1871) 2569; (1901) 8386; (1911) 10,219.

Gran Sasso d'Italia ('Great Rock of Italy'), or Monte Corno, from its resemblance to a horn on the east, is situated on the borders of the Abruzzi, between Teramo and Aquila. It is the highest summit (9574 feet) of the Apennines.

Granson, or Grandson, an ancient town in Switzerland, on the Lake of Neuchâtel, 21 miles SW. of Neuchâtel; pop. 1762. Here in 1476 the Swiss defeated Charles the Bold.

Grantchester, a village on the Cam, 2½ miles SSW. of Cambridge, and partly within its bounds.

Grantham (*Gran'tham*), a market-town on the Witham's left bank, 25 miles SSW. of Lincoln, and 105 NNW. of London. It lies on the ancient Ermine Street, and is an important junction on the Great Northern Railway; whilst a canal (1793), 30 miles long, connects it with the Trent near Nottingham. High over the red-tiled brick houses soars the noble gray spire (278 feet high) of St Wolfran's Church, which, in style mainly Early English of the 13th century, has been finely restored since 1865. An Eleanor cross was demolished in 1645, and a castle has left no trace; but the quaint Angel Inn is still standing, in which Richard III. signed Buckingham's death-warrant. Of King John, too, Grantham has memories, and of Oliver Cromwell, who here on 13th May 1643 won his first success; but the town's greatest glory is Sir Isaac Newton, who during 1655–56 idled, fought, and rose to be head-boy in its grammar-school. A bronze statue of him was erected in 1858; and there is also a bronze statue of the Hon. Fred. Tollemache (1890). The said school was founded by Bishop Fox in 1528, re-endowed by Edward VI. in 1553, and reconstituted in 1876. The manufacture of agricultural implements, malting, and brick-making are industries. Grantham, since 1905 the see of a suffragan bishop, from 1463 till 1885 returned two members to parliament—now only one. The borough boundary was largely extended in 1879. The population, hardly 11,000 in 1851, had by 1911 reached 20,500—nearly doubled. See the local histories of Turnor (1806), Marrat (1816), and Street (1857).

Grant Land, a North Polar region, north of Grinnell Land, between 81° and 83° N. lat., discovered by Hayes, Hall, and Nares in 1875, and partly explored by Nares, who wintered here.

Granton, a harbour on the Firth of Forth, in the city of Edinburgh. It was constructed by the Duke of Buccleuch in 1835–45 at a cost of nearly a quarter of a million.

Grantown, a village of Elginshire, ¾ mile from the Spey's left bank, and 142 miles by rail N. by W. of Edinburgh. Founded in 1776, and a police-burgh since 1890, it is surrounded by pine woods, and is a holiday and health resort. Pop. 1500.

Granville, a fortified seaport in the French dep. of La Manche, on a rocky promontory in the English Channel, 23 miles NE. of St Malo. The industries include fishing, shipbuilding, tanning, and the manufacture of brandy, chemicals, and iron-ware. Pop. 10,500.

Graslitz, a town of Bohemia, on the Saxon border, 142 miles WNW. of Prague. Pop. 13,800.

Grasmere, a Westmorland village, 4 miles NW. of Ambleside. There are four hotels. Pop. 900. Its antique church is the church of the *Excursion;* and in the churchyard, washed by the Rothay, are the graves of Wordsworth and Hartley Coleridge. 'Grasmere's peaceful lake,' with its 'one green island,' lies ½ mile to the south, between Loughrigg Fell (1101 feet) and Helm Crag (1299). Measuring 1¼ by ½ mile, it is 208 feet above sea-level, and 130 feet deep.

Grasse, a town in the French dep. of Alpes-Maritimes, on the southern slope of the Basses-Alpes, 1066 feet above sea-level, and 12 miles N. of Cannes by rail. The seat of a bishopric from 1244 to 1801, it has steep, narrow, crooked streets, a cathedral, and an interesting hôtel-de-ville. Grasse is second only to Paris in its manufactures of perfumes, made from the roses, orange-flowers, heliotropes, mint, &c. grown here. It also manufactures olive-oil, silk, &c., and is growing in favour as a winter-resort. Queen Victoria stayed here in 1891. Pop. 16,000.

Gratz, or GRAZ (formerly *Grätz*), the capital of Styria, in Austria, 141 miles SSW. of Vienna by rail, is a picturesque old town on both sides of the Mur, encircled by fine gardens. Remains of the former fortress still stand on a hill in the centre of the town. Old buildings are the cathedral (1462), two other Gothic churches (one built in 1283), the ancient castle of the Styrian dukes, the Landhaus, the university (with over 2000 students, and a library of 250,000 volumes), &c. The industries include the manufacture of machines, steel goods, rails and railway carriages, sugar, wine, perfumery, stearine candles, soap, &c. Pop. 150,000.

Graubünden. See GRISONS.

Graudenz (*Grou-dentz'*), an old town in the province of West Prussia, on the Vistula, 37 miles N. of Thorn. It has iron-foundries, breweries, and tapestry and cigar manufactories. Population, above 40,000. About a mile north of it on a hill (282 feet) is the fortress of Graudenz (1776), since 1874 a barrack and military prison.

Gravelines (*Grâv-leen'*), a fortified town in the French dep. of Nord, in a marshy locality at the mouth of the Aa, 13 miles by rail ENE. of Calais. A desolate-looking place now, with grass-grown streets, it has an historic past, as the scene of Egmont's victory over the French (1558), and the place off which the English dispersed the Armada (1588). Pop. 5900.

Gravelotte, a village of Lorraine, 7 miles W. of Metz. Here, on 18th August 1870, Bazaine was severely defeated by the Germans.

Gravesend, a port and borough of Kent, on the right bank of the Thames, 24 miles ESE. of London. It consists of the old town, with narrow, irregular streets, and of the handsome new town on the high ground. In the vicinity are extensive market-gardens; and many of the inhabitants are employed in fishing. Gravesend forms the limit of the port of London; and here pilots and custom-house officers are taken aboard vessels going up the river. The salubrious air and beautiful scenery at Gravesend render it a favourite watering-place with Londoners. It carries on some shipbuilding, iron-founding, soap-making, and brewing, and a considerable trade in supplying ships' stores. Gravesend was incorporated under Elizabeth, and since 1867 has returned one member to parliament. Pop. of the municipal borough, about 30,000; of the parliamentary borough, above 40,000. At Gravesend the fleets of early voyagers, as that of Willoughby in 1553, and of Frobisher in 1576, assembled, and here the lord mayor, aldermen, and city companies of London were wont to receive all strangers of eminence, and to conduct them up the river in state. A great fire in 1850 did damage to the amount of £100,000. See Arden's *History of Gravesend* (1843).

Gravina, a town of southern Italy, 33 miles SW. of Bari. Pop. 20,000.

Gray, a town in the French dep. of Haute-Saône, on the Saône, 25 miles NW. of Besançon. It has a ruined castle of the dukes of Burgundy. Pop. 7000.

Grays Thurrock, a town of Essex, on the Thames, 19½ miles E. by S. of London. Pop. of urban district, 16,000.

Graz. See GRATZ.

Grazalema, a town of Spain, 53 miles ENE. of Cadiz. Pop. 8000.

Great Basin. See GREAT SALT LAKE.

Great Bear Lake. See BEAR LAKE (GREAT).

Great Britain, as distinguished from Britannia Minor, or Brittany, in France, was not officially so called till in 1604 James I. styled himself king of Great Britain. Lying between 49° 57′ 30″ and 58° 40′ 24″ N. lat., and between 1° 46′ E. and 6° 13′ W. long., Great Britain is the largest island of Europe, and is bounded by the Atlantic, the North Sea, the English Channel, the Irish Sea, and St George's Channel. The most northerly point is Dunnet Head, in Caithness; the most southerly, Lizard Point, in Cornwall; the most easterly, Lowestoft Ness, in Suffolk; and the most westerly, Ardnamurchan Point, in Argyllshire. Its greatest length is about 608 miles, and its greatest breadth (from Land's End to the east coast of Kent) about 325 miles; while its surface contains 88,226 sq. m. The geology of Great Britain is of peculiar importance. Nearly all the recognised 'systems' occur in Britain, although some of these are more fully represented elsewhere; the only system not found here is the Miocene. The mountainous regions of the north and west are formed of the oldest rocks, and as we move south-eastwards, we gradually pass over newer strata, until, in the east of England, we come to the uppermost divisions of the Tertiary. The mineral wealth, especially the coal and the iron, are the real sinews and muscles of Britain's mighty power. No other country has similar advantages in such an area. In some respects the most important of British minerals is coal. Formerly, the only iron produced in the country was obtained from the greensand of the south-east of England, and from the brown hematite of the Dean Forest.

The ore was smelted with charcoal. But the introduction of coke and coal for smelting, and the discovery of numerous additional and unthought-of deposits, especially in connection with coal-bearing strata, immensely increased the production of iron. The most important ore is the ferruginous shale, or impure argillaceous carbonate of iron, which occurs in connection with every coalfield in Britain. The brown and red hematites, associated with the oldest Palæozoic rocks, yield also a large amount of metallic iron. Tin is obtained from only two counties—Cornwall and Devon. Copper is principally obtained from the same two counties. Lead and silver are obtained from the same ore from numerous mines in Palæozoic districts; the most productive English mines being in Northumberland, Durham, Cumberland, Shropshire, Yorkshire, Derbyshire, Cardiganshire, Glamorganshire, and the Isle of Man. In Scotland the most productive lead and silver mines are at Wanlockhead and Leadhills. Zinc is obtained chiefly from Cardigan, Denbighshire, Carnarvon, Flint, Cumberland, and the Isle of Man. Sulphur ores (iron pyrites) are raised in different parts of Great Britain; as also arsenic, manganese, gold, nickel, silver-copper, fluor-spar, and wolfram. Salt occurs chiefly in Cheshire and Ulster. The total value of the coal raised in the United Kingdom was £57,190,150 in 1896, £121,652,600 in 1900, and £108,377,600 in 1910. The total value of the metals obtainable by smelting from ores produced in the United Kingdom (aluminium, antimony, copper, gold, iron, lead, magnesium, silver, sodium, tin, zinc) now averages some £18,000,000 annually.

The physical features of a country are intimately connected with its geological structure. Thus the Highlands and Southern Uplands of Scotland are built up chiefly of crystalline schists and the older Palæozoic strata, while the intervening lowlands of the so-called Central Plain are composed mainly of the younger Palæozoic rocks and overlying accumulations of superficial deposits. The mountainous tracts of Scotland consist therefore of more enduring or less readily eroded materials than the lowlands. The mountains are monuments of erosion; they are the wreck of an old tableland. The Highlands (q.v.) are intersected from south-west to north-east by the Great Glen, which probably occupies the line of a dislocation. It is customary in geographical text-books to speak of the 'range of the Grampians,' but the Highland mountains do not trend in linear directions, but rather form confused groups. The greatest height reached is 4406 feet in Ben Nevis, less eminences being Ben Macdhui (4296 feet) and Ben Lawers (3984; with cairn, 4004). The southern limit of the Highlands is defined by a line drawn from the Firth of Clyde at Helensburgh north-east to the sea-coast at Stonehaven. North of this line there are of course considerable tracts of less elevated ground, especially along the coast in Aberdeenshire, the borders of the Moray Firth, and Caithness. The coast-line of the Highlands, particularly in the west, is repeatedly broken by numerous and large fjords or deep sea-lochs. And opposite the same coasts appear the numerous islands of the Inner and Outer Hebrides. These fjords are simply submerged land-valleys, while the islands are the higher parts of the depressed continental plateau. The fresh-water lakes vary in size from mere tarns to large mountain-valley lakes like Lochs Lomond, Ness, Awe, Shin, Maree, Tay, &c.

The Central Plain of Scotland may be described as a broad depression of relatively easily eroded materials lying between two tablelands of less readily denuded rocks. The principal features of this low-lying tract have a north-east and south-west trend determined by geological structure, as is seen in the Sidlaw Hills, the Ochil Hills, the Lennox Hills, &c., in the north, and in the Pentland Hills in the south. The surface of the lowland tracts is likewise diversified by many more or less abrupt and isolated hills, such as Arthur's Seat, Dalmahoy Crags, the Castle-rocks of Edinburgh and Stirling, &c. Most of these heights consist of igneous rocks of a more durable character than the strata of sandstone, shale, &c., which surround them.

The Southern Uplands of Scotland form a broad belt of high ground extending from the sea-coast of Haddingtonshire and Berwickshire south-west to the shores of Ayrshire and Galloway. Like the Highlands the area of the southern uplands is simply an old tableland, furrowed into narrow ravine and wide dale by the operation of the various agents of erosion. The rocks that enter into their composition are chiefly Silurian, greywackes, and shales, and consequently there is less variety of contour and colour than in the Highlands. Now and again, however, the mountains assume a rougher aspect, more especially in Carrick and Galloway (highest point Merrick, 2764 feet). The Silurian strata are overlaid towards the south by younger Palæozoic rocks; thus we have the broad vale of Tweed and the lower reaches of Teviotdale occupied chiefly by sandstones and shales. The Cheviot Hills, again, are built up in the north-east chiefly of bedded igneous rocks which towards the south-west give place to sandstones.

Crossing the borders of Scotland and England we find the high ground just referred to is continued southwards through Northumberland, Cumberland, Durham, Yorkshire, Lancashire, and Derbyshire to form what is called the Pennine Chain. This 'chain' varies in height from 1200 to 3000 feet, reaching its highest summit in Scafell Pike, Cumberland, which is 3210 feet high. The Lake district of Cumberland and Westmorland, being built up mainly of Silurian rocks, reproduces the characteristic features of the southern uplands of Scotland. And the same is to a large extent true of the mountainous parts of Wales (whose highest point, Snowdon, is 3571 feet), while not a few of the features of the Scottish Highlands reappear on a small scale in Devonshire and Cornwall. All these hillier tracts are composed essentially of Palæozoic and associated igneous rocks. The major portion of England, however, consists principally of younger strata, and may be considered on the whole as a somewhat undulating plain traversed by ridges of varying elevation, which trend in a general direction from north-east to south-west. The band of Jurassic strata, extending from the Yorkshire Moors south and south-west to the coast of Dorset, forms a tortuous belt of tableland and escarpment, rising sometimes to a height of 1500 feet, and throughout its course presenting usually a bold face to the west and a gentle slope to the east. Similar escarpments accompany the outcrop of the chalk, but they are neither so lofty nor so bold. They form the Wolds of Yorkshire and Lincoln, and rise into a low range of hills that extend from Norfolk to Wilts, the more prominent portions of which are known as the Chiltern Hills, the Marlborough Downs, and Salisbury Plain. On the north and south side of the Wealden anticlinal axis, similar chalk-hills appear, forming the North Downs in Surrey and Kent, and the South Downs in Hants and Sussex. Lying between the Pennine Chain in the west, and the Yorkshire Moors and Wolds and Lincoln Heights and Wolds in the east, lies the broad depression traversed by the Ouse and Trent which is occupied chiefly by Triassic strata. In like manner, a low plain separates the mountain-tracts of Wales from the Pennine Chain, which is similarly occupied by Triassic and younger Palæozoic strata. The maritime parts of Lincoln, Norfolk, Suffolk, Essex, and Middlesex are for the most part low-lying, being composed of Cretaceous and overlying Tertiary and Quaternary deposits. The whole surface of Britain, with the exception of the extreme south of England, has been more or less modified by glacial action, to which is largely due the rounded contour and flowing outline of all but the highest elevations. The surface-features of the low-lying tracts have also been greatly modified by the enormous morainic and fluvio-glacial accumulations which were spread over the country in Pleistocene times.

The physical geography of Ireland is discussed elsewhere (see IRELAND); in its geological relations it is intimately related to Great Britain—its orographic features being likewise determined by the character of its various rock-masses. Ireland, like its sister-island, forms a portion of the depressed continental plateau—its highly indented coast-line, more especially in the west and south-west, being the result of a comparatively recent submergence. There can be no doubt that in post-glacial times Ireland was joined to Britain, which at that period formed a part of the continent of Europe.

The climate of Great Britain derives its peculiar character from the insular situation of the country, taken in connection with the prevailing direction of the winds. It is mild and equable in a remarkable degree, the winters being considerably warmer, and the summers colder than at other places within the same parallels of latitude. For at least three months, the mean monthly temperature ranges between 50·0° and 60·0°; for other three months it continues about 60·0°, or occasionally a little higher, seldom more than four degrees; and for the remaining six months it ordinarily ranges between 36·0° and 48·0°. Since the Reports of the Registrar-general clearly prove that the temperature most conducive to health is between 50·0° and 60·0°, it follows that, as far as concerns temperature, the climate of Great Britain is one of the healthiest in the world. The mean temperature of England is 49·5°, and of Scotland 47·5°. There is a difference of fully six degrees between Falmouth, in Cornwall, and Shetland, attributable chiefly to the difference of their latitudes. It becomes greater as the force of the sun's rays increases; so that, while the winter temperatures are respectively 44·2° and 39·0°, the summer temperatures are 60·6° and 53·4°. The highest summer temperature is 64·2° in London, and the lowest 52·2° at North Unst, the difference being 12·0°. The temperatures of places on the west are in excess of those of places in the same latitudes, but at some distance from the Atlantic. In winter, the differences between the west and the other parts of the country are still greater.

The moist and genial south-west winds are the most prevalent throughout the year, except in April and May, when they often give place to the dry and parching north-east winds. In the level districts of England the rainfall is about 25 inches annually, of Scotland 28 inches. On the western slopes of the hills the total may be 40 inches. But over broad districts in the West Highlands and Skye, and in limited areas in the Lake District, and in North and South Wales, the annual rainfall exceeds 80 inches. At the Stye, Cumberland, it rises to 186 inches.

Area and population were in 1911:

	Area in sq. miles.	Pop.
England	50,890	34,043,076
Wales	7,434	2,032,193
Scotland	30,405	4,759,445
Ireland	32,360	4,381,951
Isle of Man	227	52,034
Channel Islands	75	96,900
Soldiers and sailors abroad	—	(est.) 400,000
United Kingdom	121,391	45,765,599
Indian Empire	1,789,154	315,132,537
Dominions, Colonies, and Protectorates	10,039,200	(est.) 100,000,000
British Empire	11,949,745	460,898,136

Of the total area of 56,786,741 acres in Great Britain, over 32,000,000 acres are under cultivation. Of 20,710,589 acres in Ireland, some 15,500,000 are under cultivation.

There were in 1911 in Great Britain and Ireland a hundred and seven towns or urban districts with a population of over 50,000, of which ninety-three were in England, five in Wales (Cardiff, Rhondda, Swansea, Merthyr-Tydfil, and Aberdare), seven in Scotland (Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, and Greenock, besides Govan and Partick, in 1912 incorporated with Glasgow), and three in Ireland (Dublin, Belfast, and Cork). In the 1137 urban districts of England and Wales 28,162,936 of the inhabitants lived.

Between 1895 and 1911 the annual revenue rose from £101,697,300 to £203,850,600, the expenditure from £100,932,000 to £171,995,700. Between 1903 and 1911 the national debt decreased from over £798,000,000 to £733,072,600. In 1902 the total imports had a value of £528,391,300, the exports of £349,238,000; in 1911 the values were £680,559,200 and £557,003,300 respectively. In 1911 the total imports from British possessions abroad had a value of £171,361,600, the exports thither of £171,910,400. The imports from Germany were £65,306,200, the exports thither £57,431,823; from France £41,636,000, to France £35,480,000; from the United States £122,701,400, to the United States £55,994,000; from Russia £43,135,600, to Russia £22,348,000. In the British produce exported were coal (£36,521,000), iron and steel manufactures (£43,752,000), cotton yarn (£15,665,000), cotton piece-goods (£90,513,000), other cotton manufactures (£12,429,000), woollen and worsted yarn (£6,477,000), woollen tissues (£13,306,000), worsted tissues (£7,134,000), linen piece-goods (£5,646,000), apparel (£13,821,000). Among the chief articles of import were wheat (£38,928,000), flour (£5,277,000), maize (£10,713,000), barley (£8,248,000), oats (£5,392,000), living animals for food (£3,851,000), bacon (£14,463,000), beef (£13,213,000), mutton (£9,926,000), butter (£24,602,000), cheese (£7,140,000), sugar (£26,800,000), tea (£13,062,000); as also wood and timber (£25,847,000), raw cotton (£71,156,000), wool (£33,002,000), iron and steel manufactures (£11,144,000). The number of sailing-vessels in 1911 was 9090 of 1,112,950 tons, and 12,000 steamers of 10,442,720 tons. The regular forces of the army numbered 171,939, the army reserve 139,000, the special reserve 91,219, the territorial army (nominally) 317,000. The navy comprised in 1912 6 super-Dreadnoughts, 14 Dreadnoughts, 40 pre-Dreadnought battleships, 34 pre-Dreadnought armoured cruisers, 72 protected cruisers, 14 scouts, 18 torpedo gunboats, 203 destroyers, 100 torpedo-boats, and 79 submarines; with a total of 131,000 in all ranks of officers and men.

The great daughter states are rapidly becoming more important integral parts of the Empire—the Dominions of Canada and New Zealand, the Commonwealth of Australia, and the Union of South Africa. Newfoundland, the oldest colony, has also full responsible government. Other colonies have representative institutions, the home government controlling the public officers, but having no more than a veto on legislation; whereas the crown colonies are entirely controlled by the home government. Dominions, colonies, and protectorates are separately treated. The Indian Empire (see INDIA) is the richest jewel of the British crown. Other possessions in Asia are Ceylon, the Straits Settlements, the Federated (and other) Malay States, North Borneo, Sarawak, Hong-kong, Aden. In Africa are Rhodesia, Nigeria, Gambia, Sierra Leone, Gold Coast, East Africa, Zanzibar, Uganda, Somaliland, Nyasaland, Swaziland, Basutoland, Bechuanaland—not to speak of Egypt, still under Turkish suzerainty, and the Sudan provinces. In the American hemisphere are the West Indies, Trinidad, British Guiana, British Honduras; to Australasia and the Pacific may be reckoned Fiji, Fanning, Malden, Starbuck, Ellice, Gilbert Islands; to the Indian Ocean, Mauritius and Rodriguez; to the Atlantic, Bermudas, Ascension, St Helena, Tristan da Cunha, Falkland Islands.

See the articles ENGLAND, SCOTLAND, IRELAND, WALES; works on the geography and physiography of the British Islands by Ramsay (new ed. 1894), Hull, Rudler, Chisholm, Jukes-Brown, Avebury, A. Geikie, Seeley, Mackinder, and others; on ethnology, Beddoe (1886), Keane, Ripley, and Macnamara (1900); on trade and commerce, Leone Levi (1880), Cunningham (1903–7), Meredith (1908), &c.; besides Thorold Rogers on agriculture, Bevans on manufactures, &c.; Mulhall's *Dictionary of Statistics* (1891), Holt Schooling's *British Trade Book* (1908, &c.), and Porter's *Progress of the Nation* (ed. Hirst, 1912); and for the colonies, Dilke (1868–90) and Lucas (1910–13).

Great Fish River, (1) in Cape Province, rises in the Sneeuwberg Mountains, and flows 230 miles SE. to the Indian Ocean.—(2) Or BACK'S RIVER, in the Canadian north-west, is over 440 miles long, and enters an inlet of the Arctic Ocean in 95° W. long., after passing through Lake Pelly.

Great Kanawha, an affluent of the Ohio from West Virginia, over 400 miles long.

Great Ormes Head. See LLANDUDNO.

Great Salt Lake, in Utah, stretches along the western base of the Wahsatch Mountains, about 4200 feet above the sea, forming a principal drainage centre of the vast plateau known as the Great Basin, 800 miles long by 500 broad, in Utah, Nevada, Oregon, California, and Idaho. Well-marked shore-lines on the mountains around, reaching 1000 feet higher than the present level, show that the lake had formerly a vastly greater extent. Great Salt Lake is about 75 miles long and from 30 to 50 broad, but for the most part exceedingly shallow. It contains several islands, the largest, Antelope Island, about 18 miles long. Its tributaries are the Bear, Ogden, Jordan, and Weber, the Jordan bringing the fresh waters of Lake Utah; but Great Salt Lake has no outlet save evaporation, and its clear water consequently holds a large quantity of saline matter in solution, which has varied from 22·4 per cent. (in 1850, when the lake had an area of 1700 sq. m.) to 18·4 (in 1869, when the area had increased to 2360 sq. m.). The lake has varied much in area. Several species of insects and a brine-shrimp have been found in its waters, but no fishes; large flocks of water-fowls frequent the shores. The Great Salt Lake was first explored in 1843 by Fremont, and surveyed in 1849–50 by Stansbury. See SALT LAKE CITY, and UTAH.

Great Slave Lake lies in the Canadian Northwest Territory (62° N. lat.). Its greatest length is about 300 miles, and its greatest breadth 50 miles. By the Slave River it receives the surplus waters of Lake Athabasca (q.v.); and it discharges by the Mackenzie River into the Arctic Ocean.

Greece is the easternmost of the three peninsulas projected southwards by Europe into the Mediterranean. The mountain-range which cuts off the peninsula from the continent of Europe is an extension of the Balkans. From it run chains from north-north-west to south-south-east, which form the skeleton of Greece. The western boundary of Thessaly is formed by Pindus (7111 feet), the main offshoot of the Balkans. The eastern boundary is also marked not only by the sea, but by important mountains derived from the Balkan system. These are Olympus (9750 feet), Ossa, Mavrovuni, and Pelion (5310). Othrys, a branch of Pindus, forms the south boundary of Thessaly. This branch is continued in the celebrated mountains Parnassus (8036 feet) and Helicon, forms the land of Attica, and reappears as the islands of Ceos, Cythnos, Seriphos, and Siphnos. The Peloponnese, 'the island of Pelops,' or by its modern name the Morea, is connected with northern Greece merely by the narrow isthmus of Corinth (q.v.), now pierced by a canal; its highest point is Taygetus (*Hagios Elias*, 7901 feet). The rivers of Greece are unimportant.

The ancient Greeks were a branch of that family which includes most European peoples, and also the Persians and the Hindus, and is variously called Indo-Germanic, Indo-European, and Aryan. Successive waves of Aryan tribes entering from the north drove emigrants on to and over the isles of Greece to plant Greek cities and Greek culture on the coasts of Asia Minor. At later times Sicily, the Black Sea, Libya, &c. were dotted with Greek colonies; and wherever Greeks were, there, to the Greek mind, was 'Hellas,' which is thus an ethnological rather than a territorial term. The Greeks called themselves *Hellenes*, and the inhabitants of Italy called them *Græci*. The modern Greeks are by no means pure-bred descendants of the ancient Greeks. Indeed, it has been maintained by Fallmerayer that from the 7th century A.D. there have been no pure Greeks in the country, but only Slavs. It is, however, pretty certain that the 4½ million of modern inhabitants are descendants of the three races that occupied the soil at the time of the Roman Conquest—viz. Greeks, Thracians (mod. Wallachians), and Illyrians (Albanians). Greek, ancient and modern, is a typical Aryan speech.

In 1879 the area was 19,810 sq. m., with a pop. of 1,679,775; the Thessalo-Epirot districts incorporated with the kingdom in 1881 (as an outcome of the Berlin Treaty) added to this 5000 sq. m. and a pop. of close on 300,000. In 1910 the pop. was 2,670,000. The wars of 1912–13, when the Greeks took Salonica, increased the area to about 45,000 sq. m., the population to

4,500,000. The Greek claim to the S. of Macedonia, Crete, and many islands of the Ægean was made good; but acquisitions in Epirus fell short of national aspirations, as the Powers insisted on including much of the occupied territory in the new kingdom of Albania. The Greeks in Constantinople, Asia Minor, Cyprus, and elsewhere outside the kingdom may number 5,000,000. Athens, the capital, has now a population of 170,000; Salonica, 150,000; Piræus, 75,000; Patras, 40,000; and some twenty others above 10,000. Greece, although one-half of its area is pasture-land or waste, is mainly an agricultural country; the land is mostly in the hands of peasant-proprietors, and the implements of husbandry are of the most primitive type. Besides cereals, fruits, sugar, tobacco, cotton, and dyestuffs are raised. The chief articles of export are currants (about half of the total), lead and other ores, olive-oil, wine, honey, sponges, &c. The principal imports are cereals and textile goods. The imports have an annual value of from £5,500,000 to £7,000,000; the exports, from £3,000,000 to £6,000,000. The exports to Britain average about 1¾ million, and the imports from Britain 1½ million, annually. The herding of sheep occupies about 9 per cent. of the people; the sponge and coral fisheries employ many. The minerals of Greece include lignite, argentiferous lead, zinc, iron, manganese, chrome, magnesite, emery, sulphur, salt, and marble. There are numerous distilleries, flour-mills, dyeworks, tanneries, and manufactures of machinery, leather, cotton, and silk goods, &c. About 1000 miles of railway are open (connected in the new territories with the European system).

The legislative power is vested in a single chamber of representatives, the Boulē, which consists of paid representatives, elected under the ballot by universal suffrage for a period of four years. Greece is divided for administrative purposes into twenty-six nomarchies or departments, not including the territories added to the kingdom in 1912–13. The revenue averages from £7,000,000 to £9,000,000, and the expenditure nearly balances. The total debt amounts to £35,000,000 (including £7,500,000 of internal debt). Fully a third of the expenditure is absorbed by the interest on the debt, and a fifth by the ministries of war and marine. The Greek Orthodox Church is established by law, and to it the great mass of the people belong; but there are Mohammedans in Macedonia, Thessaly, Epirus, and Crete. There are many monasteries. Elementary education is compulsory for children between the ages of five and twelve. Athens has a university and a polytechnic, as well as foreign schools of archæology. The nominal strength of the army on a peace footing is about 25,000—which in war could be raised to 200,000; all able-bodied males are liable to service. The navy is manned by 4500 officers and men.

Before the dawn of history Greece was inhabited by the non-Aryan Mediterranean race (Pelasgians ?), whose civilisation culminated in the Minoan culture of Crete (q.v.), and later became decadent in the Mycenæan stage revealed by Schliemann. Then come traces of the encroachments on one another by various Hellenic or Greek races, tribes, or alliances—Aetolians, Ionians, Bœotians, and Achaians. The first really historical fact is the invasion from the northward by the Dorians, who made themselves masters of the Peloponnesus about the beginning of the 12th century B.C. A consequence of this Dorian invasion was the colonisation of the islands and of the coasts of Asia Minor by Æolians, Ionians, and later by Dorians also. The seeds of that literature, art, and philosophy, which afterwards made Greece, and specially Athens, glorious were sown and first nurtured in the colonies. By degrees Greek colonies established themselves on the shores of the Black Sea, and along both north and south coasts of the Mediterranean, Sicily was largely Hellenised, and South Italy became Magna Græcia. Neither at home nor abroad had the Greeks the faculty of union as a nation or race; even in the fatherland there were multitudes of small states, a city with three or four miles of territory being often an independent state of itself, and frequently at war with its neighbours. Almost the only central bond of union, besides the Hellenic tongue in its various dialects, was the oracle of Apollo at Delphi. For long, two Greek states were pre-eminent. The powerful Dorian state of Sparta was reorganised about 800 B.C. by Lycurgus, the kingly institution being retained. Athens was democratic before that date, and its constitution, fixed by Solon in 594 B.C., ultimately triumphed over the tyranny of Pisistratus and his sons. Encroachments of the Persians on the Greek colonies of Asia Minor led to the invasion of Greece by the Persians in 490 B.C., an invasion gloriously repelled by the Athenians at Marathon. Xerxes was defeated at Thermopylæ, Salamis (480), Platæa, and Mycale, Athenians and Spartans for a time combining their forces. Now it was that Greek literature and Greek art attained a perfection that has made the rest of the world ever since scholars and imitators of the Greeks of the Periclean period. The next period is marked by the fratricidal struggle between Athens and Sparta in the Peloponnesian war, which ended in the humiliation of Athens in 404 B.C., and the enfeeblement of all Greece. In 379–371 the Thebans asserted themselves victoriously against the Spartans; and forty years later Philip of Macedon subjected Greece to a semi-barbarous nation. Under his son, Alexander the Great, the Greek name and the Greek fame were extended into Asia and Africa by the Macedonian king's campaigns. In 197 the Romans broke the Macedonian power, and by 146 were masters of Greece, which subsequently shared the fortunes of the Roman empire. When the Roman empire was divided (395 A.D.) into the Eastern and Western empires, Greek was of course the language of the Eastern, Greek, or Byzantine half of the Roman dominion. The Byzantine emperors fell in 1453 before the Turks, under whom the Greek race reached the lowest stage of political, intellectual, commercial, and spiritual decadence, though the Greek Church survived, and the old Greek tongue, in corrupted guise, continued to be spoken. A national re-awakening began in 1821; and by 1828, with the support of Britain, France, and Russia, Greece was a free but small and weak kingdom. The Russo-Turkish war of 1877–78 added Thessaly and part of Epirus; and ambition to secure a large share of the 'sick man's' inheritance led to the disastrous Turkish war of 1896, and the triumphant one, in alliance with Montenegro, Servia, and Bulgaria, of 1912–13, followed by that of the other allies against Bulgaria.

On the land of Greece and its people, see works by Leake (1830–35), Wordsworth (1831; new ed. 1883), Tozer (1873), Sergeant (1879, 1880), Jebb (1880), Rodd (1892), Martin (1912); on the history, the works of Thirlwall, Grote, Curtius, Finlay, and Bury.

Green Bay, capital of Brown county, Wisconsin, at the head of Green Bay and the mouth of Fox River, 65 miles NNE. of Fond du Lac by rail. It has a handsome Roman Catholic cathedral, a good harbour, export of lumber, ironworks, and sawmills. Pop. 25,700.

Greencastle, once a little Antrim village, now part of northern Belfast.

Greenhithe, a Kentish village on the Thames, 3 miles E. by N. of Dartford. Hence Franklin sailed in 1845.

Greenland, an extensive region, stretching from 59° 45′ to 83½° N. lat. and from 17° to 73° W. long., now known to be an island engirt by smaller islands, but an island of almost continental size. Even its southern end has a thoroughly arctic character. It was discovered by the earliest Scandinavian settlers in Iceland. After having been sighted by Gunbjörn, it was visited by Erik the Red, who, having explored it, founded there in 986 two colonies. The colonies afterwards came under the dominion of Norway, but were neglected and suffered from disaster and privation, until the western settlement was attacked and destroyed by Eskimo intruders from the north some years after 1340. Subsequently the connection with Europe gradually grew less and less, wholly ceasing after 1448, when Greenland almost passed into oblivion. On its rediscovery by John Davis in 1585 the Eskimo were the only inhabitants. In 1721 the modern Danish settlements on the west coast were founded by Hans Egede as missionary stations. Remarkable ruins of undoubted Scandinavian origin were early discovered on two points of the west coast, one between 60° and 61° N. lat., the other between 64° and 65°. In each case the ruins lie scattered over an area of some hundred square miles, occupying small flat and fertile spots around the heads of the fjords. The whole coast-line may be roughly estimated at 3600 miles, or 192,000, following every island, fjord, and peninsula. The area may be estimated at 850,000 sq. m., including the northward extensions recognised as part of it since the explorations of Peary (1891–92) and Erichsen (1906–8). A huge ice-sheet covers the whole of the interior. The surface of this enormous glacier, only occasionally interrupted by protruding mountain-tops, rises slightly towards the interior. In 1888, when Greenland was crossed from east to west (by Nansen), the 'divide' was found to attain some 10,000 feet above the sea. On account of this ice-cap Greenland has no rivers corresponding to its magnitude; instead of its being drained by rivers, the inland ice at certain points of the coast is thrust into the sea by forces which have their origin in extensive lateral glaciers in the interior. These points are represented by the so-called ice-fjords, through which the ice, whose thickness may be estimated at 1000 feet, is pushed on an average with a velocity of 50 feet in twenty-four hours into the sea, where it breaks into fragments—the bergs. The coast-margin, itself largely bounded with perpetual ice, is very mountainous; bold headlands, 3000 to 5000 feet high, are common, some even rising 6000 to 7000 feet. Low flat land is found only in small patches, especially round the heads of some of the fjords. These inlets generally take the form of narrow channels, frequently more than 1000 feet deep.

The climate of Greenland, when contrasted with the climate of the eastern coasts of the Atlantic in the same latitude, shows a surprising difference. The southern point of Greenland has a mean temperature corresponding to that of the most northern shores of Iceland and Norway. But the difference consists more in the want of summer than in the severity of the winter. The mean of summer, of winter, and of the year at Upernivik (73° N. lat.) is respectively 38·2°, −6·6°, and 13·3° F. The mountains of Greenland consist chiefly of granitic and gneissose rocks. Metallic ores have hitherto proved rather scarce. Besides coal, graphite has been discovered; and 10,000 tons of cryolite are annually exported for the manufacture of soda and alum. A mineralogical rarity is the native iron, of which a mass found on Disco Island was estimated to weigh 46,200 pounds. In sheltered slopes and valleys around the fjords south of 65° N. lat. copse-woods are found, consisting of alder, white birch, more rarely rowan-trees, which grow to 6 or 8 feet high. Berries are abundant, especially crowberries and whortleberries. The Greenland flora comprises 395 species of phanerogams and higher cryptogams, and 330 species of mosses. The fauna numbers 33 species of mammalia, 124 of birds, 79 of fishes. It is from the animal kingdom, especially from the seals and whales, that the natives derive almost their whole subsistence. Reindeer, of which 25,000 were shot annually in the years 1845–49, are now rather scarce. Of fish, sharks only have any commercial value, but several other kinds afford food for the inhabitants. American ships have for some years tried halibut-fishery on the banks off the west coast. The dogs used for draught are of great importance in the north. A few goats and horned cattle have been kept by the Europeans, but mainly as a curiosity.

The inhabitants of Greenland are of the Eskimo race, more or less mixed with European blood. The individuals of the mixed race hardly differ as to language and habits from the pure Eskimo. Besides the natives, about 250 Europeans usually reside in the country. Total pop. about 11,900. Since 1774 the trade of Greenland has been a royal monopoly. There are 12 chief stations for trading and the Danish Mission; the southernmost is Julianehaab (60° 42′ N. lat.), the northernmost Upernivik (72° 48′ N. lat.). At Godthaab there is a seminary for training native catechists; of late natives have been appointed pastors. The Moravian Mission has four chief stations.

See *Danish Greenland*, by Rink (Lond. 1877), and works on the expeditions of Scoresby, Clavering, Kane, Hall, Nares, Greely, Nansen, and Peary.

Greenlaw, a small town of Berwickshire (q.v.), on the Blackadder, 38 miles ESE. of Edinburgh (by rail 55). Its court-house (1834) is a large Grecian pile. Pop. 600.

Greenlet Island, a small island in Belle Isle Strait, in 51° 34′ N. lat. and 56° 36′ W. long.

Green Mountains, a portion of the Appalachians (q.v.).

Greenock, an important seaport of Renfrewshire, the seventh largest town in Scotland, on the southern shore of the Firth of Clyde, 3¾ miles by water S. of Helensburgh, and 22½ by rail WNW. of Glasgow. For more than four miles it stretches along the level strip of ancient sea-margin, or climbs up the slopes of the hills, which rise rapidly behind it to a height of 813 feet, and which command splendid views of the opposite coasts of Argyll and Dumbarton shires. Greenock has a reputation of being always wet, and the yearly rainfall does exceed 60 inches; but as the prevalent winds are from the south and west, they are generally mild. The west end of the town, with its elegant and commodious villas of every style of architecture, its beautiful esplanade, 1½ mile long, its wide and well-paved streets, planted with trees, is particularly attractive. The public buildings, many of them very handsome, include the Renaissance town-hall (1886), with a tower 245 feet high, the county buildings (1867), the custom-house (1818), the poorhouse and lunatic asylum (1876), Wood's Mariners' Asylum (1851), and the Watt Institution (1837), containing a marble statue of Watt by Chantrey. To Sir Michael Shaw-Stewart the town is largely indebted for the Well Park (1851), the Wellington Park (1872), and the Lyle Road (1880). The new cemetery, 90 acres in extent, with its Watt cairn, and the magnificent water-works (1827–83) also deserve mention. The harbour-works date from 1707, and have cost upwards of 1½ million pounds. Accessible at all states of the tide, they include Victoria Harbour (1850), the Albert Harbour (1866), and the James Watt Dock (1886), besides dry-docks and graving-docks. The tonnage of vessels belonging to Greenock rose from 30,000 in 1825 to nearly tenfold that total at the present day; whilst the tonnage of vessels entering the port ranges between 1,000,000 and 1,600,000 per annum. Shipbuilding (mostly iron or steel steamers) has been carried on since 1760; sugar-refining, commenced in 1765, has sadly declined. There are also manufactures of steam-engines, anchors and chain-cables, ropes, sail-cloth, paper, wool and worsted, sugar-machinery, torpedoes, &c. Since 1832 Greenock has returned a member to parliament. Pop. (1696) 1328; (1801) 17,190; (1851) 36,689; (1881) 66,704; (1911) 75,140. Created a burgh of barony in 1635, Greenock owes its growth from a mere fishing-village to the Shaw family and to the Treaty of Union (1707), by which free commerce was opened up with America and the West Indies. Besides being the birthplace of Kidd the pirate, Watt, John and Edward Caird, MacCunn, and Sir James Guthrie, it has memories of Rob Roy, John Wilson, and Galt, and contains the grave of Burns's 'Highland Mary.' See Provost Dugald Campbell's *Historical Sketches of the Town and Harbours of Greenock* (2 vols. 1879–81).

Greenore, a small village (pop. 300), railway terminus, and pier of County Louth, on the S. side of Carlingford Lough, 13 miles SE. of Newry.

Green River (1) rises in Wyoming, and flows 750 miles through Colorado and Utah to the Grand River, a branch of the Colorado.—(2) Rises in Kentucky, and flows 350 miles to the Ohio.

Greenville, capital of Greenville county, South Carolina, on Reedy River, 95 miles (143 by rail) NW. of Columbia, with a Baptist university (1851), and manufactures of cotton, oil, flour, furniture, and machinery. Pop. 15,900.

Greenwich (*Gren'itch;* A.S. *Green-wic*, 'green creek or bay'), a parliamentary borough of Kent (now, officially, the county of London), 5 miles ESE. of London Bridge, on the south bank of the Thames, here crossed by a steamship ferry, on the American system, which was opened in 1888. Greenwich Hospital occupies the site of an old royal palace, in which Henry VIII. and his daughters Mary and Elizabeth were born, and Edward VI. died. Founded in 1694 by Queen Mary as a mark of the gratitude which England felt towards her brave sailors who had fought at La Hogue, it consists of four distinct quadrangular piles—King Charles's building (1664), designed by Inigo Jones, and Queen Anne's, King William's, and Queen Mary's buildings, all designed by Sir Christopher Wren. The Great Hall is remarkable for its painted ceiling, a work carried out by Sir James Thornhill in 1707–27. It contains several valuable pictures of great naval battles and of the heroes who fought in them; there is still preserved the coat which Nelson wore when he was shot at Trafalgar. The chapel is a fine specimen of Greek architecture. A statue of George II. by Rysbrach adorns the central square. The first pensioners were received in the hospital in 1705; these numbered 100; in 1814 the maximum number was reached—viz. 2710. In 1763 out-pensions were granted; in 1849 the number of in-pensioners began to decrease, until in 1865 they only numbered 1400. For some time the in-pensioners had been discontented, and in 1869, when they had the option of receiving an out-pension, a very large majority preferred to go to their friends. Greenwich Hospital was thus disestablished by the votes of the very men for whose benefit it was originally founded. Out of the annual income (some £170,000) numerous pensions were provided for; 1000 boys, the sons of seamen and marines, are maintained and educated at Greenwich Hospital Schools at an average cost of £23,000 a year; gratuities are granted to widows of seamen and marines; and 50 orphans of officers receive grants for their education. It is estimated that 9000 persons, exclusive of the children mentioned, derive benefit from the funds. In 1873 Greenwich Hospital became the college for the Royal Navy, organised to provide for the instruction of naval and also marine officers in all the branches of their professional education. There are also the Naval Museum, the Royal Hospital School (1712), and the Royal Observatory, which crowns the hill behind the hospital, and was built by Charles II. in 1675, the first astronomer-royal being Flamsteed. The Whitebait Dinner was a banquet held intermittently by the cabinet-ministers to celebrate the termination of a parliamentary session. The manufacturing establishments include engineering, telegraph works, chemical works, &c. Greenwich returned two members down to 1885, when it was divided into three parliamentary boroughs—Greenwich, Deptford, and Woolwich, all now metropolitan boroughs of London. Pop. of Greenwich (1911) 95,977. In 1881 it was but 65,411. See a work by L'Estrange (2 vols. 1886).

Greenwich, the south-westernmost town of Connecticut, with many handsome residences, 28 miles NE. of New York. Pop. 15,000.

Greifenberg, a town in the Prussian province of Pomerania, 55 miles NE. of Stettin. Pop. 7500.

Greifenhagen, a town of Prussia, on the Oder, 13 miles SSW. of Stettin. Pop. 7000.

Greifswald, a town in the Prussian province of Pomerania, 2½ miles from the mouth of the Ryck, and 25 by rail SE. of Stralsund. The university (1456) has from 700 to 1000 students, chiefly in medicine and theology, and a library of 140,000 volumes. There is a considerable shipping trade. The industries include the making of machinery, chains, and railway wagons, and herring-curing; timber, fish, and corn are exported. Pop. 25,000. Shortly after being made a town (1250), Greifswald joined the Hanseatic League. At the peace of Westphalia (1648) it came to Sweden; but, with the whole of Swedish Pomerania, was ceded to Prussia in 1815.

Greinord. See GRUINARD.

Greiz (*Greits*), capital of the German principality of Reuss-Greiz, on the White Elster, 47 miles SSW. of Leipzig. It has three castles, a 13th-century church, and manufactures of cotton and woollen goods, shawls, linen, &c. Pop. 24,000.

Grena'da, a volcanic island in the British West Indies, lying N. by W. from Trinidad, mountainous and picturesque, with an area of 133 sq. m. Some of the craters in the central ridge of mountains, rising to 3200 feet, have been transformed into large lakes. Streams and mineral springs abound. There are several good natural harbours, that of St George (pop. 5000), the capital of the island and the headquarters of the government of the Windward Islands, being one of the best in the West Indies. There are some 70,000 inhabitants, who are almost all negroes, and cultivate cocoa, coffee, and oranges. A little rum is manufactured. Columbus in 1498 was the discoverer of the island, which in 1783 was ceded by France to England.

Grenadines, a chain of West Indian islets, extending between Grenada and St Vincent, with a total area of 13 sq. m., and 7000 inhabitants. The largest is Carriacou (11 sq. m.).

Grenelle, a south-western suburb of Paris.

Grenoble (Lat. *Gratianopolis*), since 1839 a first-class fortified city of France, capital of the dep. of Isère, on the river Isère, 59 miles SE. of Lyons. The 15th-century cathedral of Nôtre Dame, St Laurent, St André (with Bayard's monument, transferred hither in 1822), and the Gothic palais-de-justice are the most interesting buildings. The university has some 350 students. The library contains 270,000 volumes and 7500 MSS. The staple manufacture is kid gloves (employing 22,000 persons in 115 factories). There are also manufactures of liqueurs (Chartreuse), hats, cement, and hardware. Pop. (1872) 35,280; (1911) 77,438. Grenoble, originally a city of the Allobroges, was fortified by the Romans. Later on it became the capital of Dauphiné, passing with it to France in 1349.

Greta, a Cumberland stream flowing 4 miles to the Derwent at Keswick, where is Greta Hall, Southey's home.

Gretna Green, a Dumfriesshire village, near the head of the Solway Firth, 10 miles NNW. of Carlisle. After the abolition of Fleet marriages (1754), English persons wishing to marry clandestinely had to get out of England. Thus the practice arose of crossing the Border into Scotland, where Gretna Green, or Springfield, as the first village, had by 1771 become the resort of runaway couples. The 'priest' or 'blacksmith' might be any one—ferryman, toll-keeper, or landlord; his fee ranged from half a guinea to £100; and 'church' was commonly the tollhouse till 1826, and afterwards Gretna Hall. At the tollhouse nearly 200 couples were sometimes united in a twelvemonth. Coldstream and Lamberton, in Berwickshire, were chapels-of-ease to Gretna for the eastern Border, as also till 1826 was Portpatrick, in Wigtownshire, for Ireland. One of the earliest Scottish runaway matches on record is Richard Lovell Edgeworth's (1763); amongst his successors were Lords Brougham, Dundonald, Eldon, and Erskine, besides numerous scions of the noble families of Villiers, Fane, Beauclerc, Coventry, Paget, &c. In 1856 all irregular marriages were rendered invalid unless one of the parties had been residing in Scotland for three weeks previously. See books by Hutchinson (1844) and 'Claverhouse' (1905).

Grey Mare's Tail, a Dumfriesshire waterfall, 10 miles NE. of Moffat, on the Tail Burn, running from Loch Skene to Moffat Water.

Greymouth, a rising port of New Zealand, on the west coast of South Island, at the mouth of the Grey River, 190 miles SSW. of Nelson. Extensive harbour-works, including two breakwaters, were carried out in 1885-95; railways to Nelson and Christchurch date from 1887. The entire district is auriferous, but is even more famous for its coal. Pop. 6000.

Greytown, or San Juan del Norte, the only Nicaraguan port on the Caribbean Sea, is on the north fork of the San Juan, which was nearly silted up till 1889, when labourers were despatched from the United States to commence work on the Nicaraguan inter-oceanic canal, of which Greytown was the proposed Atlantic terminus, and to construct a breakwater. Pop. 2500.

Grigoriopol, a town of South Russia, on the Dniester, 82 miles NW. of Odessa. Pop. 7918.

Grimes Dyke. See Antoninus' Wall.

Grimisay, an Inverness-shire island, between North Uist and Benbecula, measuring 3 by 1½ miles. Pop. 360.

Grimma, a town of Saxony, on the Mulde, 19 miles SE. of Leipzig by rail. It has a town-hall (1442), a former royal castle (now a court-house), and a celebrated school (1550, the 'Moldanum Illustre'). Pop. 12,000.

Grimsby, or Great Grimsby, a parliamentary, municipal, and county borough and seaport of Lincolnshire, on the Humber's right bank, 20 miles ESE. of Hull and 41 NE. of Lincoln. The parish church, a good cruciform Early English edifice, was restored in 1859. A statue of the Prince-Consort was unveiled in 1879, and a public park of 27 acres opened in 1883. In Edward III.'s time Grimsby was a port of considerable importance, which, however, it gradually lost as its harbour became silted up. The town is famous as the largest fishing-port in the kingdom, its trawlers and smacks being mostly engaged in the cod, herring, and whelk fisheries. Its importance as a landing-place of fish dates from 1849-58, when docks began to be constructed under the auspices of the Great Central Railway, which carries the fish to London and the Midlands; extension was undertaken in 1914. The great Immingham dock, 4 miles NW., dates from 1912. The industries include shipbuilding, tanning, brewing, cordage-making, and flax-dressing. About 3000 vessels, of 1,000,000 tons, enter every year. The imports reach an annual value of 12 millions sterling, and the exports of 14 millions. Grimsby since 1832 has returned only one member. Pop. (1851) 12,263; (1871) 28,503; (1881) 45,351; (1911) 100,843—74,663 within the municipality. See works by Oliver (1825) and Davenport (1866).

Grindelwald, a beautiful Swiss valley (3468 feet) in the Bernese Oberland, 12½ miles long and 4 broad, forms the approach to the two Grindelwald glaciers. It is a winter health-resort.

Grinnell Land, a barren, mountainous Polar tract on the west side of Kennedy Channel (the northern continuation of Smith's Sound), which separates it from Greenland. It was discovered by the U.S. Franklin expedition of 1850, and named after Henry Grinnell (1800-74), New York, who fitted out the expedition. Greely in 1882 explored it. North and south it is covered with ice-caps; between them lie valleys that get quit of their snow in summer, and support herds of musk oxen. In the interior are Lake Hazen, 60 miles long, and two ranges of mountains, one with Mount Arthur (5000 feet). The northern part is called Grant Land, and Grinnell Land is continuous with Ellesmere Land to the south. There is coal in the island.

Grinstead, East, an old-fashioned town of Sussex, 36 miles S. by E. of London by rail, which till 1832 returned two members to parliament. Here is Sackville College, of which Dr J. M. Neale was warden, and the convent of the sisterhood of St Margaret, with Home and Orphanage. Pop. of urban district, 7100.—West Grinstead is 18 miles to the SW. Pop. 1600.

Griqualand West and **East** are two British districts of South Africa, one a part of the Cape Province, the other a dependency of it, and named from the Griquas or Bastaards, who are a mixed race sprung from Dutch settlers and native women.—*Griqualand West* lies to the north-east of the Cape Province, is bounded S. by the Orange River, N. by Bechuana territory, E. by Orange Free State, W. by the Kalahari country. Portions of the country are suitable for sheep-farming and agriculture, but the chief source of wealth is the diamond-fields. From the discovery of the first diamond in 1867, a steady stream of immigration set in; settlements were formed representing all nationalities, and digging was vigorously prosecuted. Diamonds to the value of above £12,000,000 were found there during 1871–80, and of perhaps £100,000,000 between 1867 and 1910. Griqualand West was annexed in 1871, and incorporated with Cape Colony in 1880. Kimberley, connected by rail with the Cape since 1885, is the seat of government. Other towns are De Beers, Du Toit's Pan, Bultfontein, Barkly, and Griqua Town. Area, 15,197 sq. m.; pop. 110,000, of whom about 40,000 are whites.—*Griqualand East* is that part of No-Man's-Land which lies between the Kaffir border and southern Natal. It was allotted to the Griqua chief, Adam Kok, who had removed thither with 15,000 Griquas, and to the Basutos who had previously migrated hither. This territory was annexed to the Cape in 1875. Chief village, Kokstadt. Area, about 8000 sq. m.; pop. 250,000, of whom about 20,000 are whites.

Gris-nez (*Gree-nay'*), Cape, a headland (164 feet high) in the French dep. of Pas-de-Calais, opposite Dover, is the point of land nearest to England (barely 20 miles). A lighthouse surmounts it.

Grisons (*Gree-zong'*; Ger. *Graubünden*), the largest and the most thinly peopled of the Swiss cantons, is bounded E. by Tyrol and S. by Lombardy. Area, 2773 sq. m.; population, 120,000, nearly half of German stock, and more than half Protestants. The whole canton is an assemblage of mountains intersected by narrow valleys. These last form three groups, of which the first and most important lies along the course of the Rhine; the second, forming the Engadine (q.v.), extends north-east along the Inn; and the third belongs to the basins of the Ticino and the Adige. During the middle ages the Bishop of Chur sought to oppress the people, who in self-defence formed themselves into leagues. One of these (1424), was called the *gray* league (Ger. *der graue bund*), from the gray home-spun worn by the unionists, and hence the German and French names of the canton. In 1471 these separate unions entered into a general federation, which in 1497–98 formed an alliance with the Swiss cantons.

Grodek, a town of Austrian Galicia, 20 miles SSW. of Lemberg. Pop. 12,116.

Grodno, the capital of a Russian province, on the Niemen's right bank, 148 miles by rail NE. of Warsaw. It manufactures cloth and tobacco. Pop. 55,000.—The province has an area of 14,926 sq. m., and a pop. of 2,000,000.

Groly, a Leicestershire manor, the birthplace of Lady Jane Grey, 4¼ miles WNW. of Leicester.

Groningen (*Gro'ning-en*), the north-eastern province of Holland. Area, 887 sq. m.; pop. over 333,000.—The capital, Groningen, is 25 miles by rail SW. of Delfzihl, on Dollart Bay, and 34 E. of Leeuwarden. The university (1614), with new buildings of 1850, and some 360 students, possesses a library, a botanic garden, an observatory, &c. A celebrated deaf and dumb institution was founded in 1790. The manufactures include linen and woollen goods, tobacco, brushes, Dutch tiles, and boat-building. Groningen, already an important place in the 9th century, joined the Hanseatic League in 1282. Pop. (1876) 40,165; (1909) 76,282.

Groote Eylandt (Dutch, 'great island'), a hilly uninhabited island, 40 miles in diameter, on the west side of the Gulf of Carpentaria, in North Australia. It is surrounded by reefs.

Grossenhain, a town of Saxony, 21 miles by rail NNW. of Dresden. It manufactures cloth, hosiery, machinery, &c. Pop. 12,244.

Grosse'to, a Tuscan town on the Ombrone, near its mouth, 160 miles SE. of Leghorn by rail, with a fine cathedral. Pop. 6000.

Grossglockner, the highest peak (13,458 feet) of the eastern Alps, is situated near the meeting-point of Tyrol, Carinthia, and Salzburg.

Grosswardein (Magyar *Nagy-Varad*), an old town of Hungary, on the Sabes (Rapid) Körös, 152 miles by rail SSE. of Pesth. Formerly a fortress, it is the seat of Roman Catholic and Greek bishops, and manufactures spirits, oil, vinegar, tiles, matches, pottery, and wine. Population, above 60,000. Near it is the Bishop's Bath, with alkaline sulphur-springs (104°–106° F.).

Grottaglie, a town of Italy, 12 miles ENE. of Taranto. Pop. 8880.

Grotte, Le, a town of Sicily, in the province of Girgenti. Pop. 8775.

Gruinard, a Ross-shire bay, forming part of Loch Broom.

Gruinnard, a north-west sea-loch of Islay island, 4½ miles long.

Grünberg, a town of Prussian Silesia, 34 miles NW. of Glogau by rail. Pop. 23,396.

Grütli. See Rütli.

Gruyère (*Groo-yehr'*), a little Swiss town, 16 miles SSW. of Freiburg, gives its name to the famous whole-milk Gruyère cheese. Pop. 1375.

Gryfe, a Renfrewshire stream, flowing 16 miles ESE. to the Black Cart.

Guadalajara (*Guadalahâ'ra*), (1) the decayed capital of a Spanish province on the Henares, 35 miles NE. of Madrid by rail. Pop. 11,051.—The province occupies the northern part of New Castile, and has an area of 4660 sq. m. Pop. a little over 210,000.—(2) Capital of the Mexican state of Jalisco, and the second city of the republic, on the Rio Grande de Santiago, here crossed by a fine bridge of 26 arches, 280 miles WNW. of Mexico City by rail. It has an archiepiscopal cathedral, the government palace, a mint, university, tramways, hospitals, and school of art. It is the chief seat of the cotton and woollen manufactures of the country, and the Guadalajara pottery and metal wares, like the confectionery, have a reputation all over Mexico. Pop. 121,200.

Guadalaviar (anc. *Turia*), a river of eastern Spain, rises near the Tagus, in SW. Aragon, and flows 190 miles SSE. to the Mediterranean at Grao, 1½ mile below Valencia.

Guadalquivir (*Guadalkiveer′*; Arab. *Wádi-al-Kebir*, 'the great river;' anc. *Bœtis*), the chief river of Spain, rises in the Sierra de Cazorla, in the east of the province of Jaen, and flows 374 miles SW. through or along the borders of the provinces of Jaen, Cordova, Seville, Huelva, and Cadiz, to the Gulf of Cadiz at San Lucar de Barrameda. The principal towns on its banks are Cordova and Seville, to the last of which, about 80 miles above its mouth, the river is tidal and navigable for steamers. Below Seville it twice divides into two branches, forming two islands. Its chief affluents are the Guadajoz, Jenil, Guadalimar, and Guadiato. At Montoro it breaks through the outlying spurs of the central Sierra Morena in a series of rapids, but its lower course is sluggish and dreary. During the equinoctial rains the river rises sometimes 10 feet, and the country is yearly flooded as far up as Seville.

Guadalupe Hidalgo, 5 miles by tramway N. of Mexico City, is the chief Mexican place of pilgrimage, its brick cathedral having a miraculous picture of a brown Virgin. The treaty which ended the war with the United States was signed here, 2d February 1848.

Guadeloupe, the chief of the French Lesser Antilles in the West Indies, lies 77 miles N. by W. of Martinique, and contains, including dependencies, 583 sq. m., with a pop. of about 185,000, mostly blacks and mulattoes. It is divided into Grande-Terre on the east, and Basse-Terre or Guadeloupe proper on the west, by a strait of from 40 to 150 yards in width, which bears the name of Salt River. The nomenclature of the two islands appears curiously perverse, for Basse-Terre is the loftier of the two (the volcanic summit La Soufrière, 5497 feet), and Grande-Terre is the smaller. Earthquakes are frequent. The chief product is sugar; coffee also is exported. Point-à-Pitre (18,000) is the principal town and port. The dependencies are the islets of Désirade, Marie-Galante, and Les Saintes, besides St-Barthélemy and part of St-Martin to the north-west. Guadeloupe, discovered by Columbus, became finally French in 1816.

Guadiana (Arab. *Wádi Ana*, anc. *Anas*), one of the five principal rivers of the Iberian peninsula. Rising as the Zancara in the east of the plateau of La Mancha, it flows south and west to the Ojos, below which point it receives the name of the Guadiana. It bends southward at Badajoz, forms for some miles the boundary between Spain and Portugal, then flows through part of Alemtejo province, returning to form the frontier again, until it empties into the Gulf of Cadiz. It is 510 miles long, but is navigable only for 42 miles. Its chief affluents are the Jabalon, Zujar, Matachel, Ardila, and Chanza.

Guaira, La, the port of Carácas (q.v.), on a narrow, shadeless strip of land between the mountains and the Caribbean Sea. Pop. 15,293.

Gualeguay, a town of Entre Rios, Argentina, on the Gualeguay River, a sub-affluent of the Paraná: there is a railway (7 miles) to Puerto Ruiz at its mouth. Pop. 11,000.

Gualeguaychú, a town of Entre Rios, Argentina, on the Gualeguaychú River, which enters the Uruguay 11 miles below, with a great beef-preserving factory. Pop. 14,000.

Guam, an island of the Ladrones (q.v.), belonging to the United States.

Guanajuato (*Gwanahwâ′to*), an inland state of Mexico, with an area of 12,500 sq. m., and a pop. of over 1,000,000. The capital, Guanajuato, is a mining-town curiously situated on a deep ravine, traversed by a mountain-torrent. The public buildings include a large government palace, a mint, cathedral, public granary, &c. The electric light and telephones have been introduced. There are amalgamation works, blanket-factories, and cotton-printing works. Pop. 35,112.

Guanare, capital of the state of Zamora, in Venezuela, on the river Guanare. Pop. 10,390.

Guaporé, a head-stream of the Madeira (q.v.).

Guardafui, Cape, the most eastern point of the African continent, and the extremity of the Somali country. It is in 11° 50′ N. lat. and 51° 14′ E. long.

Guardbridge, a Fife village, 4 miles WNW. of St Andrews. Pop. 724.

Guastalla, a town of Italy, on the Po, 19 miles NE. of Parma. A bishop's seat (since 1828), it has an old castle, and gave name in 1406 to a countship, in 1621 to a duchy. Pop. 10,000.

Guatemala (*Guatāmâ′la*), a republic of Central America, bounded by Mexico, Belize, the Gulf of Honduras, Honduras, San Salvador, and the Pacific. Area, 46,600 sq. m., much of it wholly unexplored. The greater part of Guatemala is mountainous, the highlands having a mean elevation of 7000 feet above the sea; but the surface presents great variety, with extensive plateaus, terraces, and upland valleys—the last notable for their beauty, fertility, and favourable climate. Of the volcanoes, several are active; the most noted is Fuego (12,075 feet). Earthquakes are frequent; sulphur and other hot springs are numerous. The climate, except in the low-lying districts (where the temperature ranges from 70° to 90°), may be described as perpetual spring, and is generally healthy, but the hot coast-lands on the Pacific are liable to yellow fever. Gold and silver are worked, as also salt and saltpetre. Other minerals are lead, iron, copper, coal, quicksilver, marble, porphyry, suphur, zinc, gypsum, &c. But the wealth of the country consists in its rich soil, which, according to the altitude, yields the products of every zone. The forests contain over a hundred kinds of timber trees. Maize, haricot beans, peas, potatoes, wheat, rice, grow well in various districts. Other products are coffee (the chief export), sugar, cacao, india-rubber, tobacco, cotton, hemp, sarsaparilla, and many medicinal plants, bananas, and other fruits. The fauna includes the jaguar, puma, ocelot, coyote, red-deer, tapir, peccary, armadillo, several monkeys, iguanas, turtles, and snakes. The birds are of great variety and beauty; the national emblem is the superbly coloured quetzal. The industries are chiefly confined to the manufacture of woven fabrics, pottery, saddlery, chocolate, and the fiery *aguardiente*, the sale of which is a government monopoly, yielding about a fourth of the annual revenue. The development of the country, however, is greatly hampered by the absence of serviceable roads. The average annual imports vary from six to eight million dollars, the annual exports average about fourteen million dollars. The imports, of which the United States supplies about one-half and Britain one-fourth, are chiefly specie, cotton, woollen, and silk goods, wines and spirits, railway plant, and flour; the principal exports are coffee, rubber, sugar, fruits, and hides.

About a third of the people are said to be of European descent, and the rest aborigines (Maya-Quichés) and mixed races. In 1910 the pop. was just under 2,000,000. The capital, Guatemala (q.v.), is the largest town. The state religion is the Roman Catholic. The executive is vested in a president and council. The revenue, about £1,000,000, is supposed to cover the expenditure; but the finances are mismanaged, and there is a foreign debt of £2,000,000, and an internal debt of £3,000,000. The exports have a value of £2,000,000 a year. After three centuries of Spanish rule, under which the viceroyalty of Guatemala embraced all Central America, independence was proclaimed in 1821; and the present republic was founded in 1839. A rising in 1906 led to treaties of arbitration between the Central American republics. See books by Brigham (1887), Niederlim (1898), and Fife (1914).

Guatemala (*Santiago de Guatemala;* also *Guatemala la Nueva*), capital of the republic of Guatemala, and the largest and most important city of Central America, stands on a wide plateau, nearly 4900 feet above sea-level, and 72 miles by rail NNE. of its port, San José. In the plaza the metropolitan cathedral towers above the government buildings and the archbishop's palace. Tramways and the electric light have been introduced, and all the foreign trade of the republic is concentrated here. Pop. 125,000. The present city is the third capital of the name. The first, now called *Ciudad Viejo*, has a pop. of some 3000 Indians. The second, *Guatemala la Antigua* (Old Guatemala), 2½ miles NE. of the first and 21 miles WSW. of the present capital, was one of the finest cities of America, with 60,000 inhabitants; in 1773 it was for the second time destroyed by an earthquake, but among the noble ruins a new city has arisen, sheltering a pop. of 14,000.

Guaxaca. See OAXACA.

Guayaquil (*Gwīakeel′*), the chief commercial city of Ecuador, lies in the fertile valley of the Guayas, 30 miles above its mouth. It has a custom-house, cathedral, town-hall, tramways, water-works, a statue to Bolívar (1889), &c. The manufactories include steam sawmills, foundries, machine-shops, ice-factories, and a lager beer brewery; and the place is noted for its straw hats and hammocks. Ships drawing 18 feet can come up to the breakwater, and below the town are a wharf and dry-dock. It has had railway connection with Quito since 1908. The annual exports average £1,500,000, of which cocoa represents nearly two-thirds; other items are coffee, ivory-nuts, rubber, hides, and specie. The town was founded by Orellana in 1537, and removed to its present site in 1693. Pop. 54,515. The Bay of Guayaquil is the only important bay on the west coast of South America north of Patagonia.

Guaymas, a well-sheltered port of Mexico, on the Gulf of California, the terminus of the Sonora Railway. Pop. 6000.

Guayra. See GUAIRA.

Gubbio (anc. *Iguvium* or *Eugubium*), a decayed city of Central Italy, on the SW. declivity of the Apennines, 20 miles NNE. of Perugia. It has a 13th-century cathedral, several mediæval palaces, and remains of an ancient theatre. The celebrated Eugubine Tables are preserved in the town-house. Gubbio was noted about 1525 for its majolica ware, still imitated in a few factories. Pop. 10,000.

Guben, a manufacturing town in the Prussian province of Brandenburg, at the head of the navigable portion of the Neisse, 28 miles S. of Frankfort-on-the-Oder. The principal staples are hats and cloth. There are also wool-spinning, tanning, machine factories, &c. Pop. (1875) 23,738; (1900) 33,122; (1910) 38,953.

Guebwiller. See GEBWEILER.

Guelderland (*Geldern*, *Gelderland*), a Dutch province between the Zuider Zee on the NW. and the Prussian dominions on the SE. It has an area of 1957 sq. m.; a population of 650,000, two-thirds Protestants. The former duchy was more extensive than the modern province, stretching southwards along the Meuse to beyond Venlo. In 1814 it was finally divided between Holland and Prussia.

Guelph, an inland port of entry in Ontario, capital of Wellington county, on the river Speed, 45 miles W. by S. of Toronto by rail. It is the seat of an agricultural college, and has seventy factories, mainly for iron and wood working. Pop. 15,500.

Guernsey, second in size of the Channel Islands (q.v.), is 30 miles in circumference, and 28 sq. m. in area. The population has increased since 1820 from 20,000 to 41,854 (1911). The lowest part is to the north (L'Ancresse), the highest to the south (Haut Nez) being 349 feet above sea-level. St Peter Port, the only town, has a good harbour; a large public school (1563), named after Queen Elizabeth; a fine church, dating from the 13th century; two libraries; a good public market; &c. The climate is equable and favourable to the growth of fruit, flowers, and vegetables. Two-thirds of the island are under cultivation, and great quantities of fruit and vegetables are exported to England, as is also a hard gray building granite. Guernsey is 127 miles from Land's End, 109 from Falmouth, 113 from Southampton, 69 from Start Point.

Guerre′ro, a southern state of Mexico, on the Pacific, with an area of 22,863 sq. m. It is a broken mountainous country, rich in minerals. Population, 605,000. Capital, Chilpancingo (6500); chief port, Acapulco (q.v.).

Guiana, or GUAYANA, in its widest signification is the region lying between the Orinoco and the Amazon in South America, the western boundary being somewhat vague. It consists of five divisions, known respectively as Venezuelan, British, Dutch, French, and Brazilian Guiana. But Venezuelan and Brazilian Guiana being incorporated in those states, we have to describe here only British, Dutch, and French Guiana. These three colonies abut upon the Atlantic, in the order named, between Venezuela on the north and Brazil on the south. The physical conformation is practically the same in all three. Next the Atlantic is a fringe of very fertile alluvial soil, lying in many parts below the sea-level, and generally inundated in the rainy seasons, with mangrove swamps and mud-flats skirting the coast. This alluvial zone, from 10 to 40 miles wide, contains virtually the only cultivated territory in the three colonies. Beyond it the contour rises by a series of terraces up to an undulating savannah region 150 feet higher. The third and innermost division consists of the almost unexplored upland country, a plateau region ridged with mountain-chains (which rise in places to 3000 or 3500 feet), and everywhere covered with a dense primeval forest. The rivers are navigable only up to the line of the rapids and falls; communication is nevertheless principally effected by the rivers and canals. The climate, as beseems a region lying between 1° and 8° N. lat., is hot and moist, but on the whole tolerably uniform, though the thermometer ranges from 95° to 70° F. The rainfall is heavy—75 to 140 inches in the year. Vegetation is of extraordinary richness and luxuriance—many kinds of timber, gums, balsams, wax, bark, fibre, oil, nuts, juices, drugs, caoutchouc, sarsaparilla, cinchona, tonka beans, arnotto, angelica, cotton, tobacco, food-plants, fruits, and a prodigious quantity of creepers, ferns, tree-ferns, and flowers, including orchids. The most conspicuous branch of the fauna is the birds, including the stink-bird (a vulture), eagles, owls, humming-birds, orioles, toucans, and parrots. Mammals are represented by jaguars, tiger cats, peccaries, tapirs, deer, sloths, armadillos, ant-eaters, agoutis, capybaras, and manatees. The native Indians, who still for the most part lead a 'wild' life in the forests, constitute several different tribes, and seem to belong to two distinct stocks, indigenous tribes and Caribs.

The first Europeans to explore the coast of Guiana seem to have been the Spaniards Alonzo de Ojeda in 1499 and Vicente Pinzon in 1500. Apart from semi-buccaneering expeditions and landings, the first successful colonisation of Guiana seems to have been made by the Dutch, on the Essequibo, shortly before 1613. The English got firm footing at Surinam in 1650, and the French on the Kourou and Oyapock in 1664. Two years later the English seized both French and Dutch Guiana, but restored them in 1667, and at the same time handed over Surinam to the Netherlands in exchange for New Amsterdam—i.e. New York. During slave-holding times sugar-planting brought the colonies some degree of prosperity; but it was very sensibly crippled by the abolition of slavery, and the cultivation of beet-root for sugar caused a serious crisis in Guiana cane-planting. Gold-mining is a progressive industry.

British Guiana, or Demerara, with a coast-line of 320 miles, is separated from Dutch Guiana on the E. by the river Corentyn; S. and W., next Brazil and Venezuela, the boundary was determined in 1899-1904. Estimated area, 109,000 sq. m. The western part of the colony is diversified by chains of the Pacaraima or Parima mountain-system, which rise to some 8000 or 9000 feet in the table-topped Roraima (q.v.). The more important rivers are the Corentyn, Berbice, Demerara, Essequibo, all flowing north into the Atlantic; and the Takutu, which feeds a tributary of the Amazon. The exports embrace sugar, rum, molasses, timber, shingles, charcoal, cocoa-nuts, balata and other gums, and gold. The total value of the exports, which go principally to the United Kingdom, United States, and West Indies, has in the last thirty years fallen from over £3,000,000 to under £2,000,000. The imports (mostly from the United Kingdom), including flour, rice, dried fish, butter, pork, and beef, average from £1,700,000 to £2,000,000. The population in 1911 was over 296,000, and included Europeans, Creoles, negroes, coolies from India, Chinese, natives of Madeira and the Azores, and some 8000 aboriginal Indians. Most of the plantation work is done by immigrant coolies from British India and by Chinese. The colony is divided into three counties, Berbice, Demerara, and Essequibo. The ports are Georgetown (q.v.), the capital, and New Amsterdam. The administration is in the hands of the governor, appointed by the crown, and two legislative councils. The colony possesses one line of railway, from Georgetown to Mahaica (21 miles long), telegraphic communication with Europe and the United States, and a good system of postage.

Dutch Guiana, or Surinam, with an area of 46,058 sq. m., and a coast-line of 240 miles, has for its boundary on the west the river Corentyn, and on the east the Maroni or Marowijn, which separates it from French Guiana—some parts on the upper Maroni being claimed both by Dutch and French. Other rivers are the Surinam, Saramacca, Coppename, and Nickerie. The greater part of the surface is covered with unexplored primeval forest, scarcely more than 210 sq. m. of the entire area being cultivated. Sugar, cocoa, gold, rum, molasses, bananas, rice, and corn are the staple productions. The total annual value of the exports is from £350,000 to £450,000, of the imports from £500,000 to £600,000. Trade is carried on principally with Holland, the United States, Britain and her dependencies. The capital is Paramaribo (q.v.). The pop., which is very heterogeneous, now numbers about 85,000, of whom nearly one-half live at Paramaribo. Included in the total are about 4000 Bush Negroes (negroes who escaped during slavery times—i.e. before 1863), and 6000 Indians.

French Guiana, or Cayenne, is separated from Dutch Guiana on the west by the Maroni, from Brazil by the Tumuc-Humac Mountains and the Oyapock, although the French claim all the coastal districts as far south as the Amazon. Taking the Oyapock as boundary (fixed in 1900), the area of the colony is about 34,000 sq. m., whilst the length of coast-line is about 240 miles; the area used to be given at 46,850 sq. m. Cayenne (q.v.), the capital of the colony, stands on a rocky promontory. The only considerable exports are cocoa, arnotto (roucou), and gold. The total exports and imports have an annual value of about £800,000, the exports representing nearly half of that sum. The population of the entire colony only amounts to about 35,000. From 1853 to 1864 an attempt was made to found penal colonies in French Guiana, all of which proved disastrous, partly owing to the unhealthiness of the climate, and partly to the harsh and ill-devised regulations. The immigrant criminals now come (since 1864) exclusively from Africa (Arabs and negroes) and Asia (Annamites). Slavery was abolished in 1848.

See Raleigh's *Discovery of Guiana* (1595; ed. Schomburgk, 1848); for British Guiana, various works by Schomburgk (1840-48), Brete (1868), E. im Thurn (1883), Bayley (1909), and Rodway (1893-1912); for Dutch Guiana, Palgrave (1876); and for French Guiana, French works by Mourcé (1874), Ribaut (1882), and Brousseau (1901).

Guienne, an old French province, comprehending the present deps. of Gironde, Lot, Dordogne, Aveyron, with portions of Tarn-et-Garonne and Lot-et-Garonne. With Gascony it formed Aquitania, of which name Guienne is a corruption.

Guildford, the county town of Surrey, lies in a break of the chalk-ridge of the North Downs, on the navigable Wey, 30 miles SW. of London. In Cobbett's phrase a 'happy-looking' place, it wears an air of order and cleanliness, and mainly consists of one street, running up the steep east side of the river, which here is crossed by an old five-arch bridge. Its houses are still rich in quaint gables, projecting fronts, and long latticed windows. The square Norman keep of its royal castle (*c.* 1150) is 70 feet high with walls 10 feet thick; on St Catharine's Hill is a ruined chapel (1313); Trinity Hospital, founded in 1619 by

Archbishop Abbot for twelve brethren and eight sisters, is a picturesque red-brick pile; and other buildings are the churches of St Nicholas, St Mary, and the Holy Trinity, the guildhall (1687), county hall (1862), county hospital (1868), and grammar-school (1509-50). A railway junction of some importance, Guildford now is chiefly famous for its grain market. From Edward I.'s reign till 1867 it returned two members to parliament, then till 1885 one. Since 1874 it has been the seat of a bishopric suffragan to Winchester. The population is about 25,000. Bequeathed in 901 by Alfred the Great to his nephew Ethelwald, Guildford in 1036 was the scene of the decimation by King Harold's men of the Norman followers of Alfred the Atheling—a crime that led up to the Norman conquest. The Dauphin Louis took the castle in 1216; and in 1685 Monmouth was temporarily confined in Trinity Hospital.

Guimarães, a town of Portugal, on the Ave, 12 miles SE. of Braga. Two noted hot sulphur-springs are in the vicinity. Pop. 8800.

Guinea, the name of a large section of the west coast of Africa, which first came into general use in the 15th century, and is generally applied to the stretch of coast-lands extending from the mouth of the Senegal, in about 14° N. lat., to Cape Negro, in 16° S. lat. By conventional usage it is further divided into two parts, Upper and Lower Guinea, the dividing line being taken variously as the equator, the Gaboon, the Ogoway. The coast-line is throughout tolerably uniform, and everywhere flat, with numerous shallow lagoons separated from the ocean by narrow spits of sand, lying parallel to the coast. Proceeding inland, the country rises to the central plateau of the continent by a series of broad terrace-like steps, down which the longer rivers are generally precipitated in cataracts and rapids. The Ivory Coast, the Gold Coast, the Slave Coast, are names for portions of the coast between Liberia and the Niger mouths. Some part of Guinea belongs to the Liberian republic; but the major portion of it is now cut up into dependencies of Britain, France, Germany, Spain, Portugal, in somewhat inconvenient fragments. The Genoese claim to have been the first Europeans to reach (in 1291) the coasts of Guinea. They were, however, first regularly visited, from 1364 onwards, by merchant adventurers from Rouen and Dieppe, and first colonised in 1481 by the Portuguese, under Prince Henry the Navigator.

Guinea, GULF OF, a portion of the Atlantic Ocean, forming the huge angle of the West African coast from Cape Palmas to Cape Lopez.

Guinegate, or ENGUINEGATTE, a historical village in the French department of Pas-de-Calais, where the French were twice defeated—(1) on 17th August 1479 by Maximilian I. of Austria; (2) on 16th August 1513 by Henry VIII. and the Emperor Maximilian. This battle was called the Battle of the Spurs—the French knights having made more use of their spurs than of their swords.

Guingamp, a town in the French dep. of Côtes-du-Nord, on the Trieux, 74 miles E. of Brest, the capital formerly of Penthièvre duchy. Population, about 7000.

Guipuzco'a, the smallest but the most densely peopled of the Spanish Basque provinces on the Bay of Biscay. The capital is San Sebastian. Area, 728 sq. m.; pop. near 230,000.

Guisborough, a market-town in the North Riding of Yorkshire, 9 miles ESE. of Middlesborough, lies at the foot of the Cleveland Hills, in the midst of the iron-mining district. The earliest alum-works in England were established here about 1600. Here too is a ruined priory built in 1119 by Robert de Brus, and at the Reformation one of the wealthiest in the kingdom. Population, about 7000.

Guise, a town in the French dep. of Aisne, on the Oise, 25 miles by rail ENE. of St Quentin. From its ruined castle the famous Dukes of Guise derived their title. The ironworks here are conducted on a profit-sharing scheme. Population, under 10,000.

Gujarat, or GUZERAT, the northern maritime province of Bombay, with an area of 10,296 sq. m., and a pop. just over 4,000,000. Within its limits lie the British districts of Surat, Broach, Kaira, Panch Mahals, and Ahmedabad.

Gujranwala, a town of the Punjab, 40 miles N. of Lahore by rail. Pop. 30,000.

Gujrat, or GUZERAT, a town of the Punjab, left (by a change in the river's course) a few miles north of the Chenab's present bed, but a place of some military and political importance. Here in 1849 a decisive battle finally broke the Sikh power, and brought the whole Punjab under British rule. Pop. 20,000.

Gulf Stream, the best known, the best defined, and the most remarkable of all the ocean currents. It derives its name from the Gulf of Mexico, out of which it flows through the Strait of Florida, along the eastern coast of the United States of America, and is then deflected near the banks of Newfoundland diagonally across the Atlantic. Scientific opinion no longer refers the mild climate of western Europe to the agency of the Gulf Stream, but to the circulation of air over the Atlantic, which brings the moisture and warmth of the Atlantic surface as a whole.

Gullane, a Haddingtonshire coast-village, with golf-links, 4 miles NW. of Drem Junction.

Gumbinnen, a town of East Prussia, 72 miles E. of Königsberg. Dating from 1724, it owes its prosperity to the settlement here in 1732 of many Protestant Salzburgers. Pop. 15,000.

Gumri. See ALEXANDROPOL.

Gumti, a navigable river of India, rises in the North-western Provinces, and winds nearly 500 miles south-eastward to the Ganges, 56 miles below Jaunpur.

Gundamuk. See GANDAMAK.

Gunfleet, an Essex sandbank, with a lighthouse, 12 miles S. of Harwich.

Güns (Magyar *Köszeg*), a free town of Hungary, 57 miles SSE. of Vienna. Pop. 10,000.

Guntur', a town of Madras, 46 miles WNW. of Masulipatam. Pop. 25,000.

Gurgaon, a district in the southernmost corner of the Punjab, with an area of 1984 sq. m. Pop. 800,000. The commercial centre is Rewari; the civil headquarters is Gurgaon (pop. 5000), 21 miles SW. of Delhi by rail.

Gurhwal. See GARHWAL.

Güstrow, a town of Mecklenburg-Schwerin, 70 miles E. by S. of Lübeck, with castle (1565), old church, breweries, iron-foundries, a sugar-factory, &c. Pop. 18,000.

Guthrie, capital of Oklahoma, U.S., 32 miles N. of Oklahoma City. Pop. (1890) 5333; (1910) 11,652.

Guzerat. See GUJARAT.

Gwalior, a native state of Central India, the dominions of the Mahratta Maharajah Sindia, consists of several detached districts. Area, 25,000 sq. m.; pop. (1911) 3,090,798, mainly Hindus. Lying partly in the basin of the Jumna and partly in that of the Nerbudda, it divides its drainage between the Bay of Bengal and the Arabian Sea. The principal export is opium. Though Gwalior is a Mahratta principality, yet the Mahrattas do not form any considerable proportion of the people. Since 1803 the country has been under British protection; and during the troubles of 1857 the young Maharajah remained faithful to the British government, although deserted by his troops.—Gwalior, the capital, stands 65 miles S. of Agra by railway. Its nucleus is an isolated rock 340 feet high, perpendicular on all sides; it measures 1½ mile by 300 yards, and its citadel (said to date from the 8th century) is virtually impregnable against any native force. Along the eastern base of this eminence lies the old town of Gwalior; and to the south-west there extends for several miles the new town called Lashkar, where the Maharajah resides.

Gweedore, a Donegal hamlet, 3 miles from the west coast.

Gwelo, a township of Southern Rhodesia, on the railway from Bulawayo to Salisbury, 110 miles NE. of the former. It is the centre of a gold-mining district, with a fully equipped hospital, &c. Pop. 1500.

Gyangtse, a fortified town of Tibet, 110 miles SW. of Lhasa, with a sacred monastery. It was occupied by the British expedition in 1904.

Gyarmat-Balassa, a town of Hungary, 40 miles N. by E. of Budapest. Pop. 10,000.

Gympie, a town of Queensland, 61 miles S. of Maryborough, with gold-reefs. Pop. 12,400.

Gyoma, a town of Hungary, on the Körös, 89 miles SE. of Budapest by rail. Pop. 10,160.

Gyöngyös, a town of Hungary, with mineral baths, 59 miles NE. of Budapest. Pop. 17,000.

Gyula, a town of Hungary, 35 miles N. of Arad. It has a monument to the composer Erkel. Pop. 25,000.

HAARLEM, a town of Holland, 10 miles W. of Amsterdam, is intersected, like most Dutch towns, with canals and avenues of trees. Of its churches the principal is the Great or St Bavon's, built in the 15th century, one of the largest churches in Holland, and specially noted for its lofty tower and its organ (1738). Before the church stands a statue of Laurens Coster, to whom his countrymen ascribe the invention of printing. The town-hall, formerly the residence of the Counts of Holland, has portraits by Franz Hals. The Teyler Institution promotes the study of theology, natural science, and the fine arts. Although Haarlem is no longer celebrated, as it was in the 17th century, for its commerce, it still weaves cotton, casts type, bleaches linen, and trades largely in tulips, hyacinths, &c. It underwent a seven months' siege (1572–73) from the Spaniards, in which the citizens displayed the noblest heroism. In the wood of Haarlem stands the 'pavilion' containing the colonial and industrial museums, and a collection of modern pictures. Pop. 70,000.

Haarlem Lake, now drained, lay between Haarlem, Leyden, and Amsterdam, and communicated with the Zuider Zee by the Y. Originally it embraced four small lakes, which, in consequence of several irruptions of the sea, eventually merged into one sheet of water, covering an area of about 70 sq. m., and not above 15 feet deep. The lake, however, frequently rose during storms to an alarming height, necessitating a large annual outlay in keeping the dams and sluices in repair. In consequence of the damage done to Amsterdam and Leyden by two overflows of the lake in 1836, the government set about draining it (1839–52). The enterprise cost £1,080,000, but the sale of the lands reduced this by £780,000.

Habbie's Howe, the scene of Allan Ramsay's *Gentle Shepherd*, 4½ miles WSW. of Penicuik.

Hackensack, the capital of Bergen county, New Jersey, on the Hackensack River, 12 miles by rail N. of Jersey City. Pop. 14,000.

Hacketstown, a village of Carlow, 7 miles NW. of Tinahely station. Pop. 500.

Hackney, a parish of Middlesex, now forming one of the metropolitan boroughs of London. In its earlier and fashionable days it is said to have given its name to hackney-coaches. Pop. of borough (1911) 222,587; of parliamentary borough, which returns three members, 225,003.

Hadden Rig, a Roxburghshire ridge (541 feet), 5 miles ENE. of Kelso. It was the scene in 1540 of an English defeat.

Haddington, the county town of Haddingtonshire, lies at the southern base of the Garleton Hills, on the Tyne, 17 miles E. of Edinburgh. Its Abbey Church, the *Lucerna Laudoniæ* or 'Lamp of Lothian,' is a cruciform Decorated red sandstone pile, with a central tower 90 feet high, and ruinous all but the nave, which serves as the parish church (restored 1892). Then there are the county buildings (1833), the large corn exchange (1854), the town-hall (1748–1831), the county lunatic asylum (1866), and a school, the Knox Memorial Institute (1880). Haddington's worthies have been Knox, John Brown and Samuel his grandson, Samuel Smiles, and Jane Welsh Carlyle, whilst its chief memories have been perils by flood and fire, and the great siege of the English by the Scotch in 1549. An ancient royal burgh, it united till 1885 with North Berwick, Dunbar, Jedburgh, and Lauder to return one member to parliament. The population is a little over 4000. See works by James Miller (1844) and John Martine (1883).

Haddingtonshire, or East Lothian, a maritime county of Scotland, washed on the north for 32 miles by the German Ocean and the Firth of Forth. Its utmost length is 26 miles, its utmost breadth 19, and its area 280 sq. m. In the south are the Lammermuirs, culminating in Meikle Says Law (1749 feet); whilst isolated heights are North Berwick Law (612), Traprain or Dumpender Law (724), and the Garleton Hills (594), on which stands a conspicuous column, erected in 1824 to the fourth Earl of Hopetoun. The Tyne flows 16 miles north-eastward through the county. The rocks yield coal, iron, and limestone, the coal having been mined near Tranent since the 13th century. Haddingtonshire has for two hundred years enjoyed high agricultural fame, having been the first Scottish county to adopt the sowing of turnips in drills (1734), the thrashing-machine (1787), and the steam-plough (1862). About 64 per cent. of the entire area is in cultivation, and more than one-seventeenth is under wood. The county returns one member to parliament. Its towns are Haddington, Dunbar, North Berwick, Prestonpans, Tranent, and East Linton; and under these and the Bass Rock are noticed the chief events in its history. The antiquities include the ruined castles of Dirleton and Tantallon. Pop. (1841) 35,886; (1881) 38,502; (1911) 43,253. See works by D. Croal (3d ed. 1885) and J. Small (1883).

Haddo House, the seat of the Earl of Aberdeen, in Aberdeenshire, 6½ miles WNW. of Ellon.

Haddon Hall, a splendid old baronial mansion, in Derbyshire, on the Wye, 2 miles SE. of Bakewell, and 23 NNW. of Derby. It was the seat successively of Avenells, Vernons, and the Rutland family. See works by Cattermole (1846–67), S. C. Hall (1871), and W. E. Cooke (1892).

Hadersleben, or HADERSLEV, a town of Sleswick-Holstein, 32 miles N. of Flensborg, on a narrow arm of the Little Belt. Pop. 13,000.

Hadleigh, (1) a quaint old market-town of Suffolk, on the Bret, 9½ miles (12½ by a branch-line) W. of Ipswich. Its chief buildings are the brick Rectory Tower (1495) and the noble parish church, with a spire 135 feet high. Formerly, from 1331, an important seat of the cloth-trade, Hadleigh was the scene of the death of the Danish king Guthrum (889), of the martyrdom of Dr Rowland Taylor (1555), and of the 'great conference' (1833) out of which grew the 'Tracts for the Times.' Woolner, the sculptor was a native. Pop. of urban district, 3200.—(2) An Essex parish, near the N. shore of the Thames estuary, 2 miles NE. of Benfleet station, and 37 E. of London. It has a ruined castle (1231), and in 1892 became the seat of the Salvation Army farm-colony. Pop. 1750.

Hadramaut, the coast-region of South Arabia from Aden to Cape Ras-al-Hadd; more properly the plateau region lying between 48° and 51° E. long. Pop. 450,000. Towns, Saiun and Terim.

Hadrian's Wall, a fort-protected stone wall, with a ditch on its north side, and on its south side a *vallum* or series of ramparts, between the estuary of the Tyne and the Solway Firth. Hadrian is now generally believed to have been the builder of the whole structure (c. 119 A.D.), and Severus to have repaired it nearly a century later. In Northumberland the remains of it are considerable, the wall being still in two places 9 feet high. See works by Collingwood Bruce (1851–85) and G. Neilson (1891).

Hæmus, MOUNT. See BALKAN.

Haff, a Danish word meaning 'sea,' and used to designate three lagoons along the Prussian shore of the Baltic—the Stettiner or Pommersches Haff, Frisches Haff, and Kurisches Haff.

Hagen (*Hâgen*), a town of Prussia, in the Ruhr coal-district of Westphalia, 12 miles NE. of Elberfeld-Barmen. It manufactures iron, steel, and tin goods, cotton, cloth, leather, paper, beer, and tobacco. Pop. 90,000.

Hagenau (*Hâgenow*), a town of Alsace-Lorraine, 21 miles by rail N. by E. of Strasburg. It manufactures porcelain stoves, and has cotton and woollen spinning. Pop. 18,860.

Hagerstown, capital of Washington county, Maryland, on Antietam Creek, 85 miles WNW. of Baltimore by rail. It has machine-shops, flour-mills, and manufactories of furniture and other wooden wares, fertilisers, farming implements, and cigars. Pop. 17,000.

Hague, THE (Dutch *'s Gravenhage*, 'the count's hedge'), the capital of the Netherlands, 2 miles from the North Sea and 15 NNW. of Rotterdam. It is intersected by canals and shady avenues of lime-trees, and has many fine public buildings and private houses. In the centre of it is the Vijver, or Fish-pond, to the south of which stands the old castle of the Counts of Holland, where the Dutch parliament sits. In its gate-tower the brothers De Witt were confined till dragged thence and torn to pieces by the populace (1672). The picture-gallery has a splendid collection of works by native painters (Paul Potter's 'Bull' and Rembrandt's 'Lesson in Anatomy'); and there are the royal library, with 500,000 volumes, 4000 MSS., &c.; the municipal and other museums; the town-house; and the royal palaces. Amongst the numerous statues are those of William I. (two in number), William II., Spinoza, Bernhard of Saxe-Weimar, and the monument which commemorates the deliverance from the French. Close to the town is the beautiful pleasure-park called 'The Wood' (*Bosch*), in which stands a royal residence (1647) with the magnificent so-called 'Orange Hall.' The great Peace Conference was held here in 1899; The Hague is the seat of the resulting arbitration courts, for which Mr Carnegie provided permanent buildings. (See also SCHEVENINGEN, RYSWICK.) Industries are iron-founding, copper and lead smelting, cannon-founding, printing, furniture and carriage making, and the manufacture of gold and silver lace. Pop. (1875) 100,254; (1910) 280,515. From 1250 a hunting-lodge of the Counts of Holland, The Hague in 1527 became the seat of the supreme court in Holland, in 1584 the place of assembly of the States of Holland and of the States-general; and it was also the residence of the stadtholders.

Haidarabad. See HYDERABAD.

Haifa, a seaport of Syria, at the foot of Mount Carmel; pop. 6000. A railway to Damascus was opened in 1905. A little NW. is a settlement (1869) of the Würtemberg 'Society of the Temple,' now a flourishing agricultural colony of 300 persons. Here Laurence Oliphant settled in 1882. See his *Haifa* (1887).

Haikh, the native name of Armenia (q.v.).

Haileybury College, 2 miles SE. of Hertford, was erected in 1809 as a cadets' training-college, by the East India Company, and in 1862, four years after the transference of the Company's powers to the crown, was reopened as a public school for 500 boys. See works by Higgen (1887) and Monier Williams (1894).

Hailsham, a market-town of Sussex, 11 miles E. by S. of Lewes. Pop. of parish, 4600.

Hainan, an island of China, the southernmost land of the republic, lying between the Gulf of Tongking and the China Sea, and 15 miles S. from the mainland. It measures 150 miles (from SW. to NE.) by 100. The centre and south of the island are mountainous. The island is purely agricultural. The capital is Kiung-chow (pop. 40,000), whose port, Hoi-how (15,000), 3 miles distant, has been open to foreign trade since 1876. Pop. 2,500,000, the plains being inhabited by Chinese (1,500,000), the interior by the aboriginal Les. Eight to ten thousand Chinese emigrants leave Kiung-Chow every year for Singapore and Bang-kok. Gold exists. The island is subject to earthquakes and typhoons. See B. C. Henry's *Ling-Nam* (1886).

Hainault (formerly spelt in a perplexing variety of ways from *Haysneaultx* to *Héno;* pron. *Hayno;* Ger. *Hennegau*), a southern province of Belgium. Area, 1437 sq. m.; population, 1,250,000, principally Walloons. The surface consists in the north and west of flat and fruitful plains; the south is occupied by spurs of the Forest of Ardennes. The principal rivers are the Haine—from which the province has its name—the Scheldt, the Dender, and the Sambre, the last a tributary of the Meuse. Toward the south and south-east, in the neighbourhood of Mons and Charleroi, are very extensive coalfields. Iron is also produced. The capital is Mons. From the 9th century Hainault was a countship, embracing both French and Belgian Hainault. French Hainault (now the dep. of Nord) was separated in 1659. For Hainault Forest, see EPPING.

Hainburg, a walled town of Austria, on the Danube, 27 miles ESE. of Vienna. Identified with the ancient *Carnuntum*, it figures in the *Nibelungenlied*. Pop. 7300.

Hainichen, a Saxon town, the centre of the German flannel manufacture, 13 miles NE. of Chemnitz. Pop. 8000.

Haiti. See HAYTI.

Hajipur, a river-port of Bihar, on the Gandak, just above its confluence with the Ganges opposite Patna. Pop. 21,387.

Hakodate, the chief port of Yezo in Japan, on a peninsula in the Strait of Tsugaru, is built partly on the inner slope of the Gibraltar-like hill (1200 feet) which dominates the strait, partly on the low sandy peninsula connecting the hill with the main island. It has a magnificent harbour, is (since 1859) one of the open ports of Japan, and exports seaweed, sulphur, bêche-de-mer, salted salmon, &c. Pop. 91,650.

Hal, a town in South Brabant, 9 miles by rail SSW. from Brussels. Pop. 15,000.

Halas, a town of Hungary, 82 miles by rail SSE. of Budapest. Pop. 25,000.

Halberstadt, a quaint old town of Prussian Saxony, in a fertile plain extending from the north foot of the Harz Mountains, 25 miles SW. of Magdeburg. The cathedral, rich in stained glass, was erected in the 13th and 14th centuries. Other buildings are the church of Our Lady (1146); the town-house (1360–81), before it a Roland pillar; and the Peterhof, formerly the bishop's palace. The chief industries are gloves, cigars, machines, sugar, leather, paper, spirits, &c., besides large railway workshops. Halberstadt dates from 820, and was given to Brandenburg in 1648. Pop. 46,500.

Haleb. See ALEPPO.

Halesowen, a market-town of Worcestershire, on the river Stour, 7½ miles WSW. of Birmingham. Its people are nail-makers and manufacturers of small ironwares. One mile to the south-east lie the ruins of the Premonstratensian abbey founded by King John. Shenstone (1714–63), a native of the place, carried on his landscape-gardening at the Leasowes, a mile distant. His tomb is in the church. Pop. 4160.

Halesworth, a Suffolk town, on the Blythe, 9 miles SSW. of Beccles. Pop. 2250.

Halicarnassus. See BUDRUN.

Halicz, a town in Austrian Galicia, on the Dniester, 69 miles SSE. of Lemberg by rail. On a neighbouring hill is the ruined 12th-century castle of the rulers of the former principality of Halicz. From this word the name Galicia is derived. Pop. 5000.

Halidon Hill, an eminence in Northumberland, 2 miles NW. of Berwick, overlooking the Tweed, was the scene of a bloody defeat of the Scots by the English, 19th July 1333.

Halifax, a thriving market-town, municipal, parliamentary, and county borough, in the West Riding of Yorkshire, is situated on the river Hebble, a feeder of the Calder, on the slope of an eminence, and is almost wholly surrounded by hills. It is 43 miles SW. of York, and 194 miles NNW. of London. Its name is probably derived from the four ways travelled by pilgrims converging towards the parish church, called Holy Ways; *fax* (as in *Carfax*) being Norman-French for 'forks' or ways. Its ample supply of water-power and of coal, its facilities for transport both by water and by leading lines of railway, and its position in proximity to many of the great towns of the north of England, contribute materially to its manufacturing and commercial importance, which dates from the settlement here of Flemish artisans in the reign of Henry VII. The parish church of St John, restored in 1879, is a fine specimen of Perpendicular Gothic; All Souls (1861), by Sir G. G. Scott, is one of the best and most elaborate of all his churches. The Congregational 'Square Church' was erected in 1855. The town-hall, opened by the Prince of Wales in 1863, is a very ornate Renaissance edifice, from designs by Sir Charles Barry; the new post-office was opened in 1887. Another important building is the Piece Hall, erected in 1779 for the sale of manufactured goods; it was presented to the corporation in 1868, and is now used as a Market Hall. Besides the Heath grammar-school (1585), at which Sterne was educated, and the Blue-coat School, there is the Crossley and Porter Orphan Home and School, built by the Crossley brothers, with an endowment of £135,894. Halifax has five parks—Savile, Shrogg's, Claremont, Akroyd, with free library, museum, and art-gallery, and the People's Park. The last, the gift of the late Sir F. Crossley in 1857, was laid out by Sir Joseph Paxton. There are two theatres (one dating from 1888). The Public Libraries Act was early adopted; there are also a Mechanics' Institute and the Dean Clough Institute erected by the Crossleys for their work-people. The tramways are on the overhead electric system, and the electric light is in use. There is a strong co-operative society. The worsted and carpet trades are the staple industries. Crossley's carpet-works, the largest in the world, employ more than 5000 hands. Other manufactured goods are worsted coatings, fancy dress goods, damasks, and merinos. Cotton fabrics and wool-cards are manufactured, while dyeing and hosiery trades are on an extensive scale. There is also some trade in corn; iron, chemicals, boots, and mill-machinery are manufactured, and freestone is quarried. The water-works, which are very complete, were extended in 1900–7 at a cost of £350,000. Pop. (1851) 33,582; (1871) 65,510; (1881) 73,633; (1901, on extended area) 104,936; (1911) 101,556. The borough since 1832 has returned two members. See Watson's *History of Halifax* (1775; ed. by Leyland, 1869).

Halifax, the capital of Nova Scotia and the principal Atlantic seaport of Canada, is situated in 44° 39′ N. lat. and 63° 37′ W. long. It is the nearest to Great Britain of any city on the American continent, being but 2178 miles from Cape Clear. The magnificent sheet of water that constitutes its harbour is easily accessible at all seasons of the year, at all times of the tide, by ships of any tonnage; and is capable of affording safe anchorage to the whole British navy. Its selection as the American rendezvous of D'Anville's ill-starred expedition against the British American colonies in 1746, led to a demand on their part that a place of such strategic importance should no longer be unoccupied by British troops. The demand was ably supported by Lord Halifax, and accordingly an expedition was fitted out in 1749, which founded the city and gave to it the name of its English patron. It at once became the capital of the province, and the principal naval and military station of Great Britain in America, and, strongly fortified, was garrisoned by British troops till 1905, when Canada assumed full responsibility for its defence. The dockyard is one of the finest in the British colonies. The town is built on the western side of the harbour, and extends along it about 5½ miles. It is the residence of the Roman Catholic archbishop of Halifax and of the Anglican bishop of Nova Scotia. It is also the seat of Dalhousie University. Headquarters of the Atlantic division of the Canadian navy, with a naval school, it is the eastern or Atlantic terminus of the Intercolonial Railway (connected with the C.P.R., &c.). It has a large graving-dock (580 by 102 feet, 1880–89). In 1912 the fortifications were very greatly strengthened, and a great tower commemorated the 150th anniversary of the Nova Scotian assembly. The proximity of Halifax to the coalfields of Pictou and Cape Breton and its extensive wharf accommodation make it a great coaling-station. Pop. (1881) 36,100; (1911) 46,801. Dartmouth (pop. 6000), on the harbour's opposite shore, is practically a suburb of Halifax.

Hall, or Schwäbisch-Hall, a town (since 1802) of Würtemberg, in the deep valley of the Kocher, 33 miles by rail E. by S. of Heilbronn. Hall (meaning 'salt') has salt-works, the brine being obtained from Wilhelmsglück, 5 miles distant. There are also manufactures of cotton, silk, leather, &c. Pop. 9225.

Hall, an Austrian health-resort, in Tyrol, on the Inn, 6 miles by rail E. of Innsbruck. From the Salzberg, 7 miles N., salt brine is conveyed to the pans of Hall. Pop. 6456.

Halladale, a Sutherland stream, flowing 20 miles north to the sea at Portskerry.

Hallamshire, an ancient manor of the West Riding of Yorkshire, with Sheffield for its capital. It now gives name to a parliamentary division.

Halle (*Hal-leh*), a city of Prussian Saxony, on the right bank of the Saale and on several small islands of the river, 20 miles by rail NW. of Leipzig. As an important railway centre, Halle has of late years rapidly increased in size, industry, and prosperity. Its university was founded in 1694 by Frederick I.; suppressed by Napoleon in 1806 and in 1813, it was re-established in 1815, and with it was incorporated the university of Wittenberg. At first a chief seat of the pietistic school of theology, Halle subsequently became the headquarters of the rationalistic and critical schools. It has over 2500 students, and 170 professors and lecturers. The Francke schools (1695) rank amongst the most important establishments of the place. Noteworthy are St Mary's Church (1529–54); the Gothic church of St Maurice (12th c.), with fine wood-carvings and sculptures; the red tower, 276 feet high, in the market-place; the town-hall; the remains of the Moritzburg (1484), the ancient residence of the archbishops of Magdeburg; a deaconesses' home; the university library (250,000 vols.); and an archæological and other museums. Salt is obtained from brine-springs within and near the town, which have been worked from before the 7th century. Other industries are machine-making, sugar-refining, printing, brewing, the manufacture of mineral oil, and fruit cultivation. Halle is the birthplace of Handel. Pop. (1871) 52,639; (1880) 71,484; (1910) 180,551.

Hallein, an Austrian town, 10 miles S. of Salzburg, has salt-works and salt baths. Pop. 6727.

Halluin, a town in the French dep. of Nord, 10 miles NNE. of Lille. Pop. 16,530.

Halmstad, a seaport of Sweden, on the Cattegat, 75 miles SE. of Gothenburg. Pop. 18,492.

Halstead, an Essex market-town, on the Colne, 56 miles NE. of London. It has a parish church with a wooden spire and many old monuments, a free grammar-school (1590), and manufactures of crape, silk, paper, and straw-plait. Pop. 6259.

Haltwhistle, a market-town of Northumberland, on the South Tyne, 16½ miles W. of Hexham. Pop. of parish, 4000.

Halys. See Asia Minor.

Ham, a town in the French dep. of Somme, on the river Somme, 12 miles SW. of St Quentin. Its ancient fortress (rebuilt in 1470) is used as a state-prison. It was the place of confinement of Joan of Arc, Louis Napoleon, &c. Pop. 3000.

Ham, West, a suburb of East London, and a county borough of Essex, on the north bank of the Thames, opposite Greenwich. The rapid growth of the population has been principally owing to the Victoria and Albert docks and the gas-works. It is a busy industrial parish, and has silk-printing, shipbuilding, distilling, and chemical manufactures. In 1885 it was made a parliamentary borough, returning two members to the House of Commons. Here is Mrs Elizabeth Fry's house, 'The Cedars.' Pop. (1851) 18,817; (1911) 289,102.—East Ham, situated in the southwest of the same county, 1½ mile SW. of Barking, has a pop. of 133,500. See Katherine Fry's *History of the Parishes of East and West Ham* (1888).

Hamadan (anc. *Ecbatana*), a town of Persia, at the northern base of Mount Elwend, 160 miles WSW. of Teheran. It contains some notable tombs—e.g. Avicenna's and others affirmed to be those of Mordecai and Esther. It is the centre of converging routes from Bagdad, Erivan, Teheran, and Ispahan, and manufactures leather, coarse carpets, and woollen and cotton fabrics. Pop. 30,000.

Hamah (Gr. *Epiphania;* Bible *Hamath*), a very ancient city of Syria, on the Orontes, 110 miles N. by E. of Damascus. Silks, cottons, and woollens are manufactured. Hamah and Hems (q.v.) have been connected with Damascus and with Aleppo by rail. Pop. 45,000.

Hambato, or Ambato, capital of Tunguragua province, Ecuador, in a sheltered amphitheatre on the northern slope of Chimborazo, 8860 feet above the sea. It was twice destroyed—by an eruption of Cotopaxi in 1698, and by an earthquake in 1796. Pop. 10,000.

Hamburg, a state of the German empire, includes the free city of Hamburg, the towns Bergedorf and Cuxhaven, and several suburbs, with a total area of 158 sq. m. The free city of Hamburg is on the Elbe, 75 miles from the German Ocean, 112 N. of Hanover, and 177 NW. of Berlin. Founded by Charlemagne in 808, Hamburg was made a bishopric in 831. The commercial history of Hamburg began in 1189–90, when the emperor granted it various privileges, amongst others a separate judicial system and exemption from customs dues. In 1241 it joined with Lübeck in laying the foundation of the Hanseatic League, and from 1259 associated itself closely with Bremen also. From that time it increased rapidly in wealth and commercial importance. In 1510 it was made an imperial town; it early embraced the doctrines of the Reformation. From 1410 to 1712 there were repeated risings against the governing classes; during 1806–14 it was occupied by the French, when its pop. decreased by nearly one-half, namely to 55,000, and it endured losses of property estimated at £7,000,000. In 1815 Hamburg joined the German Confederation. In three days, in 1842, one-third of Hamburg was destroyed by fire, and more than two millions sterling worth of property lost. In 1888 Hamburg entered the German Customs Union, though still retaining part of its territory as a 'free port.' The public buildings include the 'school house' (with the town library of 600,000 volumes and a natural history museum), town-house, picture-gallery, &c. Notable churches are St Nicholas, by Sir Gilbert Scott, as a memorial of the fire of 1842, a Gothic building, with a spire 482 feet high; St Michael's (18th cent.; burned and restored in the 20th), with a spire 469 feet high; St Catherine's and St James's, Gothic edifices of the 14th and 15th centuries. The older portion is intersected by expansions of the Alster and canals. There is a public zoological garden. Hagenbeck's is at Stellingen, near by.

Hamburg is the busiest commercial city on the Continent, and the principal commercial seaport of Germany. Next to London it has the largest money-exchange transactions in Europe; its bank was founded so long ago as 1619. As a commercial centre its only rivals are London, Liverpool, Antwerp, and New York. Its industries are cigar-making, distilling of spirits, sugar-refining, brewing, engineering, iron-founding, manufacture of chemicals, india-rubber wares, furniture, starch, and jute, and shipbuilding. Of the imports about one-half represent the value of goods brought into Hamburg by rail and river (Elbe) from the interior. Hamburg owes a large part of its trade to its position as a distributing centre for commodities brought from distant parts of the world, to be afterwards sent to the different countries of Europe. Besides coffee, the more important objects of trade are sugar, woollen and cotton goods, butter, tobacco, wine and spirits, hides, machines, rice, saltpetre, leather, herrings, flour, furs, linen, petroleum, coal, iron, and silks. Hamburg ranks second to Bremen as a port of embarkation for emigrants from Germany. Pop. (1875) 374,930; (1890) 622,530; (1900) 768,349; (1910) 1,015,707—932,078 in the city.

Hameln, a town of Hanover, on the Weser, 25 miles SW. of Hanover. It presents a quite mediæval appearance, having many Gothic and Renaissance houses and buildings. The chain-bridge (1839) over the Weser is 840 feet long. The industries include machine-making, iron-founding, wool-spinning, &c. Pop. 23,000. With this town is connected the well-known legend of the Pied Piper (or Ratcatcher) of Hameln or Hamlin, who in 1284 freed the town from rats through the mystic charm of his pipe.

Hamilton, a town of Lanarkshire, on the left bank of the Clyde, 10 miles SE. of Glasgow. The principal edifice is the burgh buildings (1863), with a clock-tower nearly 130 feet high; and there are also the county buildings, large barracks, a public park (1894), and a good racecourse. The former manufactures of lace, tamboured bobbinette, and cambric have declined; and coal-mining is now the chief industry of the district. Lord Dundonald was a native. Hamilton was made a royal burgh in 1548, and one of the five Falkirk parliamentary burghs in 1832. Pop. (1841) 8724; (1881) 18,517; (1911) 38,644.—Hamilton Palace, successor to Cadzow Castle, is the seat of the Duke of Hamilton. Dating partly from 1594, but greatly enlarged in 1705 and 1822, it is a sumptuous classical structure, though its choicest art-collections were sold in 1882 for nearly £400,000. Within its policies are a superb mausoleum (1852), the ruins of Cadzow Castle, the herd of wild white cattle, and some primeval oaks.

Hamilton, a city of Ontario, Canada, is situated on Burlington Bay, at the west end of Lake Ontario, 40 miles by rail SW. of Toronto, and 56 WNW. of Niagara Falls. The business portion lies at the foot of 'The Mountain,' on whose slope many fine residences are embowered among trees and gardens. Trees line the wide, handsome streets; the houses are mostly substantial stone erections, and the court-house and county buildings are among the finest in Canada. The manufactures include iron, cottons, woollens, sewing-machines, boots, glass-ware, &c. Hamilton, which was founded in 1813, is the seat of Anglican and Roman Catholic bishops. Pop. (1881) 35,961; (1901) 52,550; (1911) 81,969.

Hamilton, metropolis of the western part of Victoria, on Grange Burn Creek, 224 miles by rail W. of Melbourne. Pop. 6050.

Hamilton, (1) capital of Butler county, Ohio, on the Great Miami River, and on the Miami and Erie Canal, 25 miles by rail N. of Cincinnati. It has paper and flour mills, foundries, breweries, &c. Pop. (1880) 12,122; (1911) 35,279.—(2) A post-village of New York, 37 miles SE. of Syracuse, is the seat of Colgate, formerly Madison, University (Baptist).

Hamilton, capital (pop. 2600) of Bermuda.

Hamirpur, capital of a district in the United Provinces of India, on the Jumna, and at the head of a branch of the Ganges Canal, 110 miles NW. of Allahabad. Pop. 7200.

Hamm, a town of Prussia, in Westphalia, on the Lippe, 25 miles NE. of Dortmund by rail, has large iron-foundries, wire-works, machine-factories, &c. It was a Hanse town, and until 1763 a fortress. Pop. 44,500.

Hammerfest, the most northern town of Europe, in 70° 40′ N. lat. and 23° 30′ E. long., is on the island of Kvalö, in the Norwegian province of Finmark. It was destroyed by fire in 1890. Pop. 2289.

Hammersmith, a metropolitan and parliamentary borough of the county of London. A suspension bridge was opened here in 1827, and a new one by Prince Albert Victor in 1887. The borough returns one member. Formerly a detached village, Hammersmith is now a large town. Pop. of the parliamentary borough (1901) 111,970; (1911) 121,254.

Hamoaze. See PLYMOUTH.

Hamoon. See SEISTAN (LAKE OF).

Hampden House, Bucks, among the Chilterns, 4 miles S. by W. of Wendover, was the home of John Hampden, who is buried in the church here.

Hampshire, HANTS, or, officially, the COUNTY OF SOUTHAMPTON, a maritime county in the south of England, bounded by Dorset, Wilts, Berks, Surrey, Sussex, and the English Channel. Including the Isle of Wight, it has an area of 1621 sq. m., or 1,037,764 acres, 700,000 of which are generally under culture. Pop. (1801) 219,290; (1841) 354,682; (1861) 481,815; (1881) 593,465; (1911) 950,968. The surface is diversified by the North and South Downs, the loftiest points being Sidown Hill (940 feet), and, on the Berkshire border, Inkpen Beacon (1011 feet), the highest chalk-down in England. The south-western portion of the county, almost wholly detached from the main portion by Southampton Water, is occupied mainly by the New Forest (q.v.). In the south-east and east there are remains of the forests of Bere, Woolmer, and Waltham Chace. The principal rivers are the Test, Itchen, and Avon, all flowing southward; the last named forms the western boundary of the New Forest. The county, exclusive of the parliamentary boroughs of Portsmouth, Southampton, Winchester, and Christchurch, and the Isle of Wight, returns five members for its five divisions—North or Basingstoke, West or Andover, East or Petersfield, South or Fareham, and New Forest. Hampshire is wholly in the diocese of Winchester. Towns other than the four boroughs are Aldershot, Alton, Andover, Basingstoke, Bishops Waltham, Bournemouth, Fareham, Gosport, Havant, Lymington, Petersfield, Ringwood, Romsey, and Titchfield. Among Hampshire's worthies have been Jane Austen, Walter Besant, Dickens, William Gilpin, Keble, Kingsley, George Meredith, Archbishop Warham, Gilbert White, William of Wykeham, and Edward Young. See works by Woodward (3 vols. 1861–69) and T. W. Shore (1892).

Hampstead, a metropolitan and parliamentary borough of the county of London, is finely situated on a range of hills. It was formerly famous for its medicinal springs, and is still a favourite place of residence and of holiday resort among Londoners. On the summit of the hill (430 feet), above the village, is the Heath, which affords extensive and pleasant prospects of the surrounding country. A house on the Heath, formerly called the Upper Flask Inn, and now a private residence, was the place of resort of the Kit-Cat Club, at which Steele, Addison, Richardson, Walpole, and others used to assemble. Hampstead is associated with many names in literature and art, as those of Pope, Gay, Johnson, Akenside, Joanna Baillie, Byron, Constable, Romney, Coleridge, Keats, Shelley, Leigh Hunt, Landseer, and Sir W. Besant. Pop. (1901) parl. bor. (one member) 82,329; (1911) 86,000. See works by W. Howitt (1869), Lobley (1889), and Baines (1890).

Hampton, a village of Middlesex, on the Thames, 15 miles SW. of London. In the vicinity are many fine mansions and beautiful villas, including Garrick's villa. Pop. 9000.

Hampton Court Palace, till George II.'s time a royal residence, and now partially occupied by persons of good family in reduced circumstances, stands about a mile from the village in the midst of grounds that extend to the Thames. The original palace was erected by Cardinal Wolsey, and by him presented (1526) to Henry VIII., who enlarged it and formed around it a royal deer-park. Here Edward VI. was born, his mother, Jane Seymour, died, and Charles I. was a prisoner. Here too was held in 1604 the famous conference between the bishops and the Presbyterians. A considerable portion of Hampton Court was rebuilt by William III., from designs by Wren, and he also laid out the park and gardens in the formal Dutch style. The picture-gallery contains several Italian works, Lely's Beauties of the Court of Charles II., and valuable specimens of Holbein, Kneller, West, &c.; but Raphael's cartoons have been removed to the South Kensington Museum. The gardens present a series of raised terraces, formal flower-plots, and long and shady arcades, and have among other attractions a 'maze' or labyrinth. Damage, estimated at £20,000, was caused by fire in November 1886. See Ernest Law's *Hampton Court* (3 vols. 1885–91).

Hampton, a bathing-resort of Virginia, gives name to Hampton Roads, a channel between Chesapeake Bay and the James River estuary. Pop. 5500.

Hanau, a town in the Prussian province of Hesse-Nassau, at the confluence of the Kinzig and Main, 13 miles E. by N. of Frankfort. It is divided into the Old Town (1393) and the New Town; the latter was founded in 1597 by Protestant refugees from the Low Countries, who introduced the woollen and silk manufactures, which still flourish. Hanau stands pre-eminent in Germany for its jewellery and gold and silver wares. It also manufactures carpets, chocolate, leather, cards, paper, hats, &c. Here the brothers Grimm were born. In the neighbourhood is the watering-place of Wilhelmsbad. Near the town, in 1813, Napoleon defeated the Austrians and Bavarians. Population, 37,000.

Handsworth, a NW. suburb of Birmingham.

Hang-chow, a city of China, the gate of the great imperial canal, on the left bank of the Tsien-tang, where it enters the Bay of Hang-chow, 110 miles SW. of Shanghai. It was the capital of the Sung empire before its overthrow by the Mongols, and was a splendid city when visited by Marco Polo early in the 14th century. It still has many magnificent temples, is a principal seat of the silk manufacture, and of gold and silver work, and is noted for the beauty of its surroundings. Several thousands of candidates assemble here every year for the public examinations. The river is subject to a dangerous bore or eagre. Previous to the Tâiping rebellion, the city had some 2,000,000 inhabitants; but it was then (1861) laid in ruins, and its pop. is now estimated at from 500,000 to 800,000.

Han-hai, a dried-up sea in central Asia, now represented only by Lake Lob-nor (q.v.).

Hankow, a river-port of China, at the junction of the Han River with the Yang-tsze, 600 miles W. of Shanghai. Strictly speaking, Hankow is a suburb of the towns of Wu-chang and Han-yang, the three together forming one huge city. Vessels of large size can reach Hankow, the river being navigable to Ichang, 420 miles higher up. Since 1862 Hankow has been open to foreign trade. The principal article of export is tea, others being silk, oil, vegetable tallow, tobacco, hides, nut-galls, coal, musk, and wax. Here is the terminus of the Hankow-Peking railway (1889–1905). Wu-chang is capital of the provinces of Hu-peh and Hu-nan; Han-yang contains China's chief arsenal, a mint, and great iron and steel works. Here in 1911 broke out the rebellion against the Manchus which led to the Chinese republic. Pop. of the three cities, 1,700,000 (750,000 in Hankow).

Hanley, a Staffordshire town, in the Potteries, 18 miles N. of Stafford. It manufactures china, earthenware, and encaustic tiles; and near it are coal and iron mines. It was constituted a municipal borough in 1857; a parliamentary borough, returning one member, in 1885; and in 1910 it was incorporated in the county borough of Stoke-on-Trent. Pop. (1911) of parl. borough (including Burslem, q.v.), 106,138.

Hannibal, a city of Missouri, on the Mississippi, here crossed by an iron railroad bridge, 111 miles by rail NNW. of St Louis. An important railway centre, it has a Methodist college, an extensive trade in lumber, flour, and cattle, and manufactories of flour, tobacco, lime, and railroad cars. There are coal-mines close by. Pop. 20,000.

Ha-noi, the capital of Tongking, and headquarters of the French administration, on the left bank of the Song-coi or Red River, 80 miles in a direct line from the sea. Pop. 120,000.

Han'over (Ger. *Hanno'ver*), formerly a kingdom of northern Germany, but since 1866 incorporated with Prussia. Area, 14,833 sq. m., or nearly twice the size of Wales; pop. (1871) 1,963,080; (1910) 2,943,546. Except in the south, where the Harz Mountains (q.v.) attain 3037 feet, the surface belongs to the great North German plain, with great stretches of moor and heath, the largest the Lüneburg. It is watered by the Elbe, Weser, Ems, and their tributaries. Norderney and Borkum (islands) are seaside resorts. Göttingen is the seat of a university, and the capital is Hanover. The people of the north-eastern and central provinces are mostly Saxons; those on the coast are of Frisian origin; those on the west of the Ems, Dutch; and those in the southern provinces, Thuringians and Franconians. Platt-Deutsch, or Low German, is commonly spoken in the rural districts; but High German is the language of the educated classes, and is spoken with more purity than in any other part of the empire. The second elector of Hanover became in 1714 George I. of England, and the connection lasted until Queen Victoria's accession to the British crown in 1837, Hanover then passing to her uncle, the Duke of Cumberland. His son, the blind George V. (1819–78), succeeded in 1851, and in 1866 sided with Austria, and was dethroned, Hanover (which in 1815 had been constituted a kingdom) being annexed to Prussia.

HANOVER, the capital, is situated on a sub-tributary of the Weser, 78 miles SE. of Bremen and 158 W. of Berlin. It consists of the old town, with narrow streets and mediæval houses, and the handsome modern town, lying N., E., and SE. of the older portion. The most interesting buildings are the town-hall (1439), with antique sculpture and fine frescoes; the royal library (200,000 vols. and 4000 MSS.); the theatre, one of the largest in Germany; the palaces; the museum, with natural history and art collections; the Kestner Museum, with antiquities and a collection of engravings (120,000); the polytechnic school, formerly a ducal castle; the castle church; the 14th-century 'market' church; and the 'new town' church, with the tomb of Leibnitz; and the magnificent railway station. Close by is the royal palace of Herrenhausen, whose beautiful grounds are open to the public. Hanover is a centre of the North German railway system, and amongst its industries are railway repair shops, iron-founding, typefounding, the manufacture of pianofortes, india-rubber goods, tobacco, linen, sugar, chocolate, hardware, brewing, and distilling. Pop. (1871) 87,641; (1910) 302,384. Hanover is the birthplace of the brothers Schlegel; Louisa, queen of Prussia; and Sir William Herschel.

Hanover, a New Hampshire village, near the Connecticut, 55 miles NW. of Concord. Here is Dartmouth College (1770).

Hanse Towns. See HAMBURG, BREMEN, LÜBECK.

Hansi, a town of the Punjab, 80 miles NW. of Delhi, was a British cantonment from 1802 down to the Mutiny (1857). Pop. 15,656.

Hanwell, a Middlesex urban district, with lunatic asylum, 3 miles W. of Acton. Pop. 19,000.

Han-yang. See HANKOW.

Haparanda, a town in the Swedish province of Norrbotten, near the Torneå's mouth, and opposite the Russian town of Torneå. Pop. 1250.

Harar, or HARRAR, a town in the Galla country now belonging to Abyssinia, connected by rail with the port of Jibutil in French Somaliland (186 miles NNE.). Pop. 40,000.

Harbin, or KHARBIN, a town of Manchuria, on the Sungari, a tributary of the Amur (which divides Manchuria into northern and southern sections), where the Siberian railway sends off the branch to Port Arthur. A mere village till 1890, it developed under Russian influence to a city of 30,000.

Harborough. See MARKET-HARBOROUGH.

Harbour Grace, port of entry and second town of Newfoundland, 84 miles WNW. of St John's. Pop. 4000.

Harburg, a Prussian seaport in Lüneburg, 5 miles S. of Hamburg, on the Elbe. Its industries include gutta-percha goods, palm-oil, cotton-seed oil, chemicals, &c. Since the deepening of the Elbe, Harburg's commerce has greatly increased. It is a holiday resort for the Hamburgers. Pop. 70,000.

Hardanger Fjord, Norway, a narrow sea-inlet, 20 miles S. of Bergen. It is 930 feet deep, and extends 68 miles north-eastward without reckoning branches, amidst magnificent mountain scenery. The Hardanger Fjeld is a tract of the mountainous backbone of Norway, NE. of the Fjord.

Harden, the seat of Lord Polwarth, in Roxburghshire, 4 miles W. of Hawick. It has belonged to the Scotts since 1501.

Harderwijk, a Dutch fishing-town, on the south-east shore of the Zuider Zee, 31 miles NE. of Utrecht by rail. From 1648 to 1811 it was the seat of a university. Pop. 7339.

Hardwár (*Hari-dwára*, 'Vishnu's gate'), perhaps the most famous spot on the Ganges, stands where the river emerges from the sub-Himalaya into the plains of Hindustan, 39 miles NE. of Saharunpur, United Provinces. It attracts immense numbers of pilgrims at the end of March and the beginning of April—a great fair at the same time engrafting commerce on religion. In ordinary years the attendance is about 100,000; but every twelfth year (as in 1882, 1894, &c.) peculiarly sacred rites takes place, attended by perhaps 300,000 (formerly 2,000,000). Hardwár is 1024 feet above the sea, and has a pop. of 25,600. Since 1891 elaborate and successful efforts have been made, by means of rigid and scientific sanitation, to prevent the fair from being as heretofore a great means of spreading cholera.

Hardwick Hall, a Derbyshire seat of the Duke of Devonshire, 6½ miles SE. of Chesterfield. It was built in 1590 by the duke's ancestress, the famous 'Bess of Hardwick.'

Harfleur (mediæval *Hareflot*), a town in the French dep. of Seine-Inférieure, on the Seine's estuary, 4 miles E. of Havre. Formerly it was an important seaport and fortress. Pop. 2616.

Haringvliet. See Meuse.

Hari-Rud, or Heri-Rud, a river of Asia, which rises in the Hindu Kush, 150 miles W. of Kabul, and flows 500 miles westward and northward through Afghanistan, and along the boundary between Persia and Turkestan, until it loses itself in several arms in the Tekke Turkoman oasis.

Harlaw′, 18 miles NW. of Aberdeen, the scene on 24th July 1411 of the great defeat of the Highlanders led by Donald, Lord of the Isles, by the Lowlanders under the Earl of Mar.

Harlech, an ancient town of Merionethshire, North Wales, stands on the coast, 10 miles N. of Barmouth. On a steep hill overlooking the sea is its massive castle, which held out for the Lancastrians in the Wars of the Roses, and later for Charles I. The 'March of the Men of Harlech' commemorates its capture by the Yorkists in 1468.

Harleston, a Norfolk market-town, near the Waveney, 6½ miles SW. of Bungay. Pop., with Redenhall, 2000.

Harlingen (Frisian *Harns*), a Dutch seaport, in Friesland, on the Zuider Zee, 14 miles W. by S. of Leeuwarden. It has a good harbour (1875). Pop. 12,000.

Harlow, an Essex town, near the Stort, 6 miles SSW. of Bishop-Stortford. Pop. of parish, 3000.

Haro, a town of Spain, on the Ebro, 31 miles by rail NW. of Logroño. Pop. 7526.

Harper's Ferry, a post-village of West Virginia, situated among beautiful scenery at the confluence of the Shenandoah with the Potomac, 81 miles W. of Baltimore by rail. It was the scene of John Brown's abolition raid in 1859; and here a Union army of over 11,500 men surrendered to Stonewall Jackson in 1862.

Harpurhey, a township within the parliamentary borough of Manchester.

Harrar. See Harar.

Harrington, a Cumberland coast-town, 4½ miles N. of Whitehaven. Pop. 4300.

Harris, in the Hebrides, is the southern portion of the island of Lewis (q.v.), with islets; pop. 5500.

Harrisburg, the capital of Pennsylvania, is situated amid beautiful scenery on the left bank of the Susquehanna River, which is here crossed by several long bridges, 106 miles W. by N. of Philadelphia. It contains the capitol, court-house, arsenal, insane asylum, and a Roman Catholic cathedral. The city has a number of blast-furnaces and rolling-mills, and large manufactures of steel and iron, including boilers, machinery, nails, and files; cotton goods, flour, bricks, shoes, brooms, &c. are also produced, and there is a large trade in lumber. Founded in 1785, Harrisburg became the state capital in 1812. Pop. (1870) 23,104; (1910) 64,186.

Harrismith, a town in the east of the Orange Free State, 160 miles NW. of Durban by rail. Pop. 10,000.

Harrison, a town of New Jersey, on the Passaic, opposite Newark. It manufactures oilcloth, wire, thread, &c. Pop. 15,600.

Harrogate, or Harrowgate, a watering-place in the West Riding of Yorkshire, lies among the moors, 450 feet above sea-level, and by rail is 17 miles N. of Leeds and 20 WNW. of York. It consists of two parts, High and Low, and is celebrated for its sulphureous, saline, and chalybeate springs. The sulphureous springs are of laxative and diuretic quality, while the chalybeate are tonic. The waters are used both externally and internally, and are in great repute in many diseases of the skin and in some cases of dyspeptic disorders, scrofula, gout, jaundice, rheumatism, &c. The springs were discovered in 1596. Harrogate is a remarkably healthy place, the death-rate per 1000 ranging in six years between 13·2 and 10·3. It was incorporated as a municipal borough in 1883. Pop. (1851) 3678; (1911) 33,706. See Smollett's *Humphrey Clinker* (1771) and Grainge's *History of Harrogate* (1871).

Harrow, or Harrow-on-the-Hill, a town of Middlesex, 11½ miles WNW. of St Paul's, stands on a hill, 200 feet high, that looks over thirteen shires. Its 'visible church,' which crowns the hill-top, was founded in 1094, and rebuilt about the middle of the 14th century. Exhibiting every style of Gothic architecture, from Norman to Perpendicular, it has a lofty spire and eleven brasses (one of them to John Lyon): whilst in the churchyard is a flat tombstone on which Byron as a schoolboy used to lie. Pop. (1851) 4951; (1910) 17,076; of district, 49,000.

Harrow School, founded by John Lyon in 1571, ranks as one of the great English public schools, with some 600 boys. Former distinguished *alumni* having been Lord Byron, the Marquises of Dalhousie and Hastings, Dean Merivale, Lord Palmerston, Sir Robert Peel, Admiral Rodney, Lord Shaftesbury, Sheridan, Trollope, and Colonel Burnaby. The buildings date from 1608, and include the chapel (1857), Vaughan Library (1863), and Speech-room (1877). See works by Pitcairn (1870), Rimmer (1881), Thornton (1885), Minchin (1898), Howson, Warren, and twenty-four others (1898), and Fischer Williams (1901).

Hartford, the capital of Connecticut, on the right bank of the Connecticut River, 50 miles from its mouth, and 112 by rail NE. of New York. It is a handsome city, with streets not all too regular, and an imposing state capitol of white marble, arsenal, post-office, and, on the outskirts, the new buildings of Trinity College (Episcopal), which was founded in 1823. Hartford contains a Congregational seminary, a large hospital, asylums, and several libraries; it is the seat of a Roman Catholic bishop. There are extensive manufactures of Colt's pistols, Gatling guns, engines, boilers, and machines, hardware, stoneware, and wooden wares, and a trade in Connecticut tobacco. The site of a Dutch fort in 1633, and of a colony of Massachusetts settlers as early as 1635–36, Hartford was incorporated as a city in 1784, and has been sole capital of the state since 1873. About 1780 the 'Hartford wits,' of whom Joel Barlow was one, made the city a literary centre. Here in 1814 took place the meeting of New England delegates known as the Hartford Convention. Pop. (1870) 37,180; (1880) 42,015; (1890) 53,230; (1910) 98,915.

Harthill, a collier-village of Lanarkshire, 5 miles SW. of Bathgate.

Hartland Point, a Devon headland, on the south side of Barnstaple Bay, at the mouth of the Bristol Channel.

Hartlebury Castle, the seat of the bishops of Worcester, 4 miles S. by E. of Kidderminster.

Hartlepool, a municipal borough and seaport in the county of Durham, is situated on a small peninsula north of the estuary of the Tees, 12 miles NNE. of Stockton, and 18 ESE. of Durham. Its ancient sea-fishing industry has recently extended. The ancient boundaries were in 1883 extended so as to take in the township of Throston and part of Stranton. The local industries are iron shipbuilding, marine engineering, and cement-manufacture. The former considerable shipping trade is now almost entirely transferred to West Hartlepool. The harbour entrance is safe, and communicates by a channel direct to the more modern port. A substantial sea-wall and delightful promenade, completed in 1889, have added much to the attractive appearance of the town on the seaward side. Pop. of municipal borough (1851) 9503; (1911) 20,618.

West Hartlepool, a municipal and county borough, is situated to the south as Hartlepool is to the north of Hartlepool Bay, and practically forms one town with Hartlepool. It was founded in 1847 by Ralph Ward Jackson, an enterprising railway projector, afterwards M.P. It possesses a theatre, athenæum and mechanics' institute, custom-house, market-house, exchange, a municipal hall opened by Prince Albert Victor in 1889, a school of art, &c. The first harbour was constructed here in 1847, of 12 acres, and has since been greatly enlarged. The dock area of Hartlepool and West Hartlepool together, including the timber and shipbuilding yards, &c., is over 300 acres in extent. Extensive iron-shipbuilding yards, cement-works, wood-pulp works, and marine-engine building establishments have been founded. There are graving-docks leased by the North-Eastern Railway Company, and also one extensive graving-dock open to public use. The imports include coal, flax and hemp, grain, timber, butter, cheese, fruit, cattle, tallow, and iron; the exports, woollen and cotton goods, copper, cement, drugs, machinery, earthenware, yarn, hides, &c., the trade being carried on for the most part with the Baltic ports, and with Hamburg and Rotterdam. The town was created a municipal borough in 1887. Pop. of municipal borough (1881) 28,167; (1901) 62,227; (1911) 63,932. In 1867 'The Hartlepools' were constituted a parliamentary borough, returning one member; pop. (1911) 86,061.

Hartz. See Harz.

Harvard. See Cambridge (Mass.).

Harwich (*Har'ritch*), a municipal borough, seaport, and market-town of Essex, is situated on a promontory at the influx of the confluent Stour and Orwell to the sea, 71 miles by rail NE. of London. Southward of Harwich is the watering-place of Dovercourt, with a sea-wall 2 miles long. The chief industries are shipbuilding, fishing, and the manufacture of cement. Steamers run daily to Ipswich, and there are regular lines of packets to Antwerp, Rotterdam, London, &c. The harbour is capacious, safe, and commodious, having been much improved since 1844. It is defended by a battery, and, on the Suffolk side, by Landguard Fort, which dates from the reign of James I. From the 14th century till 1867 Harwich returned two members, and from then till 1885 one. Pop. (1851) 4451; (1881) 7842; (1911) 13,623.

Harz Mountains, a mountain-range of Germany, extending between the rivers Weser and Elbe, south of Brunswick, with a length of 57 miles, a breadth of 20, and a superficial area of 784 sq. m. It forms an elevated plateau, rising on most sides somewhat steeply from the plains, and ridged with irregular and in some parts forest-clad mountains. The range, which is divided into Upper and Lower Harz, the average elevations of which are 2100 and 1000 feet respectively, attains 3740 feet in the Brocken (q.v.), the highest peak of central Germany. The Harz are exceedingly rich in metals and minerals, as silver, iron, lead, copper, zinc, marble, alabaster, and granite. They are the scenes of many of the weird legendary tales of German literature.

Haskeval. See Rum.

Haslar Hospital. See Gosport.

Haslemere, a town of Surrey, 12½ miles SW. of Guildford by rail, manufactures walking-sticks and woodware; till 1832 it was a parliamentary borough. Pop. 3600. Three miles south, and over the Sussex border, is Blackdown Common, on the southern heights of which stands Aldworth, the home built for himself by Lord Tennyson from his own design, in which he died.

Haslingden, a municipal borough (since 1891) of Lancashire, 19 miles NW. of Manchester. It has cotton, silk, and woollen manufactures, with neighbouring ironworks, coal-mines, and stone and slate quarries. Pop. (1851) 6164; (1911) 18,723.

Hasselt, capital of the Belgian province of Limburg, 18 miles NW. of Maastricht. Pop. 18,000.

Hâstinapur, a ruined city of India, on the old bed of the Ganges, 22 miles E. of Meerut.

Hastings (A.S. *Hæstingas*), a parliamentary, municipal, and county borough and famous watering-place of Sussex, is picturesquely situated on the shore, and surrounded by high cliffs on all sides except the south, which is open to the sea. By rail it is 33 miles E. of Brighton, and 62 SSE. of London. It consisted formerly of only two streets, intersected by a small stream called the Bourne, but is now a large place, whose resident population is doubled during the holiday season. Since the middle of the 19th century the borough has been greatly extended, and some portions of the hills which shelter the town contain several fine streets and terraces. The breezy esplanade, over 3 miles in length, forms one of the finest sea walks and drives in the kingdom. The climate is dry, mild, and equable, and the bathing very good. During cold weather in winter and spring the place is a resort for pulmonary patients, being sheltered by the hills inland from easterly and northerly winds. The drainage is good; the water-supply pure and abundant; and salt water is laid on for watering the streets and for bath purposes. The corporation have purchased the East and West Hills, fine open plateaus commanding beautiful land and sea views, and admirably adapted for golf and other outdoor sports. There are three large public gardens, and an extensive Alexandra Park, opened by the Prince and Princess of Wales in 1882. Hotels are plentiful, and several large and flourishing schools have been established, the Hastings centre taking a large place in the Oxford and Cambridge local examinations. One of the great attractions of the town to visitors is the handsome pier (1872), extending 900 feet from the parade, and having a spacious pavilion at the sea, with accommodation for between 2000 and 3000 persons. A similar pier (1890) is at St Leonards, about a mile westwards. The 'premier Cinque port' is one of the three richest fishing-stations on the south coast. The castle, now in ruins, was built by one of the followers of William the Conqueror. Hastings (since 1885) returns only one member. Pop. of parliamentary borough (1881) 47,619; (1911) 58,576; of county borough (1901) 65,528; (1911) 61,146. For the battle of Hastings, see Battle; and see also works by W. D. Cooper (1862) and Montagu Burrows (1888).

Hastings, the capital of Adams county, Nebraska, 151 miles SW. of Omaha. Pop. 10,000.

Hatfield, or Bishops Hatfield, a market-town of Hertfordshire, 18 miles NNW. of London by rail. There exist a few scanty remains of the 12th-century palace of the bishops of Ely, seized, together with the manor, by Henry VIII., and successively the residence of that king, of Edward VI. and Queen Elizabeth before their accession, and of James I. Hatfield House, the Marquis of Salisbury's seat, was built by Sir Robert Cecil in 1611, and is a fine specimen of Jacobean architecture, rich in portraits and historical manuscripts. Pop. of parish, 5300. See Brewer's *English Studies* (1881).

Hatfield Chase, a fenny tract of land in the West Riding of Yorkshire, lying between the Trent and Doncaster, some 180,000 acres in extent, which has been drained, and is now cultivated. See a work by John Tomlinson (1882).

Hathras, a town in the United Provinces, 21 miles S. of Aligarh. The commercial centre for the Upper Doab, it exports sugar, grain, cotton, &c., and is famous for its delicate carved work. Pop. 42,580.

Hatteras, Cape, a low point of North Carolina, forming part of a sandbank, in 35° 15′ N. lat. and 75° 31′ W. long.

Hatzfeld (Hung. *Zsombolya*), a town of Hungary, 20 miles W. of Temesvar. Pop. 10,000.

Haulbowline Island, a fortified islet in Cork Harbour, with a fine harbour and the only government dockyard in Ireland.

Haupur, a town of India, in the United Provinces, 18 miles S. of Meerut. Pop. 15,212.

Haurân (anc. *Auranitis*), a district in Syria, lying E. of the Sea of Galilee.

Hausa, or Haussa, an energetic and industrial negroid race with an admixture of Fulah and Arab blood, occupying a large area of N. Nigeria. Their language is spoken by 15,000,000 of various races.

Haute Garonne, &c. See Garonne, &c.

Havana, or Havannah, seaport and capital of the island of Cuba, and the principal centre of commerce in the West Indies, is situated on the north side of the island. Access is obtained to its magnificent well-sheltered harbour by a channel 350 yards wide, the entrance to which is defended by forts. The streets of the older part of the town, which until 1863 was walled, are narrow and dirty, and the harbour has been for generations polluted by the town sewage. With this older part the more modern portion lying to the west is connected by broad tree-shaded avenues and gardens. The cathedral, built in the old Spanish style in 1724, enshrined the bones of Columbus from 1796 till 1899. The public institutions include an arsenal, great hospital, a botanical garden, university, technical school, and some fine theatres. Yellow fever, almost endemic, was stamped out by American sanitation in 1898–1904. The staple industry is the manufacture of cigars; sugar, tobacco, and molasses are the main exports (mostly to the United States). The chief imports are food-stuffs and cotton. San Christobal de la Habana, founded on the south coast by Diego Velasquez in 1515, was four years later transferred to its present site. It was burned to the ground by the French in 1538, plundered by another band in 1554, captured by a third in 1563, and by the English in 1762. In the 17th century it was made the chief Spanish emporium in the West Indies—a position it held till 1898, when, in the Spanish-American war, Cuba was occupied by the United States, becoming an independent state in 1902 (see Cuba). Pop. (1910) 300,000.

Havant, a market-town of Hampshire, 8 miles NE. of Portsmouth. Tanning and matting are the chief industries. Pop. 4100.

Havel, a river issuing from a small lake in Mecklenburg, flows 220 miles SW. and NW. past Spandau, Potsdam, and Brandenburg, to its junction with the Elbe, opposite Werben. It receives the Spree, on which Berlin stands.

Haverfordwest (Welsh *Hwlffordd*), a parliamentary and municipal borough, seaport, and market-town of Wales, capital of Pembrokeshire, on the river Cleddau, 10 miles NNE. of Milford by rail, and 162 W. of Gloucester. A body of Flemings was settled here by Henry I. in 1107. The 14th-century castle (its keep now the police-station) was erected by the first Earl of Pembroke. There are also remains of a 12th-century Augustinian priory. Paper-making is the chief industry. Since 1885 Haverfordwest has been one of the Pembroke boroughs, which return one member. Pop. 6000.

Haverhill, an ancient market-town of SW. Suffolk, 18 miles SE. of Cambridge. Pop. of urban district, 4750.

Haverhill, a city of Massachusetts, at the head of navigation on the Merrimac River, 33 miles N. of Boston by rail. The manufacture of boots and shoes employs over 6000 men in 200 factories; and there are manufactures also of iron, hats, glass, &c. Pop. (1870) 13,092; (1910) 44,115.

Havre, Le (a contraction of the original name, Le Havre de Notre Dame de Grâce), a seaport of France, second only to Marseilles, in the dep. of Seine-Inférieure, on the north side of the Seine's estuary, 143 miles NW. of Paris. The chief imports are coals, wheat, cotton, dyewoods, coffee, hides, petroleum, wool, palm-oil, alcohol, cocoa, and sugar. The exports include wine, woollen and cotton goods, millinery, potatoes, salt, butter, paper, silks and ribbons, china-ware, eggs, and ochre. Havre possesses excellent harbour accommodation, having nine separate dock basins; two new dry-docks were opened in 1889. The port is very greatly handicapped by its poor railway connection, the heavy harbour dues, and the shifting sandbanks that lie in the estuary. Havre is one of the chief emigrant ports in France; and it has great shipbuilding-yards, machine-factories, cannon-foundries, flour-mills, petroleum and sugar refineries, and dye-works. The buildings include the 16th-century church of Notre Dame, a museum, a Renaissance town-house, a marine arsenal, &c. There are statues to Bernardin de St Pierre and Casimir Delavigne, both natives. Pop. (1876) 85,407; (1911) 136,159. Down to 1516 Havre was only a fishing-village. Its history as a seaport dates from the reign of Francis I. Havre was held for some months in 1562 by the English, who were expelled by Charles IX. after a hot siege. Louis XIV. made it a strong citadel, and it was several times bombarded by the English in the 17th and 18th centuries. The town walls were demolished in the middle of the 19th century. Mdlle. de Scudéry was born at Havre.

Hawaii, a small archipelago in the North Pacific, named Sandwich Islands by Captain Cook after Lord Sandwich, First Lord of the Admiralty. The islands, twelve in number, form a rich, beautiful, and interesting chain, which runs from south-east to north-west, and lies in 19° to 22° N. lat. and 155° to 160° W. long. Their total area is 6564 sq. m., or rather smaller than Wales. The names and areas of the eight principal islands are: Hawaii (the 'Owhyhee' of Captain Cook), 4210 sq. m.; Maui, 760; Oahu, 600; Kauai, 590; Molokai (the 'Lepers' Island'), 270; Lanai, 150; Kahulaui, 63; Niihau, 97. The Hawaiian Islands lie in mid-ocean, but nearer America (2100 miles) than Asia; they consequently form a convenient station for the coaling and repairing of vessels on their way across the Pacific. The islands are of volcanic origin, with coral-reefs partly encircling most of them; the only well-protected harbour being that of Honolulu, on Oahu. The larger islands are mountainous, and contain some of the principal volcanoes, both active and extinct, in the world. The two highest mountains, Mauna-Kea and Mauna-Loa, are in the island of Hawaii, and are 13,805 and 13,675 feet high respectively. On the eastern slope of Mauna-Loa, in Hawaii, is the far-famed Kilauea, the largest active volcano in the world. It is over 4000 feet above sea-level. Its oval crater, 9 miles in circumference, is bounded by a range of cliffs, and contains a fiery lake of molten lava rising and falling like the waves of the sea. Mauna-Loa itself is an active volcano. On Maui is the crater of Haleakala, by far the largest known in the world. It is from 25 to 30 miles in circumference, from 2000 to 3000 feet deep, and is 10,032 feet above sea-level.

The Hawaiian Islands, though within the tropics, enjoy a fairly temperate climate—90° to 52° F., or a mean of 74·3° F. Rains, brought by the north-east trade-wind, are frequent on the side of the mountains which faces that quarter, but on the other parts of the islands little rain falls, and the sky is generally cloudless. The yearly rainfall of the islands generally is about 54 inches. In Hawaii alone, on the Waimea plains, thousands of sheep of the merino breed find grazing ground; and on most of the islands, while the upland slopes of the mountains are clothed with dense forests, the lower levels spread into grassy plains rich with sugar and rice plantations. The staple food of the natives consists of *poi*, a thick paste made from the root of the *taro* plant (*Arum esculentum*) and raw or dried fish. The only indigenous animals are rats, mice, bats, dogs, and hogs, but others have been added by the white men. There are large numbers of semi-wild horses, and some wild dogs.

The most important trade was with Pacific whalers down to 1876, when a Reciprocity Treaty was concluded with the United States, and there was an enormous development of the sugar export; other exports being rice, wool, molasses, tallow, and bananas. The imports consist principally of dry-goods. Nine-tenths of the trade is with the United States. On the islands there are telegraphs, telephones, and 250 miles of railway.

The islands are said to have been discovered by Gaetano in 1542, and rediscovered in 1778 by Captain Cook, who met his death at the hands of the natives in Kealakekua (Karakakoa) Bay, 1779. Kamehameha I. formed the islands into one kingdom. Missionaries came from America in 1820, and in less than forty years they taught the whole Hawaiian people to read and write, to cipher and sew. In 1843 the independence of the kingdom was guaranteed by the French and English governments. Kalakaua, elected king in 1874, died in 1891, and was succeeded by his eldest sister, Liliuokalani, who was dethroned in January 1893, the islands next month being annexed to the United States—an annexation, however, repudiated by President Cleveland, whereupon a provisional republican government was established; but the islands were finally annexed by the United States in 1898, and in 1900 were organised as one of the territories of the republic. The total pop. of all the islands amounted in 1788 to some 200,000, in 1900 to 153,727, and in 1910 to 191,905, of whom 26,108 were Hawaiians, 11,912 part-Hawaiians, 21,666 Chinese, 79,520 Japanese, and 44,039 whites. The Hawaiians belong to the brown Polynesian stock, and are a remarkably handsome race; in character indolent, joyous, and contented. Foreign diseases have tended to reduce the population, but leprosy is now the most dreaded. In 1865 the island of Molokai was set apart for lepers (900 in 1900), among whom Father Damien laboured and died (1889).

See works by Miss Bird (Mrs Bishop; 1875), Miss Gordon Cumming (1883), Alexander (1892); also Musick, Shoemaker, Young, Whitney, Blackman, Brain, Twombly, Griffin, and Taylor (all between 1897 and 1906).

Hawarden (pron. *Harden*), a small market-town of Flintshire, North Wales, 7 miles W. of Chester. The church, almost destroyed by fire in 1857, was restored by Sir G. G. Scott. Hawarden Castle, Mr Gladstone's home, dates from 1752. The park contains the ruined circular keep of a 13th-century castle. St Deiniol's Library here was established by Mr Gladstone. Lady Hamilton passed her girlhood at Hawarden. Pop. of parish, 6500.

Hawash, a river of Abyssinia.

Hawes Water, a Westmorland lake, measuring 2½ miles by ½ mile, and 694 feet above sea-level, between Mardale and Bampton.

Hawick (*Hau'ick*), a manufacturing town of Roxburghshire, at the confluence of the Slitrig with the Teviot, 52 miles by rail SSE. of Edinburgh and 45 NNE. of Carlisle. Built in and round a hollow, with villas and mansions above, it is a place of hoar antiquity, but bears few traces thereof beyond the Moat, an artificial earthen mound 30 feet high and 312 in circumference, and part of the Tower Hotel, which, once the peel-tower of the Drumlanrig Douglases, and later a residence of Monmouth's widowed duchess, was the only building not burned by the Earl of Sussex in 1570. In the neighbourhood are Branxholm and Harden, old homes of the Scotts; and, older than either, there is the refrain of the June Common-riding song, 'Teribus ye Teri Odin,' which carries us back to days of heathendom. Else, all is modern—the handsome municipal building (1885); the churches, more than a dozen in number, and the oldest (1214) rebuilt in 1763; the splendid water-supply (1865–82); and the hosiery and tweed mills, to which, with dyeworks, tanneries, &c., Hawick owes its prosperity. The hosiery manufacture dates from 1771, and that of shepherds' plaids, tweeds, blankets, &c. from 1830. The ancient municipal constitution of the burgh, based on a charter granted by Sir James Douglas of Drumlanrig in 1537, and confirmed by Queen Mary in 1545, was reformed by special act of parliament in 1861; and since 1867 Hawick, Selkirk, and Galashiels (the Border burghs) have returned one member. Pop. (1891) 19,204; (1911) 16,877. See a local history by Mrs Oliver (1887).

Hawke's Bay, a provincial district of New Zealand, on the east coast, between Auckland and Wellington. Area, 4765 sq. m.; pop. (1871) 6059; (1911) 48,546. It presents rich alluvial plains and undulating hills, with enormous forests. The bay known as Hawke's Bay was first entered by Captain Cook on 8th October

1769, and was so named after Sir Edward Hawke, then First Lord of the Admiralty. Napier (q.v.) is the port and chief city.

Hawkesbury, a river of New South Wales, rises in the Cullarin Range, and under the names of Wollondilly, Warraganda, and Nepean flows NE., then turns as the Hawkesbury SE., and enters the Pacific at Broken Bay, about 20 miles NE. of Sydney. It is crossed by a seven-span steel girder railway bridge (1886–89), 2900 feet long. A great dam on the Warraganda section will provide copious irrigation for the fertile country W. of Sydney, and unlimited electric power for Sydney.

Hawkshead, a town of north Lancashire, 5 miles SW. of Ambleside. Wordsworth was educated at the grammar-school, which was founded by Archbishop Sandys in 1585. Pop. of parish, 630.

Haworth, a moorland town in the West Riding of Yorkshire, 4 miles SSW. of Keighley by a branch-line. The old church has been ruthlessly demolished, but in the churchyard are the graves of Charlotte and Emily Brontë. Pop. 6500.

Hawthornden, the romantic home of the poet Drummond, in Midlothian, on the Esk, 1¼ mile NE. of Roslin.

Hay, a Brecon market-town, on the Wye, 21 miles W. of Hereford. Pop. 1600.

Haydock, a Lancashire urban district, 3½ miles ENE. of St Helens. Pop. 10,000.

Haydon Bridge, a Northumberland town, on the South Tyne, 7½ miles W. of Hexham. Pop. of parish, 2300.

Haye, La. See Hague.

Hayes Barton, Devon, Raleigh's birthplace, now a farmhouse, 4 miles WSW. of Sidmouth.

Hayle, a Cornish seaport, 4 miles SE. of St Ives. Pop. 1000.

Hay River, in the Canadian North-west, on its north-eastward course to the southern shore of the Great Slave Lake, forms the two Alexandra Falls, 250 feet high and 300 yards wide.

Hayti, or Haïti ('mountainous country,' otherwise Hispaniola—i.e. 'little Spain'—or Santo Domingo), is, after Cuba, the largest of the West Indian Islands, now divided into the independent states of Hayti and the Dominican Republic (q.v.). Nearly equidistant from Porto Rico, Cuba, and Jamaica, it lies between 17° 37′ and 20° N. lat., and between 68° 20′ and 74° 28′ W. long. As in the rest of the Greater Antilles, its greatest length (about 400 miles) is in the direction—from west to east—of the chain of which it forms a part; its greatest breadth is 160 miles. Area, including the islands of Tortuga, Gonaive, &c., 28,820 sq. m., or nearly that of Scotland. The country is mountainous, being traversed longitudinally by northern, central, and southern ridges, terminating in headlands on either coast; but between these ranges are wide and fertile plains. The highest peak is Loma Tina (10,300 feet). The climate is hot and moist in the low lands, the temperature at Port-au-Prince ranging from 67° to 104° F.; the mean range in the highlands is from 60° to 76° F. Earthquakes are frequent, and occasional hurricanes visit the island. It has excellent harbours. The mountains are clothed with forests of pine and oak, and the island is rich in mahogany, satinwood, rosewood, and other valuable timbers. Cotton, rice, maize, cocoa, ginger, arrowroot, yams, tobacco, and numerous fruits are indigenous; and the mango, bread-fruit, sugar, coffee, and indigo are also produced; but agriculture is very backward. The minerals are now little worked, though some gold-washing is still carried on. The rivers are not navigable. Both rivers and lakes abound in caymans as well as fish. The agouti is the largest wild mammal.

Hayti was discovered in 1492 by Columbus; and within little more than one generation the aborigines had been swept away by the remorseless cruelties of the Spaniards. Their place was filled with negro slaves, who were introduced as early as 1505. Next, about 1630, came the buccaneers; and, as they were chiefly French, the western portion of Hayti, which was their favourite haunt, was in 1697 ceded to France by the peace of Ryswick. For nearly a hundred years vast reinforcements of Africans were imported; subsequently the mulattoes grew into an intermediate caste, neither citizens nor bondsmen. In 1791 the mutual antipathies of the three classes—white, black, and mixed—burst forth into a struggle which, before the close of the century, led to the extermination of the Europeans, and the independence of the coloured insurgents. In 1801 France sent out a powerful armament, treacherously seizing and deporting the deliverer of his brethren, Toussaint l'Ouverture. In 1804 Dessalines, aping Napoleon's example, proclaimed himself Emperor of Hayti. Sometimes one state, and sometimes two, the country alternated between despotism and anarchy, between monarchy and republicanism. Its only tranquil period of any duration coincided with the rule (1820–43) of President Boyer, at whose close the Spanish or eastern portion of the island formed itself into the Dominican Republic (q.v.). The western portion of the island remained republican until 1849, when its former president, the negro General Soulouque proclaimed himself emperor as Faustin I. In 1859 a republic was again proclaimed. Few presidents have since been permitted to complete their term of office (seven years), which has usually been cut short by revolutions. Official peculation, judicial murder, and utter corruption of every kind underlie the forms and titles of civilised government; the religion, nominally Catholic, is largely *vaudoux* or serpent-worship, in which cannibalism is even now a most important element. Instead of progressing, the negro republicans have gone back to the lowest type of African barbarism.

The area of the republic of Hayti is about 9200 sq. m.; the pop. is estimated at about 1,500,000. The capital, Port-au-Prince, has some 70,000 inhabitants. The dialect is a debased French. The chief exports are coffee, cacao, logwood, mahogany, and cotton. See works by St John (1884), Marcuse (German, 1894), Marcelin (French, 1893), Vibert (French, 1895), Jean Owen (1898), Blackman (1899), and Hesketh Prichard (1900).

Hayward's Heath, a Sussex market-town, 12½ miles N. of Brighton. Pop. 5000.

Hazaribagh, a town of Chota Nagpore, British India. Pop. 20,000.

Hazebrouck, a town in the French dep. of Nord, 28 miles WNW. of Lille. Pop. 12,650.

Hazleton, a borough of Pennsylvania, 100 miles NNW. of Philadelphia, has ironworks, lumber-mills, and railway-car shops, and is the centre of the rich Lehigh coalfield. Pop. 25,500.

Headford, a village 20 miles N. of Galway. Pop. 400.

Heanor, a Derbyshire town, 6 miles E. by S. of Belper, with coal-pits and ironworks. Pop. of urban district, 20,000.

Heart's Content, a port of Newfoundland, on the east side of Trinity Bay. Pop. 1080.

Heathfield, a Sussex parish, 8 miles N. of Hailsham, a great poultry-farming centre, with natural gas from borings. Heathfield Park was purchased in 1763 by General Eliott, Lord Heathfield. Pop. 3100.

Heath Town, a north-east suburb of Wolverhampton.

Heaton-Norris, a Lancashire town, suburban to Stockport (q.v.). Pop. 11,500.

Hebburn, a Durham town, on the Tyne, 3 miles WSW. of South Shields. It has chemical-works and shipbuilding. Pop. (1881) 11,802; (1911) 21,760.

Hebden Bridge, a town in the West Riding of Yorkshire, at the Hebden's influx to the Calder, 8 miles W. by N. of Halifax. It manufactures cotton, silk, iron, &c. Pop. 7200.

Heb′rides, or Western Islands, the general name applied to all the islands on the west coast of Scotland. To the Outer Hebrides belong Lewis with Harris (Long Island), North Uist, Benbecula, South Uist, Barra, and remote St Kilda, 60 miles to the west. The principal of the Inner Islands are Skye, Eigg, Coll, Tiree, Mull, Iona, Staffa, Ulva, Lismore, Kerrera, Colonsay, Oronsay, Jura, and Islay. Bute, the Cumbraes, and Arran are usually counted amongst the Hebrides; and to the same group were anciently assigned the peninsula of Kintyre, the island of Rathlin, and the Isle of Man. The total number of islands of any size is about 500, but of these four-fifths are uninhabited. Of the whole surface only about 200,000 acres are arable; the rest is pasture-land of little value, morasses, peat-mosses, lakes, and barren sands and rocks. Owing to the Gulf Stream, the Hebrides have a mild though humid climate. Politically they are distributed among the Scottish counties of Ross, Inverness, Argyll, and Bute. The crofters, who mostly speak Gaelic, are much occupied in fishing and fowling. Much of the area has been converted into sheep-walks, whilst extensive tracts are let to sportsmen. The Hebrides are the *Ebŭdæ* of Ptolemy and Pliny's *Hebŭdes* (of which 'Hebrides' is a corruption), and *Sudreyjar* (Southern Islands) of the Norwegians. This last name was Latinised as Sodorenses, which survives in the title 'Bishop of Sodor and Man.' The early Celtic inhabitants were converted to Christianity by St Columba in the 6th century. After 872 several of the islands were colonised by Norwegians, who came hither to escape the iron rule of Harold Haarfager. But to punish their depredations on the coast of Norway, Harold sent an expedition westwards, which subdued all the Western Islands as far south as Man. To Norway they remained subject till 1266. In 1346 the head of the Macdonalds subdued them, and took the title of Lord of the Isles; and from 1504 they became definitively Scottish possessions. Ecclesiastically they remained dependent on Norway till 1374. In the 19th century the population greatly declined. All the principal islands are separately treated.

See works by Martin (1703), Pennant (1774), Dr Johnson (1775), Gregory (1836), R. Buchanan (1883), Miss Gordon Cumming (1883), and Miss Goodrich-Freer (1902).

Hebrides, New. See New Hebrides.

Hebron, one of the oldest cities in Palestine, 21 miles SSW. of Jerusalem. It was the seven years' residence of King David before he conquered Jerusalem. The modern town, El Khalil ('the friend'—of God, Abraham), is a poor place, with some 18,000 inhabitants. It lies low down in a narrow valley—the Valley of Eshcol, famous now, as of old, for its grapes. The church erected by the Empress Helena, and converted into a mosque called *El-Haram* ('sanctuary'), encloses the cave which is the traditional burial-place of Abraham, Isaac, and Jacob.

Heckmondwike, a market-town in the West Riding of Yorkshire, 8 miles NE. of Huddersfield. It is the chief seat of the carpet and blanket manufactures in the West Riding, and also makes rugs, pilot-cloth, and flushings. There are iron-works, machine-shops, and coal-mines in the neighbourhood. Here was born John Curwen, the inventor of the Tonic Solfa system. Pop. (1851) 4540; (1901) 9460; (1910) 9016.

Hecla, or Hekla, a volcano in Iceland, stands isolated 20 miles from the SW. coast and 68 E. of Reykjavik. Its snow-clad summit is 5102 feet high, and has five craters; its sides are seamed by numerous deep ravines. The principal rocks are lava and tuff. Since the 9th century there have been twenty outbreaks, generally very violent, and often long continued. In September 1845 a terrific outbreak occurred and lasted for more than a year. A fine dust from this eruption was scattered over the Orkney Islands, a distance of 500 miles.

Hedgeley, a Northumbrian township, 8 miles WNW. of Alnwick. It was the scene of a skirmish (1464), in which Sir Ralph Percy fell.

Hedjâz. See Arabia.

Hedon, a decayed borough in the East Riding of Yorkshire, 5¼ miles E. of Hull. Pop. 1000.

Heide, the chief town of northern Ditmarsh, in the Prussian province of Sleswick-Holstein, 58 miles by rail WSW. of Kiel. Pop. 10,000.

Heidelberg, an ancient city of Baden, extends 3 miles along the left bank of the Neckar, in one of the most beautiful districts in the country, 13 miles by rail SE. of Mannheim and 54 S. of Frankfort-on-the-Main. It lies 380 feet above sea-level, at the base of the Königsstuhl (1863 feet). Among its most important buildings are the Church of the Holy Ghost, a splendid example of Late Gothic architecture, in which service according to the Catholic and Protestant rituals is simultaneously carried on; the church of St Peter's, on the door of which Jerome of Prague nailed his celebrated *theses;* and the magnificent castle, which crowns a hill 330 feet above the town. Begun at the close of the 13th century, and added to in 1410, 1559, and 1607, it was formerly the residence of the Electors Palatine, and was in great part destroyed by the French in 1689 and 1693, and further injured by lightning in 1764. In 1890 was undertaken the work of restoring its ruins at a cost of £50,000. In the cellar under the castle is the famous Heidelberg Tun, once capable of containing 50,000 gallons of wine. Heidelberg is celebrated for its university (1386), which declined from the Thirty Years' War until 1802, when the town and territory was assigned to the Grand-duke of Baden. It has about 170 professors and lecturers, and some 2400 students. Its library contains 500,000 volumes and 6000 MSS. Many of the most famous German scholars have been professors here—Reuchlin, Œcolampadius, Spanheim, Puffendorf, Voss, Schlosser, Creuzer, Gervinus, Paulus, Kuno Fischer, Helmholtz, Bunsen, Blüntschli, &c. Heidelberg, originally an appanage of the bishopric of Worms, was the seat of the Counts Palatine from the 12th till the 18th century. After the Reformation it was long the headquarters of German Calvinism. The trade is chiefly in books, tobacco, beer, and wine. The town suffered much during the Thirty Years' War, was savagely treated by the French in 1689, and was in 1693 almost totally destroyed by them. Pop. (1871) 19,988; (1900) 40,121; (1910) 56,010, of whom two-fifths are Catholics.

Heilbronn, an old town of Würtemberg, on the right bank of the Neckar, in a beautiful and fertile region, 28 miles by rail N. of Stuttgart. The church of St Kilian, partly Gothic and partly Renaissance; the old town-hall; the *Diebsthurm* ('Thief's Tower'), in which Götz von Berlichingen was confined; and the house of the Teutonic Knights, now a barrack, are the principal buildings. The industries include the manufacture of silver-plate, paper, iron, sugar, salt, chicory, and chemicals. Pop. 43,000.

Heiligenstadt, a Catholic town of Prussian Saxony, situated on the Leine, 32 miles ENE. of Cassel by rail. Pop. 10,000.

Heilsberg, a town of Prussia, 40 miles S. of Königsberg. Here the Russians and Prussians defeated the French in 1807. Pop. 6000.

Heilsbronn, a Bavarian village of Middle Franconia, 16 miles SW. of Nuremberg by rail, was the seat of a celebrated Cistercian monastery, founded in 1132, and suppressed in 1255.

Hekla. See HECLA.

Helder, THE, a strongly-fortified seaport in the Dutch province of North Holland, 51 miles by rail NNW. of Amsterdam. It stands on the Marsdiep, which connects the Zuider Zee and the German Ocean, and at the northern extremity of the North Holland Canal. First fortified by Napoleon in 1811, it has an arsenal, a college for cadets, a meteorological institute, and an excellent harbour. Pop. 27,760.

Helena, capital of Montana state, U.S., on the Northern Pacific Railway, is an important mining centre. The famous Last Chance Gulch goldmine runs through the city. Pop. 12,800.

Helensburgh (*El'lenz-bur'row*), a Scottish watering-place in Dumbartonshire, on the right bank of the Firth of Clyde, at the entrance to the Gareloch. It was founded in 1777 by Sir James Colquhoun, and named after his wife Helen. Pop. about 8600, which is nearly doubled in summer. In 1871 it was barely 6000.

Helicon, a mountain-range (5736 feet) of SW. Bœotia, in ancient Greece, was celebrated as the favourite seat of the Muses. At the foot of the range stood the village of Ascra, the residence of Hesiod, and the seat of the earliest school of poetry in Greece. On the slopes were the famous fountains of Aganippe and Hippocrene.

He'ligoland ('Holy Land;' Ger. *Helgoland*), a small island in the North Sea, belonging since 1890 to Germany, is situated 36 miles NW. of the mouth of the Elbe. It is 1 mile long from N. to S., ⅓ mile from E. to W., and ¾ sq. m. in area. The *Oberland* is a rock 206 feet high, on which stands a town of 400 houses, and access to which is obtained by 192 steps or by a steam-lift; while the *Unterland* is a patch of shore with 70 houses south-east of the cliff. The resident population is hardly more than about 3500; but in the bathing season Heligoland is visited by upwards of 20,000 summer visitors—attracted by the bathing facilities of the 'Sandy Island,' or *Düne*, once connected with the main island, separated from it by a channel about a mile wide. Denudating agencies are reducing Heligoland itself, which between 1890 and 1905 lost nearly a fourth of its area. The soil on the flat top of the rock of Heligoland suffices for a little pasture-land, and for growing potatoes and cabbages. The spit of the Unterland gives partial shelter to two harbours, one north, the other south. The inhabitants are supported chiefly by the lobster and other fisheries, and by the summer visitors; the public gaming-tables, established in 1830, having been suppressed in 1871. A lighthouse stands on the cliff near the village. The island, taken by the British from the Danes in 1807, and formally ceded to England in 1814, was ceded to Germany in 1890, in return for concessions made to Britain in East Africa. It has since been strongly fortified. A dialect of North Frisian is the native tongue, but German is currently spoken. Heligoland was anciently sacred to the goddess Hertha. Christianity was first preached here by St Willibrod in the 7th century. The fishers are Frisians, a tall and muscular race of hardy seamen. The merchants are immigrants from the mainland, or their descendants. The people, though they had been very loyal to Great Britain, accepted without opposition the annexation to Germany; and after a visit from the Emperor, Heligoland was formally incorporated with the kingdom of Prussia and the province of Sleswick-Holstein. See works by Black (1888), Lindemann (German, 1889), and Lipsius (German, 1892).

Heliopolis ('city of the sun'), the Greek name of the city called by the Egyptians On or An, which stood on the east side of the Pelusiac branch of the Nile, near the apex of the Delta, and was one of the most ancient and important of Egyptian cities. It was the chief seat of the wisdom of the Egyptians. See also BAALBEK.

Hellas. See GREECE.

Hellespont. See DARDANELLES.

Hell Gate, or HURL GATE, named by the Dutch settlers of New York *Helle Gat*, is a pass in the East River, between New York City and Long Island, formerly very dangerous to vessels from its rapid current and from its numerous rocks—blasted away only in 1885.

Hellin, a town of Spain, 69 miles by rail NNW. of Murcia. In the vicinity are productive sulphur-mines and sulphur-springs. Pop. 12,714.

Hell's Glen, an Argyllshire glen between Inveraray and Lochgoilhead.

Helmingham Hall, the fine moated Elizabethan seat of Lord Tollemache, in Suffolk, 9 miles N. by E. of Ipswich.

Helmond, a Dutch town, 23 miles NW. of Venlo by rail. Pop. 15,000.

Helmsdale, a Sutherland fishing-village, 83 miles by rail NNE. of Dingwall. Pop. 750.

Helmsley, a Yorkshire town, 31½ miles N. of York, with linen manufactures. Pop. 1500.

Helmstedt, a German town, 24 miles ESE. of Brunswick. From 1574 to 1809 it was the seat of a Protestant university. Pop. 16,260.

Helmund, or HELMAND, a river of Afghanistan, rises on the south slopes of the Hindu Kush, and flows 680 miles south-west, west, and north-west to the lake of Hamun or Seistan.

Helsingborg, a seaport of southern Sweden, 32 miles by rail NW. of Malmö, on the Sound, opposite Elsinore (Dan. *Helsingör*). It has a good harbour. Pop. 33,000.

Helsingfors, a fortified seaport and naval station, capital of the grand-duchy of Finland, is situated on a peninsula, surrounded by islands and rocky cliffs, in the Gulf of Finland, 191 miles W. of St Petersburg by sea and 256 by rail. A series of formidable batteries, called the fortifications of Sveåborg, protect the harbour. Helsingfors is the largest and handsomest town of Finland; the broad streets intersect at right angles, and there are several fine parks and public squares. Of the public buildings the most striking are the house in which the diet meets, the senate-house, and the university buildings. The university, removed hither from Åbo in 1828, has over 2500 students, a library of 300,000 volumes, a hospital, a botanic garden, and observatory. Helsingfors, truly 'a slumless city,' is a favourite bathing-place. It carries on trade in Baltic produce; exports timber, paper, and butter, and imports iron and steel goods, machinery, colonial wares, &c. Pop. (1870) 32,113; (1910) 147,369. Helsingfors was founded by Gustavus I. of Sweden in the 16th century. In August 1855, during the Crimean war, Sveåborg was bombarded, with no great result, for two days and nights by the allied fleet.

Helston, an old Cornish market-town, 10 miles WSW. of Falmouth. It was made a borough by King John in 1201; and from Edward I.'s reign to 1832 returned two members, then one till 1885. It has long been noted for its *Furry* or *Flora Dance*, held on 8th May. There is a branch railway (1887) from Gwinear Road. Pop. 3000.

Heluan, or HELWAN, a popular health-resort 15 miles SE. of Cairo by rail, with well-appointed mineral springs, baths, and hotels. Pop. 5000.

Helvellyn, one of the highest mountains of England, in the west of Cumberland, between Keswick and Ambleside. It is 3118 feet high, is easy of ascent, and commands magnificent views.

Helvoetsluys, or HELLEVOETSLUIS, a Dutch naval station, on the Haringvliet, an arm of the Maas, 17 miles SW. of Rotterdam. Here William III. embarked for England in 1688. Pop. 4500.

Hemel Hempstead, a municipal borough of Hertfordshire, 23 miles NW. of London, a straw-plaiting centre, has also paper-mills, iron-foundries, tanneries, and breweries; pop. 13,000.

Hems, HOMS, or HUMS (Lat. *Emesa*), a city of Syria, near the Orontes, 63 miles NE. of Tripoli. In ancient times it was celebrated for its temple of the Sun. Pop. 60,000. See HAMAH.

Henderson, capital of Henderson county, Kentucky, on the Ohio, 10 miles S. of Evansville by rail, with tobacco-factories; pop. 12,000.

Hendon, a Middlesex urban district, 8 m. NW. of St Paul's, has a great aerodrome; pop. 40,000.

Hengrave Hall, a splendid Tudor mansion (1538) in Suffolk, 3 miles NNW. of Bury St Edmunds.

Henley-in-Arden, a Warwickshire town, on the Arrow, 8 miles WNW. of Stratford-on-Avon; pop. 1000.

Henley-on-Thames, a municipal borough of Oxfordshire, at the base of the Chiltern Hills, and on the left bank of the Thames, 8 miles NE. of Reading, 36 W. of London, and 24 SE. of Oxford by road (by river 47). The five-arch bridge was built in 1786 at a cost of £10,000; the parish church, Decorated in style, was restored in 1864; and the grammar-school was founded in 1605. Malting and brewing are carried on; and there is a considerable trade in corn, flour, and timber. The principal amateur regatta of England has been held here every summer since 1839. Pop. 6500.

Hennegau. See HAINAULT.

Herat', capital of the most westerly of the three divisions of Afghanistan, stands on the Hari-Rud, 2500 feet above sea-level, and 390 miles W. of Kabul, in 34° 50′ N. lat., 62° 30′ E. long. Situated near the boundaries of Afghanistan, Persia, and Russian Turkestan, Herat is one of the principal marts of Central Asia, and has manufactures in wool and leather. The vicinity, naturally fertile, is rendered much more so by irrigation. Long the royal seat of the descendants of Timur, Herat is fortified by a ditch and wall, and is commanded on its north side by a strong citadel built about 1837 under British direction. In modern times the place has acquired European importance, being, towards Persia and Russia, the key of Afghanistan, and so of western India. In 1856 the Shah captured Herat; but he was within a few months constrained to relinquish his prey by a British expedition. Since Russia, after having annexed Merv (1884), pushed her frontiers to within 40 miles of the city, Herat is the pivot of the Central Asian question. Indigo, dried fruits, dyes, asafœtida, rice, wool, carpets, raw hides, silk, and leather wares are the chief items of export, whilst chintzes, cloth, sugar, iron-wares, and European arms are imported—recently from Russia. The town, once famous for its splendid buildings, is to-day a heap of ruins, amid which the citadel, the Charsu, the Tuma Musjid, and parts of the Musallah are prominent as remnants of a bygone glory. The population, chiefly Persians, Tajiks, and Chihar Aimaks—Afghans constitute only the garrison—has fluctuated within the century from 100,000 to 10,000; the average pop. now being about 40,000. See Malleson's *Herat* (1880), and Yate's *Northern Afghanistan* (1888).

Hérault, a maritime dep. in the south of France, washed by the Gulf of Lyons. Area, 2393 sq. m.; pop. (1872) 429,878; (1911) 480,484. It is divided into the four arrondissements of Béziers, Lodève, Montpellier (the capital), and Saint-Pons.

Herculaneum, an ancient city of Italy, so called from the local worship of Hercules, was situated at the north-western base of Mount Vesuvius, 5 miles E. of Naples. In 63 A.D. it was seriously injured by a violent earthquake, and in 79 buried, along with Pompeii and Stabiæ, by the memorable eruption of Vesuvius. It now lies at a depth of from 40 to 100 feet below the surface, and is filled up and covered with volcanic tufa. Above it, on the modern surface, are the villages of Portici and Resina. In 1738 systematic excavations were commenced, the chief building explored being the theatre, which has eighteen rows of stone seats, and could accommodate 8000 persons. Part of the Forum with its colonnades, a colonnade, two small temples, and a villa have also been discovered; and from these buildings many beautiful statues and remarkable paintings have been obtained. In 1880 ruins of extensive baths were brought to light. Among the art-relics of Herculaneum, which far exceed in value and interest those found at Pompeii, are the statues of Æschines, Agrippina, the Sleeping Faun, the Six Actresses, Mercury, the group of the Satyr and the Goat, the busts of Plato, Scipio Africanus, Augustus, Seneca, Demosthenes, &c.—mostly now in the National Museum at Naples.

Hercynian Forest (Lat. *Hercynia silva*), the wooded mountain-ranges of middle Germany, from the Rhine to the Carpathian Mountains.

Her'eford, the county town of Herefordshire, on the left bank of the Wye, 144 miles by rail WNW. of London, and 51 S. of Shrewsbury. Its noble cathedral was built between 1079 and 1535, and so exhibits every variety of style from Norman to Perpendicular. Measuring 342 feet by 146 across the transept, it has a central tower 165 feet high. It suffered much at Wyatt's hands after the fall of the western tower in 1786, but has been judiciously restored by Cottingham (1841–52) and Sir G. G. Scott (1856–63). Special features are the elaborate metal-work screen, the shrine of St Thomas de Cantilupe (1282), the organ, and the 'Mappa Mundi,' or map of the world (*c.* 1314). Hereford, with Gloucester and Worcester, is one of the meeting-places of the 'Three Choirs.' Other edifices are the Doric shire-hall (1817), in front of it a statue (1864) of Sir G. C. Lewis; the corn exchange (1858), the episcopal palace (formed out of a Norman hall), the college of vicars choral (*c.* 1474), the 14th-century grammar-school, the half-timbered 'Old House,' the guildhall, the butchers' guildhall, the Coningsby Hospital (1610), the free library (1876), &c. The Nelson column (1807) marks the site of the almost obliterated castle; and the White Cross, one mile out on the Hay road, commemorates the Black Death of 1347. Nell Gwynne and Garrick were natives. A large trade is done in agricultural produce; and the rose-gardens of Hereford are famous. The seat of a bishopric from 676, the city was chartered by Henry III., and returned two members to parliament—now only one—from Edward I.'s reign till 1885. It has stood many sieges from Stephen's time down to the Great Rebellion. The Roman city at Kenchester, near by, was excavated in 1913. Pop. (1911) 22,568.

Herefordshire, an inland county in the west of England, bounded by Shropshire, Worcester, Gloucester, Monmouth, and South Wales. In length it measures 38 miles, in breadth 35, and its area is 833 sq. m. Pop. (1801) 89,191; (1871) 125,370; (1881) 121,062; (1911) 114,269. The surface is mostly hilly with occasional valleys opening into widespread plains, the chief hill-ranges being those of the Hatterell or Black Mountains (2631 feet) on the south-western, and the Malvern Hills (1395) on the eastern boundary of the county. It is watered by the Teme, and the beautiful Wye with its affluents the Lugg, Arrow, and Monnow. Hops are largely cultivated, and the area of the orchards exceeds 27,000 acres. Herefordshire is celebrated for its cattle, and its horses and sheep are in a lesser degree well known. Cider-making is the principal manufacture; and malting is also carried on; whilst sandstone, limestone, and marble have been largely quarried. The county, divided into 11 hundreds and 258 parishes, returns three members, one for each of its two divisions (Leominster and Ross), and one for the city of Hereford. The principal towns are Hereford, Leominster, Ross, and Ledbury. Of places of interest in the county mention may be made of Offa's Dyke (q.v.); of Dorstone, where there is a large and curious monument known as 'Arthur's Stone;' of the ruins of Clifford Castle, the birthplace of 'Fair Rosamond;' and of the Hereford Beacon on the Malvern Hills, on which is a camp, ascribed to Caractacus. Robert Devereux, Earl of Essex (Queen Elizabeth's favourite), Richard Whittington, David Garrick, John Kyrle ('The Man of Ross'), and Nell Gwynne, were all natives of Herefordshire; and Mrs Browning, the poetess, passed her childhood there. See the *Quarterly Review* for 1879, and works there cited, with one also by Thornhill Timmins (1892).

Herencia, a town of Spain, 40 miles NE. of Ciudad Real. Pop. 6000.

Hereros. See DAMARALAND.

Herford, a Prussian town in Westphalia, 59 miles SW. of Hanover by rail. It manufactures cottons, linens, sugar, &c. Pop. 32,500.

Heri-rud. See HARI-RUD.

Herisau, a town, with cotton-mills, in the Swiss canton Appenzell, 2549 feet above sea-level, and 5½ miles SW. of St Gall by rail. Pop. 15,783.

Heristal, or HERSTAL, an industrial town of Belgium, on the Meuse, virtually a suburb NE. of Liége. It is mostly inhabited by workers in the coal-mines and the iron and steel works. Here King Pepin was born and Charlemagne often lived. Pop. 20,000.

Herkulesbad. See MEHADIA.

Hermannstadt (Lat. *Cibinium*, Hung. *Nagy-Szeben*), a town of Hungary, formerly capital of Transylvania, at the terminus of a branch railway (28 miles long), 370 miles SE. of Pesth. It is the seat of a Greek archbishop and of a 'Saxon' university. The fine Bruckenthal palace contains a picture-gallery and a library of 30,000 volumes. Tanning, wax-bleaching, and the making of cloth, paper, candles, sugar, and hats are carried on. Pop. 33,500.

Hermitage Castle, a ruin in Liddesdale, Roxburghshire, 5½ miles N. by E. of Newcastleton. It has memories of Bothwell and Queen Mary.

Hermon, MOUNT (now *Jebel-es-Sheikh*), 9150 feet high, is the culminating point of the Anti-Libanus range. See LEBANON.

Hermopolis Magna (mod. *Ashmun* or *Eshmoon*), an ancient town of Egypt, on the Nile, at the border of the Thebaid, and near the frontier line of upper and middle Egypt.

Hermosillo, capital of the Mexican state of Sonora, on the Rio Sonora, 50 miles by rail N. of the port of Guaymas. Pop. 18,000.

Hermoupolis. See SYRA.

Hermus, a river of Asia Minor, flowing through the plain of Sardis to the Gulf of Smyrna.

Herne Bay, a watering-place of Kent, 12 miles W. of Margate. Pop. 8000.

Herne Hill, a London suburb, 3½ miles S. of St Paul's.

Hernösand, a Swedish port on the Gulf of Bothnia, 250 miles N. of Stockholm, exporting timber, wood-pulp, and iron. Pop. 8500.

Herrnhut, a small town of Saxony, 18 miles SE. of Bautzen, the chief seat, from 1722, of the Moravian Brethren or Herrnhuters. Pop. 1500.

Hersfeld, an old town of Hesse-Nassau, on the navigable Fulda, 27 miles N. of Fulda by rail. Here are a fine Gothic church (1320); a ruined cathedral, destroyed by the French in 1761; and the once celebrated Benedictine abbey, founded in 769. Pop. 9000.

Herstmonceaux. See HURSTMONCEAUX.

Hertford, the county town of Hertfordshire, 26 miles N. of London by rail, on the Lea, which is navigable for barges up to this point. It has a town or shire hall (1768), an infirmary, a corn exchange and free library (1859), a grammar-school and several charity schools, whilst at the entrance into the town on the London Road is a preparatory school in connection with Christ's Hospital in Horsham. A considerable trade is carried on in corn, malt, and flour. Hertford, whose municipal boundary was extended in 1892, returned two members to parliament till 1867, and then till 1885 one member. Population, 10,400. The New River (q.v.) has its source a mile east of the town, and 2 miles westward is Panshanger, the seat of Earl Cowper, with its valuable collection of pictures. Of the old castle of Hertford, commenced by Edward the Elder about 905 to protect the inhabitants from the Danes, and strengthened by the Conqueror, but a small portion now remains; the present castle was built by William Cecil, Earl of Salisbury, or Sir William Harrington, in the reign of James I., and in 1805–9 was occupied by the East India Company as a temporary college during the erection of Haileybury (q.v.). See Turner's *History of Hertford* (1830).

Hertfordshire, or HERTS, an inland county of England, bounded by Cambridge, Essex, Middlesex, and Bucks, is 35 miles long from NE. to SW., 20 miles in mean breadth, and 611 sq. m. in area, of which more than one-half is under tillage, one-fourth pasture, and one-seventeenth in wood. It is divided into 8 hundreds, 3 municipal boroughs (Hertford, St Albans, and Hemel Hempstead), and 157 parishes, and has 11 market-towns, the chief of which are Hertford (the county town), St Albans, Watford, Hitchin, Hemel Hempstead, and Bishop-Stortford. Pop. (1801) 97,577; (1881) 203,140; (1911) 311,284. The surface is mostly level, except in the north, where a branch of the Chiltern Hills skirts the county, Kensworth Hill (904 feet) being the highest point. The principal rivers are the Lea, Stort, and Colne, all affluents of the Thames, and the artificial New River (q.v.): the Grand Junction Canal, too, passes through the south-western extremity of the county. Straw-plaiting is largely carried on in the north and west portions, where the land is least adapted for agriculture; near Watford and Rickmansworth are paper and silk factories, and at Great Berkhampstead extensive chemical works. Ware is the chief seat of the malting trade in the kingdom; Cheshunt, Waltham Cross, and Bishop-Stortford are famous for their rose-gardens, and in some districts watercress is extensively cultivated for the London market. Herts is almost entirely in the diocese of St Albans and in the South-eastern Circuit, and since 1885 has returned one member to parliament for each of its four divisions—North or Hitchin, East or Hertford, Mid or St Albans, and West or Watford. Herts contains the battlefields of St Albans and Barnet; and other places of historic interest are Rye House, Kings Langley, Hunsdon House, Hatfield, and Theobalds. Amongst the worthies of Herts have been Nicholas Brakespeare, afterwards Pope Adrian IV.; Francis Bacon; Richard Gough, the antiquary; the poet Cowper; Bulwer Lytton; Charles Lamb; and John Leech. See the 'Victoria History' of Herts, and Cussan's (1880).

Hertogenbosch. See BOIS-LE-DUC.

Hervey Islands. See COOK ISLANDS.

Herzegovina. See BOSNIA.

Hesse (*Hes'seh; Ger. Hessen*), or HESSE-DARMSTADT, a German grand-duchy, divided by a strip of Hesse-Nassau into a northern part, Oberhessen, completely enclosed by Prussia, and a southern part, comprising Starkenburg, east of the Rhine, and Rheinhessen, west of the Rhine. Besides, there are eleven enclaves in Baden and Prussia. Oberhessen is partly occupied in the east by the Vogelsberg, culminating in Taufstein (2532 feet), in the south-west by a ramification of the Taunus, the fertile and undulating valley of Wetterau lying between them. Starkenburg, in the south-east, is covered by part of the Odenwald. The Bergstrasse divides the uplands of Starkenburg from the plain of the Rhine. Rheinhessen, fertile and populous uplands, laid out largely in vineyards, lies between Kreuznach, Mainz, and Worms. Except some streams draining into the Fulda and Weser, the waters of Hesse—Main, Neckar, and Lahn—belong to the Rhine system. Of the total surface, comprising 2966 sq. m., 50 per cent. is tilled land and garden, and 31 forest. The most important products are corn, pulse, potatoes, rape, poppy, tobacco, flax, fruit, vines, iron, manganese ore, and peat. The industries—mainly in Mainz, Offenbach, and Worms—include the making of leather, boots, upholstery, tobacco, cigars, chemicals, &c. The total pop. amounted in 1875 to 882,349, in 1911 to 1,282,219; of these 590,471 belonged to Starkenburg; two-thirds were Protestants. The chief towns are Mainz, Darmstadt (the capital), Offenbach, Worms, and Giessen. The Hessians were an ancient German tribe in Thuringia; but we first hear of the landgrave of Hesse in the 13th century. In 1806 Louis X. assumed the title of grand-duke. In 1866 Hesse, having sided with Austria, had to yield up Hesse-Homburg, &c., to Prussia.

Hesse-Cassel, once a German electorate, now the district of Cassel in the Prussian province of Hesse-Nassau (q.v.). Area, 3700 sq. m.; pop. over 1,000,000. The landgraviate of Hesse-Cassel was constituted an electorate in 1803, occupied by the French in 1806, incorporated with Westphalia in 1807, and reconstituted an electorate in 1813. The elector having joined Austria in 1866, Hesse-Cassel was incorporated with Prussia.

Hesse-Homburg, from 1596 to 1866 a landgraviate of Germany, consisting of Homburg vor der Höhe, on the right bank of the Rhine, and Meisenheim, on the left bank. Area, 106 sq. m.; population, 30,000. Since 1866 Hesse-Homburg has been incorporated with Prussia, the grand-duke having sided with Austria.

Hesse-Nassau, a province of Prussia, between Bavaria and Saxony on the east and the Rhine on the west, was formed (1867–68) out of parts of the former electorate of Hesse-Cassel, of the former duchy of Nassau, of the lordship of Homburg, of the larger part of the former free town of Frankfort-on-the-Main, and small parts of Bavaria. It comprises 6000 sq. m. The surface consists mostly of uplands, attaining 3096 feet in the Grosse Wasserkuppe. Among the minerals are iron, copper, lead, manganese, and building-stone. It is rich in mineral waters, such as at Wiesbaden, Ems, Kronthal, Homburg, &c. Population, now close on 2,222,000, mainly Protestants. The chief towns are Frankfort, Cassel, Wiesbaden, Hanau, Marburg, and Fulda.

Heves, a town of Hungary, 60 miles ENE. of Pesth. Pop. 9698.

Hexham, an ancient town of Northumberland, beautifully situated on the right bank of the Tyne, here spanned by a nine-arch bridge, 24 miles W. of Newcastle by rail. The noble 13th-century Abbey Church is represented only by the greater part of the choir, the transepts, and the central tower; it still retains its old 'frithstool.' Its nave was destroyed by the Scots in

1296, and never rebuilt; but under its ruins has been discovered the Saxon crypt of St Wilfrid, who originally founded the monastery in 674—the seat of a bishopric (681–821). The refectory remains and the abbey gateway of Norman architecture. Near Hexham the Lancastrians were defeated in 1464. Pop. 8500. See works by Wright (1823), Raine (1865), and Hodges (1888).

Heysham, a village on Morecambe Bay, 5 miles SW. of Lancaster, made into a railway port for trade with the Isle of Man and Ireland in 1900–4. Pop. 3400.

Heywood, a municipal town of Lancashire, 3 miles E. of Bury and 9 N. of Manchester. It is connected with the Rochdale Canal by a branch canal. Incorporated in 1881, Heywood has increased with great rapidity, both in population and wealth, since the beginning of the 19th century, partly in consequence of extensive coal-mines in the neighbourhood and partly in consequence of the enterprise of the Peel family, who introduced the cotton manufacture. Iron and brass founding, boiler-making, and the manufacture of cotton, woollens, machinery, railway plant, and chemicals are also carried on. The Free Libraries Act was adopted in 1873; and the Queen's Park, 20 acres in extent, was opened in 1879. Pop. (1851) 12,194; (1911) 26,698.

Hierapolis, (1) a ruined city on the high-road from Antioch to Mesopotamia, 14 miles W. of the Euphrates. It had a great temple of Astarte.—(2) An ancient city of Phrygia, with hot springs, between the rivers Lycus and Meander, 5 miles N. of Laodicea. Epictetus was a native; and here St Paul founded a Christian church.

Higham Ferrers, a Northamptonshire market-town, till 1832 a parliamentary borough, 15½ miles ENE. of Northampton. Pop. 2700.

Highgate, a northern suburb of London, 4¼ miles NNW. of King's Cross Station by rail. Here Bacon and Coleridge died; Whittington's Stone at the foot of Highgate Hill marks the spot where Dick heard Bow Bells, and turned again; Coleridge's remains, buried in the old churchyard, are now covered by the chapel of the Highgate grammar-school; and in the great cemetery (consecrated 1839) have been buried Faraday, Lord Lyndhurst, 'George Eliot,' &c.

Highlands, that portion, roughly, of Scotland to the N. and NW. of a line stretching diagonally across the country from Nairn on the Moray Firth to Dumbarton on the Clyde. The mountainous parts, however, of the counties of Banff, Moray, Aberdeen, Kincardine, and Perth are understood to be included in the designation Highlands, whilst Caithness is excluded, as are Orkney and Shetland. Separated but vaguely from the Lowlands, the Scottish Highlands may best be defined as that portion of Scotland in which the Gaelic language and manners have more or less lingered until modern times.

High Wycombe. See WYCOMBE.

Hildburghausen. See SAXE-MEININGEN.

Hilden, a town of Rhenish Prussia, 8 miles SE. from Düsseldorf, has woollen, silk, velvet, and carpet manufactures. Pop. 17,000.

Hildesheim, a town in the Prussian province of Hanover, stands on a feeder of the Weser, 24 miles by rail SSE. of Hanover. It is an antique town, with narrow streets, high-gabled houses, and many towers, its cathedral dating from the 11th century, and the bishopric from 822. The cathedral is rich in antiquarian and artistic treasures, as the bronze gates (1015) with bas-reliefs, the so-called Irmin pillar, a rose-tree said to be a thousand years old, the brazen Christ pillar (1022), the carillon, &c. The St Godehard Church (1133–72) and St Michael's are splendid examples of Romanesque architecture. The 'Templar House,' the town-house (*c.* 1440), and certain antique private houses are the most interesting among the secular buildings. The industries embrace sugar-refining, iron-foundries, brick-making, machine-shops, and the manufacture of tobacco, stoves, church-bells, &c. Pop. (1875) 22,581; (1910) 54,821.

Hillah, or HILLA, a town of Turkey in Asia, on the Euphrates, 60 miles S. of Bagdad, on the site of Babylon. Pop. about 10,000.

Hillsborough, a village of County Down, on the Lagan Canal. Pop. 550.

Hilversum, a town of North Holland, 18 miles by rail SE. from Amsterdam. Pop. 32,000.

Himalaya (properly *Himâ'laya;* from two Sanskrit words meaning 'snow-abode'), the southern escarpment of the great Central-Asian plateau in so far as it falls between the Indus and the Brahmaputra. Thus limited, it extends from 73° to 95° E. long., over a distance of some 1500 miles. The Himalayas are not a single range, but a system of for the most part parallel ranges lying obliquely to the general direction of the system. They front the plain of the Ganges in northern India like a stupendous mountain-wall. On the east the system is connected with the mountain-ranges of south-west China and northern Burma and Siam. On the north it is backed by the lofty plateau of Tibet, 10,000 to 17,000 feet high. At its north-western extremity it runs up into the Pamir plateau, from which radiate also the Hindu-Kush and the Kuen-Lun Mountains. The southern foot of the system rests upon the plain of the Ganges, which nowhere rises more than 1000 feet above sea-level. The edge of the outermost hills is skirted as far west as the Ganges by the Terai, a belt of swampy grass-land, 10 or 15 miles wide. Next above the Terai lies a belt of forest, called the Bhabar. Above the Bhabar rise the foot-hills of the Himalayan system, generally designated the Siwalik Hills. They vary in height from a few hundred feet up to 4000, and present steep faces to the plains. It is on the north side of the Siwalik foot-hills that the first mountains appear. They rise up abruptly to elevations from 7000 to 10,000 feet. On these ranges stand the sanatoriums, Simla, Darjiling, Almora, &c.

In the Himalayas proper two main axes can be determined with tolerable distinctness. One, the southern, contains the line of the great snowy peaks; the other, the northern, forms the watershed between the rivers of India and of Tibet. Sven Hedin has called the northern chain Trans-Himalaya; if the Karakoram be included, it contains the second highest summit in the world, Godwin-Austen (28,278 feet), with Broad Peak and Teram Kangri. The southern chain contains many of the highest peaks—Everest (29,002 feet), Kinchinjinga (28,156), Dhawalagiri (26,286), Nanda-Devi (25,700). The chain of great snowy peaks is, strictly speaking, a series of mountain-groups, each of which is connected with the watershed chain to the north by a transverse snow-clad ridge. These transverse spurs form deep valleys on either side in the space between the two chains; and these deep valleys are the cradles of the great rivers of northern India—the Ganges, Indus, Brahmaputra, &c.

The snowy region of the Himalayas is plentifully studded with glaciers, one in the western part of the system being 36 miles long. In the same region they descend to 11,000 and 12,000 feet, in the eastern part of the system not lower than 13,000 and 14,000 feet; and on the Tibetan side they are seldom found to come lower than 15,000 and 16,000 feet. The snow-line, too, ranges higher on the Tibetan side than on the Indian. Whereas, on the watershed chain, it seldom descends lower than 18,000 feet, and on the tableland remains at 20,000, on the southern faces of the mountains it runs at 15,000 or 16,000 feet. The watershed chain has been little explored; it lies chiefly within Tibetan territory. It forms an almost continuous line of peaks, its crest being probably over 18,000 feet in elevation. So far as is known, it is only broken by one pass of less altitude than 16,000 feet, namely the Dras pass (11,300) leading from Kashmir. The Niti Pass (16,676), SE. of Ladak, connects India with East Turkestan.

The Himalayas possess few lakes. In the east, north of Sikkim, are Yamdok-cho, or Palti, 45 miles in circumference, with an island, 2000 to 3000 feet high, in the centre; and Chomto-dong, 20 miles long by 16 broad, at an altitude of 14,700 feet. More to the west lie the holy Tibetan lakes of Manasarowar and Rakas Tal, which give birth to the river Sutlej. Besides these there are Nainital in Kumaon and the Lake of Kashmir. In nearly all parts of the Himalayas metallic ores exist; but only gold, iron, copper, and lead are extracted. Gold is largely mined in Tibet; copper and iron ore are worked in Kumaon and Garwhal.

Within Indian territory most of the inhabitants of these mountains are Hindus. The Tibetan portions are occupied by peoples of Turanian stock. In Hindu mythology these majestic mountains are invested with great sanctity; thousands of pilgrims travel year after year to the holy sources of the Ganges, where it emerges from the glaciers, the temples at Gangotri, Kedarnath, and Badrinath. See works by Medlicott and Blanford (1879), A. Wilson (1875), Strachey (1890), Conway (1894), Hedin (1909), Filippi (1912).

Hinckley, an ancient manufacturing town of Leicestershire (partly in Warwickshire), on the old Watling Street, 13 miles SSW. of Leicester, with a 13th-century church. Pop. 13,000.

Hindhead, a hill ridge, common, and health-resort in Surrey, 2 miles SW. of Haslemere. Pop. 4000.

Hindley, a Lancashire town, 3 miles SE. of Wigan, with coal-works and cotton manufactures. Pop. 25,000.

Hindu Kush (*Hindoo Koosh;* anc. 'Indian Caucasus'), the westward continuation of the Himalayan system, from which it is separated by the chasm through which the Indus breaks its way to the plains. It strikes off from the south-west angle of the Pamir plateau, and extends 365 miles westward to the Bamian valley in Afghanistan, separating that country on the south from Turkestan on the north. Near its point of origin several rivers take their birth; the Oxus goes off north-west through Turkestan, and the Helmund south-west through Afghanistan. The main range breaks into four subsidiary ridges, and has a total width of about 200 miles. Unlike the Himalayas, it sinks suddenly to the plains of Turkestan on the north. It is crossed by several passes, 12,000 or 13,000 feet high. From the Bamian valley the range is continued westwards as a low watershed elevation, known as Koh-i-Baba. (Koh-i-Baba is also the name of a peak in the Hindu Kush.) The peak of Hindu Koh, 80 miles N. of Kabul, rises more than 20,000 feet above the sea. The highest point exceeds 23,000. Minerals, especially iron, occur in great abundance. The inhabitants consist principally of Dards and Shins. A loose kind of Mohammedanism is the prevalent form of religion. See books by Biddulph (1880) and Robertson (1896).

Hindustan, 'the land of the Hindus,' is a term of the same class as Turkestan or Afghanistan. It properly refers only to the plain of the Ganges and Jumna, but is loosely used for India at large. See INDIA.

Hinojosa-del-Duque, a town of Spain, 45 miles NNW. of Cordova. Pop. 10,000.

Hiogo. See HYOGO.

Hiroshima, a Japanese city and port on the Inland Sea, with a sacred island, 50 miles SW. of Hyogo. Pop. 145,000.

Hirschberg, a town of Prussian Silesia, 78 miles WSW. of Breslau, with textile, lace, and paper manufactures. Pop. 21,000.

Hispania. See SPAIN.

Hispan'iola ('Little Spain'). See DOMINICAN REPUBLIC and HAYTI.

Hissar, a province of Bokhara, from which it is separated by a southern offset of the western prolongation of the Thian-Shan Mountains. The country consists of a series of southward valleys, traversed by streams which flow to the Oxus or Amu-Daria. The soil is fertile. Copper and rock-salt abound. The inhabitants (number unknown) are chiefly Usbegs and Tajiks. The main route from India to Bokhara passes through the province, which was annexed by Bokhara in 1869. The capital, Hissar (pop. 10,000), is on the Kafirnihan River. Its people are noted sword-makers.

Hissar, a town in the Punjab, on the Western Jumna Canal, 102 miles W. of Delhi. Pop. 17,000.

Hissarlik. See TROY.

Hit (anc. *Is*), a town of Turkey in Asia, on the Euphrates, 85 miles WNW. of Bagdad, with bitumen-pits and naphtha-springs. Pop. 2500.

Hitchin, a thriving market-town of Hertfordshire, on the Hiz, through the Ivel, a feeder of the Ouse, 32 miles NNW. of London. An important railway junction, it has a fine old parish church, a modern town-hall, a free school (1622), a Friends' school, &c. The principal trade is in corn, malt, and flour; there are several large breweries; and many females are employed in straw-plaiting. Lavender has been grown here since 1568, and commercially, for lavender-water, since 1823. Hitchin was a place of some consequence in the days of King Alfred. It was the original seat (1869) of Girton College (q.v.). Pop. 12,000.

Hit'teren, an island off the west coast of Norway. Area, 203 sq. m.; pop. 2900.

Hjelmar, a lake of Sweden (40 miles by 15) discharging into Lake Mälar.

H'Lassa. See LHASSA.

Hoang-ho ('Yellow River'), or simply Ho, one of the principal rivers of China, rises in the plain of Odontala, south of the Kuen-Lun Mountains, and winds more than 3000 miles. From the southernmost corner of the province of Chih-lî, which it crosses, the Yellow River flowed eastward to the ocean, 650 miles distant, in 34° lat.; but in 1851–53 this wayward and turbulent stream, which is said to have shifted its course nine times in 2500 years, turned off north-eastward near Kaifung-foo. Since then it discharges its waters into the Gulf of Pechili, 320 miles

NNW. of its former mouth, the mountainous province of Shan-tung lying between the two. The river is little used for navigation. In some parts of its eastern course the river-bed is above the great plain through which it passes. The embankments are a source of never-ending expense to the government, and their yielding to floods a frequent cause of desolation to extensive districts. In 1887, by a dreadful inundation in Ho-nan, 'China's sorrow' destroyed millions of lives. The measures subsequently taken to regulate its course proved futile. About 170 miles of the upper course of the Hoang-ho were explored for the first time by Prejevalsky in 1880. The vast quantity of sediment conveyed to the sea by this river, giving it its colour and name, is taken up in that part of its course which lies between the provinces of Shan-hsî and Shen-hsî; beyond which its waters are remarkably clear.

Hobart (till 1881 known as Hobart Town), the capital of Tasmania, stands on the estuary of the Derwent, 12 miles from its mouth, in the south of the island. It forms nearly a square, built on several hills, covering an area of about 1300 acres. Besides Government House, the houses of parliament, and the government buildings, Hobart has a museum, library, and two cathedrals, and is well supplied as to churches, schools, water, lighting, and tramways. The Domain has fine drives, and covers 1000 acres. The fine natural harbour accommodates ships of the largest size. The cooler and more invigorating air of Hobart attracts summer visitors from Australia. The Australian squadron is timed to be here for the same period. The chief industry of the district is apple-growing, and in March and April British mail steamers call regularly to secure the crop; in the season of 1911 720,000 cases of apples were exported. Hobart has railway communication with Launceston, 133 miles distant; has steamer services direct to Melbourne, Sydney, and New Zealand; and some British lines trading round the Cape to New Zealand make it a port of call. It was founded in 1804. Pop. (1871) 19,092; (1911) 41,757.

Ho'boken (named from a southern suburb of Antwerp), a city in New Jersey, on the west bank of the Hudson River, adjacent to Jersey City, and opposite New York, with which it is connected by steam-ferries. It has a large shipping trade, especially in coal; iron-castings and lead-pencils are among the manufactures. The Stevens Institute of Technology here is an important school. Pop. (1880) 30,999; (1910) 70,324.

Hochelaga. See MONTREAL.

Hochheim, a town of Prussia, in Hesse-Nassau, on the Maine's right bank, 3 miles E. of Mainz. Here is produced the excellent white wine called *Hochheimer* (whence *Hock*). Pop. 3800.

Hochkirch, a Saxon village, E. by S. of Bautzen. Here Frederick the Great was defeated by the Austrians (14th October 1758).

Höchstädt. See BLENHEIM.

Hodeida, a seaport of Yemen, in Arabia, on the Red Sea. Pop. 25,000.

Hof, a town of Bavaria, on the Saale, 30 miles NE. of Baireuth. It manufactures ironwares, cottons, and woollens. Hof, almost entirely rebuilt since the great fire of 1823, is associated with Jean Paul Richter's earlier years. Pop. 41,500.

Hofhuf, a town and fortress of the Arabian district of El-Hasa, over against the islands of Bahrein in the Persian Gulf. Pop. 41,000.

Hogue, CAPE LA. See LA HOGUE.

Hohenems, a small town of Vorarlberg, Austria, 15 miles S. of Bregenz by rail. Pop. 4700.

Hohenlinden, a village of Bavaria, 20 miles E. of Munich. Here 70,000 French under Moreau defeated 60,000 Austrians, 3d December 1800.

Hohenlohe, a former German principality in Franconia, now comprised in Würtemberg and Bavaria.

Hohenschwangau, a royal castle in Bavaria, 55 miles SW. of Munich, near the Lech's right bank, 2933 feet above sea-level. It was purchased in 1832 by the crown-prince Maximilian, who restored it in the style of a magnificent feudal castle. On an opposite crag stands the castle of Neuschwanstein, which was built in 1869–71 on the site of the original Hohenschwangau by King Louis.

Hohenstein, a Saxon town, with textile industries, 12 miles NE. of Zwickau. Pop. 16,400.

Hohenzollern, two united principalities (Hechingen and Sigmaringen) of South Germany, but belonging to Prussia, consist of a narrow strip of land entirely surrounded by Würtemberg and Baden. Area, 441 sq. m.; population, 72,000, mostly Catholics. The territory, generally mountainous, stretches south-east from the Black Forest, across the Neckar and the Danube. The seat of government is Sigmaringen. Frederick VI., of the younger line of the Hohenzollerns, in 1415 received from the Emperor Sigismund the electorate of Brandenburg, thus founding the reigning dynasty of Prussia. The two branches of the elder line continued unbroken till 1849, when the reigning princes ceded their principalities to the king of Prussia.

Hokitika, the capital of Westland, New Zealand, and the chief town on the west coast, is the centre of a gold-producing district. Pop. 2500.

Holbeach, (1) a market-town of south Lincolnshire, 7½ miles by rail ENE. of Spalding. It has a fine Decorated church, with a spire 189 feet high; and Roman remains have been found here. Pop. of urban dist. 5000.—(2) An old Staffordshire mansion, 3 miles W. by N. of Dudley. It was the final retreat of the Gunpowder conspirators.

Holderness, a parliamentary division (including Beverley) and a wapentake in the East Riding of Yorkshire.

Holkham, the splendid seat (1734–60) of the Earl of Leicester, in Norfolk, near the coast, 2 miles W. of Wells.

Holland, the popular name of a country officially described as 'Netherland,' or 'The Netherlands,' applies to a maritime kingdom bounded by the North Sea, Prussia, and Belgium. Its greatest length (N. to S.) is 195 miles, and its greatest breadth 110 miles. It contains 12,630 sq. m.—little more than one-tenth of the size of Great Britain and Ireland. Luxemburg (q.v.) was till 1890 connected with Holland.

Provinces.	Area in sq. m.	Pop. in 1910.
North Brabant	1980	633,155
Guelderland	1950	647,567
South Holland	1160	1,418,097
North Holland	1070	1,222,996
Zealand	690	234,191
Utrecht	530	292,131
Friesland	1280	362,293
Overyssel	1290	387,381
Groningen	800	331,248
Drenthe	1030	176,043
Limburg	850	340,053
	12,630	5,945,155

Holland is the most densely peopled country in Europe after Saxony (830 per sq. m.), Belgium (653), and England and Wales (619). While the average for the whole country is 470 per sq. m., it rises to 1216 in South Holland and 1050 in North Holland. Three-fifths of the population are Protestants, 2½ million Roman Catholics, besides 107,000 Jews. In 1910 Amsterdam (the old capital) had 574,000 inhabitants; Rotterdam, 427,000; the Hague, seat of government, 280,000; Utrecht, 120,000; other six towns above 50,000, eleven above 30,000, and ten more above 20,000.

Mainly a delta formed by the alluvium from the great rivers that flow through it into the North Sea, Holland ('Hollow-land') is not only flat; it is actually hollow—much of the area lies below the level of the water, salt or fresh. Along the canals the meadows are often 10 or 12 feet beneath the water-line; between land and sea at high tide there may be a difference of 25 feet or more. Of course all these lands have to be protected by embankments or dykes, the tops thereof, broad and flat, being used for carriage-roads and foot-paths. The Hollanders have covered the country with a network of canals, which are mostly navigable for small craft, help to irrigate the land, and in winter are splendid ice highways. Large windmills are posted at the main points to pump out the superfluous water. The most ancient canal is the *Fossa Drusi* in the east, made in the time of Augustus. Many canals, regulated by locks, connect the parallel rivers, and the Yssel forms a link between the Rhine and the canals and meres of Friesland. Thus it is possible to travel on water through the whole of Holland. The principal canals are the North Holland Canal, from Amsterdam to Den Helder (51 miles); the William's Canal, through North Brabant and Limburg (71½ miles); the North Sea Canal, from Amsterdam to Ymuiden, on the German Ocean; and the canal from the Maas, near Rotterdam, to the Hoek van Holland, which now enables ocean-steamers to reach Rotterdam at all times. The cutting and maintaining of canals and dykes in Holland is one of the chief functions of the Waterstaat, a public department; another duty is the reclamation of land by the drainage of lakes, and the erection of 'polders' by pushing back the sea. These newly-reclaimed polder-lands always fetch high prices. The draining of Haarlem Lake will be eclipsed, should the scheme of laying dry the Zuider Zee (q.v.), which involves an estimated outlay of £32,000,000, be carried out. This would give Holland a new province of 1200 sq. m.—a tenth of the area of the kingdom. The maintenance of dykes by the Waterstaat forms another task of vital moment. The rivers, when swollen by heavy rains or falls of snow, are much more dangerous to the dykes than the sea; and in times of peril a special dyke service is organised, and headquarters are kept informed night and day by a body of Waterstaat engineers. The most costly sea-dykes are round the western coast-line of Walcheren Island, and near Den Helder in North Holland. These dykes are veritable ramparts, formed by piles at the base, which support a superstructure of earth and stones. The annual cost of keeping one in repair frequently reaches £8000 to £10,000. Despite all precautions, disasters through inundations form but too familiar a feature in the history of Holland. Violent irruptions of the ocean created the Zuider Zee in the 13th century. In 1905 there were about 1800 miles of railway, about half owned and worked by the state. The country roads, mostly paved with bricks, are broad and excellent. The old-fashioned way of navigating the canals in *trekschuiten*, or boats drawn by horses, or men and even women, along a towing-path, is disappearing. The climate of Holland is much like the climate of England, especially in its frequent and rapid changes; but, as a rule, the Dutch summer is hotter and the Dutch winter colder. Ague is prevalent in the low-lying regions of the west.

Cattle-rearing and dairy-farming have been the Dutch farmer's chief occupations from time immemorial. The staple agricultural products are wheat, rye, oats, potatoes, beet-root, chicory, flax, and tobacco. The soil of Holland is not uniformly fertile. Large tracts of land, especially in the eastern provinces, are simply heath; and the waste lands cover 1,700,000 acres. The orchards of Boskoop should be mentioned, as also the culture of Dutch bulbs at and round Haarlem.

Minerals are scarce; but clay for tiles, bricks, and pottery is found everywhere. Coal is worked in Limburg, and also a soft sandstone. There are manufactures of linen, woollen, cotton, and silk fabrics, paper, leather, glass, &c. Iron-founding, rolling and hammering of lead and copper, and cannon-founding are carried on in some places. The distilleries of gin ('Hollands') form an important branch of Dutch industry, as also the liqueur-factories. Amsterdam has had the largest diamond-cutting trade in the world. Sugar-refining, salt-making, soap-boiling, and the manufacture of cocoa are large interests. North Brabant is the principal centre of the Dutch margarine trade. The fisheries, though less important than formerly, still employ over 20,000 men and boys, and about 5500 vessels, and are estimated to yield annually £3,000,000. The total imports increased from £81,600,000 in 1882 to £272,000,000 in 1910; the total exports, from £62,282,000 to £220,000,000. The exports from Great Britain vary from £20,000,000 to £30,000,000 a year; the exports thither, from £40,000,000 to £45,000,000. Much of this trade, however, consists of goods in transit from and to Germany. Holland of all European countries does the largest amount of foreign trade per head of population. The revenue of 1910 was £16,600,000, and the expenditure £17,000,000. The East Indies revenue is nearly as large as that of the mother-country; but the East India colonies, once a burden, then long a source of profit, are now a burden again. The great bulk of the national debt—£97,000,000—is held in Holland. The colonies of Holland (separately treated under their own heads) have an area of upwards of 780,000 sq. m. (more than three times the area of the German empire), with a pop. of about 38,000,000. They fall into two groups: (1) the East Indian possessions, including Java and Madura, Sumatra, the Moluccas, Celebes, Timor, parts of Borneo, and the western part of New Guinea; and (2) the West Indies, of which the chief are Surinam and Curaçao.

The government of Holland is a limited constitutional monarchy. The crown is the executive power; legislation is vested in the States-general of two chambers. There is no state religion, but the state gives financial support to the different churches. There are ancient universities at Leyden, Utrecht, and Groningen, and since 1877 a new university at Amsterdam, supported by the municipality. The four universities have upwards of 3800 students. There are Latin schools in the leading municipalities, the Royal Military and Naval Academy (at Breda), that for engineers and the Indian civil service (at Delft), besides seminaries for the training of the Roman Catholic clergy, &c. The state pays 30 per cent. of the expenditure on the public schools, and the communes or parishes 70 per cent. There is no compulsory attendance in Holland, and nearly 10 per cent. of the population can neither read nor write.

The strength of the regular army in Europe is about 70,000 men (on the permanent peace footing 30,000), and of the colonial army about 37,000 men, some 13,000 thereof being Europeans. Dutch troops are not allowed to be sent to the Indies. The Dutch home army is composed of volunteers, and of a varying proportion of men drawn by lot for five years' service. There is also a local force, called *Schutterij*, drawn by lot from those between twenty-five and thirty-four years of age, to assist in keeping order in peace, and in case of war to act as a mobile corps, and do garrison duty. North and South Holland can be inundated at short notice. The royal navy in 1905 consisted of 2 battle-ships, 5 coast-defence ships, 8 unprotected cruisers, and 41 torpedo-vessels; besides, 9 additional vessels were in process of building, and 17 more were projected.

The ancient inhabitants of the country, the Batavians and the Frisians, became subjects or allies of the Romans in the 1st century A.D., and so remained till in the 4th century their territories were overrun by the Saxons and Salian Franks. At the end of the 8th century the Low Countries submitted to Charlemagne, and various feudal dukedoms, counties, and lordships were gradually established (the countship of Holland in the 11th century). In 1384 the earldom of Flanders passed to the Dukes of Burgundy, and Philip the Good (*c.* 1450) made the Low Countries as prosperous as any part of his Burgundian state. The Emperor Charles V. inherited the Burgundian dominions; and under his son, Philip II. of Spain, broke out the bitter quarrel between Holland and Spain, between Dutch Protestantism and persistence and Spanish tyranny and persecution, which ended in 1581 in the establishment of the Dutch Republic as an independent state under William the Silent (of Orange), though the war continued with intervals till 1648, and the Belgian provinces abode by their allegiance to the kings of Spain. In the 17th century Dutch commerce, especially at sea, Dutch science, Dutch classical scholarship, Dutch literature and Dutch art attained an eminence hardly afterwards equalled. The rivalry of Holland and England at sea led to the unfortunate wars of 1652–54 and 1664–67. The accession of William III. of Orange to the Stadholdership of the United Provinces (1672) proved the salvation of the republic from France; in 1678 Louis XIV. signed the peace of Nimeguen. Ten years later William was hailed as the saviour of English liberties, and became king of Great Britain and Ireland. On William's death, the United Provinces became a pure republic once more; the hereditary Stadholdership was re-established in 1747; and when after the French Revolution, French armies overran Holland, the Stadholder William V. fled to England, and the United Provinces became the Batavian Republic. In 1806 Louis Bonaparte was made king of Holland by Napoleon; and on the fall of Napoleon, the Northern or Dutch (and mainly Protestant) Provinces were united with the Southern or Belgian (and purely Catholic) Provinces into the ill-assorted kingdom of the Netherlands, under the princes of the Orange dynasty. Belgium seceded in 1830, and Holland fully recognised the independence of the Belgian kingdom in 1839.

See works on Holland and its people by Havard (1876–80), De Amicis (1882), Lane Poole (1882), Meldrum (1899–1911), Jungman (1904), Lucas (1905), and others; and the historical works of Prescott, Motley, Thorold Rogers (1888), and the Dutch historians, Bilderdijk, Arend, Blok, &c.

Holland, PARTS OF. See LINCOLNSHIRE.

Holland House, an historic mansion (1607) of Kensington, London.

Holloway, a district of London, in the parliamentary borough of Islington, on the north.

Holmby House, a fine Tudor mansion, 6½ miles NW. of Northampton, was built by Sir Christopher Hatton in Elizabeth's reign. Sold to James I., it was for four months the prison of Charles I. in 1647. It was dismantled in 1652.

Holmfirth, a Yorkshire town, at the Holme's and Rippleden's confluence, 6 miles S. of Huddersfield. It has woollen manufactures. Pop. 9300.

Holstein, formerly a duchy belonging to Denmark, and at the same time a member of the Germanic Confederation, was annexed in 1866 to Prussia, which incorporated it in the province of Sleswick-Holstein (q.v.). It is separated from Sleswick on the N. by the river Eider and the North Baltic Canal. Area, 3237 sq. m.; pop. about 860,000—mostly of Low German stock.

Holsworthy, a Devon town, 14 miles N. of Launceston. Pop. of urban district, 1500.

Holt, (1) one of the Denbigh district of boroughs, on the Dee, 5½ miles NE. of Wrexham. Pop. 1150.—(2) A town of Norfolk, 10 miles E. by N. of Walsingham. It was the birthplace of Sir Thomas Gresham. Pop. 2100.

Holy Cross. See THURLES.

Holyhead, a seaport of Anglesey (q.v.), on the small island of Holyhead, 60 miles E. of Dublin, 85 W. of Chester, and 264 NW. of London. Although recently much improved, it is still a primitive, irregularly-built town. It is the terminus of the London and North-Western Railway (1850), and the port for the mail steam-packets to Dublin. The harbour was extended in 1873–80, and the quay lengthened to 4000 feet. The roadstead or harbour of refuge (1847–73), with an area of about 400 acres, is protected on the north by a solid masonry wall, rising 38 feet 9 inches above low-water mark, and backed by a strong rubble mound. Pop. (1875) 5622; (1911) 10,638, employed in the coasting trade and in shipbuilding and rope-making.

HOLYHEAD ISLAND, lying west and forming part of Anglesey, is 8 miles long by 3½ broad. Area, 9658 sq. acres; pop. 9610. It is separated from Anglesey by a narrow sandy strait, crossed by a causeway, which carries over the highroad and the railway, and is arched in the centre for the tide to pass beneath. The surface is rocky and barren. On the north-west coast are two islets, the North and South Stacks, the latter with a lighthouse, whose light, 197 feet above high-water, is seen for 20 miles. The Stacks and the north coast are hollowed out into magnificent caves, the haunt of sea-fowl.

Holy Island, or LINDISFARNE, a small island of Northumberland, 9½ miles SE. of Berwick-on-Tweed. It is 3 miles long by 1¾ broad, and has an area of 1050 acres, and a pop. of 360. At low-water it can be reached by walking across the sands, a distance of 3½ miles; at high-water the strait covered by the sea is 1½ mile wide. The village is guarded by the castle, built about 1500, and still in good repair. The island is chiefly interesting for its ruined Benedictine priory church. This was built in 1093 out of the materials of the ancient cathedral, founded here in 636 by Bishop Aidan. Here a company of Columban monks established themselves, and grew into the famous priory of Lindisfarne, the Iona of England. It reached its greatest glory under St Cuthbert. The cathedral suffered severely from the Danes, and gradually fell into ruins as Durham grew into importance. In August 1887 three thousand barefooted pilgrims crossed the sands to Lindisfarne. See works by G. Johnston (1853) and F. R. Wilson (1870).

Holy Land. See PALESTINE.

Holy Loch, an inlet (2½ miles by 1) of the Firth of Clyde, near Dunoon.

Holyoke, a city of Massachusetts, 8 miles N. of Springfield, on the Connecticut River, which is here crossed by a dam over 1000 feet long and falls 60 feet in less than a mile, supplying immense water-power. Holyoke has paper-mills, cotton-factories, woollen-mills, grist-mills, and manufactures of metal and wooden wares. It contains a fine city-hall of granite. Pop. (1870) 10,733; (1890) 35,637; (1900) 45,712; (1910) 57,730.

Holyrood. See EDINBURGH.

Holytown, a mining-town of Lanarkshire, 5½ miles SSE. of Coatbridge. Pop. 5000.

Holywell (Welsh *Treffynnon*), a parliamentary borough and market-town of Flintshire, on an eminence 15 miles NW. of Chester. It is the seat of numerous lead, iron, copper, and zinc mines, and has smelting-works, manufactures of paper, flannel, and Roman cement, tanyards, and breweries. The borough unites with those of Flint, Mold, &c. in returning one member. Population, about 7000. Holywell owes its origin to the renowned well of St Winifred, which, until diminished by drainage works, delivered 4700 gallons of water per minute. The Perpendicular chapel over the well is attributed to Margaret, mother of Henry VII. It is still a place of Catholic pilgrimage. See Pennant's *History of Holywell* (1796).

Holywood, a seaport and watering-place, 4½ miles NE. of Belfast. Pop. 4100.

Homburg, a town in the Prussian province of Hesse-Nassau, at the foot of the Taunus Mountains, 8 miles NNW. of Frankfort-on-the-Main. It has beautiful environs, and its five saline and chalybeate springs attract about 12,000 visitors annually. They are good for disordered liver and stomach, gout, rheumatism, scrofula, and skin diseases. About 400,000 bottles are sent away yearly. The gaming-tables were suppressed in 1872. Pop. 15,000.

Homerton, a district in Hackney, E. London.

Homildon Hill, an eminence in Northumberland, 1 mile NE. of Wooler, where on 14th September 1402 Earl Douglas and 10,000 Scots were defeated by an English army under Hotspur.

Homs. See HEMS.

Honan, a central province of China, desolated in 1887 by the inundation of the Hoang-ho.

Honawar, a seaport on the Malabar coast of India, 340 miles SSE. of Bombay. Pop. 8000.

Hondu′ras, a republic of Central America, lies between Nicaragua and San Salvador and Guatemala, and is bounded on the N. and NE. by the Bay of Honduras and the Caribbean Sea, having here a coast-line of some 400 miles; while on the S. the Bay of Fonseca, over 50 miles long and about 30 wide, opens to the Pacific. The area is calculated at 46,500 sq. m.; the population at 550,000. Except for a narrow strip of swampland along either coast, the country is a tableland, its series of elevated plateaus broken by broad and fertile plains and valleys, or rising to mountain-ridges that culminate in the Montaña de Selaque (10,120 feet). The Cordilleras proper traverse the country irregularly in a north-west and south-east direction. Honduras is watered by innumerable (seldom navigable) streams; the Wanks or Segovia, part the boundary with Nicaragua, has a length of 350 miles. Roatan and the other fertile Bay Islands (q.v.), off the north coast, belong to Honduras. The climate is hot on the coast, where also fever prevails; but the highlands are cool, and frost is not unknown. The flora and fauna are like those of Guatemala. Cattle-raising is an important industry. Honduras is the richest of the Central American republics in minerals—silver, gold, iron, copper, antimony, platinum, zinc, tin, lignite, and opals. The exports, mostly to the United States, include cattle, fruits and cocoa-nuts, india-rubber, sarsaparilla, timber, and indigo.

Honduras (Span., 'depths') was discovered by Columbus on his fourth voyage, in 1502, and named from the difficulty of anchorage. There are numerous pyramids and other remains of the ancient inhabitants. Honduras threw off the yoke of Spain, with the rest of Central America, in 1821, and became independent on the dissolution of the confederation in 1839. Revolutions and frequent wars with Guatemala and San Salvador have been almost constant. The whites are very few in number, the Indians (including Caribs), negroes, and mixed races including all but some 6000 or 7000 of the population. The capital is Tegucigalpa, with 35,000 inhabitants. The ports are Amapala, Puerto Cortez or Puerto Caballos, Omoa, and Truxillo. See works by Squier (1870), Lombard (1887), and Charles (1890), and Child (1891) and Keane (1901) on Central America.

Honduras, British. See BELIZE.

Honfleur, a seaport in the French dep. of Calvados, on the southern side of the Seine estuary, opposite and 7 miles from Havre. The commerce has been absorbed in great measure by Havre; but the harbour and its approaches were greatly improved in 1874–81. Pop. 9000.

Hong-kong, or HIANG-KIANG ('sweet waters'), a British island of southern China, on the east side of the Canton River, 90 miles S. by E. of Canton city. It consists principally of a rugged ridge of granitic rocks, extending from north-west to south-east, and has an area of 29 sq. m. Barren and desolate, the island presents a striking contrast with the beauty of its harbour, a magnificent sheet of water, 10 sq. m. in extent, which stretches between Hong-kong and the peninsula of Kowloon on the mainland. The straits that separate the two are scarcely half a mile wide on the east. To the excellence of its harbour and to its free port it owes its importance as the principal commercial entrepôt of southern China, if not of eastern Asia. The annual value of the trade of Hong-kong (exclusive of that which merely passes through the harbour) amounts to about £20,000,000. The trade between Hong-kong and Great Britain amounts to ¾ of a million pounds for exports from Hong-kong, and 2¾ million for imports. The principal items are cottons, woollens, iron and machinery (imported), and tea and silk (exported).

The mean annual temperature is 75° F. The island is not unhealthy, except at certain seasons. A university was founded in 1910. Pop. (1841) 5000; (1851) 37,058; (1861) 123,511; (1911) 366,154, of whom only 8074 were Europeans and Americans. For purposes of defence, 376 sq. m. of adjacent territory on the Chinese mainland was leased for ninety-nine years in 1898. Hong-kong is the seat of a British governor and is a British naval station. The city of Victoria, the capital of the island, stretches some 4 miles along the northern shore, and from its situation on the slopes and terraces of the hills overlooking the harbour and its handsome streets and houses, is justly called one of the finest cities in the East. On the mainland the extremity of the peninsula of Kowloon, of 2⅝ sq. m. in area, was ceded to Great Britain in 1861, and now forms administratively part of the dependency of Hong-kong. The island was first occupied by Great Britain in 1841, and was secured to her next year by the treaty of Nanking.

Hon'ister Pass, a mountain way (1190 feet) in the Lake Country, Cumberland, leading to Buttermere, and flanked by Honister Crag (1750 feet).

Hon'iton, a market-town and municipal borough (1846) of Devonshire, near the left bank of the Otter, 17 miles by rail ENE. of Exeter. Four times devastated by fire between 1747 and 1797, it is a modern well-built place; but its old parish church, on a hill, contains a fine oak-screen, erected in 1482 by Bishop Courtenay of Exeter. The famous Honiton pillow-lace, a manufacture introduced here by Flemish refugees in the middle of the 16th century, is still a specialty of the district. The beautiful vale of Honiton is famous for its butter. Honiton was disfranchised in 1868. Pop. 3000.

Honolu'lu, the capital of the Hawaiian or Sandwich Islands, on the southern coast of the island of Oahu. Its spacious harbour, the only really well-protected port in the archipelago, is entered through an opening, 150 yards wide. The town stands close to the shore, on a narrow plain at the mouth of the Nuuanu valley. The mountains, which protect the harbour from the north-easterly trade-winds, also keep off the rain, so that the rainfall at Honolulu is much smaller than in some other parts of the islands. Waterworks, however, supply irrigation, which keeps the gardens of the town bright with flowers and foliage. The centre of the town is well laid out in rectangular streets, with houses built in European style; most of the appliances of civilisation are to be found, notably telephones; there are fine government buildings, and an interesting public library. Pop. 52,200, including a large number of foreigners; for the trade is almost entirely in foreign hands.

Hood, MOUNT. See CASCADE RANGE.

Hooghly, or HÚGLÍ, a river of Bengal, the most westerly and important of the channels by which the Ganges reaches the sea. Taking its distinctive name near the town of Santipur, it has a southerly course of 64 miles to Calcutta, and a further course of 81 miles to the Bay of Bengal. Being a deltaic river, the Hooghly is much subject to being silted up, and is only kept open to navigation by vigilant works. Vessels, however, drawing 26 feet of water are safely taken up to Calcutta. At its mouth the Hooghly is 15 miles wide. Its 'bore' often attains a height of 7 feet.

Hooghly (*Húglí*), a city of Bengal, on the river Hooghly's right or western bank, 25 miles by rail N. of Calcutta. Pop. with Chinsurah, immediately to the south, 29,400.

Hooker, MOUNT, a peak in the Canadian Rockies, 10,500 feet high, situated on the east boundary of British Columbia.

Hook of Holland (*Hoek van Holland*), a landing-place N. of the northernmost mouth of the Maas.

Hoorn, a decaying seaport of North Holland, on a bay of the Zuider Zee, 27 miles NNE. of Amsterdam by rail. Pop. 10,000.

Hoosac Mountain, a part of the Green Mountain range in western Massachusetts, through which is pierced the most notable railway tunnel in America. Nearly 5 miles long, it was commenced in 1851 for the line between Boston and Albany, was twice abandoned, and was finally opened in 1875, having cost about $18,000,000.

Hopeman, a fishing-village (founded 1805) of Elginshire, 6½ miles NW. of Elgin. Pop. 1500.

Hopetoun House, the Marquis of Linlithgow's seat in Linlithgowshire, near the Firth of Forth, 3 miles W. by N. of South Queensferry.

Hor, MOUNT. See EDOM.

Horbury, a village of the West Riding of Yorkshire, 4 miles SW. of Wakefield, manufactures woollens, worsteds, flannels, &c. Pop. 7500.

Hörde, a town of Westphalia, 2½ miles SE. of Dortmund, has large ironworks (employing more than 4000 men) and coal-mines, with iron, steel, and zinc manufactories. Pop. 33,000.

Horeb. See SINAI.

Horn, CAPE, commonly spoken of as the southernmost point of America, is a steep, black, bare mountain-headland of one of the small islands of the Fuegian Archipelago, 55° 59′ S. lat., 67° 14′ W. long. Sighted by Drake in 1578, it was named Hoorn, anglicised 'the Horn,' when rounded in 1616 by the Dutch navigators, Lemaire and Schouten. To avoid the dangerous doubling of Cape Horn, steamers now pass through the Strait of Magellan.

Horncastle, an ancient market-town of Lincolnshire, at the foot of the Wolds, between the confluent Bain and Waring, 21 miles E. of Lincoln by a branch-line (1855). It has a handsome Perpendicular church (restored 1861), a corn exchange (1856), a grammar-school (1562), and a great August horse-fair. Roman remains have been found here, and in the neighbourhood are Scrivelsby, long the seat of the Dymokes, champions of England; Winceby, the scene of a Royalist defeat (1643); Woodhall Spa, with a salt-spring discovered in 1820; and the site of the Cistercian abbey of Revesby (1142). Population, about 4000. See a work by Weir (1820).

Hornellsville, a town of New York, 91 miles SE. of Buffalo by rail, with railway workshops, and manufactures of mowing-machines, shoes, &c. Pop. 14,000.

Hornsea, a Yorkshire town, near the sea, 16 miles NE. of Hull. Pop. 3100.

Horodenka, a town of Austria, in East Galicia, 106 miles SE. of Lemberg. Pop. 13,000.

Horsens, a Danish seaport, at the head of the Horsensfiord, 32 miles SSW. of Aarhuus by rail. Pop. 25,000.

Horsforth, a township of Yorkshire, on the Aire, 5 miles NW. of Leeds. Pop. 9200.

Horsham, a market-town of Sussex, near the source of the Arun, 26 miles NNW. of Brighton and 35 SSW. of London. The noble parish church, Early English in style, was restored in 1865;

other buildings are the corn exchange (1766), grammar-school (1540; rebuilt 1840–57), &c. Christ's Hospital was transferred hither from London in 1902. Horsham returned two members from the 14th century till 1832, and then one till 1885. Pop. 11,500.

Horten, the chief naval port of Norway, on the Christiania Fjord, 30 miles S. of Christiania. It has an arsenal and shipbuilding yards. Pop. 9500.

Horwich, a Lancashire town, 4 miles WNW. of Bolton. It has cotton, bleaching, paper, terra-cotta, and other industries. The population has grown from 3760 in 1881 to upwards of 16,000.

Hoshangabad, a town in the Central Provinces of India, on the Nerbudda River, 40 miles SSE. of Bhopal by rail. It trades in English piece-goods, cotton, grain, &c. It has been in British hands since 1817. Pop. 15,000.

Hoshiarpur, a Punjab town, near the Siwalik Hills, 90 miles E. of Lahore. Pop. 25,000.

Hospital, a Limerick village, 3 miles NW. of Knocklong station. Pop. 650.

Hot Springs, a town of Arkansas, 56 miles WSW. of Little Rock. It has over fifty thermal springs (95° to 148° F.). Pop. 15,000.

Houghton-le-Spring, a town in the county, and 6½ miles NE. of the city, of Durham. Its rapid growth is mainly due to the extension of neighbouring collieries. The fine cruciform parish church contains the altar-tomb of Bernard Gilpin, who founded here a grammar-school (1574); later rectors were Peter Heylin and Archbishop Sancroft. Pop. 10,000.

Hounslow, a town of Middlesex, 10 miles W. by S. of London, was formerly a place of much importance in the old coaching days, it being the first stage out of London on the Bath and Southampton roads. As many as 800 horses were then maintained here, 500 coaches passed through daily, whilst a most extensive business in posting was carried on. With the opening of the railways, however, the place gradually declined, and now it contains but little of interest. West from Hounslow, stretching for 5 miles along the road, and in 1546 containing an area of 4293 acres, was Hounslow Heath, the scene of many military encampments, and notorious in the annals of highway robbery. It now is mostly enclosed. Near the town are large gunpowder-mills and cavalry and militia barracks, and at Kneller's Hall, once the painter Sir G. Kneller's residence, are the quarters of the Royal Military School of Music (1857). Pop. (1851) 3514; (1901) 11,380. Hounslow, or Houndslow, now forms part of Heston and Isleworth urban district.

Hourn, Loch, an Inverness-shire sea-inlet, striking 14 miles off Sleat Sound.

Housaton'ic River rises in Massachusetts, flows through Connecticut, and enters Long Island Sound near Bridgeport. In its course of 145 miles, it affords abundant water-power.

Houssa. See Haussa.

Houston, capital of Harris county, Texas, on the navigable Buffalo Bayou, 49 miles by rail NW. of Galveston. It is the great railway centre of the state, stands in the midst of a fertile country, and ships cotton, cotton-seed oil, rice, and fruit, besides the products of the great pine-forests. Pop. 80,000.

Hove, a residential municipal borough (incorporated 1898) of Sussex, adjoining and forming part of the parl. bor. of Brighton. Pop. 42,000.

Howden, a town of Yorkshire, 8½ miles ESE. of Selby. Pop. 2000.

Howrah, or Haura, a town of India, with growing manufactures, on the Hooghly's right bank, opposite Calcutta. It is connected with it by a three-span steel bridge, and is the Bengal terminus of the East Indian Railway. Pop. 175,000.

Howth, a peninsula on the east coast of Ireland, forming the north side of the Bay of Dublin, terminates in a lofty cliff, the 'Hill of Howth' (563 feet), at whose foot nestles the fishing-village of Howth (pop. 1400).

Hoxton, a district of London, partly in Hackney, but mainly in Shoreditch.

Hoy (Scand. *Hoey*, 'high island'), one of the Orkneys, 1¼ mile SW. of Mainland or Pomona. It is 13¼ miles long, 3 furlongs to 6¼ miles broad, and 53 sq. m. in area. Unlike the rest of the group, Hoy rises abruptly from the sea, with stupendous cliffs that attain 1140 feet in Bracbrough or St John's Head, and 595 in Bervy Hill; inland are Cuilags Hill (1420 feet) and the Ward Hill (1564), commanding a splendid view. Near the south end is the fine natural harbour of Long Hope (5½ × 1⅔ miles). The 'Dwarfie Stone' is 28 feet long, 14½ broad, 6½ high, with a chamber hollowed out of it; and the 'Old Man of Hoy' is an insulated pillar of rock, 450 feet high. Pop. 1000.

Hoylake, a small watering-place of Cheshire, at the extremity of Wirral peninsula, 8 miles by rail W. of Birkenhead. It has a celebrated golf-links, opened in 1869. Pop. 14,000.

Hradschin. See Prague.

Hualla'ga, a river of Peru, 650 miles long, rises near the Cerro de Pasco, over 14,000 feet above the sea, and flows north on the east side of the Central Cordillera, breaking through the range at the gorge of Chasuta, to the Marañon. It is navigable as far as Yurimaguas.

Huamanga. See Ayacucho.

Huancaveli'ca, the capital of a Peruvian dep., 150 miles SE. of Lima. Near it are famous quicksilver mines. Pop. 3000.

Huan'uco, the capital of a Peruvian dep., lies in a lovely valley on the Huallaga. Pop. 7300.

Hubertusburg, a royal Saxon hunting-seat, 25 miles E. by S. of Leipzig, built in 1721. It was much injured during the Seven Years' War; and here in 1763 was signed the treaty ending that war. Since 1840 it has served as prison, hospital, and lunatic asylum.

Hubli, a town of Dharwar, in Bombay presidency, 102 miles NE. of Karwar on the Malabar coast. It is an important cotton-mart. Pop. 60,500.

Hucknall-Torkard, a village 8 miles NNW. of Nottingham. Byron is buried here.

Huddersfield, a 'clothing town' in the West Riding of Yorkshire, a parliamentary, municipal, and county borough, 26 miles NE. of Manchester, 15 S. of Bradford, 17 SW. of Leeds, and 189 NNW. of London. Well built of stone and regular, it occupies a considerable extent of high ground, sloping down to the left bank of the Colne, which here receives the Holme; and it owes its rapid extension to its situation in a rich coal-district, to its abundant water-power, and to its transit facilities by rail and canal. Among the chief edifices are the circular cloth-hall (1768–80); the railway station (1848), with a marble statue of Peel (1875) before it; the classical town-hall (1880);

the technical college (1883; developed from the mechanics' hall, *c.* 1840); the market-hall (1880); and the infirmary (1831–74). The first parish church was built before 1110, and rebuilt in Tudor times, and again in 1835; St John's Church (1853) was designed by Butterfield, and St Thomas' (1859) by Sir G. G. Scott. The Beaumont Park, 21 acres in area, was opened by the Duke of Albany in 1883, and there is also Greenhead Park of 26 acres. The chamber of commerce (1880) is an important local body. Huddersfield is the chief seat in the north of England of the 'fancy trade,' and every description of plain woollen goods is also manufactured; whilst other industries are cotton and silk spinning, iron-founding, machine-making, &c. The Roman station of *Cambodunum* was in the parish, and remains have been found here; but Huddersfield has no history to speak of. In 1750 Bishop Pococke described it as 'a little town.' It was enfranchised by the Reform Act of 1832, and made a municipal borough in 1868, the boundary having been greatly extended in 1867. Pop. (1861) 34,877; (1881) 86,502; (1901) 95,047; (1911) 107,825.

Hudson, a river in New York, and one of the most beautiful and important in America. It rises in the Adirondack Mountains, 4326 feet above sea-level. At Glen's Falls it has a fall of 50 feet, and thence runs nearly due south to its mouth at New York City. It is tidal up to Troy, 151 miles from its mouth, and magnificent steamboats ply daily between New York and Albany. Below Newburg, 60 miles from New York, the river enters the beautiful highlands, which rise abruptly from the water to the height of 1600 feet. Here was the scene of Arnold's treason and of André's fate; and West Point is 8 miles below Newburg. Emerging from the highlands, the river widens into a broad expanse called Tappan Bay, 4½ miles wide and 13 long. Below, on the right bank, a steep wall of trap rock, called the Palisades, rises from the river's brink to a height of 300 to 510 feet, and extends for nearly 20 miles to the upper portion of the city of New York. The river from here is known as the North River, and is from 1 to 2 miles wide; and after passing between New York and Hoboken and Jersey City, it falls into New York Bay. Its whole length is 350 miles, and its principal tributaries are the Sacondaga, Mohawk, and Walkill. The Hudson has valuable shad and sturgeon fisheries. It is connected by canals with Lakes Erie and Champlain, and with the Delaware River. Henry Hudson, the English navigator, explored it in 1609. Robert Fulton's first successful experiment in steamboat navigation was made on it in 1807.

Hudson, capital of Columbia county, New York, on the Hudson River's left bank, 116 miles N. of New York City. It extends along a high ridge ending in a bold promontory, and has an active river-trade, a fine court-house, a city-hall, blast-furnaces, and manufactures of fire-engines, paper, leather, flour, &c. Pop. 11,500.

Hudson Bay, a gulf, or rather inland sea, in the north-east of North America, is completely landlocked except on the north, where Southampton Island and Fox Channel lie between it and the Arctic Ocean, and where Hudson Strait, running 500 miles south-east, connects it with the Atlantic. Including its south-eastern extension, James's Bay (q.v.), it measures about 1000 miles in length and 600 in average width, and has an area of some 500,000 sq. m. The eastern shore, called the East Main, is for the most part rocky, and is fenced with several small islands; the western shore, the West Main, is flat. To Hudson Bay drain northern Quebec, Ontario, and Manitoba, and the east of the NW. Territories, its chief feeders being the Churchill, whose deep and narrow mouth forms its best harbour, and the Nelson, of whose total course of 400 miles only 70 or 80 are navigable. The fur trade began with the Hudson Bay Company (founded 1670); fish-oil has also been exported. It has been proposed to open up direct communication from England with Manitoba and the North-west of Canada by way of Hudson Bay and Strait (navigable only about three months annually, by reason of the ice); the scheme providing for a railway from Le Pas (Manitoba) to Port Nelson (420 miles) and to Fort Churchill (500 miles).

Hué, the capital of Annam, 10 miles from the mouth of the Hué River, or Truongtien. In 1801 it was strongly fortified by French officers. The heart of the city is occupied by the palace. Since 1884 there has been a French garrison in Thuanan, the port of Hué. Pop. 50,000 (with suburbs, 90,000), including many Chinese.

Huelva, a thriving town of Spain, near the confluence of the Odiel and the Tinto, 68 miles by rail WSW. of Seville. Fishing and the plaiting of esparto grass are the chief industries. Huelva is the port for the Rio Tinto copper-mines, in British hands, and a shipping place for wine. An iron pier was erected in 1889–90. Pop. 27,700.—Huelva province has an area of 3913 sq. m., and a pop. of 309,000.

Huesca, a picturesque town of Spain, 55 miles by rail NE. of Saragossa. Among its chief buildings are the beautiful Gothic cathedral (1400–1515); the Romanesque church of San Pedro (1150–1241); the university, founded in 1354; and a former palace of the kings of Aragon. Huesca is the *Osca* of the Romans, where Sertorius was murdered in 72 B.C. Pop. 13,764.—Huesca province has an area of 5848 sq. m., and a pop. of 250,000.

Huescar, a town of Spain, 75 miles NE. of Granada. Pop. 7737.

Hughenden (locally *Hitchendon*), a parish of Buckinghamshire, among the Chiltern Hills, 2 miles N. of High Wycombe. Hughenden Manor, a large brick three-story mansion, mostly modern, was purchased before 1847 by Benjamin Disraeli, Earl of Beaconsfield. It is rich in interesting portraits; and in its terraced gardens are trees planted by Queen Victoria in 1877 and the Prince of Wales in 1880. The ancient parish church, much restored in 1874, contains a monument to the earl, erected by the Queen; and in its vault he lies buried by the side of Lady Beaconsfield.

Hugh Town. See SCILLY ISLANDS.

Húglí. See HOOGHLY.

Hull, or KINGSTON-ON-HULL, a river-port, a parliamentary and municipal borough, and (since 1897) a city and county of itself, is situated in the East Riding of Yorkshire, in a low, level plain on the north bank of the Humber, here 2 miles wide, and here joined by the Hull, 42 miles ESE. of York and 173 N. of London. Of churches the most notable are Holy Trinity, Decorated and Perpendicular in style, with a central tower 140 feet high; and St Mary's Lowgate (1333), one-half of which was removed to make room for the mansion-house of Henry VIII., who stayed here in 1540. Both were restored by Sir G. G. Scott. The most important educational establishments are Hull and East Riding College; the Hull grammar-school (1486), where Andrew Marvell was educated; and Trinity House School (1716), which gives a nautical education; besides the Literary and Philosophical Society, the Royal Institution, &c. An equestrian statue (1734) of William III. stands in the market-place, and in Junction Street is a column (1834) surmounted by a statue of Wilberforce, who was a native, as also was Mason the poet. The Trinity House, instituted in 1369 for decayed seamen, was rebuilt in 1763, and the Charterhouse, an endowed institution for the poor, in 1645. There are three prettily laid out public parks. A town-hall, Italian Renaissance in style, was opened in 1866, as also was a new exchange. There are also a spacious jail, post-office, Theatre Royal, dock-office, public baths, market-hall, James Reckitt Free Library, city hall, art gallery, and museums. The docks and basins, comprising an area of upwards of 200 acres, have been constructed since 1774. The Victoria Dock (1850–64) covers 20 acres, exclusive of two large timber ponds and tidal basins which cover 9 acres. The Albert Dock (24½ acres) was opened in 1869, and the Alexandria Dock (40 acres) in 1883. Others have since been made. Hull was one of the first ports in England to engage in the whale-fishery, an enterprise now abandoned; but its fisheries employ, in conjunction with those of Grimsby, large fleets of boats, attended by steam auxiliaries. Hull is a principal steam-packet station, and ocean-steamers ply regularly to many of the principal ports of Belgium, Holland, Denmark, Russia, Germany, Scandinavia, America, Australia, and India. It is the great outlet for the woollen and cotton goods of the midland counties, and the chief entrepôt for German and Scandinavian oversea trade. Hull ranks third among British ports in the value of its trade, its imports exceeding £30,000,000, and its exports £20,000,000. Shipbuilding yards are in operation; and, in addition to iron ships, important ironclads have been built here. The chief manufactures are ropes, canvas, chain, chain-cables, machinery, &c. Many mills of various kinds are carried on, as well as chemical factories, tanneries, and sugar-refineries. Seed-crushing for oil is also an important staple industry. Constituted the free borough of Kingston-on-Hull by Edward I. in 1299, the town owed much to its great merchant-house, the De la Poles, whose head, Michael, in 1385 was created Earl of Suffolk. In 1642 the refusal of its governor, Sir John Hotham, to admit Charles, marked the outbreak of the Civil War, during which Hull was twice besieged by the royalists. It was made the seat of a suffragan bishop in 1534, and again in 1883. In April 1893 it was the scene of the strike of 8000 dockers. Since 1885 Hull has returned three instead of two members to parliament. Pop. (1851) 84,690; (1911, extended in 1897) 278,024.

Hull, the chief town of Ottawa county, Quebec, is on the Ottawa River, opposite Ottawa City, with which it is connected by a suspension bridge. It was almost entirely burnt down in 1900, but was quickly rebuilt. Pop. 15,000.

Humber, the estuary of the rivers Ouse and Trent (and so of the Dove, Derwent, Wharfe, &c.), runs 38 miles E. and SE., separating the counties of York and Lincoln, with a breadth varying from 1 to 7 miles. Its drainage basin, with an area of 9770 miles, is the largest in England; and by means of navigable streams and canals the Humber is connected with the Mersey, the Severn, and the Thames. The navigation is obstructed, especially on the north side, by banks and shoals. By way of the Humber Danes and Northmen made many terrible incursions into England, notably in 867, 1013, 1066, and 1069. The great port on the Humber was anciently Ravenser or Ravenspur, just inside Spurn Head. The process of erosion by the sea was already at work when Henry Bolingbroke landed here in 1399; soon after the place was wholly covered by the encroaching waters, and Hull (q.v.) became the great port on the north shore, as Grimsby (q.v.) now is on the south. See *The Rivers of England* (Cassell, 1889), and books on the lost towns by Boyle (1889) and Sheppard (1912).

Humbleton. See HOMILDON.

Humboldt, a river rising in the NE. part of Nevada, and flowing 350 miles WSW. to Humboldt Sink, a lake over 40 miles in circumference, with no outlet. Unnavigable even for canoes, it is strongly impregnated with alkaline matter.

Hume Castle, Berwickshire, 6 miles N. by W. of Kelso, on Hume Crags (700 feet), is now a mere sham antique, on the site of the old stronghold of the lords of Home.

Hû-nan, a province of China (q.v.).

Hungary (Hung. *Magyarország*, Ger. *Ungarn*, Lat. *Hungaria*) is the eastern and larger half of the Austro-Hungarian monarchy, with an area of 124,633 sq. m., and a pop. (1900) of 19,254,559. With Transylvania, Croatia and Slavonia, and Fiume, it forms the realm of the crown of St Stephen or Transleithania, which is a coequal factor with Austria or Cisleithania in the empire-kingdom ruled over by the Hapsburg dynasty. The two have been united since 1526, and since 1867 have been reconstructed as a dual empire, each with its own laws, parliament, ministers, &c., but both under one monarch for military, diplomatic, and customs purposes. The geographical, industrial, and statistical features of Hungary have been dealt with in the article AUSTRIA. The Hungarians or Magyars, who entered Europe in 884, and established themselves in their present country five years later, speak a non-Aryan language, reckoned to belong to the Ugric branch of the Finnish stock. Hungary became a regular Christian kingdom in 1000 under King Stephen. Mathias Corvinus in the 15th century waged war successfully with the Turks and with the Bohemians. At the battle of Mohacs in 1526 Louis II. was utterly defeated by the Turks, and after an intestine struggle the Austrian Ferdinand became king. The chief modern events in Hungary's history were the great Magyar rising of 1848–49 and the reconstitution of the Dual Monarchy in 1867; with constant struggles for further Home Rule. See books by the Eighty Club (1906), members of the Hungarian government (ed. Alden, 1909), and Drage (1909).

Hungerford, a town of Berkshire, partly also in Wiltshire, is situated on the river Kennet, 26 miles WSW. of Reading. It is a hunting centre, and a favourite resort of anglers. Pop. 3000.

Hüningen (Fr. *Huningue*), a town of Alsace, on the Rhine's left bank, 2½ miles N. of Basel, is celebrated for its fish-breeding establishment (1852). Vauban's fortifications (1679–81) were razed in 1815. Pop. 3500.

Hunstanton (pron. *Hunston*), a watering-place of Norfolk, on the Wash, 18 miles NE. of King's Lynn by a railway (1862). It has a broad beach of firm sand, and good bathing and sea-fishing, a pier, a lighthouse (1840), and a splendid Decorated church (*c.* 1330). Hunstanton Hall, dating from the Tudor period, but greatly injured by fire in 1859, was the seat of Sir Roger L'Estrange. Pop. 2500.

Huntingdon, the county town of Huntingdonshire, on the left bank of the Ouse, and the Ermine Street of the Romans, 59 miles N. of London. It became the seat of a royal castle in 917, and was incorporated in 1189. It has the Buckden Library (1890), breweries, brick-works, carriage-works, and nursery gardens. Here Oliver Cromwell was born (1599), and here the poet Cowper lived (1765–67); the chronicler, Henry of Huntingdon, from 1110 to 1155 was Archdeacon of Huntingdon. With the municipal borough of Godmanchester (pop. 2000), on the opposite bank, it formed a parliamentary borough, returning till 1867 two members, till 1885 one. Pop. 4000.

Huntingdon, a town of Pennsylvania, 34 miles E. of Altoona. Pop. 7500.

Huntingdonshire, or Hunts, an inland county of England, 30 miles long and 23 broad, is wholly surrounded by Northampton, Cambridge, and Bedford shires. Area, 359 sq. m., almost all arable or in pasture. Pop. (1801) 37,568; (1861) 64,250; (1911) 55,583. Huntingdonshire is watered chiefly by the Nene and the Ouse, and comprises four hundreds and the municipal boroughs of Huntingdon, Godmanchester, and St Ives, with part of Peterborough. It is almost entirely in the diocese of Ely and the South-eastern Circuit, and returns two members. Two Roman roads traverse Huntingdonshire; at Alwalton, Earith, and Chesterton are remains of camps; and in many places Roman remains have been found. Among places of interest are the ruins of Ramsey Abbey and Buckden Palace, formerly the residence of the bishops of Lincoln; Hinchinbrook House, anciently the seat of the Cromwell family; Kimbolton Castle, the seat of the Duke of Manchester, where Queen Catharine resided for some time after her divorce from Henry VIII.; Horeham Hall, the residence of the Princess Elizabeth during Mary's reign; Denton, the birthplace of Cotton the antiquary; Little Gidding (q.v.); and Brampton, where lived for some years Samuel Pepys.

Huntington, the name of several towns in the United States. The largest are (1) capital of Cabell co., W. Virginia, on the Ohio River, 18 miles from Ironton. It has a college and many factories. Pop. 32,000.—(2) A town of New York, 30 miles E. by W. of New York City. Pop. 11,000.—(3) A city of Indiana, on the Little River, 24 miles SW. of Fort Wayne. Pop. 10,000.

Huntingtower, or Ruthven Castle, a ruin, 3 miles WNW. of Perth. James VI. was kidnapped here in the 'Raid of Ruthven' (1584).

Huntly, a Scottish town, 41 miles NW. of Aberdeen. Near it is ruined Huntly Castle, the seat of the earls and marquises of Huntly. Dr George Macdonald was born here. Pop. 4200.

Huntsville, capital of Madison county, Alabama, in the valley of the Tennessee, 212 miles ESE. of Memphis by rail. It manufactures cotton, oil, ice, iron, and flour. Pop. 10,000.

Huon Gulf, an inlet on the east side of New Guinea, in Kaiser Wilhelm's Land.

Hû-pei, one of the central provinces of China, watered by the Yang-tsze.

Hurdwár. See Hardwár.

Hurlford, an Ayrshire town, on the Irvine, 2 miles ESE. of Kilmarnock. It has ironworks, collieries, &c. Pop. 4000.

Hurlingham, at Fulham (q.v.) in Middlesex, on the Thames below the bridge, the headquarters of polo.

Huron, the second largest of the five great lakes on the frontier between the United States and Canada, is connected at the north-west by St Mary's River with Lake Superior, and through the strait of Mackinaw with Lake Michigan. On the south it has an outlet by way of the St Clair River. It is bounded on the W. and SW. by Michigan, and elsewhere by Ontario. The lake is divided into two unequal parts by the Cabot's Head peninsula and Grand Manitoulin island, the parts to the north being called North Channel and Georgian Bay. Its extreme length is 263 miles; its greatest breadth, exclusive of Georgian Bay, 105 miles; average breadth, 70 miles. The total area is 23,800 sq. m.; and its mean elevation is 581$\frac{3}{10}$ feet above sea-level, it being 20$\frac{1}{2}$ feet below Lake Superior, and 8$\frac{4}{10}$ above Lake Erie. Huron has a mean depth of about 250, and a maximum depth of 750 feet. There is an average difference between high and low water (due to winds and rain) of 1$\frac{3}{10}$ foot. Huron, like the other lakes, is subject to violent storms. It contains about three thousand islands, nearly all Canadian. The waters are very clear and pure, and abound in fish. There are numerous good harbours and roadsteads, most of them on the Canadian side; at Sand Beach, Michigan, there is a harbour of refuge.

Hursley, a village of Hampshire, 5 miles SW. of Winchester. John Keble, author of the *Christian Year*, was vicar here from 1835 till his death in 1866. In 1848, with the profits of that celebrated work, he restored the church, which is rich in modern stained glass. Keble himself lies buried in the churchyard, and in the chancel is the grave of Richard Cromwell.

Hurst Castle, a Hampshire fortress, dating from 1535, at the west entrance of the Solent, 4 miles S. by W. of Lymington. Charles I. was imprisoned here.

Hurstmonceaux (*Hurst'mon-sō*), a village of Sussex, 5 miles N. of Pevensey, with the extensive ivy-covered ruins of a fine castle, built of brick by Sir Roger de Fienes, one of the heroes of Agincourt. It passed in 1727 into the hands of the Hares or Hare-Naylors. The famous Broad Church leader, Archdeacon Hare, was rector from 1832 till 1855, and lies buried in the churchyard.

Hurstpierpoint, a market-town of Sussex, 8 miles N. by W. of Brighton. Here is St John's College (1849), a middle-class school in connection with Lancing (q.v.). Pop. 3000.

Husch, or Husi, a town of Moldavia, near the Pruth, 38 miles SSE. of Jassy. Fugitive Hussites founded it in the 15th century. Pop. 18,500.

Husum, an old town in the Prussian province of Sleswick-Holstein, 23 miles W. of Sleswick by rail, and 2$\frac{1}{2}$ from the North Sea. Pop. 10,000.

Hutchinson, a town of Kansas, on the Arkansas River, 48 miles NW. of Wichita. Pop. 17,000.

Huy (*Hoo-ee;* Flem. *Hoey*), a town of Belgium, is romantically situated amid lofty rocks on the Meuse, 19 miles SW. of Liége by rail. Its citadel (1822) commands the passage of the river, and its trade depends on ironworks, coal-mines, and manufactures of paper, leather, beer, spirits, &c. Pop. 16,000. Peter the Hermit is said to have founded here the former abbey of Neufmoustier (*Novum Monasterium*), where perhaps he died.

Hybla, three cities of ancient Sicily.

Hydaspes. See Jhelum.

Hyde, an important manufacturing town of Cheshire, 7 miles ESE. of Manchester, and 5 NE. of Stockport. Standing in a coalfield, and enjoying ample facilities of communication by road, rail, and canal, it has risen from a mere village to a considerable town, which in 1881 was incorporated as a municipal borough. Cotton is of course the staple manufacture; then come the felt-hat industry, engineering, boiler-making, &c. The town-hall is a handsome building. Pop. (1811) 1806; (1861) 13,722; (1911) 33,444.

Hyde Park, a manufacturing town of Massachusetts, on the Neponset River, 8 miles by rail S. by W. of Boston. Pop. 14,000.

Hyderabad (*Haidarábád*), or the Nizam's Dominions, a feudatory state of India, occupies the greater part of the Deccan proper or central plateau of southern India, between the provinces of Madras and Bombay. Area, 82,698 sq. m. (excluding the British assigned districts of Berar, q.v.); pop. (1911) 13,375,676. Only 1,138,666 are Mohammedans, found mainly in the capital, though the Nizam and state are Mohammedan. Telugu, Kanarese, and Marathi are the principal languages spoken. Education is making rapid strides. The surface is a slightly elevated tableland. The chief rivers are the Godavari, with its tributaries the Dudna, Manjira, and Pranhita; and the Kistna (Krishna), with the Bhima and Tungabhadra. In 1687 the territory, long called the Nizam's Dominions, became a province of the Mogul empire; but soon after 1713 the viceroy of the Deccan made himself independent.

Hyderabad, the capital of the state, stands on the Musi's right bank, 1700 feet above the sea, 390 miles by rail NW. of Madras. It is 6 miles in circumference, and is surrounded by a stone wall. Population, 500,000. The palace of the Nizam, though architecturally unimportant, is of vast size. Hyderabad is a great stronghold of Mohammedanism. The principal mosque was fashioned after the model of the Great Mosque at Mecca; in the interior are fine monolithic granite columns, and outside the building is crowned by lofty minarets. Another remarkable edifice is the Char Minar or College, with four minarets resting on four connected arches, at which the four principal thoroughfares converge. On the opposite side of the river is the magnificent British Residency; it stands in the midst of fine gardens, and communicates with the Nizam's palace by a bridge. The neighbourhood boasts of wild and picturesque scenery, and abounds with huge tanks and beautiful gardens.—Secunderabad (*Sikandarábád*) is a British military cantonment 6 miles NE. of Hyderabad.

Hyderabad, the historical capital of Sind, and chief city of a district, stands 3½ miles E. of the left bank of the Indus. On the other side is the Sind railway, terminating at Kurrachee. Hyderabad is famous for its silks, gold-work, pottery, lacquered ware, and arms. Pop. 70,000.

Hydra, a bleak, rock-bound Greek island, lies 4 miles from the coast of the Peloponnesian department of Argolis and Corinth. It is a narrow rocky ridge, 11 miles long, 1960 feet high, and 20 sq. m. in area. On the north-west coast is the seaport of Hydra (6000). The 7500 islanders, mostly of Albanian origin, make excellent seamen, and carry on cotton and silk weaving, tanning, shipbuilding, sponge-fishing, and commerce. Prior to the war of Greek independence the Hydriotes numbered 28,000.

Hyères, a town of Provence, in the French dep. of Var, on a southern hill-slope, crowned by a ruined castle, 3 miles from the Mediterranean, and 13 E. of Toulon by rail. Embosomed in palm-groves and orange-orchards, it is celebrated for the beauty of its situation and its mild, dry climate, and is therefore growing more and more in favour as an invalid resort between October and May. An English church was built in 1884; and since 1875 great improvements have been carried out in the way of drainage, water-works, boulevards, &c. Massillon was a native. Population, about 18,000. Near the coast lie the wooded Îles d'Hyères or d'Or (anc. *Stœchades*).

Hymettus (now *Trelo Vouni*), a mountain (3368 feet) in Attica, SE. of Athens, was famous of old for its honey and bluish marble.

Hyndlee, the Roxburghshire farm, 10 miles SE. from Hawick, of James Davidson, the prototype of 'Dandie Dinmont.'

Hyōgō, or Kobe, a port of central Japan, on the west shore of the Gulf of Osaka, 20 miles S. of that city. Population, 385,000. The foreign settlement is finely laid out, and the town is one of the most attractive and prosperous in Japan. It has been open to foreign trade since 1860, and has wharves, shipbuilding-yards, and a paper-mill.

Hythe, a parliamentary and municipal borough and market-town of Kent, 5 miles WSW. of Folkestone, and 67 SE. by E. of London by rail, is one of the Cinque Ports, although Lympne or Lymm (anc. *Portus Lemanis* of the Romans), now 3 miles inland, was probably the original harbour. The town, which is pleasantly situated some distance from the sea, is built on the side of a hill. Its church, a cruciform building of great beauty, in part Romanesque, has been restored since 1866, and contains in a crypt an extraordinary collection of human skulls and bones. Near to Hythe are the headquarters of the School of Musketry and Shorncliffe camp, both established in 1854; the picturesque ruins of Saltwood Castle, with memories of Becket; and the obsolete Royal Military Canal, 23 miles long, constructed in 1805 for the conveyance of military stores to Rye. In 1881 a sea-wall and parade, extending from Hythe to Sandgate and Folkestone, was opened. These and some smaller places are included in the parliamentary borough of Hythe, which since 1832 has returned only one member. Pop. of that borough (1851) 13,164; (1911) 51,365, of whom 6387 were within the municipal limits, which include West Hythe.

IBADAN, chief commercial town of Yoruba in Africa, in the Lagos division of Nigeria, 124 miles from Lagos by rail. Pop. 200,000.

Ibague, capital of a department of Colombia, 60 miles W. of Bogota, on a fertile plain 4000 feet above the sea. Pop. 12,000.

Ibajay, a town of Panay, in the province of Capiz, in the Philippines. Pop. 12,000.

Ibarra, capital of Imbabura province, Ecuador, 7000 feet above the sea. Pop. 10,000.

Ibea, a word coined from the initials of Imperial British East Africa, was disused when in 1895 the company was superseded by the British Foreign Office. British East Africa consists of the East Africa Protectorate, with **Uganda**, **Zanzibar**, and Pemba.

Iberia, the name by which Georgia (q.v.) was known to the Greeks and Romans; and also an ancient name for Spain. The 'Iberians' have been identified with the Basques and Berbers, and with the 'Mediterranean' race who in the late neolithic and early bronze ages occupied Britain also.

Ibrail. See Braila.

Ica, a coast dep. of Peru, with an area of 6295 sq. m. and a pop. of 90,111. The capital, Ica, is 50 miles by rail SE. of Pisco, its port. Pop. 9000.

Iceland, an island in the North Atlantic immediately south of the Polar Circle, which just touches its northernmost point. It lies between 63° 23′ and 66° 33′ N. lat., and between 13° 22′ and 24° 15′ W. long. The distance from Iceland to Greenland is about 250 miles, to Norway 600, to the Faröe Islands 250, and to Scotland 500. Its area is 40,300 sq. m. (more than a third larger than Scotland); its length from east to west 300 miles, and its breadth from north to south 200. The south coast from east to west is entirely wanting in bays and fjords. Other parts of the coast, especially the north-west and east coasts, are very much indented by fjords and bays, so that the coast-line, measured from point to point, is only 900 miles, but following the indentations would be over 2000.

Taken as a whole, Iceland may be said to be a tableland about 2000 feet high. In some parts it slopes pretty evenly down to the coast—e.g. on the south side between Eyafjallajökull and Reykjanes. Here is the largest extent of lowland, about 1400 sq. m. The fjords in the north-west, north, and east are mostly narrow cuttings, and hills rise to about 2000 feet abruptly from the water, ending in steep precipices, which afford breeding-places to myriads of sea-fowl. In the north, and in some parts of the east, there are several broad valleys running from the fjords into the interior. Iceland is throughout volcanic. The interior and highest part of the island consists of volcanic tufa; the hills of the east and west are mainly basaltic. The whole of the interior is occupied by barren sands, lava tracts, and icefields. The largest of these lava tracts is Odáthahraun, about 1200 sq. m. The largest icefield is that of Vatnajökull, about 3000 sq. m., and all the icefields together cover 5360 sq. m. At the south-east corner of Vatnajökull is the highest mountain in Iceland, called Öraefajökull (6550 feet); its upper part is covered with everlasting snow or ice, as more or less are all mountains above 4000 feet, the snow-line being usually at from 3000 to 4000 feet. There are twenty volcanoes which have been active since the island was inhabited; the eruptions of Hecla (q.v.) have been most frequent. Laki, near Skaptá, in 1783 threw out a lava stream 45 miles long and nearly 15 broad—an outpour unexampled anywhere else. The south-west peninsula, Reykjanes, has frequently been disturbed by volcanic outbursts; and islands in the sea round it have been thrown up or submerged alternately by submarine volcanic action. As a result of this volcanic activity, 2400 sq. m. of Iceland are covered with lava. Many of the ice-hills have been active volcanoes during the last 600 years, such as Öraefajökull and Eyafjallajökull. These ice-volcanoes never throw out any lava, but mud and ashes.

The numerous hot springs scattered about the island are in many parts made use of by the inhabitants for cooking and washing purposes; some are just warm enough for bathing, others convert their water into steam at a degree far above the boiling-point. The most famous is the Great Geyser, near Hecla. Earthquakes sometimes do much damage. Many rivers, all too rapid to be navigable, and the longest over 100 miles, run from the interior either north or south. Lakes also are numerous, and pretty waterfalls. The climate of the south of Iceland is somewhat like that of the north of Scotland—i.e. rather wet and changeable, but colder. In the north the climate is drier and colder still. The winter is mild considering the latitude, but spring and summer are frequently cold. The greatest peculiarity of the climate is the varying mean temperature of the same month, the difference sometimes being 27°. This is owing to the arrival or non-arrival of the Greenland ice, which not unfrequently blocks up the north and east coasts from April to September. Sulphur, lignite, and brown coal are found, as well as iron and lime. The only cereal is melur, a kind of wild oats. Turnips, carrots, cabbages, and potatoes thrive well, and are cultivated to some extent. The grasses, both wild and cultivated, however, are the principal product. Of trees there is the birch, seldom exceeding 12 feet in height, and some willows and juniper bushes; amongst the heather are found crowberries and whortleberries. Iceland moss, a kind of lichen, is plentiful, and is available for food. There are both white and blue foxes; and of reindeer, introduced in 1770, there are still a few herds running wild on the hills in the interior. Large numbers of sheep are now exported alive to Scotland and England. The cows are small, but yield abundant milk. Thousands of ponies are brought to Scotland every year. The genuine Iceland dog resembles the Eskimo dog and the Scotch collie. There are about 22,000 cattle, 1,000,000 sheep, and 40,000 ponies. Of birds there are immense numbers, especially of water-fowl; the most important the eider-duck. The ptarmigan is the only game-bird. The most remarkable bird of prey is the Icelandic falcon. The whooper or wild swan breeds largely. The neighbouring sea is very rich in fish, especially cod and herring; the fisheries, very important to the islanders, also attract French and Norwegians. Finbacked whales and seals are also numerous. Many of the salmon and trout rivers are rented by Englishmen.

Iceland was discovered about 800 by Irishmen or Scots, but they did not make any permanent settlement. In 874 it was rediscovered and colonised by Norwegians, who preferred to leave their native land rather than submit to the rule of Harold Haarfager. In about sixty years the whole island was inhabited, and an aristocratic republic was formed. In 1262–64 the Icelanders acknowledged the sovereignty of the king of Norway; in 1388, when Norway was united with Denmark, Iceland shared the same fate; but when Denmark had to give up Norway in 1814, Iceland remained with Denmark. In 1874 a new constitution was granted, and in 1893 a form of home rule. Christianity was introduced in 1000, and the Reformation about the middle of the 16th century. Church matters are now superintended by one Lutheran bishop at Reykjavík. The most notable events in the recent history of Iceland are calamities caused by volcanic outbursts, severe seasons, epidemics, and, in some cases, misgovernment. Pop. (1801) 46,240; (1880) 72,442; (1911) 85,089. Since 1870 there has been considerable emigration to America. In the 12th and 13th centuries the Icelanders produced more vernacular literature than any other nation in Europe; the present-day elementary education is so general that a child of ten unable to read is quite an exception. The Icelandic still spoken is practically the old Norse tongue once spoken in Norway, Sweden, and Denmark. Reykjavik (pop. 6000), on the south-west coast, is the capital. Isafjord in the north-west and Akureyri in the north have each about 500 inhabitants. For the rest the population is scattered all round the island on isolated farms. The principal means of support of the Icelanders are the rearing of live-stock and fishing. The only native industry consists in working the wool of the sheep into various articles of clothing; this is chiefly done by the women in winter. The Icelanders make a sort of tweed, the principal clothing material of the inhabitants. See works by C. S. Forbes (1860), Baring-Gould (1864), Burton (1875), Watts (1877), Bisiker(1902), Annandale(1905), W. D. Scott(1906).

Ichang, a walled Chinese town, stands on the Yang-tsze-kiang, where it escapes from the limestone gorges of its middle course, and 1000 miles from Shanghai at its mouth. In 1877 it was declared open to foreign trade. Pop. 55,000.

Icknield Street, a pre-Roman road, along the Berkshire Downs and the Chilterns.

Ickworth House, the splendid seat (1792) of the Marquis of Bristol, in Suffolk, 3 miles SW. of Bury St Edmunds.

Icolmkill. See Iona.

Iconium, an ancient town of Asia Minor, situated on the W. edge of the plateau skirting the northern slopes of the Taurus Mountains, 310 miles E. of Smyrna. In 1832 Ibrahim Pasha defeated the Turks there. The modern Konieh or Koniya, the capital of a Turkish vilayet, has a pop. of 40,000 or 50,000. Here is the chief monastery of the Mevlevi or 'dancing' dervishes. Ruins of mosques, madrasas (colleges), &c. attest its decayed splendour.

Ida, a mountain-range in Asia Minor, extending from Phrygia through Mysia into the Troad. Troy stood at its base. On the highest peak (5749 feet) was a temple of Cybele, the *Idæan Mother.* From Ida flow the Granicus, Simois, and Scamander.—On another Ida (8055 feet) in Crete, Zeus was said to have been educated.

I'daho, till 1890 a territory, now a state of the American Union, lies between 42° and 49° N. lat., and mainly between 111° and 114° W. long. Its greatest length is 490 miles; the breadth varies from 42 miles at the 'pan-handle' which forms the northern part, to 300 miles along the southern boundary. Its area is 84,800 sq. m. One of the main ranges of the Rocky Mountains separates Idaho from Montana, and in the south is part of the continental divide between the Atlantic and Pacific oceans. About 70,000 sq. m. of the area is situated in the drainage basin of the Columbia River, the rest in the Great Basin. Except a small area in the south, the entire surface is rugged and mountainous, traversed by spurs of the high range in the north-east, of which Salmon River Mountains separate northern Idaho from the plateau-region in the centre and south. Most of these ranges reach elevations of 10,000 feet and upwards; the average height of the state is about 5000 feet. The lowest level is the valley of Snake River, which at Boisé City (the capital) is 2000 feet above the sea-level. Snake River, Shoshone, or Lewis River drains by far the largest part of the state. In its course (about 850 miles in length), open valleys alternate with narrow cañons through which the river flows in 'dalles' and cataracts. Shoshone Falls almost rival those of Niagara. Salmon River, a tributary, drains the central part. There are two lake-regions: one in the pan-handle, the other in the south-east. The former includes Pend d'Oreille, Cœur d'Alene and Kaniksu lakes; the latter, John Day and Bear lakes. These lake-regions abound in game. Vegetation is abundant in the northern and central parts, but not in the arid lands of the south, where irrigation is necessary. Forests of conifers cover the western slopes of the Bitter Root and Cœur d'Alene mountains. In the central and southern part the forests give place to extensive mesas overgrown with sage brush, and rolling lands covered with bunch grass. The mineral wealth consists chiefly in silver, lead, gold, copper, and coal. In the basin-region of the south-east soda, gypsum, sulphur, &c. abound. Mineral springs are numerous. The climate is exceedingly healthy. Grain-farming is of necessity confined to the narrow river-valleys, and, as a whole, Idaho is best adapted to stock-raising. Pop. (1870) 14,999; (1880) 32,610; (1890) 84,385; (1900) 161,772; (1910) 325,594, including many Mormons and 4250 Indians.

Iddesleigh, a Devon parish, 4 miles NE. of Hatherleigh. It gave his earl's title (1885) to Sir Stafford Northcote.

Idle, in 1899 incorporated with Bradford, was till then a distinct Yorkshire town, lying to the east of Bradford.

Idria, an Austrian town in Carniola, celebrated since 1497 for its quicksilver mines, lies 1093 feet above sea-level in the deep valley of the river Idria, 23 miles W. by S. of Laibach. Pop. 7000.

Idumæa. See Edom.

If, a rocky island in the Gulf of Marseilles, crowned by the Château d'If, built by Francis I. Here were confined Mirabeau and Philip Égalité, not to mention 'Monte Cristo.'

Iffley, a village, with a fine Norman church, on the Isis, 1¾ mile below Oxford.

Ifni, a small seaport of southern Morocco, ceded to Spain in 1883, and assigned to Spain, with a strip of coast, by the Franco-Spanish agreement of 1912.

Iglau (Bohm. *Jihlava*), the second largest town of Moravia, is situated 1703 feet above sea-level, on the river Iglawa, close to the Bohemian boundary. Its staples are cloth and woollen goods, besides glass and tobacco. Pop. 26,000.

Igloolik, an island near the east end of Fury and Hecla Strait in the Arctic Ocean. Here Parry passed the winter of 1822–23.

Igualada, a town of Spain, 32 miles NW. of Barcelona. Pop, 10,218.

Ilala, a place near the south shore of Lake Bangweolo in northern Rhodesia, where Dr Livingstone died.

Il'chester, a decayed village of Somerset, on the Yeo, 5 miles NW. of Yeovil. Supposed to be the *Ischalis* of Ptolemy, it was an important Roman station, and a flourishing Saxon town. Roger Bacon was a native. Till 1832 Ilchester returned two members. Pop. 570.

Île-de-France, an old province of France, having Paris for capital, and now mostly comprised in the deps. of Seine, Seine-et-Oise, Aisne, Seine-et-Marne, Somme, and Oise. Île-de-France was the former name of Mauritius.

Iletzk, a town in the Russian government of Orenburg, near the confluence of the Ilek with the Ural. Pop. 11,500. Close by is the richest salt-bed in Russia.

Ilford, a town of Essex, on the Roding, 3½ miles ENE. of Stratford. Pop. (1911) 78,205.

Ilfracombe (*Il'fra-coom*), a watering-place of North Devon, is finely situated on a cove of the Bristol Channel, 11 miles NNW. of Barnstaple (15 by a branch-line). Its air 'combines the soft warmth of South Devon with the bracing freshness of the Welsh mountains' (Charles Kingsley). This and its fine rocky coast-scenery and admirable sea-bathing annually attract large numbers of visitors. On the north side of the good harbour there is a lighthouse, the light, 127 feet above high-water, being visible for 10 miles. In the 14th century it was a port of some consequence, and contributed six vessels to the siege of Calais. Population, 9000.

Ilhavo, a Portuguese town, 40 miles S. of Oporto. Near it are the glass and porcelain works of Vista Alegre. Pop. 12,600.

Ili. See KULJA.

Ilkeston, a market-town of Derbyshire, near the Erewash River, 9 miles ENE. of Derby, and 20 S. of Chesterfield. It enjoys repute from its alkaline spring and baths (opened in 1830). The parish church, with a lofty pinnacled tower, has interesting Norman and Early English features. The town-hall was built in 1868. Ilkeston has manufactures of hosiery, lace, silk, and earthenware, with coal and iron mines in the vicinity. In 1251 a charter for holding a market and fair here was granted to Hugh Fitz-Ralph; and in 1887 Ilkeston was incorporated as a municipal borough. Pop. (1861) 3330; (1901) 25,383; (1911) 31,673.

Ilkley, a watering-place in the West Riding of Yorkshire, on the Wharfe, among heathery hills, 13 miles NNW. of Bradford and 16 NW. of Leeds by a branch-line (1865). Since 1846 it has become the seat of several hydropathic establishments—Ilkley Wells House, Ben-Rhydding (q.v.), &c. It occupies the site of a Roman station, and in the churchyard are three curious Saxon crosses; whilst Bolton Abbey (q.v.) is 5 miles north-west. Pop. 8000.

Ill, a river of Alsace, flowing 127 miles NNE. to the Rhine, 9 miles below Strasburg.

Ille-et-Vilaine, a maritime French dep., formed out of the north-eastern portion of the old province of Brittany. Area, 2596 sq. m.; pop. (1872) 589,532; (1911) 608,098, mostly of Celtic race. It is watered chiefly by the Vilaine and its tributary the Ille, which unite near Rennes.—The dep. is divided into six arrondissements—Rennes (the capital), Fougères, Montfort, St Malo (the chief seaport), Vitré, and Rédon.

Illima'ni, a chief summit (21,150 feet) of the Bolivian Andes, 40 miles SE. of La Paz.

Illinois (*Ill-i-noy'*), seventeenth in area of the United States, but third in population, extends from Wisconsin and Lake Michigan on the N. and NE. to the junction of the Ohio and Mississippi rivers at the extreme SW.—a distance of nearly 400 miles. It is bounded E. by Indiana, from which it is partly separated by the Wabash River; S. it is separated from Kentucky by the Ohio; and on the W. the Mississippi flows between it and Iowa and Missouri. The area is 56,650 sq. m., or nearly that of England and Wales. The surface of Illinois is the most level of any state, except Delaware and Louisiana; and its wide grassy plains, though broken by numerous streams fringed with belts of fine timber, have gained for it the name of the Prairie State. The Illinois River is formed by the union of two streams, 45 miles SW. of Lake Michigan, and flows 500 miles SW. to the Mississippi. The fertile soil—a heavy black loam—with a favourable climate, makes this the richest agricultural state in the Union; and Illinois ranks first for the production of corn, cattle, hogs, and horses. The mineral output, especially of bituminous coal, is also large, nearly a fifth of the entire coalfield of the United States being found in this state. Other minerals are lead, limestone, salt, and fluor-spar. The position of Illinois presents unusual facilities for commerce. The rivers that cross or touch the state are navigable for over 400 miles, while by way of the great lakes Chicago has also a water-highway to the Atlantic. Moreover, Illinois has more railroads than any other state, upwards of 10,800 miles. Formerly a part of the North-west Territory, Illinois was organised as a territory in 1809, and admitted as a state in 1818, with a pop. of 34,620. Pop. (1830) 157,445; (1850) 851,470; (1870) 2,539,891; (1880) 3,077,871; (1911) 5,638,591. Chicago is by far the largest city; its limits embrace more than a third of the population of the state. Peoria, East St Louis, Quincy, Springfield (the capital), and Rockford rank next in size. During the Civil War the state contributed 259,092 men to the Union armies, of whom over 29,000 were killed in action or died of wounds or disease. See works by S. Breese (Chicago, 1884), J. Moses (Chicago, 1889), and Finley (1905).

Illyria (Lat. *Illyricum*), the country that stretched along the eastern side of the Adriatic Sea, from Epirus northwards, coinciding now with Bosnia, Dalmatia, Montenegro, &c.

Ilmen, a lake of Russia, with an area of 354 sq. m., discharging through the river Volkhof to Lake Ladoga.

Ilmenau, a town and summer resort in Saxe-Weimar, 30 miles S. of Erfurt, manufactures glass, pottery, toys, and ironware. Pop. 12,000.

Ilminster, a market-town of Somerset, on the Isle, 11 miles SE. of Taunton. Pop. 2500.

Il Obeid. See OBEID.

Ilori, or ILLORIN, capital of a territory in Nigeria, and an important commercial centre, stands at an elevation of 1300 feet, 160 miles NNE. of Lagos on the coast, and 50 SW. of the Niger. Once an independent Yoruba state, it became subject to Sokoto, and so came into the sphere of the Niger Company; since 1897 it gives name to a province of (British) Nigeria.

Ilsley, EAST, a Berkshire market-town, amid bleak downs, 9 miles N. of Newbury and 6½ S. of Didcot. Its sheep-markets count among the most important in the kingdom. Pop. 450. Archbishop de Dominis was rector of West Ilsley, 2 miles north-west. Pop. 320.

Imbros, a Turkish island of the Ægean Sea, 14 miles NE. of Lemnos, and 14 W. of the mouth of the Dardanelles. Area, 98 sq. m.; pop. 9000, mostly of Greek descent. It attains 1959 feet above sea-level. The chief village, Kastro, on the north coast, occupies the site of the ancient town of Imbros.

Imeritia. See CAUCASUS.

I'mola (anc. *Forum Cornelii*), a picturesque town of Italy, on an islet formed by the river Santerno (*Vatremis*), 22 miles SE. of Bologna by rail. Its cathedral has been spoiled by modern restoration. Pop. 12,500.

Imphail, the native name of Manipur (q.v.).

Inaccessible Island. See TRISTAN DA CUNHA.

Inagua. See BAHAMAS.

Inchaffray, a ruined Augustinian abbey (1200) of Perthshire, 6½ miles E. by N. of Crieff.

Inchcape. See Bell Rock.

Inchcolm ('Columba's island'), a Fife islet, in the Firth of Forth, 1½ mile S. by W. of Aberdour. It has remains of a 12th-century Augustinian abbey and an earlier hermitage.

Inchgarvie. See Forth Bridge.

Inchkeith, a strongly fortified islet of Fife, in the Firth of Forth, 2¾ miles SSE. of Kinghorn Ness. It rises to 182 feet, and is crowned by a lighthouse, dating from 1803.

Inchmahome. See Menteith.

India, the Indian empire of the British crown, is an extensive region of southern Asia, and next after China the most populous area in the world. The name India is a Greek word from the Persian *Hind*, the Persian form of Sindhu, a Sanskrit name for the Indus River. Hindustan is properly only a province—the region of the Jumna and the Ganges. 'Further India' is the Indo-Chinese peninsula.

India is the central peninsula of southern Asia, and lies in 8° 4′—35° N. lat. and 67°—92° E. long., with a length of some 1900 miles, a breadth of 1600, and an area—inclusive of Burma—of 1,766,650 sq. m. The natural boundaries of this vast region are, on the N., the range of the Himalaya Mountains, which separates it from Tartary, China, and Tibet; on the W. the mountainous frontiers of Afghanistan and, further south, of Persia; on the SW. and S. the Arabian Sea and the Indian Ocean; on the E. the hill-ranges which border upon Burma and the Bay of Bengal. The region presents a diversified surface and scenery. It has indeed been called 'an epitome of the whole earth,' consisting as it does of mountains far above the level of perpetual snow, broad and fertile plains, bathed in intense sunshine, arid wastes, and impenetrable forests. Its natural divisions are the Himalaya, the sub-Himalayan ranges, the plains of the Ganges and the Brahmaputra, the basin of the Indus, the highlands of Hindustan, the Vindhya and Satpura ranges, and the peninsula south of those ranges. The Himalaya (q.v.) is the dominating factor in the geography of northern India, being the source of the Indus, the Ganges, the Brahmaputra, and of their principal affluents. The sub-Himalayan ranges, between the Himalaya and the plains of the Ganges and Indus, occupy Cashmere, the Simla hill-states, Gurhwal, Kumaon, Nepál, Sikkim, and Bhutan, which, owing to their elevation above the sea (5000 to 9000 feet), have a climate like central Europe in summer and cold as Switzerland in winter. The plains of the Ganges and the Brahmaputra, which include Bengal, Behar, the Doab, Oudh, and Rohilcund, form an alluvial flat, terminating in a delta at the Bay of Bengal. The Punjab occupies the northern portion of the basin of the Indus. South of the Punjab, and parallel with the river, the great sandy desert of the Indus extends for nearly 500 miles. The valley of the Indus is continued through Sind to the Arabian Sea. Between the Indus region and the Aravalli Hills lies the Thur desert, 400 miles long and 100 broad. It is only in the neighbourhood of the Indus and some of its tributaries that the surface can be cultivated by means of river-irrigation. The highlands of Hindustan include the tableland of Malwa and Rajputana or Rajasthan, which has an elevation of about 2000 feet.

The Vindhya and Satpura ranges, running from east to west, with an elevation from 2500 to 4000 feet, form, with the Nerbudda River between them, a broad wall dividing northern from southern India. The peninsula south of the Satpura range is in two divisions. The first, the Deccan (q.v.), is a central tableland rising from 1500 to 2000 feet above the sea, and enclosed on all sides by mountain-ranges. These ranges are the Satpuras, the Eastern Gháts, and the Western Gháts. Between the Eastern Gháts and the sea are fertile littoral tracts known to history as the Northern Circars and the Carnatic. Between the Western Gháts and the sea is a similar tract known geographically as the Konkan. As a northern continuation of this tract is Gujarat, with its offshoots the peninsulas of Kathiawar and Cutch. From the low land of the Konkan to the Deccan plateau the mountains rise in a succession of gigantic terraces. The rivers of the Deccan rise in the Western Gháts, and, after traversing the tableland, descend to the sea by passages through the Eastern Gháts. The slope of the country corresponds with the course of the rivers; it has a gradual eastward inclination. The second division begins geographically from the hills south of Cuddapah, extends right down to Cape Comorin as to the apex of an inverted triangle, and includes Madras, Tanjore, Trichinopoli, and Tinnevelli.

There are auriferous deposits in parts of the Deccan. Silver has never been discovered in appreciable quantity within the country; in the Shan dependencies of Burma, however, it is extracted from lead ore. Coal is obtained largely in Bengal, in the Satpura Hills and in the Deccan to some extent. Petroleum is got in Burma. Iron and copper are worked; also manganese, tin, graphite, and jadestone. Diamonds are still found in the central hills, and ruby-mines are worked near the Irawadi. The mineral resources on the whole are less important than the agricultural. In a country extending over 26° of latitude—one extremity of which runs far into the torrid zone, and the other terminates in a range of mountains rising far above the line of perpetual snow—a country embracing lowland plains, elevated plateaus, and alpine regions, the climate must be extremely varied. The whole country has three well-marked seasons—the cool, the hot, and the rainy. This characteristic applies even to the Himalayas, which have otherwise a climate like that of Switzerland. The cool months are November, December, January, and a part of February; the dry hot weather precedes, and the moist hot weather follows the periodical rains. The rainy season falls in the middle of summer; its beginning is earlier or later according to circumstances, its ending is in September. The winter is the pleasant period; the spring is generally hot and healthy; the summer depends on the duration of the rains; the autumn is close, malarious, and unhealthy. The occasional failure of the monsoon causes the periodical famines to which the country is liable. The central tableland is cool comparatively. In the north-west there is burning heat with hot winds in summer, and frost at night in winter. In the south the heat is more tempered, but the winter is cool only, and not cold. In the north-eastern and other outlying parts the rainfall exceeds 75 inches (at Cherra Punji 600 inches) in the year; in the Deccan, in the upper basins of the Ganges and the Indus, it is 30, and in the lower regions of the Indus less than 15 inches. The remainder of India is placed between the extremes represented by these damp and dry belts, but is, as compared with Europe, an arid country. Hence the necessity of tanks and irrigation canals.

The domesticated animals are, first, the cattle —cows, buffaloes, oxen; the last two do the work of agriculture. The bull and cow are sacred animals to Hindus, and by them are never killed for food. The indigenous breeds of horses in India are being improved by the importation of foreign sires. They have never been employed in agriculture. The pony, the donkey, and the mule are largely used. Sheep and goats are abundant. The pig is plentiful, but is despised by the upper and middle classes of the people. The wild animals include the tiger, panther, cheetah, boar, bear, bison, elephant, and rhinoceros. The crocodile and gharial infest most of the rivers. Deer of all sorts abound everywhere, and mainly supply sustenance to the carnivorous animals. The monkeys are tame and are held sacred. The lion, the hyæna, the lynx, and the wolf are unimportant. The elephant is used for purposes of war or of state. The ibex and the ovis-ammon (the wild goat and the wild sheep) are found only in the highest parts of the Himalayas. Poisonous snakes abound, the worst being the cobra da capello (the black-hooded): many thousands of the natives die from snakebite in the year. The birds are infinitely various. Nearly half of the country is tropical, though none of it is equatorial, and a part is not only temperate, but cold; accordingly the vegetation varies greatly. As compared with equatorial regions, the country has tropical products plentiful and good, but not first-rate, such as tobacco, sugar, ginger, and spices of all sorts. Rice has from time immemorial been a staple. Maize and millet are articles of food for the stronger races. Oil-seeds are largely exported. The cultivation of wheat has greatly developed for exportation since the development of railways and the opening of the Suez Canal. Tea is grown largely under European supervision in the Eastern Himalayas, and already surpasses the China teas. Coffee is grown in the south, but with chequered success. Among the dyes, indigo and lac (red) are noteworthy. The indigenous flowers are not rich, the water-lilies being the best; the flowering shrubs are very fine. Of trees in the plains near the coasts the palm order with its several varieties strikes the observer. Inland the mango fruit-tree and the orange, the umbrageous banyan, the sacred peepul, and the bamboo are features in the landscape. In the hills the teak and other useful timber trees are obtained. In the Himalayas are the cedar, the pine, the fir, the juniper. Conservation of forests is now carefully attended to. Barely one-third of the whole country is cultivated or grazed. Of the remainder a portion is available for cultivation; the rest is uncultivable—hillsides, deserts, river-beds, &c.

At the census of 1881, the total pop. was 253 millions for the British territories and the native states; in 1911, 315 millions, including Burma and Sikkim, but excluding Ceylon, Nepál, Bhutan, and the small French and Portuguese territories. Including these, the population is 325 millions. But though populous, the country is not as a whole densely peopled; the average per sq. m. being 222 for the British area, 105 for native states, and 178 for the whole country. Only 30 millions are urban. Calcutta has 1,216,514 inhabitants, Bombay 980,000, and Madras 518,000; below these there are other 26 cities with more than 100,000 inhabitants, some 50 more with over 50,000. The inhabitants of India speak languages belonging to four very different stocks—Aryan, Dravidian, Kolarian, and Tibeto-Burman. The Aryans, the dominant people of India, speak tongues derived from the ancient Sanskrit, the more important being Bengali, Uriya, Hindi, Sindhi, Kashmiri, and Gujarati (Sinhalese is the language of Ceylon). Urdu or Hindustani, formed after the Moslem conquest, is Hindi mixed with Persian and Arabic words. Of the Dravidian tongues of the Deccan, the chief are Tamil, Telugu, Canarese, and Malayalam. The Kolarian tongues are named from the Kol hill-tribes in the Central Provinces. The Tibeto-Burman tongues are agglutinative. Of the total pop., 217,600,000 are Hindus or Brahminists in faith, 66,600,000 Mohammedans, 10,300,000 aboriginal pagans, 10,700,000 Buddhists (almost all in Burma) 3,000,000 Sikhs (modified Hindus), 1,250,000 Jains (also a modified Hindu sect), 100,000 Parsees (chiefly in Bombay), 3,800,000 Christians (of whom about half are Roman Catholics), and 20,000 Jews. The inhabitants of India, accordingly, so far from being one nation or people, are a congeries of peoples differing widely in blood, physique, character, language, and religion.

Since Queen Victoria was proclaimed Empress, India is an empire, including the British territories and the Indian allies, feudatories, and vassals from the Tibetan and Tatar watershed of the Himalayas to Cape Comorin. The empire is under one supreme authority in India—the Viceroy and Governor-General in Council. It may thus be divided into two categories—the British territories and the native states. The Himalayan states of Nepál and Bhutan do not ordinarily appear in the official tables, though they are in communication with British political agents. In their internal affairs they are uncontrolled. The native states which appear in the official tables occupy more than a third of the area of the empire, and contain more than one-fifth of its entire population:

Native States and Agencies.	Area in sq. miles.	Population, 1911.
Hyderabad	82,698	13,374,676
Baroda	8,099	2,032,798
Mysore	29,444	5,806,193
Cashmere	80,900	3,158,126
Rajputana	127,541	10,530,432
Central India	78,774	9,356,980
Bombay States	65,761	7,411,675
Madras States	9,969	4,811,841
Central Provinces States	31,188	2,117,002
Bengal States	32,773	4,538,161
United Provinces States	5,079	832,036
Punjab States	36,532	4,212,794
Beluchistan	86,511	396,432
Eastern Bengal and Assam	15,986	575,835
Sikkim	..	87,920
North-west Frontier	..	1,622,094
Total Native States	691,253	70,864,995

Hyderabad, as given above, is exclusive of Berar, now administered as part of British India. The United Provinces Native States are those attached to Agra and Oudh.

The relations of the native princes to British authority differ very widely. Some are practically independent sovereigns, except that the suzerain power does not permit any of them to make war on one another, or to form alliances with foreign states; while some are under tolerably strict control. As a rule they govern their states under the advice of an English resident appointed by the Governor-general. There are in all about 700 states, allied or feudatory, great and small; they are divided into allied, tributary, and protected. Another classification is according to the religion and race of the native dynasty:

Mahratta states, other Hindu states, Mohammedan states, and frontier states.

The British territories, containing 1,087,249 sq. m. and 244,267,542 souls, were originally in three divisions, called presidencies—Bengal, Madras, and Bombay. The old presidencies of Madras and Bombay still survive under governors in council as of yore; the Bengal Presidency, being much the largest, has been subdivided. The main subdivisions of the old Bengal Presidency are now accordingly: Bengal (since 1912 a presidency under a governor in council); Behar and Orissa (1912); the United Provinces of Agra and Oudh; the Punjab; Delhi. Each of these, except Bengal and Delhi, is under a lieutenant-governor, as is also Burma. The Central Provinces (including Berar—q.v.—since 1902), the North-west Frontier Province, Ajmer-Merwara, British Beluchistan, Coorg, Assam (1912), Delhi (1912), and the Andamans have each a chief-commissioner.

Provinces.	Area in sq. miles.	Population, 1911.
Burma	236,738	12,115,217
Eastern Bengal and Assam	106,130	34,018,527
Bengal	115,819	52,668,269
United Provinces	107,164	47,182,044
Ajmer-Merwara	2,711	501,395
Punjab	97,209	19,974,956
North-west Frontier Province	16,466	2,196,933
Beluchistan (British)	45,804	414,412
Bombay	123,064	19,672,642
Central Provinces and Berar	100,345	13,916,308
Coorg	1,582	174,976
Madras	141,726	41,405,404
Andamans and Nicobars	3,143	26,459
Total	1,097,901	244,267,542

Burma includes the Shan States, the Chin Hills, and the Karen country. The North-west Frontier Province was formed in 1901 out of Peshawar, Kohat, and parts of three other Punjab districts, and areas occupied by frontier tribes. The North-west Provinces and Oudh are now the United Provinces. The division of Bengal into Bengal and Eastern Bengal (1905) was in 1912 (after the census) cancelled, and Behar, Orissa, and Chota Nagpur made a new province. At the same time Delhi superseded Calcutta as capital.

In 1858 the government was transferred from the East India Company to the Crown. In 1877 the Queen assumed the title of Empress of India (Kaisar-i-Hind). The government of India is in the highest resort vested in a Secretary of State in London, who is a member of the cabinet, and has a parliamentary under-secretary and a council of ten to fifteen members. The executive government in India is administered by the Viceroy and Governor-general in Council, acting under the control of the Secretary of State for India. The Viceroy and Governor-general, appointed by the crown, is assisted by an executive council, consisting of six ordinary members (appointed by the crown), each of whom has charge of a department of the executive; together with one extraordinary member, the commander-in-chief of the army. This council virtually sits as a cabinet. The legislation for the empire is conducted by a 'legislative council,' composed of the members of the executive above mentioned, together with (since 1910) 54 additional members, 26 nominated and 28 elected, so as to secure representation of Indian interests. The larger units of administration are the districts or collectorships, of which there are in all the provinces above mentioned about 250, each under a collector-magistrate or deputy-commissioner. The head of the district has most multifarious and responsible duties; he is fiscal officer, charged with collecting the revenue, as well as magistrate, and besides superintends police, jails, education, sanitation, and roads. The administration is conducted by members of the Indian civil service, the great majority of whom are European, though some are natives. The service is recruited from the successful candidates at competitive examinations held in London; but while the direction is in European hands, the local civil service, constituting the great mass of civil officials, consists of natives. In 1859 the troops of the East India Company became the Indian military forces of the British crown. The relations of the governor-general to the commander-in-chief in India and his other military advisers were rearranged in 1905. In 1912 the total strength of the army in India was 235,028. Of these 75,884 were British regulars, and 159,144 Indian regulars, besides 36,000 reservists, 38,000 European and Eurasian volunteers, and 20,000 imperial service troops, maintained by the native states, but trained under British officers. There are now two principal commands—the northern and the southern armies, each under a lieutenant-general. The East Indies Squadron of the royal navy (5 cruisers and 4 attached vessels) is stationed at Bombay and Colombo.

The educational system, dating from 1854, comprises three principal universities at Calcutta, Madras, and Bombay, each having many affiliated colleges; there are also two new universities at Allahabad and Lahore. The other educational institutions are of several kinds, public, aided, private and unaided; state institutions number 170,000, with 6,500,000 scholars. The imports in 1890–91 had a value of £116,000,000, in 1911–12 of £131,700,000; the exports in 1890–91 £102,300,000, in 1911–12 £158,800,000. Of the imports more than four-fifths, of the exports more than half, pass by the Suez Canal. Again, of the imports, nearly all come from the United Kingdom; but of the exports a considerable portion is sent to other countries. Of the imports the principal item consists of cotton goods; next metals; then machinery, railway plant and rolling-stock, manufactured silk, sugar, and woollen manufactures. The principal items of export are coffee, raw cotton, cotton twist, yarn, manufactures, dyes, grains, including rice and wheat, hides and skins, jute raw and manufactured, seeds (oil chiefly), tea, wool. Of shipping, about 9000 vessels, with a tonnage of between 16,300,000 and 17,000,000 tons, enter the ports annually; of these almost the whole are British. All this is exclusive of the coasting trade, valued at 70 millions annually. The length of railways open is over 33,000 miles, largely state lines (25,000 miles), the rest mainly guaranteed and assisted by the state. There are 73,000 miles of telegraphs. Of the total length of roads in India (200,000 miles) about one-third has been bridged and macadamised. The manufactures, whether in metals or in fibres, have always been very fine, and are still maintained. The local manufactures of cotton goods are very extensive; but foreign trade in the 19th and 20th centuries checked the development of indigenous manufactures, while it has stimulated new manufactures, especially in jute and cotton. The total length of the irrigation canals and their branches is calculated at 20,000 miles. The irrigated area in its grand total is reckoned at 43 millions of acres, of which over 20 millions are watered from canals. Owing to extensive failures of the monsoon rains at periodically recurring intervals, droughts and famines have occurred. In years of plenty a sum varying from 1 to 1½ million sterling is set aside out of current income to meet the cost of relieving distress in time of famine. The revenue of the empire has increased from £60,419,138 in 1891–92 to £81,448,000 in 1911–12, the expenditure from £59,107,699 to £78,698,000. The total debt in 1912 was £276,282,000, largely incurred for railways and for irrigation works. The depreciation of the rupee has greatly embarrassed Indian finance; it is now fixed at 1s. 4d., or Rs.15 = £1. The largest item of taxation is the land-tax (20 millions); the next—destined soon to disappear—opium (7½), salt (3), and smaller amounts for stamps, excise, customs, &c. Owing to the excessive density of population in several parts of the empire, government has for many years past encouraged and facilitated emigration to the tropical and sub-tropical colonies. In the decade ending 1905, about 100,000 Indians emigrated as coolies to Mauritius, Natal, British Guiana, British West Indies, Fiji, French West Indies, and Surinam. There is also migration from the central regions to the rice-plains of Burma, and to the tea-plantations in Assam and in the Eastern Himalayas.

It is impossible to speak positively as to the aboriginal prehistoric populations of India; probably the most primitive peoples now left—the Dravidian hill-tribes represented by the Gonds, and Kolarians such as the Santals and Bhils—represent waves of invasion from the north. The history of civilisation in India may, however, be traced from the invasion—probably 1000 years or more B.C.—of the Aryan race from Central Asia, a race of the Indo-Germanic type in physique and speech. Their language was Sanskrit, their religion and civilisation that of the Vedas or ancient Hindu Scriptures. Out of the union of the Aryans with the earlier inhabitants, the modern races of India have sprung. Buddhism arose in India with the teaching of Buddha about 500 B.C., and for a while superseded the Vedic faith, corrupted as it had been by the degraded aboriginal superstitions; and India was substantially Buddhist till the revival of Hinduism, in its modern or Brahmanic form (more idolatrous and superstitious than the ancient faith), in the 6th century A.D. In 1001 A.D. came the first wave of Mohammedanism, and soon all India fell under Mohammedan domination, though the bulk of the people clung to the Hindu religion. By the beginning of the 18th century a new Hindu power, that of the Mahrattas, arose, and seriously weakened the Moslem emperor, the Grand Mogul. The Dutch, Portuguese, and French, as well as the British established themselves in the empire; in the 18th century the French more than rivalled the British in power. But the power of the British East India Company, originally traders, became dominant after the battle of Plassey in 1757. Gradually English power as represented by the Company, its diplomatists, and its soldiers, extended over great part of India, and the governors—Clive, Warren Hastings, Wellesley, Amherst, Bentinck, Dalhousie, Canning—consolidated what was really the empire of Britain in the East. Then in 1857 came the great mutiny, stamped out in blood, and the government was assumed by the British crown in 1858. British rule in India has been steadily consolidated, but no great annexation has since taken place, except that of Upper Burma in 1886.

See the *Imperial Gazetteer of India* (2d ed. 1887), Sir W. Hunter's *India* (3d ed. 1893), and works on India by Campbell, Monier Williams, Temple, Tupper, Strachey, Cotton, Holdich Chirol (1910); for history, Mill, Thornton, Marshman, Wheeler, Keene, Boulger, Frazer, Hunter, Steel; and for the Mutiny, Kaye, Malleson, Forrest (1904–12).

Indiana, thirty-seventh state of the American Union in area, and ninth in population, lies between Lake Michigan, Michigan state, Ohio, Kentucky (and the Ohio River), and Illinois. Its greatest length (N. and S.) is 276 miles, its average breadth 140 miles, and its area 36,350 sq. m. The surface has a slight slope towards the west and south-west, the highest point, near the eastern boundary, being 1250 feet above sea-level. Drainage is in four main directions: to Lake Michigan, to Lake Erie, to the Mississippi, and to the Ohio. The northern half of the state is generally level, except for occasional irregular ridges forming 'divides' between streams. Hills increase in frequency from the centre of the state to the south and south-east, and along the Ohio 'knobs' 200–500 feet high are almost continuous, with deep gorges and river-bottoms between. Much of the north-western regions is flooded most of the year; but this land is being actively reclaimed by drainage. The fertility of the soil, whether clay or sandy loam, is greatly increased by a vast system of under-draining. The minerals include coal, bog and hematite iron ores, and stratified limestones and sandstones in abundance, ochre beds, kaolin, fireclays, and some gold. The actual workable coalfield covers an area of 6000 sq. m. The natural-gas field, the centre of which is in Delaware county, 40 miles NE. of Indianapolis, has been largely developed since 1886. In the gas region, and in the districts within reach of its pipes, it is used both as fuel and as illuminant. The principal industry of Indiana is agriculture. More than 17,000,000 acres are cultivated, the chief crops being maize, wheat, and oats, with barley, rye, flax, hay, potatoes, sweet potatoes, and tobacco. Wool, honey, maple-sugar, sorghum-sugar, cider, and wine are also largely produced. Among the largest manufactories are the wagon and plough factories at South Bend, the manufactories of flour-mill machinery and carriages at Indianapolis, the plate-glass works at New Albany, and the encaustic tile works at Indianapolis. Indianapolis is great in pork-packing and in making sofas and other furniture. There are some 7500 miles of railway in the state. The Wabash and Erie Canal, the largest in the United States (476 miles), has 374 miles in Indiana. The Ohio is here navigable throughout; the Wabash is navigable to Lafayette. The pop. of Indiana (known as the 'Hoosier state,' *Hoosier* being a nickname for an inhabitant of Indiana) in 1800 numbered 4577 whites and 163 coloured, 135 of the latter being slaves. In 1860 the pop. was 1,350,428; in 1880, 1,978,301; in 1910, 2,700,876. Indianapolis had in 1910 233,650 inhabitants, Evansville had 70,000, Fort Wayne 64,000, Terre Haute 58,000, and South Bend 53,700. In the state university at Bloomington, the Purdue University and state institute of technology at Lafayette, and the state normal school at Terre Haute, as well as a hundred high schools, instruction is free. Not under state control are some fifteen universities and colleges, and numerous academies and special schools. Indiana was discovered by La Salle in 1671; in 1763 France ceded the country to Great Britain: by the treaty of 1783 it became a part of the United States; and in 1816 it was admitted to the Union.

Indianap'olis, the capital of Indiana, on the west fork of White River, in a level plain, 195 miles SSE. of Chicago by rail. It is a regularly-built and beautiful city. Its streets, many of them 100 feet wide, for the most part cross at right angles; but four main avenues, radiating from a central park, cross the others diagonally. There are a state capitol and federal building, a university and several colleges, public library, a city-hall, the Propylæum (a women's literary institute), asylums for the insane, blind, &c., besides an imposing monument to those who fell in the civil war. Indianapolis is a great railway centre, fifteen main lines converging here. The trade in agricultural produce is very considerable. Pork-packing is the leading industry, but there are also large flour and cotton and woollen mills, numerous foundries, and manufactories of furniture, carriages, tiles, &c. The site of Indianapolis, then covered with dense forest, was selected for the future capital in 1820, and the city was founded in 1821. Pop. (1860) 18,113; (1880) 75,056; (1900) 169,164; (1910) 233,650.

Indian Ocean, bounded W. by Africa, N. by Asia, E. by Australia and the Australasian Islands, according to modern geographers is limited to the S. by the 40th parallel of south latitude, in which region it opens widely into the Southern Ocean. It gradually narrows towards the north, and is divided by the Indian peninsula into the Bay of Bengal on the east and the Arabian Sea on the west, the latter sending northward two arms, the Persian Gulf and the Red Sea. Within these limits the Indian Ocean has an area of 17,320,500 sq. m. Its mean depth is about 2300 fathoms, or slightly greater than that of the Atlantic. The greatest depths are in the eastern part to the south of the equator, where there are fully 50,000 sq. m. with a depth of over 3000 fathoms. The area of land draining into the Indian Ocean is 6,813,600 sq. m., and the annual rainfall on this land is equal to 4379 cubic miles of water. The rivers flowing from the Asiatic continent are by far the most important, and they carry an immense amount of detrital matter into the Bay of Bengal and Arabian Sea, these forming extensive deposits of blue mud. The temperature of the surface waters varies much in different parts of the ocean, and at the same place at different times of the year or states of the wind. In tropical regions the temperature usually varies from 70° to 80° F., and the yearly range is only 7° or 8° F. Off the Cape of Good Hope and off Cape Guardafui, however, the annual range of temperature may be from 20° to 30° F. The temperature of the water at the bottom of the Indian Ocean is very uniform, and subject to little, if any, annual variation. In the Bay of Bengal and Arabian Sea temperatures of 33°·7 F. and 34°·2 F. have been recorded at the bottom; these are not more than the fraction of a degree higher than those observed by the *Challenger* in 50° of south latitude. It is certain, therefore, that this deep cold water is slowly drawn into the Indian Ocean from the Antarctic to supply the place of the warm surface currents that are driven southward by the winds. The currents of the Indian Ocean are less constant than in the other great oceans, and are largely controlled by the direction and strength of the monsoons. Some of the most characteristic coral atolls and islands are to be found towards the central part of the Indian Ocean, such as the great Maldive group, the Chagos, Diego Garcia, and the Keeling Islands. Almost all the tropical shores are skirted by fringing and barrier reefs. Christmas Island is an upraised coral formation. St Paul's, Mauritius, Rodriguez, and others are of volcanic origin, while Madagascar, Ceylon, and Socotra are typical continental islands.

Indian Territory, a portion of the region originally set apart by the United States government as a home for Indian tribes, is bounded by Kansas, Missouri, Arkansas, Texas, and in 1906 was incorporated with Oklahoma, then made into a state. The Cherokee Outlet, S. of Kansas, was sometimes described as a part of Indian territory, although it was really in the former Oklahoma territory. The area, not including the Cherokee Outlet, is 31,000 sq. m. The surface of the territory consists mainly of rolling prairie land rising gradually from the south-east toward the N. and W. In the south-east the surface is broken by low ranges of the Ozark Mountains which cross the Arkansas border. In the south-west are the Arbuckle Mountains. The mineral resources are practically undeveloped, but coal, copper, iron, marble, and building-stones are known to exist in considerable quantities. The territory is well watered, and is drained by the Red and Arkansas Rivers and their numerous tributaries. The river-bottoms are wide and fertile, subject to overflow in the spring. The Indian Territory, designed for occupation by all the tribes east of the Mississippi, originally extended west to 100°, and included portions of Kansas and Nebraska. In 1833 and 1834 the Creeks, Choctaws, Chickasaws, and Cherokees were removed hither; the Seminoles in 1838, and portions of tribes from west of the Mississippi have been subsequently settled there. By purchase or consent of the Indians the territory has been gradually reduced to its present limits, Oklahoma (q.v.) having been thrown open in 1890. Most of the tribes have made considerable progress in civilisation, and have farms, schools, churches, &c. Pop. (1900) 392,060, of which total 97 per cent. was distributed amongst four of the Indian civilised nations. In 1910 the total, Indian and other, in the same area was about 685,000.

Indigirka, a river in the Siberian government of Yakutsk, rises in a western offset of the Stanovoi Mountains, and flows 870 miles northward through a frozen desert to the Arctic Ocean.

Indo-China, the eastern of the two great Asiatic peninsulas which extend southwards into the Indian Ocean, sometimes called Further India. It is washed on the east by the Gulfs of Tongking and Siam and the Chinese Sea, and on the west by the Bay of Bengal. For its various states see ANNAM, BURMA, CAMBODIA, COCHIN-CHINA, MALACCA, SIAM, and TONQUIN.—The term *Indonesia* is sometimes used for the Indian Archipelago, the islands to the SE. of Asia.

Indore, a Mahratta principality of India, comprising the territories of the Holkar dynasty, and consisting of several detached tracts, covers an area of 8402 sq. m. The bulk of it lies between Sindhia's dominions on the north and Bombay Presidency on the south. It is traversed from east to west by the Nerbudda, which almost bisects it; by the Vindhya Mountains, here 2500 feet above the sea; and by the Satpura Mountains. Principal products, poppy, cotton, tobacco, wheat, rice, millets, &c.; principal industries, cotton and opium manufacture. Pop. (1911) 979,360. The state was founded about the middle of the 18th century; in 1818 its ruler became a feudatory of the British Indian empire.—INDORE, the capital, is situated in 22° 42′ N. lat. and 75° 54′ E. long., 1786 feet above sea-level. Population, 69,000, mostly Hindus. During the revolt of 1857, though the maharaja remained faithful, his troops mutinied, holding their prince a prisoner in his own palace, and butchering many Europeans.

Indre, a French dep., formed principally out of the western portion of the old province of Berri, lies immediately south of the dep. of Loir-et-Cher. Area, 2623 sq. m. Pop. (1872) 277,693; (1911) 287,673. The dep. is quite flat, and well watered by the Indre (which flows, from the dep. of Creuse, 152 miles north-westward to the Loire) and the Creuse. The dep. is divided into four arrondissements—Châteauroux (the capital), Le Blanc, Issoudun, and La Châtre.

Indre-et-Loire (*Angdr-ay-Lwar*), a dep. of France, formed chiefly out of the ancient province of Touraine, is crossed by the Loire from NE. to SW. Area, 2360 sq. m.; pop. (1872) 317,027; (1911) 341,205. The dep. is watered by the Loire and its tributaries, the Cher, Indre, and Vienne, all of them navigable. It is divided into the three arrondissements of Tours (the capital), Chinon, and Loches.

Indus (Sansk. *Sindhu*), a river of India, whose source was discovered by Sven Hedin in 1907, N. of the Trans-Himalayan range, NE. of the Tseti-lachen-la, 16,946 feet above sea-level. Its general course is at first north-westward, through Tibet and Cashmere, where it turns abruptly south-south-westward, and follows that direction right down to the sea. In the mountains its current is very rapid; the river passes through wild gorges (one in north-west Cashmere, having a depth of 10,000 feet), and is liable to tremendous floods. The Indus enters the Punjab 812 miles from its source. Near Attock (q.v.), 48 miles lower down, it receives the Kabul River from Afghanistan, and then becomes navigable; 450 miles below Attock it receives, on the left, the accumulated waters of the Punjab through the single channel of the Panjnad. Each of the 'five watercourses,' as well as the Kabul, is practicable for inland craft to the mountains. Below its confluence with the Panjnad the Indus, instead of increasing in volume, becomes gradually less. Its basin is narrow, and the affluents are insignificant, while there is a great loss by evaporation. The river also divides into numerous channels, many of which become lost in the sand, while others return much shrunken in volume. The delta of the river covers an area of about 3000 sq. m., and extends for 125 miles along the Arabian Sea. The main channel is constantly shifting. The delta is bare and not fertile. In both Punjab and Sindh the bed of the river is littered with islands and sandbanks. The cultivation of the arid plains through which the lower Indus passes is dependent upon the annual overflow of the river and artificial irrigation. The total length of the river is over 1800 miles, and the area of its drainage basin 372,700 sq. m. The Indus abounds with excellent fish, and is infested by crocodiles. Since the opening of the Indus Valley Railway in 1878 the navigation has been greatly superseded.

Ingatestone, a town of Essex, 5 miles NE. of Brentwood. Pop. 2000.

Ingleborough, a mountain (2373 feet) in the West Riding of Yorkshire, 8 miles NW. of Settle. On its south skirt is a splendid stalactite cave, penetrating nearly a thousand yards, and mainly discovered in 1837.

Inglewood Forest, Cumberland, a former royal forest between Carlisle and Penrith.

Ingolstadt (called *Aureatum* and *Chrysopolis*—i.e. 'the golden city'), a fortified town of Bavaria, on the Danube's left bank, 53 miles by rail N. of Munich. It contains two castles of the former dukes of Bavaria-Ingolstadt (now used for military purposes); the Gothic church of Our Lady (1425); and the former Jesuit college. Brewing, cannon-founding, and the manufacture of gunpowder and salt are the only industries. Pop. 23,690, mostly Roman Catholics. A university founded here in 1472, reckoned Reuchlin among its professors, and a century after its foundation had 4000 students. It was removed to Landshut in 1800, and to Munich in 1826. Ingolstadt was the first German town at which the Jesuits were permitted to teach publicly; Loyola called it 'his little Benjamin.' Dating the 9th century, it was first fortified in 1539. In 1827 the fortifications, destroyed by the French in 1800, were restored upon a first-class scale, and have since been strengthened.

Inhamba'ne, the Portuguese capital of a district on the east coast of Africa, lies just south of the tropic of Capricorn, beautifully situated on its bay, but unhealthy. Pop. 2500, of whom only 70 were Europeans.

Inishail, an islet in Loch Awe, with remains of a nunnery. Here Mr Hamerton pitched his camp in 1857.

Inishannon, a village of County Cork, on the Bandon, 16 miles SW. of Cork city.

Inishmore, one of the Aran Islands (q.v.).

Inkermann, a village in the Crimea, situated near the eastern extremity of the harbour of Sebastopol. Here, on 5th November 1854, was fought the 'Soldiers' Battle,' when 8000 British sustained a hand-to-hand fight against six times that number of Russians, till 6000 French came to their aid, and completed the rout of the enemy.

Inn (anc. *Œnus*), the most important Alpine affluent of the Danube, rises in the south of the Swiss canton of Grisons, and flows 317 miles north-east through the Engadine, and onwards through Tyrol and Bavaria, to its junction with the Danube at Passau.

Innellan, an Argyll village, on the Firth of Clyde, 3¾ miles S. by W. of Dunoon. Pop. 980.

Innerleithen, a police-burgh (1869) of Peeblesshire, near the Tweed's left bank, 6 miles ESE. of Peebles, and 12 W. of Galashiels. Its first woollen-factory was established in 1790, about which time its saline spring (Scott's 'St Ronan's Well') came into celebrity; but the great extension of its woollen industry dates from fifty years later. Pop. 2600.

Innsbruck, the capital of Tyrol, 109 miles by rail S. of Munich, stands on the Inn at its junction with the Sill, 1880 feet above sea-level, surrounded and overhung by mountains 7500 to 8500 feet high. It is a beautiful place, with broad tree-shaded streets, arcaded shops, and four squares adorned with statues. The Franciscan church, or Hofkirche, built in the Renaissance style in 1553–63, contains a beautiful and elaborate cenotaph to the Emperor Maximilian I. It consists of a marble sarcophagus supporting the emperor's kneeling effigy in bronze; while on both sides of the aisle are twenty-eight bronze figures of royal personages, by Peter Vischer and others. In the same church are monuments to Andreas Hofer and to the Tyrolese who fell in the wars against France (1796–1809). Other buildings are the imperial castle, built by Maximilian I. and restored by Maria Theresa in 1766–

70; the 'Golden Roof Palace;' the national museum, the Ferdinandeum; and the university (1677, reorganised 1826), with over 1300 students, 150 professors and lecturers, a library of 200,000 volumes, a botanical garden especially rich in Alpine flora, laboratories, &c. Amongst the eight monasteries is the first that the Capuchins founded in Germany (1594). A colossal statue of Hofer was unveiled in 1893. Innsbruck manufactures cloth, machines, glass, and stained glass. Population, 54,000, including the suburbs of Hötting and Wilten. The Romans had here their principal colony in Rhætia. From 1180 the town belonged to the Counts of Meran; in 1363 it passed with Tyrol to Austria.

Inowraclaw (*I-nov'ratz-lav*), Inowrazlaw, or Jung Breslau ('Young Breslau'), a town of Prussia, near the frontier of Russian Poland, 66 miles NE. of Posen. It carries on salt-mining, ironfounding, &c. Pop. 28,000.

Insterburg, a town of East Prussia, on the Angerap River, 55 miles E. of Königsberg, had its origin in a castle of the Teutonic knights, built in the 14th century. It has important manufactories. Pop. 30,000.

Interla'ken ('between the lakes'), a Swiss village in the Aar's beautiful valley, between Lakes Thun and Brienz. Pop. 3000.

Invera'ray, the county town of Argyllshire, is picturesquely seated on the north-west shore of Loch Fyne, 16 miles SSW. of Dalmally station, and 45 NNW. of Greenock (*viâ* Loch Eck). Removed to its present site in 1742, it has a sculptured stone cross from Iona (*c.* 1400), and an obelisk to seventeen Campbells, executed here without trial in 1685 for their share in Argyll's expedition. Inveraray Castle, the Duke of Argyll's seat, was rebuilt in 1744–61. A royal burgh since 1648, Inveraray with Ayr, &c. returns a member. Pop. (1841) 1233; (1911) 533.

Inverbervie. See Bervie.

Invercar'gill, a town in Southland land-district, New Zealand, capital of the county of Southland, stands on an estuary called the New River Harbour, 139 miles by rail SW. of Dunedin. It has fine wide streets, trams, public parks, the government buildings, an athenæum, a hospital, sawmills, foundries, steam flour-mills, breweries, manufactures of boots, bacon, cordials, extensive meat-freezing works, &c. Pop. 16,000.

Inveresk. See Musselburgh.

Invergordon, a seaport and police burgh of Ross-shire, on the NW. shore of the Cromarty Firth, 12¾ miles NE. of Dingwall. Pop. 1050.

Inverkeithing, a royal burgh of Fife, at the head of Inverkeithing Bay, 13 miles WNW. of Edinburgh. With Stirling, &c., it returns one member to parliament. Pop. 3300.

Inverloch'y, a ruined castle of Inverness-shire, 2 miles NE. of Fort William, near which on Sunday, 2d February 1645, Montrose completely routed his rival, Argyll.

Inverness', the county town of Inverness-shire, and capital of the northern Highlands, stands on the Ness, near its mouth in the Moray Firth and the north-east end of the Caledonian Canal, 108 miles by rail WNW. of Aberdeen, 144 NNW. of Perth, and 190 NNW. of Edinburgh. Its wooded environs, hemmed in by hills (Tomnahurich, 223 feet; Torvean, 300; Craigphadrick, 430; Dunean, 940, &c.), form a picturesque and interesting landscape. Visited by Columba about 565, and by Malcolm Canmore made the seat of a royal castle, by Cromwell of a citadel (1652), Inverness has a wealth of memories. It was garrisoned by the English in 1296; in 1411 was burned by Donald of the Isles on his way to Harlaw; and figures repeatedly in the history of the Stuarts, down to their final overthrow at Culloden, hard by. In front of the Scoto-Flemish town-hall (1882), protected now by a fountain, is the Clach-na-Cudain, or 'stone of the tubs,' the palladium of the burgh. The Episcopal cathedral (1867) is a fine Decorated edifice; other features of the place are the county hall (1835) on the site of the castle, the infirmary (1804), the lunatic asylum (1860), the royal academy (1792), barracks (1884), the suspension bridge (1855), and the Islands, a favourite promenade. Malting, thread-making, and bleaching have given place to woollen manufacture, shipbuilding, distilling, &c., with considerable shipping and commerce, the harbour having been much improved in 1847. The great wool fair (established in 1817) is held in July; and the Northern Meeting (1788) in September. A royal burgh since about 1067, Inverness unites with Forres, Fortrose, and Nairn to return one member to parliament. Pop. (1831) 9663; (1911) 20,579 (parliamentary), 22,216 (municipal); one-fourth Gaelic-speaking, though Inverness still is famous, as in Defoe's and Dr Johnson's day, for the purity of its English.

Inverness-shire, a Highland county, the largest in Scotland, and larger than any in England but Yorkshire, stretches from sea to sea, and has a total area of 4211 sq. m., of which 1216 belong to the Hebrides—Skye, Harris, North and South Uist, Benbecula, Barra, Raasay, Eigg, St Kilda, and about forty other inhabited islands. The mainland portion, measuring 85 by 55 miles, is intersected NE. and SW. by the Great Glen and the Caledonian Canal (q.v.). It includes Badenoch, Glenroy, and the valley of the Spey on the east; Lochaber on the south; Glenelg, Glengarry, Arasaig, and Moidart on the west; Strathglass on the north; Glenurquhart and Glenmoriston towards the centre. It is truly a 'land of the mountain and the flood,' for it contains Ben Nevis (4406 feet), the highest point in Britain, with twenty-six other summits exceeding 3500 feet, whilst the chief of its rivers are the Spey, Ness, and Beauly, and of ninety good-sized lakes Lochs Ness, Archaig, Shiel, Lochy, Morar, Laggan, and Ericht. The west coast is indented by salt-water Lochs Hourn, Nevis, and Moidart. Only 4·6 per cent. of the whole area is in cultivation; and 255 sq. m. are under wood, the rest being sheep-walks, deer-forests, moss, and barren heath, valuable only as grouse-moors. Sheep, numbering some 700,000, are the principal live-stock; and there are five deer-forests of 50 sq. m. and upwards. The rivers and lakes afford splendid fishing. The county returns one member to parliament. Inverness is its only town of any size; Kingussie and Fort William, though police-burghs, are mere villages, as also are Beauly, Fort Augustus, and Portree. Pop. (1801) 72,672; (1841) 97,799; (1911) 87,272, or less than twenty-one inhabitants per square mile.

Inversnaid, a place on the east shore of Loch Lomond, 3 miles NE. of Tarbet.

Inverugie (*g* hard), a ruined castle of Aberdeenshire, 3 miles NW. of Peterhead. It was the birthplace of Marshal Keith.

Inverurie, a royal burgh of Aberdeenshire, at the influx of the Urie to the Don, 16 miles NW. of Aberdeen. With Elgin, &c. it returns one member to parliament. Pop. 4000.

Iona, the most famous of the Hebrides, 1¼ mile W. of the south-western extremity of Mull. Its modern name is believed to have originated in a mistaken reading of *n* for *u;* the word in the oldest manuscripts being clearly written *Ioua.* From the 6th century to the 17th century the island was most generally called *I, Hi, Y,* &c.—that is, simply, 'the island;' or *Icolmkill, I-Columb-Kille,* &c.—that is, 'the island of Columba of the church.' It is 3½ miles long, 1½ mile broad, and 3½ sq. m., or 2264 acres in area, of which more than a fourth is under tillage. Dunii, the highest point, is 327 feet above the sea. Pop. 200. In 563 St Columba sailed from Ireland for Iona with twelve disciples. Having obtained a grant of the island, he built upon it a monastery, which was long regarded as the mother-church of the Picts, and was venerated not only among the Scots of Britain and Ireland, but among the Angles of the north of England, who owed their conversion to the self-denying missionaries of Iona. Neither piety nor learning availed to save it from the ravages of the fierce and heathen Norsemen, who wasted it and massacred the monks in 795, 802, 806, 825, and 986. About 1074 the monastery was repaired by St Margaret, the queen of Malcolm Canmore; and in 1097 it was visited by King Magnus Barefoot of Norway, of which kingdom it now formed part. In 1203 a Benedictine monastery was founded here, and a Benedictine (afterwards Augustinian) nunnery. In 1506 Iona became the seat of the Scottish Bishop of the Isles, the abbey church being his cathedral. St Oran's Chapel, now the oldest church in the island, may probably be of the latter part of the 11th century. The Cathedral, or St Mary's Church (*c.* 1203), has a choir, with a sacristy on the north side, and chapels on the south side; north and south transepts; a central tower, 70 feet high, and a nave. On the north of the cathedral are the chapter-house and other conventual remains. The ruin was given by the Duke of Argyll to the Church of Scotland in 1899, and in 1902–5 partly restored. See books by the Duke of Argyll (1871), Macmillan (1898), and others.

Ionia, the ancient name of the coast districts and islands of western Asia Minor.

Ionian Islands, a group, or rather chain, of about forty islands, stretching along the west and south coasts of Greece. Corfu (Corcyra), Paxo, Santa Maura, Ithaca (Theaki), Cephalonia, Zante, and Cerigo (Cythera) are the largest, and are all separately noticed. Total area, 1010 sq. m.; the population is about 260,000, mostly of Greek descent. The surface is generally mountainous, the plains and valleys being fertile. The collective term 'Ionian' is of modern date. In 1081 Corfu and Cephalonia fell into the hands of Robert Guiscard; from 1401 Corfu and most of the other islands came into the possession of the Venetians, who retained them until 1797, and then ceded them to France. They were seized by Russia and Turkey in 1799; and created the Republic of the Seven United Islands, under the protection of Turkey. But in 1807 they were given back to France. In 1809 Great Britain seized Zante, Cephalonia, and Cerigo, in 1810 Santa Maura, in 1814 Paxo, and after Napoleon's fall Corfu; in 1815 were constituted the United States of the Ionian Islands, under the protectorate of Great Britain; and in 1863 they were incorporated in Greece—after which their prosperity declined. There have been great earthquakes, as in 1867 and 1893. See works by Ansted (1863), Kirkwall (1864), Von Warsberg (Vienna, 1878–79), and Riemann (Paris, 1879).

Io'wa, one of the United States of America, with an area of 56,025 sq. m., is bounded by Minnesota, the Mississippi River, the state of Missouri, and the Missouri and Big Sioux rivers. The climate is continental, with cold winters, hot summers, and sudden changes of temperature; the autumns are beautiful and of long duration; and Iowa is noted for its healthfulness. The surface is a rolling prairie; there are no mountains, and hills or bluffs can only be found along the principal streams. The average elevation is not far from 900 feet; the highest point 1694 feet. Iowa has extensive and valuable mineral deposits, as coal, lead, gypsum, limestone, clay, and mineral paints. The coal, which is bituminous and of good quality, extends over an area of nearly 20,000 sq. m., and above 4 million tons are raised annually. There are several small lakes in the north. Iowa is pre-eminently an agricultural state, its fertile soil producing vast quantities of maize, wheat, oats, with barley, flax, buckwheat, rye, hay, sorghum, potatoes, butter, cheese, wool, and eggs. Nearly 98 per cent. of the total land area is under farms. The importance of live-stock in the state results in the growth of large quantities of hay and other forage crops. Manufactures are comparatively unimportant, the principal industries, after agriculture, being meat-packing and the preparation of other food-products. Amongst the principal exports are, besides agricultural and dairy products, considerable quantities of coal, gypsum, and lead. The territory of the state formed part of the 'Louisiana Purchase' (see LOUISIANA). Iowa was organised as a territory in 1838, and as a state in 1846. Pop. (1850) 192,214; (1880) 1,624,615; (1911) 2,224,771. The capital is Des Moines (pop. over 86,000); and there are four other cities with over 30,000 (Dubuque, Davenport, Sioux City, and Cedar Rapids).

Iowa City, capital of Johnson county, Iowa, and the seat of government from 1839 to 1856, is situated on the Iowa River, 120 miles by rail E. of Des Moines. The old capitol is now the state university. Pop. 10,000.

Ipsambul. See ABU-SIMBEL.

Ipsden, an Oxfordshire parish, close to the Chilterns, 4 miles SE. of Wallingford. Charles Reade was a native.

Ipswich, the county town of Suffolk, a parliamentary, municipal, and county borough, 69 miles NE. of London by rail, is situated on the side of a hill on the left bank of the river Gipping, which, taking here the name of the Orwell, becomes tidal, and after a south-easterly course of 12 miles more falls into the German Ocean at Harwich. In the older portions of the town, principally grouped near the river, the streets are narrow and irregularly built, and still retain many picturesque old buildings, decorated with carved work, such as Sparrowe's House (1567), the Neptune Inn (1639), Archdeacon's Place (1471), and Wolsey's Gateway (1528). Of public buildings the principal are a town-hall (1868), in the Italian Renaissance style of architecture, surmounted by a clock-tower 130 feet high; post-office (1881), and corn exchange (1882), both close by, and in the same style; public hall (1868); museum, schools of science and art, and free library (1881–87), the first of which, founded in 1847, is notable for its splendid collections of Suffolk Crag fossils and British birds; custom-house (1845); mechanics' institute (1824); hospital (1835–69–77); artillery and militia barracks; a theatre (1891), in whose predecessor Garrick, Mrs Keeley, and Mr Toole made their début; St Mary Le Tower, with a spire 176 feet high, and a fine peal of twelve bells; and the grammar-school (*c.* 1477; reorganised by Queen Elizabeth in 1565, rebuilt in 1851, and reconstituted in 1881). Near it are two arboretums, charmingly laid out, and Christchurch Park, with its fine Tudor mansion (1549). Another favourite resort is the promenade by the river-side, skirting the west side of the dock. This latter, opened in 1842, covers 30 acres, and is approached from the Orwell by an entrance lock (1881) capable of admitting vessels of 1400 tons. The principal manufactures are those of agricultural implements, railway plant, artificial manures, and clothing. Cardinal Wolsey was a native, and Gainsborough a resident for fifteen years. Ipswich has returned two members to parliament since 1447. Pop. (1801) 11,336; (1841) 25,264; (1911) 73,932. See works by Clarke (1830), Wodderspoon (1842–50), Glyde (1850–87), and Dr J. E. Taylor (1889).

Ipswich, a town of Queensland, on the Bremer, 23 miles W. of Brisbane by rail. It stands in a rich coal-mining district. Pop. 18,600.

Iquique (*Ee-kee'kay*), the port and capital of the Chilian territory of Tarapacá (Peruvian till 1881). It works ores from neighbouring silver-mines, and exports nitrates. Pop. 45,000.

Iquitos, a town in the Peruvian dep. of Loreto, on the left bank of the Marañon, 75 miles above the mouth of the Rio Napo. Pop. 8000.

Irak-Ajemi, a central region of Persia, nearly coincident with ancient Media. Area, 138,190 sq. m.; pop. 1,000,000.

Irak-Arabi (Arabian Irak), the most south-easterly district of Turkey in Asia, almost conterminous with ancient Babylonia, lies between the lower courses of the Tigris and the Euphrates. Pop. 2,000,000.

Iran, or ERAN, originally the great Asian plateau bounded N. by the Hindu Kush and the Elburz, E. by the Indus, S. by the Persian Gulf, and W. by Kurdistan and the Tigris. The term is now the official designation of Persia.

Irawadi, or IRRAWADDY, the principal river of Burma, whose head-streams were long confused with the upper waters of the Sanpo or Brahmaputra and the Salwen, seems to rise within the Chinese frontier. In 25° 50′ N. lat., a short distance above Bhamo, two arms, the Malikha and the N'mai-kha, unite to form the river that is undoubtedly the Irawadi of Burma. From Bhamo the Irawadi winds 700 miles southward, throughout navigable for small boats, in spite of islands, sandbanks, and two rock-bound defiles. Its waters are muddy and its current generally rapid. Before reaching the sea, in nearly a dozen mouths, in the west of the Bay of Martaban, the river spreads out in a wide delta, 18,000 sq. m. in extent. Of its mouths two only are used by sea-going vessels, the Bassein on the west and the Rangoon on the east. The valley and plain of the Irawadi are very fertile, and grow vast quantities of rice. The river is the chief artery of the country: on its banks stand the principal towns, Bassein, Rangoon, Prome, Ava, Mandalay, Bhamo; its banks were the home of Burmese civilisation; its waters have served as the main means of communication not only to the interior of Burma, but to the south-western provinces of China and of Tibet. The river drains at least 158,000 sq. m. Its largest affluent, coming from the right hand, is the Chindwin. This and the two left-hand tributaries, the Shweli and Myitnge, are alone navigable. The plain for 150 miles from the sea, being liable to inundations, has been protected by embankments since 1863.

Irbit, a town of the Russian government of Perm, 1170 miles nearly due E. of St Petersburg. Its February fair is next in importance to that of Nijni-Novgorod. Pop. 20,000.

Ireland, an island forming part of the United Kingdom of Great Britain and Ireland, is washed on the N., W., and S. by the Atlantic, and on the E. by the North Channel (13 miles wide), the Irish Sea (138 miles), and St George's Channel (47 to 69 miles), which separate it from the larger island of Great Britain. Its greatest length is 302 miles; its average breadth 110 miles. *Eirinn* was known to the Greeks as *Ierne*, to the Romans as *Hibernia* and *Juverna*, in the 6–13th centuries as *Scotia* and the 'Isle of Saints.' It is divided into the four provinces of Ulster, Leinster, Munster, and Connaught, and subdivided into thirty-two counties. The total area is 20,819,928 acres, or 32,531 sq. m., or nearly two-thirds of that of England without Wales. In 1801 the pop. was 5,395,456 (166 per sq. m.); in 1841, 8,175,124 (251 per sq. m.); in 1911, after a steady decrease from emigration, only 4,390,219 (135 per sq. m.).

In 1911 there were eight towns with pops. over 20,000 (Dublin 304,802, and Belfast 386,947). There are about 600,000 persons of Irish birth in England and Scotland, 1,350,000 in the United States, 200,000 in Australia, 10,000 in the Cape, and in Canada 1,000,000 persons of Irish origin. In 1851–1910, 4,187,443 persons emigrated from Ireland, over three-fourths to the United States.

The surface of Ireland is, generally speaking, an undulating plain, relieved, more particularly towards the coasts, by detached groups of low hills. The principal ranges are the Mourne Mountains in Down, which attain their highest elevation in Slieve-Donard (2796 feet); the mountains of Wicklow, which rise in Lugnaquilla to a maximum height of 3039 feet; and Macgillicuddy's Reeks, in Kerry, their highest peak, Carran-Tual (3414 feet), being the loftiest in all Ireland. The mountains are built up of relatively hard crystalline schists and disturbed Lower Palæozoic rocks, while the low grounds are nearly co-extensive with less indurated and comparatively undisturbed Upper Palæozoic strata. The interior and larger portion of the island is quite flat, its centre being only 250 feet above the sea; it belongs almost exclusively to the carboniferous system. Ireland is not rich in minerals, but some coal (about 100,000 tons a year), a little iron, lead, besides salt, stone, limestone, &c. are wrought. The coasts on the N., W., and S. are in many places rocky and high, and indented with deep inlets, many of which form admirable harbours. The islands are small. Bogs or morasses occupy altogether 1,772,450 acres, or nearly one-ninth of the entire area—the largest being the Bog of Allen. The principal river of Ireland, and the largest in the United Kingdom, is the Shannon (q.v.). Others are the Liffey and Boyne, the Suir, Barrow, and Nore, the Blackwater, Erne, Foyle, Bann, &c. Dublin has water-communication with the Shannon by means of the Grand (165 miles) and Royal (76) canals, and Lough Neagh with the same river by the Ulster Canal and river Blackwater. The largest lake is Lough Neagh (100,000 acres); others are Erne and Derg, also in Ulster; Conn, Mask, and Corrib, in Connaught; Allen, Ree, and Derg, expansions of the river Shannon; and the lakes of Killarney (q.v.) in Munster. The name lough is also applied to many salt-water inlets.

The climate of Ireland bears a close resemblance to that of Great Britain, but is modified by the marked difference in the configuration of the surface, the greater distance from the continent of Europe, and the fact that it is more directly influenced by the Gulf Stream drift. The mean annual temperature is 50·0° (that of England is 49·5°, that of Scotland 47·5°); and the temperature in Ireland is more equable. The eastern half of the island has a rainfall of from 30 to 40 inches, and the western half from 40 to 50 inches.

Ireland is mainly an agricultural country, but agriculture is backward, and farms and capital small; relations between landlord and tenant were very bad from of old; the landlords seldom erected buildings, repaired farmsteads, or made permanent improvements. In 1879–80 the distress amongst the poorer sections of the community reached such a pitch that in 1881 the Land Law (Ireland) Act was passed. Its principal measures were designed to protect the tenant from paying more than a 'fair rent,' and to provide for loans being made to tenants to enable them to purchase their holdings on fair and equitable terms. Several subsequent amending acts have been passed, those of 1903 and of 1909 giving increased facilities for the purchase of holdings, and providing an aid fund. The Local Government (Ireland) Act, 1898, established county councils in Ireland, reduced the poor assessment on agricultural land to half of its value, &c. Agriculture has benefited largely (especially small farms) by the development of co-operative agricultural societies, of which there were 928 in 1912, many of them being creameries. About 10,000,000 acres are permanently under grass, some 1,300,000 being devoted to cereals (oats 1,000,000, barley 158,000), 600,000 acres to potatoes, and 270,000 to turnips. The seas around the coasts of Ireland teem with fish; but, except that for salmon, the fisheries are not flourishing. The bulk of the commerce of Ireland is the exportation of agricultural produce and animals, principally to Great Britain.

Manufactures are few, except in Ulster, where linen is the staple industry; but little of the flax used is Irish-grown, most of it being now imported from Belgium, &c. Shipbuilding is centred at Belfast; and brewing and distilling are also important industries.

Ireland is represented in the imperial parliament by 28 peers elected for life in the House of Lords and 103 members in the House of Commons. The executive is vested in a lord-lieutenant, who is assisted by a chief-secretary and a privy-council (appointed by the crown). Most of the inhabitants (over 3,240,000 in 1911) belong to the Roman Catholic Church, which has four archbishops (Armagh, Dublin, Cashel, and Tuam) and 24 bishops. Until 1871 the established church of Ireland was a branch of the Church of England; since its disestablishment the Church of Ireland is presided over by two archbishops (Dublin and Armagh) and eleven bishops. Next in importance come the Presbyterians and Methodists. The most important university in Ireland is that of Dublin (q.v.) or Trinity College. The Royal University of Ireland (1880) was superseded in 1909 by the National University, with colleges in Cork, Galway, and Dublin. Queen's College, Belfast, became a university at the same time. There is a Royal College of Science (1867) in Dublin. The Roman Catholic University College is supported by private contributions. St Patrick's College, Maynooth (q.v., 1795) educates Roman Catholic priests. And there are Presbyterian theological colleges at Belfast and Londonderry. There are over 8300 elementary schools in Ireland under the Commissioners of National Education, with 680,000 enrolled pupils and an average attendance of about 500,000. Of the schools 4400 were Roman Catholic, 1500 were Protestant, and 2400 were mixed. Seven training-colleges had over 1000 students. There are 3400 miles of railway in Ireland.

In prehistoric times Ireland seems like Britain to have been inhabited by peoples of the Iberian stock, who were successively invaded and subdued by Nemedians, Firbolgs, Tuatha Dé Danann, and Scots or Milesians. Most of these invaders seem to have been Celtic, some of the Cymric (British), and some of the Goidelic branch. The Scots were distinctly Goidelic. Ultimately the resulting races, Iberian at base but Celticised by degrees, had assumed the Celtic type of civilisation and the Erse (Goidelic) language. The septs, tribes, or kingdoms were numerous, and constantly at war; though with curious permutations and combinations, some, or many of them, at times accepting the over-lordship of an Ard-righ or chief king. Irish history really begins with the christianisation of Ireland by St Patrick, a Briton of Strathclyde, early in the 5th century. In the 8th century came Danish or Norse sea-rovers, who established themselves in the east of Ireland, and, weakened by Brian Boru, and utterly defeated by him at Clontarf in 1014, were ultimately absorbed in the mass of the population. The intestinal strifes of the Irish potentates still went on as before, and led in 1167–72 to the Norman invasion. Ireland had to undergo just 100 years later, and under Henry II., the fate England underwent under Henry's great-grandfather, William the Conqueror. Much of the Irish soil was parcelled out, as England had been, amongst Norman nobles; but this change, so far from tending to consolidate Ireland into one kingdom, or into an organised province of the English monarchy, seemed but to have introduced additional elements of faction, feud, and warfare. The Norman chiefs fought with the Irish ones, and with one another; and became, as was said, 'more Irish than the Irish themselves.' Henry VII. made an effort to reduce Ireland to order on Tudor lines; rebellions, expeditions, slaughterings, and confiscations went on in the reigns of Henry VIII. and Elizabeth, the Reformation providing a new element of hostility between the English government and the Irish people. Under James I. vast confiscations took place, and great settlements, especially in Ulster, of English and Scottish immigrants. 'The massacre of 1641' was directed against these aliens. Cromwell made a re-settlement with a vengeance. The adhesion of the Irish to James II. brought William III. on them; and after the battle of the Boyne and the surrender of Limerick (1691) came the penal laws, which with many vastly more cruel provisions, debarred Catholics from all share in the Irish parliament. In 1782 the Irish Protestant parliament had greater powers and dignities conferred on it; and under Grattan's influence, the emancipation of the Catholics seemed near. But Irish hopes were blighted by the obstinacy of George III. Hereupon the society of the United Irishmen became a distinctly rebellious organisation, and fomented the short and futile rebellion of 1798. The union of the parliaments came into force in 1801. The next great events are Roman Catholic Emancipation in 1829; O'Connell's agitation for the repeal of the union, begun in 1842; the Potato Famine of 1846; the Fenian movement of 1867; Church Disestablishment (1871); Mr Gladstone's Land Act (1881); the Home Rule movement under Parnell; the Home Rule Bills of 1886, defeated in the House of Commons; of 1893, defeated in the House of Lords; and of 1912; and opposition in Ulster.

There are histories of Ireland by Darcy M'Gee (1869), Keating (1880), J. H. M'Carthy (1883), Lady E. Lawless (1888), Joyce (1893 and 1903), Walpole (1893), O'Grady (1893), O'Connor Morris (1898), and Father D'Alton (1904).

Irish Sea, between the north of Ireland and the north of England, with the south-western counties of Scotland on the north, is connected NW. with the Atlantic by the North Channel, and S. by St George's Channel. Between the coasts of Louth (Ireland) and Lancaster it has its greatest width of 150 miles; its greatest length north and south is about the same. Within it lie the Isle of Man and Anglesey.

Irkutsk, a mountainous government of southern Siberia, to the NW. of Lake Baikal, occupies an area of 240,500 sq. m. The pop., 657,000 in 1910, consists of Buriats, Tunguses, and Russians (one-third exiles). The towns are Irkutsk, Kirensk, Nijniudinsk, and Verkholensk.

IRKUTSK, the capital, on the Angara, is the residence of the governor-general of eastern Siberia. Although 3722 miles from St Petersburg (and 40 from Lake Baikal), Irkutsk is the best-built town in Siberia, with straight, wide streets, and handsome public buildings. It possesses a cathedral, public library, natural history museum, &c. The pop., 32,512 in 1875, had increased to 75,000 in 1912; it consists mostly of Russians and Buriats. Irkutsk was founded by a Cossack chief in 1652. Owing to its position on the great Siberian highway between China and Russia, it is the commercial centre of Siberia, especially for the tea-trade; the annual value of its trade amounts to about £1,100,000. It is on the line of the great Siberian railway in progress. The Angara and Lena rivers are valuable water-ways. A fire in 1879 did £2,000,000 worth damage.

Ironbridge, a village on the Severn, 1 mile E. of Coalbrookdale. It takes name from the bridge (1779), 100½ feet in span, the earliest large cast-iron bridge in the kingdom.

Iron Gates. See DANUBE.

Iron Mountain, a mining-town of Michigan, on the Menomonee River, 208 miles by rail N. of Milwaukee. It has risen since 1880. Pop. 9000.

Ironton, capital of Lawrence county, Ohio, on the Ohio River, 142 miles above Cincinnati. It is the chief business centre of an important iron region. Pop. 14,000.

Irrawaddy. See IRAWADI.

Irtish, a river of Siberia, the chief affluent of the Obi (q.v.), rises at the east end of the Altai Mountains, passes through Lake Saisan, breaks through the Altai in the west at the bottom of a savage gorge, and flows north-westwards across the steppes of Western Siberia to join the Obi, from the left, at Samarow. At that point it has a width of 2000 yards; its total length is 1620 miles; the area of its basin, 647,000 sq. m. The towns of Semipalatinsk, Omsk, and Tobolsk stand on its banks. Its tributaries include the Buchtarma and Om from the right, and the Tobol and Ishim from the left.

Irun (*Ee-roon*), a town in the Spanish province of Guipuzcoa, on the Bidassoa, near the French frontier, 24 miles by rail SW. of Bayonne. In 1837 General Sir De Lacy Evans captured it from the Carlists. Pop. 10,000.

Irvine, a seaport of Ayrshire, on the river Irvine, 1¼ mile from the Firth of Clyde, and 11 miles by rail N. of Ayr, 29 SW. of Glasgow. Irvine is a port of registry. Its harbour has been improved since 1873; and there are chemical works, foundries, grain-stores, &c. The bridge (1746–1837), the new town-hall (1859), a statue of Lord-justice-general Boyle (1867), and the academy (1814) are features of the town, which became a royal burgh about 1230, and which with Ayr, &c. returns one member to parliament. It was the birthplace of Galt and James Montgomery, and has memories also of Burns and the Buchanites. Pop. (1841) 4594; (1911) 10,179.

Irvinestown, a town of County Fermanagh, 8 miles N. of Enniskillen. Pop. 750.

Irwell, a river of Lancashire, flowing 30 miles past Manchester, to the Mersey below Floxton.

Isandu'la, or ISANDHLWANA, in the north-east of Natal, on the left bank of the Buffalo River, 110 miles N. by W. of Durban. There, on 22d January 1879, the British camp was surprised by 18,000 Zulus in Lord Chelmsford's absence and almost annihilated. The British loss exceeded 800, that of the Zulus 2000.

Isar, or ISER, a river of Bavaria, rises in the Tyrol, north-east of Innsbruck, and flows 220 miles north and north-east to the Danube near

Deggendorf. Munich and Landshut are on the banks 'of Iser, rolling rapidly;' Hohenlinden (q.v.) is 20 miles away. Large quantities of wood are floated down the Isar from the mountains.

Isauria, in ancient geography, a district of Asia Minor, occupying the summit and northern slopes of Mount Taurus.

Ischia (*Is'kee-a;* anc. *Ænaria* and *Pithecusa*), an island on the north side of the entrance to the Bay of Naples, 6 miles from the mainland. Area, 26 sq. m.; pop. 30,500. Ischia is a favourite summer-resort, being noted for the excellence of its warm mineral waters, the richness of its soil, the flavour of its fruits and wines, and the beauty of its scenery. Its highest point is the volcanic Monte Epomeo, 2608 feet, the last outbreak of which occurred in 1302. In 1881 Casamicciola was nearly destroyed by two earthquake shocks, and in 1883 it was utterly overwhelmed, 1990 persons losing their lives. Chief towns: Ischia (2800), a bishop's seat; Casamicciola (4000); and Forio (4000). See Johnston-Lavis, *The Earthquakes of Ischia* (1886).

Ischl (*Eeshl*), a town of Upper Austria, the capital of the Salzkammergut, is finely seated, 1536 feet above sea-level, on the river Traun, amid magnificent Alpine scenery, 33 miles E. by S. of Salzburg. Its situation, and the saline baths, established in 1822, attract 5000 visitors annually, including the Austrian royal family, who have a villa here. Yearly 8000 tons of salt are manufactured in the salt-works, opened in 1571. Pop. 9700.

Iseghem (*Ee'ze-khem*), a town of Belgium, 10 miles by rail N. by W. of Courtrai. Pop. 12,200.

Iseo (*Ee-zay'-o*), Lake (*Lacus Sebinus*), a lake of northern Italy, situated between the provinces of Bergamo and Brescia. Length, 12½ miles; maximum breadth, 3⅖ miles; area, 24 sq. m. It contains two small islands, and is traversed by the Oglio, a tributary of the Po.

Isère (*Ee-zehr'*), a dep. in the south-east of France, round which on the north and west flows the river Rhone. It was formed out of the ancient province of Dauphiné. Area, 3200 sq. m.; pop. (1872) 575,784; (1911) 555,911. The dep. contains the four arrondissements of Grenoble (the capital), La Tour-du-Pin, St Marcellin, and Vienne.

Iserlohn (*Ee-zer-loan*), a town of Prussian Westphalia, on a tributary of the Ruhr, 14 miles SE. of Dortmund. It manufactures brass and bronze articles. The calamine mines are celebrated. The neighbouring Dechen stalactite cave, 292 yards long, was discovered in 1868. Pop. 32,000.

Isernia (anc. *Æsernia*), a cathedral city of Italy, 52 miles N. of Naples. Pop. 10,000.

Ishim. See Irtish.

Ish'peming, a city of Michigan, 15 miles W. of Marquette on Lake Superior, and 392 N. of Chicago by rail. Much iron ore is mined close by, and the town possesses foundries, blast-furnaces, &c. Pop. 12,000.

Iskanderoon. See Scanderoon.

Isla (*Ī'la*), (1) a river of Forfar and Perthshire, flowing 46 miles SE. and SW. to the Tay near Cargill, 4½ miles WSW. of Coupar-Angus.—(2) A Banffshire stream, running 18 miles to the Deveron near Grange Junction.

Isla de Pinos. See Pinos, Isla de.

Islamabad. See Chittagong.

Islandshire, a part of Northumberland in England, embracing the Farne Islands, together with three parishes adjoining Berwick-on-Tweed (q.v.) and portions of two others. Till 1844 it formed a detached part of Durham county.

Islay (*I'lay*), an Argyllshire island, 13 miles W. of Kintyre, and ½ mile SW. of Jura, from which it is separated by the Sound of Islay. Deeply indented on the south by Loch Indal (12 × 8 miles), Islay has a maximum length and breadth of 25½ and 19 miles, and an area of 246 sq. m. It contains several small fresh-water lakes, and attains a height of 1444 feet. More than half the whole area is capable of cultivation, and great improvements have been effected in the way of road-making, draining, reclamation, &c. Dairy-farming, stock-raising, and whisky-distillation are leading industries; whilst slate, marble, iron, lead, and silver have been worked. Pop. (1831) 14,982; (1901) 6875; (1911) 6274.

Isle of France. See Mauritius.

Isle of Man, Wight, &c. See Man, Wight.

Isleworth (*I'zel-worth*), a Middlesex parish, on the left bank of the Thames, 12 miles WSW. of London. Here is Sion House, a seat of the Duke of Northumberland, the place where the crown was offered to Lady Jane Grey.

Islington (*Iz'ling-ton*), (1) one of the metropolitan boroughs of the county of London. Pop. (1861) 155,341; (1911) 327,403. It has numerous religious, educational, and benevolent institutions. The Agricultural Hall (1861), where the great national cattle and horse shows are held, is capable of holding 50,000 people. In 1885 Islington was made a parliamentary borough. It returns four members.—(2) A former parish of Norfolk, 4 miles SW. of Lynn. It is the Islington probably of 'The Bailiff's Daughter.'

Ismail, a town and river-port in the Russian government of Bessarabia, stands on the north bank of the Kilia branch of the Danube, 48 miles from its mouth. Formerly a Turkish fortress, it was taken and destroyed by Suwaroff in 1790; came to Russia in 1812; was assigned to Moldavia (1856), its fortifications being razed; and was transferred to Russia again in 1878. Pop., with the adjoining Tutchkoff, 45,000.

Ismailia (*Iz-mī-lee'a;* named after the Khedive Ismail), a small town on Lake Timsah, through which the Suez Canal passes. It stands on the railway from Cairo to Suez and on the Sweet-water Canal. During the construction of the Suez Canal it was the headquarters of the work, having been founded in 1863; it is now a place of about 11,000 inhabitants.

Isn'ik. See Nicæa.

I'sola Bella. See Borromean Islands.

Isola Grossa, or Isola Lunga (Great or Long Island), an Austrian island, 27 miles by 3, parallel to Dalmatian coast, off Zara. Pop. 3000.

Ispahân, properly Isfahân, a famous city of Persia, capital of the province of Irak-Ajemi, and in the 17th century of the entire country, is situated on the Zenderud, in an extensive and fertile plain, 226 miles S. of Tehran. The river, here 600 feet broad, is crossed by three noble bridges. Groves, orchards, avenues, and cultivated fields surround the city for miles; but the permanent beauty of the vicinity only serves to make the contrast all the more striking between the former splendour of the city and its present ruinous condition. Miles of street are now almost tenantless, and many of the palaces are falling to decay. The suburb Julfa, on the southern bank of the river, once a flourishing

Armenian settlement of 30,000 inhabitants, is now little better than a mass of ruins. Ispahân, however, is still an important city and the seat of extensive manufactures, including all sorts of woven fabrics, from rich gold brocades and figured velvets to common calicoes. Trinkets and ornamental goods in great variety, with firearms, sword-blades, glass, and earthenware, are also manufactured. Of late years, too, many of its edifices have been rebuilt; and rice is now largely cultivated in the neighbourhood. Pop. 80,000—not a tenth of what it was once.

Issik-kul (Kirghiz, 'warm water'), a salt-lake in central Asia, in the Russian province of Semirschensk, between the Terskei Ala-tau range on the south and the Kungei Ala-tau on the north. Lying 5000 feet above sea-level, it is 112 miles long, 38 miles broad, and 1980 sq. m. in area. Although it receives forty rivers, its surface falls permanently 8 or 9 inches a year.

Issoire (*Is-swahr'*; anc. *Issiodorum*), a town in the French dep. of Puy-de-Dôme, near the confluence of the Couze and Allier, 21 miles by rail SE. of Clermont-Ferrand. Pop. 5000.

Issoudun, a town in the French dep. of Indre, 72 miles S. of Orleans by rail. It manufactures parchment, cloth, agricultural instruments, &c. Pop. 10,000.

Issus, an ancient seaport on a gulf of the same name in Cilicia, Asia Minor. Here Alexander the Great routed Darius (333 B.C.).

Issy, a village in the French dep. of Seine, ½ mile SW. from Paris. Pop. 20,000. Here on 3d July 1815 Blücher defeated Davout. During the siege of Paris (1870–71) by the Germans, the fort of Issy suffered severely from bombardment.

Istakhr, or STAKHR, an ancient city of Persia, built near Persepolis (q.v.).

Istambol. See CONSTANTINOPLE.

Istria, an Austrian margraviate, forming a mountainous peninsula in the north-east corner of the Adriatic, between the Gulf of Trieste and the Gulf of Fiume or Quarnero. Area, with the adjacent islands, 1812 sq. m.; pop. 403,200. Capital, Rovigno.

Italy, a kingdom occupying the central of the three great peninsulas of southern Europe together with Sicily, Sardinia, and some smaller islands. The peninsula, which at the Strait of Otranto approaches within less than 50 miles of Albania, is bounded W. and S. by that portion of the Mediterranean known as the Tyrrhenian Sea, E. by the Adriatic, and N. by the Alps, separating it from France, Switzerland, and Austro-Hungary. Its greatest length is 710 miles; the breadth ranges from 351 miles in the north to about 20 between the Gulfs of Sta Eufemia and Squillace, but in most places is about 90 or 100 miles. The seaboard of the peninsula extends to 2272 miles. The area formerly given at 114,416, has been officially reduced to 110,657 sq. m. Pop. (1871) was 26,801,154; (1904) 33,218,328. The area of Italy is nearly equal to that of Great Britain and Ireland; the population about four-fifths that of the United Kingdom. To the kingdom proper must be added Italy's colonial possessions in Africa. The most important is the most recent, Tripoli (q.v.) and the Cyrenaica or Barca, finally Italian since 1912. Eritrea on the Red Sea has an area of 45,800 sq. m., and a pop. of 450,000. Italian Somaliland has an area of 140,000 sq. m. and a pop of 400,000. In 1906 Italy joined Britain and France in undertaking to preserve the independence of Abyssinia. The Italian concession at Tientsin in China has an area of 18 sq. m., and a native population of 17,000. The administrative provinces of Italy are 69 in number and named after the chief towns. The table shows the area and pop. of the 16 divisions called compartimenti in 1911:

Compartimenti.	Area.	Population.
Piedmont	11,340	3,424,538
Liguria	2,037	1,196,853
Lombardy	9,386	4,786,907
Venetia	9,476	3,526,655
Emilia (with Romagna)	7,990	2,667,510
Umbria	3,748	685,042
The Marches	3,763	1,088,875
Tuscany	9,304	2,694,453
Rome (and Latium)	4,663	1,298,142
Abruzzi and Molise	6,380	1,427,642
Campania	6,289	3,347,925
Apulia	7,376	2,128,632
Basilicata	3,845	473,119
Calabria	5,819	1,404,076
Sicily	9,936	3,683,380
Sardinia	9,305	852,934
Total	110,657	34,686,683

The number of foreigners in Italy at the census of 1901 was 61,606, including 11,616 Austrians, 10,757 Swiss, 10,745 Germans, 8768 British, and 6953 French. The Italian pop. includes in Piedmont about 80,000 of French and some 11,000 of Teutonic origin, in southern Italy at least 90,000 of Albanian and 30,000 of Greek origin, and in Sardinia about 10,000 of Spanish origin. Within the five years 1907–11 about 1,660,000 left Italy, of whom about 1,250,000 went to other European countries, and almost all the rest to America (chiefly the United States, Brazil, Argentina, and Canada). The largest town is Naples (723,208 in 1911), Rome (the capital) having 538,634; Milan, 599,200; Turin, 427,733; Palermo, 341,656; Genoa, 272,077; Florence, 232,860; Catania, Bologna, Venice, Messina, Leghorn, and Bari above 100,000.

On the northern frontier of Italy the Alps sweep round in a mighty arc from Nice to Trieste; and some of the loftiest peaks in the system, including Mont Blanc and Monte Rosa, belong to this mountain-girdle. The highest mountain entirely within the kingdom is Gran Paradiso (13,652 feet), the culminating point of the Graian Alps, in Piedmont. Between the Alps and the Apennines spreads the broad fertile Lombardo-Venetian plain, a nearly level country. Most of this great alluvial tract, which fills nearly the whole of northern Italy, belongs to the basin of the Po; it is irrigated by numerous streams and canals, and is one of the most fruitful and flourishing districts of Italy. The Adige and Brenta are other streams. Many of the Po's tributaries spread out at the foot of the Alps into considerable bodies of water, among which are the Lago di Garda (127 sq. m.), Lago Maggiore (81), and Como (58). From Rimini to the Gulf of Trieste the Adriatic coast is flat and marshy, and fringed by lagoons. On the Riviera, from Nice to Spezia, the sunny, rugged mountains come close to the water's edge. The geology of the north and west of northern Italy is that of the Alps (q.v.).

In the peninsula the Apennines are the most important feature. The chain, after stretching across from the Gulf of Genoa to the Adriatic, turns and runs down in a broad, irregular mass to the extremity of Calabria. The mean elevation is only some 5200 feet. The limestone rocks of the Apennines, rugged and cleft, fill the interior of the country with picturesque mountain-scenery. The culminating peak of the Apennines is Monte Corno (9577 feet), in the great mountain-mass called Gran Sasso d'Italia. On the west side of the peninsula, between the main chain and the sea, a volcanic tract extends from Tuscany as far south as Vesuvius (4206), the only volcano still active. The entire Campanian plain, the Roman Campagna, and the country round Viterbo are mainly of volcanic origin. To the volcanic centres within the peninsula may be added Etna in Sicily, and Stromboli in the Lipari Islands. Tuscany is a hilly country, which seldom rises into mountains. Farther south the Roman plain, the Pontine Marshes, and the fertile Campanian plain are connected; on the east side of the Apennines the only plain is that of Apulia. The chief rivers of the peninsula flow into the Tyrrhenian Sea; but only the Tiber (for 90 miles) and, to a less extent, the Arno (66 miles), Volturno, and Garigliano are navigable.

The generally warm climate of Italy is considerably modified in places by the presence of the mountain-ranges or the proximity of the sea. The plain of the Po, open to the icy winds from the Alps, and closed to those from the south, has a cold if short winter, while along the Riviera the temperature is as high as, and sometimes higher than, that of Rome or Naples. Throughout the peninsula the temperature is lowered by the presence of the Apennines. Moreover, the Adriatic coast, exposed to the north-east winds, is colder than the corresponding west coast. The highest temperature recorded is 109° F. (in Apulia), the lowest −25° F. (on Monte Stelvio, in Lombardy). In the very south there are but two seasons, a wet and a dry; whereas in northern Italy there are two greater and two lesser rainy periods in the year, most rain falling in October and in spring, and least in winter. Over all the peninsula autumn is the wet season. The cold mistral blows in the Gulf of Genoa, and the warm sirocco affects the coast sometimes as far north as Venice. In many districts the evil presence of malaria, from July to October especially, forms a serious drawback to the sunny climate.

The vegetation of northern Italy is in the main such as can endure the frosts of winter. But by the lake-sides we find orange and olive trees, and the summer heat is sufficient to ripen rice and maize, of which, as well as other cereals and legumes, large crops are raised. Forests of chestnuts clothe the mountains, vineyards the lower hills, and the mulberry-tree is extensively grown. The Riviera, so far as vegetation is concerned, belongs to southern Italy. In southern Italy the flora of central Europe gives place to palms and orange and lemon and citron trees, the cactus and agave, laurels, myrtles, oleanders, and forests of arbutus and the evergreen oak. Italy is pre-eminently an agricultural country. Of its entire area 87 per cent. is returned as productive; and nearly half of the productive area is under cultivation. The grape harvest in Italy is second in value to the cereals alone, though most of the Italian wines are still comparatively poor. Below the 44th parallel the olive is among the most valuable products. Large quantities of fruit are exported. The chestnut yields an important article of food. Cultivation is still carried on in a very primitive fashion in some parts, but in northern Italy, Tuscany, and round Naples, indeed, the farming is of a very high character. The system of peasant proprietorship is extending. Otherwise, land may be held by the metayer system, or by rent, paid either in money or in kind; or the cultivator may be simply the paid servant of the landlord, receiving a share of the produce for his labour. In any case, the life of the Italian peasant is, as a rule, one of unremitting drudgery and poverty, often of privation. There are fisheries round the coast and in the lagoons. The tunny is the most valuable fish, and after that the anchovy and sardine; but the eel-fisheries of Comacchio are also of importance.

Italy contains no deposits of bituminous coal, nor, except in a few localities, of iron. A very little anthracite and about 300,000 tons of lignite are raised annually, most of the latter in Tuscany and Umbria. Nearly all the iron is raised in Elba. The great mineral product of Italy is sulphur. Marble, granite, and alabaster are quarried to the amount of nearly a million sterling annually. The silk industry employs, especially in northern Italy, some 200,000 persons, besides over 600,000 engaged in rearing the silkworm. The manufacture of thread and of cotton tissues shows a steady advance, as does also the spinning and weaving of wool. The north is the seat of the iron industry; the principal copper-works are at Leghorn. The manufactures of glass and ceramic wares are valued at £2,500,000. With these may be classed the cutting of cameos and the production of mosaics at Rome, Naples, and Florence, and also the working of coral. The manufacture of tobacco is a government monopoly. There are numerous paper-mills in Piedmont, Lombardy, and Campania, and factories of straw-hats, the principal at Florence, and of cloth, silk, and felt hats in Piedmont especially. Sulphuric and tartaric acid, sulphate of quinine, salt, soap, oils, candles, wax matches, gloves, motor-cars, &c. are also exported.

The foreign trade of Italy is facilitated both by the extensive seaboard and good harbours and by railway connections with the countries beyond the Alps. The imports and exports have been steadily increasing since 1800. In the decade from 1899 to 1910 the special imports (imports for home consumption) increased from £60,000,000 to £125,000,000. The special exports (exports of national merchandise) during the same years increased from £70,000,000 to £75,000,000. The commercial intercourse of Italy is, in the order of value, principally with Germany, the United Kingdom, the United States, France, Switzerland, Austria-Hungary, and Argentina. The tariff war with France came to an end with the 19th century. The principal imports from Britain are coal, iron, cottons and woollens, machinery, chemicals, and fish; the chief exports thither are olive-oil, oranges and lemons, with their essences and syrups, hemp, hides, chemicals, dye-stuffs, and marble. More than half the steamers entering Italian ports are British, and these carry nearly four-fifths of the maritime trade. The most important seaports are Genoa and Savona, Leghorn, Naples, Venice, Messina, Catania, and Palermo. There are between 10,000 and 11,000 miles of railway in operation. The principal occupation, agriculture, employs nearly a third of the entire population, and the manufactures only about half as many. Nevertheless, the proportion of inhabitants congregated in cities is unusually large, and in southern Italy and the islands even the peasants prefer to have their homes in some town or village. The death-rate from malaria steadily diminishes, as does that from *pellagra*, a disease resulting, according to some, from unwholesome food. The character of the people is in general sober and thrifty, and they prove excellent workmen where sheer labour is required, as in quarries and drainage operations.

The Roman Catholic is the recognised state religion, and claims all but a very small fraction of the people. Of Protestants there are about

66,000, and of Jews 36,000; the former include some 22,500 Waldensians. There are in Italy 50 Catholic archbishops and 226 bishops, and over 76,500 parish priests. The rank and dignity of the pope, as a sovereign prince, is recognised by the law of 1871. The great majority of the religious houses have been suppressed. In 1861, of those over nineteen years of age, 65 per cent. of the males and 81 per cent. of the females were unable to read or write; in 1901 the percentage had fallen to 43·8 for the males and 60·3 for the females. Primary education is now compulsory, and schools of all kinds have increased largely of late; since 1861 the pupils in elementary schools have increased from 885,000 to 3,750,000. There are in Italy 21 universities, with 23,000 students. The oldest university is that of Bologna (q.v.), the largest that of Naples (5500 students). The great body of Italian students are enrolled in the faculties of medicine and jurisprudence; theology is not taught in any of the universities.

Italy is a constitutional monarchy, the executive power vested in the king being exercised through responsible ministers. The legislative functions are in the hands of the king and parliament conjointly, the latter consisting of a senate of about 370 life-members, nominated by the king, and of a chamber of over 500 deputies. The franchise is extended, by the Reform Act of 1912, to practically all male citizens who are of age. The government of the provinces, with a prefect at the head of each, is very much the same as in France. Military (or naval) service is compulsory for all citizens from the age of twenty to thirty-nine, but only about 95,000 annually are drafted into the standing army (3000 into the navy). The standing army in 1912 numbered 250,000 men, besides 500,000 on unlimited leave; the total war strength, including mobile and territorial militia, is a little above 3 million men. Italy is disproportionately strong at sea, having 15 armoured battle-ships, 20 armoured and protected cruisers, and about 80 torpedo-boats (various), with a total force of 2000 officers and 32,000 men. Some of the armour-clads are amongst the largest of existing war-ships. The enormous military and naval expenditure is out of all proportion to the resources of the country, and for many years (1868–95) deficits and schemes for expanding the revenue led to frequent crises and changes of ministry. The extension and maintenance by government of railways far beyond commercial needs have saddled the country with a very serious burden. But since 1900 surpluses have become the rule. At the end of the first decade of the 20th century the annual revenue was about £90,000,000, the expenditure being a little less; and the total public debt is a little over £520,000,000.

The history of Italy is generally begun where that of Rome (q.v.) ends—with the total fall of the Western Roman Empire in 476 A.D. under the attacks of the invading Herulian barbarians. In 489 Theodoric and his Ostrogoths founded a Gothic monarchy in Italy, which was subverted by the generals of the Eastern or Byzantine empire in 553. In 568 came the Lombards, who soon held the greater part of the peninsula, and were only crushed by the Franks, whose king, Charlemagne, was crowned emperor of the Romans by the pope in 800. In 962 Italy became a part of the Holy Roman Empire as reconstituted under the German Otto; and henceforward Italy was the scene of constant struggles between German rivals for the imperial power, between the emperors and the popes, the Ghibellines and the Guelphs, the various cities against the emperor, the pope, or one another. With the fall of the Hohenstaufens in 1254 the emperors ceased from troubling, and the popes became the chief power in Italy, their faction being also dominant in the most powerful of the cities, many of which had now fallen under the power of hereditary tyrants. In the 14th and 15th centuries Italy was parcelled out amongst five powers—the kingdom of Naples (first under Angevin, then under Spanish kings), the duchy of Milan, the republics of Florence and Venice, and the papacy. From the time of Charles V Spanish-Austrian influence became dominant, Charles being able to leave both Naples and Milan to his son, Philip II. In the war of the Spanish succession the little state of Savoy so skilfully used its power (against the French) as to secure the island of Sardinia and the rank of kingdom. After the treaty of Aix-la-Chapelle (1748), the House of Savoy held Sardinia and Piedmont; the Austrians, Milan and Tuscany; the Bourbons, Naples, Sicily (the kingdom of 'the two Sicilies'), and Parma; the papal power held the centre of the peninsula; Venice survived as a republic till 1797; and Modena and Genoa were under the protection of France, to which power the Genoese now gave Corsica. Despotism was everywhere universal. After the French Revolution numerous republics were established under French influence; in 1805 Napoleon, now emperor, was crowned king of Italy. The Congress of Vienna restored the map of Italy pretty much to its old appearance, but even more power was given to Austria, Venice as well as Lombardy being now Austrian (though Genoa fell to Sardinia). Austrian despotism pressed heavily on the rising spirit of independence; the revolutionary movement of 1849 had but momentary success, but henceforth Sardinia was regarded as the only possible nucleus of an Italian kingdom. The war of 1859 between France and Austria ended in the cession of Lombardy and part of Venetia (though the French had to get Savoy and Nice); soon after the central Italian states voted themselves into the kingdom; and southern Italy welcomed Garibaldi and his volunteers, and for ever expelled the Bourbons. In 1866 the Austro-Prussian war gave Venice to Italy; during the Franco-German war of 1870 Victor Emmanuel entered Rome, henceforth the capital. The unification of the kingdom was now practically complete—Italy being no longer a 'mere geographical expression;' the republic of San Marino (q.v.) is independent; and ardent Italian patriots regard the southern Tyrol, Trieste, Istria, the Dalmatian coast, and Nice and Savoy as 'Italia irredenta,' whose incorporation with the kingdom is yet to be worked for. Italy regretted the loss of Tunis to France; and in 1911 occupied Tripoli and Barca, which on the outbreak of the Balkan war in 1912 she secured by treaty with Turkey.

Itasca Lake. See MISSISSIPPI.

Itchen, a Hampshire river, flowing 25 miles SSW. past Winchester to Southampton Water.

Ith'aca, now THIAKI, one of the Ionian Islands (q.v.), is a long, narrow strip of land off the north-east of Cephalonia, 20 miles W. of the mainland. The surface is mountainous (2648 feet), the coast steep and rocky. Area, 37 sq. m. Ithaca was Ulysses' home. Pop. 13,000. Chief town, Vathy. See Schliemann's *Ithaka* (1869).

Ithaca, capital of Tompkins county, New York, picturesquely situated on Cayuga Lake, 35 miles NNE. of Elmira by rail. It has a large trade in coal, and many foundries, mills, and factories, and is the seat of Cornell unsectarian male and female university, founded in 1868 by Ezra Cornell. Pop. 15,000.

Itzehoe, a town of Holstein, 40 miles NW. of Hamburg by rail. It manufactures sugar, cotton, machinery, chicory, and soap. Pop. 16,000. The original castle (Eselsfleth), around which Etzehoe or Itzehoe gradually arose, was built by Charlemagne in 809.

Ivano′vo, or IVANOVO-VOZNESENSK, the 'Manchester' of Russia, in Vladimir government, 210 miles by rail NE. of Moscow. It has been the centre of the Russian cotton industry since about 1750. Pop. 100,000.

Ivel, a river of Herts and Bedfordshire, flowing 30 miles N. to the Ouse at Tempsford.

Ivinghoe, a market-town of Bucks, 2 miles SSE. of Cheddington Junction, and 38 NW. of London. Ivinghoe Beacon (904 feet) is one of the Chiltern Hills. Pop. of parish, 800.

Iv′iza, or IBIZA (anc. *Ebŭsus*), the most south-westerly of the Balearic Isles (q.v.), 56 miles from the Spanish mainland. It is mountainous, and its coasts are indented. Area, 228 sq. m.; pop. 25,000. Iviza, the chief town, is fortified, and a bishop's see. Pop. 7000.

Ivory Coast, a French colony of West Africa, on the Gulf of Guinea, lying between Liberia and the British Gold Coast Colony. It has an area of about 120,000 sq. m., and a pop. estimated at 1,000,000. The seat of administration is Bingerville, and the chief trade centre Grand Bassam.

Ivre′a, a town of Piedmont, 38 miles NNE. of Turin by rail. Its cathedral is on the site of a temple to Apollo. Pop. 7500.

Ivry, a village (pop. 1000) in the French dep. of Eure, 16 miles NNW. of Dreux. Here, 14th March 1590, Henry of Navarre defeated the League.—IVRY-SUR-SEINE, a SE. suburb of Paris, on the Seine. Pop. 40,000.

Ivybridge, a Devon village 11 miles E. by N. of Plymouth. It has paper-mills. Pop. 1700.

Ixworth, a Suffolk village, 6½ miles NE. of Bury St Edmunds. Pop. of parish, 900.

JABALPUR, or JUBBULPORE, a town of the Central Provinces, India, 228 miles by rail SW. of Allahabad. An important railway junction, it has a trade worth about £2,000,000 annually, and manufactures cotton, tents, and carpets. Pop. (1877) 55,188; (1901) 89,708; (1911) 100,651.

Jablonoi. See YABLONOI.

Jackson, (1) a flourishing city of Michigan, capital of Jackson county, on the Grand River, 76 miles W. of Detroit, at the intersection of several railways. It has flour, paper, and planing-mills; foundries and machine-shops; locomotive-works; breweries; and manufactures of furniture, carriages, wagons, boilers and machinery, farming implements, corsets, soap, &c., besides boots and shoes at the state-prison. Close by are several mines of bituminous coal. Jackson was settled in 1830, and became a city in 1857. Pop. (1860) 4799; (1870) 11,447; (1911) 31,433.—(2) Capital of the state of Mississippi, on Pearl River, 45 miles E. of Vicksburg by rail, with trade in cotton. Pop. 21,300.—(3) Capital of Madison county, Tennessee, on the South Fork of the Forked Deer River, 107 miles by rail S. by E. of Cairo, Illinois. It is the seat of the Southwestern Baptist University (1874), and has a cotton market, planing and other mills, and railway shops. Pop. 16,000.

Jacksonville, (1) capital of Duval county, Florida, on the St John's River, 23 miles from its mouth. The meeting-place of five railways, it is 165 miles by rail E. of Tallahassee. It exports lumber, cotton, moss, oranges, &c. Pop. (1880) 7650; (1910) 57,699.—(2) Capital of Morgan county, Illinois, 34 miles W. by S. of Springfield. Here are the Illinois College (Congregational; founded 1830), a Methodist female college (1847), a conservatory of music, &c.; and here, too, are state asylums for the blind, deaf and dumb, and insane. There are manufactures of woollens, paper, machinery, boilers, lumber, furniture, confectionery, &c. Pop. 16,000.

Jacobabad, a town of Upper Sind, 26 miles NW. of Shikarpur by rail, near the Beluchi frontier. Here is the tomb of General John Jacob, commandant of the Sind Horse, who in 1847 founded the place. Pop. 15,000.

Jaen (*Hâ-en′*), the capital of a Spanish province, on a tributary of the Guadalquivir, 50 miles N. by W. of Granada. Its Moorish walls are fast crumbling away; its cathedral dates from 1532. Population, 30,000. By the Moors the town was called 'Jaen of the Silk,' from its former silk manufactures. The province (area, 5184 sq. m.; pop. 514,000), part of Andalusia (q.v.), lies in the Guadalquivir's basin, and is mountainous. In 1246 it was reconquered from the Moors by Ferdinand III. of Castile.

Jaffa, or JOPPA, a town on the sea-coast of Syria, 37 miles NW. of Jerusalem—57 by a railway opened in 1893. Under Constantine the place, which had been destroyed by Vespasian, became a bishop's see, and, as the Crusaders' great landing-place, was taken and retaken by Christian and Moslem. In 1799 Napoleon stormed it; in 1832 it was taken by Mehemet Ali, and restored to the Turks by British help. The open roadstead, the ancient walls, the yellow sand-dunes, and the orange gardens are now the chief features of the brown town on its hillock. The export of oranges to the United Kingdom more than tripled in the last three decades of the 19th century, and the population grew from 15,000 to about 40,000. There is a German colony (1869) of 300 persons near.

Jaffnapatam′, a seaport on an island at the north end of Ceylon. Pop. 34,000.

Jägerndorf (*Yay-gern-dorf*, *g* hard), a town of Austrian Silesia, 34 miles by rail W. of Ratibor. It manufactures woollens, linen, organs, &c. Pop. 15,000.

Jahde, or JADE (*Yâ-deh*), a bay of Oldenburg, now Prussian, with the naval station of Wilhelmshaven (q.v.).

Jaipur. See JEYPORE.

Jaisalmer, or JEYSULMERE, capital of a native Indian state in Rajputana, stands on the edge of the Indian Desert, and was founded in 1156.

It has several Jain temples. Pop. 10,965.—Area of state, 16,039 sq. m.; pop. 90,000.

Jakutsk. See Yakutsk.

Jalalpur, a town of the Punjab, 8 miles N. of Gujrat, with shawl manufactures. Pop. 12,884.

Jalandhar. See Jullunder.

Jalapa (*Halâ'pa*), capital of the Mexican state of Vera Cruz, 60 miles by rail NW. of Vera Cruz City, and 4330 feet above the sea. Pop. 20,000.

Jalisco (*Halis'co*), a state of Mexico, on the Pacific, with an area of 38,840 sq. m. Population, over 1,202,000. The capital is Guadalajara (q.v.).

Jalna, a town and former cantonment in the Nizam's Dominions, India, 210 miles NE. of Bombay; pop. 18,000.

Jaluit, chief town of the Marshall Islands (q.v.).

Jamaica, aboriginally *Xaymaca* ('Land of Springs'), by far the most important of the British West Indian Islands, is 90 miles S. of Cuba, and stretches between 17° 43′—18° 32′ N. lat., and 76° 11′—78° 20′ W. long. It is divided into three counties, Surrey, Middlesex, and Cornwall; its area is 4193 sq. m., or a little more than the three English counties of the same names with Hampshire thrown in. The greatest length is 144 miles; the greatest breadth, 50 miles. Turk's and Caicos Islands, as well as the three Cayman Islands, are dependencies. The island is traversed from east to west by the Blue Mountains, which rise to 7400 feet. From this range nearly 120 streams descend to the coasts, but they are not navigable, except Black River (30 miles for small craft). Incomparably the best of many fine harbours is that of Kingston (q.v.). Jamaica is believed to be rich in minerals, but none are wrought. The chief towns are Kingston (the capital), Spanish Town (the former capital), and Savanna-la-Mar, on the south; and Montego, Port Antonio, and Port Maria, on the north. Port Royal, at the western extremity of the spit of sand that shuts in Kingston harbour on the south, previous to the great earthquake of 1692 was one of the chief cities in the West Indies, but is now a place of only 1200 inhabitants, and of little importance. The climate varies considerably, falling on an average 1° for every 300 feet in altitude, and at Kingston ranging between 70° during the night and 90° during the day; but the heat is tempered by the sea-breezes. On the whole, the island is very healthy; invalids even come from the United States to enjoy the salubrious air of the interior. There are two rainy seasons, one in spring and the other in summer. In the latter the rains are exceptionally heavy; violent thunder-storms are frequent. Enormous damage was done by cyclones in 1880 and 1893, and by an earthquake in 1907.

The vegetation is very luxuriant. The primeval woods are rapidly disappearing; yet there are still many valuable trees, such as mahogany, logwood, lignum vitæ, ebony, cocoa-nut and other palms, cactuses, &c. Tropical fruits are grown in great variety, also many of the fruits of more temperate climes. Spices, dye-woods, medicinal plants, and food plants, such as ginger, cochineal, castor-oil, arrowroot, maize, vanilla, pimento (allspice), &c., are extensively grown. Guinea grass and pasture land occupy the greater portion of the north and west of the island. The mongoose, imported to prey on the rats that infested the sugar estates, has, after exterminating them, become a plague, and has nearly extirpated lizards, harmless snakes, and small birds, so that insect pests (especially the troublesome ticks) abound. The negroes, who are mostly small holders, are the chief growers of fruit. The exports, which consist chiefly of dye-woods, fruits (oranges, lemons, bananas, cocoa-nuts, &c.), sugar and rum, coffee, ginger, pimento, and cocoa, range between 2 and 2½ millions annually; as also do the imports, consisting of foodstuffs, clothing, hardware, liquors, coals, building materials, &c. About 32 per cent. of the trade is with the United Kingdom, and 53 per cent. with the United States. Since 1850 the white inhabitants have increased far less rapidly in numbers than the black and coloured population. In 1861 the total pop. was 441,255 (13,816 whites); in 1871, 506,154 (13,101 whites); in 1881, 580,804 (14,432 whites); and in 1911, 831,383, of whom about 800,000 are black or coloured, about 15,000 whites, about 17,000 East Indian coolies, and a few Chinese. About 35,000 belong to the Church of England, 33,000 are Baptists, 25,000 Methodists, 12,000 Presbyterians, 5000 Roman Catholics, &c.—children being excluded. Besides nearly 700 government schools, with over 90,000 pupils, there are three government training-colleges for teachers. Besides a British garrison, there are volunteers and a semi-military police force.

Jamaica was discovered by Columbus in 1494, and occupied by the Spaniards in 1509. The original inhabitants were peace-loving Indians (not Caribs); but they were practically extinct in 1655, when the island was conquered by the English, to whom it was ceded in 1670. The place of the native Indians was taken by negro slaves, imported by the Spaniards. During the 18th century more than half a million slaves were brought over from Africa. Under English rule the chief events were frequent rebellions of the Maroons, a community of runaway slaves; in 1831–32, a negro insurrection; on August 1, 1834, the emancipation of the slaves, Jamaica receiving £6,161,927 as compensation; the failure to produce contentment; and in 1865 the rebellion of the negroes and massacre of twenty-three whites, suppressed by Governor Eyre. Under the constitution of 1866, the island is governed as a crown-colony. See the history by Gardner (1873), Burry (1903), and the annual *Handbook*.

Jambusar, a town in the presidency of Bombay, 30 miles SW. of Baroda; pop. 12,000.

James River is formed by the union of the Jackson and Cowpasture streams in the west of Virginia, and has its entire course of 450 miles in that state. It flows east-south-eastward, passing Lynchburgh and Richmond; and, widening into an estuary for the last 60 miles, falls into the Atlantic at the southern extremity of Chesapeake Bay. It is navigable for large steamers to City Point, at the mouth of the Appomattox. It was at Jamestown, now a ruined village on the north bank of this river, that the first English settlement in America was formed (1607).

James's Bay, the southerly arm of Hudson Bay, 250 miles long by 175 wide, beset with islands.

Jamestown, a town of Dumbartonshire, on the Leven's left bank, ¾ mile N. of Bonhill. It has large print-works. Pop. 2400.

Jamestown, a town of New York, on Chautauqua Lake, 70 miles S. by W. of Buffalo by rail. It manufactures woollens and alpacas, pianos, furniture, &c. Population, about 32,000. See also James River, St Helena.

Jammu (*Jummoo*), capital of a province of Cashmere, on an affluent of the Chenab. Pop. 36,200.

Jamnotri, hot springs (194·7° F.) near the Jumna's source, in northern India, in 30° 59′ N. lat. and 78° 35′ E. long., 10,849 feet above the sea. They are overhung by the three Jamnotri Peaks (20,100 to 21,150 feet).

Janesville, a city of Wisconsin, on Rock River, 91 miles NW. of Chicago. The river's water-power is utilised in flour, cotton, and woollen mills. Pop. 14,000.

Janina (*Yanina*), or JOANNINA, a town of Epirus, stands in a striking situation on a lake (12 miles long by 3 broad), 50 miles inland from the shore opposite Corfu. Here is the ruined castle of Ali Pasha. Gold lace is manufactured, as well as morocco leather, silks, and linens. The pop. has sunk from 40,000 in 1800 to 26,000, three-fourths of them Greeks. The town was Turkish from 1430 until its capture by the Greeks in 1913.

Jan Mayen Land, a volcanic island in the Arctic Ocean, named after its possible discoverer in 1611. It lies between Iceland and Spitzbergen, and is 35 miles long, with an extinct volcano (8350 feet) in it.

Japan, an island empire off the east coast of Asia, separated from Corea and Siberia by the Sea of Japan. Japan Proper comprises four large islands—Honshū (the Japanese mainland), Shikoku, Kyūshū, and Yezo—with an area of 147,655 sq. miles, and a pop. in 1911 of 51,591,342 (about 38,000,000 in Honshū). The empire of Japan includes also nearly 4000 small islands, among them the Liu Kiu ('Loo Choo') and Kurile groups; Formosa and the Pescadores, ceded by China in 1895 (area, 13,500 sq. m.; pop. now over 3,000,000); the southern half of Saghalien (q.v.), or Karafuto, restored by Russia in 1905 (area, 12,000 sq. m.; pop. 35,000); and Corea, annexed in 1910 (area, 86,000 sq. m.; pop. 13,000,000). In 1909 some 220,000 Japanese were resident abroad. The name Japan is a corruption of Marco Polo's *Zipangu*, itself a corruption of the Chinese pronunciation of the native name *Nihon* or *Nippon* ('Land of the Rising Sun').

The islands of Japan appear to be the highest portions of a huge chain of mountains which rises from a deep ocean bed. This chain, though dotted with volcanoes, is not therefore itself of volcanic origin. Earthquakes occur very frequently in Japan, although the western slope is exempt. Japan is one of the most mountainous countries in the world. Its plains and valleys with their foliage of surpassing richness, its forest-clad heights, its alpine peaks towering in grandeur above ravines noisy with waterfalls, its foam-fringed headlands, give it a claim to be considered one of the fairest portions of the earth. The sublime cone of the sacred Fuji-san (Fusiyama), a rather dormant volcano, rises to a height of 12,365 feet; and there are six peaks between 8000 and 10,000 feet (one an active volcano) in Honshū. The three other large islands also abound in mountains. Yezo has eight active volcanoes. Throughout the empire there are many solfataras and sulphurous springs. The plains, most of the valleys, and many of the lower hills are highly cultivated. Most of the countless rivers are too impetuous for navigation. The harbours are spacious and deep, but not numerous.

The different parts of Japan vary widely in climatic conditions. At Tōkyō (Yedo) we find the annual average temperature to be 57·7° F., while in winter the mercury occasionally falls to 16·2°, and in summer it may rise to 96°; at Nagasaki the lowest winter temperature is 23·2°; at Hakodaté the annual extremes are 2° and 84°. The ocean current known as the Kuroshiwo ('Black Stream') modifies the climate of the south-east coast; thus, while snow seldom lies more than 5 inches deep at Tōkyō, in the upper valleys of Kaga, near the west coast, less than 1° farther north, 18 and 20 feet are common. The rainfall, which varies much in different years, is on an average 145 inches. No month passes without rain, but it is most plentiful in summer. The climate, though somewhat relaxing to Europeans, is fairly salubrious, highly so in the mountains. In Japan the vegetation of the tropics is strangely intermingled with that of the temperate or frigid zone; the tree-fern, bamboo, banana, and palm grow side by side with the pine, oak, and beech, and conifers in great variety. The camellia, the Paulownia, and the chrysanthemum are indigenous. Wild animals are not numerous, but bears, wild boars, monkeys, deer, small foxes, stoats, and squirrels occur; and there are several varieties of the seal and the whale. The Japanese cat has only a stump of a tail. There are numerous water-birds; land-birds are less plentiful. Edible fishes, including salmon, are abundant, and insect life is specially varied. Agriculture is the chief occupation of the Japanese, and they are very careful farmers, thoroughly understanding the rotation of crops. The soil is not naturally very fertile, being mostly derived from igneous rocks, but it is made productive by careful manuring, especially with night-soil from the villages and towns. Rice is the staple production, while barley, wheat, millet, buckwheat, maize, and many varieties of bean and pea are everywhere produced. The culture of tea, introduced from China in 770 A.D., is universal in the middle and south. Sericulture is on the increase, and cotton and hemp are also widely grown. Sugar, tobacco, and many kinds of fruit are grown. Gold, silver, copper, iron, lead, antimony, tin, sulphur, coal, basalt, felspar, greenstones, granites (red and gray), rock-crystal, agate, carnelian, amber, scoriæ and pumice-stone, talc, alum, &c. are found. Good building-stone is scarce.

With the exception of the wilds of Yezo, peopled by 18,000 Ainos, the Japanese islands are inhabited by a single race speaking various dialects of the same tongue. Probably the Japanese are the issue of the intermarriage of victorious Tartar settlers, who entered Japan from the Corean peninsula, with Malays in the south and Ainos in the main island. There are two distinct types of Japanese face, that which is found in art designs being the aristocratic and rarer type. It is distinguished by an oval head and face, a high forehead, a curved nose, narrow and slightly oblique eyes. The complexion is pallid or slightly olive, the face of the men almost hairless, and the expression demure. The commoner and vulgar type, almost universal in the northern districts, is pudding-faced, full-eyed, flat-nosed, and good-humoured in expression. The women soon lose any pretensions to good looks; but the girls, with their rosy cheeks, fascinating manners, and exquisitely tasteful dress, are particularly attractive, and the children are bright and comely—indeed Japan is the paradise of children. The Japanese have many excellent qualities: they are kindly, courteous, law-abiding, cleanly in their habits, frugal, and have a high sense of personal honour. Nowhere are good manners and artistic culture so wide-spread. On the other hand, the people are deficient in moral earnestness and openness. Although the Japanese are a singularly united people, yet the nation divides itself into two portions, the governing and the governed. The former, representatives of the military class and numbering some 4000 families, are high-spirited and masterful. Japanese towns are very subject to conflagrations, the houses being mostly slight constructions of wood. Many customs once characteristic of Japan have, since the abolition of feudalism, become obsolete. *Seppuku* or *hara-kiri*, for long a legalised mode of suicide, is still honourable if voluntary—as in the case of General Nogi in 1912.

The Japanese language belongs structurally, like Corean and Manchurian, to the Altaic family. The introduction of Chinese civilisation in the 6th century A.D. was followed by a wholesale absorption of Chinese words and characters. There are two prevailing religions in Japan—*Shintô*, the indigenous faith; and Buddhism, introduced from China in 552, and still the dominant religion among the people. Francis Xavier introduced Christianity in 1549, but his work was extinguished in blood. The Roman Catholic Church and the Greek Church both carry on a flourishing work in Japan. Of the Protestant missions those of the Presbyterians and the American Congregationalists are the most flourishing; American Methodists, Baptists, Anglicans, and others are also actively at work; and there are some 20,000 converts.

Education is general and compulsory. There is a complete system of local elementary, middle, and normal schools, and two universities at Tōkyō and Kyōto. Daily newspapers abound. The Japanese army was organised after European methods in the years 1868–72. Military service is obligatory from 17 to 40 years of age. The army on a peace footing has about 230,000 officers and men, with 600,000 reserves. In 1905 there were over 500,000 men in Manchuria. During the wars of 1895 and 1904–5 the Japanese sanitary and surgical methods and appliances were scientifically perfect. The navy consists of 13 battle-ships, 13 armoured cruisers, 19 protected cruisers, besides numerous torpedo-vessels. The total mileage of railways open is 6000 miles. In the mechanical arts the Japanese have attained to great excellence, especially in metallurgy, and in the manufacture of porcelain, lacquer ware, and silk fabrics; in some of these departments works of art are produced so exquisite in design and execution as to excel the best products of Europe. As to the cotton manufacture, between 1890 and 1900 the import of raw cotton increased sixfold, and in 1909 there were eighty-eight prosperous cotton-factories. The chief ports are Yokohama, Kōbe, Osaka, Nagasaki, and Hakodate. The commercial development of Japan has of late been marvellous. The total value of exports rose from £10,300,000 in 1887 to £44,564,000 in 1911; that of imports, which was £10,500,000 in 1887, was £51,175,000 in 1911. In respect of volume of trade with Japan, Britain (including British possessions) comes first, then the United States, then China. The imports from Great Britain vary from £5,000,000 to over £9,400,000 (from British India, from 5 to 10 millions); the exports to Britain from £1,500,000 to £2,578,000. From Great Britain come chiefly cotton and woollen goods, iron and machinery, and chemicals. The imports from the United States average about £5,700,000, and the exports thither £13,200,000. The staple exports of Japan are raw and manufactured silk, cotton yarn, coal, copper, tea, matting, earthenware, rice, and straw-plaiting. In 1910 over 11,000 vessels of 20,173,000 tons entered the ports, of which 1999 vessels, of 6,152,365 tons, were British. The government is a hereditary monarchy. The imperial diet consists of two Houses—a House of Peers and a House of Representatives. The ordinary revenue varies from £53,500,000 to £63,500,000, and generally covers the expenditure. The public debt in 1911 was £270,561,168.

Before 500 A.D. Japanese history is mere legend. Buddhism was introduced from Corea in 552; and next century Chinese civilisation strongly influenced Japan. About the end of the 12th century, the weakness of the emperor led the Generalissimo (*Shogun*) to assume a large share of the supreme power, and he handed it on to his descendants. Hence the fable current in Europe that Japan had a Mikado or spiritual emperor who reigned but did not govern, and a 'Tycoon' (Shogun) who did govern though he paid homage to the nominal sovereign. The military caste was now dominant until the reign of Iyeyasu (*c.* 1600), whose descendants reigned till 1868. Total exclusion of foreigners was the rule till 1543, when the Portuguese effected a settlement; but in 1624 all foreigners were expelled and Christianity interdicted. The policy of isolation was rigidly pursued from 1638 till 1853, when the U.S. Commodore Perry steamed into a Japanese harbour, and extorted a treaty from the frightened Shogun. Soon sixteen other nations had followed the American example, and free ports were opened to foreign commerce. In 1867–68, a sharp civil war broke the feudal power of the daimios or territorial magnates, suppressed the Shogunate, and unified the authority under the Mikado. In a very few years Japanese students took a place of their own in western science; and how thoroughly the Japanese had laid to heart what they had learned from Europe in the military and naval arts was partially revealed by the swift and complete success of the war with China about Corea (q.v.) in 1894, and more impressively by their amazing triumph over the great military empire of Europe in 1904–5, when they defeated the Russians in a succession of bloody battles, took Port Arthur, and utterly destroyed the Russian fleet—so that by the peace the Russians not only evacuated S. Manchuria, but recognised Japan's 'preponderance' in Corea, and gave up to Japan the 'leases' of Port Arthur and the Liao-tung peninsula Russia had wrested from China. In 1905, also, Britain concluded a treaty with Japan, more thorough-going than that of 1902, for mutual support in eastern Asia and India against unprovoked attack, and for the maintenance of the integrity of China and of the 'open door' there. This treaty was renewed, with revisions, in 1911. In 1910 and 1911 important agreements were made with Russia with special reference to Manchuria.

See the works of Kaempfer (1727), Siebold (1851), Griffis (New York, 1876), Rein (Eng. trans. 1884), Sir E. Arnold (1891), Hearn (1894, 1904), Brinkley (8 vols. 1901–4), Murray (1904); Lloyd (1909); *Japan by the Japanese*, edited by Stead (1904); and books by Okakura, Iyenaga, and other Japanese authors.

Jaroslav (*Yaroslaf*), capital of a Russian government on the Volga, 173 miles NE. of Moscow; pop. 110,000.—The *government* has an area of 13,751 sq. m. and a pop. of 1,220,000.

Jarrow, a municipal borough and port of Durham, on the Tyne, 3 miles by rail SW. of South Shields and 7 E. of Newcastle. Its growth from a small colliery village has been due to the construction of its docks (since 1859), and to the establishment of Palmer and Co.'s iron-shipbuilding and marine engine works, blast-furnaces, iron-foundries, gun-factory, &c., which together employ upwards of 7000 hands. Paper and chemicals are also manufactured, and coal is shipped in large quantities. At Jarrow in 682 Benedict Biscop founded the Benedictine monastery with which the name of Bede is inseparably associated. The chancel of the parish church, reconstructed in the 11th century, retains portions of Benedict's work; the nave was rebuilt in 1783 and again in 1866. Bede's chair is still preserved in the church. Jarrow was made a municipality in 1875. It has a bishop suffragan under Durham. Pop. (1871) 18,115; (1911) 33,726.

Jashpur, a native state of the Central Provinces, in India; area, 1963 sq. m.; pop. 100,000.

Jassy (*Yâssy*), the capital of Moldavia, the northern division of Roumania, stands 5 miles W. of the Pruth, 205 by rail NW. of Odessa, and 289 NNE. of Bucharest. It was almost destroyed by fire in 1827, and, as rebuilt, has broad streets paved with asphalt, and houses mostly one-storied and of wood. There are more than forty Greek churches and close upon sixty Jewish synagogues. The most noticeable secular buildings are the palaces of the boyars or nobles. There is a small university. There is an active trade in corn, spirits, and wine, mostly with Galatz. Pop. 80,000. Jassy was the residence of the Moldavian princes from 1565.

Jaszbereny, a town of Hungary, 39 miles E. of Budapest. Pop. 30,000.

Jativa, or Xativa, San Felipe de (*Hâ'teeva*), a town of Spain, 35 miles by rail SSW. of Valencia. Here was born the painter Ribera (Lo Spagnoletto) in 1588. It was also the home of the notorious Borgia (Borja) family. Pop. 16,000.

Jauer (*Yow'er*), a town of Prussian Silesia, on the Neisse, 13 miles by rail S. of Liegnitz. It is famous for its sausages and its weekly corn-market, held regularly since 1404. Pop. 15,000.

Jaura, the capital of a native state of Central India; pop. 25,000.

Jaunpur, the capital of a district in the United Provinces of India, on the Gumti, here crossed by a bridge (1573) 712 feet long. The former capital of a Mohammedan kingdom, it has several splendid architectural monuments, including Ibrahim's baths (1420), mosques, and ruins of mosques and of the fort. Pop. 45,000.

Java (Djåwå), an island of the Dutch East Indies, the seat of the colonial government, separated from Borneo by the Sea of Java, and from Sumatra by the Straits of Sunda. It extends almost due west and east, and is crossed by 110° E. long. and 7° S. lat. Its length is 600 miles, its breadth 40 to 125 miles, and its area 49,000 sq. m. (excluding Madura, q.v.). From end to end of the island (most probably corresponding to a volcanic line of fissure) there is a mountain-chain, Gunung Kendang, attaining 12,000 feet; of forty-three volcanoes, several are still active. The climate is rather hot and unhealthy on the coast, but pleasant in the hills. The thermometer seldom indicates more than 95° F., the nights, especially in the highlands, are cool. The population of Java has rapidly increased; in 1850 it was 9,570,000, and in 1905 (with Madura) it was 30,098,000, including 50,000 Europeans (and half-castes), 300,000 Chinese, 17,000 Arabs, and 3500 Hindus. The natives belong to the Malay race. The Madurese, in the eastern part of the island, the Sundanese, living in the western part, and the Javanese proper differ in physique and in language. Most of them are Mohammedans, at least in name. There are about 12,000 native Christians. One of the chief vices is opium-smoking, which yields about £1,000,000 a year for licenses and profit on the import.

The chief wealth of Java consists in its luxuriant vegetation. The fauna is not very rich: tigers, rhinoceros, deer, and wild swine are types; only a few birds are conspicuous for their plumage, and hardly any are distinguished for their song. Several species of serpents (some venomous) and crocodiles are found on the island. A little gold is found; silver is scarce; salt (a government monopoly) is prepared from sea-water; and coal is worked in the Preanger, and marble in the Madiun residency. Under the 'culture-system,' established by the Dutch in 1830, the natives were compelled to cultivate part of the ground and plant staple articles in it, whilst the produce was delivered at a fixed price to the magazines of the government. The system has very largely been abolished, forced services being replaced by money taxes. Sugar, coffee, indigo, tea, and tobacco are planted for export. Rice is grown mainly for native consumption. The teak-forests belong exclusively to the government. Java may be considered the centre of the commerce and trade of a great part of the Dutch East Indies. The countries which trade most extensively with Java are Holland, the Straits Settlements, and Great Britain. The chief imports are cotton and linen goods, wine and spirits, provisions, machinery, railway-plant, &c. There are 1320 miles of railway, and an extensive telegraphic system. The island is divided into twenty-one residencies—two of which (Surakarta and Jokjakarta) are under native princes. Madura constitutes a twenty-second residency.

The earliest historical references date back to the beginning of the 5th century A.D. About the year 800 the intercourse of the Hindus with the island appears to have become more important. Already by that time the Javanese had attained to a considerable degree of civilisation, and many antiquities were left by the early Hindu conquerors, especially in middle and eastern Java (Boro Budor, Brambanan, Dieng). There were three periods of Hindu ascendency—a period of Buddhism, a period of Sivaism, and a period of compromise. At the beginning of the 15th century Mohammedanism reached the island and quickly got a firm footing. At the end of the 16th century European merchant-adventurers established themselves in Java; whilst the Dutch rule dates from 1610. Then began a long, tough struggle with the natives, but Java was practically a Dutch possession by 1811 when, until 1817, the English occupied it in connection with the French war.

See the exhaustive work by Veth (in Dutch, 3 vols. 1875–78); the history by Sir Stamford Raffles (1817); Wallace's *Malay Archipelago* (new ed. 1894); the novel, *Max Havelaar* (trans. 1868), by 'Multatuli;' and books by Worsfold (1893), Scidmore (1898), Day (1904), and Cabaton (1911).

Jaworow (*Yâ'vorov*), a town of Austrian Galicia, 30 miles WNW. of Lemberg, was the favourite residence of John Sobieski, king of Poland. Pop. 12,000.

Jaxartes, now called Sihûn, or Syr-Daria (both *syr* and *daria* mean 'river'), a river of western Asia, which rises at an altitude of 12,000 feet, 30 miles S. of Lake Issik-kul, in the Tian-Shan Mountains. It is at first called the Jaaktash, then the Taragai, and under the name of the Naryn it descends, through a wild narrow gorge, to the level of 6800 feet at Fort Narynsk, and flowing W. and SW. A little west of Khojend it breaks through another gorge; then turns suddenly to the north-west, and, retaining that direction for 850 navigable miles, finds its way into the Sea of Aral by a delta with three mouths. Its total length is 1500 miles; area of its drainage basin, 320,000 sq. m. Five centuries ago the Syr-Daria used to send off a south-western branch at Perovsk, which flowed into the Sea of Aral on its south-east side, not far from the mouth of the Amu-Daria. This branch is now lost in the sand. The Syr-Daria is the Nile of Turkestan. The people fertilise their valleys by its water, carried off in irrigation channels.

Jeantown, or LOCHCARRON, a Ross-shire village, on the N. shore of Loch Carron, 3½ miles SW. of Strathcarron station. Pop. 300.

Jed, a Roxburghshire stream, flowing 22 miles N. by E. to the Teviot, near Mounteviot House.

Jedburgh, the county town of Roxburghshire, is beautifully situated on Jed Water, 56 miles by a branch-line (by road 49) SE. of Edinburgh. Of its magnificent Augustinian abbey, founded by David I. in 1118–47, and finally spoiled by the English in 1544–45, the ruined church only remains. This, Norman to Second Pointed in style, is 235 feet long, and has a central tower 86 feet high. In 1823 a jail (now disused) was built on the site of the royal castle (razed 1409), where a skeleton appeared to Alexander III. at his marriage-feast (1285). Other memories has Jedburgh—of Mary Stuart and Prince Charles Edward, of Thomson, Burns, Scott, and Wordsworth, of Mary Somerville and Sir David Brewster. A Border town, it nurtured a warlike race, whose slogan, 'Jeddart's here!' was seldom long silent. Their chief weapon was the 'Jeddart axe,' a stout steel-headed pole, 4 feet long; and 'Jeddart justice' is still a byword for hanging first and trying afterwards. Jedburgh has been a royal burgh from time immemorial, and till 1885, with Haddington, &c., returned a member to parliament. Woollen goods have been manufactured here since 1728. Pop. (1841) 3277; (1901) 3136; (1911) 2752. See Watson's *Jedburgh Abbey* (2d ed. 1894).

Jeddah. See JIDDAH.

Jefferson City, the capital (since 1826) of Missouri, on the Missouri River, 125 miles by rail W. of St Louis. It has a state-house, U.S. court-house, state armoury and penitentiary (1500 convicts), the Lincoln Institute for coloured students, flour-mills, &c. Pop. 12,000.

Jeffersonville, a city of Indiana, on the Ohio River, opposite Louisville, Kentucky, with which it is connected by an iron railway bridge nearly a mile long. The falls of the river here are utilised in railway workshops, foundries, machine-shops, flour-mills, &c. There are also boat-yards, and hydraulic cement is manufactured in the vicinity. Pop. 10,000.

Jehlam. See JHELUM.

Jeisk, or EISK, a town in the Russian province of Kuban (Caucasus), on a small bay at the east end of the Sea of Azov, 65 miles SW. of Azov. Founded in 1848, it has grown rapidly, exports corn, flax, and wool, and has cloth manufactures and tanneries. Pop. 38,288.

Jelalabad', a town of Afghanistan, near the Kabul River, about half-way between the Indian frontier fortress of Peshawur and the city of Kabul. Formerly a strong fortress itself, it is now a dirty village of 3000 inhabitants. It is interesting from its heroic defence by Sir R. Sale in 1841–42; in the war of 1878 it was held by the British until 1880.

Jelatom, or ELATMA, a town of Russia, 170 miles ESE. of Moscow. Pop. 9000.

Jeletz, or ELETZ, a town of Russia, 120 miles by rail ESE. of Orel. It exports wheat and flour, has a great trade in cattle, and manufactures leather, soap, candles, &c. Pop. 60,000.

Jellalabad. See JELALABAD.

Jemappes, a town in the Belgian province of Hainault, 3 miles by rail SW. of Mons. Here the French republicans under Dumouriez, on 6th November 1792, defeated the Austrians. The town stands on one of the richest Belgian coal-fields, and manufactures stoneware, glass, and chemicals. Pop. 15,000.

Jena (*Yay'na*), a town of Saxe-Weimar, at the Leutra's influx to the Saale, 14 miles by rail SE. of Weimar, and 31 NNE. of Saalfeld. It lies 518 feet above sea-level, engirt by steep chalk-hills, of which the Hausberg (1069 feet) is crowned by the old Fuchsturm, and the Forstberg by a tower in memory of the Jena students who fell in the Franco-German war. It is still a quaint old-world place, with its ducal *schloss*, the 'Black Bear' inn where Luther halted on his flight from the Wartburg, and a church whose steeple is 311 feet high. Goethe here wrote his *Hermann and Dorothea*, Schiller his *Wallenstein;* and the houses of these and of other illustrious residents were marked with tablets in 1858, on occasion of the tercentenary of the university, when, too, was erected a bronze statue of its founder, the Elector John Frederick of Saxony. He founded it in 1547–58 to take the place of Wittenberg as a seat of learning and evangelical doctrine; it attained its zenith in the days of Goethe's patron, Duke Karl August (1787–1806). To that period belong the names of Fichte, Schelling, Hegel, Schiller, the Schlegels, Voss, Fries, Krause, and Oken; to our own, of Hase and Haeckel. Jena now has over 100 professors and lecturers, some 2000 students, and a library of 300,000 volumes. In 1883 a memorial was erected of the Burschenschaft. Pop. (1875) 9020; (1910) 38,487. The battle of Jena is often applied as a collective name to two separate engagements fought on the same day, 14th October 1806—one at Auerstädt, 14 miles to the north; the other on the heights round Jena, where Napoleon commanded in person. In both the Prussians were totally defeated.

Jenissei. See YENISEI.

Jeno'lan Caves, a series of caverns and tunnels in the limestone core of the main Dividing Ridge in New South Wales, 80 miles W. of Sydney. Discovered in 1841, they became in 1866 public property, the centre of a public reserve. A few of them are of vast size.

Jerash. See GERASA.

Jerba, a small island of Tunis, in the Gulf of Gabes, being separated from the mainland by a narrow channel. Area, 425 sq. m.; pop. 45,000.

Jerez. See XERES.

Jericho, once one of the most flourishing cities of Palestine, two hours' journey westward from the Jordan, and six hours north-east from Jerusalem. It is now a shapeless ruin, with a miserable village, Rîhâ or Arihâ, and excavations into the green mounds have disclosed only sun-dried bricks.

Jersey, the chief of the Channel Islands (q.v.), 14 miles from the Norman coast, 133 from Southampton, 95 from Weymouth. Measuring 11 miles by 5½, it is 45 sq. m. in area, of which nearly two-thirds is cultivated. Pop. (1806) 22,855; (1851) 57,020; (1911) 51,903, of whom 27,600 were in the capital, St Helier. The land rises northward, culminating in Mount Mado (473 feet). On all sides are large open bays; Bouley on the north is capable of becoming a fine harbour; that of St Helier is dry at low-water. At Gorey is the old castle of Mount Orgueil. The rocks on the coasts have been eroded by the sea, which has left many caverns and fantastic pinnacles. Between Jersey and France the reefs of Ecrehos, Bœuffetins, and Minquiers indicate a former connection with the mainland. It is also noticeable that moles and toads are found in Jersey, as also in Alderney, while there are none in Guernsey. The chief staple is the potato, which comes into the London market a fortnight before that of the west of England. Consequently other cultivation has been much neglected, and the land greatly stimulated by artificial manures. The potato export is about 100,000 tons yearly, of a value of £350,000. The rearing of cattle is also lucrative; it is estimated that there are fifty-eight head of cattle to every 100 acres—nearly three times the ratio of the United Kingdom. The purity of the breed is maintained by careful official registration, and the stock fetches high prices from breeders in England and America. The number of cattle exported averages nearly 1600 head annually. The imports consist largely of potatoes and butcher-meat from France and England, as the island produces little food for its own consumption. The official language is French, but English may be used in the debates; and the people in general speak either English or a form of the ancient Norman. The parish churches are old, but have lost many traces of their primitive architecture in frequent restorations. The royal court is a large but ill-lighted building containing a portrait of Marshal Conway, by Gainsborough. The character of the people is orderly and frugal, the deposits in the savings-bank exceeding £350,000. There is little pauperism and hardly any serious crime.

Jersey City, the second city of New Jersey, and capital of Hudson county, on the west bank of the Hudson River, opposite New York, of which it is, in fact, though in another state, an extension, and with which and Brooklyn it is connected by steam-ferries; a tunnel was commenced in 1874. Its site forms the broadest part of a peninsula bounded on the west by the Hackensack River and Newark Bay; on the south-east it extends along New York Bay. Jersey City is a busy but not a beautiful city. It is an important railway terminus, and is connected with Easton, Pennsylvania, by canal; and at its wharves many ocean-steamers receive and discharge their freight. It is thus the entrepôt of a large trade, especially in iron, coal, and agricultural produce. Its own manufactures are on a large scale, and include sugar, flour, iron and steel, zinc, boilers and machinery, locomotives, oils and chemicals, oakum, lumber, silk, watches, and jewellery, lead-pencils, tobacco, pottery, soap, beer, &c. The city has large abattoirs and stock-yards, and grain-elevators notable both for their size and efficiency. The site of Jersey City was formerly called Paulus Hoeck (Hook); the town received its present name and became a municipality in 1838. Pop. (1860) 29,226; (1890) 163,003; (1910) 267,779.

Jerusalem (in the form *Urusalem* on the Tel-el-Amarna tablets; *Yerushalaim*, in Hebrew 'dwelling of peace;' Moslem *El-Kuds*, 'the Holy'), regarded as a holy city alike by Jews, Christians, and Moslems, long the capital of Palestine, stands 37 miles SE. (57 by rail) of its port Jaffa, on the Mediterranean shore of Syria. It stands—from 2364 to 2582 feet above the sea-level—on the spurs of two hills surrounded and divided by two valleys, once deep, now partly or wholly filled up with rubbish. The Eastern Hill was originally a rounded top crowned with the 'threshing-floor of Araunah,' and the rock and cave, probably a sacred site from time immemorial. The Western Hill, higher than the other by more than a hundred feet, was also bounded by steep slopes. Either hill was therefore a strong hill-fortress.

The history of Jerusalem covers a period of about 3500 years. Of these, 500 at least are prehistoric; and of the 3000 years which remain, less than 500 show us Jerusalem independent, the capital of a free country, and the centre of a national religion. For 600 years longer the city was in the hands of the Israelites, but never wholly independent. Its name is found on an inscription 500 years at least before David (see also Gen. xiv. 18); it was besieged almost immediately after the death of Joshua, *c.* 1400 B.C.; it was again taken by David about 1046 B.C.; it was surrendered by Jehoiachin 597 B.C.; it was taken from Zedekiah 586 B.C., and wholly destroyed. Fifty years later (536 B.C.) the edict of Cyrus enabled the people to return; the temple was rebuilt; Ezra arrived 457 B.C., Nehemiah 445 B.C. For 500 years after this Jerusalem knew not a single generation of peace. Internal factions tore it to pieces; the city was the possession in turn of Persian, Macedonian, Syrian, Egyptian, and Roman. Under Antiochus the temple was consecrated to Zeus Olympios; and swine were sacrificed on the altars. But for the Maccabees, the religion of the Jews would have been abandoned and their nationality lost. The city was besieged, taken, and totally destroyed by Titus, 70 A.D. In the early centuries of Christianity the land was covered with monasteries, churches, and hermitages. The city contained the great group of churches of which the most splendid was Constantine's Church of the Holy Sepulchre. The Persians came 614 A.D., sacked the city, and destroyed all the churches. During Moslem rule (637–1099) the Mosque el-Aksa was built, Justinian's great church of St Mary furnishing the principal edifice; the Dome of the Rock was built; and, by order of the mad calif Hakém Bi Asur Illah, the Church of the Holy Sepulchre was again destroyed. The next period is that of the Latin kingdom (1099–1244). In the last period Jerusalem is again under the Moslems (since 1244). It was in 1517 that the Turkish sultan Selim took Jerusalem. The principal buildings and monuments for which the explorer of the modern city has to look are the first, second, and third walls of the great temple itself; the royal towers of Phasaelus, Hippicus, Psephinus, and Mariamne; the Tyropœon Bridge; Baris or Antonia; Ophel; the Tombs of the Kings; and certain pools. The town was carefully examined by Sir Charles Wilson in 1865; and excavations were conducted by Sir Charles Warren in 1867–70, Major Conder in 1871–76, Clermont Ganneau in 1874–75, the Russians, the French, and the Germans. The site of the temple was apparently within the Haram area, which is defined by the ruins of its gigantic walls. There exists a long *catena* of evidence from the Bordeaux pilgrim of the 4th century to the present day, which leaves it impossible to doubt that the basilica erected by Constantine was on the site of the present Church of the Holy Sepulchre. The present city contains about 80,000 inhabitants, of whom half are Jews, a quarter Moslems, and the rest Christians of various denominations. There are three sects of Jews, the Sephardim, of Spanish origin; the Ashkenazim, of German or Polish origin, themselves divided into several sects; and the Karaites. The Christians consist of Greeks, Armenians, Georgians, Copts, Syrians, Abyssinians, Latins, and Protestants. Lying among not very fertile mountains, the city has but little commerce, and practically no manufactures, although there is of course trade in curios and 'antiquities,' real or other. Of late years the town has grown beyond its walls, the dull, uniform, windowless one-storied houses stretching on every side. The climate has been compared to that of the south of France. Snow sometimes falls in January and February; rains begin in October and continue to fall at intervals till April, when a cloudless sky begins and lasts until October. There are now banks and hotels; the railway from Jaffa was made in 1890–93; and the number of pilgrims and tourists has increased.

See De Vogüé's *Temple de Jérusalem;* Warren and Conder's *Jerusalem* (Palestine Exploration Fund, 1884); Mrs Oliphant's *Jerusalem* (1891).

Jervaulx (locally *Jarvis*), a place in the North Riding of Yorkshire, 3 miles SE. of Middleham, with remains of a Cistercian abbey (1156).

Jervis Bay, a large inlet 85 m. SSW. of Sydney, selected as the site of a port for Canberra.

Jesmond. See NEWCASTLE.

Jessor, or KASBA, a trading town of Bengal, 74 miles NE. of Calcutta; pop. 10,000.

Jeypore (*Jaipur*), a protected native state in Rajputana (q.v.), with an area of 15,579 sq. m., and a population of 2,700,000, chiefly Hindus. It came under British protection in 1818. The maharajah was eminently loyal during the Mutiny, and was rewarded with an extension of territory.—The capital, JEYPORE, is a walled city, 850 miles NW. of Calcutta and 149 NE. of Ajmere by rail. It is a handsome and regularly-built town, with the maharajah's palace in the centre, and is the most important commercial centre of Rajputana. It was founded as late as 1728; the ancient and now deserted capital, Amber, lies 5 miles to the NE. The commercial business of Jeypore is chiefly banking and exchange, with a capital engaged of over £7,000,000. In addition to the banks there are the maharajah's college, an industrial and economic museum, a school of art, an observatory, a mint, and the 'Mayo' Hospital, besides the beautiful Rám Newás Gardens (70 acres). Pop. 140,000.

Jhansi, a fortified town in Gwalior state, Central India (till 1861 in the British North-west Provinces). During the Mutiny of 1857 its native garrison murdered all the Europeans; next April it was recovered by Sir Hugh Rose. Pop., with British cantonment, 56,000.

Jhelum, JEHLAM, or BITASTA (hence anc. *Hydaspes*), one of the rivers of the Punjab, rises in the mountains of Cashmere. About 250 miles from its source it enters the plains, and, after a total course of 450 miles, joins the Chenab at Timmu. On its banks was fought the battle between Alexander the Great and Porus (326 B.C.).—JHELUM, headquarters of a district in the Punjab, on the Jhelum River. Pop. with cantonment, 25,580.

Jiboutil. See OBOCK.

Jiddah, or JEDDAH, a seaport of the Hedjaz, Arabia, stands on the Red Sea, 65 miles W. of Mecca. It is an unhealthy town, suffering greatly from want of water. As the port, however, of Mecca, it is the place of disembarkation for pilgrims bound for the holy city (46,953 in 1891). Besides this it has an active, though a decreasing, trade. The imports comprise corn, sugar, metals, earthenware, textiles, &c.; the exports, mother-of-pearl, hides, coffee, balsams, dates, carpets, &c. A quay and a quay-railway were built in 1889. Pop. 25,000.

Jihûn. See OXUS.

Jimena, or XIMENA, a town of Spain, 21 miles N. of Gibraltar, has some remarkable caves and the remains of a Moorish castle. Pop. 10,000.

Joachimsthal (*Yo'aheemstâl*), a mining-town of Bohemia, at an altitude of 2400 feet, on the southern slopes of the Erzgebirge, 10 miles N. of Carlsbad. The mines yield still a little silver, and also nickel, bismuth, uranium. Pop. 9000.

Jock's Lodge, or PIERSHILL, a village within the city of Edinburgh, with large barracks, dating from 1793.

Jodhpur, or MÁRWÁR, the largest in area of the Rajputana states, containing 35,445 sq. m.; and the second in pop. (about 2,000,000).—The capital is Jodhpur, founded in 1459; pop. 60,450.

Johanna. See COMORO ISLES.

Johannesburg, the chief town and mining centre of the Transvaal goldfields, is situated about 6000 feet above sea-level, 298 miles NE. of Kimberley, and 838 NE. of Capetown, being connected with both by rail (1892). In 1886 the Transvaal government proclaimed as goldfields certain farms on and around the now famous Reef of Witwatersrandt, 30 miles SSW. of the capital Pretoria. The progress of the place and the mining industry was steady and rapid. Fine banks, churches, hotels, club-houses, a magnificent stock exchange, and some handsome streets reflect the wealth of the town, though much of it consists of mean huts and shanties. The Transvaal Institute promises to become a university for the province. The climate is healthy, save for dust-storms; the supply of water is still imperfect. Johannesburg was largely the scene of the intrigues and struggles that led to the war of 1899–1902. It was occupied by Lord Roberts in May 1900. The Union Observatory is there. Pop. (1911) 237,220 (one-half of whom are whites).

Johannisberg, a village of Prussia, overlooking the Rhine, 13 miles WSW. of Wiesbaden. It is noteworthy chiefly for the castle (1732) of the Metternich family, and the famous vineyards (38 acres) on the castle hill, producing the choice *Johannisberger* white wine. Pop. 2000.

John o' Groat's House, in Caithness, 1¾ mile W. of Duncansbay Head, and 18 miles N. of Wick, was, according to tradition, an octagonal building with eight doors and windows and an eight-sided table within, built by John o' Groat to prevent dissensions as to precedence among the eight different branches of his family. Certain it is that between 1496 and 1525 there was one 'John o' Grot of Duncansbay, baillie to the Earl in those pairts,' and probably a Hollander. An outline on the turf marks the site of the house; and the neighbouring hotel (1876) has, appropriately enough, an octagonal tower. 'Frae Maidenkirk to John o' Groat's' (Burns) is the Scottish equivalent of 'from Dan to Beersheba,' Maidenkirk being Kirkmaiden in the Mull of Galloway.

Johnshaven, a Kincardineshire fishing-village, 9¼ miles NNE. of Montrose. Pop. 850.

Johnston, formerly a town of Rhode Island, now forming part of Providence (q.v.).

Johnstone, a manufacturing town of Renfrewshire, on the Black Cart, 3½ miles W. by S. of Paisley. Founded in 1781, it contains a large flax-mill, a paper-mill, foundries, and machine-shops. Pop. (1831) 5617; (1911) 12,045.

Johnstown, (1) capital of Fulton county, New York, on Cayadutta Creek, 48 miles WNW. of Albany. It has mills and large manufactories of gloves and mittens. Pop. 10,500.—(2) A town of Pennsylvania, on the Conemaugh River, 78 miles E. by S. of Pittsburgh by rail, with large iron and steel works, tanneries, and flour, planing, and woollen mills. Johnstown was overwhelmed by the bursting of a reservoir on 31st May 1889. Pop. (1880) 8380; (1890) 21,805; (1910) 55,482.

Johore, an independent state at the S. end of the Malay Peninsula, whose foreign relations are controlled by Britain. It rises into several mountain-peaks, the highest Mount Ophir (4186 feet). Area, 10,000 sq. m.; pop. 200,000, mostly Chinese and Malays. The capital is Johore, 15 miles NE. of Singapore.

Joigny (*Zhwan'yee*, anc. *Joviniacum*), an old walled town in the French dep. of Yonne, 90 miles by rail SE. of Paris, manufactures cloth, linen, and sporting rifles; pop. 4500.

Joinville (*Zhwan*^{g}*veell*), a small town of 3000 inhabitants in the French dep. of Haute-Marne, 22 miles N. of Chaumont by rail.

Jokjakarta, a residency in the centre of Java; area, 1191 sq. m.; pop. 900,000. The capital, Jokjakarta (pop. 80,000), has the sultan's palace and ruins of ancient temples.

Joliba. See Niger.

Joliet, capital of Will county, Illinois, is on Des Plaines River, 40 miles SW. of Chicago by rail, and its water-power is increased by a canal from Lake Michigan. It has a state prison, manufactures flour, steel rails, wire, stoves, tools, boots, paper, tiles, cigars, &c. There are large quarries of limestone, and a coalfield in the neighbourhood. Pop. (1880) 11,657; (1910) 34,670.

Jönköping (*Yönchöping*), the capital of a Swedish *län* or county (area, 4468 sq. m.; pop. in 1892, 193,389), is beautifully situated at the south end of Lake Wetter, 115 miles by rail E. of Gothenburg. It is famous for its safety-matches. Paper, carpets, tobacco, &c. are also made. Pop. 27,000.

Joplin, a town of Missouri, 167 miles by rail S. of Kansas City, with lead and zinc mines and smelting-furnaces; pop. 32,000.

Joppa. See Jaffa and Portobello.

Jordan ('descending'), the principal river of Palestine, forms a great valley stretching from north to south. The highest source is the Hasbany, which rises near the Druse town of Hasbeiya, on the west side of Mount Hermon; another spring is on the south side at Bânias (Paneas or Cæsarea Philippi). The Jordan flows south for over 100 miles, passing through the small Huleh Lake (The Waters of Merom) and the Lake of Tiberias (Sea of Galilee), and falls into the northern extremity of the Dead Sea (q.v.), 1292 feet below the Mediterranean. As the source is 1700 feet above the Mediterranean, the total fall is 3000 feet. The river, which varies much in breadth, from 30 to 50 yards, flows latterly in a sunken channel. Its banks of white marl are in some places flat, in others steep; in the north partly occupied by fields of barley, but barren below Jericho.

Jorullo (*Ho-rool'yo*), a volcanic mountain in the Mexican state of Michoacan, 4315 feet above sea-level, and 1640 feet above the plain on which it stands, 150 miles WSW. of Mexico City. It was thrown up one night, 29th September 1759, after several months of subterranean convulsions.

Josephstadt, an important Austrian fortress, stands at the confluence of the Mettau and the Elbe in Bohemia, 10½ miles N. by E. of Königgrätz. Pop. 8000.

Joyce's Country, a mountainous district in the north-west of the county of Galway.

Juan Fernandez, called also Mas-Á-tierra ('nearer the mainland'), a rocky Chilian island in the Pacific Ocean, 420 miles W. of Valparaiso. It is 13 miles long and 4 broad, and is for the most part a series of rocky peaks of volcanic origin (the highest 3000 feet). The trees are mostly ferns. Horses, pigs, and goats run wild. The island was discovered by the Spaniard whose name it bears in 1563, and was frequently visited by buccaneers. Here Alexander Selkirk, a marooned privateer, a native of Largo, lived from 1704 to 1709. His story is supposed to have suggested the *Robinson Crusoe* of Defoe; though in the story Robinson's island is placed on the other side of South America, near the mouth of the Orinoco. Chili used the island as a penal settlement from 1819 to 1835. It is usually inhabited by a few Chilian sea-lion hunters; and in 1877 it was leased to a Swiss, who established a small colony there. See Mackenna, *Juan Fernandez* (Santiago, 1883).

Juba, or Jub, a great river of eastern Africa, which flows into the Indian Ocean at about 0° 5′ S. lat., and whose mouth marks the boundary between Italian Somaliland and British East Africa.

Jubbulpore. See Jabalpur.

Juby, Cape, on the west coast of Africa, 200 miles SW. of Ifni.

Judæa. See Palestine.

Juggernaut, or Puri, a town on the coast of Orissa, at the southern end of the delta of the Mahanadi, celebrated as one of the chief holy places in India. With a resident pop. of 50,000, it owes its reputation to a temple erected there in honour of Vishnu, and containing an idol of this Hindu god, called *Jagannáth* or *Juggernaut*, a corruption of the Sanskrit word *Jagannátha*—i.e. Lord of the World. The first historical mention of him is in 318 A.D. The place, too, was long a sacred city of the Buddhists, the abode of the Golden Tooth of Buddha. The great festivals sometimes bring 100,000 pilgrims. The temple enclosure comprises 120 temples, the chief pagoda being that of Jagannáth, with a tower 192 feet high. There are twenty-four annual festivals in his honour, the chief being the car festival, when Jagannáth (who is armless) is dragged on his car (45 feet high, with sixteen wheels, each 7 feet in diameter) to his country-house. This is less than a mile distant from the temple, but the heavy sand extends the short journey to several days. The car festival has been falsely believed to be the occasion of numerous cases of self-immolation, the frantic devotees throwing themselves before the wheels. See Sir W. W. Hunter's work on Orissa (1872).

Jujuy (*Hoo-hwee'*), the northernmost province of Argentina; area, 20,000 sq. m.; pop. 62,500.—The capital, Jujuy, on the San Francisco River, 44 miles N. of Salta, has a national college and sugar-refineries. Pop. 8000.

Julfa, a suburb of Ispahan (q.v.) in Persia.

Jülich (*Yü'lihh;* Roman *Juliacum;* Fr. *Juliers*), a town of Rhenish Prussia, on the Roer, 20 miles by rail NE. of Aix-la-Chapelle. Pop. 7000. Jülich was the capital of a duchy annexed in 1814 to Prussia.

Jullunder, or Jálandhar, a very ancient city of the Punjab, stands in the Doab between the Sutlej and the Beas, on the railway between Umballa and Umritsar. Pop. 70,000.

Jumet, a busy place in the Belgian province of Hainault, near Charleroi, with ironworks, collieries, glass-works, &c. Pop. 26,000.

Jumilla, a town of Spain, 36 miles N. by W. of Murcia. Pop. 17,900.

Jumna, or Jamuna, the principal feeder of the Ganges, has its source 10,849 feet above the sea, 5 miles N. of Jamnotri. After a southerly course of 95 miles it breaks into the plains from the Siwalik Hills at an altitude of only 1276 feet. It continues to flow south as far as Hamirpur, beyond Agra, and then turns to the east, finally joining the Ganges from the right 3 miles below Allahabad, after a total course of 860 miles. As a rule its banks are high and craggy. Many tributaries add their waters to swell its current. The towns of Delhi, Agra, Firozabad, Etáwah, and Allahabad are on its banks. Where it emerges from the Siwalik Hills, two great irrigation canals, an Eastern and a Western, were made in 1817–30.

Junagarh, capital of a native Indian state (area, 3283 sq. m.; pop. 490,000) in the peninsula of Kathiawar, NW. of Bombay, is one of the most picturesque towns in India. Pop. 34,250.

Juneau, named from a prospector, is now the seat of government for Alaska, and is on the shore of the Alaska strip, till 1903 claimed by Canada, opposite Douglas Island. Pop. 1300. There are gold and silver mines in the neighbourhood.

Jungfrau ('the Maiden'), a magnificent peak of the Bernese Alps, 13,671 feet high. A railway to the top was made in 1895–1905.

Juniper Green, a Midlothian village, 5½ miles SW. of Edinburgh. Pop. 1620.

Jura (Scand. *deor-oe*, 'deer-isle'), an Argyllshire island, ½ mile NE. of Islay, and 2½ miles W. of the nearest point of the mainland. It extends 28 miles north-eastward; varies in width from ¾ mile, at Loch Tarbert in the middle, to 8½ miles; and is 143 sq. m. in area. The western side is rugged and desolate, the eastern green and pleasing. The conical Paps of Jura are 2571 and 2412 feet high; and most of the surface is deer-forest. Pop. (1831) 1312; (1911) 507.

Jura, a range of mountains of a peculiar limestone formation, oolitic in composition, and generally called Jurassic, which extends from the angle formed by the Rhone and the Ain, in a north-easterly direction (with a gradually declining elevation) for more than 450 miles, to the upper course of the Main. But it is usual to restrict the name to the ranges that lie along the frontier of Switzerland and France—mainly in the deps. of Doubs, Jura, and Ain. These constitute a plateau about 155 miles long by 40 wide, with an average height of 2000 to 2500 feet. The loftiest peaks are Reculet (5643 feet), Crêt de la Neige (2653), Mont Tendre (5512), and Dôle (5507).

Jura, an eastern French dep., bounded on the E. by Switzerland. Area, 1928 sq. m.; pop. (1881) 285,263; (1911) 252,713. It is divided into the four arrondissements of Lons-le-Saunier (the capital), Poligny, Sainte-Claude, and Dôle.

Jüterbog, or Jüterbogk, a town of Prussia, 39 miles by rail SSW. of Berlin. Pop. 10,000.

Jutland (Dan. *Jylland*), the only considerable peninsula of Europe that points directly north, has since early in the 10th century formed a portion of the kingdom of Denmark (q.v.). Area, 9754 sq. m.; pop. (1911) 1,198,457. Jutland was called the Cimbric Chersonesus, from the Cimbri, its early inhabitants. In the 5th century it was inhabited by the Jutes, who took part in the expedition of the Saxons to England; and the Jutes were succeeded by the Danes.

Jyhoon. See Oxus.

K2. See Godwin-Austen.

Kabul, or Cabul (*Kau'bal;* the *Kabura* of Ptolemy), the capital of Afghanistan, is charmingly situated at the foot of the Takht-i-Shah and Asmai hills, on a spur of which to the south is the fortress of Bala Hissar (or 'upper fort'), once an important stronghold, but now abandoned. The city is composed almost entirely of mud-built buildings with flat roofs, and is traversed by the main bazaar, whose streets diverge from the central square, and divide Kabul into four quarters. The bazaar rivals that of Kandahar, and includes every variety of trade. Carpets, camel-hair cloth, and skins are perhaps the specialities; but there are now many shops in which European goods can be purchased, and Kabul is rapidly assuming the general character of an Indian mart. Communication with India is now regular and constant: there is a growing trade with central Asia. The cantonment of Sherpur, situated about a mile north of the Bala Hissar, where the British troops were beleaguered in 1880, is maintained in good repair. Close to it are still to be traced the outlines of the old British entrenchment of 1840–41, when, after a nine weeks' siege, a British force had to capitulate. At the western extremity of the Bemara ridge, which flanks Sherpur on the north, is the English cemetery, now protected by a high wall. Kabul is celebrated for its fruit, its grapes and melons being especially famous. The elevation of the plain above sea-level is about 6000 feet, which ensures a delightful temperature and fine climate in summer; but it is sometimes severely cold in winter, when snow occasionally covers the ground to the depth of several feet, and communication is frequently interrupted. Pop. 90,000.

The Kabul River rises at Sar-i-Chashma, near the source of the Helmund, flows through Kabul city, and, mainly by a long series of precipitous defiles, finally reaches the Indus at Attok. The length of its course (generally south-easterly) is about 270 miles.

Kadiak, a wooded, mountainous island off the S. coast of Alaska. It contains good harbours, and has an area of 3465 sq. m. Pop. 1482 Eskimos, engaged in the salmon-fishery.

Kaffa (anc. *Theodosia* or *Feodosia*), a Russian seaport, on a bay on the east side of the Crimea, 62 miles E. by N. of Simferopol. It is defended by walls and a citadel, and has the ruined palace of the Khans of the Crimea, a Greek cathedral, and, near by, an Armenian monastery (1442). Soap and caviare, camel-hair carpets, and sheepskin rugs are manufactured; and here is the only oyster-fishery in Russia. Pop. 40,000.

Kaffraria, properly the country inhabited by the Kaffirs or Caffres, who inhabit the E. of the Cape, Natal, Swaziland, Zululand, &c.; but usually restricted to the coast-districts between the Great Kei River (Transkei) and the Natal frontier. British Kaffraria was the country from the Great Kei westward to the Keiskamma, some time an independent colony after being wrested from the Kaffirs in the war of 1846-47, but ultimately incorporated with Cape Colony. Neither Kaffraria nor British Kaffraria is now an administrative division.

Kafiristan, a mountainous region of Asia, lying between the Kabul River on the south and the Hindu Kush on the north-west; its eastern and western boundaries are formed by the Chitral and Panjshir rivers respectively, feeders of the Kabul. Area, 5000 sq. m.; pop. 200,000, primitive Aryan heathens, of many tribes, hating Mohammedans, but under Afghan jurisdiction. See Robertson's *Kafirs of the Hindu-Kush* (1896).

Kagoshi'ma, a town of Japan, on a large bay of the same name, at the south end of Kiu-siu Island, with manufactures of pottery and porcelain, arms, and cotton, was damaged by an eruption of Sakurashima (1914); pop. 65,000.

Kaieteur Fall. See ESSEQUIBO.

Kai-fung, capital of the Chinese province of Honan, near the southern bank of the Hoangho, where the great inundation occurred in 1887, long the chief settlement of the Jews in China. Pop. 100,000—many Mohammedans.

Kailás. See ELLORA, INDUS.

Kaira, capital of a district in northern Gujarat, 20 miles SW. of Ahmedabad by rail. Pop. 10,640.

Kairwan', a decayed walled town of Tunis, in an open, marshy plain, 80 miles S. of the capital. It contains about fifty ecclesiastical structures, of which the mosque of Okba, who founded Kairwan about 670, is one of the most sacred of Islam. Outside the city, to the north-west, is the mosque of the Companion—i.e. of the Prophet; this and other sacred tombs have rendered Kairwan ('caravan') the Mecca of northern Africa. As such, it has been jealously guarded from defilement by the presence of Jews and for the most part of Christian travellers; but it was entered and investigated by the French in 1881, and is now under their protection. Kairwan makes copper vessels, potash, saltpetre, and articles in leather. Pop. 25,000. See works by Rae (1877), Broadley (1882), and Boddy (1885).

Kaisarieh. See CÆSAREA.

Kaiserslautern (*Kīserslowtern*), a town of the Bavarian Palatinate, 52 miles by rail SW. of Worms. The chief manufactures are tissues, yarn, sewing and other machines, ultramarine, furniture, beer, bricks, &c.; and there are ironworks, steam-sawmills, and railway shops. Pop. (1875) 22,699; (1910) 54,659. Frederick I. built a castle here in 1152 (destroyed by the French in 1713); and near by the French republican armies were defeated in 1793 and 1794.

Kaiserswerth, a Prussian town (pop. 4000) on the Rhine, 10 miles below Düsseldorf.

Kaiser Wilhelm Canal. See BALTIC SEA.

Kaiser Wilhelm's Land. See NEW GUINEA.

Kaithal, an ancient town in the Punjab, India, 93 miles NNW. from Delhi. It has saltpetre-refineries, and manufactures lac ornaments and toys. It became British in 1843. Pop. 14,754.

Kalaha'ri Desert, a vast tract of South Africa, extending 600 miles from the Gariep or Orange River northwards to 21° S. lat., with an average breadth of about 350 miles. The so-called desert is an elevated basin, 3000 to 4000 feet high, with numerous depressions, and bordered in most parts by a wide belt of sandy waterless country. But the rainfall in the interior is sufficient to nourish a fair amount of vegetation. Many parts are thickly covered with high, thorny bushes, which harbour game. The inhabitants, called Bakalahari, keep cattle and grow corn, and live by these and by the chase; wandering Bushmen are also found in the 'desert.' See Farini, *Across the Kalahari Desert* (1886).

Kalamata, or KALAMÆ, a seaport in the Greek Peloponnesus, on the Gulf of Koron, is the seat of an archbishop. Pop. 15,400.

Kalamazoo', capital of Kalamazoo county, Michigan, on a river of the same name, 144 miles by rail ENE. of Chicago. An important railway junction, it is the seat of the state insane asylum and of Kalamazoo College (Baptist), and manufactures machinery, paper, flour, carriages, windmills, agricultural tools, &c. Pop. 40,000.

Kalát. See KELÁT.

Kalbe, a town of Prussian Saxony, on the Saale, 17 miles S. of Magdeburg; pop. 15,000.

Kale, a Roxburghshire stream, running 20 miles to the Teviot, 4½ miles S. by W. of Kelso.

Kalgan, a Chinese town, 110 miles NW. of Peking, opposite the passage through the Great Wall, is a chief emporium of the Chinese tea trade with Mongolia and Siberia, and is connected by railway with Peking; pop. 70,000.

Kalgoorlie (originally HANNAN'S), a town of Western Australia, is 350 miles ENE. of Perth and 25 NE. of Coolgardie by railway (1896), in the centre of a rich gold-field. The rush began in 1893; water is conveyed through pipes from a reservoir 350 miles off. A railway from Port Augusta to Kalgoórlie was begun in 1912. Pop. 31,300.

Kalinjar, an Indian fortress and shrine on an isolated rock (1230 feet high), a spur of the Vindhya Mountains, overlooking the plains.

Kalisz, capital of a government (area, 4390 sq. m.; pop. 1,126,700) in Russian Poland, 132 miles WSW. of Warsaw; pop. 47,000.

Kalmar, a seaport of Sweden, capital of a län or county (area, 4436 sq. m.; pop. 230,000), on an island in Kalmar Sound, opposite the island of Öland. It has a good harbour, a handsome cathedral, and a castle, in which, on 20th July 1397, was signed the 'Union of Kalmar,' all Scandinavia coming under one crown. The manufactures include matches, chicory, and tobacco, and some shipbuilding. Pop. 16,000.

Kalna, or CULNA, a town of Bengal, 47 miles N. of Calcutta and 28 E. of Bardwan, on the Bhagirathi (Hooghly). Pop. 10,463.

Kalocsa, a town of Hungary, near the Danube, 86 miles S. of Budapest by rail. It has a cathedral, archbishop's palace, and observatory. Pop. 14,000.

Kalpi, a small town in the United Provinces of India, stands among rugged ravines near the bank of the Jumna, 50 miles SW. of Cawnpore. Here on 23d May 1858 Sir Hugh Rose defeated 12,000 mutineers. Pop. 14,306.

Kalu'ga, chief town of a Russian government, 76 miles by rail NW. of Tula and 188 SSW. of Moscow. It has a large trade. Pop. 50,610. Area of government, 11,942 sq. m.; pop. 1,400,000.

Kama, the principal affluent of the Volga, rises in the Russian government of Vyatka, and joins the Volga 43 miles below Kazan. The Kama is navigable from Perm (930 miles). It is free of ice about 200 days in the year, and is one of the great highways of communication between Siberia and Nijni Novgorod and St Petersburg.

Kamakura, a coast village of Japan, 12 miles S. of Yokohama. It dates from the seventh century, and was the capital of the Shogunate for 400 years, but is now only of interest to tourists for its beauties and its famous bronze image of Buddha, the Dai-butsu, 50 feet high.

Kama'ran, a little island in the Red Sea, on the Arabian side, nearly opposite Massowah, with an area of 102 sq. m., and inhabited by a few fishermen. It was annexed by Britain in 1858.

Kambakonam. See Combakonum.

Kamchatka (*Kam-tchat'ka*; Ger. *Kamtschatka*), a peninsula of eastern Siberia, stretches S. into the Pacific between Behring Sea on the E. and the Sea of Okhotsk. Area, 465,590 sq. m. The peninsula is long and narrow, terminating in a point only 7 miles distant from the northernmost of the Kurile Islands. A chain of volcanic mountains runs down the centre, and reaches 15,408 feet in Kojerevska and 16,988 in Kluchefskaya (in eruption in 1854 and 1885). Hot springs abound. The coast on the south-east is formed of rugged, precipitous cliffs. The principal river is the Kamchatka, which flows into the Pacific. The climate is colder than in corresponding latitudes in Europe, and very humid; grass and tree vegetation are consequently luxuriant. The principal occupations of the inhabitants are fishing and hunting. Kamchatka was annexed to Russia at the end of the 17th century. With a part of the mainland it has been detached from the maritime province, and gives name to a province with 36,000 inhabitants — Kamchadales, Koryaks, Lamuts, and Russians. The fort of Petropavlovsk, with a magnificent harbour covered with ice only a brief period of the year, is situated on the east coast.

Kamenetz-Podolsk (Polish *Kamieniec*), capital of the Russian government of Podolia, near the frontier of Austrian Galicia, on a steep rock above an affluent of the Dniester, 243 miles NW. of Odessa. There are a Roman Catholic cathedral (1361), a Greek cathedral (16th century), and an Armenian church. Pop. 48,000.

Kamenz, a small manufacturing town of Saxony, 22 miles NE. of Dresden by rail. It was the birthplace of Lessing. Pop. 11,000.

Kamerun. See Cameroons.

Kames, (1) a Berwickshire mansion, 6 miles E. of Greenlaw.—(2) A castellated mansion, John Sterling's birthplace, in Bute, 2¾ miles NNW. of Rothesay.

Kamesburgh. See Port Bannatyne.

Kamloops, a station on the Thompson tributary of the Fraser River, British Columbia, 230 miles NE. of New Westminster.

Kampen, a town of Holland, near the mouth of the Yssel, 5½ miles by rail NW. of Zwolle. It was formerly a Hanse town, and has partly recovered since 1850 the trade which left it as the Yssel sanded up. The church of St Nicholas is one of the finest mediæval churches in the country. Population, about 20,000. Kampen is the Gotham of the Dutch.

Kamschatka. See Kamchatka.

Kamthi, or Kampti, a town and cantonment of the Central Provinces, India, 9 miles NE. of Nagpur, on the Kanhan River. Pop. 40,159.

Kamyshin, an important shipping town of Russia, on the Volga, about 100 miles below Saratov. Pop. 18,000.

Kanagawa. See Yokohama.

Kanara, North, a coast-district of Bombay, lies south-east of Goa. Area, 3910 sq. m.; pop. 454,230.—South Kanara, immediately south of North Kanara, belongs to Madras. Area, 3902 sq. m.; pop. 1,134,600. The capital is Mangalore.

Kanauj, one of the great legendary centres of Aryan civilisation in India, stood originally on the Ganges, 65 miles NW. of Lucknow. At present the site consists of ruins, extending over the area of five villages, 4 miles from the Ganges, the river having altered its bed. The most remarkable buildings are Mohammedan mausoleums. Its most prosperous era was the 6th century; early in the 11th it fell before the sultans of Ghazni. Among the ruins there is a modern town of 17,000 inhabitants.

Kanawha. See Charleston, and Great Kanawha.

Kanazawa, a town of Japan, on the west coast of the main island, NW. from Tokyo, manufactures porcelain and silk. Pop. 120,000.

Kanchinjanga. See Kinchinjinga.

Kandahar', or Candahar, the capital of central or southern Afghanistan, 200 miles SW. of Kabul. It stands in 32° 37′ N. lat. and 66° 20′ E. long., 3484 feet above sea-level. It is in the form of an oblong square, while all its streets run straight, and cut one another at right angles. At the intersection of the two main streets there is a large dome (*Charsu*). Pop. variously estimated from 25,000 to 100,000. Kandahar is well watered by two canals, and stands amid gardens and orchards. It has much trade with Bombay, Herat, Bokhara, and Samarcand. About 2 miles N. rises a precipitous rock, crowned by a fortress. Here, amid all the disasters of 1839–41, the British maintained their ground under Rawlinson. Kandahar is supposed to have been founded by Alexander the Great, was wrested from the Afghans by the famous Mahmud of Ghazni (997–1030), and from then down to 1747 was, with brief intervals of independence, held by Genghis Khan, Tamerlane, and by various rulers of Tartary, India, and Persia in turn. In the war of 1878–80 the British entered Kandahar unopposed, and held it till 1881. The Sibi-Pishin Railway would, if completed, greatly enhance its importance.

Kandavu, one of the Fiji Islands (q.v.).

Kandy, a town of Ceylon, on a beautiful little lake among the mountains, 74 miles by rail NE. of Colombo. It is 1665 feet above the sea, and has a mean annual temperature of 76° F. Here are ruins of the palace of the former native kings, and a temple in which a reputed tooth of Buddha is preserved. About 3 miles from here is Peradeniya, with its celebrated Botanical Gardens. Pop. 30,000.

Kanem, formerly a vassal state of Wadai (q.v.), now part of the French Sahara, lying north of Lake Chad.

Kangaroo Island, an island of South Australia, at the mouth of the Gulf of St Vincent, is 87 miles by 34 broad.

Kanizsa, two towns in Hungary. (1) Nagy (or Great) Kanizsa, 136 miles by rail SW. of Budapest; pop. 26,000.—(2) Old Kanizsa, on the Theiss, 15 miles SSW. of Szegedin; pop. 20,000.

Kankakee′, capital of Kankakee county, Illinois, on Kankakee River, 56 miles SSW. of Chicago, with factories and foundries; pop. 17,000.

Kano′, a town and sultanate in Hausaland, northern Nigeria. This district has famous tin-mines. Pop. 100,000.

Kansas, the central state of the American Union, and the eleventh in area, is bounded N. by Nebraska, E. by Missouri, S. by Oklahoma, and W. by Colorado. It is about 400 miles from east to west, and 200 from north to south, and contains an area of 82,080 sq. m. The surface is for the most part a rolling prairie, rising from 800 feet in the east to between 3000 and 4000 feet in the north-west. Kansas has no navigable river except the Missouri, which forms part of its eastern boundary. The Kansas or Kaw (300 miles) drains nearly half the state, and the Arkansas drains another large portion. The climate is subject to extremes of temperature. A record of 106° F. above zero has been observed; but the mercury rarely falls below zero. The mean annual rainfall is 37·10 inches; but in the west the supply is scanty, and in the upper Arkansas valley irrigation has been introduced. The minerals of Kansas include lead and zinc, excellent coal, lignite, rock-salt, mineral paint, gypsum, good building-stones, brick-clay, and material for hydraulic cement. Kansas is an agricultural and pastoral state, wheat, maize, and oats being the chief crops. Horticulture has steadily extended, and the growing of sorghum cane for sugar. Great quantities of prairie hay are cut; and thousands of acres of planted timber now break the surface of the prairie. Creameries are numerous, and more attention is given to the raising of stock. Of the manufacturing industries the most important is beef and pork packing (mainly at Kansas City), flour-milling, foundry-work, and the manufacture of stoves and agricultural implements. The suffrage provisions allow women to vote at school and municipal elections; and there is a prohibitory liquor law. The state university is at Lawrence; an agricultural college at Manhattan; and a normal school at Emporia. The name is derived from the Kaw or Kansas Indians. The state, mostly acquired in the Louisiana purchase, was organised as a territory in 1854, and at once became the battle-ground between the partisans of slavery and freedom. The Federal administration sided with the pro-slavery party. John Brown took part in the civil war which prevailed, and many fights that were almost battles took place. The Free State party was steadily reinforced from the north, and after several futile endeavours the Wyandotte constitution was finally adopted in 1859, and in 1861 Kansas was admitted as a non-slaveholding state of the Union. Pop. (1860) 107,206; (1910) 1,690,949. The largest cities are Kansas City (q.v.), Topeka, the capital (43,684), and Wichita (52,450); next come Leavenworth, Atchison, and Hutchinson.

Kansas City, the second city of Missouri, and one of the great towns of the west, is situated on the south bank of the Missouri (here crossed by a fine railway bridge), where the river makes a sharp bend to the east, 283 miles by rail W. by N. of St Louis. Great part of the city is built upon a series of steep hills. The state frontier-line bounds the city on the west, and consequently a large suburb on this side, also called Kansas City, is in the adjoining state of Kansas. This suburb, connected with Kansas City by a remarkable elevated railway, has a pop. of 83,000, and contains great stock-yards and pork-packing establishments. The larger Missouri town possesses numerous fine streets, and handsome residences on the hills. Its public edifices include a fine United States court-house and the imposing building of the Board of Trade; there are two medical colleges here. The city is the terminus of a number of important railways, and is a principal distributing centre for the rich agricultural region to the south and west. There are great grain-elevators and stock-yards, and pork-packing is a principal industry; while the manufactories turn out railroad iron and car-wheels, shot, flour, beer, butterine, soap, furniture, &c. Pop. (1860) 4418; (1870) 32,260; (1880) 55,785; (1910) 248,381.

Kan-su′, the north-west province of China.

Kanturk, a market-town, 24 miles NW. of Cork; pop. 1500.

Kappel. See CAPPEL.

Kara, a gold-mining district in eastern Siberia, 300 miles from Chita and nearly 5000 from St Petersburg.

Karachi. See KURRACHEE.

Karafuto. See SAGHALIEN.

Karagwe, a territory between the east coast of Africa and the Victoria Nyanza, divided between German and British East Africa.

Kara-hissar. See AFIUM-KARA-HISSAR.

Kara-köl. See BOKHARA.

Karakorum, (1) a name given, but according to the best geographers erroneously, to the Muztagh range, in the western Himalayas; sometimes also it is given, again erroneously, to the Kuen-Lun range on the north of Tibet. The Mustagh or Muztagh range is that part of the Himalayas which lies to the west of the Indus and extends as far as the head of the Gilgit Valley. It embraces some of the loftiest peaks of the Himalayan system, Dapsang being 28,700 feet high.—(2) The name is properly appropriate to a pass (18,550 feet), the culminating point of the route between India and East Turkestan, in 35° 33′ N. lat. and north from Leh.—(3) Karakorum is also used to indicate the ruined Mongolian capital, to the north of the desert of Gobi, on the Orkhon, a tributary of the Selenga River.

Kara-kum. See KIZIL-KUM.

Karaman. See CARAMANIA.

Karamnasa, a river of Bihar, rises in 24° 34′ N. lat. and 83° 41′ E. long., and, after a course of 146 miles—for some distance along the boundary between Bihar and the United Provinces—enters the Ganges from the right. The Hindus hold it in religious abhorrence.

Kara Sea, the portion of the Arctic Ocean lying between Nova Zembla and the Yalmal Peninsula. Some trade with western Europe now passes over the Kara Sea in summer to and from the rivers Obi and Yenisei.

Karategin, the easternmost province of Bokhara, a highland region (6000–7000 feet), traversed by a tributary of the Amu-Daria. Area, 8310 sq. m.; pop. 100,000.

Karauli (*Kerowlee*), a hilly, well-timbered native state in Rajputana, separated by the river Chambal from Gwalior. Area, 1229 sq. m.; pop. 146,587.—The capital, Karauli, is 75 miles NW. of Gwalior. Pop. 25,124.

Karczag, a town of Hungary, 99 miles by rail E. by S. of Budapest. Pop. 23,000.

Karelia, an old name for the south-east part of Finland, annexed to Russia in 1721.

Karikal, the second in importance of the French possessions in India, is on the Coromandel coast, 12 miles N. of Negapatam, and has an area of nearly 53 sq. m. The pleasant capital (pop. 21,000), about a mile from the sea, was four times taken by the British. There is an active trade in rice. Pop. 57,000.

Karli, a place with a famous sculptured cave-temple, 126 feet long and 45 feet high, 40 miles NW. of Poona by rail.

Karlsbad. For Karlsbad, Karlskrona, Karlsruhe, &c., see CARLSBAD, &c.

Karlsburg (Hung. *Gyula-Fehérvár*), a town and fortress of Transylvania, near the Maros, 170 miles E. of Szegedin by rail. Pop. 10,000.

Karluk, a place in Alaska, with the greatest salmon cannery in the world.

Karnac. See THEBES.

Karnál, a town of the Punjab, 7 miles W. of the Jumna's present course, and on the western Jumna Canal. Pop. 24,963.

Kärnthen. See CARINTHIA.

Karnul, a town in Madras Presidency, 110 miles S. by W. of Hyderabad. Pop. 25,376.

Karroo, a generic name given to the high plains of the Cape Province; especially the Great Karroo, the elevated basin, more than 3000 feet above sea-level, and 350 miles long by 70 to 80 wide, which lies between the Nieuweveld Berge on the north and the Zwarte Berge on the south.

Kars, a fortress of Russian Armenia, 110 miles NE. of Erzerum. It is situated on a tableland over 6000 feet above the sea; the climate is therefore rather severe. Pop. 25,000, mostly Armenians. Kars, long a bulwark of the Ottoman empire in Asia, was taken by the Russians in 1828, resisted them for six months in 1855, and was stormed by them in 1877. It was ceded to Russia by the Berlin Congress in 1878, and its fortifications have been since augmented.

Karshi, a town of Bokhara, 95 miles SE. of Bokhara city and 80 SW. of Samarcand. It is of great importance in the transit trade between Bokhara, Kabul, and India; and its knives and firearms are famed. Pop. 25,000.

Karst. See CROATIA.

Kartum. See KHARTOUM.

Kárún River, the sole navigable river of Persia, rising in the Zardah Koh Mountains, near Ispahan, flows west through gorges of the Bakhtiári Range to Shuster, where it becomes navigable. At Ahwáz a reach of rapids and broken water bars the course of vessels to the Lower Kárún; and here since 1890 a tramway has been constructed. Below Ahwáz the river is 300 to 500 yards wide, and flows for 117 miles without an obstacle through a country naturally rich and fertile. Mohammerah lies at the Kárún junction with the waters of the Euphrates and Tigris (*Shat-el-Arab*). In 1842 Lieutenant Selby ascended the Kárún to Shuster; but it was not till 1888 that the navigation was thrown open. See W. F. Ainsworth, *The River Kárún* (1890).

Kasai. See CONGO.

Kasanlik, a town of Bulgaria, at the Balkans' base, 5 miles from the southern end of the Shipka Pass, and 87 NW. of Adrianople. It manufactures attar of roses. Pop. 10,000.

Kaschau (*Kâ-show′*; Hung. *Kassa*), one of the handsomest towns of Hungary, in the beautiful valley of the Hernad, 130 miles by rail NE. of Budapest. It has a cathedral (1270–1468), the finest Gothic edifice in Hungary, and manufactures tobacco, stoneware, furniture, starch, nails, and paper. Of the Jesuit university (1659) only the law academy remains. Pop. 45,500.

Kashan, a flourishing town of Persia, 3690 feet above sea-level, and 92 miles N. of Ispahan. It manufactures silk-stuffs, gold brocade, glazed tiles, carpets, and copper-wares. Pop. 30,000.

Kashgar, the political capital of Eastern or Chinese Turkestan, and, next to Yarkand, the second place of importance. The town and district have a pop. of 120,000. The old city is a small fortified place overlooking the Kizil River, separating it from the new city, in which stands the palace of the Chinese governor of the province, as well as the Mosque (Juma Mesjid). The people excel in certain branches of industry, as the making of cottons, silks, carpets, saddlery, &c., and carry on trade, chiefly with Russia. Kashgar, the centre of Mohammedan learning in eastern Turkestan, is besides a famous pilgrimage place. In 1758 the Chinese seized Kashgar, and with short interruption it has remained in their power. A successful rebellion was that of Yakub Kushbeghi (1864–77), but since the country was retaken by the Chinese, Kashgar has been left to the influence of Russia. See Colonel Kuropatkin's *Kashgaria* (Eng. trans. 1883).

Kashkar. See CHITRAL.

Kashmir. See CASHMERE.

Kaskaskia, a river of Illinois, flowing nearly 300 miles SW. to the Mississippi at Chester. On its right bank, a few miles from the mouth, was Kaskaskia village, the first capital of Illinois.

Kassai. See CONGO.

Kas′sala, a fortified town on a tributary of the Atbara, 260 miles S. of Suakin. Pop. 10,000.

Kassas′sin, a lock on the canal between Ismailia and Zagazig, in Egypt, 21 miles W. of Ismailia. In the Egyptian campaign of 1882 it was the scene of a sharp action on the evening of August 28, in which Arabi's forces were completely routed, principally by the British cavalry.

Kassel. See CASSEL.

Kastamu′ni, capital of a province in Asia Minor, 76 miles SW. of Sinope. It manufactures cotton goods, leather, &c. Here is the ancestral castle of the Comneni, 'Kastamuni' being a corruption of 'Castra Comneni.' Pop. 20,000.

Kasvin. See KAZVIN.

Katahdin, the highest mountain in the state of Maine, 5385 feet high.

Katanga, a town and district in Belgian Congo, situated between two head-streams of the Congo—below the Luapula issuing from Lake Bangweolo, and passing on through Lake Moero, and a more westerly Lualaba, passing through a chain of lakes. Rich deposits of copper are exploited. There are railways, through Angola, to the port of Benguela, and through Rhodesia to all parts of South Africa.

Kathiawar, or STRASHTRA, a peninsula on the west coast of India, lying between the Gulf of

Cambay and the Gulf of Cutch. Politically, the name Kathiawar Agency (formed in 1822) is given to a collection of 187 states, some independent, some tributary to native princes, and some (105) tributary to the British government in India. Area of agency, 20,559 sq. m.; population, 2,500,000.

Katmandhu. See KHATMANDU.

Kat'rine, LOCH, one of the most celebrated of Scottish lakes, in Stirling and Perth shires, 5 miles E. of Loch Lomond and 9½ W. of Callander. Lying 364 feet above sea-level, it curves 8 miles east-south-eastward, is nowhere quite a mile broad, and has a maximum depth of 468 feet, and an area of 3119 acres. It discharges through Lochs Achray and Vennachar, to the Teith; and since 1859 has supplied Glasgow with water. Huge Benvenue (2393 feet) and Ben A'an (1500) rise steeply at its lower end, whose shores are beautifully wooded, with the mountain defile of the Trossachs beyond. Scott was often here during 1790–1809, as also in 1805 was Wordsworth with his sister Dorothy.

Kat River, a branch of the Great Fish River, in the Cape Province, rising in the Didimaberg.

Kattowitz, a town of Prussian Silesia, 105 miles SE. of Breslau. It has manufactures and coal-mines. Pop. 43,200.

Katzbach, a river of Prussian Silesia, which falls into the Oder at Parchwitz. See LIEGNITZ.

Kaub. See CAUB.

Kava. See AVA.

Kavala, a seaport of Greece (1913), opposite Thasos, with a large trade in tobacco.

Ka'veri, or CAUVERY, a river of southern India, rises in the Western Gháts, and flows 475 miles south-east across Mysore and Madras, to the Bay of Bengal, which it enters through two principal mouths. The Kaveri is of no value for navigation, its bed being rocky, with numerous rapids and falls—as those at the island of Sivasamudram, in Mysore, famous for their romantic beauty. Other islands formed by it are Seringapatam, in Mysore, and Sriringam, just above the delta. It is important for irrigation in Mysore and Coimbatore, but especially in the marvellous fertile delta. For this purpose the main stream has been dammed since the 4th century A.D., the Coleroon (the northern branch) since 1838.

Kayes, or KHAYES, a town of Upper Senegal-Niger, on the river Senegal, with a railway to the Niger, Dakar, and St Louis; pop. 10,000.

Kazan, capital of the Russian government of Kazan, and in the 15th century capital of the Mongol kingdom of the Golden Horde, stands 3 miles from the Volga's north bank, and 200 miles E. by S. of Nijni-Novgorod. In 1552 the Russians, under Ivan the Terrible, stormed the town, and put an end to the Mongol kingdom. The kremlin or fortress embraces within its walls the archiepiscopal cathedral (1562), a magnificent monastery (1579), an arsenal, &c.; the red brick Sumbek Tower is an object of veneration to the Tatars. The university, founded in 1804, has four faculties, nearly 3500 students, a library of 300,000 vols., an observatory, &c. The principal objects of industry are leather, soap (made from mare's milk), candles, gunpowder, books, hempen goods, cotton, &c. Close by are the shipbuilding-yards in which Peter the Great built his Caspian fleet. The Tatar merchants of Kazan trade as far as Bokhara and Persia on the one side and as Asia Minor on the other. Pop. (1871) 86,000; (1910) 180,000. The town has suffered severely from fire more than a dozen times, especially in 1774, 1815, and 1825.

Kazbek, or CASBECK. See CAUCASUS.

Kazvin, or CASBIN, a town of Persia, 95 miles NW. of Teheran. It manufactures brocade, velvet, cotton, and iron-ware, and has obtained a new commercial importance through the opening of the Transcaucasian Railway. Pop. 40,000.

Keady, a market-town, 8 miles SW. of Armagh; pop. 1450.

Kearney, a town of Nebraska, 196 miles W. by S. of Omaha; pop. 7500.

Kearsarge, a mountain of New Hampshire, 22 miles NW. of Concord, and 2950 feet high.

Kearsley, a town of Lancashire, 4 miles SE. of Bolton, with neighbouring coal-mines; pop. 10,000.

Kecskemet, a town of Hungary, 55 miles by rail SE. of Budapest; pop. 68,000.

Kedah, a Malay state on the W. of the Malay Peninsula, most of which (since 1909) is under British protection; area, 3000 sq. miles; pop. 246,000.

Keeling (or Cocos) **Islands,** a group of more than a dozen coral atolls in the Indian Ocean, 500 miles SW. of Java, attached to Singapore. They are covered with coconut palms, whence oil is extracted, and are inhabited by about 600 Malays, but owned by a descendant of J. Ross. Discovered by Captain Keeling in 1609, they were visited by Darwin in 1836.

Keen, MOUNT, a conical Grampian summit (3077 feet), 7 miles SSE. of Ballater.

Keene, a pretty town of New Hampshire, the capital of Cheshire county, on the Ashuelot River, 92 miles by rail NW. of Boston; pop. 10,500.

Keewa'tin, a district of Canada, which in 1905 became part of the North-west Territories. In 1912 the south-western portion, to 60° N. lat., was added to Manitoba, and the north-eastern to Ontario. It is nearly uninhabited, except by Eskimos in the north. It embraced the northern part of Lake Winnipeg, and included the mouth of the Saskatchewan River, which is navigable, except for a short distance, for nearly 1000 miles. The Nelson and Churchill rivers also pass through it.

Kef, EL, a walled town of Tunis, 95 miles SW. of the capital, with a ruined temple, thermæ, and cisterns of Roman construction; pop. 4000.

Kegworth, a Leicestershire town, 6 miles NNW. of Loughborough; pop. 2250.

Kehl. See STRASBURG.

Keig, an Aberdeenshire parish, 29 miles WNW. of Aberdeen, the birth and burial place of Professor W. Robertson Smith.

Keighley (*Keethley*), a market and manufacturing town in the West Riding of Yorkshire, on the Aire, amid the moorland scenery of the Brontës' country, 9 miles NW. of Bradford and 17 WNW. of Leeds. It has a parish church (rebuilt 1848), a Gothic mechanics' institute (1870–87), the Drake trade school (1713; rebuilt 1860), extensive water-works (1876), two public parks of 9 and 15 acres gifted in 1887–88 by the Duke of Devonshire and Mr J. Lund, and important manufactures of worsted and woollen goods, worsted-spinning machinery, and sewing and washing machines. Keighley was constituted a municipal borough in 1882. Pop. (1851) 13,050; (1911) 43,487. See R. Holmes, *Keighley, Past and Present* (1858).

Kei Islands. See KEY.

Keir, the seat of the late Sir William Stirling-Maxwell, 1¾ mile NW. of Bridge of Allan.

Kei River, GREAT, a river of South Africa, which in 1848 was made the boundary between Cape Colony and Kaffraria. See TRANSKEI.

Keith, a town of Banffshire, on the Isla, 18 miles ESE. of Elgin ; pop. 4500.

Kelantan, a Malay state on the E. of the Malay Peninsula, most of which (since 1909) is under British protection ; area, 5000 sq. m. ; pop. 300,000. Capital, Khota Baru (pop. 10,000).

Kelát (also *Khelat* and *Kalat*), the capital of Beluchistan, stands at an elevation of more than 7000 feet, in 28° 52′ N. lat. and 66° 33′ E. long. It was occupied by England (1839–41); and in 1877 a treaty was concluded with the khan, by which a British agent became resident. Pop. 14,000. Area of Kelát *state*, 73,000 sq. miles. Pop. 354,000.—KELAT-I-GHILZAI is a fortress of Afghanistan, 75 miles NE. of Kandahar.

Kelati Nadiri, a strong natural fortress in the Persian province of Khorassan, close to the Russian frontier of Transcaspia.

Kells (anc. *Kenlis*), a town of County Meath, on the Blackwater, 26 miles by rail W. of Drogheda. Interesting antiquities are St Columba's house, a round tower, and three or four stone crosses. Kells was in 807 made the seat of a bishopric, united to Meath in the 13th century. Prior to the Union it returned two members. Pop. 2400.

Kelmscott, an Oxfordshire mansion, on the Thames, 2½ miles E. by S. of Lechlade, the residence of the poets Rossetti and Morris.

Kelso, a pleasant market-town of Roxburghshire, 23 miles by rail WSW. of Berwick-on-Tweed and 52 (by road 42) SE. of Edinburgh. It stands on the north bank of the Tweed, here joined by the Teviot, and spanned by Rennie's noble five-arch bridge (1803), 165 yards long. In 1126 David I. translated to 'Calchou' a Tironensian abbey, founded by him at Selkirk seven years before. This, wrecked by the English under Hertford in 1545, is now represented by the stately ruin of its cruciform church, Romanesque and First Pointed in style, with a massive central tower 91 feet high. Across the river, on the peninsula formed by the Teviot, stood the royal castle and town of Roxburgh, demolished in 1460 ; and 1 mile W. is Floors Castle (1718–1849), the seat of the Duke of Roxburghe. Kelso itself has a town-hall (1816), corn exchange (1856), racecourse, coach-building and other industries, and memories of the '15, Scott, the Ballantynes, and Sir William Fairbairn. Pop. (1851) 4783 ; (1911) 3982. See works by Haig (1825), Cosmo Innes (1846), and Rutherfurd (1880).

Kelung. See FORMOSA.

Kelvin, a stream flowing 21 miles south-westward to the Clyde at Partick, near Glasgow.

Kemnay, an Aberdeenshire parish, 18 miles WNW. of Aberdeen, with great granite-quarries.

Kempen, (1) a town of Rhenish Prussia, 7 miles NW. of Krefeld. Pop. 8000.—(2) A town in the Prussian government of Posen, 48 miles by rail NE. of Breslau. Pop. 8000.

Kempten, a town of Bavaria, 54 miles by rail S. by E. of Ulm. The old town was made a free town of the empire in 1289 ; the new town grew up around a monastery (8th century) founded by disciples of St Gall. Cotton-spinning and weaving and the making of machines and hosiery are carried on. Pop. 20,000.

Kempton Park, in Middlesex, 4 miles W. of Kingston-on-Thames, once a royal residence, is now noted for its race-meetings.

Ken, a Kirkcudbrightshire stream, flowing 28½ miles to the Dee at Parton, and expanding during the last 4½ miles of its course into Lake Ken.

Kendal, or KIRBY KENDAL, a market-town of Westmorland, on the Kent, 22 miles by rail N. of Lancaster and 13 SW. of Ambleside. It is a gray straggling place, with an ancient Gothic church, a ruined castle (the birthplace of Catharine Parr), a town-hall (1828), and a grammar-school (rebuilt 1887). Flemings settled here in 1337, and the town became famous for its woollens and 'Kendal-green' buckram ; whilst Pococke in 1754 refers to its 'manufacture of a sort of frieze call'd cotton, at 8d. a yard, sold mostly for the West Indies, for the slaves.' Nowadays the industries include heavy textile fabrics, such as horse-cloths and railway rugs, besides leather, snuff, paper, &c. Incorporated as a municipal borough in 1575, Kendal returned one member to parliament from 1832 to 1885. Pop. (1851) 11,829 ; (1911) 14,033. See two works by C. Nicholson (1832–75).

Kenfig, a Swansea (q.v.) borough, Glamorganshire, 6½ miles W. by N. of Bridgend ; pop. 700.

Kenia, MOUNT, an isolated snow-capped mountain mass in British East Africa, about 10′ S. of the equator, and not far N. of Kilima-Njaro. The crater wall rises 17,000 feet. It was climbed in 1899 by H. J. Mackinder.

Kenilworth, a market-town of Warwickshire, on a small sub-affluent of the Avon, 5 miles N. of Warwick and 5 SSW. of Coventry. The castle, founded about 1120 by Geoffrey de Clinton, was defended for six months (1265–66) by Simon de Montfort's son, and passed by marriage (1359) to John of Gaunt, and so to his son, Henry IV. It continued a crown possession till in 1563 Elizabeth conferred it on Leicester, who here in July 1575 entertained her for eighteen days at a daily cost of £1000—that sumptuous entertainment described in Scott's *Kenilworth*. Dismantled by the Roundheads, the castle has belonged since the Restoration to the Earls of Clarendon. Its noble ruins comprise 'Cæsar's Tower,' the original Norman keep, with walls 16 feet thick ; Mervyn's Tower and the Great Hall, both built by John of Gaunt ; and the more recent but more dilapidated Leicester's Buildings. There is a fragment also of an Augustinian priory (*c.* 1122) ; and the parish church has a good Norman doorway. Tanning is the chief industry. Pop. (urban district) 5800.

Kenmare, a town of Kerry, near the head of the sea inlet called Kenmare River ; pop. 1000.

Kenmore, a Perthshire village at the foot of Loch Tay, 6 miles WSW. of Aberfeldy.

Kenmure Castle, the Kirkcudbrightshire seat of the Gordons of Lochinvar, ¾ mile S. by E. of New Galloway.

Kennebec, a river of Maine, rises in Moosehead Lake, and, passing Augusta, runs 150 miles south to the Atlantic Ocean. It is navigable for large vessels to Bath, 12 miles, and for steamers beyond Augusta. It falls in its course 1000 feet, affording abundant water-power, and is mostly closed by ice for three to four months in the year.

Kennet, a river of Wilts and Berks, flowing 44 miles eastward to the Thames at Reading. It has good trout-fishing.

Kennington, a part of Lambeth met. borough, and a division of Lambeth parl. borough, London, Kennington Oval, a little S. of Vauxhall Bridge, is a famous cricket-ground of Surrey County.

Kenosha, a town of Wisconsin, U.S., 51 miles by rail N. by W. of Chicago; pop. 20,000.

Kensal Green, a cemetery on the NW. of London, with the graves of many famous men, including Thackeray, Leech, Kemble, Charles Mathews, Tom Hood, and Cardinal Manning.

Kensington, between Westminster and Paddington in the E. and Fulham and Hammersmith in the W., is, since 1899, a metropolitan borough of the county of London. Kensington Palace, built of red brick, was originally the seat of Heneage Finch, Earl of Nottingham and Lord Chancellor of England, from whose successor William III. bought it in 1689; he and his wife Mary, Queen Anne and her consort Prince George of Denmark, and George II. all died within its walls; and it was also the birthplace of Queen Victoria. Kensington Gardens (strictly, in Westminster) have been frequently enlarged; they are connected with the northern part of Hyde Park by a stone bridge over the Serpentine built by Rennie in 1826. At their southern extremity is the Albert Memorial (1872), designed by Sir Gilbert Scott, and consisting of a bronze-gilt seated statue (by Foley) of the prince, placed beneath a gorgeous canopy 180 feet high, and surrounded by works of sculpture illustrating the various arts and sciences. Opposite, in Kensington Gore, is the Albert Hall (1867–71), a huge circular building in the modern Italian style, of red brick with yellow dressings, used as a concert-room and capable of holding 10,000 persons; its cost was £200,000, and the interior measures 200 feet by 180 feet and is 140 feet high. Other buildings in the vicinity are the Victoria and Albert Museum (1857), Natural History Museum, Royal School of Art Needlework, Royal College of Music (1883), Imperial College of Science and Technology (1907), Imperial Institute (1887–93), and offices of the Royal Geographical Society. The parish church is a fine building in the Gothic style, designed by Sir Gilbert Scott (1869), with a spire 295 feet high. Close by are the town-hall (1880) and the Roman Catholic oratory (1869). Next to Kensington Palace, the most interesting building from an historical point of view is Holland House, a quaint mansion in the Elizabethan style, erected (1607) by Sir Walter Cope, and the great resort of the Whig politicians at the commencement of the 19th century. Campden House, rebuilt in 1862 on its destruction by fire, is noteworthy from the former house, erected in 1612, having been the residence, before her accession, of Queen Anne. Of the residences occupied by Swift, Sir Isaac Newton, Jack Wilkes, Wilberforce, George Canning and his son, Dr Dibdin, Sir David Wilkie, William Cobbett, Mrs Inchbald, Count D'Orsay, Talleyrand, Lord Macaulay, Thackeray, and John Leech, but few traces now remain. The borough returns two members to parliament. It is a suffragan bishopric under London. Pop. (1871) 120,299; (1891) 166,308; (1911) 172,317.

See Leigh Hunt's *An Old Court Suburb* (1855), Marie Lichtenstein's *Holland House* (1873), and books by Loftie (1888) and Lloyd Sanders (1910).

Kent, an important maritime county in the SE. of England, is bounded by the Thames estuary, the Strait of Dover, the English Channel, Sussex, Surrey, and London. Its greatest length is 64 miles; its greatest breadth, 38 miles; and its area 1525 sq. m., or 975,966 acres. The surface is for the most part hilly, except in the south-east, where lies a marshy tract, some 14 miles long by 8 broad, and in the north, where a line of marshes skirts the banks of the Thames and Medway; these last are backed by a succession of wooded hills, stretching inland and gradually increasing in height until they culminate in the North Downs, a chalk range which traverses the middle of the county from west to east, attaining at Knockholt Beeches, near Sevenoaks, a height of 782 feet above sea-level. Below these downs lies the Weald of Kent, a district abounding in beautiful scenery, and occupying nearly the whole southern side of the county. Of rivers in Kent, besides the Thames, the principal are the Medway, Stour, and Darent. The rich meadows of the Romney Marsh afford excellent pasturage for vast flocks of sheep. All branches of agriculture are extensively carried on, especially market-gardening and the growing of hops and fruit. Other industries are the manufacture of paper, bricks, and cement; with some coal-mining near Dover. Large numbers of hands are employed at the Woolwich arsenal and the dockyards of Chatham and Sheerness; whilst at Ashford are the works of the S.E. Railway, and at Whitstable and Faversham are important oyster-fisheries. Kent is divided into five lathes, and comprises 73 hundreds, the Cinque Ports of Dover, Hythe, Romney, and Sandwich, the cities of Canterbury and Rochester, and 18 other municipal boroughs, the whole containing 425 civil parishes, almost entirely in the dioceses of Canterbury and Rochester. Maidstone is the assize town. Pop. (1801) 307,624; (1841) 549,353; (1881) 977,706; (1911) 1,045,591, in the reduced area within the 'administrative county,' Kent having given off 31 sq. m. to the 'county of London,' formed under the Local Government Act of 1888. Kent includes eight parliamentary divisions, and the parliamentary boroughs of Canterbury, Chatham, Dover, Gravesend, Hythe, Maidstone, and Rochester. The other chief towns are Ramsgate, Margate, Folkestone, and Tunbridge Wells (all popular watering-places), and Gillingham, Beckenham, and Bromley.

Of its early inhabitants Kent has numerous traces in the shape of Roman roads, and many camps and barrows; at Aylesford and Hartlip Roman villas and baths have been discovered, and near the former place is a curious dolmen known as Kits Coty House. There are also the cathedrals of Canterbury and Rochester, the Norman fortress of the latter place, with those of Chilham and Dover, and the moated mansions of Hever (the home of Anne Boleyn), Ightham Mote, and Leeds Castle (where Richard II. was imprisoned). Amongst Kentish worthies have been Caxton the printer, Elizabeth Barton the 'nun of Kent,' Sir Nicholas Bacon, Sir Francis Walsingham, Camden the antiquary, Sir Philip Sidney, Harvey the discoverer of the circulation of the blood, the 'judicious' Hooker, the Earl of Chatham and his son William Pitt, General Wolfe, Richard Barham, author of the *Ingoldsby Legends*, the historians Hallam and Grote, Charles Dickens, and Gordon Pasha. See the county histories of Hasted (4 vols. 1778–99; new and enlarged ed. 1886, &c.) and Dunkin (3 vols. 1856–58), and the 'Victoria History' (1908 *et seq.*).

Kentish Town, a district in St Pancras borough, in the north of London.

Kent's Cavern, near Torquay, Devonshire, a prehistoric bone-cave, 650 feet long, 2 to 70 wide, and 18 high.

Kentucky, a state of the American Union, in the Mississippi Valley; greatest length, E. to

W., 400 miles; breadth, N. to S., 175 miles; area, 40,400 sq. m. The eastern and south-eastern parts of the state are mountainous, broken by the Cumberland Mountains (2000–3000 feet) and their offshoots; westward from this region is a plateau sloping gradually toward the Ohio and the Mississippi rivers, which bound the state on the north and west. Large cypress-swamps still exist in the south-west. The Cumberland, Tennessee, Licking, and Kentucky rivers rise among the mountains in the east, and cross the state to the Ohio. Southward from the Ohio River extends a semicircular tract of land of Silurian formation; here the soil is produced by the disintegration of the fossiliferous blue limestone, and in this, the famous Blue Grass country, the most exhausting crops, such as tobacco and hemp, may be raised continuously for a series of years without materially impairing the productive value of the soil. A somewhat narrow belt of Devonian shale is also very fertile, and the lower strata contain petroleum. The eastern coal-field (10,000 sq. m.) is a prolongation of the Appalachian deposits; the western (4000 sq. m.) belongs to the Illinois tract. The coal is bituminous, and some excellent cannel occurs. The iron ores are of excellent quality, and are found throughout a district of 20,000 sq. m. Galena, building-stones, and salt are obtained. Through the limestone formations the streams have cut deep gorges, and in a region of about 6000 sq. m. much of the drainage is subterranean. The long-continued erosive action of the water has undermined a large part of this region, and produced numerous and often extensive caverns—the best known being the Mammoth Cave (q.v.). Kentucky is densely wooded over two-thirds of its area. Notwithstanding this large proportion of forest land, it has always been one of the leading agricultural states; it is the principal tobacco-producing state in the union, and breeds excellent stock and racehorses. The chief manufacture is tobacco; next come whisky, ironworking, and wooden manufactures. Pop. (1860) 1,155,684; (1910) 2,289,905. The largest cities are Louisville (225,000), Covington (53,000), Lexington (35,000), and Newport (30,000); the capital is Frankfort (10,500). Numerous remains indicate that the mound-builders lived here; the name Kentucky, 'dark and bloody ground,' commemorates the conflicts between various warlike tribes. Included in the original grant to the colony of Virginia, Kentucky in 1790 was made a territory, and in 1792 a state. Though a slave-holding state, it did not secede during the civil war.

Ke′okuk, a city of Iowa, almost at its south-east extremity, on the Mississippi River (crossed by a railroad bridge, and by a great dam, for electric-power purposes), 161 miles by rail ESE. of Des Moines. It has law, medical, and commercial colleges, various manufactures, and a large trade by rail and river. The biggest steamboats could always come up to Keokuk, and the 'Des Moines rapids,' just above, are now passed by a great canal, 11 miles long. Pop. 14,000.

Ker′bela, a town and holy place in Asiatic Turkey, 60 miles SW. of Bagdad. Pop. 65,000. The pilgrims number at least 200,000 annually, the sanctity of the place arising from its being built on the battlefield where Hussein, son of Ali and Fatima, perished (680), seeking to maintain his claim to the califate.

Ker′guelen's Land, or Desolation Island, of volcanic origin, in the Antarctic Ocean, between 48° 39′—49° 44′ S. lat. and 68° 42′—70° 35′ E. long., is 85 miles long by 79 wide. Mount Ross attains 6120 feet; and most of the interior is covered with an ice-sheet and its glaciers. Numerous islands and rocks encircle the coasts, which are penetrated by long fjords, that form good harbours. The climate is raw, and storms are nearly constant. The island was discovered in 1772 by a Breton explorer, Kerguelen-Trémarec, and was visited by Captain Cook (who christened it Desolation Island) in 1776, and in 1874 by the *Challenger*, and by English, American, and German expeditions to observe the transit of Venus. France annexed it in 1893.

Kerki, a town of central Asia, on the left bank of the Amu-Daria or Oxus, 120 miles S. of Bokhara city. An important place both commercially and strategically, it was occupied and garrisoned by Russia in 1887.

Kermadec Islands, a group of volcanic islands in the Pacific Ocean, 700 miles NE. from Auckland in New Zealand. It consists of four principal islands—Raoul or Sunday (7200 acres), Macaulay (756 acres), Curtis, and L'Esperance—and several smaller islands. The group was discovered in 1788, annexed by Britain in 1886, and in 1887 declared part of New Zealand. See a work by S. Percy Smith (1887).

Kerman, or Karman (anc. *Carmania*), one of the eastern provinces of Persia, lying south from Khorassan. Area, 59,000 sq. m.; pop. 300,000. Kerman, the chief town, near the middle of the province, in the central mountain-range, contains a pop. of 70,000. In 1722 the Afghans destroyed it; in 1794 it was pillaged by Aga Mohammed, and 30,000 of the inhabitants made slaves. But the chief cause of the decline of its trade was the fall of Gombroon, its port, before the rising prosperity of Bushire. It is noted for the manufacture of carpets, felts, and brass cups, and as a distributing centre for E. Persia.

Kermanshah (also *Karmanshah* and *Kirmanshahan*), a flourishing town of Persia, capital of Persian Kurdistan, near the right bank of the river Kerkhah. It manufactures carpets and weapons. Pop. 30,000.

Ker′rera, an Argyllshire island, screening the Bay of Oban. It is 4½ miles long, 1¾ mile wide, 5 sq. m. in area, and 617 feet high. Alexander II. died here. Pop. 80.

Kerry, a maritime county of SW. Ireland, in the province of Munster, is bounded N. by the Shannon estuary, and W. by the Atlantic. Area, 1853 sq. m. or 1,185,918 acres, of which less than one-tenth is under crops. One-fourth is barren mountain-land, and more than 11 per cent. bog and marsh. Maximum length, N. to S., 67 miles; maximum width, 55 miles. Its coast-line, 220 miles long, is fringed with islands, of which the chief are Valentia, the Blasquets, and the Skelligs; and is deeply indented by Kenmare, Dingle, and Tralee Bays. The principal mountain group is Macgillicuddy's Reeks, whose summit, Carran Tual (3414 feet), is the highest in Ireland. The rivers are short. The county contains many lakes, those of Killarney (q.v.) being of exquisite beauty. The climate is mild, but moist, especially on the coast. Iron, copper, and lead ores abound, but are not much worked. Slate and flagstone are quarried in Valentia. The coast fisheries employ nearly 2000 men and boys. Since 1885 Kerry returns four members. Pop. (1841) 293,880; (1901) 165,331; (1911) 159,691, nearly all Roman Catholics.

Kertch, previous to being levelled with the ground by the allies in 1855 the most important port of the Crimea, is situated on the eastern shore of the peninsula, on the strait of Kaffa or Yenikale, which, 26 miles long and 3 to 25 wide, connects the Sea of Azov with the Black Sea. It still has an export trade to the extent of nearly £200,000 annually in grain, linseed, leather, fish, and caviare. Kertch, founded in the middle of the 6th century B.C. by Miletans, from 1318 to 1475 was a depôt of the Genoese, then came to the Turks, and finally, in 1771, to the Russians. Pop. with the neighbouring Yenikale, 30,500.

Kes′teven, The Parts of, the south-west division of Lincolnshire.

Keswick (*Kez′ick*), a market-town of Cumberland, near the confluence of the Greta and the Derwent, 16 miles NNW. of Ambleside, and by a branch-line (1865) 18 W. of Penrith junction, 36 SSW. of Carlisle. In its immediate vicinity are wooded Castle Head and beautiful Derwentwater, whilst to the north towers Skiddaw (3058 feet). A great tourist centre, it is a pleasant little place, with half-a-dozen hotels, a good public library, a recreation ground, a town-hall (1813), lead-pencil factories, Greta (q.v.) Hall, and a church (1839), besides the old church of Crosthwaite (q.v.), ¾ mile N. Pop. 4400.

Keszthely, a market-town of Hungary, on the western shore of Lake Balaton, 113 miles by rail SW. of Budapest. Pop. 7000.

Ket′tering, a market-town (since 1227) of Northamptonshire, 75 miles NNW. of London by rail. The parish church (1450 c.; restored 1862) is a fine Perpendicular structure, with tower and spire. A town-hall and corn exchange was built in 1863; and Kettering has also a free grammar-school, water-works (1872), and manufactures of boots and shoes, stays, plush, brushes, &c. Pop. (urban district) 30,000.

Kew, a village in Surrey, 6 miles W. of Hyde Park Corner, and on the right bank of the Thames, which is here crossed by a fine stone bridge of seven arches, built 1789 and freed 1873. The Royal Botanic Gardens and Arboretum contain magnificent collections of plants, ferns, trees, and shrubs. Established in 1760 by George III.'s mother, and made a national institution in 1840, the gardens now extend over 75 acres, and the arboretum 300 acres. SW. of the gardens is an observatory, chiefly used as a meteorological station. Close to the northern entrance is Kew Palace, formerly a favourite residence of George III., and of Queen Charlotte, who died there. In Kew churchyard is buried Gainsborough. Pop. 3000. See Lloyd Sanders, *Old Kew, Chiswick, and Kensington* (1910).

Kewatin. See Keewatin.

Ke′weenaw, a peninsula of Michigan, on Lake Superior, with famous copper-mines.

Keyham, seat of a naval engineering college, on an inlet of the Hamoaze, close to Devonport.

Key or **Kei Islands**, a small group in the East Indies, lying S. of Dutch New Guinea and NE. of Timor, consists of Great Key, Little Key, and some smaller islets. Total area, 680 sq. m.; pop. 20,000, Malays and Alfuros, three-fourths on Great Key. This is a long narrow island, stretching north to south, volcanic in origin, and with a rocky, hilly surface that rises to nearly 3000 feet. Little Key, to the west, is of coral formation, and lies low; it is said to have made its appearance in the middle of the 19th century during an earthquake disturbance. All the islands are covered with dense jungle, valuable timber being the principal product. Fishing is the chief occupation; and *bêche-de-mer* is gathered. The group has been Dutch since 1645.—The islets of the Bahamas, Florida, &c. are called generally keys or cays (Span., 'rocks' or 'reefs').

Key West, a port of entry and health-resort, the capital of Monroe county, Florida, is situated on the island of Key West (Span. *Cayo Hueso*, 'Bone Reef'), 60 miles SW. of Cape Sable. It is a coral island, 7 miles long, 2 to 3 wide, and nowhere more than 11 feet above the level of the sea. There is a naval station, with a good harbour. The streets are wide and straight; most of the houses are of wood. The exports are salt, turtles, sponges, fruits and vegetables, and cigars. The town is connected by a railway (156 miles) on arches with the mainland. Pop. 20,000.

Khabarovsk, or Khabarovka, capital of the Maritime Province, and seat of the governor-general of the Amur (q.v.); pop. 50,000.

Khairpur, the chief town of Khairpur state, in Sind, stands among marshes 15 miles E. of the Indus; pop. 7000.—Area of *state*, 6109 sq. m.; pop. 225,000, mostly Mohammedans.

Khandesh, or Candeish, on the northernmost edge of the Deccan in India, is intersected by the Tapti River. Area of the district (in Bombay presidency), 10,907 sq. m.; pop. 1,460,851.

Khania. See Canea.

Khan-Tengri. See Tian-shan.

Kharbin. See Harbin.

Kharkoff, capital of a Russian government, and one of the chief towns of the Ukraine, is by rail 312 miles NW. of Taganrog and 465 S. by W. of Moscow. It is the seat of a Greek bishop and of a university (1805), with four faculties, 5000 students, an observatory, a library of 200,000 volumes, a botanical garden, &c. There are also a theological seminary, a veterinary school, and a government model farm. The chief industrial products are sugar, soap, candles, felt, brandy, tobacco, and iron; but the place is principally celebrated for its four great fairs, at two of which (in horses and wool) the united turnover amounts annually to the sum of nearly £4,000,000. Pop. 221,500.—The *government*, situated in Little Russia, has an area of 21,000 sq. m., and a population of 3,300,000.

Khartoum, or Khartûm, the most important town in Egyptian Soudan, stands on the low tongue of land between the Blue and the White Nile, at their junction, 445 miles SW. of Suakim (*viâ* Berber), and 1350 S. of Cairo by rail and steamer. Khartoum is the starting-point and terminus of caravans to the interior, and has been notorious for its great activity in the slave-trade. It was founded under the rule of Mehemet Ali in 1823, and soon became a place of commercial importance, and was made the capital of the Egyptian Soudan. It has a melancholy interest for Englishmen since its heroic defence by General Gordon against the forces of the Mahdi in 1884–85. Two days before the rescuing army reached it, Khartoum fell, and with it Gordon (26th January). It has now a university and an Anglican cathedral (consecrated 1912). Pop., with North Khartoum and Omdurman, 100,000.

Khasi and Jaintia Hills, a district in Assam; area, 6000 sq. m.; pop. 200,000; administrative headquarters, Shillong (pop. 3640). It forms part of the watershed between the Brahmaputra and the Surma, and rises in a series of steplike plateaus. The rainfall in some parts is enormous; the average for twenty-five years being 489 inches. In 1861, 805 inches (366 in July alone) are recorded to have fallen. For ages Bengal has been supplied with limestone, lime, and oranges, and since 1830 with potatoes, from this district; and coal and iron ore exist, but only the latter is extracted. The Khasis are an Indo-Chinese race.

Khatmandu′, the capital of Nepal, at the confluence of the Baghmati and Vishnumati rivers. The principal building is the immense ugly palace of the Maharaja. Pop. 50,000.

Khelat. See KELAT.

Kherson, or CHERSON, capital of a Russian government, stands on the Dnieper, 19 miles from its mouth, and 81 NE. of Odessa. The town was laid out by Prince Potemkin in 1778 as a port for the construction of ships of war; but was soon supplanted by Odessa and Nikolaieff, both as a dockyard and a commercial outlet. It has a large trade in timber, and manufactures soap, tallow, beer, and tobacco. Wool-cleansing is an important industry. At Kherson Potemkin is buried, and John Howard, the prison reformer, died. Pop. a little over 70,000.—The *government* borders on the Black Sea, having the Dnieper for its eastern boundary and the Dniester for its western, while the interior is watered by the Bug, Ingul, &c., which form shallow, salt lagoons next the sea. Area, 27,515 sq. m.; pop. about 3,500,000. The chief towns are Kherson, Odessa, Nikolaieff, Otchakoff, Yelisavetgrad, Voznesensk, and Tiraspol.

Khiva, also called KHARASM, KHWARÍZM, or URGENJ (anc. *Chorasmia*), a khanate of Turkestan in central Asia, lies between 37° 45′—44° 30′ N. lat. and 50° 15′—63° E. long., and contains about 25,000 sq. m., the surface being mostly a sandy desert, with many fertile tracts scattered over it. It is bounded N. by the Russian territory and Sea of Aral, E. by Bokhara, S. by Persia, and W. by the Caspian Sea. The chief oasis, in which the capital Khiva is situated, stretches from the mouth of the Oxus or Amu-Daria for 200 miles along its banks, and is watered by canals fed by it. The inhabited area is about 5000 sq. m.; the pop. about 260,000 settled inhabitants and nearly as many nomads. Khiva, successively subject to Bactria, Parthia, Persia, and the Califate, became an independent monarchy in 1092 A.D., but in 1221 succumbed to the Mongols, under Genghis Khan, and in 1370 came to Timûr. Timûr's descendants were subdued in 1511 by a chief of the Uzbegs. In 1717 Peter the Great endeavoured to conquer Khiva, in 1839 the attempt was renewed by the Czar Nicholas; but it was not till 1873 that a great and final effort was made to crush Khiva. The Russians entered it on 10th June; and the khan had to cede to Bokhara the Khivan possessions on the right bank of the Amu-Daria. The rest of Khiva is ruled by the khan, under Russian suzerainty.—KHIVA, the capital of the khanate, is on the Hazveti Pehlivan Canal, in the western portion of the great oasis. It consists almost entirely of earth-huts. Pop. 20,000. Other towns are Yenghi-Urgenj, the commercial centre of the khanate, and Kungrat, not far from the Aral. See works by Vambéry (1864), Burnaby (1876), Stumm (Eng. trans. 1885), and Lansdell (1885).

Khodavendighiar, a Turkish division of Asia Minor, south of the Sea of Marmora.

Khoi, a town in the Persian province of Azerbijan, 75 miles NW. of Tabriz. Here Selim I. defeated the Persians in 1514. Pop. 25,000.

Khojak, a pass in the Khwaja Amran range, at the head of the Pishin valley, has been pierced at a height of 6400 feet above the sea by a tunnel, 2¼ miles long, on the railway from India to Kandahar.

Khojend, a walled town of Russian Turkestan, on the Sir-Daria, 75 miles S. by W. of Khokand. It manufactures silk. The Russians seized it in 1865. Pop. 45,000.

Khokand, once a khanate of Turkestan, now forming the Russian government of Ferghana (q.v.). The town of Khokand has 113,000 inhabitants.

Khonsar, or KHUNSAR, a Persian town, 80 miles NW. of Ispahan. Pop. 12,000.

Khorassan (old Persian 'eastward'), the largest province of Persia, bordering on Afghanistan, contains about 210,000 sq. m., of which nearly one-third is a vast salt waste; of the remainder a large portion consists of plains of shifting sand. The fertile districts are in the north, where the high range of the Elburz crosses the province. The capital is Meshed.

Khorsabad. See NINEVEH.

Khotan, or ILCHI, a city of eastern Turkestan, at the northern base of the Kuen-Lun Mountains; pop. 40,000. For the excavation of the ancient city, see books by Sir A. Stein (1907–12).

Khulm, a city (pop. 15,000), capital of a small state in Afghan Turkestan, adjoining Balkh.

Khurja, a town of India, 50 miles SE. of Delhi. There is a large export of raw cotton to Cawnpore and Calcutta. Pop. 30,000.

Khuzistan (anc. *Susiana*), a province of Persia, having Fars and the Persian Gulf on the south.

Khyber Pass, the great northern military road between the Punjab and Afghanistan, winds 33 miles north-westward, and varies in width from 150 yards to 20, in one place only '10 feet or less.' It is liable to sudden inundations. The mountains on either side are often sheer walls of smooth rock; they vary in height from 1400 to over 3000 feet. The Khyber Pass has been the key of the adjacent regions in either direction from the days of Alexander the Great; and by the treaty of Gandamak (1879) the Anglo-Indian authorities have full control of it.

Kiachta, or KIAKHTA, a town of the Siberian province of Transbaikalia, 165 miles SE. of Irkutsk, close to the Mongolian town of Maimatchin; pop. 9000. Kiachta was from 1689 to 1800 the sole trading-place between China and Russia.

Kiangsi, Kiangsu, provinces of China (q.v.).

Kiao-chao, or KIAO-CHOW, a city inland from the bay of the same name, in the Chinese promontory of Shantung. In 1898 the town, with an area of 130 sq. m. (population, 173,000), was leased to Germany for ninety-nine years, forming a German protectorate. The foreign settlement and port are at Tsing-tao, on the same bay, where fine streets have been built, and waterworks, telephones, electric light, &c. established.

Kidderminster, a parliamentary and municipal borough of Worcestershire, on the Stour, 4 miles above its junction with the Severn, and 14½ miles by rail N. of Worcester, 121 NW. of London. It is a busy, thriving-looking place, chiefly noteworthy for its carpet manufacture, which dates from 1735. Worsted spinning and dyeing are also carried on. Richard Baxter was for fourteen years vicar, and there is a statue of him (1875). An illustrious native was Sir Rowland Hill; a marble statue of him was erected in 1881. Chief buildings are the parish church, Early English to Perpendicular in style, with a noble pinnacled tower; a Renaissance town-hall (1877), a corn exchange (1855), a free library, and a free grammar-school, founded in 1637. Kidderminster was incorporated as a municipal borough by Charles I., and since 1832 has returned one member. Pop. (1851) 18,453; (1911) 24,333.

Kidderpur, outside of Calcutta (q.v.) to the S., has great docks.

Kidwelly, a Carmarthenshire municipal borough (1885), near Carmarthen Bay; pop, 3050.

Kieff (*Kee-yeff'*), one of the oldest towns of Russia, stands on the Dnieper, by rail 586 miles SW. of Moscow and 381 N. of Odessa. From 882 to 1169 it was the capital of the Russian principality, and here in 988 Christianity was first preached in Russia by St Vladimir. Captured by the Mongols in 1240, it was held by Lithuania from 1320 till 1569, and then by Poland till 1654, when it was annexed to Russia. The town is built on elevated ground (350 feet above the river), and the Dnieper is spanned by a fine suspension bridge (1851). The celebrated Petchersk monastery is visited by 250,000 pilgrims annually. The cathedral of St Sophia (1037) contains the tombs of the grand-dukes of Russia; and the cathedral church of the Assumption has a beautiful belfry with a peal of twelve bells. Kieff has nearly seventy churches, many of them with gilded domes and pinnacles, which give the city a striking appearance. The university, removed here from Vilno in 1833, has four faculties and 1700 students. There are also theological colleges, a military school, and an arsenal. The industry is unimportant, except tanning and the manufacture of candles. Considerable trade is done, especially at the January and other fairs. The fortress of Kieff, begun by Peter the Great in 1706, occupies a commanding site on the Dnieper's right bank. Pop. 500,000.—The *government* embraces great part of the Ukraine, and is bounded NE. by the Dnieper; the area is nearly 20,000 sq. m., and the population 4,600,000.

Kiel (*Keel*), chief town of the Prussian province of Sleswick-Holstein, stands 66 miles N. by E. of Hamburg by rail, at the head of a deep inlet (11 miles long) of the Baltic, which admits large ships to anchor close to the town. It is the Baltic headquarters of the German navy, and has imperial shipbuilding-yards, slips, dry and wet docks, &c., naval marine stores, a naval academy, and an observatory. It is also an important commercial port, some 1,100,000 tons of merchandise passing in and out annually. The chief imports are corn, coal, timber, and cattle, whilst coal, flour, beer, butter, cheese, and fish are exported. There are iron-foundries, shipbuilding-yards, corn-mills, breweries, and cabinet-makers' works. Kiel is the seat of a university, founded in 1665, with new buildings completed in 1876, 85 professors and teachers, and nearly 500 students. The 13th-century castle shelters the university library of 200,000 volumes and a museum with sculptures by Thorwaldsen. The bay is defended by forts. For the Baltic Canal connecting the Elbe and the Bay of Kiel, see Baltic Sea. Kiel affords good bathing facilities. Pop. (1875) 37,270; (1890) 69,172; (1910) 211,627.

Kielce, the smallest of the Polish governments of Russia, on the Austrian frontier. Area, 3897 sq. m.; pop. 980,000. The capital, Kielce, 85 miles NE. of Cracow, has 35,000 inhabitants.

Kikinda, Nagy, a town of Hungary, 36 miles by rail W. of Temesvar; pop. 26,500.

Kikuyu, a village of British East Africa, where a momentous missionary conference met in 1913.

Kilauea, the great volcano of Hawaii (q.v.).

Kilbarchan (*Kilbar'hhan*), a town of Renfrewshire, 12 miles W. by S. of Glasgow. It manufactures silks, cottons, &c. Pop. 3500.

Kilbeggan, a town of Westmeath, 4 miles SE. of Horseleap station; pop. 600.

Kilbirnie, an Ayrshire town, on the Garnock, 20 miles SW. of Glasgow. It manufactures linen-thread, wincey, nets, &c. Pop. 6000.

Kilbowie, part of Clydebank (q.v.).

Kilbride, East, a town of Lanarkshire, 12 miles SSE. of Glasgow; pop. 1600.

Kilbride, West, an Ayrshire town, 4¼ miles NNW. of Ardrossan; pop. 2500.

Kilburn, a metropolitan suburb, 5 miles NW. of St Paul's. See also Kinburn.

Kilchurn (*Kilhoorn'*), a ruined castle of the Campbells, in Argyllshire, at the NE. end of Loch Awe, 2½ miles W. by N. of Dalmally.

Kilcreggan, a coast-village in Rosneath peninsula, Dumbartonshire, 3¼ miles NW. of Greenock. It forms a police-burgh with Cove. Pop. 860.

Kilcullen, a town of Kildare, 5 miles S. of Newbridge station; pop. 600.

Kildare', a county of Leinster, Ireland, bounded by Dublin, Wicklow, Queen's and King's counties, Meath, and Carlow. Its chief town is Naas; and other towns are Kildare, Kilcullen, Maynooth, and Athy, besides many villages. The area is 418,836 acres, or 654 sq. m.; the surface is generally flat, and the soil very productive. In the northern part the great Bog of Allen covers some 40,000 acres, intersected by elevated ridges of dry ground. From this bog rises the conical Hill of Allen, 300 feet high. Agriculture is the main occupation. The most fertile and best-farmed districts are the valleys of the Liffey and the Greese; other rivers are the Boyne and Blackwater (both having their source in County Kildare), the Barrow and the Lesser Barrow. To the south of the town of Kildare is the Curragh (q.v.) of Kildare, an undulating plain of bright green grass covering about 8000 acres. Kildare returns two members. Pop. (1841) 114,488; (1911) 66,627, of whom five-sixths were Catholics. Kildare is noted for its antiquities—giant stone pillars, earthworks, sepulchral mounds, a stone circle, five round towers, and the ruins of many religious houses and castles.

The town of Kildare is 30 miles SW. of Dublin. St Bridget (453–523) founded a nunnery here, and the older name *Druim Criaidh* was changed to *Cil-dara*, the cell or church of the oak, from an old tree under which she built her cell. There are remains of three other monastic institutions, and a round tower, the finest in the county, 103 feet high. The Protestant see (1550) is now united with Dublin, and the Roman Catholic see forms the diocese of Kildare and Leighlin. Kildare suffered severely in the wars of the 16th and 17th centuries. The rebellion of 1798–99 began in Kildare, which prior to the Union returned two members. Pop. 2700. See works by Rawson (1807) and O'Byrne (1867).

Kildo'nan, a Sutherland parish, 83 miles NNE. of Dingwall. Gold was mined here in 1868–69, and renewed attempts made in 1894 and 1911.

Kilfinnane, a village of County Limerick, 5 miles SE. of Kilmallock. Pop. 1000.

Kilia, a town in the portion of Bessarabia ceded by Roumania to Russia in 1878, is situated on the northern bank of the Kilia branch of the Danube, 20 miles NE. of Ismail. Pop. 11,700.

Kilima-Nja′ro, an isolated mountain mass in East Africa, standing between Victoria Nyanza and the coast, just within the northern limit of the German East African Company's territory, in 3° 20′ S. lat. and 37° 50′ E. long. It consists of two peaks, or rather craters, Kibo and Kimawenzi, connected by a broad saddle (14,000 feet) studded with lava hills. Kibo was climbed by Dr Meyer in 1889. Its highest point is 19,680 feet above sea-level; its crater is 650 feet deep and 6500 feet in diameter. He also climbed Kimawenzi, and found it to exceed 17,250 feet. The crater rim of both peaks is covered with a thick crust of ice. In 1894, with the assent of the I.B.E.A. Company, a community of peaceful (but armed) Austrian Communists established themselves on the slopes of Kilima-Njaro. See H. H. Johnston's *Kilimanjaro Expedition* (1886).

Kilkee, a watering-place of County Clare, on Moore Bay, 8 miles NW. of Kilrush. Pop. 1700.

Kilkeel, a seaport of County Down, 10 miles SE. of Warrenpoint station. Pop. 1370.

Kilkenny, an inland county of Leinster, bordering on Queen's County, Carlow, Wexford, Waterford, and Tipperary. Its area is 509,732 acres, or 796 sq. m. Vegetation is earlier here than in the rest of Ireland, and the soil along the Suir, Nore, and Barrow is very rich. In the northern part there are large tracts of moor devoted to sheep and cattle. S. and SE. the surface rises to a considerable elevation; and in the north there is another hilly region forming part of the Castlecomer anthracite coalfield, whose output is about 80,000 tons per annum, or more than one-half that of all Ireland. In the western district are the Walsh Mountains. The chief towns are Kilkenny, Callan, Thomastown, Freshford, Urlingford, and Castlecomer. Pop. (1841) 202,420; (1911) 74,962, of whom nine-tenths were Catholics. Prior to the Union Kilkenny returned sixteen members to the Irish parliament, but now the county returns two and the city one. Kilkenny, anciently part of the kingdom of Ossory, was formed into a county by King John in 1210. Its Norman remains are very numerous, and among other antiquities are circular groups of stones on Slieve Grian and the Hill of Cloghmanta, cromlechs and raths, forts and mounds, five round towers, and monastic ruins at Jerpoint, Rosbercon, Thomastown, Knocktopher, &c. The most notable castle is Graney, in Iverk, supposed to have been founded by the Earls of Ormonde in 1521. The cave of Dunmore, between Kilkenny and Castlecomer, which opens with a natural arch 50 feet high, is noted for its stalactite chambers and its subterranean stream. See J. G. Robertson's *Antiquities and Scenery of Kilkenny* (1851).

KILKENNY, the county town, is situated on the Nore, 81 miles SW. of Dublin by rail. Pop. (1851) 19,975; now only 10,500. At one time it was the seat of linen and woollen manufactures; and it does some marble-polishing, and has a trade in provisions. The name is Celtic—Cil-Canice—the church of St Canice or Kenny, a building dating from 1052, and the largest ecclesiastical edifice in Ireland except St Patrick's at Dublin. It is in the Early English style, 226 feet long by 123 across the transepts. There are many old sepulchral monuments, and the remains of a round tower still 100 feet high. Other ecclesiastical remains are the preceptory of St John's (1211); the Dominican abbey (1225), still used as a Roman Catholic church; and the Franciscan abbey (1230). In 1857 was erected the Roman Catholic cathedral, at a cost of £30,000, with a massive central tower 186 feet high. On a precipitous rock above the Nore is Strongbow's famous castle (1175), restored during the 19th century as a residence for the Marquis of Ormonde. The 16th-century grammar-school also stands by the river, fronting the castle; here Swift, Congreve, and Bishop Berkeley received their education. Near the city is the Roman Catholic college of St Kyran. Cromwell laid siege to the city in 1648, and in 1650 it capitulated on honourable terms. The fable of the 'Kilkenny cats,' which fought till only the tails were left, was a satire on the contentions of Kilkenny and Irishtown in the 17th century.

Killala, a seaport of County Mayo, 8 miles NW. of Ballina station. Pop. 500.

Killaloe (*Killaloo′*), a town of Clare, on the Shannon, 17 miles NE. of Limerick. Pop. 800.

Killarney, a Kerry market-town, 185 miles by rail SW. of Dublin, and 47 WNW. of Cork. The Roman Catholic cathedral, a very imposing structure, along with the Bishop's Palace, was designed by Pugin. There are also a large Episcopal church, a lunatic asylum, a court-house, &c. Pop. 5800.

Killarney, THE LAKES OF, are a series of three connected sheets of water, the lowermost of which is within 1½ mile of the town of Killarney. The outflow is by the river Laune north-west to Castlemain Harbour. These famous lakes are situated in a basin in the midst of the mountains of Kerry, some of which rise abruptly from the water's edge densely clothed with trees from base to summit. The lower lake, Lough Leane, covers 5001 acres in area, is studded with richly-wooded islands—the largest Ross Island, on which is an old stronghold of the O'Donoghues. Another island is the 'sweet Innisfallen' of Moore's song, and on this is the picturesque ruin of an abbey, founded by St Finian the leper in the 6th century. The upper lake covers 430 acres, and is also studded with islands. Between the two is Lough Torc (680 acres). Connecting the upper with the lower and middle lakes is the Long Range, a beautifully-wooded, winding stream 2½ miles long. Midway in its course occurs the famous echo, caused by a lofty rock, the Eagle's Nest. Between the lower and the middle lake is the fine ruin of Muckross Abbey, founded by the Franciscans in 1440. A peculiarity of the scenery is the luxuriant growth of arbutuses on the islands of the lakes. See works by Mr and Mrs Hall (1843-78).

Killashandra, a town of Cavan, 6 miles NW. of Crossdoney station. Pop. 550.

Killearn, a Stirlingshire village, 16½ miles NNW. of Glasgow. At the farmhouse of Moss, 1¾ mile SSW., was born George Buchanan.

Killenaule, a town of Tipperary, 11 miles SE. of Thurles. Pop. 550.

Killiecrankie, a beautiful wooded pass in Perthshire, on the Garry, 15 miles NNW. of Dunkeld. It is traversed by Wade's Great Highland Road (1732), and by the Highland Railway (1863). At its head, on 27th July 1689, Claverhouse defeated Mackay and was slain.

Killin′, a Perthshire village, near the head of Loch Tay, 37 miles NW. of Stirling. Pop. 400.

Killorglin, a town of County Kerry, 13 miles NW. of Killarney; pop. 1080.

Killybegs, a Donegal seaport, 17 miles W. of Donegal town; pop. 600.

Killyleagh (*Killylay'*), a seaport of County Down, on the west side of Lough Strangford, 6 miles N. of Downpatrick; pop. 1600.

Kilmainham, a western suburb of Dublin city. Here are the Royal Hospital for 250 old soldiers, founded by Charles II., and the prison of Kilmainham.

Kilmalcolm (locally *Kil-ma-koam'*), a Renfrewshire village, 15 miles WNW. of Glasgow; pop. 2800.

Kilmallock, a market-town, 17 miles S. of Limerick; pop. 1000.

Kilmar'nock, the largest town in Ayrshire, on Irvine and Kilmarnock waters, 15½ miles by rail NNE. of Ayr, and 24 SSW. of Glasgow. It received its name *Kil-mo-Ernin-occ* (Gael., 'church of my little Ernin') from the dedication of its church about 1200 to an Irish saint of the 7th century; and in 1591 it was made a burgh of barony under the Boyds, from which date its hose and bonnet making grew into thriving industries. The great carpet manufacture was introduced in 1777, and the printing of calicoes in 1770, of shawls in 1824; tweeds, winceys, boots, &c. are also manufactured; and the Glasgow and South-Western Railway works were transferred hither in 1858. The staple trade, however, is in connection with iron, owing to Kilmarnock's situation in a great mineral district; and the October cheese-fair (established 1855) is second to none in the kingdom. The Boyds' Dean Castle, 1 mile NE., was reduced by fire to ruin in 1735; and the town itself, which has suffered twice from fire (1668 and 1800), and once from flood (1852), has few buildings of interest. The town-hall (1805), the court-house (1852), the corn exchange (1862), with its Albert tower 110 feet high, and the new academy (1876) may be noticed, as also may a statue of Sir James Shaw (1848), and the Kay Park of 41 acres (1879), with its Burns monument, a tower 80 feet high. Of Burns and of the Covenanters Kilmarnock has memories; and it was the birthplace of Alexander Smith. Since 1832 it has united with Rutherglen, Dumbarton, Port-Glasgow, and Renfrew to return one member, its parliamentary boundary having been extended in 1885. Pop. (1841) 19,398; (1911) 34,728. See M'Kay's *History of Kilmarnock* (1848; 4th ed. 1880).

Kilmaurs', a town of Ayrshire, 2¼ miles NNW. of Kilmarnock; pop. 1700.

Kilmuir', a Skye hamlet, 20 miles NNW. of Portree, with Flora Macdonald's grave.

Kilmun', an Argyllshire village, on the NE. shore of the Holy Loch, 7½ miles WNW. of Greenock; pop. 1000.

Kilpatrick, Old, a Dumbartonshire village near the N. bank of the Clyde, 11¼ miles WNW. of Glasgow. It is the traditional birthplace of St Patrick. The Kilpatrick Hills attain 1313 feet. Pop. 2000.

Kilravock (*Kilrawk'*) an old castellated mansion of Nairnshire, long the seat of the Roses, on the river Nairn, 7 miles SW. of Nairn town.

Kilrea, a town of Londonderry, on the Bann, 18 miles S. of Coleraine; pop. 750.

Kilrenny, a royal burgh in the East Neuk of Fife, 1½ mile NE. of Anstruther. It is one of the St Andrews parliamentary burghs. Pop. 2500.

Kilrush', a Clare seaport and watering-place, on the N. shore of the Shannon estuary, 36 miles W. of Limerick. Pop. 3700.

Kilsyth (*Kil-sith'*), a town of Stirlingshire, 13 miles NE. of Glasgow, with quarries and coal and iron mines. Founded in 1665, it was made a burgh of barony in 1826. Here, on 15th August 1645, Montrose with 4900 followers almost annihilated 7000 Covenanters. Revivals took place here in 1742 and 1839. Pop. (1851) 3949; (1911) 8106. See Anton's *History of Kilsyth* (1890).

Kilwa. See Quiloa.

Kilwinning, a town of Ayrshire, on the Garnock, 3½ miles NNW. of Irvine and 26 SW. of Glasgow. The stately Tironensian abbey, founded in the 12th and demolished in the 16th century, was dedicated to Winnin, an Irish saint, who is said to have founded a church here about 715. The traditional birthplace of Freemasonry in Scotland, with a new 'mother lodge' (1893), Kilwinning was also celebrated (1488–1870) for archery; its July shooting at the popinjay, which was placed on the steeple (105 feet high), is described in Scott's *Old Mortality.* Eglinton Castle (1798), the seat of the Earls of Eglinton (q.v.), is 1½ mile SE.; and the Eglinton Ironworks (1846) afford employment. Pop. 5000. See works by Wylie (1878) and Lee Ker (1883).

Kim'berley, (1) a town of Notts, 5¾ miles NW. of Nottingham; pop. of civil parish, 5000.—(2) A Norfolk parish, 3½ miles NW. of Wymondham, with the seat of the Earl of Kimberley.—(3) Capital of Griqualand West, South Africa, the most important inland town of the Cape Province, is situated 540 miles NE. of Capetown by rail (30 hours). With the rest of Griqualand West, Kimberley became part of Cape Colony only in 1880; but the town owes its existence and rapid growth to the diamond-mines, the working of which dates from 1871. It is on the main line from Capetown and the sea to the Orange Free State, the Transvaal, Portuguese East Africa, Rhodesia, and Belgian Congo. There are a handsome town-hall, post-office, high court, public library, and botanic gardens. In the South African war Kimberley was defended by British troops against the Boers for 122 days in 1899–1900, until relieved by French. Pop. 30,000, of whom half are whites.—(4) A fertile district in the Fitzroy basin in northern (tropical) Western Australia, where gold was found in 1893.

Kimbolton, a market-town of Hunts, on the Kym, 11 miles WSW. of Huntingdon. Kimbolton Castle is the seat of the Duke of Manchester. Pop. of parish, 1000.

Kimmeridge, a Dorset parish, 3½ miles SW. of Corfe Castle. It gives name to Kimmeridge Clay, the lowest series of the Upper Oolite.

Kim'polung, (1) a town of Wallachia, stands in a valley at the foot of the Carpathians, 80 miles NW. from Bucharest. Pop. 9090.—(2) A town in the extreme south of Bukowina. Pop. 5534.

Kinabalu. See Borneo.

Kinburn, or Kilburn, a former fort (razed 1860) of south Russia, opposite Otchakoff, on a long narrow sandbank which forms the southern boundary of the Dnieper's estuary.

Kincar'dine, a seaport now of Fife (till 1889 Perthshire detached), on the Forth's left bank, 10 miles W. by N. of Dunfermline.

Kincar'dineshire, or The Mearns, a maritime county of Scotland, with Aberdeenshire and the

Dee on the N., Forfarshire and the North Esk on the S. and W., and the North Sea on the E. Area, 383 sq. m., or 245,346 acres, of which 120,050 are in cultivation, and 23,153 in wood. The county may be divided into four sections—viz. the Coast, the 'Howe o' the Mearns,' the Grampians, and Deeside. Much of the first two is of superior quality; the 'Howe' forms a continuation of the Valley of Strathmore (q.v.). The Grampians, running across the country from east to west, parallel to the Dee, attain in Mount Battock 2555 feet high. The principal towns and villages are Stonehaven, Bervie, Laurencekirk, Banchory, Johnshaven. Of the objects of antiquarian interest the most noted are Dunnottar Castle and Raedyke's Camp, one of the sites of the Battle of the Grampians. Kincardineshire was the birthplace of George Wishart, Robert Barclay, Dr J. Beattie, and Dr Thomas Reid; and the father of Robert Burns was born in Dunnottar parish. Pop. (1801) 26,349; (1871) 34,630; (1911) 41,008.

Kinchinjinga, or KANCHANJANGA, a Himalaya peak (28,176 feet) between Sikkim and Nepal.

Kinder Scout, the highest summit (2080 feet) of the Peak district, Derbyshire.

Kineton, a Warwickshire market-town, 11 miles S. by E. of Warwick; pop. of parish, 1000.

Kinfare. See KINVER.

Kinfauns, a Gothic mansion (1322) of Perthshire, 3 miles E. by S. of Perth.

King Country. See WAIKATO.

King Edward VII. Land. See ANTARCTICA.

King George's Sound, an inlet 5 miles north and south, and 5 miles broad, at the south-west angle of Western Australia, an excellent roadstead, with two landlocked recesses; since 1912 a sub-base for destroyers and submarines.

King Haakon VII. Plateau. See ANTARCTICA.

Kinghorn, a royal burgh of Fife, on the Firth of Forth, 3 miles S. of Kirkcaldy by rail, has golf-links and a monument to Alexander III., killed (1286) at Kinghorn Ness; pop. 1550.

Kingsbridge, a town of Devon, at the head of Salcombe haven, 10 miles SW. of Dartmouth. 'Peter Pindar' was a native. Pop. (urb. dist.) 3050.

Kingsburgh, a Skye mansion on the E. side of Loch Snizort, 9 miles NW. of Portree. It has memories of Prince Charlie, Flora Macdonald, and Dr Johnson.

King's County, an inland county of Ireland, in Leinster, is separated on the W. by the Shannon from Roscommon and Galway. It is 20 miles long from N. to S. by 58 wide. Area, 493,985 statute acres, or 772 sq. m. Of this 23 per cent. is covered with bogs, including a large part of the Bog of Allen, and about 26 per cent. is under crops. Pop. (1841) 146,857; (1861) 90,013; (1911) 56,832, of whom nine-tenths were Roman Catholics. The surface is flat, except for the Slieve Bloom Mountains (1733 feet) on the south boundary. The Grand Canal traverses the north of the county, and joins the Shannon. The river Barrow separates it from Queen's County on the south-east. King's County, constituted a shire in 1557, and named in honour of King Philip, returns two members. In the north-west is Clonmacnoise Abbey (q.v.); at Birr Castle Lord Rosse erected his great telescope. The chief towns are Tullamore, Parsonstown or Birr, and Portarlington.

Kingsclere, a town of Hants, 9 miles NW. of Basingstoke. Pop. of parish, 2500.

Kingscourt, a town of Cavan, 20 miles N. of Navan. Pop. 800.

King's Lynn. See LYNN.

Kingsmill Islands, another name for the Gilbert Islands (q.v.).

King's Norton, till 1912 a Worcestershire urban district (with Northfield), was then added to Birmingham. It manufactures paper, screws, chocolates, &c.

King's Seat. See OCHILS.

Kingston, chief town of Frontenac county, Ontario, is situated at the foot of Lake Ontario, and at the mouth of the Cataraqui Creek, 161 miles by rail ENE. of Toronto. It has handsome public buildings, and is the seat of the Royal Military College of Canada (1876), of Queen's University (1841), with museums and an observatory, and of the Royal College of Physicians and Surgeons (1854), and the Women's Medical College (1883) affiliated to it. The city has, besides excellent railway facilities, good water-communication by the lake, the St Lawrence, and the Rideau Canal, which last connects it with Ottawa. It possesses a large, sheltered harbour, with an active trade, and strongly fortified; and, besides busy shipyards, has manufactories of locomotives and stationary engines, machinery, leather, boots and shoes, agricultural implements, wooden wares, &c. Grant Allen and George Romanes were born here. The capital of Canada from 1841 to 1844, Kingston is the seat of an Anglican bishop and of a Roman Catholic archbishop. Its site was occupied by the old French fort of Frontenac. Population, nearly 20,000.

Kingston, the capital of Jamaica, stands on the north side of a landlocked harbour, the best in the island, and, for its size, one of the best in the world. Population, about 58,000. It was founded in 1693–1703, after the neighbouring town of Port Royal had been destroyed by an earthquake. From this place, afterwards rebuilt, Kingston is distant 6 miles, the breadth of its noble haven; while with Spanish Town, towards the interior, it has since 1846 been connected by railway. In 1758 Spanish Town was made the capital, but in 1872 the seat of government was removed to Kingston. Kingston was visited in 1880 by a violent hurricane, by a vast conflagration in December 1882, and a terrible earthquake in 1907. The most interesting public building is the Old Church, where Benbow the 'old sea-dog' is buried.

Kingston, capital of Ulster county, New York state, stands on the right bank of the Hudson, 54 miles S. of Albany. It is a railway and canal terminus, and forwards enormous quantities of blue-stone flags. Kingston is also a centre of the hydraulic cement business, and contains breweries, tanneries, flour-mills, foundries, brickyards, &c. Pop. 26,000.

Kingston-on-Hull. See HULL.

Kingston-upon-Thames, a municipal borough of Surrey, 12 miles SW. of London, lies on the right bank of the Thames, here crossed by two bridges—one of stone completed 1828 and freed 1870, and the other an iron railway viaduct. Of late years, with its suburbs of Norbiton, Surbiton, and New Malden, it has grown rapidly, its easy access to London, coupled with its facilities for boating and its pleasant surroundings, notably Hampton Court, Bushy and Richmond Parks, having attracted large numbers of residents. The borough is within the London Metropolitan Police District. Pop. (of parish, 1801) 4886; (1891) 27,059; (1911) 37,975. The parish church has some fine monuments; the county council buildings, costing £36,000, were undertaken in 1890. Seven of the Anglo-Saxon kings were crowned here, as recorded on the coronation-stone still standing near the market-place; King John, who granted the town its first charter, was a frequent visitor in 1204–15; in 1264 Kingston Castle (of which no traces now remain) was captured by Henry III.; Fairfax made the town his headquarters in 1647; and a year later took place in the neighbourhood the last fight between the royalists and Roundheads. At Ham Common lived Gay's 'Kitty,' Duchess of Queensberry. See Biden's *History of Kingston-upon-Thames* (1852).

Kingstown, a populous and important suburb of Dublin, 7 miles SSE. from the G.P.O. Previous to 1817, when the harbour-works were commenced, it was merely a fishing-village known as Dunleary. On the occasion of George IV.'s visit in 1821 its name was changed to Kingstown. The situation of the town and the invigorating air have made it a favourite residence. The mail-packets sail hence to Holyhead twice a day. There is little general trade, though the harbour, completed by the Admiralty in 1859 at a cost of £825,000, is one of the finest in the United Kingdom. The east pier is 3500 feet in length; the west, 5000 feet, enclosing an area of over 250 acres, with a depth of from 15 to 27 feet. Vessels drawing 24 feet can come alongside the quay at any state of the tide. Kingstown is within the parliamentary division of South Dublin. Pop. 20,000.

Kingstown, capital of the British West Indian island of St Vincent, at its SW. extremity, on a large bay, at the foot of a spur of Mount St Andrew (2000 feet). Pop. 4300.

Kingswinford, a Staffordshire village, 3½ miles N. by W. of Stourbridge. It has coal and iron mines, and manufactures of iron, glass, bricks, &c. Pop. of rural district, 20,000.

King-te-chin, the principal seat of porcelain manufacture in China, in the province of Chiang-hsi, on a small river which falls into Lake Po-yang from the east. Pop. 500,000.

Kington, a Herefordshire town, 13 miles W. by S. of Leominster. Mrs Siddons made her début in a barn here. Pop. of urban dist. 2000.

Kingussie (*Kin-yoos'sie*), a police-burgh of Inverness-shire, on the Spey's left bank, 72 miles by rail NNW. of Perth; pop. 1200.

King Williamstown, a town in the SE. of the Cape Province, on the Buffalo River, 80 miles ENE. of Grahamstown, and by rail (1877) 42 WNW. of East London, on the coast. It has considerable trade, military barracks and stores, and a college. Pop. 10,000.

Kinibalu. See Borneo.

Kinloss', an Elginshire parish, 3 miles NE. of Forres, with a ruined Cistercian abbey (1150).

Kinnaird' Castle, the seat of the Earl of Southesk, 3½ miles SE. of Brechin.

Kinnaird Head. See Fraserburgh.

Kinnoull Hill (*Kin-nool'*), a beautiful wooded eminence (729 feet) E. of Perth.

Kinross'-shire, the smallest Scotch county after Clackmannanshire, lies between Perthshire and Fife, and, measuring 9¾ by 12¼ miles, has an area of 78 sq. m., or 49,812 acres, of which 3327 are water. Most of the drainage belongs to Loch Leven (q.v.), from which the surface rises to encircling hills 734 to 1573 feet high. Nearly 63 per cent. of the surface is in cultivation, and 2733 acres are under wood. A separate county since 1252 and earlier, Kinross-shire unites with Clackmannanshire to return one member to parliament. Pop. (1801) 6725; (1851) 8924; (1911) 7527, of whom 2600 were in the county town, Kinross, 27 miles NNW. of Edinburgh, and near the west end of Loch Leven. Kinross House (1635–92) was designed by Sir William Bruce, the architect of the later portions of Holyrood. See Æneas Mackay's *History of Fife and Kinross* (1890).

Kinsale', a municipal borough and seaport of County Cork, at the head of Kinsale Harbour, which is formed by the estuary of the river Bandon, 24 miles SSW. of Cork by a railway (1863). Down to the Union Kinsale returned two members; thenceforward one until 1885. Kinsale is much frequented by summer visitors. The harbour, landlocked, is about 2 miles long and ½ mile in average breadth. Formerly Kinsale was one of the most flourishing ports on the south of Ireland; but its trade has been ruined by its more successful rivals Cork and Queenstown. Valuable fisheries are carried on. On the Old Head of Kinsale stands a lighthouse whose light, 236 feet above high-water, is visible 21 miles. Pop. (1851) 5506; (1911) 4020. In 1601, 3000 Spaniards landed at Kinsale to fight for the O'Neill confederacy. Here James II. landed on 12th March 1689, and here he re-embarked in July 1690.

Kintore', an ancient royal burgh of Aberdeenshire (one of the Elgin parl. burghs), near the Don, 13½ miles NW. of Aberdeen. Pop. 820.

Kintyre', or Cantire (Gael. *ceann-tir*, 'headland'), a long, narrow peninsula of Argyllshire, between the Atlantic and the Firth of Clyde, extending 42 miles south by westward, and 4½ to 11½ miles broad. At the north end it connects with the mainland by the isthmus of Tarbert, 1⅛ mile broad, between East Loch Tarbert, a bay of Loch Fyne, and West Loch Tarbert. The surface is diversified by a ridge of low, moorish hills, with many lochs, the highest point being Ben-an-Tuirc (1491 feet). Coal is found at Drumlemble, 4 miles to the west of Campbeltown. Machrihanish Bay, on the west coast, just beyond, possesses noted golf-links. A lighthouse (1787), 297 feet above sea-level, stands on the Mull of Kintyre, which is overhung by Ben-na-Lice (1405 feet), and is only 13 miles distant from Ireland.

Kinver, a town of Staffordshire, 4 miles WSW. of Stourbridge; pop. of parish, 2300.

Kioto. See Kyoto.

Kirghiz Steppes (*Keer-geez, g* hard), the region of the Kirghiz Tatars or Turks, between the Volga, Irtish, Caspian, and Sea of Aral.

Kirin, a Manchurian town, on the Sungari, 220 miles NE. of Mukden; pop. 150,000.

Kirkburton, a Yorkshire town, 5 miles SE. of Huddersfield; pop. 3500.

Kirkby-Lonsdale, a Westmorland town, on the Lune, 11 miles SSE. of Kendal; pop. 1550.

Kirkby Moorside, a Yorkshire town, on the Dove, 7½ miles WNW. of Pickering; pop. 1700.

Kirkby Stephen, a Westmorland town, on the Eden, 9½ miles SE. of Appleby; pop. 1500.

Kirkcaldy (*Kir-caw'dy*), a seaport of Fife, on the Firth of Forth, 15 miles N. of Edinburgh. Including Linktown and Newtown of Abbotshall on the west, and Pathhead, Sinclairtown, and Gallatown on the north-east, it is nearly 4 miles in length; hence the name 'The Lang Toun.' It was created a royal burgh in 1450, and, with Dysart, Kinghorn, and Burntisland, returns one member. Its harbour is small and shallow, but there is wet-dock accommodation for ships of considerable burden, and the early years of the 20th century saw the beginning of a large new harbour. Its manufactures are spinning flax, tow, and jute, and bleaching and weaving linen yarns, which are extensively carried on, the products being the usual varieties of linen cloth; mechanical (including marine) engineering on a large scale; iron-founding; and tanning. There are also several potteries. The manufacture of floorcloth and linoleum has been developed into a great trade, and Kirkcaldy is the chief seat of this important manufacture. There is also a direct export trade to the United States. The Beveridge public park was opened in 1892. Pop. of parliamentary burgh (1841) 5704; (1871) 12,422; (1911) 25,274; of royal burgh, as extended in 1876, (1911) 39,601. Kirkcaldy is the birthplace of Adam Smith (memorial hall, 1895); and Edward Irving and Thomas Carlyle were teachers here.

Kirkcudbright (*Kir-koo'bry*), STEWARTRY OF, a county of south-west Scotland, washed on the south for 50 miles by the Solway Firth, and elsewhere bounded by Wigtown, Ayr, and Dumfries shires. Measuring 41 by 38 miles, it has an area of 900 sq. m.; is watered by the Nith, Urr, Dee, Fleet, and Cree; and in the south-east sends up conspicuous Criffel (1867 feet), on the north-west border Merrick (2764), the loftiest summit in the south of Scotland. Little more than a fourth of the entire area is in cultivation, though great improvements have been effected since the foundation in 1809 of the Stewartry Agricultural Society. Nearly 31 sq. m. are occupied by woods. Towns are Kirkcudbright, New Galloway, Castle-Douglas, Dalbeattie, Gatehouse, Creetown, and Maxwelltown; and the antiquities include the Deil's Dyke, Threave Castle, and the ecclesiastical ruins of Dundrennan, Lincluden, New Abbey, St Mary's Isle, and Tongueland. Among worthies of the Stewartry have been Samuel Rutherford, Paul Jones, Thomas Brown, and Alexander Murray. It returns one member to parliament. Pop. (1801) 29,211; (1851) 43,121; (1911) 38,367.

KIRKCUDBRIGHT, the county town, 30 miles SW. of Dumfries by a branch-line (1864), is beautifully situated on the left bank of the Dee, which soon begins to broaden into Kirkcudbright Bay, opening into the Solway Firth 6 miles below. Its name is derived from the church of St Cuthbert, as old at least as 1164; and it is a royal burgh (1455), uniting with Dumfries, &c. to return one member. Chief buildings are the court-house (1868) and town-hall (1879); a lattice-bridge (1868), 500 feet long, spans the Dee. The ivy-mantled ruins of the castle (1582) of Maclellan of Bombie still dominate the town. Pop. 2200.

Kirkdale Cave, Vale of Pickering, Yorkshire, 28 miles W. of Scarborough, is 245 feet long, but very low. Discovered in 1821, it has yielded many remains of Tertiary mammals.

Kirkham, a market-town of Lancashire, 8½ miles W. by N. of Preston. It has a grammar-school (1673), and manufactures of cotton, flax, sailcloth, sacking, and cordage. Population, over 3700.

Kirkheaton, a town in the West Riding of Yorkshire, near the Colne, 3 miles ENE. of Huddersfield. Pop. 2600.

Kirkintil'loch, a town in Dumbartonshire (detached), on the Forth and Clyde Canal, 7 miles NNE. of Glasgow. Its Celtic name *Caerpentulach* ('fort at the end of the ridge') referred to a strong fort on Antoninus' Wall, which has left some remains; as early as 1170 it was made a burgh of barony. Chemicals, iron, &c. are manufactured. In the southern suburb, Lenzie, are the large Barony lunatic asylum (1875) and the Glasgow convalescent home (1864). Pop. 12,000.

Kirk-Kilisse (the 'forty churches'), a town of Turkey, 104 miles NW. of Constantinople. It is famed for its confections and the Bulgarian victory over the Turks (1912). Pop. 16,000.

Kirklees, a Yorkshire village, on the Calder, 4 miles NE. of Huddersfield. Robin Hood died, it is said, in a Cistercian nunnery here.

Kirkmaiden, a parish, the southernmost of Wigtownshire and Scotland; hence the phrase, 'frae Maidenkirk to John o' Groat's.'

Kirkoswald, an Ayrshire parish, 4½ miles WSW. of Maybole. 'Tam o' Shanter' and 'Souter Johnnie' are buried in the churchyard.

Kirkpatrick-Irongray, a Nithsdale parish of Kirkcudbrightshire, 7 miles W. of Dumfries. Helen Walker ('Jeanie Deans') is buried here.

Kirk'stall Abbey, a Cistercian abbey in Yorkshire, stands 3 miles NW. of Leeds, in the midst of modern manufacturing establishments. First founded at Barnoldswick in 1147, but five years later moved to its present site, the abbey is mainly Transition Norman and Perpendicular in style. The church is, like most Cistercian churches, long and narrow, with little ornamentation, and a low tower. The abbey was purchased by Col. North in 1888 for £13,500, and presented next year to Leeds.

Kirkstone Pass (1500 feet), in Westmorland, 3½ miles NNE. of Ambleside.

Kirk'wall, the capital of Orkney, on the east coast of Mainland, 49 miles NE. of Thurso, and 225 N. of Leith. St Magnus' Cathedral (1137–1500) is a stately cruciform pile, mixed Norman and Gothic in style. It measures 253 feet by 102 across the transept, and has a central tower 133 feet high, though shorn by lightning of its spire in 1671. The choir serves as a parish church. The last vestige of the royal castle was demolished in 1865; but the roofless Earl's Palace (1607) remains, and a tower (1550) of the Bishop's Palace, in which King Haco died in 1263. Much has been done for drainage, paving, and water-supply; the harbour has been improved, and the iron pier superseded by a stone one. Its shipping has increased eightfold since 1850. Made a royal burgh in 1486, Kirkwall unites with Wick, &c. to return one member to parliament. Pop. 3800.

Kirk-Yetholm. See YETHOLM.

Kirriemuir, a police-burgh (1875) of Forfarshire, on Gairie Burn, 5 miles WNW. of Forfar. It manufactures brown linen, and is famous as the 'Thrums' of Sir J. M. Barrie, whose birthplace it was. Pop. 3800.

Kirton-in-Lindsey, a town of Lincolnshire, 10 miles NE. of Gainsborough. Pop. of parish, 1600.

Kishineff', capital of the Russian government of Bessarabia, stands on a tributary of the Dniester, 162 miles NW. of Odessa by the railway to Jassy. When it became Russian in 1812 it had only 7000 inhabitants; in less than a century it had nearly 110,000, of whom about 10,000 are of Russian race, the others being, in about equal proportions, Moldavians and Jews. In 1903 the town became notorious for anti-Semitic riots and the massacre of hundreds of Jews. Kishineff is the seat of an archbishop. Pop. 120,000.

Kishm, or TAWILAH (anc. *Oaracta*), a barren island of Persia, at the entrance to the Persian Gulf, is 55 miles long, and 515 sq. m. in area.

Kismayu, an island and port on the coast of British East Africa, 10 miles S. of the Juba River, a region inhabited by Somali tribes.

Kissingen (*Kis'sing-en*), the most popular watering-place in Bavaria, on the Saale, 60 miles E. by N. from Frankfort-on-Main. Its three mineral springs (51° F.) are both drunk and used as baths, and are considered specially efficacious in cases of dyspepsia, skin-diseases, gout, &c.; and the waters are largely exported in bottles. Though their existence was known in the 9th century, it was not until the 16th century that their medical properties were recognised, and not until the 19th that they came into high repute. The pop. (5000) is increased by an annual influx of 13,000 to 14,000 visitors.

Kistna, or Krishna, a river of southern India, rises in the Western Ghâts within 40 miles of the Arabian Sea, at a height of 4500 feet, in 18° 1′ N. lat., and flows 800 miles E. across the peninsula to the Bay of Bengal. It forms for some distance the boundary between the Nizam's dominions and Madras Presidency, and has a delta extending 100 miles inland. It is only navigable for 50 miles and during six months.

Kit's Coty House, the best-known dolmen in England, 1½ mile NW. of Aylesford, Kent.

Kiû-kiang, or Chiû-chiang, a Chinese treaty-port on the Yang-tsze-kiang; pop. 53,000.

Kiung-chow, chief city of Hainan (q.v.).

Kivu, a lake of Central Africa, 60 miles long, drains S. to Tanganyika.

Kizil-Irmak ('red river;' anc. *Halys*), the largest river of Asia Minor, rises 70 miles above the town of Siwas, and curves 560 miles SW. and NNE. to the Black Sea.

Kizil-Kum ('red sands'), a sandy desert in Russian Turkestan, lying between the lower courses of the Amu-Daria and Syr-Daria.

Kjöbenhavn. See Copenhagen.

Klagenfurt (*Klâgenfoort*, *g* hard), capital of the Austrian duchy of Carinthia, 262 miles SW. of Vienna. Pop. 26,500.

Klausenburg (Hungarian *Kolozsvár*), one of the chief cities in Transylvania, 95 miles by rail E. by S. of Grosswardein. Here are a university (1872) and a Unitarian College. Pop. 60,000.

Klausthal (*Klowstâl*), the chief mining-town of the northern Harz Mountains, 25 miles NE. of Göttingen. The ores raised are silver, lead, copper, and zinc. Pop. 9000, or, with Zellerfeld, 20,000.

Klondike, or Klondyke, a small tributary of the Yukon River in the Canadian district of Yukon, separated from the North-west Territories in 1895. The Klondike (properly *Thron-duick*, 'plenty of fish') gives name to an extraordinarily rich auriferous region, partially known in 1873. Gold-mining was being carried on on the Lewis and Stewart rivers when in 1896 gold was found on the Klondike in such abundance as to cause the desertion of the adjoining diggings and to create a rush from Europe. Dawson, where the Klondike enters the Yukon River, is 60 miles east of the Alaskan (U.S.) frontier.

Kluchevskaya. See Kamchatka.

Knapdale, an Argyllshire district, bounded N. by the Crinan Canal.

Knaresborough, a market-town in the West Riding of Yorkshire, on the Nidd, 3½ miles NE. of Harrogate and 17 WNW. of York. It has a church (restored 1872), with interesting Slingsby monuments; a grammar-school (1616); remains of a castle (1170), in which Richard II. was imprisoned, and which was dismantled in 1648; a 'dropping well,' with petrifying properties; and St Robert's Cave, where Eugene Aram buried his victim in 1745. Mother Shipton is claimed as a native, also Jack Metcalf, the blind road-surveyor, and Bishop Stubbs. Linen and woollen rugs are manufactured. Knaresborough returned two members from 1550 till 1867, and one until 1885. Pop. a little under 5500. See works by Calvert (1844) and Grainge (1871).

Knebworth, a parish, 8½ miles NW. of Hertford, with the seat of Lord Lytton.

Knighton, a Radnorshire market-town, on the Teme, 16 miles W. of Ludlow. Pop. 1900.

Knock, a village in County Mayo, Ireland, 17 miles ESE. of Castlebar, where an alleged luminous apparition of the Virgin appeared on the chapel wall in 1880.

Knockmeledown, or Knockmealdown, a range (2609 feet) between Tipperary and Waterford.

Knole. See Sevenoaks.

Knossos. See Cnossus.

Knowsley Hall, Lancashire, 3 miles NW. of Prescot, seat (since 1385) of the Earls of Derby.

Knoxville, a city of Tennessee, stands amid picturesque scenery on the Holston River, at the head of steamboat navigation, 165 miles E. of Nashville. The seat of the state university and a railway junction, it manufactures iron goods, wooden wares, flour, &c. Pop. (1880) 10,917; (1900) 32,637; (1910) 36,346.

Knoydart, a district in the west of Inverness-shire, between Lochs Hourn and Nevis.

Knutsford ('Canute's ford'), a pleasant looking town of Cheshire, 15 miles SW. of Manchester by rail, the 'Cranford' of Mrs Gaskell's sketches, with manufactures of cotton, worsted, and leather goods. Pop. a little over 5700. See H. Green's *History of Knutsford* (1859).

Knysna, a forest and elephant-preserve, between the sea and the Outeniqua Mountains in the Cape Province, 150 miles W. of Port Elizabeth.

Kobe. See Hyogo.

Kodiak. See Kadiak.

Kodok, the official name of Fashoda (q.v.).

Kohat', in the NW. Frontier Province, is 37 miles S. of Peshawar. It has cantonments and a fort. Guns are manufactured. Pop. 27,003.

Koh-i-baba. See Afghanistan.

Kohistan', a name given to certain mountainous regions in Persia, Afghanistan, and Turkestan.

Koil. See Aligarh.

Ko'komo, a city of Indiana, on Wild Cat River, 54 miles by rail N. of Indianapolis, with busy mills, &c. Pop. 12,900.

Koko-nor, or Kuku-nor, a lake of Tibet, near the Chinese frontier, fills a depression surrounded by mountains, and lies 12,097 feet above sea-level. Its very salt, blue waters, cover 66 miles by 40. One of its five islands has a Buddhist monastery.

Kokstadt. See Griqualand.

Kola, on Kola peninsula, till the founding of Alexandrovsk, with its naval harbour (1895), on Kola Bay, was capital of Russian Lapland, and most northern town of European Russia. The peninsula is a dreary expanse of forests and lakes, but in the Umbdek Mountains, east of Lake Imandra, rises to 3300 feet.

Kolapur (*Kolhápur*), the capital of a tributary state in Bombay, 144 miles S. by E. of Poona, famous for its ancient temples; pop. 54,500.—Area of *state*, 3000 sq. m.; pop. 833,000.

Kolguef, or Kalguef, an island in the Russian government of Archangel, in the Arctic Ocean. Area, 1350 sq. m.

Kolin, or Kollin, a town of Bohemia, on the Elbe, 38 miles by rail E. by S. of Prague, is a centre of the sugar industry of the country, and manufactures chemicals, oil, metal wares, &c. Pop. 15,636. Near it, on June 18, 1757, the Austrians defeated Frederick the Great.

Köln. See Cologne.

Kolome'a, a town of Austrian Galicia, on the Pruth, 43 miles by rail NW. of Czernowitz. Near a rich petroleum region, it has petroleum and paraffin-candle works. Pottery is, however, the staple manufacture. Pop. 43,000.

Kolomna, a town of Russia, on the Moskva, 68 miles SE. of Moscow. It manufactures silk, linen, leather, soap, and machines. Pop. 28,323.

Kolosvár. See Klausenburg.

Kolyma', a river of E. Siberia, flowing from the Stanovoi Mountains 995 miles NE. to the Arctic Ocean. It is frozen forty weeks.

Ko'morn, a town of Hungary, on the island of Schütt, in the Danube, here crossed by a bridge of boats, 48 miles NW. of Pesth. Its strong fortress dates from about 1300. Pop. 22,000.

Konakry. See Conacry.

Kong, a district of West Africa, stretching from 8° 30′ to 12° N. lat. along the upper course of the Comoe (mouth at Grand Bassam on the Ivory Coast). It forms a plateau 2300 feet above sea-level; and the Kong Mountains of geographers are really mere isolated granitic peaks only 300 feet higher. The people are Mandingoes by race and Mohammedans by religion. The capital, Kong, has 12,000 to 15,000 inhabitants. Kong was declared a French protectorate in 1889.

Konieh, or Koniya. See Iconium.

Königgrätz (*Königgraytz*), a cathedral city of Bohemia, on the Elbe, 73 miles by rail E. by N. of Prague. Here Ziska was buried in 1424. Pop. 9166; with suburbs, 17,715. A signal victory was gained here on 3d July 1866 by the Prussians over the Austrians: the latter name the battle *Sádowa* from a village nearer the battlefield.

Königsberg, (1) a town and fortress in East Prussia, on the river Pregel, 4½ miles from the Frisches Haff and 366 by rail NE. of Berlin. The nucleus of the place was the block-house built in 1255 by the Teutonic Knights, but Königsberg is quite a modern town. The castle, chiefly of the 16th and 18th centuries, was the headquarters of the grand-master of the Teutonic Order, and from 1525 to 1618 the residence of the Dukes of Prussia. In the castle chapel (1592) Frederick I. crowned himself first king of Prussia in 1701. The Gothic cathedral (1333) was restored in 1856; in an adjoining building Kant lies buried. The university was founded as a Lutheran institution in 1544, and rebuilt in 1844–65, has an observatory (1811), a zoological museum (1819), a botanical garden (1809), a library of 200,000 volumes, 96 teachers, and over 650 students. One of the most imposing edifices in the town is the new exchange (1875). The industries include the manufacture of iron, machinery, pianos, thread, meerschaum, tobacco, beer, &c. Königsberg is a chief continental centre for the tea trade, and ships immense quantities of corn. Large merchant-vessels unload at Pillau, 28½ miles by rail to the west, at the entrance from the Baltic to the Frisches Haff. Pop. (1875) 122,636; (1910) 245,853.—(2) There is another Königsberg, 34 miles S. of Stettin by rail; pop. 7000.

Königshut'te, a rapidly-growing centre of great coal, iron, zinc, and copper works in Prussian Silesia, 110 miles SE. of Breslau by rail. It was constituted a town in 1869, out of several mining-villages. Pop. 71,000.

Königstein, a fortress of Saxony, once regarded as impregnable, but now of no military importance, stands on a rock 800 feet above the Elbe, 24 miles SE. of Dresden by rail.

Königswart, a town of Bohemia, 14 miles by rail SE. of Eger, in a romantic valley, has a fine castle of Prince Metternich, chalybeate springs, and a bathing establishment. Pop. 2500.

Königswinter, a village on the Rhine (pop. 3200), 21 miles SE. of Cologne.

Konkan, a strip of coast-districts in Bombay Presidency, extending from Gujarat on the north, past Goa, to the south of North Kanara. Its breadth varies from 1 or 2 to 50 miles, as the Western Ghâts approach or recede from the sea.

Kootenay, a river of British Columbia, which rises in the mountains that separate it from Alberta, and, after passing through a corner of the U.S., forms the Kootenay Lake, and after a course of 450 miles falls into the Columbia River. The district is rich in gold, coal, and petroleum.

Kopparberg, another name for Falun (q.v.).

Kordofan', or the White Land, since 1899 once more a province of the Egyptian Soudan, is separated from Sennaar on the E. by the White Nile, and from Dar-Fûr on the W. by a strip of desert. It extends from 12° to 16° N. lat. and from 29° 30′ to 32° 30′ E. long.; its area, including Takalla on the S., has been estimated at 130,000 sq. m., and its pop. at 553,000. The surface is undulating. The chief product is millet, the principal food of the inhabitants. The capital is El-Obeid, with 30,000 inhabitants, situated in the centre of the country.

Korea. See Corea.

Körös, Nagy ('Great Körös'), a town of Hungary, 55 miles SE. of Budapest by rail. Pop. 30,000.—Kiss Körös ('Little Körös'), a town, 66 miles by rail S. by E. of Budapest, is the birthplace of Petöfi. Pop. 10,000.

Korosko, a small village of Lower Nubia, with a few wretched huts straggling along the right bank of the Nile, about midway between the first and second cataracts.

Kosciusko, Mount. See Australia, p. 62.

Köslin, a town of Prussia, 5 miles from the Baltic and 85 NE. of Stettin. It manufactures iron, paper, soap, bricks, &c. Pop. 22,277.

Koslow. See Kozlof.

Kos'sovo, the 'Field of Blackbirds,' a plain in Servia, west of the Prishtina (Turkish till 1912–13), the scene of two Turkish victories—(1) of Sultan Murad I. over the Servian Tsar Lazar in 1389, when both sovereigns fell, and the Servians lost their independence; (2) of Sultan Murad II. over the great Hungarian general Hunyady in 1448.

Kostendil, an archiepiscopal city of Bulgaria, near the Struma, 43 miles SW. of Sofia, has gold and silver mining, warm baths, and numerous ruins. Pop. 13,400.

Kostnitz. See Constance.

Kos'troma, capital of a Russian government, near the Kostroma's influx to the Volga, 216 miles by rail NNE. of Moscow. The spinning and weaving of cotton and linen, brandy distilling, dyeing, corn-grinding, and tanning are chief industries. Pop. 47,000.—Area of *government*, 32,400 sq. m.; pop. 1,730,000.

Kotah, the chief town of a native state in Rajputana, on the right bank of the Chambal; pop. 33,624. The area of the state is 5700 sq. m.; pop. 640,000.

Köthen, a town in the German duchy of Anhalt, till 1853 the capital of the principality of Anhalt-Köthen, 22 miles by rail N. of Halle, and 31 SSE. of Magdeburg. It has a cathedral; the castle of the former dukes, rebuilt in 1597–1606 after a fire; iron-foundries, sugar-factories, &c. Population, about 25,000.

Kot′onu. See Cotonou.

Koubbet. See Obock.

Kovno, capital of the Russian government of Kovno, stands near the confluence of the Vilia and the Niemen, 523 miles by rail SW. of St Petersburg and 94 ENE. of Königsberg. It was long a stronghold of the Teutonic knights, and was taken by Russia from Lithuania in 1795. Pop. 88,000.—The *government* lies south of Courland, bordering on Prussia and Poland; area, 15,500 sq. m.; pop. 1,800,000.

Koweit, or Kuweit, a good port of Arabia, at the north-west angle of the Persian Gulf, is a British protectorate, and is to be connected with the Bagdad railway.

Kowloon. See Hong-kong.

Koyunjik. See Nineveh.

Kozlof, a Russian town, 123 miles SE. of Moscow by rail. Pop. 45,053.

Kra, or Krao, the isthmus connecting Siam with the Malay Peninsula, whose minimum breadth is 44 miles. A ship-canal through it would shorten the journey from Ceylon to Hong-Kong by 300 miles, and that from Calcutta to Hong-Kong by 540. A railway has also been suggested. See a work by Loftus (1883).

Kragujevatz, a town of Servia, 61 miles S. of Belgrade, has an arsenal. Till 1842 it was the residence of the Servian princes. Pop. 18,500.

Krain. See Carniola.

Krajova, or Craiova, a town of Roumania, 154 miles by rail W. of Bucharest. Near it are productive salt-mines. Pop. 52,000.

Krakatoa, or Krakatau, a volcanic island in the Strait of Sunda, between Java and Sumatra, was in 1883 the scene of a tremendous volcanic disturbance. From May the volcano on the island had been ejecting ashes; during 26–28th August the crater walls fell in, together with a part of the ocean bed, carrying with it 8 sq. m. or two-thirds of the island. At the same time a gigantic ocean-wave inundated the adjoining coasts of Java and Sumatra, causing a loss of 36,500 lives, and then careered round the entire globe. See works by G. J. Symons (1888) and Ernst (1908).

Kranganur. See Cranganore.

Krasnovodsk, a Russian railway terminus and harbour, on the east side of the Caspian Sea, in the Transcaspian territory. Pop. 7500.

Krasnoyarsk, the chief town of the Siberian government of Yeniseisk, on the Upper Yenisei, 370 miles E. from Tomsk. It is the centre of the gold-washings of the province. Pop. 63,000.

Krefeld, one of the most important manufacturing towns of Germany, 4 miles from the left bank of the Rhine and 12 NW. of Düsseldorf. It owes its importance to the settlement here, in the 17th and 18th centuries, of refugees from Jülich and Berg, who established Krefeld's noted silk and velvet manufactures. Here are also large railway repair shops, iron-foundries, and manufactures of machinery, chemicals, soaps, spirits, &c. Pop. (1875) 62,840; (1910) 129,406.

Kremenchug, a town of Russia on the Dnieper, 74 miles by rail SW. of Pultowa. From 1765 to 1789 it was the chief town of New Russia; it is now the seat of great industrial activity, especially in wool, timber, and tobacco, and of factories for agricultural machines, leather, tobacco, candles, &c. Pop. 87,000.

Kremlin. See Moscow.

Kremnitz, a town of Hungary, 83 miles N. of Budapest. Its gold and silver mines were once more famous than now. Pop. 10,000.

Krems, a town of Lower Austria, at the confluence of the river Krems with the Danube, 47 miles by rail W. by N. of Vienna. Pop. 13,042.

Kremsier, a pretty town of Moravia, on the March, 35 miles E. by N. of Brünn. Pop. 13,816.

Kreuznach (*Kroitz′nahh*), a town of Rhenish Prussia, dating from the 9th century, on the Nahe, 35 miles by rail SSE. of Coblenz. Its chief manufacture is champagne; but it is most notable for its hot salt-springs (50° to 90° F.), attracting over 5000 visitors annually. Pop. 23,000.

Krimmitschau, a town of Saxony, 45 miles S. of Leipzig; pop. 29,000.

Krishna. See Kistna.

Kronenberg, a town of Rhenish Prussia, 4 miles S. of Elberfeld; pop. 10,000.

Kronstadt (Magyar *Brassó*), a town in the extreme SE. of Transylvania; pop. 41,000.—For the Russian Kronstadt, see Cronstadt.

Kroonstad, a town of Orange Free State, on the railway from the Cape to Pretoria, 130 miles NE. from Bloemfontein; pop. 7500.

Krugersdorp, a town of the Transvaal, about 20 miles W. of Johannesburg; pop. 23,000.

Kuala Lumpur, a town of Selángor, capital of the Federated Malay States, 27 miles inland by rail from Port Swettenham; pop. 50,000.

Kuban, a river of Caucasia, giving name to a province (area, 37,000 sq. m.; pop. 2,730,000).

Kuch Behar. See Behar.

Kuen-Lun, a great snow-clad mountain-chain, the northern wall of the Tibetan plateau. Starting from the Pamir plateau, it curves eastward to 94° E. long., its width varying from 100 to 150 miles. The peaks are 18,000 to 25,000 feet high, and the passes 13,000 to 18,000 feet.

Kuilenburg. See Culenborg.

Kuka, or Kukawa. See Bornu.

Kulja, a town of Zungaria, on one of the great highways from China to West Turkestan, and on the Ili, which flows 750 miles from the Tian-Shan Mountains to Lake Balkhash. Kulja (pop. 12,500) is the chief town of a fertile district (Kulja or Ili), which revolted against China in 1865, was occupied by Russia in 1871, but ten years later restored to China, except 4300 sq. m. now incorporated in Semiretchensk. The Chinese province has an area of 23,130 sq. m. and a pop. of 70,000. New Kulja, 25 miles W. of Kulja, was destroyed by the rebels in 1866; it then had 75,000 inhabitants.

Kulm, a village of Bohemia, 3 miles NE. of Teplitz. Here the French were routed by the Prussians and Russians, 29–30th August 1813.

Kum, next to Meshed the most sacred city of Persia, is a straggling, half-ruined town between Ispahan and Teheran. Its shrines and tombs of

Mohammedan (Shiite) saints attract thousands of pilgrims. Pop. 20,000.

Kumamoto′, a town on the west coast of the island of Kiu-siu, Japan. Pop. 64,500.

Kumania. See CUMANIA.

Kumaun, a district in the United Provinces of Agra and Oudh. It lies chiefly on the south slope of the Himalayas, and comprises summits rising to over 20,000 feet. Almora is the capital. Area, 7151 sq. m.; pop. 1,250,000.

Kunawar, a division of Bashahr (q.v.).

Kunduz. See AFGHANISTAN.

Kunersdorf, a village in Prussia, 4 miles E. of Frankfort-on-the-Oder. Here Frederick the Great, after gaining a half victory, was routed by the Russians and Austrians, August 12, 1759.

Kungur, a town in Russia, 50 miles SSE. of Perm. Pop. 15,300.

Kura, a river of the Caucasus.

Kuram, a river rising in Afghanistan near the northern end of the western Suliman range, and flowing to the Indus near Isakhel.

Kurdistan′ ('the Country of the Kurds'), an extensive geographical, though not political, region mainly to the NE. of Turkey in Asia, S. and W. of Erzerûm, but including the part of Persia about Urumia. Area, 50,000 sq. m.; pop. over 2,250,000—nearly 1,500,000 in Turkey, 700,000 in Persia, and 45,000 in Russian Transcaucasia. The surface ranges from 5000 up to 15,000 feet in altitude. Numerous rivers force their way through the mountains, and go to feed the Tigris and the Euphrates. The bulk of the inhabitants are Kurds (the ancient *Carduchi*), partly nomad and pastoral, partly settled and agricultural, by race Turanian, but speaking an old Persian dialect. Their forays have been a sore affliction to their Armenian neighbours. In 1880 an extensive Kurdish rising against Persia took place. Some Nestorian Christians inhabit the valley of the Tigris; but the Kurds are Mohammedans. The chief towns are Bitlis, Van, Urumia, Diarbekr, and Kermanshah. See Millingen, *Wild Life Among the Koords* (1870).

Kuria-Muria, a group of five islands, 21 miles from the south-east coast of Arabia. Area, 21 miles; pop. 34. They were ceded to England in 1854 by the Imam of Muscat. On one of them is a signalling telegraphic station.

Kuriles, a sparsely populated group of over thirty islands, extending from Kamchatka to Yezo, and belonging to Japan. In 1875 the Japanese surrendered their good claims on the southern part of Saghalien (resumed by the treaty of 1905 closing the war with Russia), and received in exchange from Russia the northerly portion of the Kuriles. With a few exceptions the population remains in this misty and inhospitable region only during the summer, as long as the fishing season lasts.

Ku′risches Haff, a fresh-water lagoon of East Prussia, extending 61 miles south from Memel, with an average width of 14 miles. It is connected with the Baltic by the 'Memel Deeps,' a channel 500 yards wide and 20 feet deep. The spit of sand-dunes, 1 to 2 miles wide, that separates it from the Baltic, is encroaching on the haff.

Kurland. See COURLAND.

Kurrachee (*Karat′chi*), the capital of Sind and the chief port of entry for the Punjab, stands at the northern end of the great Indus delta, and close to the frontier of Beluchistan. It is 1169 miles by rail (about 700 direct) SW. of Delhi. Kurrachee has an extensive harbour, sheltered by a breakwater and a long reef, with a fixed light 120 feet high. The landing-place is on Kiamari Island, which is connected with the town by the Napier mole, 3 miles long. The harbour improvements, completed in 1873, cost £450,000; there is now a lowest depth over the bar of 20 feet. The Frere municipal hall (with a library and museum) was named after Sir Bartle Frere, of whom there is also a statue here. To the east and north are the cantonments, and, close by, a public garden of 40 acres. There are ironworks and large cotton presses in the town, the cotton of Sind and the Punjab forming an important article of export, though less so than wheat and oil-seeds. It is the proposed Trans-Persian railway terminus. Its trade extends to Afghanistan and Beluchistan. Pop. 152,000.

Kursk (*Koorsk*), chief town of a Russian government, 312 miles by rail S. by W. of Moscow and 274 NNE. of Kieff. The chief industry is tanning; soap, tobacco, candles, and spirits are manufactured; and there is an observatory. Pop. 82,000. Near the town a great fair is held after Easter.—The *government* has an area of 17,931 sq. m., and a pop. of over 3,000,000.

Kuruman, a mission-station in Bechuanaland, 130 miles NW. of Kimberley. Dr Moffat laboured here for years, and here too was Livingstone.

Kushk, an Afghan tributary of the Murghab, passes into Russian Turkestan, and gives name to an Afghan town and a Russian military post.

Kusi, a considerable tributary of the Ganges, rises in the Nepal Himalayas, NW. of Mount Everest, and flows 325 miles generally south, in a rapid stream.

Kus′koquim. See ALASKA.

Kustendji, or more properly since 1878 CONSTANZA, a seaport in the Dobrudja, Roumania, stands on the Black Sea, at the end of Trajan's Wall and of the railway to Tchernavoda on the Danube. Pop. 22,600. Not far distant was Tomi, the place of Ovid's banishment.

Küstenland ('coast-land'), an Austrian division comprising Görz, Gradisca, Istria, Trieste.

Küstrin, a fortified town of Prussia, amidst great marshes, at the confluence of the Warthe with the Oder, 51 miles E. of Berlin. Pop. 17,500.

Kutaia, or KUTAYA, a town of Asia Minor, 70 miles SE. of Brusa, and connected by rail with Eski-Shehr and the railway system. Pop. 45,000.

Kutaïs, capital of a Black Sea dep. of Transcaucasia, 70 miles NE. of Batoum; pop. 25,000.

Kuttenberg, a silver-mining town of Bohemia, 185 miles by rail NNW. of Vienna, with many important mediæval buildings; pop. 18,000.

Kwando, or CHOBE. See ZAMBESI.

Kwang-chengtzu. See MANCHURIA.

Kwango, a tributary of the Congo.

Kwantung. See DAIREN, LIAO-TUNG.

Kwanza. See COANZA.

Kwilu, a river of French West Africa, rises near the Lefimi.

Kyle, the central district of Ayrshire.

Kyleakin. See SKYE.

Kylemore, a district in the west of County Galway, 10 miles NE. of Clifden, with a castle, and a small lough from which a river runs 3 miles through a remarkable ravine to the sea.

Kyles of Bute. See BUTE.

Kyōto, MIAKO, or SAIKIO, from 784 A.D. to 1868 the capital of Japan, on the Kamo River, 26 miles inland from Ozaka. At the N. end are situated, in an enclosure, the plain wooden buildings where the emperors of Japan dwelt so long in seclusion. The Honganji temples of the Monto sect of Buddhists, the centre of the Buddhist faith in Japan, rise at the S. end of the city. The singing-girls of Kyōto are noted for their graceful dances. The pottery, porcelain, enamels, inlaid bronze-work, crapes, velvets, and brocades of Kyōto are highly esteemed. Pop. (1884) 255,403; (1892) 297,527; (1910) 445,000.

Kyouk-pyoo, a district of Arakan in Burmah, named from the capital (pop. 4000), on an island, 96 miles SE. of Akyab.

LAALAND, or LOLLAND, a flat and fertile Danish island, at the southern entrance to the Great Belt, 36 miles long by 9 to 15 broad. Area, 445 sq. m.; pop. 72,000. The capital is Maribo (pop. 2403); the largest town, Nakskov (pop. 6278).

Lab′rador, the north-eastern peninsula of the North American continent, lying between Hudson Bay and the Gulf of St Lawrence. The coasts were probably visited by Norsemen about the year 1000; they were sighted by Cabot in 1498. In 1500 the Portuguese Cortereal is said to have visited it and to have given it its euphemistic name of ‘cultivable land.’ But another tradition derives the name from a Basque whaler called Labrador. Labrador extends from 49° to 63° N. lat., and from 55° to 79° W. long. The greatest length is 1100 miles, and the area 500,000 sq. m. The portion draining into the St Lawrence forms part of Quebec province; the Atlantic coast strip—to which the name Labrador is officially restricted—is attached to Newfoundland; the remainder, the former territory of Ungava, was added to Quebec in 1912. The Atlantic coast is stern and precipitous (1000 to 4000 feet high), entirely destitute of vegetation, deeply indented with narrow fjords, and fringed with rocky islands. The interior, very imperfectly explored, consists mainly of a plateau 2000 feet above sea-level, and mostly covered with fine forest trees, firs, birches, &c. Numerous lakes, including Mistassini (q.v.), with the rivers, afford in summer continuous waterways for great distances. The only inhabitants of this interior plateau are Cree Indians, nomads. There are numerous rivers, 200 to 300 miles long and 2 and 3 miles wide at their mouths, flowing towards the Atlantic and Hudson Bay. The Grand Falls, 2000 feet high, on Grand River are amongst the largest in the world. Bears, wolves, foxes, martens, otters, beavers, lynxes, &c., are found. Iron and the felspar called labradorite are abundant. The climate on the coast is very rigorous, owing mainly to the ice-laden Arctic current which washes the shores. The short three-months' summer is marred by the swarms of mosquitoes and black flies. The mean annual temperature at the missionary stations varies from 22° to 28°. By far the most important wealth of the Labrador coast is its fish—cod, salmon, herrings, and trout; some 30,000 fishermen from Newfoundland, Canada, and the United States visit its fishing-grounds in the season. The 10,000 permanent settlers, Eskimo and French Acadians in the coast-region, are collected chiefly at the Moravian missionary stations—Nain (founded 1770), Okkak, Hebron, Hopedale, &c. See works by Gosling (1910), Grenfell (1910), Pritchard (1911).

Labuan, an island 30 sq. m. in area, 6 miles from the NW. coast of Borneo. It has a good harbour (Victoria), and an extensive bed of excellent coal. It became British in 1846, and in 1906 was transferred to the governorship of the Straits Settlements administration. Pop. 8500.

Laccadives (Sansk. *Laksha Dwipa*, ‘the Hundred Thousand Islands’), a group of fourteen coral islands in the Arabian Sea, between 10° and 14° N. lat., and 200 miles W. of the Malabar coast. Area, 744 sq. m.; population, 15,500, Mohammedans of Hindu descent. They are low and flat, and all but two are comparatively barren. The coconut is the chief plant, and *coir* (coconut fibre) the staple product. The group was discovered by Vasco da Gama in 1499.

Lachine (*La-sheen′*), a summer residence of Quebec, 8 miles SW. of Montreal by rail. There is a canal hence to Montreal to avoid the Lachine Rapids of the St Lawrence. Pop. 11,000.

Lachlan, an Australian river, a tributary of the Murrumbidgee, which flows to the Murray.

Lackawanna River, Pennsylvania, is a tributary of the Susquehanna, and its valley nearly coincides with the Wyoming and Lackawanna coal basin (55 miles long).

Lacock Abbey, a Wiltshire seat, 3½ miles S. by W. of Chippenham. Representing an Augustinian nunnery (1232), it was the home of W. H. Fox Talbot, the photographic inventor.

La Crosse, capital of La Crosse county, Wisconsin, stands on the Mississippi, at the mouth of La Crosse River, and at the junction of six railways, 195 miles by rail WNW. of Milwaukee. It has a Roman Catholic cathedral, and manufactures of farming-implements, engines and boilers, sashes and blinds, &c., besides large lumber-mills, iron-foundries, and breweries. Pop. (1870) 7785; (1900) 28,895; (1910) 30,417.

Ladakh′, one of the outlying governorships of Cashmere, in the valley of the Upper Indus, and behind the great central range of the Himalayas. The Ladakhis, some 30,000, are of Turanian stock and Buddhists in religion. The capital is Leh.

Ladismith, a village (named from a colonial governor's wife), in the Cape Province, at the southern base of the great Zwarte Bergen, 70 miles NW. of Mossel Bay. See also LADYSMITH.

Lado, a station on the left bank of the White Nile, in 8° 5′ N. lat., established by Gordon in 1875. The Lado enclave, through which Britain leased to the Congo State right of access to the Nile, reverted to Britain in 1906, on the death of Leopold II. of Belgium. It extends from the river on the east to 30° E. long. on the west, the Congo boundary on the SW., and 8° 50′ N. lat. on the north.

Lad′oga, LAKE, the largest lake of Europe, a little N. of St Petersburg, on the Finnish frontier. It is 129 miles long and 78 broad. The lake receives the waters of Lakes Onega and Ilmen in Russia, and of Lake Saima and other lakes in Finland; and its own waters are carried off to the Gulf of Finland by the Neva (q.v.). The average depth does not exceed 300 feet, except in the NW. (730 feet). The navigation is exceedingly dangerous owing to shallows and sunken rocks. Of the canals connected with it the chief is the Ladoga Canal (70 miles long and 60 feet wide). This canal-system forms the thoroughfare for a very extensive traffic between the Volga and the Baltic. Two of the islands in the north-west, Valaam and Konevetz, have monasteries (founded 960 and 1393) much visited by pilgrims.

Ladrones, or Mariana Islands, a group of fifteen islands in the western Pacific, north of the Carolines, in 13°—21° N. lat. and 144°—146° E. long., disposed in a row almost due north and south; their united area is 420 sq. m. They were discovered by Magellan (1521), whose sailors called them the 'Thieves' (*Ladrones*) Islands;' in 1668 they received the name of Mariana Islands. A channel divides them into two groups. Most of the group are thickly wooded, and all are fruitful. Pop. 15,000. In 1898 Guam, the largest island (pop. 12,000), was ceded by Spain to the United States, and in 1899 the remainder of the group were sold to Germany.

Ladybank, a police-burgh of Fife, 5½ miles SW. of Cupar; pop. 1300.

Ladysmith (see also Ladismith), a town of 5500 in Natal, 140 miles NW. of Durban. Here in 1899-1900 the British forces under Sir George White were invested by the Boers for 120 days, till relieved by Sir Redvers Buller.

Laeken (*Lâ'ken*), a northern suburb of Brussels, containing the royal palace (1782), with valuable works of art and historical documents; pop. about 35,000.

Lafayette, in Indiana, on the Wabash River, is 63 miles NW. of Indianapolis. It contains the Purdue (agricultural and mechanical) university, and manufactures farming-implements, machinery, cars and wagons, &c. Pop. 20,500.

Lagan, a river of Ulster, flowing 35 miles to Belfast Lough at Belfast.

Laggan, a hamlet and parish of Inverness-shire, 11 miles WSW. of Kingussie, on the Spey. Loch Laggan, 7 miles farther to the SW., is 7 miles long, and discharges by the Spean to the Lochy. Between Laggan and Kingussie is Cluny Castle, seat of the chief of the Macphersons.

Lago Maggiore. See Maggiore.

Lagos, a seaport on the south coast of Portugal, 30 miles ENE. from Cape St Vincent. Pop. 7900. In the Bay of Lagos Boscawen defeated the French Toulon fleet in 1759.

Lagos, a British colony and protectorate on the Guinea coast of Africa. It comprises the islands of Lagos and Iddo (annexed in 1861), and about 140 miles of coast.—The *protectorate* extends to the French possessions on the Middle Niger. Lagos island is 3¾ sq. m. in area; at its W. end stands Lagos town (pop. 40,000), the only safe harbour for 1000 miles. In 1906 Southern Nigeria was placed under its administration, and its name changed to the colony and protectorate of Southern Nigeria.

La Guaira. See Guaira.

La Hague, the north-west extremity of the peninsula of Cotentin (q.v.) over against Alderney. It is crowned by a lighthouse, 158 feet high.

Lahn, an important affluent of the Rhine in its middle course.

La Hogue, a roadstead on the east side of the peninsula of Cotentin (q.v.). On May 19, 1692, the French fleet under Tourville, which Louis XIV. had collected to invade England for James II., was defeated here by the English and Dutch fleets under the Jacobite Admiral Russell.

Lahore, capital of the Punjab, stands near the left bank of the Ravi, 1080 miles NW. of Calcutta by rail. Pop. (1868) 125,413; (1911) 228,687, of whom 85,000 are Mussulmans. A railway centre, Lahore is surrounded by a brick wall 16 feet high. The fort occupies a commanding position to the north-east, and near it are the mosque of Aurungzebe and Runjeet Singh's tomb. The British civil station is called Anarkalli, and a broad road, the Mall, connects it with the government house and the Lawrence Gardens. Three miles farther is the dreary cantonment of Mián Mir. The flourishing Punjab University was largely endowed by native chiefs and gentlemen—Moslem, Sikh, and Hindu. There are also the Oriental College, Government College, Government Medical School, Mayo Hospital, Roberts Institute, and a good museum. Under the Mogul empire the city, which dates from the 7th century A.D., had a pop. of over 1,000,000. The remains of the magnificent buildings erected by the Mogul emperors are still considerable, as well as Jahangir's wonderful gardens at Shádra and Shálimár. In 1849 Lahore became the capital of the new British province of the Punjab (q.v.).

Lahr, a town of Baden, on an affluent of the Rhine, 20 miles SSE. of Strasburg. Pop. 15,000.

Laibach (*Lī-bahh*), capital of the Austrian province of Carniola, on the Laibach, 92 miles NE. of Trieste. Pop. 45,000.

Laing's Nek, a defile in the Drakenberge Mountains, Natal, 16 miles from the N. point of its frontier. Here the Boers defeated the British forces under Colley, January 28, 1881.

Lairg, a Sutherland village, on the Shin, 67 miles by rail N. by W. of Inverness.

Lake District, the name applied to the picturesque and mountainous region comprised within the counties of Cumberland, Westmorland, and a small portion of Lancashire, within which are grouped as many as sixteen lakes or *meres*, besides innumerable mountain *tarns* and streams, and a series of mountains rising in four points to a height of over 3000 feet. The district extends about 30 miles from north to south by about 25 from east to west, and contains within its compass the utmost variety and wealth of natural scenery; it is fringed by such considerable towns as Penrith, Kendal, Lancaster, Barrow, Cockermouth, and Whitehaven. The principal lakes are Windermere, Esthwaite Water, and Coniston in the south; Ullswater and Hawes Water in the east; Bassenthwaite in the north; Wast Water, Ennerdale Water, Buttermere, and Crummock Water in the west; and Derwentwater, Thirlmere, Grasmere, and Rydal Water in the heart of the district. The highest mountain-summits are Scafell Pike (3210 feet), Scafell (3161 feet), Helvellyn (3118 feet), and Skiddaw (3060 feet). The lakes are fed and emptied by beautiful mountain-streams and *becks*, often forming noble waterfalls or *forces*. Among the places most visited are the towns or villages of Keswick, Coniston, Bowness, Hawkeshead, Ambleside, Ulverston, Rosthwaite, Grasmere, Patterdale, and Borrowdale; the Langdale Pikes; the Duddon Valley, Honister Pass, and Kirkstone Pass; the Castle Rock of St John, celebrated in Scott's *Bridal of Triermain;* and such minor but imposing mountain-peaks as Blencathara or Saddleback (2847 feet), near Keswick; Coniston Old Man (2633), near Coniston; and the Great Gable (2950), near Wastdale Head.

See Wordsworth's *Description of the Scenery of the Lakes* (1822); Professor Knight's *English Lake District, as interpreted by Wordsworth* (new ed.

1891), and his *Through the Wordsworth Country* (1887); also Harriet Martineau's *English Lakes* (1858), and books by Bonney (1876), Waugh, Rawnsley, Bradley, and Collingwood (1902).

Lake of the Thousand Islands, an expansion of the St Lawrence (q.v.) extending about 40 miles below Lake Ontario. It contains some 1500 rocky islets, the largest Wolfe Island (54 sq. m.; pop. 1600), measuring 21 miles by 7.

Lake of the Woods, a lake of North America, studded with wooded islands, in 49° N. lat. and 95° W. long. It is mostly in Ontario, but extends into Manitoba and Minnesota. Nearly 100 miles long, and 300 in circuit, it is fed by the Rainy River, and drained by the Winnipeg.

Lakhnao. See LUCKNOW.

Laleham, a Middlesex village, on the Thames, 2 miles SSE. of Staines. Matthew Arnold was born and is buried here.

Lalitpur, capital of a district in the United Provinces of India, 55 miles S. of Jhansi. Pop. 12,000.

La Mancha. See MANCHA.

Lambay, an island of Dublin county, 3 miles SE. of Rush. It measures 1½ by 1 mile, and rises 418 feet. Pop. 50.

Lambayeque (*Lam-ba-yeh'ke*), a province of Peru, with an area of 5000 sq. m. and a pop. of 125,000.—The capital, Lambayeque, is 7 miles from the mouth of the river Lambayeque, and 128 miles NW. of Trujillo; pop. 8300.

Lambeth, a metropolitan and parliamentary borough S. of the Thames, within the county of London, has an area of 6½ sq. m. Since 1885 it returns four members, its pop. (1911) being 298,058. Lambeth Bridge dates from 1862. Lambeth Palace has been the official residence of the archbishops of Canterbury since 1197. It contains a splendid series of portraits of the archbishops, and a library of 30,000 volumes, with many fine MSS. The Lollards' Tower, so named in comparatively modern times from the notion that heretics were here imprisoned, was really a water tower. It dates from 1434. See the Rev. J. Cave-Browne's *Lambeth Palace* (1883).

Lambourn, a Berkshire town, on the river Lambourn, 7 miles N. by W. of Hungerford; pop. of parish, 2300.

Lamlash', an Arran village, 5½ miles S. by E. of Brodick, on a beautiful bay protected by Holy Isle (1030 feet high); pop. 600.

Lammermoors, a broad range of moorish hills in Haddington and Berwick shires, extending east-north-eastward from the vale of Gala Water to the German Ocean at St Abb's Head, and culminating in Meikle Says Law (1749 feet).

Lampedu'sa, a small Mediterranean island, 150 miles S. of Sicily, and 80 E. of Tunis. Belonging physically to Africa, it has since 1843 been reckoned part of Sicily. Pop. 1000.

Lam'peter, a market-town of Cardiganshire, 27 miles by rail NNE. of Carmarthen. It is the seat of St David's College (1827), which was founded by Bishop Burgess, and has power to grant B.A. and B.D. degrees. Pop. 1800.

Lan'ark, the county town of Lanarkshire, on a slope near the right bank of the Clyde (q.v.), 33 miles by rail SW. of Edinburgh, and 31 SE. of Glasgow. It has an interesting ruined church, a large Catholic chapel (1859), county buildings (1836), racecourse, aerodrome, memories of Wallace, and some weaving and other industries. A royal burgh since the 12th century, it unites with Falkirk, &c., to return a member to parliament. Pop. (1851) 5008; (1911) 5900.—NEW LANARK, 1½ mile S. by W., is a manufacturing village, founded in 1783 by David Dale, and for twenty-eight years the scene of the social experiments of his son-in-law, Robert Owen; pop. 800.

Lan'arkshire, or CLYDESDALE, a Scottish county, enclosed by Stirling, Dumbarton, Linlithgow, Edinburgh, Peebles, Dumfries, Ayr, and Renfrew shires. Its length is 50 miles, its greatest breadth 32 miles, and its area 889 sq. m. Drained almost entirely by the Clyde (q.v.) and its numerous affluents, Lanarkshire is subdivided into three wards, of which the upper or southern comprises 332,338 acres, the middle 194,211, and the lower 42,319. These offer a striking diversity of aspect —lonely uplands, smiling orchards, busy coal-fields and manufacturing district. The principal hills are Green Lowther (2402 feet) and far-seen Tinto (2335); whilst the mining-village of Leadhills (1300 feet) is the highest in Scotland. The county possesses great mineral wealth—coal, ironstone, fireclay, shale, and lead, with some silver and even gold. The coal alone in the Lanarkshire coalfield is estimated to exceed 2000 million tons. The soil is as various as the scenery; and barely one-half of the whole area is in cultivation, whilst woods occupy 20,000 acres, orchards nearly 600, and market-gardens over 1300. The orchards of Clydesdale were famous as early as the time of Bede, and yielded into the 19th century £8000 per annum; but now the ground is more profitably employed in producing strawberries, gooseberries, vegetables, &c. for the Glasgow market. Lanarkshire is not a great grain county; but much of it is excellently adapted for the rearing of stock and for dairy purposes. The sheep are Cheviots and black-faced, the cattle Ayrshires; and the celebrated Clydesdale cart-horses issue from a Flemish cross (about 1720). The mineral, textile, and other industries are very extensive, and are noticed under the towns—Glasgow, Rutherglen, Lanark, Hamilton, Airdrie, Coatbridge, Motherwell, Wishaw, &c. Besides prehistoric and Roman remains, Lanarkshire contains the castles of Bothwell, Douglas, and Craignethan (Scott's 'Tillietudlem'), the priories of Blantyre and Lesmahagow, and the battlefields of Langside, Drumclog, and Bothwell Brig. Among its worthies have been Joanna Baillie, Dr John Brown, Sir Colin Campbell, Thomas Campbell, Lord Dundonald, David Livingstone, and Sir John Moore. Though only the twelfth in size, Lanarkshire is far the most populous and wealthy of all the thirty-three Scottish counties. Pop. (1801) 147,692; (1841) 426,972; (1911) 1,447,113.—Lanarkshire now including the whole of Glasgow under the Local Government (Scotland) Act of 1889.

See works by Hamilton of Wishaw (Maitland Club, 1831), Irving and Murray (1864), and others cited at GLASGOW, CLYDE, BIGGAR, &c.

Lan'cashire, a county palatine of England, ranking sixth in point of area, first in population, and first in return of revenue from all sources. It forms the north-western division of England, stretching along the Irish Sea from the river Duddon and the mountains of Cumberland on the north to the river Mersey on the south. The extreme length from N. to S. (including the hundred of Furness) is 75 miles, and the greatest breadth at the south end 43, at the north end 10 miles. The area is 1867 sq. m., or 1,194,919 statute acres. Pop. (1801) 673,486; (1861) 2,429,440; (1901) 4,406,787; (1911) 4,767,832. The coast is low, with numerous far-reaching estuaries. This has made the county the principal outlet for the commerce of the country in a westerly direction, one-third of the whole foreign trade of Great Britain being carried on from its ports. The chief rivers are the Mersey, Ribble, Lune, Wyre, Kent, Leven, and Duddon. An outlying portion of the county, called Furness, 25 miles long by 20 wide, is separated from the main portion by Morecambe Bay, and seems to belong properly to the Lake District. Coniston, Esthwaite, and Windermere lakes lie within its borders. The highest point here is 'Coniston Old Man' (*alt maen*, 'high rock'), 2633 feet high. The larger division is intersected in the north and east by branches of the hill-system which runs southward through the counties of York and Derby, the chief eminences being Pendle Hill (1831 feet), Bleasdale Moor (1709), Boulsworth Hill (1689), and Rivington Moor (1545). Coal is the chief mineral product, the coalfield being estimated at 217 sq. m. in extent. Limestone and iron are common in the north; lead, copper, sulphur, and fireclay are also found. The whole surface of the county is covered with a network of canals and railways. Lancashire is the great centre of the cotton manufacture of the world, having about two-thirds of the entire trade; and there are other textile manufactures, such as woollens, silk, carpets. It is pre-eminent in the manufacture of engineers' tools; and the making of all kinds of iron and steel machinery is extensively carried on; as also shipbuilding, sailmaking, the manufacture of boots, shoes, and hosiery. The county returns, since 1885, twenty-three members to parliament (formerly eight), besides thirty-two for the seventeen boroughs (Ashton-under-Lyne, Barrow-in-Furness, Blackburn, Bolton, Burnley, Bury, Liverpool, Manchester, Oldham, Preston, Rochdale, St Helens, Salford, Stalybridge, Stockport, Warrington, and Wigan). The phrase, 'Lancashire Witches,' which is now used as an expression of admiration for the young maidens of the county, arose from the prevalence of the 'crime' of witchcraft in Lancashire in the reign of James I. At the time of the Reformation the Roman Catholic party was extremely strong in Lancashire; and an unusually large proportion of the land-owners still adhered in the reign of James I. to the old faith. The people of Lancashire have long been noted for their love of music and natural history; while their politics and opinions have had such influence in the country that the proverb has arisen that 'What Lancashire thinks to-day England says to-morrow.' Amongst Lancashire's worthies have been Mrs Gaskell, Mrs G. L. Banks, and Miss Martineau; Roscoe, De Quincey, Sir Robert Peel, Horrocks, Clough, Dalton, Hodgkinson, Joule, Greg, Bamford the weaver poet, Edwin Waugh, William Henry the chemist, Sir W. Fairbairn, Sir J. Whitworth, Bishop Lightfoot, James Martineau, and Gladstone; and, connected with the success of the cotton trade, John Kay (inventor of the fly-shuttle), Crompton, Arkwright, Hargreaves.

See Baines, *Lancashire* (1836; new ed. by Croston, 1888); Espinasse, *Lancashire Worthies* (1873–77); Nodal and Milner, *Dialect* (1882); and other works by Butterworth, Grindon, Axon, Fishwick (1841–94); the 'Victoria History' (1906–13).

Lan'caster, the capital of Lancashire, is picturesquely situated on an eminence on the left bank of the Lune, 7 miles from its mouth, 51½ NNW. of Manchester and 231 NW. of London by rail. The ancient castle, which overlooks the town, was built on the site of a Roman castle, and was restored by John of Gaunt, 'time-honoured Lancaster;' it is now used as the county jail. The church of St Mary (15th century) contains some good oak-carvings and stained glass. The Ripley Hospital is an asylum for orphan children. The Lune is here crossed by a bridge of five arches, erected in 1788, and by an aqueduct carrying the Lancaster Canal across the river. Owing to the sanding of the Lune, large vessels have to unload at Glasson, 5 miles distant. The chief manufactures are furniture, cotton, silk, oilcloth, table-covers, machinery, and railway plant. Sir R. Owen and Dr Whewell were natives. In 1698 the town was nearly burned to the ground. A very ancient municipal borough, it returned two members from 1547 to 1867, when it was disfranchised for corrupt practices; it is now in the Lancaster division of North Lancashire. Pop. (1851) 14,602; (1911) 41,410.—The Duchy of Lancaster is a separately administered appanage of the Crown.

Lancaster, (1) capital of Fairfield county, Ohio, on the Hocking River and Canal, 32 miles SE. of Columbus, with machine-works and railway shops. Pop. 13,100.—(2) Capital of Lancaster county, Pennsylvania, 69 miles by rail W. of Philadelphia. It has a large court-house, the Franklin and Marshall (German Reformed) College, large cotton-mills, tanneries, breweries, potteries, and extensive warehouses for tobacco. Founded in 1730, Lancaster was the state capital from 1799 to 1812. Pop. (1870) 20,233; (1910) 47,227.

Lancaster Sound, a western outlet of Baffin Bay, first navigated by Parry in 1819.

Lan-chau, or LAN-CHOW, capital of Kan-su province, China, on the Hoang-ho, near the Great Wall. It is an important commercial centre, and has manufactures of cloth, &c. Pop. 500,000.

Lancing, a Sussex watering-place, 8½ miles W. of Brighton. St Nicholas's College (1848), on the South Downs near North Lancing, is a High Church middle-class school. Pop. of parish, 2000.

Landau (*Lan-dow*), (1) a town of the Bavarian Palatinate, 11 miles W. of the Rhine and 17 SW. of Spires. In 1816 Bavaria became mistress of it; and in 1870–71 its fortifications were razed. Pop. 18,000.—(2) Another town of Bavaria, on the Isar, 72 miles NE. of Munich. Pop. 4000.

Landaur, a sanitary station in the United Provinces, forming part of the town of Masuri. It is on the slope of the Himalayas, 7459 feet above the sea.

Landerneau, a seaport in the French dep. of Finistère, stands at the head of Brest harbour, 12 miles by rail NE. of Brest. Pop. 6520.

Landes (*Lon*^{g}*d*), a dep. of southern France, one of the largest and most thinly peopled in the country, is bounded on the W. by the Bay of Biscay. Area, 3598 sq. m.; pop. (1876) 303,508; (1911) 288,902. The chief river is the Adour (navigable). The greater portion of the dep. consists of the *landes*, tracts of barren sand, interspersed with marshes and forests of pine and oak and cork. Much land has been rendered available by draining and planting with pines. The dep. is divided into the three arrondissements of Mont-de-Marsan (the capital), St Sever, and Dax.

Landguard Fort (*Lang'gard*). See HARWICH.

Landquart, a village of E. Switzerland, on the Landquart, a tributary of the Upper Rhine, 8 miles N. of Chur, and 31 NW. of Davos by rail.

Landsberg, a Prussian town, on the Warthe, 80 miles by rail NNE. of Berlin. Its industrial establishments include sawmills, machine-works, breweries, distilleries, &c. Pop. 40,000.

Land's End. See CORNWALL.

Landshut (*Lands-hoote*), a picturesque town of Upper Bavaria, on the Isar, 44 miles by rail NE. of Munich. Of its eleven churches, St Martin's (1477) has a steeple 436 feet high. The castle of Trausnitz (*c.* 1232) was partially restored in 1872–74. Landshut has manufactures of tobacco, beer, wagons, hats, &c. The Dominican monastery (1271) was the seat of the university, removed hither from Ingolstadt in 1800, and transferred to Munich in 1826. Here, on 16th April 1809, the Austrians drove back the Bavarians, but were in turn defeated by Napoleon five days later. Pop. 26,500.

Landskrona, a Swedish seaport, on the Sound, 16 miles NNE. from Copenhagen. A fortress down to 1870, it has a good harbour, and carries on sugar-refining, shipbuilding, and the manufacture of tobacco and leather. Pop. 16,265. Opposite lies the island of Hvem, on which Tycho Brahé built his observatory of Uranienborg.

Lanercost, an Augustinian priory, founded about 1169, lies in the valley of the Irthing, 16 miles NE. of Carlisle. It is partly in ruins; but the nave is used as a parish church. Naworth Castle, 1 mile S. of the priory, is associated with the 'Belted Will Howard' of Scott's *Lay of the Last Minstrel;* it contains old armour, tapestry, &c. See R. S. Ferguson's *Lanercost* (1870).

Langdale Pikes, two Westmorland summits, at the head of Great Langdale Valley, 2401 and 2323 feet high.

Langeland (i.e. 'long land'), a low, fertile Danish island, 33 miles long by 5 broad, at the southern entrance to the Great Belt. Area, 106 sq. m.; pop. 19,000. Chief town, Rudkjöbing (pop. 3179), on the west coast.

Langensalza (*Lang-en-salt'za*), a town of Prussian Saxony, 13 miles by rail N. by W. of Gotha, with a pop. of 12,924, a neighbouring sulphur-spring, and woollen and cloth manufactures. Here, on 27th June 1866, 19,000 Hanoverians encountered 8200 Prussians; the latter were at first defeated, but being reinforced compelled the former to capitulate two days later.

Lang'holm, a market-town of Dumfriesshire, at the junction of Ewes and Wauchope Waters with the Esk, 23 miles SSW. of Hawick, and 22 (by a branch-line) N. of Carlisle. Near the town-hall is a marble statue of Admiral Sir Pulteney Malcolm (1768–1838), and on White Hill an obelisk to his brother, General Sir John Malcolm (1769–1833). Shepherd's plaid and tweeds have been manufactured since 1832. In 1890 Thomas Hope, a New York merchant and native of Langholm, left £80,000 to found a hospital here. Langholm is a burgh of barony (1643), under the Duke of Buccleuch, whose seat, Langholm Lodge, is close by. The Douglases were defeated here in the battle of Arkinholm (1455). Pop. 2930.

Langkat, a place on the NE. coast of Sumatra, 30 miles S. of the frontiers of Atcheen, producing tobacco and petroleum.

Langley Castle, a ruin in Northumberland, 2 miles S. of Haydon Bridge.

Langness, a headland at the south-east extremity of the Isle of Man.

Langport, a Somerset market-town, on the Parret, 14 miles E. by N. of Taunton. Pop. 800.

Langres (*Longr*), a town in the French dep. of Haute-Marne, lies 1530 feet above sea-level (one of the highest towns in France), 184 miles ESE. of Paris by rail. As key of the communication between the Seine and the Rhone, it has been strongly fortified since 1868, and has a cathedral of the 12th and 13th c. Pop. 7846. Langres (anc. *Andematunnum*) in Cæsar's time was capital of the Lingones, whence the name.

Langside, a southern suburb of Glasgow. Here, after her escape from Loch Leven, Queen Mary's forces were defeated, 13th May 1568. A monument (1887) commemorates the battle.

Lang-son, a town in Tongking, situated north-east of Ha-noi, near the Chinese frontier.

Languedoc (*Lâng-doc'*), a former province of the south of France, bounded E. by the Rhone, and S. by the Mediterranean, and now embraced in the deps. of Lozère, Gard, Ardèche, Aude, Hérault, Upper Loire, Tarn, and Upper Garonne. The name is derived from *langue d'oc*, the southern French dialect, or Provençal, so called from its use of *oc* instead of the northern *oui* for 'yes.'

Lannion, a town in the French dep. of Côtes-du-Nord, on the Guer, 69 miles by rail ENE. of Brest. Pop. 5593.

Lansdown, a hill (813 feet) to the north of Bath, commanding a prospect of exceptional beauty. Lansdown Tower (130 feet) was built by Beckford, and 2 miles beyond, on 5th July 1643, Waller's entrenchments were stormed by the Cornish royalists. On the spot where Sir Bevil Grenville fell Lord Lansdowne raised a monument in 1723.

Lansing, the capital (since 1847) of Michigan, on the Grand River, 85 miles WNW. of Detroit, at the meeting-point of four railways. It contains the state capitol, library, agricultural college, a school for the blind, several manufactories, &c. Pop. 32,000.

Lansingburg, a village of New York, annexed to the city of Troy in 1901. It contains an Augustinian priory, and has extensive manufactures of brushes and oilcloth.

Laodicea, a name given to several cities—eight at least can be distinguished—founded or rebuilt by the Seleucid rulers of Syria; it is adapted from Laodice, a favourite name for the female relatives of these sovereigns. The most famous, situated 2 miles from the river Lycus in Phrygia, is now a heap of ruins, known as Eski-Hissar. One of the Seven Churches of Asia, it was stigmatised as lukewarm (Rev. iii. 16), but was the scene of great church councils in 363 and 476.—For another Laodicea, see LATAKIA.

Laon (*Lâ'ong*), chief town of the French dep. of Aisne, is situated on a steep isolated hill (594 feet), 87 miles by rail NE. of Paris. Occupying a naturally strong position, it has been a fortress since the 5th century, was capital of the kings of the West Franks, and from 515 to 1790 was the seat of a bishop. The Gothic 12th-century cathedral, and the bishop's palace (now a law-court), still remain. The inhabitants are noted market-gardeners. At Laon, in March 1814, Napoleon was repulsed by Blücher and Bülow; and it surrendered to a German force on 9th September 1870, when the explosion of the powder-magazine by a French soldier cost 500 lives. Pop. 10,000.

Laos. See SHAN STATES.

La Paz, (1) a dep. of Bolivia, bordering on Peru; area, 54,000 sq. m.; pop. 500,000.—The capital, La Paz, lies in a valley 11,952 feet above the sea, 42 miles SE. of Lake Titicaca. It is from time to time (as in 1893) capital also of the whole country. It has a handsome but unfinished cathedral, and a trade in copper, alpaca wool, cinchona, &c. Pop. 90,000.—(2) A town of Argentina, on the Paraná, 530 miles by river N. by W. of Buenos Ayres. Pop. 9800.

Lapland is a collective name for the extensive region (Norwegian, Swedish, Finnish, and Russian) in the north of Europe that is inhabited by the Lapps, who belong to the Ural-Altaic stock. N. it is bounded by the Arctic Ocean, NW. by the Atlantic, E. by the White Sea. The total Lapp pop. is about 28,000—18,000 in Norway, 7000 in Sweden, 800 in Finland, and 2000 in Russia.

La Plata (*La Plah'ta*), the capital of the Argentinian province of Buenos Ayres, was founded in 1884, after Buenos Ayres City, from which it is about 30 miles SE., had been made the federal capital. The new city was rapidly built, with wide streets, and over a score of squares; the central portion is lit with the electric light, and there are tramways. Buildings of note are the handsome capitol, an observatory, and a fine railway station. Cottons and woollens are manufactured; and a canal connects a harbour here with a larger outer one at Ensenada, on the La Plata River. Pop. 95,000.

La Plata, Rio de, a wide estuary of South America, between Uruguay on the north and the Argentine Republic on the south, through which the waters of the Paraná and the Uruguay sweep down to the ocean. It is about 200 miles long, 28 wide at Buenos Ayres, and 140 broad at its mouth. The northern shore is somewhat steep and lofty, but that along the province of Buenos Ayres is low and flat, with wide sandbanks. The estuary has thus no shelter from the tempestuous storms from the SW.; and even the only good harbour, that at Montevideo, is open to the SE. The outflow of the estuary is exceeded only by that of the Amazon; the yellow, muddy stream is recognisable 60 miles out at sea. The estuary was discovered in 1515 or 1516 by Diaz de Solis, who was shortly afterwards roasted and eaten by the Indians on its bank. *Plata* is the Spanish word for 'silver.' See Sir Horace Rumbold's *Great Silver River* (2d ed. 1890).

Laporte, capital of Laporte county, Indiana, 50 miles ESE. of Chicago. Pop. 10,500.

Lar, capital of Laristan, in south Persia, 170 miles SE. of Shiraz. Pop. 12,000.

Lar'acor, a Meath parish, on the Boyne, 3 miles SE. of Trim. Swift was vicar of Laracor.

Lar'amie, a river which rises in northern Colorado, and flows 200 miles NE. through south-eastern Wyoming to the North Fork of the Platte at Fort Laramie. It gives name to the Laramie Plains, a treeless plateau, 7500 feet above sea-level, and 3000 sq. m. in extent; and to the Laramie Mountains, a Rocky Mountain Range which bounds this plateau N. and E. Laramie City, Wyoming, on this great plain, and on the Union Pacific Railroad, 573 miles W. of Omaha, has a rolling-mill and railway shops. Pop. 8388.

Larbert, a railway junction in Stirlingshire, 2 miles W. by N. of Falkirk.

Lare'do, capital of Webb county, Texas, on the Rio Grande, opposite Nuevo Laredo, by rail 153 miles SSW. of San Antonio and 840 N. of Mexico. Pop. 14,000.

Largo, a village of Fife, on Largo Bay, and at the base of Largo Law (965 feet), 14 miles NE. of Kirkcaldy. It has a bronze statue (1885) of Alexander Selkirk, who was born here. Population, 1600.

Largs, an Ayrshire watering-place, on the Firth of Clyde, 14 miles S. of Greenock, and 11 N. of Ardrossan by a railway (1885). Here, on 12th October 1263, Alexander III. defeated Haco of Norway. Pop. 3800.

Larissa (Turkish *Yenisher*), anciently the chief town of Thessaly, and ceded by Turkey to Greece in 1881, stands on the Salambria (anc. *Peneus*), and manufactures silk and cotton goods and tobacco. The seat of a Greek archbishop, it is connected by rail (37½ miles) with the port of Volo and with Athens. Pop. 20,000. The nome of Larissa has 100,000 inhabitants.

Laristan, the south-east part of the Persian province of Fars; area, 22,954 sq. m.; pop. about 90,000.

Lark, a river of Suffolk and Cambridgeshire, flowing 26 miles NW., past Bury St Edmunds and Mildenhall, to the Ouse near Littleport.

Larkhall, a Lanarkshire town, 3½ miles SSE. of Hamilton. Pop. 13,000.

Larkhana, the capital of a Sind district, called 'the Eden of Sind,' 150 miles N. of Hyderabad by rail; pop. 15,000.

Lar'naka (anc. *Citium*), a seaport of Cyprus, 27½ miles S. of Nicosia. The British have built a court-house, custom-house, &c. on the sea-front, as well as two iron piers. Sea-going vessels have to lie 1½ mile from the shore owing to the shallow water. Pop. 10,000.

Larne, a seaport of County Antrim, at the entrance of Lough Larne, 25 miles NE. of Belfast by rail. There is daily communication with Stranraer by mail-steamer. Pop. 8000.

Larnica. See Larnaka.

La Rochelle. See Rochelle.

Larvik. See Laurvik.

La Salette. See Salette.

La Salle, a city of Illinois, at the head of steam-navigation on the Illinois River, 99 miles by rail WSW. of Chicago, with which it is also connected by the Illinois Canal. Bituminous coal is mined here, and the city has manufactures of zinc, glass, and iron. Pop. 11,500.

Lashkar. See Gwalior.

Las Palmas, chief town of the Canary Islands, on the north-east coast of Gran Canaria, is the seat of a bishop. Pop. 64,000.

Lassa. See Lhassa.

Lasso'die, a collier-village of Fife, 4 miles NNE. of Dunfermline.

Lasswade', a Midlothian village, on the North Esk, 6½ miles SSE. of Edinburgh. Drummond of Hawthornden is buried in the churchyard (memorial, 1893); and Scott and De Quincey lived here. Pop. 900.

Lataki'a (Turk. *Ladikiyeh*; anc. *Laodicea ad Mare*), a decayed seaport of Syria, with a sanded-up harbour, stands on a rocky cape 75 miles N. of Tripoli. It possesses remains of Roman buildings, and was still a wealthy city at the time of the Crusades. Pop. 20,000, who export the Latakia tobacco, grown on the hills in the interior, and some grain, silk, sponges, oils, &c.

Lathom House, the seat of the Earl of Lathom, in Lancashire, 4½ miles ENE. of Ormskirk. It is a Grecian mansion, built about 1750. Its predecessor was splendidly defended by Charlotte de la Tremouille, Countess of Derby, in 1644.

La Trappe. See Trappe, La.

Lauban, a town of Prussian Silesia, on the Queiss, 15 miles E. of Görlitz. Pop. 14,336.

Lauder, a quaint little royal burgh of Berwickshire, on Leader Water, 25 miles SE. of Edinburgh. Near it is Thirlestane Castle, the seat of the Earl of Lauderdale. Till 1885 with Haddington, &c. it returned one member. Pop. 659.

Lauenburg, or Saxe-Lauenburg, a German duchy, formerly united to the crown of Denmark, and lying on the Elbe's right bank between Holstein and Mecklenburg. In 1876 it was incorporated with Sleswick-Holstein, of which it is now a district. Area, 457 sq. m.; pop. 52,000.—The town of Lauenburg, once capital of the duchy, stands on the Elbe, 25 miles SE. of Hamburg. Pop. 5748.—Lauenburg, in Pomerania, 38 miles NW. of Danzig, has a pop. of 10,500.

Laugharne, or Llaugharne, a market-town at the Corran's influx to the Taf estuary, 12 miles SW. of Carmarthen. It has a fine church and a ruined castle. Pop. 900.

Launceston (*Launs'ton* or *Lon'son*), till 1838 the county town of Cornwall, on the Kensey, a tributary of the Tamar, 36 miles NW. of Plymouth and 50 W. of Exeter by branch-lines opened in 1865 and 1886. It has a fine granite church (1511); the circular Norman keep of a castle which figured in the Great Rebellion, and in which Fox the Quaker was imprisoned (1656); an old gateway; and a new town-hall (1887). A municipal borough since 1227, it returned two members till 1832, one till 1885. It is officially called 'the borough of Dunheved, otherwise Launceston.' Pop. 4200.

Launceston, the second city of Tasmania, is to the north of the island what Hobart, the capital, is to the south—the chief port of entry and mart of trade. It stands in a valley enclosed by hills at the junction of the Esk with the Tamar, which, after a course of 40 miles, enters Bass Strait at Port Dalrymple. There is a railway (133 miles) to Hobart. The principal buildings are the government-house, new post-office, theatre, town-hall, and mechanics' institute. Launceston was incorporated in 1858, and raised to a city in 1889. Pop. 25,200.

Laurencekirk, a Kincardineshire market-town, 30 miles SW. of Aberdeen. The 'minstrel' Beattie was a native, and Ruddiman the grammarian was schoolmaster here. Pop. 1400. See Fraser's *History of Laurencekirk* (1880).

Laurentian Mountains. See Canada, p. 148.

Lauriston Castle, a Midlothian mansion, 3¾ miles WNW. of Edinburgh. It was the seat of the famous financier, John Law.

Laurium, a mountain (1171 feet) of Attica, NW. of Cape Colonna, and connected by a railway with Athens. It was famous for its silver-mines, already exhausted in Strabo's day. Since 1874, however, the great heaps of slag have been profitably worked, and fresh deposits found of argentiferous lead and of zinc ore. The modern mining-town has a pop. of over 10,000.

Laurvik, a seaport of Norway, at the head of a small fjord on the west side of Christiania Fjord, 98 miles by rail SSW. of Christiania. It has several sawmills. Pop. 10,000.

Lausanne (*Lazann'*), capital of the Swiss canton of Vaud, on the S. slope of the Jura Mountains, close to the N. shore of the Lake of Geneva, Ouchy (where Byron wrote *The Prisoner of Chillon*, and where peace was made between Italy and Turkey in 1912) forming its harbour. It is bisected by a valley, finely bridged in 1844. Lausanne is famous for its educational institutions; amongst them are the new cantonal university (1891), and industrial, music, and other schools. The cathedral is a beautiful Gothic building of the 10th and 13th centuries. Here, too, are the cantonal museum of natural history and antiquities, the Arlaud Museum (1846) of Art, a statue of Tell, &c. Since 1875 Lausanne has been the seat of the Federal Tribunal. Benjamin Constant was a native; and here Gibbon wrote most of the *Decline and Fall*. John Kemble, the actor, died and was buried here. Pop. nearly 65,000, of whom 86 per cent. are Reformed, and 78 per cent. speak French.

Lausitz. See Lusatia.

Lauterbrunnen (*Lowterbroon'nen*), an Alpine valley in the Swiss canton of Bern, through which flows the Weisse Lütschine, a principal feeder of the Aar. It is surrounded by perpendicular walls of sandstone 1000 to 1600 feet high, down which pour a score of waterfalls. Of these the *Staubbach* ('dust-stream') is 866 feet high.

Laval, capital of the French dep. of Mayenne, picturesquely situated on the river Mayenne, 46 miles by rail E. of Rennes. Its chief buildings (both 12th century) are the cathedral and the old ducal castle (a prison now). Since the 13th century, when Flemish weavers settled here, the town has been a centre of linen-manufactures—linen, ticking, sacking, &c. Near it the Vendeans under Larochejaquelein defeated the Republicans in 1793. Pop. 30,000.

La Valetta. See Valetta.

Lavaur, a town in the French dep. of Tarn, on the Agout, 25 miles ENE. of Toulouse. A bishop's see from 1317 to 1801, it was the strongest fortress of the Albigenses, but in 1211 was taken by Simon de Montfort. Pop. 6293.

La Vendée. See Vendée.

Lavenham, a Suffolk town, 10½ miles SSE. of Bury St Edmunds, with a noble flint-work church. Pop. of parish, 2000.

Lawfeldt, or Laveld, close to Maestricht in Belgium. Here the French defeated the combined Austrian, Dutch, and English forces, 2d July 1747.

Lawrence, (1) capital of Douglas county, Kansas, on the Kansas River, 34 miles SSW. of Leavenworth by rail. It is the seat of the state university (1864), and has manufactures of flour, castings, furniture, &c. Pork-packing is extensively carried on. Lawrence was founded in 1854 by Free-soil settlers, shared in the violent struggle against slavery, and was partly burned by Quantrell's guerillas in 1863. Pop. 13,000.—(2) One of the capitals of Essex county, Massachusetts, and an important manufacturing city, on the Merrimack River, 26 miles N. of Boston by rail. The river, which here falls 28 feet in half a mile, is crossed by a dam of granite, 900 feet long and 40 high; and channels on either bank conduct the water to the mills. These, some of them amongst the largest in the world, manufacture cotton and woollen goods, cloth, and paper; and engines, boilers, machinery, clothing, hats, &c. are also produced here. Pop. (1870) 28,921; (1880) 39,151; (1910) 85,892.

Lawrence, St. See St Lawrence.

Lawrenceburg, a city of Indiana, on the Ohio, 22 miles below Cincinnati. Pop. 4000.

Laxey, a coast-village in the Isle of Man, 7½ miles NNE. of Douglas. Near it are lead-mines.

Laxford (Norse, 'salmon fjord'), a stream and a sea-loch of NW. Sutherland, 5¼ and 3¾ miles long.

Laybach. See LAIBACH.

Laycock. See LACOCK.

Lazareff, PORT, a fine natural harbour, 40 to 60 feet deep, and 8 sq. m. in extent, in Broughton Bay on the east side of Corea. It is 390 miles from Vladivostok to the N. and 480 from Port Hamilton to the S., and is free from ice in winter.

Lazistan′, a coast strip at the south-east corner of the Black Sea, partly Turkish, partly Russian, inhabited by the rough Lazes.

Le, or LEH, the walled capital of Ladakh (q.v.), stands 3 miles from the bank of the Indus, 11,538 feet above the sea. Pop. 4000.

Lea, a stream of Hertfordshire, Middlesex, and Essex, rises near Houghton Regis, and flows 46 miles SE. and S. to the Thames near Blackwall.

Leader, a Berwickshire stream, running 21 miles south-south-eastward to the Tweed at a point 2 miles E. by N. of Melrose.

Leadgate, a mining-town of Durham, 2½ miles ESE. of Shotley Bridge. Pop. 5000.

Leadhills, a village of Lanarkshire, the highest in Scotland (1400 feet), on Glengonner Water, 45 miles SSW. of Edinburgh. Allan Ramsay and Symington were natives. Lead has been mined here for six hundred years, the output ranging between 700 and 1800 tons. Pop. 700.

Leadville, a mining-town of Colorado, capital of Lake county, stands in a valley 10,200 feet above the sea, 70 miles (151 by rail) SW. of Denver. Its mines produce gold, silver, and lead. The town, which was incorporated in 1878, contains smelting-furnaces and stamp-mills. Pop. 7500.

Leam, a river flowing 25 miles to the Avon, near Warwick.

Leamington (*Lem′ing-tun*), a watering-place of Warwickshire, is beautifully situated on the Leam, 2 miles NE. of Warwick. It is wholly of modern growth, having become important only since the rediscovery of its mineral waters in 1784. They are saline, sulphureous, and chalybeate; and the watering-season lasts from October till May. The town, too, stands in the centre of a good hunting-country. Among its buildings are the Pump-room (1868), assembly-rooms (1813), new municipal offices with art school and free library, technical schools, hospitals, the Leamington College, and the fine parish church. The 'soured milk cure' is extensively in use, and lactic acid cultures are sent throughout the United Kingdom. There is some ironfounding done. Visited by the Duchess of Kent and the Princess Victoria in 1830, Leamington in 1838 received the name of 'Royal Leamington Spa.' It was incorporated in 1875, and since 1885 has united with Warwick to return one member. Pop. (1811) 543; (1851) 15,692; (1911) 26,713.

Leasowes. See HALESOWEN.

Leatherhead, a town of Surrey, on the Mole, 4 miles SSW. of Epsom. Pop. 5700.

Leavenworth, a city of Kansas, the capital of Leavenworth county, on the Missouri River, 25 miles NW. of Kansas City by rail. First settled in 1854, it is now a handsome town, of broad avenues, and contains a Soldiers' Home, the state normal school, and large factories and mills. Eight lines of railway centre here, and the river is crossed by a fine iron bridge. Adjoining the city is Fort Leavenworth (1827), an important depot for troops and supplies, with large barracks, &c. Pop. 20,000.

Leb′anon, a mountain-range in Syria, extending from Homs in the north to Mount Hermon in the south. The name is derived from a Semitic root meaning 'white,' and was probably given, not because the peaks are snow-clad even in summer, but because of the whitish colour of the limestone rocks. They are divided into two parallel ranges, the Lebanon on the west and the Anti-Lebanon (or Anti-Libanus) on the east. Between them lies the deep valley of the Bukâ'a (anc. *Cœle-Syria*), 4 to 6 miles wide, which is watered by the Litany and El-Asi (anc. *Orontes*). The former flows SW. and W. to the sea a little north of Tyre; whilst the latter flows NE. till, after crossing the plains of Hamath, it turns W. to the Mediterranean. The highest summits occur in the north in both ranges: in Lebanon they vary from 10,018 (El-Kazib) to 7000 feet and less, and in Anti-Lebanon are about 8000 or 9000 feet. In both ranges the eastern versant is the steeper and sterner. The western valleys and the lower slopes are generally verdant. Vines, mulberry-trees, olive-groves, and orchards (nuts and figs) abound everywhere. The higher slopes are in many districts covered with forests of oak, cypress, pine, plane, &c. Contrary to the current belief, remains of the great cedar forest of Solomon's time exist in more places than the single grove of 377 trees at the head of Kedisha Valley. Streams of clear water are numerous. The inhabitants (estimated at 221,000) are a hardy, ruddy race of people, of Syrian (Aramæan) descent, who keep large herds of sheep and goats. The predominating element is the (Christian) Maronites; next come the Druses, heretical Moslems. After the bloody quarrels of the Druses and Maronites in 1860, the district of Lebanon was separated (1861) from the Turkish pashalik of Syria, and put under a Christian governor, the European powers constituting themselves the 'guardians' of the new province.

Lebanon, capital of Lebanon county, Pennsylvania, 28 miles W. of Reading, with ironworks and mills. Pop. 20,000.

Lebedin, a town of Russia, 87 miles NW. of Kharkoff. Pop. 14,788.

Lebrija (anc. *Nebrissa-Veneria*), a town of Spain, 44 miles S. by W. of Seville. Pop. 11,879.

Lecce (*Let′chay*), a cathedral city of Italy, 7 miles from the Adriatic and 24 by rail SSE. of Brindisi. As Lycia (hence Lecce) it was the seat of a Norman countship. Pop. 32,051.

Lech, a right-hand tributary of the Danube, rises in the Alps in Vorarlberg, flows northward past Augsburg, and after a course of 177 miles joins the Danube a few miles east of Donauwörth.

Lechlade (*Letch′lade*), a Gloucestershire town, on the Thames, 23 miles SW. of Oxford. Pop. 1166.

Ledbury, a pleasant, old-fashioned market-town of Herefordshire, 13 miles ESE. of Hereford. It has an interesting church, Romanesque to Perpendicular in style, St Catharine's Hospital (1232; rebuilt 1822), and a clock-tower (1890) to the memory of Mrs Browning, who passed her girlhood here. Pop. 3400.

Lee, a river flowing 50 miles eastward to Cork harbour.

Lee Castle, a Lanarkshire mansion, 3 miles NNW. of Lanark. It is the ancient seat of the Lockharts, with the 'Lee penny' talisman.

Leeds, the second town in Yorkshire, and sixth in England in point of population, is a parliamentary, municipal, and county borough, returning since 1885 five members to parliament. By rail it is 25½ miles SW. of York, 196 NNW. of London, and 112 SSE. of Carlisle. It is situated in the north-west of the West Riding of Yorkshire, in the valley of the Aire, and is the seat of important manufactures, especially of clothing in all its branches. The woollen trade exceeds in extent that of any other part of England; and the iron industries, employing about 30,000 persons, are now as important as the woollen manufactures. The manufacture of leather is carried on in some of the largest tanneries in the kingdom, and about 100 firms are engaged in making boots and shoes. Other manufactures are those of locomotives, machines, glass, ready-made clothes, tobacco, oil, chemicals, earthenware, worsted, and silk. St Peter's Church in Kirkgate, rebuilt in 1838 at a cost of £29,770, is 180 feet long by 86 wide; the tower is 139 feet high, and contains a peal of thirteen bells. St John's, New Briggate, consecrated by Archbishop Neile in 1634, is an almost unique example of a 'Laudian' church, and still retains the original fittings. The town-hall (1858) has a tower 225 feet high, and a richly-decorated great hall, with one of the largest organs in Europe. There are colossal statues of Queen Victoria and the Prince-Consort in the vestibule, and of Wellington in the front of the building. Contiguous to the town-hall are the municipal buildings (1884–88, comprising also reading-room, free library, and fine art gallery), and the school-board offices. The General Infirmary was erected in 1868 from designs by Sir G. G. Scott, at a cost of £120,000; the mechanics' institute (1867) contains a lecture-hall accommodating 1700 persons; and the grammar-school (1859), from designs by Barry, is a cruciform Decorated structure. Other buildings are the Royal Exchange (1875); the fine oval corn exchange; the new general post-office, on the site of the old coloured-cloth hall (demolished 1889); the Coliseum; the Philosophical Hall, with a fine museum; the Wesleyan training-college (1868); Turkish Baths; Beckett's Bank, a fine work by Sir G. G. Scott. There is also a library of 80,000 volumes, founded by Priestley in 1768. The University of Leeds, which received its charter in 1903, was founded in 1874 as the Yorkshire College, and was a member of the Victoria University; it has now 150 professors (12 in medicine) and teachers, and 900 students. In 1885 it was housed in a handsome Gothic pile. The Central Higher Grade School (1880) provides for 2000 scholars. Since 1897 the mayor of Leeds is called Lord Mayor. The municipality owns the markets, gas and water works, tramways, electric light, free libraries, and cemeteries, subsidises technical education, and provides garden allotments. Kirkstall Abbey (q.v.) is about 3 miles from Leeds. Roundhay Park, 2 miles from Leeds, was bought by the corporation in 1872, at a cost of £140,000, and converted into a recreation ground. Near Adel Church (erected 1140), about 4 miles from Leeds, was a Roman station. Pop. (1851) 172,270; (1901) 428,935; (1911) 445,550. Amongst Leeds worthies have been Dean Hook; Dr Priestley; Cope and Rhodes, artists; the Teales, physicians, &c.; besides the Becketts, the Baineses, the Gotts, the Fairbairns, the Denisons, and other families identified with the town. See Ralph Thoresby's *Ducatus Leodiensis* (1715); Baines's *Historic Sketch of Leeds* (1822); the 'Victoria History' of Yorkshire.

Leek, a manufacturing and market town of Staffordshire, on the Churnet, 13½ miles SSE. of Macclesfield, and 24 NNE. of Stafford. The parish church, dating from 1180, but mainly Decorated in style, was restored by Street in 1867–75. There are also a grammar-school (1723), a cottage-hospital (1870), and, 1½ mile distant, the ruined Cistercian abbey (1214) of Dieulacres (De la Croix). Leek, whose civic charter dates from the days of King John (1208), is the largest centre of silk-dyeing in England. Pop. about 17,000. See works by Sleigh (2d ed. 1884) and M. H. Miller (1891).

Lee Priory, a mansion in Kent, on the Little Stour, 4 miles E. by S. of Canterbury. It was the seat of Sir Egerton Brydges.

Leer (*Layr*), a port in (Prussian) East Friesland, on the Leda, near its entrance to the Ems, 32 miles NW. of Oldenburg. Pop. 12,500.

Lees, a Lancashire village, 1½ mile E. by S. of Oldham.

Leeuwar'den, capital of the Dutch province of Friesland, 113 miles by rail NNE. of Utrecht. It has a fine town-hall and law-courts, an old palace of the Princes of Orange, a library with valuable archives, and manufactures of linen fabrics, mirrors, pianofortes, and wagons, besides being a great fruit and cattle market. The population is about 34,000. In the 13th c. it stood on an arm of the sea, now sanded up.

Leeuwin, Cape, the south-west corner of Australia, notable on account of the tempestuous weather usually encountered there.

Leeward Islands. See West Indies.

Lefkosia. See Nicosia.

Leghorn (Ital. *Livorno*), the third seaport of Italy, is situated on the west coast, 13 miles by rail SW. of Pisa, and 62 W. by S. of Florence. Its importance dates from the decline of Pisa; its growth was especially rapid after it fell into the hands of Florence in 1421. Cosimo I. declared it a free port, and invited foreign traders to settle there. Early in the 19th century it was a great depot for the British trade with the Levant. It ceased to be a free port in 1868; and its foreign commerce, carried on chiefly with Britain (Newcastle and Cardiff), France (Marseilles), and the United States, is less than its coasting trade. The imports include spirits, sugar, dyeing materials, woven goods, corn and flour, and machinery; the exports, wine, silk, marble, olive-oil, boracic acid, hemp, iron, preserved fruits, leather, coral, and straw hats ('Leghorn hats'). The harbour (improved in 1854–63) is an enclosed basin, on which stand two arsenals and numerous shipbuilding-yards. The roadstead is protected by an artificial breakwater (1883). There has been a lighthouse since 1303, and outside the harbour stands a lazaretto. Besides shipbuilding, the most important industry is the manufacture of coral ornaments. The north-western portion of the city is intersected by numerous canals, and called 'New Venice.' The most interesting buildings are the cathedral (17th century), its façade designed by Inigo Jones, the Jewish synagogue (next in size to that of Amsterdam), the former grand-ducal palace (1605), the Academy of Sciences, and the naval academy. The sulphur-springs and sea-bathing attract many visitors. Leghorn is defended by forts, bastions, &c., constructed for the most part in 1835–37. Smollett and Francis Horner lie buried in the English cemetery. The composer Mascagni was born here. Pop. of the city (1861) 83,543; (1871)

80,948; (1881) 78,988; of the commune (1871) 97,096; (1911) 105,322.

Legnago (*Len-yâ'go*), one of the four fortified towns of northern Italy known as the Quadrilateral, is on the Adige, 33 miles by rail SE. from Verona. The fortifications, razed by Napoleon in 1801, were rebuilt in 1815. Pop. 3500.

Leh. See Le.

Le'high, a river flowing 120 miles through E. Pennsylvania to the Delaware. Some of its scenery is very picturesque, but the valley is more famous for its anthracite coal-mines.

Leicester (*Lester*), the county town of Leicestershire, a municipal, parliamentary, and county borough, is situated on the Soar, a tributary of the Trent, 22 miles S. of Nottingham, 38 ENE. of Birmingham, 20 NNE. of Rugby, and 97 NNW. of London. Traditionally founded by the British king Lear, it occupies the site of the Roman *Ratæ;* and pavements, urns, and other Roman relics have been found, while the 'Jewry Wall,' 20 feet high and 75 long, which got its name from the mediæval ghetto, is composed of rubble and Roman bricks. Its present name comes from the Anglo-Saxon *Leirceastre*, or 'fortress of the Leire,' as the river was called of old. The Norman castle, dismantled by Charles I. in 1645, is represented chiefly by the modernised assize hall, and by an artificial earthwork, the Mount or Castle View, on which stood the donjon-keep; the Abbey of Black Canons (1143), where Wolsey died in 1530, is an insignificant if picturesque ruin. In the Blue Boar Inn, demolished about 1829, Richard III. slept the night before Bosworth (1485); and his corpse was brought back hither for burial. A handsome memorial cross or clock-tower (1868) bears the effigies of Simon de Montfort, Earl of Leicester, Sir Thomas White, Alderman Newton, and William of Wyggeston. There is a statue also of Robert Hall; and among the other edifices are the old town-hall, with good carving and stained-glass of Henry VII.'s time; the new municipal buildings (1876), Queen Anne in style, with a clock-tower 134 feet high; the post-office (1887), public baths (1879), free library (1870), school of art (1876), opera-house (1877), poor-law offices (1883), corn exchange (1852), lunatic asylum (1836), the museum (1848), rich in local antiquities; the Wyggeston Hospital Schools (1513; rebuilt 1877–78); and five interesting old churches—St Nicholas', St Mary's, All Saints', St Margaret's, and St Martin's, the last with a spire 218 feet high. The New Walk is a pleasant tree-shaded promenade; the racecourse of 1806 is now the Victoria Park, its successor being at Oadby, 3½ miles off; other parks are the Abbey Park and Spinney Hill Park. With Derby, Nottingham, and Sheffield, Leicester shares a water-supply (1912) from the Derbyshire Derwent. Its abnormally rapid growth has been due to its central position, to its transit facilities by three railway companies and by water, and to the great extension of its industries. The manufacture of plain and fancy hosiery, introduced in 1680, is equalled only by Nottingham; in that of pegged and riveted boots and shoes Leicester vies with Northampton; elastic webbing, sewing-cotton, and lace are made, and iron-founding is carried on. First chartered by King John, Leicester has returned two members from Edward I.'s time. Leicester, which is the see of a bishop-suffragan under Peterborough, is an anti-vaccination centre. Pop. (1801) 17,005; (1861) 68,056; (1901) 211,574; (1911) 227,222.

See local histories by Throsby (1777–91), T. Robinson (1793), Thompson, Hollings, Read, Mrs Johnson (1892); and the *Records of the Borough*, edited by Miss Bateson (1899–1905).

Leicestershire, a midland county of England, surrounded by Nottingham, Lincoln, Rutland. Northampton, Warwick, and Derby shires. It has a maximum length and breadth of 44 miles by 40, and contains 833 sq. m., or 532,779 acres. Pop. (1801) 131,081; (1841) 215,867; (1911) 476,553. Its surface is for the most part undulating table-land, the highest ground being at Charnwood Forest in the north-west, where Bardon Hill attains 853 feet above sea-level. The Soar, itself an affluent of the Trent, which for a short distance borders the county on the north, is, with its tributary the Wreak, the principal river. The soil, varying in fertility, is generally loamy: in the north-west are valuable coal-mines, also granite, slate, and limestone quarries, but, the greater part of the county being under pasture, the quantity of corn grown is comparatively small. The principal objects of agriculture are grazing and sheep and cattle breeding, Leicestershire being especially noted for its breed of the former. The chief manufactures are of hosiery and boots and shoes; basket-making is carried on at Castle Donnington; and Stilton cheeses are for the most part made in this county. Leicestershire comprises six hundreds, the county and parliamentary borough of Leicester, and the municipal borough of Loughborough, and 324 parishes, almost entirely in the diocese of Peterborough, and, for judicial purposes, in the Midland Circuit. Leicester is the assize town, and other towns are Ashby-de-la-Zouch, Hinckley, Loughborough, Lutterworth, Market Harborough, and Melton Mowbray, the last two being great hunting centres. There are four parliamentary divisions. In the battle of Bosworth Field (1485) Richard III. lost his life; whilst Leicestershire worthies have been Wyclif, Cardinal Wolsey, Lady Jane Grey, Mary, Queen of Scots, Beaumont the dramatist, George Villiers, Duke of Buckingham, Cleveland the poet, George Fox, Simpson the mathematician, Dr Johnson, Lord Macaulay, Hobart Pasha, Colonel Burnaby, and last, but not least, Daniel Lambert. See works by Burton (1622; 2d ed. 1777), Nichols (1795–1815), Curtis (1831), and the 'Victoria History' (1907 *et seq.*).

Leiden. See Leyden.

Leigh (*Lee*), a town of Lancashire, 21 miles NE. of Liverpool and 16 W. of Manchester. Silks and cotton goods are extensively manufactured; and there are also iron-foundries, breweries, malt-kilns, and glass-works, with neighbouring coal-mines. Pop. (1861) 10,621; (1911) 44,103. See Worsley's *History of Leigh* (1870).

Leighlin (*Lay'lin*), a village of County Carlow, 71 miles SSW. of Dublin. It was the seat of a diocese, now united to Ossory and Ferns.

Leighton-Buzzard (*Lay'ton*), a market-town of Bedfordshire, on the Ouse, 41 miles by rail NW. of London. Its fine cruciform church, mainly Early English, has a spire of 193 feet, and was restored in 1886; in the market-place is a pentangular cross; the corn exchange was built in 1862. Straw-plait is the staple industry. The suffix *Buzzard* is a corruption of Beaudesert or Bosard, a great family here in the 14th century. Pop. about 6800.

Leinster (*Lens'ter*), one of the four provinces of Ireland (q.v.), occupies the south-east portion of the country, comprising the counties of Carlow. Dublin, Kildare, Kilkenny, King's, Longford, Louth, Meath, Queen's, Westmeath, Wexford, and Wicklow.

Leipa, a town of Bohemia, 40 miles N. by E. of Prague. Pop. 10,700.

Leipzig (Fr. *Leipsic*), the fourth city of Germany, is situated in a large and fertile plain in the kingdom of Saxony, 80 miles by rail WNW. of Dresden, and 101 SSW. of Berlin, within 6½ miles of the Prussian border, and 3 miles above the junction of the three small streams, Elster, Pleisse, and Parthe. The inner or ancient town, the centre of the business activity, with narrow and crooked streets and quaint houses, is separated by a broad, tree-shaded promenade (laid out since 1784 on the site of the old walls) from the much more extensive modern suburbs, bounded in their turn by a girdle of busy manufacturing 'villages.' Pop. (1800) 32,146; (1860) 85,394; (1880) 149,081; (1900) 456,089; (1910) 587,635, after extension so as to include the villages. Many handsome edifices were erected and great civic improvements effected in the last quarter of the 19th century. Monuments commemorate the centenaries of Wagner (1913; by Klinger) and of the battle (1913). The Thomaskirche and the Nicolaikirche date respectively from 1496 and 1525, the quaint old Rathaus from 1556. The old castle, the Pleissenburg, has disappeared except the tower, now part of the huge new Rathaus (1898–1908). Amongst the modern buildings are the Municipal Theatre (1868), one of the largest and handsomest in Germany; the Museum (1856–86); the new Exchange (1886); the Observatory (1861); the Booksellers' Exchange (1888), with an interesting museum; St Peter's Church (1885), a fine specimen of modern German Gothic; and the Law-courts. The New Gewandhaus has since 1884 superseded the old Gewandhaus (so called because originally a drapers' hall), in which, since 1781, some of the best concerts in Europe were given. Of numerous squares and open spaces, affording ample room for the stalls and booths of the retail dealers at the fairs, the largest is the Augustus-Platz; the quaintest the Market-place, in which a large war monument for 1870–71 was unveiled in 1888. The Rosenthal and the Johanna-Park are fine parks on the outskirts; while farther out are oak and beech woods.

Leipzig has been the seat of the supreme court of the German empire since 1879, the new building for which dates from 1888. The university, founded in 1409 by a secession from Prague, has nearly 250 professors and lecturers, and about 5000 students. The Augusteum, or main building, in the old town, has been rebuilt; it is supplemented by a great system of spacious and admirably equipped medical and physical laboratories and other 'institutes' in other parts of the town, including a magnificent new library-building with 550,000 vols. and 6000 MSS. The City Library has 120,000 vols. and 1500 MSS. Among the numerous other educational establishments are two gymnasia, a justly famous School of Commerce, a conservatory of music, reckoned amongst the first in Europe, &c. The hospital system of Leipzig has largely benefited the medical faculty of the university. As a seat of trade Leipzig is inferior only to Hamburg and Berlin in Germany. The chief articles of commerce are furs and skins, cloth, leather, and books. The famous Leipzig fairs are held at Easter, Michaelmas, and the New Year, and last from three to five weeks. Their origin is traced as far back as 1180; their importance dates from about 1500; but since 1865 that importance has gradually dwindled, though they are still attended by about 30,000 strangers, including Jews, Turks, Greeks, Armenians, Persians, and even Chinese. Transactions to the extent of over £10,000,000 sterling are said to take place at the Easter fair. Nearly 1000 houses are engaged in the book-trade, and there are also very numerous printing establishments; while type-founding has here its chief centre in Germany. The wool-market, in June, is still much frequented. Among the chief manufactures (carried on largely in the 'villages') are pianofortes, paper, chemicals, oils, scientific instruments, spirits, beer, tobacco, and some textiles, with iron-founding.

Leipzig (formerly *Lipzk*, from the Slavic *Lipa*, a 'lime-tree'), originally a Wendish settlement, is first mentioned as a town in 1015. It suffered greatly in the Thirty Years' War, in the Seven Years' War, and amidst the terrible struggles of the years 1812 and 1813, when it was alternately in possession of the French and of the allies, whose signal victory over Napoleon was fought during October 16–18, 1813. In 1866 it was occupied for some months by Prussian troops. Leipzig was the birthplace of Leibnitz and of Wagner, and a residence of Bach and Mendelssohn. One of the scenes in Goethe's *Faust* is placed in Auerbach's Keller here.

Leiston (*Lay'son*), a town of Suffolk, 4 miles ESE. of Saxmundham by rail. It manufactures agricultural implements, and has a ruined abbey (1363). Pop. 4400.

Leith, the sixth largest town in Scotland, an important seaport, and a municipal and parliamentary burgh, stands on the southern shore of the Firth of Forth, at the mouth of the Water of Leith, 2 miles N. of Edinburgh, with which it is now connected by continuous lines of streets. It is even less attractive than most seaport towns; still, great improvements have been effected since 1877. Among the public buildings are the court-house or town-hall (1827), custom-house (1812), exchange, corn exchange (1862), Trinity House (1816), hospital (1850), Sailors' Home (1883–84), and St James's Episcopal Church (1862–69), by Sir G. G. Scott, with a spire 180 feet high. Leith Fort (1779) is now the artillery headquarters in Scotland. The harbour-works have cost upwards of a million sterling. The five docks constructed between 1801 and 1881 had an aggregate area of 43 acres; the sixth, undertaken in 1892 and completed in 1904, has an area of 60 acres. There are also seven graving-docks, and two piers, 1177 and 1041 yards long. Further extensions were undertaken in 1913. The imports (corn, flour, wines, chemicals, sugar, esparto, timber, fruits, &c.) have an annual value of over £13,000,000; the exports (coal, iron, paraffin, whisky, beer, linen goods, paper, &c.) of about £5,000,000. There is regular steamboat communication with London, the north of Scotland, several continental ports, and New York. Shipbuilding is carried on; and employment is also afforded by large flour-mills, sugar-refineries, distilleries, breweries, engineer-works, sawmills, rope-works, chemical works, &c. Leith was constituted a parliamentary burgh in 1833, and with Portobello and Musselburgh returns one member. Its nine months' siege by the Protestants (1559–60), the surprise of its citadel by the Jacobites (1715), and royal visits innumerable, are the chief events in its history. Home, the author of *Douglas*, was a native; John Logan was a minister; and Robert Nicoll is buried here. Pop. (1841) 26,026; (1881) 59,485; (1911) 80,488. See works by A.

Campbell (1827), D. H. Robertson (1851), and J. Martine (1888), with others cited at EDINBURGH.

Leitha (*Lei'ta*), an Austrian stream rising in Lower Austria, and flowing NE. to join the Danube nearly along the frontier of Lower Austria and Hungary. See AUSTRIA.

Leit'meritz, an old town, partly walled, of Bohemia, at the head of steamboat navigation on the Elbe, 34 miles W. by N. of Prague. It has a cathedral (1671) and a town-house (1535). Brewing is the staple industry. Pop. 13,854.

Leitomischl, an old town of Bohemia, 85 miles ESE. of Prague. Pop. 10,000.

Leitrim (*Lee'trim*), a county in the NE. of the province of Connaught, in Ireland. Its greatest length, north-east to south-west, is 51 miles; its greatest width, 21 miles; and its area 588 sq. m., or 376,212 acres, of which 282,400 are arable, 11 per cent. barren, and 7 per cent. bog. The county touches the ocean on the north, and is divided into two parts by Lough Allen (q.v.), from which the Shannon forms the south-west boundary of the county. The southern division contains numerous small lakes. The northern division is intersected by several ridges. Leitrim is more a grazing than a tillage district. Coal is found in the Lough Allen basin, and iron and lead ores are abundant. The county town is Carrick-on-Shannon. Leitrim returns two members. Pop. (1841) 155,297; (1911) 63,582.

Leixões, the seaport of Oporto (q.v.).

Leman, LAKE. See GENEVA (LAKE OF).

Le Mans. See MANS.

Lemberg (formerly *Löwenburg;* Polish *Lwów*), the capital of the Austrian province of Galicia and Lodomeria, is situated on a small tributary of the Bug, in a narrow basin among hills, 212 miles E. of Cracow. Pop. (1869) 87,109; (1910) 206,574. Several of the churches are fine buildings, as the Dominican, with its venerated image of the Virgin; the Greek cathedral (1740–79); the Gothic Roman Catholic cathedral (1350–1460); and the Armenian cathedral, dating from the 14th century. The university (1784; reorganised 1817) has nearly 1500 students and a library of 200,000 volumes and 1000 MSS. Here also is the seat of the national institute (1817), with a library of 120,000 volumes and 5000 MSS., chiefly of Polish literature, and large collections of coins, paintings, &c. The manufactures embrace machinery, earthenware, oil, beer, &c. Founded in 1259, Lemberg was an important Polish city from 1340. It fell to Austria at the first partition of Poland.

Lemnos, a Greek island, 40 miles SE. of Mount Athos, and 40 SW. of the Dardanelles. It is nearly split in two by two large bays on the south and north coasts. The interior consists of an undulating plateau. None of the hills exceed 1400 feet. Area, 180 sq. m.; pop. 30,000, all Greeks, except 5000 Turks. In 1657 Lemnos passed to the Turks from the Venetians. The chief town is Kastro (anc. *Myrina*), on the W. coast; pop. 3000.

Lena, a river of eastern Siberia, 3000 miles long, rises amid the mountains on the north-west shore of Lake Baikal, in the government of Irkutsk, flows first NE. to Yakutsk, where it is 6½ miles wide, then N. to the Arctic Ocean, into which it falls by several mouths, forming a delta 250 miles wide. It receives the Vilui (1300 miles) on the left, and the Vitim (1400), Olekma (800), and Aldan (1300) on the right. Navigation is open from Yakutsk upwards from May till October. During spring the waters overflow their banks. See Melville's *In the Lena Delta* (1885).

Lencoran, a Russian seaport on the Caspian Sea, 130 miles S. of Baku. Near it are sulphur-springs. Pop. 5540. Persia ceded it in 1813.

Lenczi̇za, an ancient Polish town, 80 miles WSW. of Warsaw. Pop. 15,546.

Lennep, a town of Rhenish Prussia, 18 miles E. of Düsseldorf. Pop. 10,000.

Lennox (*Levenachs*, 'fields of the Leven'), an ancient Scottish territory, comprising the basin of the Leven and Loch Lomond—the whole of Dumbartonshire, great part of Stirlingshire, and a portion of Perthshire. The Lennox Hills, between Dumbarton and Stirling, attain 1894 feet. The Lennox gave name to an earldom (1174–1581), and then to a dukedom, conferred by Charles II. in 1680 on one of his illegitimate sons, Charles, Duke of Richmond and Lennox, who in 1702 sold the Lennox estates to the Marquis of Montrose. See *The Lennox*, by Sir W. Fraser (3 vols. 1874).

Lennoxtown, a village of Stirlingshire, 11 miles N. by E. of Glasgow by rail, with bleach-works, print-works, and alum-works. Pop. 2500.

Lens (*Long*), a town in the French dep. of Pas-de-Calais, 17 miles by rail SW. of Lille. Here are coal-mines, sugar-factories, &c. Pop. 32,000.

Lentini (anc. *Leontini*), a town of Sicily, on a lake, 17 miles SW. of Catania. Pop. 17,740.

Leobschütz, a town in Prussian Silesia, 24 miles by rail NW. of Ratibor. Pop. 15,239.

Leominster (*Lemster*), a market-town of Herefordshire, on the Lug, 13 miles N. of Hereford. A monastery was founded here in 658; and the fine church of a later priory presents every style from Norman to Perpendicular. The quaint old timber Butter Cross (1633) was in 1855 transferred to a new site to make room for an Italian town-hall; there is also a corn exchange (1859). Leather gloves are the staple manufacture, and there is a great trade in hops and cider. Incorporated as a municipal borough by Queen Mary, Leominster till 1868 returned two members, and till 1885 one. Pop. 5800.—LEOMINSTER in Massachusetts, 45 miles NW. of Boston, has numerous manufactures; pop. 15,000.

León, an ancient kingdom of Spain, equivalent generally to the modern provinces of Leon, Palencia, Valladolid, Zamora, and Salamanca. The modern *province* has an area of 6167 sq. m. and a population of 390,000.—The capital, LEON (the *Legio septima gemina* of the Romans), is situated in a plain, 256 miles by rail NW. of Madrid, and has important linen manufactures. The beautiful cathedral (c. 1195–1512) contains the tombs of many sovereigns, saints, and martyrs. Pop. 17,500.—LEON is also the name of a part of Brittany.

León, a city of Mexico, 32 miles W. of Guanajuato, is a great industrial centre, manufactures saddlery, cottons, and woollens, and has a cathedral, convents, and theatres. Pop. 50,000.

León, a city of Nicaragua, 32 miles by rail (1882) SE. of its port, Corinto. Once the boast of Spanish America, founded at the head of Lake Managua in 1523, removed hither in 1610, and sacked by Dampier in 1685, it is now partly in ruins, and of its noble buildings only the cathedral and churches remain. Pop. 65,000.

Leonfor'te, a walled Sicilian town, 49 miles by rail W. by N. of Catania. Pop. 19,645.

Lepanto (anc. *Naupactus;* mod. Greek *Epakto*), a small town of Greece, seat of a bishop, is situated on the north side of the entrance to the Gulf of Corinth. Near it was fought the great naval battle in which the Papal, Venetian, and Spanish galleys under Don John of Austria defeated the Turks, 7th October 1571.

Ler'ida, a town of Spain, capital of a province (area, 4775 sq. m.; population, 280,000, having decreased from 314,530 in 1860), on a tributary of the Ebro, 114 miles by rail W. by N. of Barcelona. The second city of Catalonia, it has a castle and two cathedral churches, one an ancient Byzantino-Moorish edifice, now used as a barracks, the other a modern Græco-Roman building. It manufactures woollens, cottons, leather, paper, and glass. Pop. 25,000.

Lérins (*Leran*^{g}*'*), a group of French islands in the Mediterranean, 2½ miles SE. of Cannes. In a fortress on Sainte-Marguerite (anc. *Lerona*), 4 miles in circumference, the Man with the Iron Mask and Marshal Bazaine were confined, Bazaine escaping hence in 1874. On Saint-Honorat (anc. *Lerina*), 2 miles in circuit, are the ruins of a once famous monastic school.

Lerwick (*Ler'wik*), the county town of Shetland, on the east coast of Mainland and on Bressay Sound, 116 miles NE. of Kirkwall. Demolished and refounded in the 17th century, it has been much improved since 1850, and has a town-hall (1883), county buildings (1872), water and drainage works (1871); whilst, to meet the growth of its shipping and fisheries, extensive harbour-works have been carried out. It is the main distributing centre of the islands. Pop. 4700.

Lesbos, or MYTILENE, a Greek island in the Ægean, 10 miles from the coast of Asia Minor, north of the Gulf of Smyrna. Area, 676 sq. m.; pop. 36,000, mostly Greeks. The ancient capital was Mitylene; the existing town, Castro, 'a straggling dirty village' (pop. 12,000), stands on a peninsula on the east coast, and has a mediæval castle and a shallow harbour. The modern town of Agiasso has 8000 inhabitants. Between 700 and 500 B.C. Lesbos was the flourishing home of poets and literary men—Alcæus, Sappho, Terpander, Pittacus, Theophrastus, Theophanes, &c. It belonged successively to Macedonia, Pontus, Rome, and Byzantium, and from 1355 to 1462 was owned by a Genoese merchant family, who lost it to Mohammed II.

Leslie, a town of Fife, 12 miles SW. of Cupar, and 3 W. of Markinch. It has flax-spinning, bleaching and paper works. Pop. 2200.

Lesmaha'gow (Celt., 'green of St Machutus'), a Lanarkshire village, on the Nethan, 6 miles SW. of Lanark. It was the seat of a Tironensian priory (12th c.). Pop. 2300. See a work by J. Greenshields (1864).

Letchworth, in Herts, is the first practical development of the 'garden city' movement, and was commenced in 1903. It is on the Great Northern Railway, between Hitchin and Cambridge, and 34 miles N. of London. Pop. 5000.

Letterfrack, a tourist centre on the west coast of County Galway, 8½ miles N. of Clifden.

Letterkenny, a town of Donegal, on the Swilly, 16 miles WSW. of Londonderry. Pop. 2200.

Leucadia. See LEUKAS.

Leuchars, a Fife village, 4 miles WNW. of St Andrews, with a fine Norman church. Pop. 711.

Leuctra, a village of Bœotia. Here the Thebans under Epaminondas routed the Spartan king Cleombrotus (371 B.C.).

Leuk (Fr. *Loèche*), a town (pop. 1411) in the Swiss canton of Valais, on the Rhone's right bank, 15 miles above Sion. It is the station, on the Simplon railway, for the *Baths* of Leuk (4643 feet above sea-level), 5 miles N. The springs (124°-199° F.) are saline, chalybeate, and sulphureous, and are used both for drinking and bathing, chiefly in skin and stomachic diseases.

Leukas, LEUCADIA, or SANTA MAURA, one of the Ionian Islands, lies close to the west coast of Greece; about 660 B.C. the Corinthians cut through the peninsula that joined it to the mainland. It is 20 miles long by 8 wide, with an area of 110 sq. m. The backbone of the island is a ridge of white limestone; hence the name (*leukos*, 'white'). Pop. 25,000.—The capital, Amaxichi or Leukas, on the east coast, is the seat of an archbishop; pop. 3800. Long Venetian, the island was occupied by Britain in 1810.

Leuthen, a village of Prussia, in Lower Silesia, 10 miles W. of Breslau. Here, on 5th December 1757, Frederick the Great defeated the Austrians.

Levant' (from the Ital. *Levante*, the 'Orient,' or 'Rising'—i.e. the East), the eastern parts of the Mediterranean Sea and the coast-regions of Syria, Asia Minor, and Egypt. In a wider sense, the name is given to all the regions eastward of Italy, as far as the Euphrates and the Nile.

Leven, a police-burgh (1867) of Fife, on the Firth of Forth, at the mouth of the river Leven, near a rich coalfield, 11 miles by rail NE. of Kirkcaldy. It is a summer-resort, and has good golf-links. Pop. 6600.

Leven, LOCH, a salt-water loch between Argyll and Inverness shires, extending 11½ miles westward to Loch Linnhe. See also LOCHLEVEN.

Levis, or POINT LEVI, capital of a county south of the St Lawrence, opposite Quebec (q.v.), with large docks; pop. 7000.

Levkosia. See NICOSIA.

Levuka, till 1882 the capital of Fiji (q.v.).

Lewes, the county town of Sussex, 50 miles S. of London, is picturesquely situated on the eastern declivity of one of the South Downs, at the foot of which flows the navigable river Ouse on its way to the sea at Newhaven, 7 miles distant. Population, about 11,000. The chief objects of interest are the ruins of a priory and castle which once stood here, the former built (1072–78) by William de Warenne, Earl of Surrey, who with his wife Gundreda, a daughter of William the Conqueror, was buried within its precincts. Of the castle which stood on high ground in the centre of the town, the keep and gateway, the only portions now remaining, are occupied as a museum. Lewes has seven churches, mostly Perpendicular in style, a county hall (1812), free library (1862), school of science and art (1868), and a town-hall (1872). Newspaper-printing and tanning are carried on. Till 1867 the town, which was incorporated in 1881, returned two members, till 1885 one. Race-meetings are held three times a year near Mount Harry on the Downs, where, on 14th May 1264, Henry III. was routed by Simon de Montfort. See works by Horsfield (2 vols. 1824–27), Mantell (1846), and Lower (3d ed. 1880).

Lewis, or SNAKE RIVER, the great southern branch of the Columbia (q.v.). See IDAHO.

Lewisham, 6 miles SSE. of Charing Cross, since 1885 a parliamentary borough (pop. 161,000).

Lewiston, a city of Maine, on the Androscoggin River, 35 miles N. of Portland. The river, which is crossed by several bridges, has here a fall of 50 feet. The principal manufactures are woollens and cottons. Lewiston contains a Baptist college. Pop. 26,000.

Lewis-with-Harris, a Scottish island, the largest and most northerly of the Outer Hebrides, separated from the mainland by the Minch, and containing the town of Stornoway (q.v.), 43 miles NW. of Poolewe and 180 N. by W. of Oban. Its length is 60 miles; its greatest breadth is 28 miles; and its area is 859 sq. m., of which 683 belong to Lewis, the Ross-shire portion, in the north, and 176 to Harris, the Inverness-shire portion, in the south. The coasts are wild and rugged, the chief indentations being Broad Bay and Lochs Erisort, Seaforth, Resort, and Roag. The Butt of Lewis, a promontory at the extreme north, rises sheer to a height of 142 feet; the surface, attaining 2662 feet in Harris and 1750 in Lewis, consists mainly of hill, moor, and moss, treeless and almost shrubless, with much peat and fresh-water lakes innumerable. Less than 4 per cent. of the entire area is in cultivation. In 1844 'the Lews' was purchased for £190,000 from the Mackenzies of Seaforth by Sir James Matheson (1796–1878), who expended £330,000 on improvements. Since 1891 the population has increased from 30,700 to about 33,000, mostly Gaelic-speaking—a population of crofters and fishermen greater than the island is well able to sustain. See W. A. Smith's *Lewsiana* (1875).

Lexington, (1) capital of Fayette county, Kentucky, stands in the fertile blue-grass region, 77 miles S. of Cincinnati. It is a handsome city, its principal edifices the court-house, state university, and state lunatic asylum. The Henry Clay monument also is noteworthy. There are manufactures of spirits, hemp, and especially of tobacco. Pop. (1880) 16,656; (1910) 35,099.—(2) A village of Massachusetts, 11 miles WNW. of Boston, where the first blood of the Revolution was shed, April 19, 1775. A monument has been erected to the eight men who fell here.—(3) Capital of Lafayette county, Missouri, on the Missouri River, 42 miles by rail (84 by water) E. of Kansas City. It contains Baptist and Methodist ladies' colleges, and manufactures hemp and woollen goods. Pop. 5500.—(4) A pretty village of Virginia, on the North River, 32 miles NNW. of Lynchburg. It is the seat of the Washington and Lee University and the Virginia Military Institute; and here Robert E. Lee and 'Stonewall' Jackson are buried. Pop. 3000.

Leyburn, a town of Yorkshire, 7½ miles SSW. of Richmond. Pop. of parish, 830.

Leyden (Dutch pron. *Lī-den*), a town of Holland, on the Old Rhine, 5 miles from the North Sea, and by rail 9 miles N. by W. of The Hague and 31 W. of Utrecht. It is a typical Dutch town, spotlessly clean, with canals bordered by avenues, and sleepy squares and streets. It has an air of academic repose, and is the seat of a celebrated university, which formerly attracted students from all parts of Europe, including Prince Rupert, Sir Thomas Browne, Evelyn, Boswell, Goldsmith, John Wilkes, Alexander Carlyle, and Alexander Monro; whilst among its professors and other students have been Arminius, Gomarus, Grotius, Descartes, Salmasius, Scaliger, Boerhaave, Hemsterhuis, Linnæus, Ruhnken, Valckenaer, &c. It was founded in 1575 by William of Orange as a reward to the citizens for their heroic twelve months' defence against the Spaniards (1573–74). It has about 50 teachers and 800 students; a library of 160,000 volumes and 5000 oriental and other MSS.; a botanic garden; a magnificent museum of natural history, &c. The town art museum contains pictures by Rembrandt, Jan Steen, Gerard Douw, Lucas of Leyden, the family Mieris—all natives of the town, and others. Here too were born some of the Elzevirs, the celebrated printers, and John of Leyden, the Anabaptist. The quaint and picturesque town-hall dates from 1574–98. In the centre of the town stands an old round tower, said to date from the Roman occupation. Leyden was in the 15th century famous all over Europe for its manufactured cloth, baize, and camlet. The same industries, but to a much less extent, together with the manufacture of cotton, twine, and yarn, the dyeing of cloth and leather, &c., are still carried on. In 1650 the pop. numbered 100,000; but a century later it had fallen to 75,000, and by 1800 to 30,000. In 1876 it was 40,724, in 1910 59,114.

Leyland, a town of Lancashire, 4½ miles S. of Preston; pop. 8100.

Leyton, a suburban town of Essex, 1 mile N. of Stratford; pop. 125,000.

Lhassa ('the Seat of the Gods'), the capital of Tibet, and a sacred city of the Buddhists, is situated in a fertile plain, 45 miles NE. of the junction of the Ki-chu with the Brahmaputra, 11,910 feet above the sea, and surrounded by mountains from 2000 to 4000 feet higher. The densely packed city proper is surrounded with a wall, outside which lie extensive suburbs, the houses standing in gardens, ranged on each side of broad, tree-shaded streets. The monasteries, some fifteen in number, are scattered over the plain and in the suburbs. Just outside the central city on the north-west stands a conical hill, Potala, which is thickly encrusted with palaces and temples, their roofs all gilded; this is the abode of the Grand Lama. Lhassa is not only the centre of the Lamaist form of Buddhism, but is an important trading centre. The resident population, exclusive of many thousands of monks, is about 15,000; sometimes augmented by a floating population of 40,000 pilgrims and traders. Its mysteries were first fully revealed to the British expedition which forced its way hither in 1904, and concluded a treaty here. See TIBET, and the works on Lhassa by Landon, Candler, and Waddell (all in 1905).

Liakhov Islands. See SIBERIA.

Liao-tung, properly the part of southern Manchuria east of the river Liao, but latterly restricted to the peninsula at the end of which Port Arthur (q.v.) and Dairen (q.v.) are situated.—Liao-yang, scene of one of the great battles in 1905, is on an eastern tributary of the Liao.

Libau (*Lee'bow*), a seaport and watering-place of Courland, in Russia, on the Baltic, 146 miles by rail W. by S. of Riga. Its fine harbour admits vessels that draw 17 and 18 feet, and is free from ice except for a fortnight in the year. The exports consist of grain, linseed and linseed oil-cake, petroleum, eggs, spirits, flax, hemp, &c.; the imports of coals, herrings, artificial manures, cotton, dye-wood, and iron. In 1890 the Russian government began to construct a first-class naval harbour; there already existed shipbuilding-yards and a school of navigation. The industries include iron-founding, brewing, &c. Trinity Church contains an organ (1886), one of the largest in the world. Pop. 85,000.

Liberia, a Negro republic on the Pepper Coast (Guinea) of West Africa, extending 300 miles NW. of Cape Palmas, and reaching 200 miles inland. The coast-region consists of mangrove swamps, lying behind a belt of sand-dunes, is traversed by numerous rivers, and interrupted by projecting headlands of rock. About 20 miles or so inland the surface begins to rise into undulating uplands. The climate and vegetation are tropical, the temperature ranging between 75° F. and 88° F. The rainy season lasts about seven and the dry season five months. The chief exports are coffee, sugar, palm-oil and palm-kernels, cocoa, arrowroot, caoutchouc, ivory, kola nuts, &c. The total value of the trade does not probably much exceed £500,000. The pop. amounts to 2,068,000, of whom 18,000 are liberated American slaves and their descendants, the remainder indigenous Negroes, including the Kroomen. Capital, Monrovia (pop. 5000), now greatly decayed. Liberia owes its origin to the American Colonising Society, which in 1821 bought land here and settled a small body of freed African slaves. As newcomers arrived from the United States, fresh lands continued to be bought. In 1847 the republic was constituted; and it has enlarged repeatedly its boundaries, being joined in 1854 by the Negro republic Maryland (founded 1821), to the west of Cape Palmas. The constitution is modelled on that of the United States, with a president, a House of Representatives, and a Senate. No white man is allowed to acquire citizen's rights or to hold property. There is no standing army, but all citizens capable of bearing arms are enrolled in the militia. Complete religious toleration exists, the Methodist forms prevailing. The republic does not enjoy much favour in the eyes of the native Negroes, nor yet of those in the United States, although a few immigrants still arrive. There has been much intertribal warfare in the interior, but at Monrovia in 1904 all the important chiefs signed a declaration of peace.

Liberton ('leper town'), a Midlothian village, adjoining Edinburgh to the SSE.; pop. 2000.

Libourne, a town in the French dep. of Gironde, at the confluence of the Isle with the tidal Dordogne, 22 m. NE. of Bordeaux, was a free town founded by the English, *c.* 1269. Woollens and military clothing are made. Pop. 20,000.

Libreville. See Gabun.

Libya, Libyan Desert, Libyan Hills. See Barca, Tripoli, Sahara, Egypt, p. 247.

Lichfield (*Litch'field*), a municipal (and till 1885 parliamentary) borough of Staffordshire, and the seat of a bishopric, is pleasantly situated in a valley watered by an affluent of the Trent, 15 miles SE. of Stafford and 118 NW. of London. Population, a little over 8600. Its cathedral—a noble pile, measuring 411 feet by 66 (or 149 across the transepts), and surmounted by three towers with spires, the central 258 feet high—dates from the 13th century, when the Mercian see, founded in 656, and constituted an archbishopric 786–800, was, after its translation to Chester in 1075, and subsequently thence to Coventry, re-established here at its original seat. Despoiled, and with its central tower beaten down during the siege of Lichfield by the parliamentarians (1643), the cathedral was subsequently (1661–70) effectively repaired, and 1860–84 both the exterior and interior were ably restored at a cost exceeding £40,000. At the north-east angle of the Close, adjoining the cathedral, is the Bishop's Palace (1687), and hard by once stood the vanished castle, with memories of Richard II. Amongst other edifices may be noted the grammar-school, at which Addison, Dr Johnson, and Garrick were educated; two hospitals founded 1495 and 1504; the theological college (1857); and a concert hall. A statue of Dr Johnson was erected in 1838 in the market-place, opposite the house in which he was born, and which was bought by a Mr Johnson in 1887 'to save it from the hands of spoilers.' Among residents or natives have been Ashmole, Bishop Newton, Dr Darwin, his biographer Miss Seward, and Honora Sneyd, afterwards Mrs Edgeworth. See works by Harwood (1806) and Beresford ('Diocesan Histories' series, 1883).

Lichtenstein, a town of Saxony, on the Rödlitz, 45 miles SSE. of Leipzig. Pop. 7395.

Liddesdale (*Lidsdale*), in Roxburghshire, the valley of Liddel Water, which flows 27 miles SSW. near to or along the Border, till it joins the Esk 12 miles N. of Carlisle. See a work by R. B. Armstrong (1883).

Liechtenstein, a mountainous independent principality of Europe, separated from Switzerland on the west by the Rhine; on the east it is bounded by Vorarlberg. Area, 61 sq. m.; pop. 9854. The chief town, Vaduz or Liechtenstein (pop. 1139), lies 28 miles SSW. of Bregenz on Lake Constance. The Prince of Liechtenstein possesses extensive estates in Austria, Prussia, and Saxony. The little state is a constitutional sovereignty, and belongs to the Austrian customs, postal, judicial, and coinage system.

Liége, or Liège (local pronunciation, *Lee-ayzh'*; Ger. *Lüttich*, Flemish *Luik*), a city of Belgium, on the Meuse, 62 miles by rail S. by E. of Brussels and 47 SW. of Aix-la-Chapelle. It consists of the old town, built on the hills that overlook the Meuse on the left, the new town, down below on the right bank, and several suburbs. It is a fine city, with elegant bridges, handsome squares and gardens, and fine churches and private houses. Its defences consist of a ring of modern forts and the citadel (1650) on the high ground on the Meuse's left bank. The old cathedral church, St Lambert's, was founded in 712, destroyed by the French republicans in 1794, and wholly removed in 1802. Since then St Paul's (968–1528) has been the church of the see. The former bishop's palace (1508–40) has been converted into law-courts. The university was founded in 1817, and has over 1200 students, and a library of 210,000 vols. Situated in the centre of the east Belgian coal-mining district, Liége is one of the first manufacturing cities in Belgium. Its great staple is firearms, of which it turns out annually large numbers. But manufactures of wool, leather, and iron-plates, together with breweries, and distilleries, give large employment. The government have here a cannon-foundry and a small-arms factory. At Seraing (q.v.), 4 miles distant, are the huge Cockerill Works. Pop. (1876) 115,851; (1910) 174,768, mostly Walloons. The Bishop of Maestricht transferred the see to Liége in 720; his successors became princes of the empire with the title of Dukes of Bouillon. The city was seized by Charles the Bold of Burgundy in 1467 and 1468, in 1691 by the French, in 1702 by Marlborough, and once more by the French in 1792. The Congress of Vienna assigned the city and its territories to the Netherlands; but in 1831 they were incorporated in the new kingdom of Belgium.—The province of Liége has an area of 1117 sq. m. and a pop. of 900,000.

Liegnitz, a town of Prussian Silesia, on the Katzbach, 38 miles W. by N. of Breslau. In the neighbourhood (Wahlstadt) the Mongols in 1241 defeated the Poles, and filled nine sacks with the ears of their slaughtered foes. Liegnitz came to Prussia in 1742. Here in 1760 Frederick the Great routed the Austrians, and in 1813 Blücher defeated the French (Katzbach). It is now a place of great industrial activity, with iron-foundries, machine-shops, pianoforte-factories, and manufactures of woollens, cloth, hats, gloves, &c. Pop. 66,000.

Lierre, a town of Belgium, 11 miles by rail SE. of Antwerp, manufactures silk, lace, shoes, beet-root sugar, salt, and beer. Pop. 28,156.

Liffey, a river of Ireland, winding 50 miles westward and east-north-eastward through Wicklow, Kildare, and Dublin counties, to Dublin Bay.

Lifford, the county town of Donegal, on the Foyle, opposite Strabane, and 15 miles SSW. of Londonderry. Pop. 400.

Ligny (*Leen'yi*), a Belgian village, 13 miles NE. of Charleroi. Here Napoleon defeated the Prussians under Blücher, 16th June 1815, the same day as Quatre-Bras.

Ligonyi, or ELGON, a mountain, 14,000 feet high, W. of Lake Baringo in East Equatorial Africa, with extensive artificial caves.

Ligurian Republic, the name given by Bonaparte to the republic of Genoa (q.v.) in 1797, from Liguria, the ancient name of the region.

Lille (Flemish *Ryssel*), a manufacturing town and first-class fortress of France, chief town of the dep. of Nord, is situated on a sub-tributary of the Scheldt, 66 miles by rail SE. of Calais. Lille derives its name from the 11th-century castle of the Counts of Flanders around which it arose, and which from its position in the midst of marshes was called L'Isle. Burgundian from 1365, Lille was conquered by Louis XIV. in 1667, and finally handed over to France in 1713. Its defences consist of Vauban's pentagonal citadel, and a series of seven forts encircling the town. The old fortifications were mostly levelled from 1858 onwards. The town possesses few notable buildings except the church of Notre Dame (1855), and the town-hall with the museum, the famous Wicar collection of drawings by the Old Masters, and a library of 41,000 volumes. It has a Catholic 'free university,' independent faculties of medicine, science, &c., technical schools, a music school, and an academy of art. Lille is a great centre of textile industries: the spinning of linen and cotton, the manufacture of thread, damask, cloth, tulle, tickings, &c.—these textile industries employ 20,000 workpeople—as also of tobacco, beer, paper, sugar, machinery, &c. Pop. (1872) 152,775; (1911) 217,807.

Lillebonne, a Norman town on the Bolbec, 28 miles WNW. of Rouen by rail. The *Julia Bona* of the Romans, it has remains of a Roman theatre, a 15th-century church, and a ruined castle of William the Conqueror. Pop. 5705.

Lima (*Leema*), the capital of Peru, lies in a broad valley 6 miles E. of Callao, its port, with which it is connected by two railways (9 miles). The archiepiscopal cathedral (rebuilt 1746) is, after that of Mexico, the most noteworthy in Spanish America. The university (1551) is now housed in the old Jesuits' college. The national library was looted during the Chilian occupation (1881–83), and numerous statues and works of art found their way to Santiago. This disaster, added to revolutions and earthquakes (the worst that of 1746), has wrought sad havoc in Lima, which, with its wide and regular streets, remains still picturesque, but somewhat shabby and very dirty. The trade is almost entirely in the hands of foreigners. The manufactures include iron-casting, copper-smelting, and the making of furniture, silver-ware, gold-lace, and stamped leather. There is a railway to Oroya (128 miles). Lima is the old Indian name revived of what was founded as *Ciudad de los Reyes* in 1535 by Pizarro (murdered here in 1541, buried in the cathedral crypt). Pop. 145,000.

Lima, capital of Allen county, Ohio, 71 miles N. of Dayton, on the Ottawa River. It has steam-mills and manufactures of engines, furniture, &c. Pop. 30,500.

Limasol', or LIMASSOL (Gr. *Lemisou*), one of the chief ports of Cyprus, though it has no harbour. There is a large trade in wine and carobs. Limasol is the only place in Cyprus where British troops are permanently quartered. Pop. 11,000.

Limavad'y, a market-town, on the Roe, 16 miles NE. of Londonderry; pop. 2700.

Limbach, a Saxon town, 10 miles WNW. of Chemnitz, manufactures hosiery; pop. 17,000.

Limburg, a territory on the Meuse, lying between the provinces of Liége and Brabant. In 1839 it was finally re-divided, the lands to the west of the Meuse remaining with Belgium, whilst a long narrow strip on the east side was constituted the Dutch province of Limburg. The Belgian province has an area of 931 sq. m. and a population of 280,000. Capital, Hasselt. The area of the Dutch province is 850 sq. m.; pop. 341,000. Capital, Maestricht.—The well-known *Limburg cheese* is made at the little town of Limburg (pop. 5000), the former capital of the duchy, which is now in the province of Liége, 19 miles E. of the city of Liége.—LIMBURG-AN-DER-LAHN, a town of Hesse-Nassau, 32 miles E. of Coblenz, has a fine Catholic cathedral (Rhenish style, 1243); pop. 10,000.

Limehouse, a Thames-side parish of E. London.

Limekilns, a Fife coast-village, on the Firth of Forth, 3 miles SSW. of Dunfermline.

Lim'erick, a county of Munster, separated by the Shannon on the N. from Clare, and bounded elsewhere by Tipperary, Cork, and Kerry. Its greatest length is 35 miles, its greatest breadth 54 miles, and its area 680,842 acres, or 1063 sq. m. Pop. (1841) 330,029; (1861) 217,223; (1911) 143,069, mainly Roman Catholics. The surface is an undulating plain, except in the extreme N. and S. The soil in general is fertile, especially the Golden Vale, and a portion beside the Shannon below Limerick. Dairy-farming flourishes; woollens, flour, and paper are manufactured. The county returns two members. Limerick is the only town of any size. Limerick is more than usually rich in antiquities, both ecclesiastical and civil, of the Celtic as well as the Anglo-Norman period. There are monastic ruins at Adare, Askeaton, &c.

LIMERICK, the county town, stands at the head of the estuary of the Shannon, 120 miles by rail WSW. of Dublin. The town consists of English Town, the original English settlement made in the reign of King John, on King's Island; Irish Town, immediately S., on the left bank; and Newtown-Pery, S. of Irish Town, the handsomest part of the city, dating from 1769. There are few objects of interest except the Protestant cathedral of St Mary (1180; rebuilt 1490); the Gothic R.C. cathedral (1860); and the fine bridges over the Shannon. Limerick manufactures a little lace, grinds flour, and cures bacon. Fourth among Irish seaports, it has a graving and a floating dock, and extensive quays; and imports grain, petroleum, wine, spirits, and timber. It returns one member (till 1885 two). Pop. (1851) 53,448; (1911) 38,518. See the county history by Fitzgerald and M'Gregor (2 vols. Dublin, 1826–27).

Limfiord. See Denmark.

Limoges (*Lee-mozh'*), capital of the French dep. of Haute-Vienne, and of the former province of Limousin, is picturesquely situated on the Vienne, 248 miles S. by W. of Paris and 218 N. of Toulouse. Its Gothic cathedral was begun in the 13th century and completed in 1851. The manufacture of porcelain employs over 5000 people; and flannels, cotton, paper, &c. are also made. The enamel-work for which Limoges was formerly celebrated is now no longer carried on. There is a fine ceramic museum (1867). Pop. (1826) 48,862; (1911) 92,181. Limoges was an important town under the Romans, and is so still in spite of plagues, fires, and sieges (the worst that by the Black Prince in 1370).

Limon, (1) the chief Atlantic port of Costa Rica, on the Caribbean Sea; pop. 6000.—(2) On the Bay of Limon in Panamá, close to Colon (240 miles ESE. of the other Limon), the Panamá Railway and Canal have their Atlantic termini.

Limpopo, Oori, or Crocodile River, rises in the heart of the Transvaal, and after a course of 800 miles, during which it describes a great curve northwards, falls into Delagoa Bay.

Linares (*Lee-nâ'res*), a town of southern Spain, 90 miles by rail ENE. of Cordova, is celebrated for its mines of lead and copper, and has lead and iron foundries, gunpowder and dynamite factories; pop. 36,400.

Linclu'den, a ruined abbey, 1½ mile NNW. of Dumfries, at the Cluden's influx to the Nith. It was founded about 1164 for Benedictine nuns. See M'Dowall's *Chronicles of Lincluden* (1886).

Lincoln (*Lin'con*), the capital of Lincolnshire, and a parliamentary, county, and municipal borough, is situated on the Witham, 42 miles S. of Hull, 33 NE. of Nottingham, and 130 N. by W. of London. Built on the slope of a hill, which rises 210 feet above the river, and is crowned by the cathedral, the city is imposing in effect, and can be seen from afar in the flat fen-country. It is very ancient, is irregularly laid out, and contains many interesting specimens of early architecture—notably the castle, commenced in 1086 by William I.; the Newport Gate, or Roman arch, on the north side of the city; the Exchequer and Stonebow gateways, the latter supporting a guildhall of mediæval architecture; the Jew's House (Norman), associated with the legend of Hugh of Lincoln; St Mary's Guild (Norman); and the middle grammar-school, founded in 1567 in the Grey Friars. But the chief glory of Lincoln is its cathedral, admittedly one of the finest in England. Erected between 1075 and 1501, it measures 524 feet by 82 (or 250 across the transepts), and in style is mainly Early English. Its matchless central tower (1235–1311; 265 feet high) was previous to 1547 surmounted by a spire, as till 1808 were the two western towers (completed 1450). Other noticeable features are the west front (partly Norman), with its three doorways (1123); the Galilee or south porch (*c.* 1240); the Decorated choir (1254); the decagonal chapter-house; Norman font (1075–93); and Great Tom of Lincoln (5½ tons), hung in the central tower, which also contains a mellow-chiming clock (1880). There are also a county hall (1823–26), theological college, school of science, and bishop's palace (1887) embodied with a former palace of 1149. Several iron-foundries and important manufactories of agricultural machinery are in operation here, and an active trade is done in flour. The spring horse-fair is one of the largest in the world, and the race-meetings date back to James I.'s reign. One member is returned to parliament for the city. In the history of Lincoln the most noteworthy incidents have been frequent invasions by the Danes (786–875); great fires (1110 and 1124); a battle (1141) between the adherents of Stephen and the Empress Matilda; the second coronation of Henry II. (1155–58); an earthquake (1185); the battle of Lincoln, or Lewis Fair, fought 4th June 1218; five parliaments (1301–86); and lastly, the siege of the town, and desecration of the cathedral, by the parliamentarians (1644). Pop. (1801) 7398; (1881) 37,313; (1911) 57,285.

Lincoln, (1) capital of Nebraska, on Salt Creek, 66 miles by rail SW. of Omaha. Laid out in 1867, it is a handsome and thriving city, with state capitol, university, prison, insane asylum, and the United States court-house. There are flour and planing mills, foundries, &c.; limestone is largely quarried, and there are extensive salt-works in connection with brine-springs near by. Pop. (1880) 13,003; (1910) 43,973.—(2) Capital of Logan county, Illinois, 28 miles NNE. of Springfield, manufactures castings and farm-implements. Here are Lincoln University (Cumberland Presbyterian) and a state asylum for feeble-minded children. Pop. 11,000.—(3) A town of Rhode Island, 6 miles by rail N. of Providence, containing several cotton-manufacturing villages. Pop. 10,000.

Lincoln, Mount, a peak (14,297 feet) of the Rocky Mountains, in Colorado, 8 miles NE. of Leadville. A railway was made to silver-mining works at the summit, and here is a meteorological station conducted by Harvard College.

Lincolnshire, a maritime county of England, after Yorkshire the largest in the country, is bounded N. by the Humber, E. by the North Sea, the Wash, and Norfolk, and elsewhere by Cambridge, Northampton, Rutland, Leicester, Nottingham, and York shires. Measuring 75 miles from N. to S., and 48 from E. to W., it has a seaboard of about 90, and contains 2672 sq. m., or 1,767,879 acres. Pop. (1801) 208,557; (1841) 362,602; (1911) 563,960. The surface is comparatively flat: along the coast stretch low-lying marshes, from which in places the sea is only kept out by means of embankments. West of these marshes lie the Wolds, a range of chalk downs, which, commencing near Barton-on-Humber in the north, extend thence 40 miles south-eastward to the neighbourhood of Spilsby and Horncastle. The western side of the county, from the Humber in the north through Lincoln to Grantham in the south, consists principally of light uplands, whilst in the south-east are fens forming part of the Bedford Level (q.v.). The chief rivers are the Trent, Witham, and Welland; and a noticeable feature of the county is the numerous canals which intersect it—Car-dyke and Foss-dyke, the two largest, being probably the work of the Romans. Near Ancaster limestone is extensively quarried, and in the western districts ironstone abounds. The chief crops are corn and turnips, and in places flax is cultivated; the county is famous for its rich 'warp-lands' along the banks of the Trent, and its immense flocks of sheep. Horse-breeding, too, is extensively prosecuted, with great horse-fairs at Horncastle and Lincoln; other industries are the manufacture of agricultural implements and machinery, and the shipping trade and fisheries of Grimsby.

Lincolnshire is divided into three districts or 'Parts'—viz. the Parts of Holland in the south-east, comprising the greater part of the Fens, the Parts of Kesteven in the south-west, and the Parts of Lindsey, which is by far the largest, occupying the remainder of the county. These Parts, each with its own county council, are subdivided into thirty-one wapentakes or hundreds, the city and county borough of Lincoln, the county borough of Great Grimsby, and the municipal boroughs of Boston, Grantham, Louth, and Stamford, and contain in all 726 parishes, almost entirely situate in the diocese of Lincoln and midland circuit. For parliamentary purposes the county is divided into seven divisions, and the boroughs of Boston, Grantham, Grimsby, and Lincoln, each returning one member. Other towns are Cleethorpes (practically a suburb of Grimsby), Gainsborough, Sleaford, Spalding, and Sutton.

The insurrection known as the 'Pilgrimage of Grace' (1536) broke out in Lincolnshire; and in 1643, during the Civil War, Ancaster, Gainsborough, Grantham, and Winceby were the scene of contests between the rival forces. To the antiquary Lincolnshire is of special interest on account of the beauty of its many churches—Boston, Crowle, Grantham, Heckington, Louth, Long Sutton, and Tattershall amongst them; whilst of other places of interest it will suffice to mention here the ruined abbey of Crowland, and Bolingbroke Castle, the home of John of Gaunt and of his son Henry IV. Other eminent persons associated with the county include Bishop Grosseteste; John Foxe, the martyrologist; William Cecil, Lord Burghley; Captain John Smith; Archbishop Whitgift; Heywood, the dramatist; Sir Isaac Newton; Thomas Sutton, founder of the Charterhouse; Dr Busby, head-master of Westminster; John Wesley; Scott, the commentator; Sir John Franklin; Dr Dodd, the forger; Dr Lingard; Lord Tennyson; Dr Latham; Worth 'of Paris;' Jean Ingelow; and Conington. See works by Allen (1834), Anderson (1880), Venables and Perry (1897), and the 'Victoria History' (1905 *et seq.*).

Lindisfarne. See HOLY ISLAND.

Lindores. See NEWBURGH.

Lindsay, capital of Victoria county, Ontario, on the river Scugog, 60 miles NE. of Toronto, with trade in grain and lumber, and manufactories of agricultural machinery, &c. Pop. 7000.

Lingah, a Persian port near the entrance of the Persian Gulf. Pop. 9000.

Linköping, one of the oldest towns in Sweden, capital of East Gothland, 142 miles SW. of Stockholm, with a Romanesque 12th-century cathedral. Pop. 23,000.

Links of Forth. See FORTH.

Linlithgow, an ancient royal burgh, the county town of Linlithgowshire, lies 16 miles W. of Edinburgh, near the southern shore of Linlithgow Loch, which, 150 feet above sea-level, covers 102 acres, and deepens westward from 10 to 50 feet. On a promontory, 66 feet high, stands the stately ruin of Linlithgow Palace, mostly rebuilt between 1425 and 1628, fired by Hawley's dragoons in 1746, and repaired in 1892. It was the birthplace of James V. and Mary Stuart. The neighbouring parish church of St Michael's (restored 1894–95) is a very good Decorated structure of mainly the 15th and 16th centuries; within its south transept James IV. received the Flodden warning. Another event in Linlithgow's history was the murder of the Regent Moray. The Cross Well (rebuilt 1807) and the town-hall (1889) are also noteworthy. With Falkirk, &c., Linlithgow returns a member. Pop. 4000. See books on the palace and the church by Ferguson (1910–12).

Linlithgowshire, or WEST LOTHIAN, a Scottish county, washed on the north for 17 miles by the Firth of Forth, and elsewhere bounded by Edinburgh, Lanark, and Stirling shires. Its length south-westward is 22 miles, its average breadth 7 miles, and its area 127 sq. m. The only large streams are the Almond on the south-eastern, and the Avon on the western boundary; the principal eminences are Cairnnaple (1016 feet), Cocklerue (912), Dechmont Law (686), and Glower-o'er-'em (559), the last with a monument to General Adrian Hope, who fell in the Indian Mutiny. Coal has been largely mined since the 12th century, as also are ironstone, fireclay, and shale for the manufacture of paraffin. Excellent sandstone is quarried at Binny. Of the whole area 73 per cent. is in cultivation; woods cover 4982 acres. Towns, noticed separately, are Linlithgow, South Queensferry, Bathgate, Bo'ness, and Broxburn; among the mansions are Hopetoun, Dalmeny, Dundas, and Kinneil; and the antiquities include prehistoric and Roman remains, the Romanesque church of Dalmeny, the castles of Barnbougle, Blackness, Niddry, &c., and the preceptory at Torphichen of the Knights of St John. The county returns one member. Pop. (1801) 17,844; (1841) 26,872; (1911) 80,155. See works by Sibbald (1710) and Small (1883).

Linmouth. See LYNMOUTH.

Linnhe, LOCH (*Lin'nie*), a sea-loch of Argyll and Inverness shires, extending 31 miles north-eastward to Fort William, and 8½ miles to 1½ furlongs (at Corran Narrows) wide. The upper 9¾ miles are sometimes called Lower Loch Eil.

Linton, EAST, a Haddingtonshire police-burgh, on the Tyne, 23½ miles E. by N. of Edinburgh. Pop. 900.—WEST LINTON, a Peeblesshire village, on Lyne Water, 16 miles SSW. of Edinburgh. Pop. 430.

Linz (*Lintz*), capital of Upper Austria, on the right bank of the Danube (here crossed by an iron bridge 780 feet long), 117 miles by rail W. of Vienna. It has a splendid Gothic cathedral (1862–90), the old cathedral (1670), the bishop's palace, a museum, a library of 33,000 vols., &c. Its industries include the manufacture of woollen goods, tobacco, linen, leather, machinery, and shipbuilding. Pop. 68,000.

Lions, GULF OF (*Golfe du Lion*), the large Mediterranean gulf of S. France, from the Spanish frontier E. to the Hyères Islands.

Lip'ari Islands, known also as the ÆOLIAN ISLANDS, a volcanic group in the Mediterranean, off the N. coast of Sicily, NW. of Messina. It comprises six larger and numerous smaller islands, with an aggregate area of 116 sq. m. Many of the smaller islands form part of the rim of a gigantic crater. Stromboli (3022 feet) is almost constantly active, and Vulcano (1017 feet) intermittently; the rest are extinct. The ancient classical poets localised in these islands the abode of the fiery god Vulcan—hence their ancient name, *Vulcaniæ Insulæ*. Their collective pop. is 19,312, of whom 7542 belong to the island of Lipari (area, 32 sq. m.), the largest of the group. The warm springs are much resorted to, and the climate is delightful. Lipari, the chief town, is a bishop's see and a seaport; pop. 4968.

Lipetzk, a town in the Russian government of Tamboff, on the right bank of the Voronezh, a tributary of the Don, 300 miles by rail SSE. of Moscow. It has chalybeate springs. Pop. 25,860.

Lippe (*Lip'pey*), or LIPPE-DETMOLD, a principality of northern Germany, lying between Westphalia on the W. and Hanover on the E. The Weser touches it on the N. and the Teutoburger Wald crosses it in the S. Area, 475 sq. m.; pop. (1875) 112,442; (1910) 150,749, mainly Protestants. Capital, Detmold (q.v.); other towns, Lemgo and Horn. The surface is hilly; woods cover 28 per cent. Every spring some 12,000 of the inhabitants spread themselves over central Europe, even to south Russia, as brick-burners and tile-makers, returning home in autumn. The state is named from the Lippe river, a tributary of the Rhine, outside the present principality.

Lippstadt, a town of Prussia, on the Lippe, 30 miles E. by N. from Dortmund. It manufactures spirits, beer, cigars, brushes, ropes, iron, &c. Founded in 1168, it was captured by the Spaniards in 1620, and by the French in 1757. Pop. 17,000.

Liria, a town of Spain, 14 miles NW. of Valencia. Pop. 9029.

Lisbon (Port. *Lisboa*), capital of Portugal, stands on the northern shore of a bottle-shaped expansion of the Tagus, 9 miles from its mouth; it is 412 miles by rail WSW. of Madrid. The city extends for 4 or 5 miles along the shore, and climbs up the slopes of a low range of hills, occupying a site of imposing beauty. The oldest part of Lisbon is that which escaped the earthquake of 1755; it lies on the east, round the citadel, and consists of narrow, intricate streets, not over clean. It is still known by its Moorish name of Alfama. The western portions were built after the earthquake, with wide and regular streets, fine squares, and good houses. The summits are mostly crowned with what were formerly large monasteries. The gloomy cathedral of the 'patriarch,' built in 1147, restored after 1755, has a Gothic façade and choir. The large church of St Vincent contains the tombs of the former royal (Braganza) family. The church of Estrella is a reduced copy of St Peter's at Rome. In San Roque is a chapel thickly encrusted with mosaics and costly marbles. But the finest structure in the city is the Gothic monastery and church of Belem, a monument to the great seamen of Portugal; it was begun in 1500 on the spot from which Vasco da Gama embarked (1497) on his momentous voyage. Inside the church are new tombs (1880) to Camoens and Vasco da Gama, and the grave of Catharine, wife of Charles II. of England. The monastery is now used as an orphanage and foundling hospital. Neither of the royal palaces possesses features of great interest. A fine square facing the bay is surrounded with government offices, the handsome custom-house, and the marine arsenal. There are an academy of sciences (1779), with a library of 120,000 vols., a polytechnic school, a medical school, a conservatory of music, a public library of 400,000 vols. and 16,000 MSS., museums, two observatories, &c. A magnificent aqueduct (1738) brings water to the city from springs 9 miles to the north-west. In the cemetery of the English church Fielding was buried in 1754. The pop. of the city was 246,343 in 1878; but the municipal boundaries were enlarged in 1885 so as to include Belem and other suburbs, and the pop. is now about 435,000. A series of forts protect the seaward approaches. The harbour is one of the finest in the world, well sheltered, deep close to the quays, and capacious enough to hold all the navies of Europe at once. Nevertheless the government spent (1886-1900) £2,400,000 in improving the port. The imports include corn, cotton goods, sugar, fish, coal, timber, tobacco, coffee, and petroleum; the exports, wine, cork, fish, cattle, oil, salt, and fruits. The most important industries are in gold and silver wares and in jewellery; next come cotton-spinning and weaving, the manufacture of silk, hemp, chemicals, hats, boots, tobacco, soap, cutlery, and stoneware, and iron-founding.

Lisbon is a contraction of Olisipo, its name as capital of the Lusitanians. From the Romans it passed to the Goths, from the Goths to the Moors (716), who kept their hold of it down to 1147, when Alfonso I. of Portugal seized it with the help of English, German, and Flemish crusaders. It was made the capital of the kingdom in 1422. In 1580 it was seized by Alva for Philip II. of Spain; and it was from this port that the 'invincible' Armada set sail. When the Duke of Braganza roused his countrymen to shake off the Spanish yoke (1640), he recaptured Lisbon, and once more it became the capital. On 1st November 1755, in less than ten minutes, the greater part of the city was made a heap of ruins, 30,000 to 40,000 persons were killed, and damage done to the extent of nearly 20 millions sterling. The French held the city for ten months during 1807–8. St Antony of Padua, Camoens, and Pope John XXI. were natives. See Inchbold's *Lisbon and Cintra* (1910).

Lisburn, a town (since 1898 wholly) in Antrim, on the Lagan, 93 miles by rail N. by E. of Dublin, and 8 SW. of Belfast. The Conway family built a castle here in Charles I.'s time, and introduced the existing industries—manufactures of linens, damasks, muslins, &c., with flax-spinning and bleaching. Its parish church is the cathedral of Down, Connor, and Dromore, and contains a monument to Bishop Jeremy Taylor. Pop. (1851) 6569; (1901) 11,459; (1911) 12,388.

Liscard, a township in Wallasey parish, Cheshire, containing New Brighton (q.v.).

Lisdoonvarna, a spa in County Clare, 9 miles N. of Ennistimon station, with one sulphurous and several chalybeate springs.

Lisieux (*Lee-zi-yuh'*; anc. *Noviomagus Lexoviorum*), a town in the French dep. of Calvados, 30 miles by rail E. by S. of Caen. In the church of St Pierre (1045–1233; a cathedral down to 1801), Henry II. of England married (1152) Eleanor of Guienne. Lisieux is the centre of an extensive manufacture of coarse linens (*cretonnes*, from the original maker), woollens, flannels, cottons, &c. Population, about 15,000. Four miles distant is Val Richer, where stood the abbey of which Thomas Becket was first abbot; its ruins were restored as a summer residence for Guizot.

Liskeard (*Lis'kard*), a municipal borough in Cornwall, stands on steep hills overlooking the Looe, 18 miles WNW. of Plymouth. It has manufactures of leather and iron, and trade with the neighbouring mines. St Martin's Church, Perpendicular in style, is one of the largest in Cornwall, with a 14th-century tower. The town-hall (1859) is a good Italian building. A stannary or coinage town, Liskeard was made a free borough in 1250 by Richard, king of the Romans, who built a castle here. Till 1832 it returned two members (Coke and Gibbon the most illustrious), and then till 1885 one member. Population, about 4500. Two miles south is the famous spring of St Keyne (q.v.). See Allen's *History of Liskeard* (1856).

Lismore, on the Blackwater, in the county of Waterford (once partly in Cork), and 43 miles SW. of Waterford city. The cathedral, the parish church since the see was united to Cashel, was rebuilt in 1663, on the site of a monastery founded before 540. The castle, originally founded in 1185, was the residence of the bishops till the 16th century. In 1587 it was given to Sir W. Raleigh, who sold it to the 'great' Earl of Cork, and in it his son, Robert Boyle, was born. In 1753 it passed to the Duke of Devonshire. Lismore returned two members from Charles I.'s reign to the Union. Pop. 1532.

Lismore' (Gael., 'great garden'), an island of Lorn, Argyllshire, in Loch Linnhe, 1 furlong from the mainland, and 8 miles N. of Oban. It rises to 417 feet, and is 10½ miles long, 1½ mile broad, and 6014 acres in area. Besides a lighthouse (1833), it contains several interesting remains—the choir of the cathedral (1236) of the pre-Reformation diocese of Lismore or Argyll (since 1749 used as the parish church); Achanduin Castle, the residence of the bishops; and Castle-Rachal, a Scandinavian fort. Pop. (1831) 1790; now 400, mostly Gaelic-speaking.

Lisnaskea, a town of Fermanagh, 11 miles SE. of Enniskillen. Pop. 700.

Lissa (Pol. *Leszno*), a Prussian town, 40 miles S. by W. of Posen, was during the 16th and 17th centuries the headquarters of the Bohemian Brethren in Poland; here were their most celebrated school, a seminary, a printing-office, and their archives. Pop. 20,000.

Lissa, a mountainous island of Dalmatia, in the Adriatic, 32 miles SW. of Spalato. Area, 40 sq. m.; pop. 10,000—5000 at the capital, Lissa, and the rest at Comisa, both seaports. Fishing is the chief occupation. The island was held by Great Britain 1810–15. Off it the Italian fleet was defeated by the Austrians in 1866.

Listowel, a town of County Kerry, 20 miles NE. of Tralee by rail. Pop. 3400.

Litany. See LEBANON.

Litchfield, a town of Illinois, 50 miles NE. of St Louis. Pop. 6000.

Lithuania, a former grand-duchy, corresponding to the portion of Russia between the Baltic and the upper Dnieper (including Livonia, Courland, Kovno, Vilna, Grodno, Minsk, Mohilev, Smolensk, and Vitebsk). From the 14th century on it became closely associated with Poland (q.v.), with which it was finally united in 1569; in the 15th century it extended as far south as Odessa and the Sea of Azov, and as far east as the Moskva. The Lithuanians, a race to whom belong the Letts of Livonia, the Cours of Courland, and the Borussians or ancient inhabitants of East Prussia, constitute a main division of the Indo-European stock (akin to the Slavs), numbering some 3½ millions in all.

Littleborough, a town of Lancashire, 3¼ miles NE. of Rochdale, of which it is virtually a suburb. Pop. 11,700.

Little Falls, a post-village of New York, 73 miles WNW. of Albany. The Mohawk River here passes through a narrow rocky gorge, with falls of 44 feet, giving water-power to several mills and factories. Pop. 12,500.

Littlehampton, a seaport and watering-place of Sussex, 18 miles W. of Brighton and 63 SW. of London. It is the port for Arundel. Pop. 8500.

Littlemore, a hamlet 2½ miles SSE. of Oxford, with associations (1828–43) with Newman.

Little Rock, the capital of Arkansas, on the south bank of the Arkansas River, 280 miles from its mouth, and 345 by rail SSW. of St Louis. It contains the state capitol, prison, and blind and deaf-mute asylums, a U.S. arsenal, a Roman Catholic cathedral, and a college founded by the Freemasons in 1857. Pop. (1880) 13,138; (1910) 45,941.

Livadia (anc. *Lebadeia*), a town of Greece, 60 miles NW. of Athens. Pop. 6000.

Livadia, an estate, with a couple of palaces and magnificent gardens and vineyards, belonging to the imperial family of Russia, on the south coast of the Crimea, 30 miles SE. of Sebastopol.

Liverpool (prob. from the Cymric *Llyvrpwl*, 'the expanse at the pool'), if we include Birkenhead, on the south or opposite side of the Mersey, disputes with Glasgow the rank of second largest town in the United Kingdom; and as a port surpasses London for trade with America. It is situated ¾ hour distance by railway from Manchester (31½ miles), 4¼ hours from London (201 miles), 6 hours from Edinburgh (220 miles), and 7 hours by rail and steamer from Dublin. As a port Liverpool figures for about one-fifth of the British tonnage, one-tenth of the foreign, and one-sixth of the total, and just falls behind London in respect of the foreign tonnage. Through it passes one-fourth of the imports, more than two-fifths of the exports, and nearly one-third of the entire foreign trade of the United Kingdom. Of bread-stuffs annually imported, Liverpool admits about one-fourth; of the cotton, more than nine-tenths; and has usually exported more than half of the total cotton products. In 1910 imports and exports had a value of £340,670,089; and ships of 7,588,653 tons entered the port. This gigantic trade has given rise to the magnificent system of docks (including the Gladstone Dock, 1913) extending along the margin of the river for 6½ miles, containing 26 miles of quay-space and 390 acres of water-space, besides 9 miles of quay-space and 165 acres of water-space at Birkenhead, making a total of 35 miles and 555 acres respectively. There are also 17 acres of water-space in the docks worked by the various canal companies, besides the graving-docks on both sides of the river. Several of the docks are enclosed with large warehouses: the erection of those round the Albert Dock cost £358,000. The steamer traffic, conducted by regular liners with every port of importance in the world, draws large numbers of emigrant and other passengers to the town.

Seven railways have direct connection with the city. There are five tunnels under the town. The Mersey railway tunnel, 1230 yards long, connecting Liverpool with Birkenhead, was made in 1881–86, on a capital of £2,224,000. Proposals have been made to erect a bridge from Liverpool to Birkenhead. The Liverpool Overhead Railway, on a framework of wrought iron, runs (6 miles long, opened in 1893) along almost the whole length of the docks. In 1881–92 vast new waterworks were constructed at Lake Vyrnwy (q.v.), about 25 miles from Oswestry, and 45 miles in a straight line from Liverpool. This scheme was extended and completed in 1910. Liverpool manufactures confectionery and oil-cake, and has iron and brass foundries, chain-cable and anchor smithies, engine-works, tar and turpentine distilleries, rice and flour mills, tobacco, cigar, and soap manufactories, breweries, sugar-refineries, roperies, glass-works, chronometer and watch manufactories.

The architecture of the town was greatly improved in the later half of the 19th century, and it now possesses many fine thoroughfares, thronged with numerous splendid edifices. The Corinthian Town-hall was built in 1754, but has since been enlarged. St George's Hall (1838–54), in the Græco-Roman style, is nearly 500 feet long, and was built at a cost of £330,000. Municipal offices, custom-house, sailors' home, police-courts, workhouses, baths, dock board offices, waterworks, and gas-offices are also noteworthy. The Free Library and Museum (1860) cost £40,000. A new cathedral, designed to be the largest in the country, was partly built in 1904–13. Other institutions are the Walker Art Gallery, Picton Reading-room, Botanic Gardens, Observatory, Liverpool Institute, Queen's College, Medical Institute, Royal Institution, Academy of Fine Arts, the Exchange, Lyceum, Athenæum, Royal Infirmary, and University. University College, on the model of Owens College, was inaugurated in 1882; its handsome group of buildings was opened in December 1892. The college, at first affiliated to the Victoria University, Manchester, in 1884, is now by charter (1903) a distinct university, with about 50 professors and lecturers; it is housed in a fine group of buildings. Of some 300 churches and chapels, over 100 belong to the Church of England. The see of Liverpool was created in 1880. The Exchange, rebuilt and enlarged in French Renaissance style in 1864–67, cost about £600,000. There is a corn exchange and several markets; the banks and clubs have handsome premises. Of monuments the chief are those of Queen Victoria, Prince Albert, William IV., Nelson, Wellington, Huskisson, and Beaconsfield, besides several in the Town-hall, St George's Hall, Free Library, and parks. The parks, ten or more in number, have an area of 900 acres. There are six daily (four morning and two evening) and four weekly newspapers, besides the *Daily Telegraph* and *Bill of Entry*, exclusively devoted to shipping matters, three weekly literary periodicals, and one scientific monthly magazine. Since 1885 Liverpool returns nine members.

Notable Liverpudlians have been Horrocks (the astronomer), Mrs Hemans, William Roscoe, A. H. Clough, Viscount Cardwell, Bishop Lightfoot, General Earle, and Mr Gladstone; the modern writers Hall Caine, William Watson, J. A. Noble, and Richard Le Gallienne, have been called the 'Liverpool school.' Pop. (1561) 690; (1697) 5000; (1760) 25,700; (1801) 85,300; (1861) 443,938; (1881) 552,208 municipal and 601,050 parliamentary; (1911) 746,421 in municipal borough and county of the city, and 623,698 in parliamentary—a temporary reduction in 1891 being caused by the pulling down of many houses to make room for new streets, increased trade requirements, &c.; and the removal of the population to the suburbs. In 1895, 1902, and 1905 the municipal boundaries were extended so as to take in a portion of the suburbs, bringing the pop. up by 20,000 (the parliamentary boundaries being unaltered). With Bootle, Birkenhead, and the suburbs beyond the new boundary, the population of the port may be stated to be over 1,000,000, of whom about 200,000 are Irish. The trade grew rapidly at the end of the 18th century, largely owing to the development of the cotton industry; and Liverpool, which gradually put Bristol in the shade, was the great headquarters of the slave-trade; as late as 1807 her shipowners had 185 vessels engaged in the business, capable of carrying about 44,000 slaves. It was expected that the port would not lose what Manchester gained by the opening of the Manchester Ship Canal (1894), but that the more economical management of the dock estate and reduced railway charges will bring more business to Liverpool than the canal will take away.

See Baines, *History of the Commerce and Town of Liverpool* (1852); Picton, *Memorials of Liverpool* (2 vols. 1873; 2d ed. 1876); and Ramsay Muir, *A History of Liverpool* (1907).

Liversedge, a township of Yorkshire, 6½ miles SE. of Bradford. It has manufactures of iron, cottons, woollens, &c. Pop. 15,000.

Livingston, a port of Guatemala, on the Dulce.

Livingstone, a township near the Victoria Falls of the Zambesi (q.v.).

Livingstonia, a mission station near the lower end of Lake Nyasa (q.v.).

Livonia (Ger. *Livland*), one of the three Baltic provinces of Russia, forms the eastern side of the Gulf of Riga, and is separated from Courland by the Dwina. The country is mostly flat, and nearly one-fourth of it is covered with forests. Lakes and streams and marshes are common. Area, 18,153 sq. m.; pop. (1870) 1,000,876; (1910) 1,455,400, of whom 43 per cent. are Letts, 41½ per cent. Esthonians. The Livonians proper, a Finnic race akin to the Esthonians, have dwindled down to about 2400. Capital, Riga; other towns, Dorpat, Pernau, Wenden.

Livorno. See LEGHORN.

Lixouri, a town of Cephalonia, on the Gulf of Argostoli, 3 miles W. of the capital, Argostoli, by water, but nearly 20 by road. Pop. 9000.

Lizard Point. See CORNWALL.

Llanberis (*Hhlan-ber'ris; Ll-* nearly like *Thl-*), the 'Chamonix of Wales,' 9 miles ESE. of Carnarvon, lies at the north-west base of Snowdon, and near the foot of the wild Pass of Llanberis. The two lakes of Llanberis, 2 and 1¼ miles long, are sadly disfigured by slate-quarries. Population, about 3000.

Llandaff, a small town of Glamorganshire, on the right bank of the Taff, 2 miles NW. of Cardiff (q.v.). It is the seat of a very ancient bishopric, founded, it is said, by St Dubricius, who died in 612. The cathedral was built between 1120 and 1450, and is mainly Early English in style. It had fallen into utter ruin in 1575, in 1735–52 was barbarously patched up into an 'Italian temple,' and in 1843–69 was thoroughly restored. Pop. of parish, 10,000. See works by E. A. Freeman (1850), Bishop Ollivant (1860), and R. J. King (1873).

Llandi'lo, a town of South Wales, on the Towy, 14 miles ENE. of Carmarthen. Pop. 1950.

Llandovery, a municipal borough (1484) of South Wales, on the Bran, 25 miles ENE. of Carmarthen. Pop. 2000.

Llandrindod, a Radnorshire spa, near the Ithon, 7 miles N. by E. of Builth.

Llandud'no, a fashionable watering-place in Carnarvonshire, North Wales, is situated on the level neck of a promontory between the Great and Little Orme's Heads, 48 miles by rail WNW. of Chester. Its bracing and delightful climate, its good sea-bathing, and its picturesque surroundings—the Great Orme's Head (700 feet) commanding views of Snowdon and Anglesey, and even of Man and the Cumberland mountains—have combined to raise Llandudno since 1841 from a small fishing-village to a yearly resort of some 20,000 visitors, with many hotels and boarding-houses, hydropathics, a fine promenade, a pier (1250 feet), a 'marine drive' (5½ miles), &c. Resident pop. (1851) 1131; (1911) 10,469.

Llanelly (*Hhlan-ehh'ly;* nearly like *Thlanethly*), a manufacturing town and seaport of Carmarthenshire, South Wales, 11 miles WNW. of Swansea. The mineral wealth of the vicinity, and the easy access to the sea, have raised it from a mere village in 1813 to a town of considerable commercial importance. The Cambrian Copper-works employ a great number of the inhabitants; but there are also silver, lead, iron, and tin works, potteries, chemical works, &c. Large docks have been constructed, and coal is largely exported. With Carmarthen it returns one member. Pop. (1851) 8710; (1911) 32,071.

Llanerchymedd, a village of Anglesey, 14 miles ENE. of Beaumaris. Pop. of parish, 850.

Llanfairfechan, a pleasant little watering-place of Carnarvonshire, North Wales, at the base of Penmaenmawr, 7 miles WSW. of Conway. Pop. 3000.

Llanfyllin, one of the Montgomery boroughs, 15 miles NNW. of Montgomery. Pop. 1653.

Llangefni, an Anglesey market-town, 9 miles W. by S. of Beaumaris. Pop. 1750.

Llangollen (*Hhlan-gohh'len;* nearly *Thlan-goth-len*), a town of Denbighshire, North Wales, picturesquely situated on the Dee, 22 miles SW. of Chester and 26 NW. of Shrewsbury. It has a town-hall (1866) and flannel manufactures, and is visited by tourists on account of the beauty of the famous Vale of Llangollen, and for its antiquities, among which are Dinas Bran or Crow Castle, Valle Crucis Abbey (1200), and Eliseg's Pillar (8th or 9th century). Plas Newydd, ¼ mile S. of the bridge, was for half a century the residence of the two Irish recluses, the 'Ladies of the Vale,' or 'Maids of Llangollen,' Lady Eleanor Butler (1745–1829) and Miss Sarah Ponsonby (1755–1831), who were visited here by Madame de Genlis, Miss Seward, De Quincey, and many other celebrities. Pop. 3250. See Simpson's *History of Llangollen* (3d ed. 1852).

Llangorse, a parish, with a lake 5 miles in circuit, and 6½ miles ESE. of Brecon.

Llanidloes (*Hlan-id'lŏ-es*), a municipal and parliamentary borough of Montgomeryshire, on the Severn, 56½ miles NW. of Hereford by rail and 56 SW. of Shrewsbury. Its interesting church, built partly with materials from Cwmhir Abbey, was restored in 1882. Manufactures of flannel and other woollen fabrics are carried on; and in the neighbourhood are extensive lead-mines. With Montgomery, &c., Llanidloes returns one member. Pop. 2600.

Llanrwst (*Hlan-roost'*), a market-town of Denbighshire, on the river Conway, 10 miles S. of Conway town. Pop. 2550.

Llantho'ny, on the Honddu, in Monmouthshire, 20 miles N. of Abergavenny, a Cistercian abbey, founded in 1108. Its church and chapter-house form a fine ruin in the Transition Norman style. In the Prior's Lodge, now an inn, Walter Savage Landor lived for three years after his marriage. Four miles up the valley is Llanthony 'Monastery,' founded by 'Father Ignatius.'

Llantrisaint, a town of Glamorganshire, 11½ miles NW. of Cardiff. It is one of the Cardiff boroughs. Pop. 2500.

Llerena (*L'yeraina*), a town of Spain, 83 miles by rail N. of Seville. Near here the British cavalry routed the French cavalry on April 11, 1812. Pop. 8000.

Loanda (*Lo-an'da*), Saint Paul de, chief town of the Portuguese possessions on the West Coast of Africa, on a small bay, 210 miles S. of the Congo's mouth. It has broad, tree-shaded, but dirty streets, forts (1578), and the residences of the governor and bishop. The harbour is sanding up, so that vessels lie 1¼ mile from shore to load and unload. Pop. 50,000—15,000 Europeans.

Loango, a coast-district of West Africa, stretching northward from the mouth of the Congo to 4° S. lat. By the Berlin Conference of 1885 it was divided between the Congo Free State (Belgian Congo), Portugal, and France. The town Loango (in French Congo) has now only a few factories, with a little shipping.

Loanhead, a police-burgh, 5 miles S. by E. of Edinburgh. Pop. 3500.

Löbau, a town of east Saxony, 12 miles SE. of Bautzen, has mineral springs and manufactures of linens, cottons, woollens, &c. Pop. 12,000.

Lobito Bay, just N. of Benguela, in Portuguese West Africa, bids fair to become the gateway of Central Africa.

Lob Nor, a lake, or group of lakes, in the desert of Gobi, receiving the river Tarim.

Locarno, a town in the Swiss canton of Ticino at the N. end of Lake Maggiore, is a well-known tourist-resort. Pop. 4500.

Locha'ber, a district of S. Inverness-shire.

Lochearnhead, a Perthshire village, at the head of Loch Earn, 14 miles NNW. of Callander.

Lochee', a north-west suburb of Dundee.

Lochgelly, a police-burgh of Fife, 7½ miles ENE. of Dunfermline. Pop. 9100.

Lochgilp'head, a police-burgh of Argyllshire, 80 miles WNW. of Glasgow. Pop. 900.

Lochinvar', a little lake of Kirkcudbrightshire, 6 miles NNE. of New Galloway.

Lochin'ver, a village in Assynt parish, in the SW. of Sutherland, on Loch Inver.

Lochle'ven, a beautiful oval lake of Kinross-shire, 23 miles NNW. of Edinburgh. Lying 353 feet above sea-level, and engirt by Benarty (1167 feet), the West Lomond (1713), and other hills, it measures 3⅝ miles by 2; discharges by the Leven, flowing 16 miles eastward to the Firth of Forth; is 10 to 90 feet deep; and has an area of 3406 acres, drainage operations having reduced its size by one-fourth in 1826–36. Of seven islands, the largest are sandy, treeless St Serf's Inch, an early seat of the Culdees, and Castle Island, with the 14th-century keep of a castle which in 1567–68 was for ten months the prison of Mary, Queen of Scots. Since 1633 and earlier the loch has been famous for its delicate pink-fleshed trout, and since 1856 for its fly-fishing. The imported American water-weed Anacharis proved for a while extremely troublesome. See Robert Burns-Begg's *History of Lochleven Castle* (Kinross, 1888). See also Leven (Loch); and for Lochs Lomond, Long, &c., see Lomond, &c.

Lochma'ben, a market-town of Annandale, Dumfriesshire, 10 miles by rail NE. of Dumfries. It stands amid seven lochs, two of which contain the rare vendace, and has a town-hall (1878), with a statue in front of it of Robert Bruce, and the Bruces' ruined castle. A royal burgh, it unites with Dumfries, &c. to return one member. Pop. 1050. See W. Graham's *Lochmaben* (1865).

Loch'winnoch, a Renfrewshire village, at the SW. end of Castle-Semple Loch, 17 miles WSW. of Glasgow. Pop. 2130.

Lochy, an Inverness-shire loch, 10 miles long, through which the Caledonian Canal (q.v.) passes; and the river (8 miles) that issues from it. Also a Perthshire stream which flows 15 miles to the Dochart near its influx into Loch Tay.

Lock'erbie, a market-town, with a great August lamb-fair, in Annandale, Dumfriesshire, 15 miles ENE. of Dumfries and 26 NW. of Carlisle. It has a conspicuous town-hall (1891). Pop. 2500.

Lock Haven, capital of Clinton county, Pennsylvania, in a beautiful mountain-valley, on the south bank of the West Branch of the Susquehanna River, 69 miles NE. of Altoona by rail. It contains a state normal school, foundries, tanneries, machine-shops, and mills. Pop. 7800.

Lockport, capital of Niagara county, New York, on the Erie Canal, 25 miles NNE. of Buffalo by rail. The canal here passes through a deep channel, cut in the solid limestone, and falls 66 feet, by ten combined double-locks. Its surplus water drives lumber, flour, woollen, and cotton mills, besides foundries, machine-shops, &c. Pop. 18,000.

Locle (*Locl*), a Swiss town, 10 miles NW. of Neuchâtel, is one of the chief seats of the Swiss watch-making industry. Pop. 13,000.

Loddon, a Norfolk village, 10½ miles SE. of Norwich. Pop. of parish, 1069.

Lodève (anc. *Luteva*), a town in the French dep. of Hérault, at the foot of the Cévennes, 43 miles by rail NW. of Montpellier. A bishop's see till 1790, it has a cathedral, founded in 950, but rebuilt in the 14th century. Cardinal Fleury was a native. Pop. 6000.

Lodi, a town of North Italy, on the Adda, 18 miles by rail SE. of Milan. It has a 12th-century cathedral; manufactures of linens, silks, and Majolica porcelain; and a great trade in cheese and wine. Pop. 30,000.—At LODI VECCHIO, a ruined village, 4 miles W., Bonaparte in 1796 forced the long, narrow bridge in the face of a tremendous fire from the Austrian batteries.

Lodomeria (Lat. for Vladimir), formerly an independent principality in Volhynia, and, since the partition of Poland in 1772, part of the Austrian 'kingdom of Galicia and Lodomeria.'

Lodore'. See DERWENTWATER.

Lodz, sometimes called 'the Manchester of Poland,' lies 76 miles SW. of Warsaw, and has over 120 manufactories making cottons and woollens. Pop. (1870) 39,078; (1881) 49,592; (1911) with an enlargement of the boundaries, 400,000.

Loetschen, an Alpine pass N. of the Simplon Pass (q.v.). The Loetschberg tunnel (9¼ miles) was pierced in 1906–11.

Lo'foden, or LOFOTEN, a chain of islands on the north-west coast of Norway, between 67° and 69° 15′ N. lat., stretching SW. and NE. for 150 miles. They include the Lofoten proper and the Vesteraalen, lying farther north. Total area, 2247 sq. m. All of them are rugged and mountainous, many of the summits being crater-shaped. The highest point is 3090 feet. The waters on the east side of these islands are visited in January to March every year by vast shoals of cod-fish, which attract a large fleet of fishermen. Permanent pop. 30,000.

Loftus, a town of Yorkshire, 9 miles SE. of Saltburn. It manufactures cordage, and has large market-gardens. Pop. 9000.

Logansport, capital of Cass county, Indiana, at the confluence of the Eel River and Wabash, 75 miles N. by W. of Indianapolis. There are extensive railway-shops, besides flour and lumber mills and foundries. Pop. 17,328.

Logroño (Lat. *Julia Briga*), the capital of a Spanish province (1945 sq. m.; pop. 188,285), on the Ebro, 65 miles E. by N. of Burgos. It manufactures woollens, machinery, and leather goods. Pop. 24,000.

Loheia, a seaport of Arabia, on the Red Sea coast of Yemen, 170 miles NW. of Mocha, with 10,000 inhabitants, and a trade in coffee.

Loire (*Lwâr*; anc. *Liger*), the longest river in France, has its source in the Cevennes, in the dep. of Ardèche, at an elevation of 4511 feet, flows north and north-west through the centre of France as far as Orleans, where it bends round to the south-west and continues on to Tours; thence it follows, in general, a western course to its embouchure in the Bay of Biscay. It is tidal to Nantes, 35 miles from its mouth. Entire length, 620 miles. It becomes navigable a little above Roanne, 550 miles from the sea. At one time the depth of water at its mouth was 19½ feet at ebb-tide; now it is only 6½ feet. This is due to the vast quantity of sedimentary matter brought down by the river. To the same cause are due the numerous islands that obstruct its lower course. On its banks are many historical châteaux. The Loire is notorious for the destructive inundations it causes, although the lower part of its course is protected by large dykes or *levées*, 20 feet high. The chief tributaries are the Nièvre and the Maine (which is formed by the Sarthe, its affluent the Loir, and the Mayenne) on the right; and the Allier, Cher, Indre, and Vienne on the left. See *The Seine and the Loire*, with sixty-one illustrations by Turner (new ed. 1886).

Loire, a dep. of SE. France, formerly part of the province of Lyonnais and the county of Forez. The arrondissements are Montbrison, Roanne, and St Étienne (the capital). Area, 1838 sq. m.; pop. (1872) 550,611; (1911) 640,549.

Loire, HAUTE, a dep. of central France, formed out of Languedoc, Auvergne, and Forez. The Loire crosses it northwards, the Allier north-westwards. Area, 1915 sq. m.; pop. (1872) 308,732; (1911) 303,838. The arrondissements are Le Puy (the capital), Yssingeaux, and Brioude.

Loire-Inférieure (*Lwar-ang-fayr'yehr*), a maritime dep. of W. France, formed out of southern Brittany, and comprising the arrondissements of Nantes (the capital), Ancenis, Paimbœuf, Châteaubriant, and St Nazaire. Area, 2654 sq. m.; pop. (1872) 602,206; (1911) 669,920.

Loiret (*Lwar-ay'*), a dep. of central France, formed out of the old provinces of Orléanais and Berri, and comprising the arrondissements of Orleans, Montargis, Gien, and Pithiviers, lies on the northern loop of the Loire. Area, 2614 sq. m.; pop. (1872) 355,021; (1911) 364,061.

Loir-et-Cher (*Lwar-ay-shayr'*), a dep. of France, formed out of the old province of Orléanais, comprises the arrondissements of Blois (the capital), Vendôme, and Romorantin. Area, 2452 sq. m.; pop. (1872) 268,801; (1911) 271,231.

Loja (*Lo-ha*), a decayed town of Spain, on the Genil, 32 miles by rail W. of Granada. It suffered from earthquake in 1885. Pop. 20,000.

Lok'eren, a town of Belgium, 11 miles by rail NE. of Ghent, with manufactures of linen, cotton, and woollen goods, lace, &c. Pop. 25,000.

Lom'bardy, that part of Upper Italy which lies between the Alps and the Po, having the territory of Venice on the east, and Piedmont on the west. Milanese from 1337 till 1447, Lombardy then belonged to Spain till 1713, when the duchies of Milan and Mantua came into the hands of Austria, and were designated 'Austrian Lombardy.' Napoleon made it part of the Cisalpine republic, the Transpadane republic, and the kingdom of Italy successively. But in 1815 it was restored to Austria, and annexed politically to the newly-acquired Venetian territory under the name of the Lombardo-Venetian Kingdom. This union was dissolved in 1859, when Lombardy was given up to the new kingdom of Italy, which divided it into the provinces of Bergamo, Brescia, Como, Cremona, Mantua, Milan, Pavia, and Sondrio.

Lombok, one of the Sunda Islands (q.v.), between Java and Timor. It is mountainous (some volcanic peaks reach 11,620 feet) but fertile, producing maize, cotton, tobacco, indigo, sugar, and coffee. Area, 2098 sq. m.; pop. 635,000, mainly aborigines, Moslems in faith, with 20,000 Brahminical immigrants from Bali.

Lomond Hills. See LOCHLEVEN.

Lomond, LOCH, the 'queen of Scottish lakes,' in Dumbarton and Stirling shires, lies 23 feet above sea-level, and is 22 miles long, ¾ mile to 5 miles wide, 6 to 630 feet deep, and 27 sq. m. in area. It is studded with thirty wooded islands; receives the Endrick and six other principal streams; sends off the Leven 7 miles southward to the Clyde; contains trout, pike, and perch; is sometimes frozen over as far northward as Luss; and is engirt by hills and, towards its head, Highland mountains, the highest of which, Ben Lomond (q.v.), attains 3192 feet. In 1263 Norsemen launched their galleys on Loch Lomond, having drawn them across the narrow isthmus of Tarbet; on Inchcailloch stood of old a nunnery; and a cave is associated with both Bruce and Rob Roy.

Lomza, the capital of a Polish government (area, 4667 sq. m.; pop. 685,000), 80 miles NE. of Warsaw. Pop. 28,000.

London is situated mainly on the north or left bank of the Thames, about 50 miles from the sea, in 51° 30′ 48″ N. lat. and 5′ 48″ W. long. The city was, according to many authorities, founded in 43 A.D., when Aulus Plautius was the Roman governor of Britain. The name is Celtic, and would appear to signify a fort on a lake or lagoon, the Thames being here a tidal estuary. During the greater part of the Roman occupation of Britain London consisted of two forts, one at either end of the bridge, built where the Thames is 900 feet wide (narrower than either above or below). The unwalled suburbs seem to have been populous and wealthy from an early period; and, when abandoned by Suetonius, they were burned by Boadicea in 61 A.D. They were still undefended in 286 and long after. The wall which for so many centuries was destined to defend the boundaries of the city was built in 350–369, and enclosed 380 acres. From 369 till 412 London was the capital of Britain, with the title of *Augusta*. After the Roman departure London disappears from history until 457, when the Britons, fleeing before the victorious Hengest, took refuge behind the Roman wall. In 604 we find it named as the 'Metropolis'—the ecclesiastical capital—of the East Saxons. During the Danish wars London was abandoned and lay desolate for thirty years. To King Alfred we must look as the real founder of modern London. William recognised the great position and ancient rights of London in a special charter by which the privileges enjoyed by the citizens under Edward the Confessor were confirmed to them; but the most important grant from the crown was that of Henry I. in 1101. The 'Lord Mayor,' appointed for one year, is still held to rank as an earl, but within the city, where he has the position of the Lord-lieutenant of a county, next to the sovereign. The Court of Aldermen consists of twenty-six members. The Common Council was first elected in 1200; there are now upwards of 200 common councillors. The Common Hall consists only of members of the Livery Companies, and has obtained or usurped many of the rights of the whole body of citizens. The growth of the municipality was slow. Nevertheless, commerce increased, and the settlement of such foreign merchants as those of the so-called Steelyard, and of the Lombard and other Italian bankers, raised London by the time of Edward III. to a wealthy and prosperous condition. The usurpation, as many deemed it, of Henry IV. could hardly have succeeded had it not been for the support of the city; and Henry V., whose French victories inflated trade, was most popular with the citizens. After a period of depression, the reign of Edward IV., by reviving and creating outlets for foreign trade, restored the prosperity of the city. Under the Tudors there were great fluctuations. The tenets of the Reformation were warmly welcomed in London. The accession of Queen Elizabeth gave a considerable impetus to London trade; and the Merchant Adventurers, chartered by her father, now stepped into the place previously occupied by the Germans of the Steelyard. The last charter of Queen Elizabeth was granted to the East India Company. The silk manufacture, driven out of Flanders by the cruelties of the Spaniards, was naturalised in England; and even the short-sighted policy of the first Stuart could not repress the rapidly-growing enterprise of the Londoners, whom the discovery of America and of a sea-passage to India stimulated to greater and greater exertions.

While the wealth and population of London thus increased during the 16th and part of the 17th century, the city itself became less and less fit for habitation. Its unhealthiness was partly caused by the deficiency of the water-supply, partly by overcrowding; the plague scarcely ever left its narrow streets and filthy alleys. Sir Hugh Myddelton, by bringing clean water to the city in abundant quantity in 1620, bestowed upon it the greatest possible boon. James I. had reverted as far as he could to the mistaken policy of such kings as Henry III. and Richard II.; but it was reserved for Charles I., after a long series of high-handed proceedings, to seize the money of the city goldsmiths deposited in the Tower. His downfall was certain when the city turned against him; but, except for a very brief period, the Commonwealth found little favour in London, and Cromwell imposed one humiliation after another upon the citizens. Charles II. was warmly welcomed, but followed in the footsteps of his father. Extortion and oppression were the instruments of his policy, and in 1672 he closed the Exchequer, and ruined nearly all the London bankers at a blow. Meanwhile two even greater disasters had come—the Great Plague of 1665 and the Great Fire of 1666. During the fearful epidemic of 1665 the deaths during the year were officially stated at 97,306. As the population was reckoned at about 500,000, it will be seen that nearly a fifth perished. The Great Fire commenced on the 2d September, at 1 o'clock A.M., and raged for five days. It was estimated that 396 acres of houses were destroyed, fifteen city wards were consumed utterly, and eight others damaged, comprising 400 streets, 13,200 private houses, 88 churches and St Paul's Cathedral, and four city gates. The loss in mere money was estimated at about four millions. Sir Christopher Wren built a new St Paul's, and many other beautiful buildings, including the Monument, a column 202 feet high, erected near where the fire began. St Paul's has a dome 365 feet high and 145 feet in external diameter; the length of the building east and west is 500 feet. It contains many memorials, the best of which are Wellington's, by Stevens; Lord Melbourne's, by Marochetti; and a recumbent figure of General Gordon, by Boehm. In the crypt are buried Lord Nelson (1805), Reynolds (1792), Turner (1851), Wellington (1852), Landseer (1873), and Wren himself (1723). The Exchange of Sir Thomas Gresham was burned, rebuilt, and then burned again, and finally rebuilt in 1844. The Guildhall, partly of the 13th century, partly of the 15th, which had been the scene of so many historical events, was damaged by the Great Fire of 1666, but not destroyed, and was handsomely restored. Among the churches spared by the fire is St Bartholomew's, in part a fine Norman structure; St Giles's, Cripplegate, built 1545, in which John Milton was buried, 1674; St Helen's, Bishopsgate, full of fine monuments; St Katharine Cree, said to have been designed by Inigo Jones, 1631; and St Andrew Undershaft, in which is Stow's monument.

Charles II. seized the charter and nominated a so-called Lord Mayor. At first James II. carried on his brother's evil policy towards the city. In December 1688 the citizens formally petitioned William to assume the crown, and in a few hours found ample funds for his use. The opposition of London, in old times fatal to a king or his family, affects still the fortunes of ministries. The remaining events that need be noticed here are the establishment of the Bank of England in 1694; the removal of the old wall and its gates in 1760; the clearing of the houses from London Bridge about the same time, and its complete rebuilding in 1831, when it was only one of a large number of bridges. Many have been built since then. The latest addition is a bridge below the Tower; and another one (St Paul's) is proposed. The Mansion House is the official residence of the Lord Mayor. The population of the City has dwindled year by year, and especially since the multiplication of railways. Few tradesmen now live above their places of business, and the difference between the number of people who actually reside within the ancient boundaries and of those who only come in to business is immense. In 1881 there were 6493 inhabited houses and a night pop. of 50,526; but 25,143 houses were used during the day, when the pop. rose to 261,061. In 1911 the night pop. was only 19,657; while the day pop. was 364,061. Meanwhile the suburbs have spread in all directions, and the houses of Londoners are found in Berkshire, Buckinghamshire, Hertfordshire, and Sussex, as well as in Kent, Surrey, Essex, and Middlesex. The bishop resides in Westminster, and at an ancient manor-house of the see at Fulham. There is a dean of St Paul's, who resides close to his church. Among important new City buildings are the main block of the General Post-Office on the site of Christ's Hospital, and the Central Criminal Court, in Old Bailey, on the site of Newgate Prison.

The County of London. Under the Local Government Act of 1888 a new county was defined, to consist of London and the suburban parishes of Middlesex, Surrey, and Kent—previously called 'the Metropolitan Area.' By the Act of 1888 a county council was provided for this district; the county of Middlesex was divided, one part forming a new county of Middlesex, and the other, united with parts of Surrey and Kent, forming the new county of London. By the Act of 1899 the administrative county of London (with the exception of the City), heretofore under more than a hundred and twenty local authorities (vestries, district boards, burial boards, &c.), was reorganised into twenty-eight municipal boroughs, each under a municipal council. These boroughs are: Battersea, Bermondsey, Bethnal Green, Camberwell, Chelsea, Deptford, Finsbury, Fulham, Greenwich, Hackney, Hammersmith, Hampstead, Holborn, Islington, Kensington, Lambeth, Lewisham, Paddington, Poplar, St Marylebone, St Pancras, Shoreditch, Southwark, Stepney, Stoke Newington, Wandsworth, Westminster, Woolwich. The councils have all the powers and duties of the old vestries and district boards, and some of those of the London County Council.

The suburbs of London grew in spite of city and parliament; by 1222 a continuous street united Westminster with London; another stretched beyond the Tower to Stepney; and a third, flowing out of Bishopsgate, reached northward to Islington. In the same 13th century a great 'ward without' was formed westward, extending to the Temple and Holborn Bars; and, on the north, part of Moorfields was made a 'ward without' in the jurisdiction of the alderman of Bishopsgate. But, except for the formal addition of Southwark in Surrey, made in 1327, confirmed and defined in 1550, no further extension of the city liberties took place.

The precinct of the Tower, eastward of the city wall, was formed partly by aggressions on the citizens, partly by acquisitions from the lord of Stepney, and partly by reclamations from the Thames. Two bastions of the old wall, generally called Roman, and certainly dating back to the reign of Alfred, were removed, and the White and Wakefield towers were built on them. Gundulf, a monk of Bec, designed the White Tower, begun in 1078; the chapel of St John in the White Tower being supplemented by the parish or precinct church of St Peter 'ad Vincula' on the Green in the reign of Henry II. The keep is approximately in the centre, and is surrounded by walls and towers forming the inner and outer wards. The towers of the inner ward were those chiefly used for prisoners' lodgings, but a complete royal palace was in the south-eastern corner. Of this palace, from which Queen Anne Boleyn went to her death on the adjoining green, scarcely a vestige remains. The lieutenant's lodgings, where, or in the chief-warder's house next door, Lady Jane (Grey) Dudley lived, is now called the Queen's House. The Beauchamp and Devereux towers seem to have held the most illustrious prisoners; they, with the Bell Tower, in which Fisher, Bishop of Rochester (1534), and Mary, Countess of Lennox (1565), were confined, form the western side of the inner ward. It is impossible to name more than a very few of the most famous persons who have suffered imprisonment in the Tower: Sir Thomas More, Sir Walter Raleigh, the Earl of Strafford, Archbishop Laud, the Duke of Monmouth, the Jacobite lords of 1715 and 1745. Many of these prisoners were buried in St Peter's Church, which having been burned in 1512 was rebuilt in time to receive the bodies of Queen Anne Boleyn and other victims of the Tudor times. It was 'restored' some years ago in a very thorough manner, every vestige, except some monuments of the period which witnessed these sad scenes, being carefully obliterated. The crown jewels were long kept in the Brick Tower, at the north-eastern corner, but in 1867 were removed to a chamber in the Wakefield Tower, also now 'restored.' The great collection of armour, founded by Henry VIII. in his palace at Greenwich, is on the upper floor of the White Tower. The ticket-office, by which the visitor enters the fortress, is on the site of a menagerie which dates back to the time of Henry I., whence the saying 'to see the lions,' meaning to visit the Tower. The principal feature of the outer ward is St Thomas's Tower, or the Traitor's Gate, facing the Bloody or Garden Tower, the entrance of the inner ward. A little farther east, still on the Thames bank, we come to one of the numerous divisions, known as the Tower Hamlets, into which the original parish of Stepney has been parcelled. This used to be Ratcliffe and Wapping, but has long been known as St George's in the East. Next to it is Limehouse. Next to Limehouse is Poplar, which includes the Isle of Dogs ('Docks'), a kind of delta formed by the river Lea. Farther inland are Bethnal Green, a vast district, chiefly covered with factories and with the houses of artisans and labourers. Mile End, Old and New Towns, with Whitechapel north of the Tower, form a complete ring round Stepney. The Bethnal Green Museum of the Science and Art Department has housed and exhibited various fine collections of pictures and works of art. Much of Hackney, which adjoins Stepney on the north, has been kept open; an old park of the bishops being now laid out as Finsbury Park. South of this district, which stands high, are Haggerston and Hoxton, densely populated parishes, comprising the ancient Shoreditch, and reaching to the city wall. Westward are the two divisions of Finsbury, St Luke's and Clerkenwell. In Clerkenwell, but not strictly speaking of it, is the Carthusian monastery, now a kind of refuge for decayed gentlemen, known as the Charterhouse (see GODALMING). Clerkenwell, the site of the house of the Hospitallers, has still its St John's Gate, with memories of Dr Johnson. Islington, northwards and westwards, has a very ancient history, extending back to the Conquest; Stoke Newington has a curious old church and a new one; in St Andrew's, Holborn, Lord Beaconsfield was baptised, and in its cemetery, in Shoe Lane, Chatterton was buried. In Bloomsbury the British Museum is situated. St Giles's, long a rookery of wretched tenements, has been greatly cleansed and improved of late, but the too famous Seven Dials continue to deserve an evil reputation. Nell Gwynn lived in Wardour Street, the Duke of Monmouth in Soho Square, Dryden in Long Acre and in Gerard Street. The small parish of St Paul, Covent Garden, boasts of a church designed by Inigo Jones, of the greatest vegetable and flower market in London, and of innumerable literary associations. In Bow Street was Wills's Coffee-house, where Pepys met Dryden; Turner, the landscape-painter, was born in Maiden Lane; Charles Lamb lived in Russell Court; and there are memories also of Pope, Sheridan, Butler, and Prior. At the eastern end of the Strand, next to (the site of) Temple Bar, we have the colossal buildings of the New Law Courts (1874–82), of which George E. Street was the original designer, but so thwarted by the authorities, that only the best features, such as the noble hall (238 feet long) and the tower, can be considered his. From here Kingsway and the crescent of Aldwych connect the Strand with Holborn. Before we reach Waterloo Bridge we are in the precinct of the Savoy, of which the hospital was suppressed in 1703, and the chapel, where Gavin Douglas is buried, made 'royal' in 1773.

The Thames Embankment (1864–1903) borders the Strand from the City round a great bend of the Thames at Charing Cross to Westminster. When we pass the City boundary near the Temple we come to the Education Offices of the L.C.C., mainly by Bodley; next to which is the river-front of Somerset House, by Chambers. Gardens beautifully laid out conduct us past the Savoy, the Adelphi Terrace, and the Egyptian obelisk called 'Cleopatra's Needle.' Charing Cross station occupies the site of Hungerford Market. The cross in the court toward the Strand was meant for a reproduction of the Eleanor Cross erected by Edward I. Northumberland Avenue was made in 1874. Trafalgar Square is on the site of the old Kings' Mews. Its chief ornament is the church of St Martin 'in the Fields,' by Gibbs (1726). The National Gallery is a poor building (by Wilkins, 1838). The monumental Corinthian column to Nelson is very conspicuous, with four lions by Landseer at its base. Behind it is a statue of General Gordon by Thornycroft. Cockspur Street leads us past the Haymarket (with great theatre, hotel, &c.) to Waterloo Place, where are the Guards' Memorial; the Edward VII. Memorial; the Duke of York's column with statue by Westmacott; and monuments, mostly very bad, to Franklin, Lord Clyde, Lord Lawrence, &c. The clubs in Pall Mall and St James's Street are in many cases justly admired. Piccadilly begins a little to the eastward of Waterloo Place and its continuation Regent Street, and is called from a kind of tea-garden, Peccadillo Hall, which stood where the Criterion is now. The formation of Regent Street must be ascribed to Nash. In the Regent's Park are situated the Zoological and Botanic Gardens. In Piccadilly there are still some fine palaces, as Devonshire House, Northampton House, the residence of Lord Rothschild, Apsley House, and Burlington House (injured by alterations and additions). Here are lodged the Royal Academy, the Royal, the Antiquarian, the Linnean, and several other learned societies. The gardens are covered by the exhibition rooms of the academy, to which site they were removed from Trafalgar Square in 1809. Northward and westward is the great parish of St George, Hanover Square, which comprises Mayfair, Grosvenor Square, and Belgravia, extending from Oxford Street on the north to the Thames on the south. St George's Church is heavy in design, except the portico. The parish nearly all belongs to the Duke of Westminster. In St Pancras parish is Kentish town. The new parish church of St Pancras, in the Euston Road, was built in what was thought to be a Grecian style in 1822. The Midland Railway terminus at St Pancras, by Sir G. G. Scott, is one of the largest and most imposing buildings of the kind.

Tyburn, named from a little brook or bourne which formerly ran through it, was anciently the name of the parish which we know as St Marylebone. The place of execution was at first by the burnside. As the suburbs increased and crept towards St Marylebone, the gallows was removed farther west. In 1512 it stood in the adjoining manor of Lilleston, close to the modern Marble Arch, and eventually it was set up for each execution at the foot of Edgware Road. At one or other of these places the Holy Maid of Kent (1534), many priests in the reign of Elizabeth, Felton, the assassin of Buckingham (1628), Jack Sheppard (1724), Jonathan Wild (1725), Lord Ferrers (1760), Mrs Brownrigg (1767), and the Rev. W. Dodd (1777) were hanged. The last execution here was that of John Austen (1783). In the Marylebone Road is the new building of the Royal Academy of Music. Oxford Street is called after Edward Harley, second Earl of Oxford and Mortimer, who married the heiress of the property on which it was built. North of St Marylebone is Hampstead (q.v.), with its splendid open heath, some parts of it 450 feet above the sea. Paddington lies wholly westward of the Edgware Road. A small part of Kensington Gardens is in Westbourne. Westward of Kensington (q.v.) is Hammersmith, taken out of Fulham, which reaches down to the Thames. Here is St Paul's School, moved from the City in 1884. Fulham boasts of an ancient church and of the palace of the bishops of London. Chelsea (q.v.) adjoins Fulham.

Crossing the Thames, we reach that part of Surrey which has been included in the new county. Battersea is chiefly remarkable now for the beautiful park, opened in 1852. Westward of Battersea is Wandsworth, south of it is Clapham. Kennington, the site of a manor-house of the princes of Wales; Brixton, a little farther south; and Norwood, on the summit of the southern line of hills which enclose what is called the London Basin, come next; and the manor of Lambeth (q.v.) faces Westminster. The domestic parts of Lambeth Palace are modern, but the chapel was built about 1250, the 'Lollards' Tower,' 1440, the gateway, 1490, and the hall, now the library, in 1663. On the river Embankment are the modern buildings of St Thomas's Hospital, removed to this site in 1871; and a little lower, the County Hall (for the London County Council).

From this point eastward to Southwark the low-lying area is occupied with mean streets and lanes, and with great warehouses, stores, and wharves; Shakespeare's Bankside Theatre is probably covered by the approaches to Southwark Bridge. Eastward of Southwark are Bermondsey, where a famous abbey flourished before the Reformation, and Rotherhithe, at an abrupt bend of the Thames. Both districts are densely covered with factories and labourers' dwellings. Farther inland and southward are Newington, Walworth, the immense parish of Camberwell, with Dulwich (q.v.) College and picture-gallery, and Peckham; and beyond that Penge (still in Kent), and the Crystal Palace, usually called from the neighbouring Sydenham (q.v.). Eastward of Camberwell we enter those districts which are taken from Kent. They comprise Lewisham, a good part of which is still open, and Deptford, Greenwich, and Woolwich, which are separately noted.

Westminster originally comprised a district outside of London, extending from the walls of London almost to the village of Kensington, but was gradually reduced in area. The present borough, included in the county of London, comprises the parishes of St Margaret and St John Westminster, St George Hanover Square, St James Westminster, St Martin-in-the-Fields, and the district of the Strand Board of Works and including the close of the collegiate church of St Peter Westminster. The name contains a reference to an ancient abbey church, probably founded about the time of Offa, but refounded by Dunstan in the time of King Edgar, about the year 971; as also to another minster, that of St Paul. Edward the Confessor, who lived chiefly at Westminster, rebuilt the church, and of his work an archway in the south transept may be identified. The church was consecrated in 1065, and Freeman was of opinion that the ill-fated Harold was crowned in it, as certainly was the Conqueror. In 1269 a new church, that which we now see, was consecrated, having been built by Henry III. in honour of Edward the Confessor (canonised 1163). The nave was finished under Richard II., but the western towers were not built till 1735. The chapel of the Annunciation, or chantry of Henry V., was built in the reign of Henry VI. The Lady Chapel, or chapel of Henry VII., an elaborate example of the last phase of the old Gothic style, was completed by Henry VIII., who later on suppressed the monastery and made Westminster a bishopric (for ten years only), since which the surrounding town has been reckoned a city. James I. set up the last of the royal monuments—those, namely, to his mother, Mary of Scotland, and to his predecessor Elizabeth. The north front was rebuilt by Wren, and was a beautiful example of his taste in Gothic. It was pulled down, and a new and less appropriate design by Mr Pearson substituted in 1890. The church is the burial-place of thirteen kings of England, including Henry III., Edward I., Edward III., Richard II., Henry V., Henry VII., Edward VI., James I., Charles II., William III., and George II., as well as of five queens in their own right, and the queens of many of the kings. In the reign of Richard II. the practice of burying court favourites and others in the abbey commenced. The first poet to be laid in the south transept, often called the Poets' Corner, was Chaucer; here also are buried Spenser, Dryden, Garrick, Johnson, Dickens, Browning, Tennyson, and others of less note. The first Lord Lytton was buried in the chapel of St Edmund. Handel's grave is in the south transept, Dean Stanley's in the chapel of Henry VII. The north transept contains the graves of Mansfield, the two Pitts, the three Cannings, and other statesmen. In the nave are buried Newton, Sir Gilbert Scott, Street, Livingstone, Ben Jonson, Sir Charles Barry, Robert Stephenson, and Charles Darwin. Nearly all English kings and queens have been crowned here, and since Edward I.'s reign have used the chair holding under its seat the Stone of Scone. Shortly before the dissolution of the monasteries William Caxton had set up the first English printing-press in the Almonry, a little to the west of the western front of the abbey. He is commemorated by a monument in the church of St Margaret, where he is buried. The Westminster Assembly, called by the Long Parliament to settle the doctrine, ritual, and government of the Church of England, met first in 1643 in Henry VII.'s chapel, and held the most of its 1163 meetings in the Jerusalem Chamber. The abbey remains are numerous, some of them being in the occupation of the school. The cloisters, except for restorations, are unusually perfect, and the domestic buildings of the Confessor's period are extensive. The Abbot of Westminster was a peer of parliament, took precedence of all other English abbots, and had an income which would be reckoned at about £60,000 of our money.

The dean has succeeded to some of the privileges and more of the duties. The chapter includes six canons, one of whom is archdeacon. Kensington Gardens are still reckoned in the parliamentary borough of Westminster; but the palace of Kensington is beyond the boundary. The Dean of Westminster is still nominally lord of the manor, and appoints a steward, generally some nobleman of high rank. There are also a bailiff and sixteen burgesses. The deanery contains the 'chamber called Jerusalem,' probably from a painting of the holy city among its original decorations. Jerusalem forms a chapter-house, the original chapter-house in the east cloister having for centuries been used by the House of Commons; having become ruinous, it was almost rebuilt by Sir Gilbert Scott. The school closely adjoins the abbey, and the great school-room is part of the monks' dormitory, remains of the Confessor's buildings. Among the masters of the school, founded as St Peter's College by Queen Elizabeth in 1560, have been Camden, the Elizabethan antiquary, Busby, and Vincent Bourne; the scholars have included George Herbert, Cowley, Dryden, Prior, Cowper, and Southey, poets; the architect Wren; Locke and Gibbon; and the statesmen Warren Hastings, Lord Mansfield, and Lord Russell.

The churches of Westminster are now very numerous, but the original parish churches are only St Margaret's and St John's. St Margaret's seems to have first been built before 1140, but as we see it now is in a poor style of Gothic, with many modern additions. The headless body of Sir Walter Raleigh was buried in it in 1618. The east window is old Dutch. The church is supposed to be the special charge of the House of Commons. Near here is the new Roman Catholic cathedral. The Houses of Parliament, old Whitehall, St James's and Buckingham Palaces—all the royal palaces of London except that at Kensington—are in Westminster. Here, too, are most of the government offices. Of Whitehall but little remains. Henry VIII. first made a palace here. James I. constantly used Whitehall, and set Inigo Jones to design him a great palace on the site. Nothing was ever built except the chapel, as it was till lately called, then a banqueting-hall. And from this hall Charles I. went to his doom on the scaffold outside. The Chapel Royal was closed in 1890, and in the following year was made over to the Royal United Service Institution. Opposite Buckingham Palace is the Queen Victoria Memorial (1911) in the Mall, from which an opening has been made, under the new Admiralty Arch, into Trafalgar Square.

The present 'palace of parliament' stands on a site consecrated by nearly six centuries of representative institutions. According to the local tradition it was Canute or Knut who first lived at Westminster, and here he rebuked the tide. It became the chief residence of successive kings, and the headquarters of the courts of law. The palace had numerous great public chambers and halls, where cases could be heard, great court functions could be carried out, and banquets given to hundreds of guests together. As the centuries went on these chambers formed not a homogeneous house, but a village of single apartments, such as the Painted Chamber, the Whitehall, the White Chamber, the Star Chamber, the Court of Requests, St Stephen's Chapel, and the Great Hall. To the westward of the Great Hall were the law-courts, and to the north and east the royal apartments. William Rufus rebuilt the Confessor's hall on an immense scale. Henry III. improved the palace greatly. Richard II. transformed the hall, and raised over it the magnificent roof of oak which is still intact. In 1512 a fire took place in the royal apartments, and Henry VIII. removed his court first to Bridewell and then to Whitehall, but the law-courts were fixed in Westminster Hall from 1224. Many of the greatest events of English history, and all the greatest pageants have had their place in this old hall. In 1834 a conflagration resulted in the destruction of all that remained of the ancient palace, except the hall, the cloister of St Stephen's Chapel, and the crypt. All were worked into Sir Charles Barry's new design for the Houses of Parliament, in the Perpendicular style. The whole contains 11 courts, 1100 apartments, and cost some £3,000,000. The first bridge here was opened in 1750. The present Westminster Bridge was completed in 1862.

London University, founded by charter of 1836, was not a teaching but an examining body granting degrees in arts, science, medicine, law, and music. The Acts of 1898–1910 reconstituted it as a teaching body, comprising University College, King's College, and King's College for Women as integral parts of the University; besides numerous 'schools of the University' in or near London. The University maintains the Physiological Laboratory at South Kensington, Goldsmiths' College, and the Galton Eugenics Laboratory. The schools include, among others, several theological colleges (Anglican and Nonconformist), the Imperial College of Science and Technology, East London, Holloway, Bedford, and Westfield Colleges, the Agricultural College at Wye, the schools of Bartholomew's, Guy's, St Thomas's, and other hospitals, and the London School of Economics and Political Science. The University reckons eight faculties—theology, arts, laws, music, medicine, science, engineering, and economics and political science; with headquarters temporarily in the Imperial Institute at South Kensington.

While the London Government Act of 1899, establishing the borough councils, simplified the management, there is still much overlapping and conflicting of authorities. Amongst nearly 300 different administrative authorities are: London County Council, City Common Council, Metropolitan Borough Councils (28), Commissioners of London Police, Metropolitan Asylum Board, Boards of Guardians (31), the Metropolitan Water Board, and the Port of London Authority. The administrative county of London, established in 1889, has an area of 118 square miles, and consists of the City and the districts which had grown up round it, known as the metropolis. Greater London (the Metropolitan and City of London Police Districts) includes the counties of London and Middlesex, and parts of Kent, Surrey, Essex, and Herts, and has an area of 693 square miles. The metropolitan water area is 620 miles in extent, and differs in boundary. The metropolis for criminal jurisdiction has an area of 420 square miles. The County Court and Police Court areas differ from all these and from each other. The population of the City (37,702 in 1890) was in 1911, 19,657, reckoning only persons sleeping within the area; the number entering the City during the day has been estimated at considerably over 1,000,000. The administrative county (4,228,317 in 1891) had in 1911 a pop. of 4,522,961, including the City. The Metropolitan and City Police District had

7,252,963. The rateable value of the City in 1911 was £5,631,340, and the corporation expenditure £1,423,086; and for the administrative county the corresponding figures were £44,676,713 and £25,294,739. London is divided into 60 parliamentary divisions, including West Ham (2), each returning one member, except the City, which has two.

The number of steam and sailing vessels which entered the Port of London, with cargoes and in ballast (excluding coast trade), in 1911 was 10,548, with a total tonnage of 13,163,100, and 8321 vessels, of 11,172,300 tons, cleared. The proportion of imports into London as compared with the remainder of the kingdom has slightly declined from 35 per cent. in 1872 to about 30 per cent. in 1911.

The death-rate of London in 1855 was 24·3 per 1000; in 1911 it was 15 per 1000. There are in London nearly 60,000 persons of Scottish birth and over 60,000 of Irish birth. Of 150,000 foreigners, 40,000 are Russians (including Jews) with 16,000 Russian Poles, 30,000 Germans, 12,000 French, 11,000 Italians, 6000 Austrians, 6000 Americans (U.S.), 4500 Dutch, 45,000 Swiss, 2500 Belgians, 1800 Swedes, 1000 Norwegians, and 1000 Danes.

See Stow's *Survey* (1599; new ed. 1908); Maitland's *History* (1756); Newcourt's *Repertorium* (2 vols. 1708); Cunningham's *Handbook* (1849; new ed. by Wheatley, 3 vols. 1891); Sharpe's *London and the Kingdom* (1894); Paul's *Vanishing London* (1896); Thorne's *Environs* (2 vols. 1877); Walford's *Greater London* (2 vols. 1885); Baedeker's *Handbook* (1889); Hutton's *Literary Landmarks* (4th ed. 1888); Cassell's *Old and New London* (6 vols. 1887); Loftie's *London* (1890); and a series of works (1892–1912) by Sir W. Besant.

London, a city and port of entry, capital of Middlesex county, Ontario, is situated at the junction of the two branches of the Thames, 116 miles by rail SW. of Toronto. It is a handsome city, regularly built; and the aim of its founders is visible in the names of the principal streets—Pall Mall, Oxford Street, Piccadilly, Cheapside, &c.—as well as of the river, which is crossed by a Westminster and a Blackfriars Bridge, and of the Covent Garden Market, Hyde Park, and St Paul's Cathedral. It has large petroleum refineries, foundries, mills, tanneries, &c.; and its white sulphur-springs attract many invalids. London is the seat of Anglican and R. C. bishops. Pop. (1881) 19,746; (1911) 46,300.

Londonderry, a maritime county of Ulster, 40 miles long by 34 broad, is bounded N. by the Atlantic, and elsewhere by Antrim, Lough Neagh, Tyrone, and Donegal. Area, 816 sq. m. Pop. (1841) 222,174; (1911) 140,625, of whom 64,400 were Catholics, 43,000 Presbyterians, and 27,200 Episcopalians. The surface rises inland, Mount Sawell, on the southern border, being 2236 feet high. The coast-line (30 miles long) is generally bold and precipitous; but the shore of Lough Foyle is in most places an unvarying plain, large tracts having been reclaimed. The river Bann from Lough Neagh forms part of the eastern border; the river Foyle intersects the western extremity. Thirty-seven per cent. of the area is permanent grass, and much of the cultivated soil is meadow land and clover. Linen is the staple manufacture. The county returns two members, and the county town, Londonderry, one. The other towns are Coleraine and Limavady.

Londonderry, or Derry, the county town, is situated on an eminence overlooking the river Foyle, 3 miles from its mouth and 18 from the entrance to Lough Foyle, by rail 163 miles NNW. of Dublin and 95 NW. of Belfast. Pop. (1851) 19,888; (1881) 29,162; (1911) 40,780. Londonderry grew up round a monastery founded in 546 by St Columba. It formed part of the escheated territory granted in 1613 to the London companies, and under their management rose to importance, and was strongly fortified. In the Irish war of the Revolution thirteen Londonderry apprentices closed its gates against James II.; and the townsfolk, shouting 'No surrender,' manned the walls. The 105 days' siege that then ensued, from April to August 1689, is one of the most celebrated events in Irish history. The walls still surround a part of the town one mile in circumference, but now the greater part of the city lies outside them. The left bank of the river is connected by an iron bridge, 1200 feet in length, with an extensive suburb called Waterside. The Protestant cathedral dates from 1633; it was restored in 1886. A handsome Roman Catholic cathedral, the court-house, guildhall (1890; cost £20,000), harbour-offices, post-office, custom-house, and banks are the other chief buildings. The siege is commemorated by a triumphal arch—one of the gates of the city—erected in 1789, and a column to the Rev. George Walker, who was the soul of the defence. The Presbyterian theological Magee College was founded in 1865. The industrial establishments include linen (shirt-making) factories, distilleries, iron-foundries, flour-mills, and shipbuilding-yards. In Lough Foyle are valuable salmon-fisheries. The harbour is deep, extensive, and safe. The imports include grain, flour, timber, and spirits; the exports are chiefly agricultural produce. Londonderry returns one member. See works by Hempton (1861) and Dwyer (1893).

Long, Loch, a beautiful Scottish sea-loch, striking off from the Firth of Clyde 17 miles north-north-eastward between the counties of Argyll and Dumbarton, and 3 furlongs to 2 miles broad. It sends off Loch Goil (q.v.); is flanked by steep and fantastic mountains, 2000 feet high; and at Arrochar, near its head, approaches to within 1¾ mile of Tarbet on Loch Lomond. A railway (1889–94) from Helensburgh to Fort-William skirts its eastern shore. Since 1862 the loch has been defiled with the dredgings from the Clyde at the rate of 1,250,000 tons a year.

Long Branch, a fashionable bathing-place of New Jersey, on the Atlantic, 30 miles S. of New York, and 13 S. of Sandy Hook. Pop. 13,300.

Longchamp, the racecourse, on the SW. side of the Bois du Boulogne, to the W. of Paris, where the race for the *Grand Prix* is run.

Long Eaton, a Derbyshire town, 8 miles SSW. of Nottingham. Pop. 19,200.

Longford, an inland county of Leinster, Ireland, bounded W. by the Shannon and SW. by Lough Ree. Its maximum length is 29 miles, its maximum breadth 20. Area, 421 sq. m. Pop. (1841) 115,491; (1911) 43,820, of whom 92 per cent. were Roman Catholics. The surface is for the most part flat, and the soil on the whole fertile, though extensive tracts of bog exist; 51 per cent. of the area is permanent grass. The county is studded with numerous small lakes, and is crossed by the Royal Canal. It returns two members to parliament. The islands of Lough Ree are especially rich in monastic remains.—Longford, the county town, on the river Camlin and a branch of the Royal Canal, 76 miles NW. of Dublin by rail. Its best building is the new R. C. cathedral (1840–93). Pop. 3800.

Long Island, an island which forms three counties of New York state, bounded by Long Island Sound, the Atlantic, and the East River (spanned by the Brooklyn suspension bridge). It is 115 miles long, 12 to 24 wide, and 1682 sq. m. in area. On its south shore is a series of lagoons, the largest 40 miles long and 5 or 6 wide. A line of low hills rises in the interior to 384 feet. There are numerous small lakes and watercourses, and market-gardening is carried on with success—for the most part by Germans. But much of the island is waste land or forest, and such popular watering-places as Coney Island are planted among deserts of sand. There is still some game, and the fisheries and oyster-beds are very valuable. The chief towns are Brooklyn, Long Island City, and Flushing. Creedmoor is the principal American rifle-range.

LONG ISLAND SOUND, lying between Long Island and the mainland of New York and Connecticut, is from 2 to 20 miles wide, and from 75 to about 200 feet in depth.

Long Island City, on Long Island, separated from New York City by the East River, and from Brooklyn by the navigable Newtown Creek, was formed in 1870 from five villages. Pop. (1880) 17,129; (1900) 48,272. It is now included in the borough of Queens, New York City.

Longjumeau (*Longzheemo'*), a French town in Seine-et-Oise, 12 miles SW. of Paris. Pop. 2000.

Longleat, the seat of the Marquis of Bath, in Wiltshire, 4½ miles SW. of Warminster. It is one of the noblest Elizabethan mansions in the kingdom, with a fine collection of portraits, memories of Bishop Ken, and a magnificent park.

Long Melford. See MELFORD.

Longridge, a small manufacturing town of Lancashire, 6½ miles by rail NE. of Preston, on the side of the Longridge Fell, which extends 5½ miles NE. to the Yorkshire boundary. Here are Preston reservoirs and manufactures of cotton, nails, &c. Pop. 4340. See Tom C. Smith, *History of Longridge* (Preston, 1889).

Longton, a town of Staffordshire, at the southern extremity of the Potteries, included within the parliamentary borough of Stoke-upon-Trent, and (since 1908) the county borough of Stoke-on-Trent. The prosperity of the town is due to the manufacture of china and earthenware, though malting, brewing, and brick-making are also carried on. Close by are ironworks and collieries. Pop. (1851) 15,149; (1881) 18,620; (1901) 35,815, now merged in that of Stoke-on-Trent (q.v.).

Longtown, a town of Cumberland, on the Esk, 8½ miles N. by W. of Carlisle. Pop. of Arthuret parish, in which it is situated, 2300.

Longwood. See ST HELENA.

Longwy (*Long-wee'*), a small town in the extreme north of the French dep. of Meurthe-et-Moselle, 18 miles WSW. of Luxemburg. Its fortress capitulated to the Prussians in 1792, 1815, and 1871. Pop. 10,000.

Lons-le-Saunier (*Lon^g-le-Soan-yay'*), capital of the French dep. of the Jura, stands in a basin of the Jura Mountains, surrounded with vine-clad hills, 42 miles by rail E. by S. of Chalon-sur-Saône. It was founded in the 4th century, when its salt-springs were discovered; these are still in use for bathing, and salt is manufactured. Population, 10,500. Rouget de Lisle, the author of the *Marseillaise*, was born here.

Loochoo (otherwise *Liukiu* or *Riu Kiu*), a group of thirty-seven Japanese islands. The islands extend SW. about halfway from Kyūshū in Japan towards Formosa. Their aggregate area is 1863 sq. m., and the pop. is 500,000. China has made a claim upon the islands, but they are essentially Japanese. Oshima possesses a good harbour, but Nafa, the port of Shinri, capital of Okinawa, is an unsafe anchorage. Sugar is largely raised, also the sago-palm, and an aromatic orange.

Loodiana. See LUDHIANA.

Looe, EAST and WEST, Cornish fishing-towns on Looe Bay, on either side of the Looe stream, 15 miles W. of Plymouth. The population of the urban district of Looe is 2700.

Lookout Mountain, a ridge extending from near Chattanooga, in Tennessee, across the northwest corner of Georgia, and into Alabama, and rising to 1600 feet above the Tennessee River. It was carried by General Hooker in the battle of 24th November 1863.

Lorca, a town of Spain, 36 miles SW. of Murcia. The gloomy Moorish part is picturesquely situated on an eminence crowned by a castle, whilst the modern town spreads out on the fertile plain. Here are saltpetre, gunpowder, and lead-smelting works, and manufactures of cloth, with neighbouring silver and sulphur mines. Pop. 73,000.

Lord Howe Islands, a main island, 5 sq. m. in extent, with some small islets, lying in the Pacific in 31° 33′ S. lat. and 159° 5′ E. long., 300 miles E. of Port Macquarie in New South Wales. It was discovered by Lieutenant Ball in 1788, colonised in 1840, and is attached administratively to New South Wales. It consists of three volcanic ridges, rising to 2840 feet, and is crescentic in shape. Pop. 100.—A group of the Solomon Islands bears the same name; and a Lord Howe's Island is one of the Society Isles.

Lorelei (*Lo-re-lī'*), or LURLEI, a rock rising 427 feet perpendicularly from the Rhine, near St Goar. It used to be dangerous to boatmen (through the fascinations of a siren, according to Heine's famous song), and has a celebrated echo.

Lorenzo Mar'ques, a port on Delagoa Bay (q.v.), capital of Portuguese E. Africa. Pop. about 9800, of whom 4700 are Europeans.

Lore'to, an interior dep. of Peru, watered for thousands of miles by the Marañon and its tributaries. Area, 33,000 sq. m.; pop. 100,000. The capital is Iquitos.

Loretto (properly LORETO), a city of Italy, 3 miles from the Adriatic, and 15 by rail SSE. from Ancona. It has a royal palace (designed by Bramante); but is chiefly noticeable as the site of the *Santa Casa*, or Holy House, reputed to be the house in which the Virgin lived in Nazareth. It was miraculously translated, first in 1291 to the neighbourhood of Fiume in Dalmatia, thence in 1294 to a wood near Recanati in Italy, and finally to its present site in 1295. Pop. 8000.—See also MUSSELBURGH.

L'Orient (*Lor-yon^g'*), a seaport in the French dep. of Morbihan, 116 miles by rail NW. of Nantes, with a deep and spacious harbour. It was founded in 1664 by the French East India Company; but, after the ruin of their trade by the English, their plant was acquired by the government, who since 1815 have made L'Orient the principal naval shipbuilding-yard in France. The inhabitants are also engaged in fishing (especially sardines). Pop. (1872) 30,928; (1911) 49,039. Off this port a British fleet defeated a French one, 23d June 1795.

Lorne, a district of Argyllshire, between Lochs Leven and Awe.

Lorraine. See ALSACE-LORRAINE.

Los Angeles (*Lōs An'je-les*), a city of California, capital of Los Angeles county, 483 miles SE. of San Francisco by the Southern Pacific Railroad. It is one of the oldest towns in the western states, and was already a thriving place when the Franciscan fathers established a mission here in 1781; its full name being *Pueblo de la Reina de los Angeles.* In 1835–47 it was the capital of the state of California. To-day it possesses a handsome opera-house, the University of southern California, a magnificent observatory, a R. C. cathedral, fine botanic gardens, &c. Pop. (1870) 5728; (1910) 319,198, the Spanish an insignificant minority. In the city alone are two reservoirs, with a capacity of 850,000 gallons, used solely for irrigation. The chief occupation is the cultivation and export of oranges, grapes, &c., as well as the manufacture of wine. There are rich oil-wells in and near the city. Many invalids resort to Los Angeles in the winter. The city has a harbour on the coast, 18 miles off.

Lossiemouth, an Elginshire seaport and golfing resort, at the mouth of the Lossie (31 miles long), 5½ miles NNE. of Elgin. Its harbour was formed in 1837–39, and deepened and improved in 1852 and 1893. Pop. 4200, half in Branderburgh (founded 1830).

Lostwithiel (*Los'withiel*), a Cornish mining-town and municipal borough (1885), on the Fowey, 5 miles SSE. of Bodmin. Pop. 1373.

Lot (*Lot'*), a dep. in the south of France, formed out of the old province of Guienne, and comprising the arrondissements of Cahors (the capital), Gourdon, and Figeac, is watered by the Dordogne and the Lot—the latter (anc. *Oltis*) one of the largest tributaries (300 miles) of the Garonne, which rises in Mount Lozère in the Cévennes. Area, 2012 sq. m. Pop. (1872) 281,404; (1911) 205,769.

Lot-et-Garonne (*Lo-tay-Garonn'*), a dep. of SW. France, formed out of the old provinces of Guienne and Gascony. It comprises the arrondissements of Agen, Villeneuve, Marmande, and Nérac, and is watered by the Garonne and its tributaries the Gers and Lot. Area, 2067 sq. m. Pop. (1841) 347,073; (1911) 268,083.

Lothian, the whole territory anciently between the Tweed and the Firth of Forth, which, from 547 a portion of Bernicia or Northumbria, was not finally annexed to Scotland till 1018. The name is now restricted to Haddington, Edinburgh, and Linlithgow shires, which are called respectively East, Mid, and West Lothian.

Lothringen. See ALSACE-LORRAINE.

Loudoun (*Low'don—ow* as in *now*), an Ayrshire parish, 7½ miles E. by S. of Kilmarnock, with the seat of the Earl of Loudoun, and with conical Loudoun Hill (1034 feet), where Bruce routed the English in 1307.

Loughborough (*Luff'borough*) a municipal borough, incorporated in 1888, of Leicestershire, 11 miles NNW. of Leicester. The Decorated parish church dates from the 14th century, but has a Perpendicular tower. There are a grammar-school (1495), a girls' grammar-school (1849), and a free library (1885). Hosiery is the staple manufacture; and bell-founding was introduced in 1840, the great bell of St Paul's being cast here in 1881. Other industries are dyeing, brick-making, and the manufacture of machinery. John Howe was a native, and Chancellor Wedderburn took hence his title Lord Loughborough. Pop. (1851) 10,900; (1911) 22,990. See Dimock-Fletcher's two monographs (1883).

Loughor, a town of Glamorganshire, on the Loughor River, 7 miles WNW. of Swansea. It is one of the Swansea (q.v.) district boroughs. Pop. 4000.

Loughrea', a market-town in County Galway, on a little fresh-water lake, 17 miles SW. of Ballinasloe. It has ruins of a castle and Carmelite monastery, both of about 1300. Pop. 2400.

Loughton (*Low'tun*), an Essex town, 4 miles SSW. of Epping. Pop. of parish, 5400.

Louisburg, a decayed fishing-village near the E. point of Cape Breton Island, Nova Scotia. There are the ruins of the old town, which was the strongest French fortress in North America, until taken by Wolfe in 1758.

Louisiade Archipelago (*Looiziâd*), a British group of islands, forming an eastward extension of New Guinea. It embraces Sudest (45 miles long by 4 to 10 miles wide), Rossel, St Aignan's (28 miles long), and a vast number of smaller islands. All are mountainous, rising to 3500 in St Aignan's, and covered with vegetation.

Louisiana (*Looiziah'na*), one of the Gulf states of the American Union, extends 200 miles from N. to S. and 290 from E. to W. Its land area, including the marshes bordering on the Gulf, is 40,790 sq. m.; its inland waters cover 2328 sq. m.; total area, 43,118 sq. m. This area is divided nearly equally between alluvial lands and uplands. The mean elevation above sea-level is 75 feet, the highest point 484 feet. For 25 miles inland from the Gulf, marshes subject to tidal flow cover one-eighth of the state's entire surface; low, sandy pine flats and prairie lands occupy about one-eighteenth each, arable lands one-eighth, the flood-plains near the rivers one-tenth, and bluff lands, pine hills, and uplands more than one-fifth each. Most of the large rivers flow above the level of the surrounding country on ridges formed by their own deposits, and the plains around, protected by dykes (called levees), slope away into dense, wooded swamps. The bottom-lands of the Mississippi are from 20 to 70 miles in breadth, those of the Red, Ouachita, and other streams range from 6 to 20 miles. The uplands embrace all the northern and north-eastern parts of the state, inclining gently towards the south, and crossing these are bluff lands, extending through the alluvial lands to the Gulf, and forming wonderful 'islands' covered with vegetation. Nor is the immense plain surrounding these bluffs ever inundated, but elevated and fertile, traversed by deep 'bayous'—minor and tributary streams. Even in the coast marshes occasionally an island-hill rises, with soil firm and fertile; and at other points cattle graze, whilst thousands of acres yearly are being drained and reclaimed and planted with rice. Besides the Mississippi the chief rivers are the Red, Sabine, Ouachita, and Pearl; there are also several lakes. The forests are dense with trees—pine, cypress, oaks, cottonwood, magnolia, poplar, beech, &c. Fruits are abundant, oranges and figs the most important. The staple crops are cotton, sugar, rice, and maize. The principal manufactures are shingles and tanks, cotton-seed oil, machinery, tobacco, and clothing and boots and shoes (by machinery), besides the cleaning and polishing of rice and the refining of sugar and molasses. The only mineral of importance is rock-salt, which is found in inexhaustible quantity at Petit Anse on Avery's Island; but hematite iron ore and sulphur have also been discovered, besides lignite. The principal city is New Orleans (pop. 339,075), the next in size, Shreveport, having only 28,000 inhabitants, and Baton Rouge (the capital) 15,000. The population is very mixed. The negroes in the country districts are somewhat in excess of the whites, of whom many are of French (called Creoles), German, or Irish descent, and some of Spanish and Italian. In most of the southern parishes French is spoken; and Spanish also is still used in a few places. Pop. (1820) 153,407; (1860) 708,002; (1880) 939,946; (1910) 1,656,388. Louisiana was so named by La Salle in 1682 in honour of Louis XIV.; was ceded to Spain in 1762, and retroceded to France in 1800; was sold by Napoleon to the United States for $12,000,000 in 1803; and was admitted as a state in 1812. See the *History of Louisiana* by C. Gayarré (3d ed. 4 vols. 1885).

Louisville (*Loo'i-vil* or *Loo'is-vil*), the largest city of Kentucky, a port of entry and capital of Jefferson county, is situated on the Ohio, 130 miles below Cincinnati. The river here forms a series of rapids, descending 22 feet in 2 miles; except during floods steamboats pass these by a canal. The city is handsomely built, with wide and regular streets, on a plain sloping up from the river. It has a Roman Catholic cathedral, a law school, four medical colleges, colleges of dentistry and of pharmacy, the state institution for the blind, &c. Louisville is the greatest market for tobacco in the world, and has large pork-packing establishments, distilleries, and tanneries, with manufactures of ploughs, furniture, castings, gas and water pipes, machinery, flour, and cement. The city is the terminus of a number of railway lines; the Ohio is crossed here by two railway bridges, one of them nearly a mile long. Louisville was founded in 1778, and in 1780 named in honour of Louis XVI. of France, whose troops were then assisting the Americans. A great part of the town, including the tobacco-market and the city-hall, was destroyed by a cyclone on 27th March 1890. General Zachary Taylor is buried close by. Pop. (1880) 123,758; (1890) 161,005; (1910) 223,928.

Loulé (*Loo'lay*), a town in the S. of Portugal, 10 miles N. by W. of Faro (on the coast). It is surrounded by old Moorish walls. Pop. 24,448.

Lourdes (*Loord*), a place of pilgrimage in the French dep. of Hautes Pyrénées, 12 miles SSW. of Tarbes by rail; pop. 7000. The town nestles at the foot of a high isolated rock rising in a plain which is bounded on the south by the foothills of the Pyrenees. Here, in a niche above a cave, the Blessed Virgin is said to have appeared on 11th February 1858 to a poor girl fourteen years old, called Bernadette Soubirous; the apparition was seventeen times repeated during the succeeding six months. A spring rising from the spot, which was hitherto unknown to exist, was endowed with miraculous powers; and many miracles were reported. A great basilica (1876) now marks the spot, and on a level with its crypt is the church of the Rosary (1889).

Lourenço Marquez. See LORENZO MARQUES.

Louth (hard *th*, as in *loth*), a municipal borough of Lincolnshire, on the rivulet Lud, at the foot of the Wolds, 27 miles ENE. of Lincoln, contains a beautiful parish church in the Perpendicular style, built in the 13th and rebuilt in the 15th century, with an octagonal spire (1501) 288 feet in height, 'one of the noblest in England,' and an Edward VI. grammar-school, pupils of which have been Tennyson, Franklin, and Hobart Pasha. Ruins of Louth Park Abbey, built by the Cistercians in 1139, exist 1½ mile E. of the town. Iron-foundries, carpet-factories, breweries, and carriage-works are in operation. Louth is connected with the Humber by a canal, dug in 1761. Pop. (1851) 10,467; (1911) 9880. See Goulding's *Louth Corporation Records* (1892).

Louth (soft *th*, as in *loathe*), a maritime county of Leinster, the smallest in Ireland, is washed for 49 miles on the east, from Carlingford Lough to the Boyne, by the Irish Sea. The average width is 10 miles. Pop. (1841) 128,240; (1911) 63,665. Its area is 202,123 acres, of which 40 per cent. is under grass. The surface is flat, except for a range on the north, which culminates in Carlingford Mountain (1935 feet), overlooking Carlingford Lough. Coarse linens are manufactured. The fisheries are valuable, especially the oyster-fishing in Carlingford Lough. The chief towns are Drogheda, Dundalk, and Ardee. There are two round-towers, at Monasterboice and at Dromiskin. At Mellifont is a beautiful ruined abbey. In Drogheda other ruined abbeys are still visible, as also at Louth and Carlingford. But the most interesting of all the relics of antiquity are the sculptured crosses of Monasterboice, the largest 18 feet high. The county returns two members.

Louvain (*Loo-van*^{g}; Ger. *Löwen*, Flemish *Leuven*), a city in the Belgian province of Brabant, 19 miles by rail E. of Brussels. In the 14th century it was rich, prosperous, and large (200,000 inhabitants), due to its cloth manufactures and its position as the capital of Brabant (from 994). In 1382 the townsmen revolted against their rulers, and the harsh punishment meted out to them drove large numbers away to England. The town was the seat of a celebrated university (1426–1797), with 6000 students in the 16th century. Reconstituted in 1817, it is still a Roman Catholic university, with about 1600 students, and a library of 250,000 volumes. A severe blow was struck at Louvain's prosperity by the plague in the 16th century. The modern industry is confined chiefly to bell-founding, brewing, and the manufacture of leather, paper, lace, starch, and chemicals. The town-house is a fine Gothic building (1448–69); the church of St Peter has a beautiful flamboyant rood-loft, a wrought-iron chandelier by Quentin Matsys, and some good pictures; in St Gertrude's Church are exquisite carved oak stalls. The Weavers' Hall (1317) was appropriated by the university in 1679. Pop. (1877) 33,917; (1910) 41,923.

Louviers (*Loov-yay'*), a town in the French dep. of Eure, 16 miles S. of Rouen, has a Gothic cathedral (13–15th c.), and celebrated cloth (since 1681) and ticking manufactures. Pop. 10,000.

Lovedale, an important educational and mission station in the eastern part of the Cape Province, 40 miles W. of King William's Town. It was founded in 1841, and has been supported by the United Free Church of Scotland.

Low Archipelago, the most easterly group of Polynesian islands, known also as Paumotu, Tuamotu, Pearl or Dangerous Islands. They are about eighty in number, very flat and thinly peopled (8000 in all), and surrounded by coral atolls. Since 1846 they are under a French protectorate. There are rich pearl-fisheries.

Low Countries. See HOLLAND, BELGIUM.

Lowell, a manufacturing city of Massachusetts, on the Merrimac River (mostly on the south bank), 25 miles N. by W. of Boston. The site is uneven and hilly, and the river falls 33 feet, affording great hydraulic power. There are many large cotton and woollen factories; 2,500,000 yards of cotton are produced here in a week. Among the other manufactures are leather, paper, and iron goods, chemicals, carriages, &c. Lowell was incorporated in 1826. The operatives were for years gathered from the rural districts fifty or a hundred miles round, and lived in boarding-houses owned by the corporations, and kept under strict management. Foreign emigration has brought a large resident manufacturing population. Evening and technical schools, reading-rooms, a free library, and lectureships are maintained, and unusual attention is paid to the well-being of the work-people. The painter Whistler was a native. Pop. (1880) 59,485; (1910) 106,294.

Lowestoft (*Loa'stoff*), a municipal borough and seaport on the Suffolk coast, 118 miles NE. of London by rail and 49 NNE. of Ipswich, has of late years rapidly grown in favour as a watering-place, its healthfulness and the picturesqueness of its neighbourhood, combined with its easy means of access to the Broads (q.v.), all tending to its popularity. The older part of the town, which lies to the north, is built on a cliff facing the sea, on its summit being a lighthouse (1874) 123 feet above the sea-level, whilst at its base, on the Ness—the most easterly point of land in England—stands another lighthouse (1866). The modern part of the town, which has a fine esplanade 800 yards long, extends southwards into the parish of Kirkley, and is separated from the old town by the harbour, formed partly by two piers extending seawards 1300 feet, and partly by Lake Lothing, a piece of water stretching inland two miles: adjoining the harbour is a dock (1883) with a depth of water at low tide of 13½ feet, and extensive fish-markets (1865–83), the property of the Great Eastern Railway. On the new South Pier is a splendid pavilion, opened in 1890. Other features of interest in the town include the parish church (of which Whiston, the mathematician, and Potter, the translator of Greek plays, were former vicars), 183 feet in length, and surmounted by a tower and spire 120 feet high, dating from the first half of the 14th century; town-hall (1857), noticeable for its stained-glass windows; hospital (1882); and Bellevue Park (1874), not far from which was found the clay formerly used in making Lowestoft china. The principal incidents in the history of the town have been visitations of the plague in 1349, 1547, 1579, and 1603; its occupation in 1643 by Cromwell; its partial destruction by fire in 1644; and a great naval defeat of the Dutch off the coast on the 3d June 1665. Pop. (1841) 5304; (1911) 33,777. See works by Gillingwater (1790) and Nall (1866).

Lowther, a Westmorland stream, flowing 17 miles to the Eamont (a tributary of the Eden), at Brougham Castle. Lowther Castle (1810), 4 miles S. of Penrith, is the seat of the Earl of Lonsdale.

Lozère (*Lozehr'*), a dep. in the south of France, derives its name from Mont Lozère, one of the summits of the Cévennes. It comprises the arrondissements of Mende (the capital), Florac, and Marvejols. Area, 1996 sq. m.; pop. (1872) 135,190; (1911) 122,738. The dep. forms the south-east extremity of the central uplands of France, and embraces the highest peaks of the Cévennes (Pic de Finiels, 5584 feet).

Lualaba. See Congo.

Lübeck, a free city of Germany, the former head of the Hanseatic League, and now an important shipping town, stands on the river Trave, 12 miles from the Baltic, and 40 by rail NE. of Hamburg. This city was founded 1143; Henry the Lion, Duke of Saxony, gave it a charter, and built the cathedral. Frederick Barbarossa greatly enlarged its privileges, and Frederick II. made it a free city of the empire. The city became the commercial metropolis of the Baltic and northern Europe, but decayed with the other Hanseatic cities. Full administrative rights were not conferred upon the burghers until 1848; now the constitution, embracing a senate (14 members) and a representative assembly (120 members), is thoroughly democratic. The French held Lübeck almost uninterruptedly from 1806 to 1815. In 1866 it joined the North German Confederation. Lübeck possesses 115 sq. m. of territory, including the port of Travemünde, near the river's mouth. The industries include shipbuilding, the manufacture of cigars and chemicals, brewing, brandy-distilling, soap-boiling, and iron-founding. Lübeck rivals Hamburg in trade with Denmark and the Baltic countries. The imports reach an annual value of about 9½ millions, and the exports of 8 millions—mostly transit business. The port is entered annually by some 3300 vessels of 831,000 tons. The Trave was deepened to 15 feet in 1878–82. The churches include St Mary's (1170; rebuilt 1276–1310), with two towers 407 feet high; the cathedral (1173—14th c.), with a tower 394 feet high; St James's, built before 1227, and St Peter's, before 1163. The town-house is the most notable secular building. There are a school of navigation, a library of 98,000 vols., ethnographic, antiquarian, zoological, and art collections, &c. Pop. (1875) 44,799; (1910) 116,599.

Lublin, the capital of a Polish government, on a sub-tributary of the Vistula, 96 miles by rail SE. of Warsaw. It has a 13th-century cathedral, and was plundered by the Mongols in 1240, 1344, and 1477. From the end of the 14th to that of the 16th c. it was the chief commercial town between the Vistula and the Dnieper. There are manufactures of tobacco, beer, candles, soap, &c., and a large trade in corn and wool. The population is over 60,000.—Area of *government*, 6500 sq. m.; pop. 1,510,000.

Lubnaig, Loch, a Perthshire loch (4 miles × 3 furlongs; 405 feet), 3¾ miles NW. of Callander.

Lucan, a village on the Liffey, 9 miles W. of Dublin. Pop. 1000.

Lucania, a province of ancient Italy, south-east of Calabria, and bordering on the Gulf of Tarentum. It corresponds nearly to the present province of Potenza and part of Salerno.

Lucca (*Look'ka; anc. Luca*), chief town of an Italian province, is situated in a plain, bounded by picturesque hills and watered by the Serchio, 14 miles by rail NE. of Pisa. 'Lucca the Industrious' has a great trade in olive-oil and silk. The cathedral, begun in 1063, has a cedar crucifix reputed to have been brought hither in 782. There are nearly forty other churches, some dating from the 7th and 8th centuries. A splendid aqueduct (1820) supplies the town with water from the Pisan hills. The municipal buildings (1578) contain valuable paintings. Lucca was a bishopric as early as 347, and in 1726 was made an archbishopric. The environs abound in delightful villas. In a charming valley, 16 miles N., are the mineral baths of Lucca (96° to 136° F.), which have been famous since the 15th century. Pop. 76,000.

Luce Bay, Wigtownshire, measures 18½ miles from the Mull of Galloway to Burrow Head, and penetrates 16 miles.

Lucena (*Loo-thay'na*), a town of Spain, 36 miles S. by E. of Cordova. Pop. 21,000.

Lucera (*Loo-tchay'ra*; anc. *Luceria*), a town of southern Italy, 12 miles by rail NW. of Foggia, has a cathedral (1302), and a ruined castle of Frederick II. Pop. 19,000.

Lucerne (usu. *Loo-sern'*; Ger. *Luzern*), the capital of a Swiss canton, 59 miles SE. of Basel, 147 SSE. of Strasburg, and 177 NNW. of Milan by the St Gothard railway. It is beautifully situated where the Reuss issues from the Lake of Lucerne, opposite Mount Pilatus, and is partly surrounded (on the north) with mediæval towers. On a rock in the Reuss is an old tower, said to have been a lighthouse (*lucerna*) in Roman times, whence the name of the town. Outside one of the gates is the Lion of Lucerne, hewn (1821) out of the solid rock after a model by Thorwaldsen, a monument to the Swiss guards who perished at the Tuileries in 1792. Near by is the Glacier Garden, with rocks illustrating the action of ice. Pop. 39,152.—The *canton* has an area of 579 sq. m. and a pop. (1888) of 135,722, mainly Catholic. The highest point is 6998 feet, a peak of Mount Pilatus.

THE LAKE OF LUCERNE, called also *Vierwaldstättersee* ('Lake of the Four Forest Cantons'—Uri, Unterwalden, Schwyz, and Lucerne), is one of the most beautiful in Europe. In shape it resembles a cross with a crumpled stem; its shores are mostly steep and rocky. Length from Lucerne to Flüelen, 23 miles; average breadth, 1½ mile; area, 44 sq. m.; greatest depth, 702 feet. The lake is associated with William Tell.

Luckenwalde (*Look'envalda*), a town of Prussia, 31 miles by rail SSW. of Berlin. Pop. 30,000.

Lucknow (*Lákhnao*), historic capital of the province of Oudh, and the fourth largest city in India, on the river Gumti, 42 miles by rail NE. of Cawnpore and 199 NW. of Benares. The appearance of magnificence and splendour which the city presents when seen from the outside is not borne out by close internal inspection, though a vast improvement has been effected since the Mutiny. The chief architectural glory of the place is the Imambara or mausoleum of Asaf-ud-Daulá, the fourth Nawab, who did much to embellish Lucknow. This edifice, built in 1784, stands within the Machi Bhawan fort (built by Asaf's predecessor), and is now converted into a British arsenal. The Rúmi Dorwáza, a grand and massive gateway, leading out of the fort, the magnificent Residency palace, and the country palace of Bibiápur, were all erected by the same prince. The Jama Masjid or chief mosque, and the huge palaces of Chattar Manzil, Kaisar Bagh, Farhat Baksh, four royal tombs, and an observatory (headquarters of the rebels during the Mutiny) are the most noteworthy amongst the remaining public buildings, though the palaces, debased in style and gaudily decorated, are remarkable only for their great size. The educational establishments embrace Canning College, established in 1864; the Martinière College, in which 120 soldiers' sons are educated and clothed; and more than two dozen mission and other schools. The staple native industry is gold and silver brocade, besides muslins and other light fabrics, embroidery, glass, clay-moulding, shawls, jewellery, and paper. There are here extensive railway workshops. Lucknow is a busy commercial town, trading in country products. Pop. (1911) 259,798.

Originally a village called Lakshmanpur, founded by a brother of Rama Chandra, the hero of the epic *Ramayana*, the city first rose into importance as the capital (1732) of the independent state of Oudh; it is now the capital of a district and of a division in the united provinces of Agra and Oudh. Lucknow was the scene of stirring events during the mutiny of 1857—its defence by Sir Henry Lawrence, its relief by Havelock and Outram, and its final succour by Sir Colin Campbell.

Luçon, a French episcopal city (dep. La Vendée), 71 miles SSE. of Nantes. Pop. 6000.

Lüdenscheid, a town of Westphalia, 19 miles ESE. of Elberfeld-Barmen, is the seat of numerous hardware manufactures. Pop. 32,300.

Lüderitzland, a name given to Angra-Pequena (q.v.) and the adjoining territory.

Ludgvan, a Cornish village, 3 miles NE. of Penzance. Pop. of urban district, 2200.

Ludhiana (*Loodiahna*), a town of the Punjab. 8 miles from the south bank of the Sutlej. It was founded in 1480, and is now a thriving cornmart, with manufactures of Cashmere shawls, scarves, cottons, turbans, furniture, and carriages. Pop. 50,000.

Ludlow, a market-town and municipal borough of Shropshire, at the Corve's influx to the Teme, 28 miles S. of Shrewsbury. It is a very old and interesting place, with two noble monuments of antiquity. First, there is the massive Norman keep, 110 feet high, of the castle, where Prince Arthur wedded Catharine of Aragon, and died less than five months afterwards; where, in the banqueting-hall, Milton produced his *Comus*; and where, too, Butler wrote *Hudibras*. Captured by King Stephen, the Lancastrians, and the Roundheads, it was finally dismantled in 1689. Secondly, there is the cruciform collegiate church (restored in 1863–91), Perpendicular in style, with a tower 130 feet high. The grammar-school, founded in 1282, and refounded in 1552, is almost the oldest in the kingdom; and one of seven gates still remains. From Edward IV.'s reign till 1867 Ludlow returned two members, then one till 1885. S. J. Weyman, novelist, was born here. Pop. (1851) 4730; (1911) 5926. See works by T. Wright (1826–69) and O. Baker (2d ed. 1889).

Ludwigsburg (*Lood'vigsboorg'*), a town of Würtemberg, 8 miles N. of Stuttgart. It grew up round a ducal hunting castle (1704), and has a military school and a royal castle, with picture-gallery and splendid gardens. Pop. 25,000. D. F. Strauss and Kerner were natives.

Ludwigscanal. See DANUBE.

Ludwigshafen (*Lood'vigs-hah'fen*), a town of the Bavarian Palatinate, on the Rhine's left bank, opposite Mannheim. Granted town rights only in 1859, it has grown rapidly owing to its manufactures (soda, aniline dyes, wagons, &c.). Pop. (1864) 3911; (1875) 12,093; (1910) 83,301.

Lugano (*Loogah'no*), a town in the Swiss canton of Ticino, on the NW. shore of the Lake of Lugano, 49 miles by rail N. by W. from Milan. In appearance the place is thoroughly Italian; from Monte Salvatore (2982 feet) a magnificent view may be obtained. Pop. 14,000.—The LAKE OF LUGANO, also called CERESIO, lies at the southern foot of the Alps, 889 feet above sea-level. Its length is 14½ miles, average breadth 1¼ mile; area, 19½ sq. m.; maximum depth 915 feet, and average depth 246.

Lugar, an Ayrshire village, with ironworks, on

Lugar Water, 1½ mile ENE. of Cumnock. Pop. 3800.

Lugdunum. See LYONS, LEYDEN.

Luggie, a stream, besung by David Gray, flows 11 miles W. to the Kelvin at Kirkintilloch.

Lugnaquilla. See WICKLOW.

Lugo (*Lucus Augusti* of the Romans), capital of a province of NW. Spain, on the Minho, 72 miles by rail SE. of Corunna. Still walled, it has a cathedral (1129–77), and manufactures of linen and leather. Its warm sulphur baths were known to the Romans. Pop. 28,000.

Lugo, a town of Italy, 18 miles by rail W. of Ravenna. Pop. 27,500.

Luku'ga. See TANGANYIKA.

Luleå, a town of Sweden, at the mouth of the river Luleå, on the Gulf of Bothnia. It is a great iron-ore exporting port. Pop. 10,000.

Lule Burgas, a village of Thrace, 87 miles WNW. of Constantinople, where the Bulgarians defeated the Turks (1912).

Lulworth, EAST and WEST, two Dorset coast-parishes, 5¼ and 8½ miles SW. of Wareham. Lulworth Castle is the seat of the Catholic Welds.

Lumsden, an Aberdeenshire village, 9¾ miles NW. of Alford. Pop. 400.

Lunawara, a protected state in Gujarat. Area, 388 sq. m.; pop. 75,450. The capital, Lunawara, is 60 miles N. by W. from Baroda. Pop. 9059.

Lund (*Londinum Gothorum*), a city of Gothland, in the extreme south of Sweden, by rail 374 miles SW. of Stockholm and 10 NE. of Malmö. In the 10th century it was a large and powerful city, was made a bishopric in 1048, and an archbishopric in 1104. It became the chief seat of the Danish power in the Scandinavian peninsula, and capital of the Danish kingdom, with a pop. of 200,000. But after the Reformation (1536) the city began to decay, and sank to a mere village in the 17th century. The fine Romanesque cathedral, with its imposing crypt, dates from the 11th century. Lund owes its revival to the founding there of a university in 1668, which now has about 800 students, a library of 150,000 volumes and 3000 MSS., a zoological museum, and a botanic garden. Pop. 20,500.

Lundy (Scand., 'grove island'), a granitic island of Devonshire, in the mouth of the Bristol Channel, 11¾ miles NNW. of Hartland Point, 17 NW. of Clovelly, 24 W. of Ilfracombe, and 30 SSE. of St Gowan's Head in Wales. It measures 3½ miles by 1; has rocky and precipitous shores, with only one landing-place on the south side; and attains an altitude of 525 feet. Here, near the southern end of the island, is a lighthouse, built in 1820. The antiquities include prehistoric kists, remains of round towers and a chapel, and the ruined castle of the Mariscoes (11th to 14th centuries), from whose time on into the 17th century Lundy was a stronghold successively of pirates, buccaneers, privateers, and smugglers. It figures in Kingsley's *Westward Ho!*; was the death-place of 'Judas' Stukely; was garrisoned till 1647 for Charles I.; and in 1834 was purchased for £9870 by the Heaven family. The population is about 50. See Chanter's *Lundy Island* (1877).

Lune, a river of Westmorland and Lancashire, flowing 45 miles SW. and S. to the Irish Sea, 6 miles SW. of Lancaster.

Lüneburg (*Lü'ne-boorg*), a town of Hanover, on the river Ilmenau, 31 miles by rail SE. of Hamburg. The 15th-century church of St Michael contains the tombs of the Lüneburg princes. The five-aisled church of St John dates from the 14th century, is pure Gothic in style, and has a tower 371 feet high. The mediæval town-house is adorned with old pictures and stained glass. A salt-mine, discovered in 906, still has an annual yield of over 21,000 tons. There are also a gypsum-mine, ironworks, chemical manufactories, &c. Lüneburg lampreys are well known in Germany. Pop. 27,665. Lüneburg acquired importance after the founding of the Benedictine monastery in 904, joined the Hanseatic League in the 14th c., and was the capital of an independent duchy. But it lost most of its privileges in the 16th c., and in the 17th suffered much from the Swedes and their enemies. From the Brunswick-Lüneburg princely line, founded in 1235, is descended the British royal family.—South of Lüneburg stretches for 50 miles the Lüneburg Heath, a grazing-ground for sheep.

Lunel, a town in the south of France, 14 miles by rail NE. of Montpellier. Pop. 6494.

Lunéville (*Lu-nay-veel'*), a town in the French dep. of Meurthe-et-Moselle, at the confluence of the Meurthe and the Vezouse, 20 miles by rail SE. of Nancy. It was a residence of the Dukes of Lorraine; their palace is now a cavalry barrack, this town being a great cavalry station. Here was signed the peace of Lunéville, on February 9, 1801, between Germany and France. The industry [illegible] gloves, hosiery, cottons, &c. Pop. [illegible]100.

Lun[illegible] or LANKA (Sansk., 'island'), the ancient [illegible] for Ceylon. Lunkah cheroots are made in the Godavari delta.

Lurgan, a town of County Armagh, 20 miles SW. of Belfast by rail. It manufactures cambrics, lawns, damasks, and diapers. Pop. 12,600.

Luristan, a mountainous province in the west of Persia. Area, 15,060 sq. m.; pop. about 300,000.

Lurlei. See LORELEI.

Lusatia (*Lausitz*), a region in Germany, on the borders of Bohemia, now belonging in part to Saxony and in part to Prussia.

Lushai Hills, a hill-country on the borders of Assam and Burma.

Lusignan (*Lü-zin-yang*), a picturesque town in the French dep. of Vienne, 17 miles SW. of Poitiers. It has a fine 11th-century church, but its castle, associated with the fairy Melusine, was razed by the Catholics in 1574. Pop. 2284.

Lusitania. See PORTUGAL.

Luss, a village on the W. side of Loch Lomond, 12 miles N. of Dumbarton.

Luton, a market-town of Bedfordshire, on the little Lea, among the Chiltern Hills, 31 miles by rail NNW. of London. St Mary's Church, mixed Decorated and Perpendicular in style, is a noble structure, with a flint-work tower 90 feet high. Luton is the chief seat in England of the straw-plait (for hats, bonnets, &c.), an industry which dates from the reign of James I., and employs 20,000 persons here and in the neighbourhood. The Plait-hall (1869) is a fine building; and there are also a town-hall, corn exchange, people's park, &c. Luton was re-incorporated as a municipal borough in 1876. Pop. (1851) 10,648; (1911) 50,000. See F. Davis, *History of Luton* (1855).

Lutterworth, a small town of Leicestershire, on the Swift, 8 miles NNE. of Rugby. The fine old church contains the pulpit and other relics of Wyclif, who was rector from 1374 till his death on 28th December 1384. He was buried here, but in 1428 his remains were dug up and burned, and the ashes cast into the Swift. 'This brook conveyed his ashes into Avon, Avon into Severn, Severn into the narrow seas, they into the main ocean; and thus the ashes of Wyclif are the emblem of his doctrine, which now is dispersed all the world over.' Pop. of parish, 1900.

Lüttich. See LIÉGE.

Lüttringhausen, a town of Rhenish Prussia, 5 miles SE. of Elberfeld. It manufactures cloth, calico, silk, brandy, &c. Pop. 15,000.

Lützen, a town of 4000 inhabitants, in Prussian Saxony, 9 miles SE. of Merseburg. Two great battles were fought in its vicinity—the first, a brilliant victory of the Swedes, who lost, however, Gustavus Adolphus, 6th November 1632; the second, on 2d May 1813, a victory of Napoleon over the Russians and Prussians.

Luxemburg (Fr. *Luxembourg;* old Ger. *Lützelburg*), since 1815 an independent grand-duchy, wedged in between France, Prussia, and Belgium. It consists of a plateau, furrowed with valleys, and connecting together the uplands of Lorraine, the Forest of Ardennes, and the Eifel; nearly all its streams flow to the Moselle, which for some 20 miles forms its eastern border. The country is well wooded, yields wheat and wine, and is rich in iron ore. Area, 998 sq. m.; pop. 260,000, nearly all Catholics, and of Low German stock, though French is the language of the educated classes. For comm[illegible] purposes Luxemburg is included in the German customs union. The king of Holland was grand-duke till 1890, then the Duke of Nassau; [illegible] his death in 1912 his daughter became grand-duchess.—The Belgian province of Luxemburg, which down to 1839 formed part of the grand-duchy, constitutes the south-eastern extremity of the kingdom of Belgium; area, 1706 sq. m.; pop. 235,000. Chief town, Arlon. — LUXEMBURG, the capital of the grand-duchy, by rail is 42 miles N. of Metz and 32 SW. of Trèves. Its situation has often been compared to that of Jerusalem: the city stands on a rocky platform, connected with the neighbouring country only on the west, and elsewhere engirt by a steep valley, 200 feet deep, in which nestle the industrial suburbs of Klausen, Pfaffenthal, and Grund. The intermediate gorges are crossed by fine viaducts. The Spaniards, Austrians, French, and Dutch, who successively held possession of the town, increased and strengthened its fortifications, hewn, like those of Gibraltar, in great part out of the solid rock. But they were demolished in accordance with the treaty of London of 1867, and the site of the walls has been laid out as beautiful gardens. There are in the town the ruins of Count Mansfeld's palace, the cathedral (1613), the government house, and the athenæum. There are manufactures of cotton, cloth, and brandy, and a trade in woollen and leather goods. Pop. 21,000.

Luxor. See THEBES.

Luzern. See LUCERNE.

Luzon', the largest of the Philippines (q.v.).

Lybster, a fishing-village of Caithness, 13½ miles SW. of Wick; pop. 600.

Lycaonia, anciently a country in Asia Minor, bounded by Cappadocia, Galatia, Pisidia, Isauria, and Cilicia. Its capital was Iconium.

Lycia, a country on the south coast of Asia Minor, bounded by Caria, Phrygia, Pisidia, and Pamphylia. It is a mountainous region, formed by lofty spurs of the Taurus, which reach 10,000 feet in height; the valleys are very fertile.

Lydd, a borough of Kent, 3½ miles SW. of New Romney, gives name to lyddite. Pop. 3000.

Lydenburg, a mining-village in the Transvaal, 180 miles NW. of Delagoa Bay.

Lydia, anciently a country in the W. of Asia Minor, celebrated for its fruitful soil and its mineral wealth, particularly for the gold of the river Pactolus. Sardis was the capital, and Crœsus its last king.

Lyme Regis, a seaport and watering-place of Dorsetshire, at the mouth of the Lyme rivulet, 5 miles SE. of Axminster and 23 W. of Dorchester. The Cobb breakwater, dating from the 14th century, was reconstructed by government in 1825–26. Chartered by Edward I., and incorporated by Elizabeth, Lyme returned two members till 1832, and then one till 1868. It beat off Prince Maurice (1644), and was Monmouth's landing-place (1685). Natives have been Sir George Somers, Captain Coram, and Miss Mary Anning, the discoverer of the Ichthyosaurus and Plesiosaurus in the Lias rocks here, which are largely quarried. Pop. 2800. See Roberts's *History of Lyme Regis* (1834).

Lymington, a watering-place and municipal borough of Hampshire, at the mouth of the Lymington River in the Solent, 12 miles (by a branch-line 18) SW. of Southampton. The salt-works belong to the past; and yacht-building is now the principal industry. It commands fine prospects of the Isle of Wight, and its vicinity abounds in charming scenery. Till 1867 it returned two members, then till 1885 one. It is much frequented for sea-bathing. Population, 4400. See works by Garrow (1825), Grove (1835), and King (1879).

Lynchburg, a city of Virginia, lies in a picturesque mountain-region, on the James River, 124 miles by rail W. by S. of Richmond. It is a thriving place, with the electric light and electric trams, and has manufactories of nails, cotton, iron, farming implements, furniture, &c., besides tobacco, which is the staple of the town's trade. Pop. 30,000.

Lyndhurst, a Hampshire village, the capital of the New Forest, 9 miles SW. of Southampton. Its church (1863) is a brick Early English structure, with conspicuous spire, good stained glass, a monument by Flaxman, and a fresco by Sir Frederick Leighton of the 'Ten Virgins.' Near it is the Verderers' Hall, with Rufus's stirrup. Pop. of parish, 2400.

Lynmouth. See LYNTON.

Lynn, or KING'S LYNN, a seaport, parliamentary and municipal borough of Norfolk, at the mouth of the Great Ouse, 48 miles WNW. of Norwich and 99 N. by E. of London. It still retains traces of the ramparts and a fosse, which once guarded it on the landward side, and abounds in picturesque old timbered houses, ornamented with carved work. Of its four churches the principal are St Margaret's and St Nicholas. Other features of interest are the octagonal Red Mount Chapel; the hexagonal tower of the Grey Friars; a grammar-school, founded in or before Henry VIII.'s reign, at which Eugene Aram was usher; a guildhall, in which is preserved the Red Register of Lynn, one of the earliest paper books in existence; custom-house (1683); hospital (1834–47); museum (1854); library (1883); technical schools (1894); and two extensive docks (1869–84), admitting vessels drawing 21 feet at spring-tides. Trade is carried on in corn, oilcake, coals, and timber, and shrimps are caught and sent to London. In Edward I.'s reign Lynn was one of the principal ports of the kingdom; in 1474 the Hanse merchants had a factory or 'steelyard' here; and in 1549 it was a flourishing seat of cloth manufacture. In that year, during Ket's rebellion, one body of the insurgents was encamped here, and in 1643 the town capitulated to the parliamentary force after three weeks' resistance. King John (who in 1204 granted the town its first charter), the dowager-queen Isabella (see CASTLE RISING), Edward III., Henry VI., Edward IV., Henry VII., and Oliver Cromwell all visited Lynn, which was the birthplace of Capgrave the chronicler, and the residence of Dr Charles Burney. Pop. 20,200. See Richards's *History of Lynn* (2 vols. 1812).

Lynn, a city and port of Massachusetts, on Massachusetts Bay, 10 miles NNE. of Boston. Most of the houses are built of wood; among them are many handsome villas belonging to Boston merchants. The chief industry is the manufacture of ladies' and children's shoes, 10,000,000 pairs sometimes in one year. There are also large tanneries. Though founded in 1629, Lynn became a city only in 1850. A great fire in 1889 destroyed property worth $5,000,000. Pop. (1880) 38,274; (1910) 89,336.

Lynton and **Lynmouth**, two villages of North Devon, on the Bristol Channel, 18 miles NE. of Barnstaple. Lynmouth stands close to the sea, and Lynton half-way up the cliff, 428 feet above. They were 'discovered' in 1883, and have since been developed, now possessing a cliff-railway 1000 feet in vertical ascent, electric light, nine hotels, &c. Shelley stayed at Lynmouth in 1812, and Southey called it 'the finest spot, except Cintra and Arrabida, I ever saw.' Pop. 1800.

Lyonesse. See SCILLY ISLANDS.

Lyonnais, a former province of France, coinciding nearly with the present deps. of Rhone, Loire, Haute-Loire, and Puy-de-Dôme.

Lyons (Fr. *Lyon;* anc. *Lugdunum*), the third city of France, stands at the confluence of the Rhone and the Saône, by rail 315 miles SSE. of Paris and 218 N. by W. of Marseilles. The commercial and fashionable quarters of the city lie on the long narrow tongue of land between the rivers, and are connected with the suburbs beyond by more than twenty bridges. This central part of Lyons contains many narrow streets, with tall gloomy houses; but much has been done to lighten it since 1852 by the making of long straight, wide streets, and the opening up of squares. In this district stand the museum (1667), with valuable Roman antiquities, a library of 120,000 vols. and 1500 MSS., and art collections; the church of St Martin d'Ainay, dating from the 10th century; St Nizier Church, at first the cathedral, a fine 15th-century Flamboyant building; the graceful town-house (1646); the museum of arts and industry; the academy, with five faculties; the hospital, founded in the 6th century, though the present building dates only from 1773; and the arsenal. To the north lies the suburb of La Croix Rousse, where the silk-weavers dwell. Across the Saône, and on its right bank, is the steep, high suburb of Fourvières, the *Forum Vetus* of Trajan, whose summit (410 feet) is now crowned by the church of Notre Dame (the new church dates from 1872–80). Here is the miracle-working image of our Lady of Fourvières that is believed to have preserved the city from the cholera in 1832, 1835, and 1850. From its tower, which is surmounted by a gilded statue of the Virgin, 18 feet high, a view can be had of the distant Alps. On this elevated site too stands the church of St Irenæus, in the crypt of which are preserved what purport to be the bones of 19,000 Christian martyrs who perished in the persecution by Severus. At the foot of the hill, next the Saône, are the archiepiscopal cathedral of St John, of the 13th and 14th centuries, with magnificent stained-glass windows and a celebrated clock of 1598; the palace of the archbishop, who ranks as primate of France; and the law-courts. On the left bank of the Rhone, which is so low that it has to be protected with embankments, is the handsome new suburb of Les Brotteaux, terminated on the north by the park of the Tête-d'Or, in which are an oriental museum, a zoological collection, and a fine botanical garden. Lyons possesses also a Roman Catholic University with four faculties, a first-class veterinary school, a school of art with 1200 pupils, of great value for the silk manufactures, a school of the industrial arts, a municipal library of 180,000 vols., and a silk-conditioning house. The city is a fortress of the first rank, being defended by a double ring of forts. Pop. (1872) 301,868; (1901) 441,799; (1911, of commune) 523,796. The staple industry is the silk; it is computed that there are in all, within the city and its environs, from 75,000 to 85,000 hand-looms and 20,000 power-looms employed in this manufacture. Silk-dyeing and printing give employment to nearly 4000 workmen; 25,000 more are engaged in the various chemical industries (dyes, starch, candles, soap), machinery-making establishments, foundries, brass-works, fancy-wares, gold and silver goods, hats, paper, mathematical instruments, &c. The position of Lyons makes it a great emporium of trade between central and southern Europe. Besides importing silk raw and exporting it manufactured, chiefly to Great Britain and the United States, cotton is imported from America and Egypt, and a large business done in cloth and linen, chestnuts, coal, charcoal, cheese, and wine and spirits. The list of notable persons born in Lyons includes Germanicus and the Roman emperors Claudius and Caracalla, Jules Favre, Say, Suchet, the De Jussieus, Ampère, Mme Récamier, Delorme, Meissonier, and Jacquard.

The Romans settled a colony here in 43 B.C. and made it the starting-point for their network of highways through Gaul. The introduction of the silk industry must be set down to Francis I.'s credit. The Reformation, entering from Geneva, had a short but violent reign; the emigration of the Huguenots struck a blow at the industrial prosperity of the town from which it took long to recover. In 1789 the city embraced the cause of the Revolution, though royalist feeling was also strong here. In 1792 it refused obedience to the National Convention; in revenge it was besieged, captured, its buildings destroyed, its name changed (till 1794) to Ville-Affranchie, and 6000 of its citizens slain. Trade riots in 1831, 1834, and 1849 assumed very formidable dimensions; and since the war of 1870 Lyons has been a focus of red republicanism.

Lys, or LEYE, flows 130 miles NE. to the Scheldt at Ghent.

Lytham, a Lancashire watering-place, on the Ribble estuary, 14 miles W. of Preston; pop. 9200.

Lyttelton (pop. 5000), the port of Christchurch (q.v.), N.Z.

MAAM, a locality in County Galway, in a fine pass near the NW. end of Lough Corrib. To the west are the Maamturk Mountains; 8 miles N. is Maamtrasna (2207 feet high), giving name to a district west of Lough Mask.

Maas. See MEUSE.

Maastricht. See MAESTRICHT.

Mablethorpe, a Lincolnshire coast-village, 13 miles by rail (1888) SE. of Louth, with good sands and a submerged forest. Pop. 1200.

Macao (*Ma-kâ'o*), a Portuguese settlement on the south coast of China, and on the west side of the Canton River estuary, Hong-kong being 40 miles distant on the opposite side. The settlement occupies a small peninsula projecting from the SE. island of Hiang-shang. The islands Colovane and Taipa also belong to the settlement, whose total area is 4½ sq. m. and pop. 75,000 (less than 5000 Portuguese, the rest mostly Chinese). The principal public buildings are the cathedral and churches. Great part of the revenue is derived from licensed gambling-houses. The Portuguese obtained permission to settle in Macao in 1557, but the Chinese exacted an annual ground-rent until 1886. The anchorage is defective; large vessels cannot approach nearer than six miles. Since the rise of Hong-kong the commerce of Macao has suffered severely. Shortly after it was declared a free port (1845) it became the headquarters of the coolie trade, especially with Peru and Cuba; but in consequence of fearful abuses the British and the Chinese constrained the Portuguese government to abolish the traffic in 1873. The imports include kerosene, piece goods, yarn, and provisions; the exports, tea, oils, silk, and rice. In a grotto here Camoens is traditionally believed to have written his *Lusiad*.

Macassar, the most southern portion of Celebes, contains the chief town and port, Macassar (pop. 20,000), on the west coast.

Maccaluba, a small mud volcano, 138 feet in height, situated 6 miles N. of Girgenti in Sicily.

Macclesfield, an ancient municipal borough and important manufacturing town in the Macclesfield parliamentary division of Cheshire, is situated on the river Bollin, and on the western declivity of a range of low hills, 15 miles SSE. of Manchester and 167 NW. of London. Among its buildings are the fine old church of St Michael, founded by Queen Eleanor in 1278, the town-hall (1823–70), the infirmary (1872), and King Edward's grammar-school (1553), rebuilt in 1866, and reorganised in 1880, with an endowment of £2000 a year, which also supports a modern free school. Macclesfield has a public park of 16 acres (1852), public baths, a free library, a technical school, a school of science and art, &c. The old button trade belongs to the past, and the silk manufacture, established in 1756, is now the staple industry; cotton goods and smallwares are also manufactured, and there are dye-works and breweries. In the vicinity coal, slate, and stone are obtained. Macclesfield possesses nine charters (the first by Prince Edward, Earl of Chester, in 1261), and returned two members from 1832 till 1880, but was disfranchised in 1885. Population, 35,000. See works by Corry (1817) and Earwaker (1877).

Macduff. See BANFF.

Macedonia, an ancient kingdom, long part of Turkey, now Servian and Greek, lying NW. of the Ægean Sea, mountainous, with fertile plains. Philip II. became (338 B.C.) master of Greece; his son, Alexander the Great (356–323 B.C.), conquered half the known world. The present population is largely Bulgarian, with Greeks on the coast and in some districts, as well as Serbs, Vlachs, and Jews; the Turks are not numerous. In consequence of the oppression of the Christian population and the failure of Turkey to carry out promised reforms, there were troubles and threatened revolt in 1875–1912. In 1912–13 the country was conquered by the Balkan allies. Bulgaria losing her share by the war of 1913, Greece took the seaboard and Servia the inland part.

Maceio (*Masay'o*), a port of Brazil, the capital of Alagoas state, on a peninsula that shuts in the Lagoa do Norte from the sea. Pop. 40,000.

Macerata (*Matchayrâta*), a cathedral town of Italy, 44 miles S. of Ancona. Pop. 23,000.

Macgillycuddy Reeks, a mountain group in Kerry, west of the Lakes of Killarney; Carran-Tual (3414 feet) is the loftiest peak in Ireland.

Machrihanish, a bay on the west coast of Kintyre, 5 miles across from Campbeltown, famous for its golf links and as the wireless telegraph station (with tower over 400 feet high) for trans-Atlantic messages.

Machynlleth (*Ma-hun'tleth*), one of the Montgomery district of boroughs, on the Dovey, 21 miles NNE. of Aberystwith. Pop. 2000.

M'Keesport, a borough of Pennsylvania, on the Monongahela River, at the mouth of the Youghiogheny, 15 miles SE. of Pittsburgh. It has flour, saw, and rolling mills, tubing factories, glass-works, a distillery, &c. Natural gas is used. Pop. 43,000.

Mackenzie River, in North America, has its origin as the Athabasca (q.v.), in a Rocky Mountain lake in British Columbia, flows over 600 miles to Lake Athabasca, and 240 as the Slave River to Great Slave Lake (q.v.). As the Mackenzie River, it now conveys the waters of the Great Slave Lake to the Arctic Ocean at Mackenzie Bay, after a final course which is reckoned at 1045 miles, making a total river-system of nearly 2000 miles. Its great tributaries, the Liard and the Peace and Athabasca rivers, drain an immense fertile country, with abundance of petroleum, and some coal and lignite. It was discovered by Sir Alexander Mackenzie in 1789. The former Mackenzie territory, almost uninhabited, is now merged in the North-west Territories. It is largely forested, and the climate is excessively severe in winter.

Mackinaw, an island in the Strait of Mackinaw, between Lakes Huron and Michigan.

Mackinley, MOUNT, the highest mountain in North America, is in Alaska, in lat. 63° 4′ N. and long. 151° W., and is 20,464 feet high. It was climbed in 1913 by Messrs Stuck and Karstens.

Mâcon (*Mâ-kon*^{g}; *Matisco* of Cæsar), the capital of the French dep. of Saône-et-Loire, on the right bank of the Saône, 41 miles by rail N. of Lyons. A dull, modernised place, it has a twelve-arch bridge, with a view of Mont Blanc; a fragment of an old cathedral, demolished at the Revolution; the fine Romanesque church of St Pierre (rebuilt 1866); and a statue of Lamartine, who was born here. It trades largely in wines known as Mâcon, like but lighter than Burgundy, and manufactures watches, brass, faience, &c. Pop. 16,000.

Macon (*May'kon*), capital of Bibb county, Georgia, on the Ocmulgee, stands among forest-clad hills, at the head of navigation, 103 miles SSE. of Atlanta. It is the seat of Mercer University (Baptist) and a R. C. college, and has foundries, flour and lumber mills, cotton-factories, &c. Pop. 45,000.

Macquarie Land, a grassy island, 20 miles long, in the Antarctic Ocean, in 54° 30′ S. lat. and 158° 50′ E. long. It was discovered in 1811.

Macquarie River, a tributary of the Darling in New South Wales, 750 miles long, named after Governor Macquarie.

Macroom, a market-town on the Sullane, 25 miles W. of Cork. Pop. 2700.

Madagas'car, the third largest island in the world, is situated to the SE. of Africa, and is about four times as large as England and Wales. It is in 12° 2′—25° 35′ S. lat. and 42°—51° 40′ E. long.; length, 978 miles; greatest breadth, 350 miles; area, 230,000 sq. m. It consists of two great divisions—(1) an elevated interior region, almost central, from 3000 to 5000 feet above the sea; and (2) a comparatively level country surrounding the high land, not much exceeding 600 feet in altitude, although there are lofty mountains extending to the SE. corner of the island. The interior highland comprises nearly half the total area; the highest mountain-mass, Ankàratra (9000 feet), is probably an ancient volcano. The lower region of Madagascar is fertile and well wooded, especially on the eastern side of the island, though a large district in the south is barren. From the SE. to the NW. and N. a series of extinct volcanic craters has been traced, and there are many hot springs. There are fine bays and harbours on the NW. coast. All round the island is a nearly unbroken belt of dense forest, 10 to 40 miles across, and most largely developed in the NE. The flora of Madagascar is very rich and varied, and contains large numbers of valuable timber trees. Three-fourths of the species of plants are peculiar to Madagascar, showing that the island is of very great antiquity. The fauna contains several exceptional and ancient forms of life; it is the home of the Lemurs, including the Aye-aye, as also of the chamæleons. The remains of an immense struthious bird (*Æpyornis*) have been discovered, as well as of an extinct hippopotamus. The Malagasy people appear to be mainly derived from the Malayo-Polynesian stock, with some Melanesian, African, and Arab admixture. The Hovas, the most civilised and powerful tribe, inhabit the central province of Imèrina. The Sàkalàvas are found along the entire west coast. Although there are many dialectic differences, the language of the whole country is substantially one, and is evidently nearly allied to those of the Malayan and Melanesian islands. The pop. of Madagascar is probably about 3,000,000. In their heathen state they are very immoral and untruthful, and cruel in war; but they are also courageous, affectionate, and firm in friendship, law-abiding and loyal, courteous and hospitable. The capital, Antanànarìvo, has a pop. of about 100,000. The chief ports are Tamatave, on the east coast, and Mojangà, on the north-west. Ambòhimànga in Imèrina, and Fianàrantsòa in Bétsiléo, are important places in the interior.

Exports (£1,000,000 per annum) include gold, rubber, cattle, hides, gum-copal, rafia bast, rice, ebony, mangrove bark, manure, and ostrich-feathers; coffee, sugar, and vanilla are also cultivated. The chief imports (£2,000,000 per annum) are cotton goods, ironmongery, crockery, and rum. The principal trade is from the eastern ports to Mauritius and Réunion, and there is also now an increasing trade from the western side with South Africa. Iron is abundant, copper and tin exist, lead, silver, and gold are mined, sulphur is plentiful. The people excel in weaving, in straw-work, in carpentry, and in the working of gold and silver.

Madagascar was known to the Greeks as *Menuthias*; it is first mentioned by Marco Polo as *Madeigascar* or *Magastar*; but the first European who saw the island appears to have been the Portuguese Fernam Soares in 1506. The Dutch formed short-lived settlements; the French, who made vain but persistent efforts for nearly two centuries to maintain military posts on the east coast, hold the islands of Ste Marie (east coast) and Nòsibé (north-west coast); and in 1890 the English government formally acknowledged the French protectorate of Madagascar, but this has never been agreed to by the Malagasy government. Up to the middle of the 17th century Madagascar was divided into a number of independent chieftaincies; about that time, however, the warlike Sàkalàvas made themselves masters of the western half of the island. But in the early part of the 19th century the Hovas threw off the Sàkalàva yoke, and, with the aid of English arms and discipline, made themselves masters of almost the whole of Madagascar. Radàma I. abolished the export slave-trade, and from 1820 encouraged English missionaries. But under Queen Rànavàlona I. the missionaries and Europeans generally were obliged to leave (1836), and a severe persecution of the native Christians ensued. Madagascar was reopened to Europeans at the accession of her son Radàma II. Queen Rànavàlona II., and her husband, the prime-minister, identified themselves with Christianity in 1868; idols were burnt, and masses of the people put themselves under instruction; and erelong about 1600 Protestant Christian congregations had been formed, with about 280,000 adherents, besides 1300 schools, with 100,000 scholars. The Roman Catholics number some 50,000. In 1883 the French invaded Madagascar, and two years afterwards it became a French protectorate. Another French expedition in 1895 forced Queen Rànavàlona III. to confirm the treaty of 1885. In 1896 the country was declared a French colony; and in 1897 the queen was deposed and exiled. The French régime, peaceful and on the whole prosperous, has not been favourable to Protestant missions, nor to British trade with Madagascar. See works on Madagascar by Ellis (1838, 1858, and 1870), Sibree (1870–96), Oliver (1886), Grandidier (1876–1902), Dawson (1895), Foucart (1899), Killer (1901), and Matthews (1904).

Maddalo'ni, a city of Italy, 17 miles by rail NNE. of Naples. Pop. 20,700.

Madeira (*Maday'ra*), the largest (38 miles by 15) of a small group of islands in the North Atlantic, 390 miles NW. of Morocco, 1164 SW. of the Lizard, and 535 SW. of Lisbon. Madeira (Portuguese, 'timber'), first settled in 1419, is treated as an integral province of Portugal, sending representatives to the Cortes at Lisbon. Population, about 170,000. Madeira is traversed by a mountain-chain running east and west, with deep ravines between the lateral ridges, the most notable the 'Grand Curral,' which is more than 2000 feet deep. The islands are of volcanic origin; there are three summits between 5895 and 6059 feet. Slight earthquakes occur. The south is treeless and arid; the north side is more luxuriant and fertile, with wider areas of cultivated ground; in the north-west are undulating grassy plains. The coasts are steep and precipitous, the only harbour being that of Funchal (q.v.) on the south coast, which is little better than an open roadstead. The clouds, attracted by the mountains, yield plenty of moisture, and the climate is remarkable for its constancy; mean temperature, 61° F.; minimum, 50° F.; while in the hottest days of summer it seldom rises above 80°; 90° is exceptional. The average rainfall is 29 inches; there are few really wet days. The temperate and constant warmth of its climate has made it a favourite resort for invalids affected by pulmonary disease. The fruits and grains of Europe are cultivated on the lower levels; the products include wheat, barley, Indian corn, the potato, oranges, lemons, guavas, mangoes, figs, and bananas. Travellers praise the golden splendour of the wide expanses of gorse and broom, and of the marvellous masses of colour of the flora. There are between 300 and 400 genera of wild flowering plants. Wine, especially that known as Madeira, is the chief export. The vines were nearly exterminated in 1852 and succeeding years by oidium, but were soon replanted; and oidium and the phylloxera have since been kept in check by sulphur. Sugar-canes flourish. The inhabitants are of mixed Portuguese, Moorish, and Negro descent; they are vigorous, lively, and industrious. A great drawback to visitors is the absence of roads. Loads are carried on the head by natives, and hammocks and sledges drawn by bullocks are used. Roman Catholicism is predominant. At Funchal (q.v.) are the governor's palace, town-hall, opera-house, lyceum, cathedral, English church, and Scottish Free Church.

See works by White (2d ed. 1860), Grabham (1869), Piazzi Smyth (1882), Miss Taylor (1882), Yate Johnson (1885), Biddle (1900), Brown (1905), Thomas-Stanford (1909), and Koebel (1909).

Madeira, the great affluent of the Amazon, has its origin in the confluence of the Mamoré and Guaporé, at about 12° S. lat., the Beni joining 110 miles lower down. The river then flows north-east to the Amazon, the distance from its mouth to its first falls being 578 miles; above this point navigation is broken by a series of nineteen falls, rapids, and cataracts.

Mad'eley, a Shropshire town, on the Severn, 6 miles NE. of Much Wenlock, and within the municipal limits of Wenlock, with ironworks and coal and iron pits. Pop. 10,000.

Mad'ison, (1) the capital of Wisconsin, founded in 1836 on an isthmus between Lakes Mendota and Monona, 82 miles W. of Milwaukee. It contains the state capitol, university (founded in 1849, and open to both sexes), and lunatic asylum, and has manufactures of flour, farming implements, machinery, &c. Pop. 25,500.—(2) Capital of Jefferson county, Indiana, on the Ohio River, 86 miles by rail SSE. of Indianapolis. It has flour-mills, boiler and engine works, steamboat-yards, and manufactories of furniture and leather, besides pork-packing establishments. Pop. 7000.

Madras' City (native *Chennapatnam*) is situated on the Coromandel Coast of India in 13° 4′ N. lat. and 80° 17′ E. long., and is the capital of the presidency of the same name. The town, originally a number of separate villages, extends 9 miles along the shore, and covers an area of 27 sq. m. The roadstead, in which till quite recently all ships had to lie, is very much exposed; a pier was erected in 1859–62; a harbour (1876) was seriously damaged in 1881, but greatly facilitates the landing of cargo during rough weather—passengers have no longer to cross the heavy surf in going to or coming from steamers. The port is liable to be visited by cyclones towards the end of May and beginning of June, when the south-west monsoon sets in, and in October, November, and early December, during the prevalence of the north-east monsoon. The climate is hot, moderately dry, and on the whole healthy, the rainfall averaging 49 inches, and the mean temperature 82° F. On the shore, midway between N. and S., is Fort St George (1750), the original settlement. North of the fort lies Black Town, which contains most of the business offices and a crowded native population; south of it lies Triplicane, the chief Mohammedan centre. Inland and to the extreme south lie the houses chiefly occupied by Europeans, most of which stand in large 'compounds' surrounded by trees. Madras cannot compete with Calcutta or Bombay in magnificent public buildings, yet Government House, the Chepauk Palace, the Senate House, St Andrew's Kirk, St George's Cathedral (with Chantrey's monument to Bishop Heber), the Madras Club, the post-office, and the new High Court buildings are worthy of note. Many of the buildings are rendered striking by the free use of polished *chunam* made from shell lime. The Madras University, founded in 1857, is simply an examining body, the teaching being done by affiliated colleges throughout the presidency. In addition to colleges for the study of arts, medicine, and engineering, there are, in or near the city, a School of Art, a College of Agriculture, a branch of the Royal Asiatic Society, and a large museum, containing very valuable collections of Indian coins and of sculptured marbles from the Buddhist 'tope' at Amravati. The chief articles of export are coffee, tea, cotton, grain, hides, indigo, oil-seeds, dye-stuffs, sugar, and horns. Pop. (1871) 397,552; (1911) 518,660, of whom between 4000 and 5000 were Europeans, 14,000 Eurasians, 57,000 Mohammedans, and the rest chiefly Hindus.

Madras Presidency, one of the administrative divisions of India, occupies the southern part of the peninsula. It extends from lat. 20° 18′ on the east coast and lat. 14° on the west coast to Cape Comorin in lat. 8° 4′. The total area, excluding native states, is 141,189 sq. m.; and the pop. in 1911 was 44,405,404. (The native states have an area of 10,000 sq. m. and a pop. of 5,000,000.) Of these about 3 millions are Mohammedans and 2¼ millions Christians. The principal mountains belong to the Eastern and Western Ghâts. The former have an average height of 1500 feet, but rise in parts to 3000 or 4000 feet; the latter have a greater average height, with a number of peaks rising from 5000 to 8000 feet, and a few even higher. A central tableland includes the native states of Mysore and the Deccan, rising to a height of from 1000 to 3000 feet. A very notable geographical feature is the Palghât Gap in the Western Ghâts, 25 miles wide, and only 1000 feet above sea-level. Through it passed the old trade-route between the west and east coast, now superseded by a railway, and through it the south-west monsoon blows strongly, bringing rain to a considerable area lying east of it. The Neilgherry (Nilgiri) Hills, on which at Ootacamund is the summer seat of the government, may be looked on as the junction of the Eastern and Western Ghâts. The chief rivers, the Godavari, Kistna, and Kaveri, all rise in the Western Ghâts, and cross the peninsula SE. to the Bay of Bengal. Very extensive irrigation-works have been carried out. Railway communication is extensive; and there are good roads in most parts of the presidency. The climate differs greatly in different parts. Rice is the chief crop. Cotton is grown in the drier parts, and tobacco of excellent quality is produced. Trichinopoly cigars and cheroots are increasingly exported. On the hills tea, coffee, and cinchona are cultivated. The manufacturing industry is represented by cotton, sugar, gunny bags, paper, ice, and tiles. Madras is not rich in minerals; gold is found in many parts; excellent iron abounds; but the want of fuel prevents any great development of the iron industry. Diamonds have been largely found, chiefly in the Karnul district. The forests are now protected by the state, and are of great value, especially the teak forests.

The first English settlement was made at Masulipatam in 1611; in 1616 on the west coast at Calicut and Cranganore; and in 1639 at Madras. Christian missions have made more progress in Madras than in any other part of India, there being over 5 per cent. Christians.

Madrid′ (Span. pron. *Madh-reedh′*), the capital of Spain, is situated in the dep. of Madrid (part of the ancient province of New Castile), in 40° 24′ N. lat. and 3° 25′ W. long., 880 miles by rail from Paris. It is built on a treeless, ill-watered plateau, on the left bank of the Manzanares, 2060 feet above the sea-level. The Manzanares is merely a mountain-torrent falling into the Jarama, a tributary of the Tagus; water is brought from the Guadarrama Mountains by an aqueduct 42 miles in length. The sole recommendation of Madrid as capital is its central position in the Peninsula. Swept during winter by icy winds from the snow-capped mountains on the north, and exposed in summer to a burning sun, it has a climate which, though dry and bright, shows extreme variations of temperature (104° to 14°). The average of the eight warmer months (March to October) is 66° F., and that of the four remaining ones 44°, but the difference at the same time between sun and shade is sometimes as great as 20°. At the beginning of the 19th century the pop. was about 160,000; in 1860 it was 298,000; in 1870, 332,000; and in 1910, 571,540. Madrid in the 10th century was known as *Medina Magerit*, a fortified post of some importance on the frontier of the Moorish kingdom of Toledo. Retaken by the Christians of Castile in 939, it was not finally conquered till 1085. On the high ground where the royal palace now stands was the stronghold that gave the place celebrity. The city received its earliest charter in 1202, and the Cortes were first held in it by Ferdinand VI. (1309). Under Isabel the Catholic it became a place of some importance owing to the more frequent presence of the court. It received such privileges from the Emperor Charles V. that its pop. rose rapidly from 3000 to 6000 households. When in 1561 Madrid was declared capital of Spain by Philip II., it contained about 30,000 inhabitants. With the court came the great nobles, who built palaces, and innumerable friars, who established convents; nevertheless till the middle of the 17th century the city presented a mean appearance. Philip IV. made some improvements, and in his time Madrid, though still unpaved and filthy, was the seat of one of the most brilliant courts of Europe. The greatest benefactor of the city was Charles III., many of whose splendid works still exist. Madrid, during the domination of Napoleon, made a gallant attempt (1808) to shake off the foreign yoke; but although taken by the allied forces under the Duke of Wellington in 1812, it was not finally rid of the French till 1813. Madrid, aided by the suppression of the convents (1836), the introduction of railways (1850), and an abundant supply of good water (1858), has rapidly advanced in importance and prosperity.

The general aspect of the city is clean and gay, whilst the older parts are picturesque; no trace now remains of the mediæval city. The new streets are generally fine, broad, and planted with trees; the houses well built, lofty, and inhabited by several families living in flats. A great feature is the magnificent open spaces, chief of which is the Prado, running north and south through the eastern part of the city, and, with its continuations, three miles long: it contains four handsome fountains with groups of statuary, a fine obelisk to commemorate the gallant struggle of the citizens with the French (May 2, 1808), monuments to Columbus, Isabel the Catholic, &c. The picture-gallery here, founded by Charles III., is one of the finest in Europe, and contains many of the masterpieces of Velasquez, Murillo, Raphael, Tintoretto, Rubens, Teniers, and Van Dyck. Two other parks are the Buen Retiro, the fashionable promenade on the east of the city, and the Casa de Campo on the west. Midway between its extremities the Prado is crossed at right angles by the Calle de Alcala, the finest street in the city, about a mile in length, and leading from outside the fine triumphal arch rebuilt by Charles III. to the Puerta del Sol, the square which is the heart of Madrid; here converge the principal tramway lines, and in it and the streets branching off from it are situated the principal shops and places of business. The finest square is the Plaza Mayor, formerly the scene of bull-fights and *autos-da-fé;* it contains a gigantic equestrian statue of Philip III., its founder. On the west of the city are the new cathedral and the royal palace; the latter, commenced in 1738 to replace the ancient Alcazar, which had been burned down, was finished in 1764 at a cost of £3,000,000. Other fine buildings are the palace of justice, formerly a convent; the houses of parliament; Buena Vista Palace, now the ministry of war; and the new national bank. Besides a flourishing university, founded by Cardinal Ximenes, and two high schools, Madrid contains 120 municipal (besides pauper) schools, with an aggregate of 12,000 pupils. Madrid is well provided with newspapers and public libraries, the chief being the National Library, with more than half a million volumes, and the library of the university. The opera-house is one of the finest in the world; all the theatres must by law be lit by electricity. The bull-ring, situated outside the gates on the east, is a solid structure seating 14,000. Iron-founding, and the manufacture of furniture, carriages, and fancy articles are carried on on a small scale. The manufacture of tobacco employs many hands, chiefly women. The publishing trade is important, and books are well printed and cheap. The old tapestry-factory still turns out beautiful work, as do the potteries at Moncloa.

Madron, a Cornish town, 2 miles NW. of Penzance. Pop. 3700.

Madu′ra, a maritime district of India, in the south of Madras Presidency, is bounded E. by the Gulf of Manaar; it has an area of 8808 sq. m., and a pop. of 3,000,000. For nearly 2300 years

Madura, its chief town (pop. above 134,000), was the capital of the southernmost part of India.

Madura, a barren island of the Dutch East Indies, separated by a narrow strait from the north-east of Java (q.v.). Area, with some eighty smaller islands, 2040 sq. m.; pop. 2,000,000.

Mæander (now *Bojuk Mender*), the ancient name of a river of Asia Minor, rising in Phrygia, and flowing 240 miles WSW. to the Ægean at Miletus. Its windings, proverbial since Cicero's day, are after all nothing remarkable.

Maelström ('grinding stream'), a famous whirlpool or rather current between Moskenäs and Mosken, two of the Lofoden Isles (q.v.). The strait is regularly navigated at high tide and low tide, though in one place the water is always rough; and in high winds is dangerous. Tales (such as Poe's) of ships sucked down into the vortex are mere fables.

Maeshowe, a chambered mound in the Mainland of Orkney, 9 miles WNW. of Kirkwall. It is 36 feet high and 92 in diameter, and probably belongs to the Stone Age.

Maesteg, a town of Glamorganshire, on the Llynvi, 9 miles NW. of Bridgend. Pop. 25,000.

Maestricht (*Mâhs-trihht*), the capital of the Dutch province of Limburg, 19 miles NNE. of Liége by rail, 19 WNW. of Aix-la-Chapelle, and 152 SSE. of Amsterdam. It lies on the left bank of the Meuse or Maas, a stone bridge (1683), 133 yards long, connecting it with the suburb of Wijk. Formerly an important fortress, it is still a garrison town; but the fortifications were dismantled in 1871–78. The town-hall, with spire and carillon (1662), contains many paintings and a library; and in the three-towered church of St Servatius (12–14th century), the cathedral once, is a 'Descent from the Cross,' by Van Dyck. But Maestricht's great sight is the subterranean quarries of the Pietersberg, formerly called *Mons Hunnorum* (330 feet). Their labyrinthine passages, 12 feet wide, and 20 to 50 feet high, number 16,000, and extend over an area of 13 by 6 miles. They are supposed to have been worked first by the Romans, and, amongst other fossils, have yielded two heads of the huge Mosasaurus. The manufactures include glass, earthenware, and carpets. Population, close upon 40,000. Maestricht, the Roman *Trajectum ad Mosam*, was six times besieged between 1579 and 1814, and in 1830 withstood the insurgent Belgians.

Mafeking (*Mâ-fe-king'*), in the NE. corner of British Bechuanaland, near the Transvaal frontier, and on the railway (1894) from Capetown to the northward—the future 'Cape to Cairo railway;' famous for its defence by Baden-Powell in the Boer war of 1899–1902. Pop. 2300.

Mafra, a town of Portugal, 20 miles NW. of Lisbon. Pop. 3020. The palace here (1717–31), now a barrack, contains 866 rooms, and a library of 50,000 vols.

Magadoxo, or Mukdishu, a port on the east coast of Italian Somaliland, 250 miles NE. of the mouth of the Juba River; pop. 10,000.

Mag'dala, anciently a village of Palestine, on the west shore of the Sea of Galilee.

Magdala (*Mag-dâh'la*), a hill-fortress of Abyssinia, 300 miles S. of Annesley Bay on the Red Sea, stood perched on a plateau 9110 feet above sea-level; the stronghold of Theodore, taken and destroyed by the English expedition in 1868 under Napier, created Lord Napier of Magdala.

Magdale'na, the principal river of Colombia, rises in the Central Cordillera, only 8 miles from the source of the Cauca. These streams flow north on either side of the Cordillera, uniting about 130 miles from the sea. The Magdalena, which ends in a large delta, is closed to sea-going vessels by a bar; merchandise is conveyed by a railway (18 miles) from Barranquilla to Puerto Colombia, whence it is navigable for 500 miles.

Mag'dalen Islands, a small group near the centre of the Gulf of St Lawrence, 54 miles NW. of Cape Breton Island. The largest is Coffin Island. Pop. 6000.

Magdeburg (*Mag-de-boorg*), the capital of Prussian Saxony, and one of the chief fortresses of the German empire, 90 miles by rail SW. of Berlin and 72 N. of Leipzig. It lies in a cheerless country, on the left bank mainly of the Elbe, which, here 280 yards wide, branches into three channels, and forms two islands. On the smaller of these still stands the Citadel (1683–1702); but otherwise the old fortifications have since 1866 been built over or converted into promenades, their place being taken by a cordon of thirteen forts. The cruciform Gothic cathedral, rebuilt between 1207 and 1550, is 400 feet long, and has two western towers 341 feet high. It contains the tombs of the Emperor Otho the Great, of his first wife, the English princess Editha, and of Archbishop Ernest, whose monument (1497) is a masterpiece of Peter Vischer of Nuremberg. In front of the town-hall (1691–1866) is the equestrian statue of Otho (13th century); and of several other monuments the most noteworthy are the Soldiers' Memorial (1877) and a statue of Luther (1886). The industries comprise huge ironworks, distilleries, cotton-mills, &c.; for sugar it is the first market of Germany. Pop. (1875) 122,789; (1910) 279,685, of whom over 15,000 are Catholics, and 2000 Jews. Founded by Charlemagne in 805, and refounded by Editha after its destruction by the Wends in 924, Magdeburg was in 968 made the seat of an archbishopric, and had 40,000 inhabitants in 1524, when, embracing the Reformation, it incurred the combined wrath of emperor and primate. It successfully withstood Maurice of Saxony (1550); but during the Thirty Years' War it suffered fearfully. In 1629 it was vainly besieged for six months by Wallenstein; in May 1631, after an heroic defence (2000 against 25,000), it was taken by Tilly and burned to the ground, the cathedral (reconsecrated for Catholic worship) being almost all that remained after the three days' sack, in which nearly the whole pop. of 36,000 perished by fire or sword or drowning in the river. In 1648 the archbishopric was converted into a secular duchy, and conferred on the House of Brandenburg. In 1803 the French annexed it to the kingdom of Westphalia; but in 1814 it was finally restored to Prussia.

Magee' Island (*g* hard), a low-lying peninsular portion of County Antrim, nearly severed from the mainland by Lough Larne.

Magel'lan (*g* hard), Strait of, separates South America from Tierra del Fuego. It is 375 miles long, and its breadth varies mostly between 12 and 17 miles. Discovered by Magellan in 1520, it was explored by King and Fitzroy in the *Adventure* and *Beagle* (1826–36). The narrower western half is shut in by steep, wooded mountains; the current runs strong through it. See works by Cunningham (1878) and Miller (1884).

Magenta, an Italian town, 18 miles W. of Milan. Pop. 8000. Here, 4th June 1859, the French and Sardinians defeated the Austrians.

Magerö. See North Cape.

Magersfontein, on the frontiers of Griqualand West and the Orange Free State, where in December 1899 Lord Methuen failed to carry the Boer entrenchments.

Maggiore, Lago (*Madjo'ray*), one of the largest lakes in Italy, is partly in the Swiss canton of Ticino. It is 39 miles long, and ½ mile to 5½ miles broad, lies 646 feet above sea-level, and has a maximum depth of 1250 feet. The river Ticino flows through it. In a south-western expansion of the lake are the Borromean Isles (q.v.).

Maghera (*Mah'era*), a market-town of Londonderry, 44 miles NW. of Belfast. Pop. 870.

Magne'sia, an ancient city of Ionia in Asia Minor, nearly 10 miles NE. of Miletus, in the valley of the Mæander. Here stood a famous temple of Artemis; and here Themistocles died (449 B.C.). It was called Magnesia ad Mæandrum, to distinguish it from Magnesia ad Sipylum, which stood on the Hermus, near Mount Sipylus; this is the modern Manissa (pop. 50,000), 41 miles NE. of Smyrna by rail.

Magus Muir, a place in Fife, 3½ miles WSW. of St Andrews, the scene in 1679 of Archbishop Sharpe's murder.

Mahabaleshwar, the chief sanatorium of Bombay Presidency, on the eastern slope of the Western Gháts, at a height of 4717 feet, and 74 miles S. of Poona; pop. 6000.

Mahánadí ('the great river'), a river of India, rises in the Central Provinces. After an eastward course of 520 miles, 300 of which are navigable, having divided into several branches near Cuttack, which forms the head of its delta, it falls by several mouths into the Bay of Bengal.

Mahanoy' City, a mining-town of Pennsylvania, 109 miles by rail NW. of Philadelphia, with collieries and manufactories; pop. 16,000.

Mahé, the only French settlement on the west coast of India, in the Malabar district, 35 miles NNW. of Calicut; area, 23 sq. m.; pop. 10,600.

Mahi Kantha Agency, a group of fifty-two native states in Bombay Presidency. Of the total area of 9300 sq. m., nearly half belongs to the state of Edar or Idar. Pop. 400,000.

Maida Hill, a NW. suburb of London.

Maiden Castle. See Dorchester.

Maidenhead, a municipal borough and market-town of Berkshire, is situate amidst beautiful scenery, 13 miles E. by N. of Reading, and 26 W. of London, on the right bank of the Thames. It was the scene in 1399 of an engagement between the rival forces of Richard II. and Henry IV., and in 1647, at the Greyhound Inn, of the interview of Charles I. with his children. On the opposite, or Bucks, side of the river is Taplow (pop. 1029), whose wooded slopes are crowned by Cliveden (q.v.). Maidenhead has a recreation ground of 12 acres, opened in 1890. Population, over 15,000.

Maidstone, the county town of Kent, on the right bank of the Medway, 34 miles ESE. of London by road (41½ by rail), and 25 W. of Canterbury. At its west entrance, overlooking the river, which is spanned by a three-arch stone bridge, built 1877–79 at a cost of £55,000, stand the picturesque remains of All-Saints' College, originally established in 1260 as a hospital for pilgrims travelling to Canterbury. Close by is All-Saints' Church, a fine example of the Perpendicular style, built towards the end of the 14th century. Schools of art and music occupy a former palace of the archbishops of Canterbury; and other features of interest are a grammar-school, founded 1549, and rebuilt on a new site, 1871; museum and public library, established 1858 in Chillington House; town-hall (1764); county jail (1812–19); hospital (1832–89); cavalry and militia barracks; corn exchange (1835); and a public park on Penenden Heath to the NE. of the town. Lining the river-banks are numerous paper-mills and a large oil-mill, whilst several breweries are in operation, and an important traffic is carried on in hops. Maidstone returned two members till 1885, when the number was reduced to one, and was first incorporated as a municipal borough in 1548. Pop. (1801) 8027; (1831) 15,387; (1911) 35,475. Maidstone was stormed in 1648 by Fairfax. Woollett the engraver, Hazlitt the essayist, and Newman Hall were natives; Sir Thomas Wyatt lived at Allington Castle, 2 miles distant. See works by Russell (1881) and Cave-Browne (1889).

Mai-Kop, a great Russian petroleum-field in Northern Caucasia, 85 miles SE. of Ekaterinodar.

Maimana (*Mī'mana*), a mountainous state, now a province of Afghanistan, situated on the northern frontier next Russian Turkestan; area, 4750 sq. m.; pop. 100,000, mostly warlike Uzbegs and Tajiks. The capital is Maimana (pop. 5000).

Maimansingh, a district of the Bengal division of Dacca, the capital of which is Nasirabad; area, 6332 sq. m.; pop. 4,000,000.

Maimatchin (*Mī-ma-cheen'*), a trading-town on the northern boundary of Mongolia, opposite Kiachta (q.v.); pop. 3000.

Main (Ger. pron. *Mīne*), the largest affluent the Rhine receives from the right, is formed by the union of two branches, the White and the Red Main, 4 miles below Kulmbach, in north-east Bavaria. The river flows westwards by huge zigzags past Bamberg, Schweinfurt, Würzburg, Aschaffenburg, Hanau, Offenbach, and Frankfort, and mingles its yellow waters with the green current of the Rhine opposite Mainz, after a total course of 307 miles (205 navigable). The chief affluents are, on the right, the Saale, and on the left, the Regnitz. The Main flows through a beautiful country, the castled hill-slopes covered with vineyards. Its waters communicate with those of the Danube by the Ludwigs-Kanal and the Altmühl. The Main separates North Germany from South Germany.

Maine, an old French province (capital, Le Mans), with Normandy on the N., Brittany on the W., and Anjou on the S., corresponding to the modern deps. of Sarthe and Mayenne.

Maine, the north-easternmost state of the American Union, is bounded by the Canadian provinces of Quebec and New Brunswick, the Atlantic Ocean (Gulf of Maine), and New Hampshire. Area, 33,040 sq. m. (somewhat larger than Ireland), of which one-tenth is water, there being many large and fine lakes (Moosehead, Chesuncook, Schoodic, Grand, Sebago, &c.) and important rivers (Penobscot, Kennebec, Androscoggin, Saco, St Croix, Aroostook, and Walloostook or St John). Measured in a direct line the coast extends some 270 miles, but counting sinuosities and the island-shores about 2500 miles. The rocky coast-line, broken by the force of the waves and trenched in bygone ages by glaciers, forms almost a hundred harbours. Towards the south-west the shore is sandy, with salt-marshes. In the north-central regions and the west the surface is mountainous. The highest mountain is Katahdin (5385 feet). The soil is mostly stony and hard, as in New England generally, but some sections are very fertile—e.g. the Aroostook region in the north-east. The northern portion of the state is densely wooded and very sparsely peopled. Granite and lime are largely produced; traces of coal are found; and there are local beds of valuable graphite. Silver, copper, felspar, flagstone, excellent slate (in vast quantities), lead ores, talc, manganese, &c., are all wrought more or less. Mineral waters are shipped in large quantities. The cool climate and the opportunities for fishing and shooting make this state a favourite summer-resort. The winter climate is severe for the latitude. The leading crops are hay, potatoes, apples (of excellent quality), and the ordinary grains and small fruits. The sweet varieties of maize (sugar-corn) are extensively cultivated. The rainfall is copious. The rivers afford an enormous water-power. Timber, building-stone, ice, cattle, wool, and farm products are shipped. Maine has considerable shipbuilding (more than any other state), and the coasting trade is carried on largely. The fishing interests are extensive. The principal manufactures are cotton and woollen goods, leather, boots and shoes, flour, paper, and foundry products, lumbering, shipbuilding, the canning of fruit and lobsters, &c. The chief towns are Portland, Lewiston, Bangor, Biddeford, Auburn, Augusta (the state capital), Bath, Rockland, &c. The Maine Liquor Law, one of the earliest of the stringent Liquor Laws of the United States, was enacted in 1851. The population is mainly of the English Puritan stock of New England. Pop. (1820) 298,335; (1860) 628,279; (1900) 694,466; (1910) 742,371, including many French-speaking Canadian immigrants, and a few Indians. Early Dutch, English, and French attempts at settlement were failures; the Puritan settlements of 1624 and 1630 proved permanent. Western Maine was long part of Massachusetts state (till 1820); and eastern Maine until 1691 formed a part of Acadia or Nova Scotia. Maine became a state in 1820. See Abbott and Elwell, *History of Maine* (Portland, 1893).

Maine-et-Loire (*Mayn-ay-Lwâr*), a French dep. formed out of the old province of Anjou, and watered by the Maine and Loire, is divided into the arrondissements of Angers (the capital), Beaugé, Cholet, Saumur, and Segré. Area, 2749 sq. m.; pop. (1872) 518,471; (1911) 508,149.

Mainpuri (*Mīne-poo'ree*), a town of the Indian province of Agra, 75 miles E. of Agra. Pop. 20,000.

Mainz (Ger. pron. *Mīntz*; Fr. form *Mayence*; old-fashioned English form *Mentz*), an imperial fortress of the first rank, in the grand-duchy of Hesse, on the left bank of the Rhine, opposite the junction of the Main, 22 miles WSW. of Frankfort. The Rhine is here crossed by a stone bridge (superseding in 1885 the former pontoon bridge) to the village of Kastel, included in the fortifications, and by an iron railway bridge, 140 yards long, to the port of Gustavsberg, at the mouth of the Main. Pop. (1875) 56,421; (1910) 110,634, of whom two-thirds are Roman Catholics; in the 14th century it is said to have reached 90,000. Mainz is one of the most ancient cities in Germany; but its oldest part, *Kästrich*, has been rebuilt in a modern style since its almost total destruction in 1857 by the explosion of a powder-magazine; while a handsome new quarter has sprung up on the north, in the space afforded by the advancing of the fortifications in 1874. The cathedral, originally built in 978–1009, was thrice destroyed by fire, and dates in its present form from the 13–14th century. In 1870–78 it was thoroughly restored, and the present central Romanesque tower, 270 feet high, built. There are also the 18th-century palace of the grand-duke, an arsenal of 1736, and the large red-sandstone electoral palace, with a library of 150,000 vols., and the Romano-German Museum, a matchless antiquarian and historical collection. Mainz is an important centre of the Rhine trade with Holland and Belgium, and also carries on a very large transit trade by railway. Great harbour-works, docks, and storehouses, were opened in 1887 at a cost of £250,000; while the Rhine is skirted by a broad quay, four miles long. Furniture, leather goods, machinery, musical instruments, chemicals, gold and silver ware, hats, soap, &c., are among the manufactures; and brewing, printing, and market-gardening in the environs are also important industries. In 13 B.C. Drusus built here the fort of *Moguntiacum* or *Maguntiacum*. The real importance of the town dates, however, from the Frankish emperors. In the 13th century Mainz was the head of the confederacy of the Rhenish cities, but in 1462 it was added to the domains of the archbishops of Mainz, the premier spiritual electors of the empire. The city was several times in the possession of France, notably in 1801–14. In 1816 it was assigned to Hesse-Darmstadt, but to remain a federal stronghold, garrisoned by Prussian and Austrian troops. After 1866 it was held by Prussian troops, until in 1870 it was declared an imperial German fortress. Mainz was the birthplace of Gutenberg.

Maitland, a town of New South Wales, 93 miles NNE. of Sydney by rail, and 20 NW. of Newcastle. It is divided by the Hunter River into East and West Maitland, which are separate municipalities. The town is the see of a Roman Catholic bishop; and West Maitland has mills, coach-building, tobacco, and boot factories. Good coal abounds in the neighbourhood. Pop. of the two municipalities, 33,800.

Maiwand, 50 miles NW. of Kandahar, where an English army was defeated by Ayub Khan, 27th July 1880.

Majorca (*Ma-yor'ca*), or MALLORCA, the largest of the Balearic Isles (q.v.), lies about 100 miles from the Spanish coast, and 150 N. of Algiers. It is 60 miles long by 40 broad, and 1310 sq. m. in area. In the north there are mountains reaching 3500 to 5000 feet. The hillsides are terraced; olive groves abound everywhere, and vine, almond, orange, fig, and other fruit trees are common. The soil is extraordinarily fertile, and is cultivated with marvellous patience and skill by the inhabitants, who manufacture cloth, cotton goods, ropes, silk, soap, shoes, &c. There are railways (total 48 miles) connecting the capital, Palma (pop. 65,052), with Manacor (19,570), and La Puebla (5680). The marshes of Albufera (5000 acres) were drained by a London company in 1865–71. Raymond Lully was born at Palma; at Valdemosa George Sand resided in 1838; and at Miramar is the beautiful seat of an Austrian archduke. Large quantities of lustred ware (Majolica) were exported in the 15th century; a little is still made. Pop. 253,650.

See Bidwell's *Balearic Isles* (1876); the sumptuous *Balearen in Wort und Bild* (5 vols. 1869–84), by Archduke Ludwig Salvator; and Sir Clements Markham's *Story of Majorca and Minorca* (1909).

Maju'ba Hill, in the extreme north of Natal, was the scene of the defeat of 648 British troops, with the loss of their leader, Sir George Colley, by a greatly superior force of Transvaal Boers on 27th February 1881.

Mako, a market-town of Hungary, on the Maros, 19 miles ESE. of Szegedin. Pop. 35,000.

Malabar′, a district (5585 sq. m.) on the south-west coast of India, in the Presidency of Madras. Pop. 3,000,000, over two-thirds Hindus, and one-fourth Mohammedans. The name is applied to the whole SW. coast of Southern India.

Malac′ca, or MALAY PENINSULA, anciently the GOLDEN CHERSONESE, the long strip of land extending from Indo-China S. and SE. towards Sumatra. The peninsula begins at the head of the Gulf of Siam, and thus includes part of Siam proper and Tenasserim in Burma; but it is usual to limit the name to the portion south of the river Pakshan, the frontier of Tenasserim. In the larger sense Malacca extends from 13° 30′ to 1° 16′ N. lat., and its area is 75,000 sq. m., of which 25,000 belong to Siam, and the remainder to the Straits Settlements and their dependencies, the protected states. The width varies from 44 miles at the isthmus of Kra to 210 at Perak. The interior consists mainly of magnificently-wooded mountain-ranges, disposed parallel to the long axis of the peninsula (Mount Riam is 8000 feet high), while along the coast there are mangrove swamps, half-a-dozen miles deep, backed by low fertile plains reaching to the mountains. A double belt of islands runs along parts of both coasts. The peninsula is the richest tin-yielding region in the world. The tin ore occurs in conjunction with gold and silver; iron and coal exist, the former in great quantity. The climate is pretty uniform all the year round. The low districts are hot and moist, and neither they nor the highlands are healthy for Europeans. The inhabitants are mainly Siamese in the north, civilised Malays along the coast and in the south, and uncivilised Malays, with aboriginal Sakai and Semang (Negrito) tribes, in the interior. The crops chiefly cultivated are rubber, rice, sugar-cane, cotton, tobacco, yams, batata, coconuts, and areca-nuts. Siam extends to 7° 30′ on the west coast, and to 7° on the east. In the south are the British Straits Settlements (q.v., and see PENANG, MALACCA, SINGAPORE), the protected states (Johore, Kelantan, Kedah, Perlis, and Trenggánu), and the Federated Malay States (also under British protection) of Perak, Selángor, Negri Sembilan, and Pahang. See STRAITS SETTLEMENTS.

The *Strait of Malacca* separates the Malay Peninsula on the north-east from the island of Sumatra on the south-west, and connects the Indian Ocean with the Chinese Sea. It is 480 miles long, and from 30 to 115 broad.

Malacca, one of the British Straits Settlements, on the SW. coast of the Malay Peninsula, 100 miles from Singapore. It is 42 miles in length, and from 8 to 25 broad. Area, 659 sq. m.; population, 125,000. The coast-lands are flat and swampy; inland there are low hills. Besides rice, the chief products are tapioca, pepper, fruits, &c. Tin is mined. The mean annual rainfall varies from 68 to 91 inches. The town of Malacca (the capital), at the mouth of a small river, has a pop. of 20,000, and contains the church of Our Lady del Monte, the scene of the labours of St Francis Xavier. Malacca was taken by the Portuguese in 1511; became a Dutch possession in 1641, and fell in 1795 into the hands of the British, who restored it to the Dutch in 1818; but they returned it to Britain in 1824.

Maladetta (‘accursed’), a great mountain of the Pyrenees, 12 miles SE. of Bagnères de Luchon, containing the highest peak of the whole range, the Pic de Nethou (11,170 feet).

Ma′laga, a Spanish seaport on the Mediterranean, 65 miles NE. of Gibraltar. Sheltered on the north and east by mountains, and with a wonderfully dry, sunny, and equable climate (56° to 82° F.), this place is an admirable health-resort. The only noteworthy buildings are the cathedral (1528–1765; still unfinished) and the Moorish castle (13th c.; on the site of a former Phœnician stronghold). Malaga is one of the most important seaports of Spain, though disease in vines and orange and lemon groves, heavy octroi duties, unscientific methods of agriculture and of extracting olive-oil, have caused depression. The exports include olive-oil, wine, raisins, lead, almonds, lemons, grapes, chick peas, and esparto grass; the imports, cotton, timber, coal, petroleum, sugar, and codfish. The harbour is protected by two large moles. The manufactures comprise cotton and linen goods, machinery, art pottery, flour, soap, &c. Population, 135,000. Founded by the Phœnicians, and the *Malaca* of the Romans, the town was an important city under the Moors, down to 1487, when it was captured by Ferdinand and Isabella.—Area of province of Malaga, 2836 sq. m.; pop. 525,000.

Mälar, LAKE, most beautiful of Swedish lakes, is 80 miles in length from E. to W., and has numerous long narrow arms and offsets; area, 650 sq. m. It is studded with over 1200 wooded islands. Its east end is close by Stockholm, where its waters are poured into the Baltic.

Malatia (anc. *Melitene*), a town of Diarbekir in Asia Minor, 8 m. from the Euphrates; pop. 20,000.

Malay Peninsula, Malay States. See MALACCA, STRAITS SETTLEMENTS.

Mal′degem, a town of Belgium, 12 miles by rail E. of Bruges. Pop. 8522.

Malden, a village of Surrey, 3 miles SE. of Kingston-upon-Thames. The manor-house and estate here of Bishop Walter de Merton was the original endowment (1264) of Merton College at Oxford. New Malden is 2 miles E. of Kingston, of which it is practically a suburb.

Malden, a town of Massachusetts, 5 miles by rail N. of Boston. It manufactures india-rubber goods, cords and tassels, sand-paper, &c. Pop. (1880) 12,017; (1900) 33,664; (1910) 44,404.

Malden Island, a British possession in the Central Pacific, NW. of the Marquesas. It is a coral island 5 miles long by 4 broad, and has deposits of guano. Pop. 168.

Maldive Islands, a chain of coral atolls in the Indian Ocean, lying SW. of Ceylon, 550 miles in length by 45 in breadth; the seventeen groups embrace several hundred islands, all small, with a total pop. of 50,000. Less than 200 are inhabited. Malé (pop. 2000), the residence of the Sultan, is 1 mile long. The people are closely akin to the Singhalese. They are Mohammedans by religion, and are peaceful, affectionate, and cleanly. Coir, cowries, dried bonito fish, cocoa-nuts and copra, and tortoise-shell are exported. Ibn Batuta lived on the islands in 1343–44. The Portuguese had factories there after 1518. Since 1645 they have been dependent on Ceylon.

Maldon, a municipal borough of Essex, 9 miles E. of Chelmsford and 38 NE. of London (by rail 44), stands on a hill near the confluence of the Chelmer and the Blackwater, in the vicinity of which traces are still extant of a Roman encampment. It has two fine churches, and a quaint town or moot hall dating from the reign of Henry VI., and manufactures salt; near it are oyster-fisheries. From 1328 to 1867 Maldon returned two members to parliament, and thence to 1885 one. Pop. 6500.

Maldon, a town of Talbot county, Victoria, 80 miles NE. of Melbourne. It is the centre of a good gold district. Pop. 3700.

Maldona'do, a coast dep. in Uruguay; area, 1584 sq. m.; pop. 35,000.—Also a fortified seaport in same department; pop. 2500.

Maligne, Lake, a lake of Alberta, 18 miles long, discovered by Mrs Schäffer in 1908.

Malines (*Mâ-leen'*), or Mechlin (Flem. *Mechelen*), a city of Belgium, on the navigable Dyle, 14 m. SSE. of Antwerp, has great railway works. As the see of the primate of Belgium it still retains a certain degree of ecclesiastical importance, and possesses numerous churches, the most noteworthy of which is St Rombold's cathedral, a vast building, covering nearly two acres, its interior adorned with Van Dyck's 'Crucifixion' and many other fine pictures and carvings. It was mostly built in 1437–52, but its clock-tower, 324 feet high, remains unfinished. The churches of St John and of Our Lady contain works by Rubens; the town-hall dates from the 15th century; the Cloth Hall (1340) is now a museum and post-office; noteworthy also are the splendid modern archiepiscopal palace, the Beguinage, the Salm inn (1534), and the monument to Margaret of Austria (1849). The manufacture of pillow-lace, so famous in the 17th century, has been largely transferred to Brussels and elsewhere; but linen and woollen fabrics, beer, needles, chairs, &c. are made here. Pop. 60,000.

Mallaig, a hamlet in the NW. corner of Morar, Inverness-shire, where Loch Nevis unites with the Sound of Sleat, the terminus of an extension from Fort William, opened in 1901, of the West Highland Railway.

Malling, West, a market-town of Kent, 5½ miles NW. of Maidstone. It has remains of a Benedictine nunnery (1090). Pop. of parish, 2500. See a work by C. H. Fielding (1893).

Mallow, a watering-place of Ireland, beautifully situated on the left bank of the Blackwater, 20 miles by rail N. by W. of Cork. Across the river is the suburb of Ballydaheen. The town is resorted to in summer on account of its tepid mineral waters, and contains a neat spa-house. Close by is the ivied ruin of the Desmonds' castle, destroyed in 1641, and the 18th-century Mallow Castle. Tanning and some small manufactures are carried on. Population, about 4500. Till 1885 Mallow returned one member.

Mallwyd (*Mal'lud*), a Merionethshire village, on the Dyfi, 2 miles SE. of Dinas Mowddwy. It is a great haunt of artists and fishermen.

Malmaison, a château on the Seine's left bank, 10 miles W. of Paris. It has memories of Richelieu, the Empress Josephine, and Maria Christina of Spain, and was restored by Napoleon III. in 1861.

Malmedy (*Mâl-may-dee'*), a town of Rhenish Prussia, on the Warche, 51 miles S. by rail of Aix-la-Chapelle. Here in 1894 the German government established a fortified camp. Pop. 5078.

Malmesbury (*Mâmz'bury*), an old-world market-town of Wiltshire, on a bold eminence between two head-streams of the Avon, 26 miles by rail NNE. of Bath and 17 WNW. of Swindon. It owes its name to Maildulf, an Irish missionary. Aldhelm, his scholar, became about 673 first abbot of the famous abbey here, in which Athelstan was buried, and of which William of Malmesbury (*c.* 1095–1143) was librarian and precentor. To his time belong the building of a short-lived castle, and the rebuilding (also by Bishop Roger of Salisbury) of the abbey church, which, Transition Norman in style, and cruciform in plan, with a central spire, was 350 feet long. Little more than the nave—now the parish church—remains; but this is a most interesting fragment, its finest feature the south porch. At the Dissolution (1539) the mitred Benedictine abbey became a cloth-factory. A beautiful market-cross (*temp.* Henry VII.) is also noteworthy. Hobbes was a native. Malmesbury returned two members till 1832, and then one till 1885. It was incorporated in 1886. Pop. 2700. See works by Moffatt (1805), Sir T. Phillipps (1831), J. E. Jackson (1863), W. de Gray Birch (1874), and Brewer and Martin (2 vols. 1879–81).

Malmö, the third largest town of Sweden, on the Sound, nearly opposite Copenhagen, 17 miles distant. Besides being a busy seaport, it has manufactures of cigars, sugar, beer, and woollens, and some shipbuilding. The exports include grain, flour, butter, eggs, cement, chalk, matches, live-stock, and timber; and the imports, coal, machinery, cotton, grain, textiles, coffee, &c. The old castle in which the Earl of Bothwell was confined is now used as a prison. The town-house is a fine Renaissance building of 1546. Pop. 90,000.

Malpas, a Cheshire market-town, 15 miles SSE. of Chester. Matthew Henry and Bishop Heber were natives. Pop. of parish, 1200.

Malplaquet (*Mâlplâkay'*), a village in the French dep. of Nord, 10 miles S. of Mons in Belgium. Here, on 11th September 1709, Marlborough and Prince Eugene defeated the French under Marshal Villars.

Malström. See Maelström.

Malta (Ital. *Mâhl-ta;* usually *Maulta*), a British Mediterranean island, 17½ miles long by 8¼ broad, with an area of 95 sq. m. It stands on the submarine plateau which, stretching across from Sicily to Africa, divides the Mediterranean into two basins. From its central position in the Mediterranean Sea, 58 miles S. of Sicily, and 180 ESE. of Cape Bon in Algeria, and from the enormous strength of its fortifications—Disraeli called it 'the little military hothouse'—Malta is a very important British dependency. It is the headquarters of the British Mediterranean fleet, the principal coaling station in the Mediterranean—between 500,000 and 600,000 tons of coal are imported for use and re-exportation annually—a powerful stronghold (Valetta), a sanatorium for troops employed in the Orient, and an interesting island historically and architecturally. The governorship (area, 117 sq. m.) includes the island of Gozo (q.v.), and several smaller islets. Malta is oval in shape, the north-eastern and eastern shores being broken into several good harbours; the southern coast rises in picturesque cliffs 400 feet high. The culminating point of the island is 758 feet. Malta has a bare, stony appearance, owing to the absence of trees and the fact that the fields and gardens are enclosed in high walls, to shelter the crops against the violent winds. There are no rivers or lakes; but water is easily obtained from springs, and since 1880 there are government water-works. The soil is thin, but remarkably fertile; and its fertility is increased by the skilful cultivation and the diligent toil of the inhabitants. Large crops of wheat and potatoes are raised, early varieties of the latter being largely exported to England; maize, barley, cotton, clover, oranges, figs, grapes, carob beans, and peaches and other fruits are also grown. Fine honey is produced; in spring the island is gay with flowers. Filigree ornaments and a little cotton are manufactured. During the summer months the thermometer ranges from 75° to 90° F., during the coldest from 50° to 71°. The annual rainfall is 24·23 inches. When the hot sirocco wind blows—not dry as in Africa, but laden with moisture—the climate is enervating; otherwise Malta is fairly healthy. Earthquakes are not infrequent.

In 1881 Malta (132,129) and Gozo (17,653) contained 149,782 inhabitants; in 1911, 228,442, including about 20,000 British and foreign residents, but excluding imperial troops. The language of the people is a corrupt dialect of Arabic, with a strong admixture of Italian and other (but not Phœnician) words. Most educated Maltese speak Italian; but in 1899, on a plebiscite, 75 per cent. of the inhabitants chose English as the school language for their children. The Maltese are a sober, industrious race, though quick-tempered and ignorant, and are devout Roman Catholics. There are two bishops (Malta, Gozo) and 1200 clergy. Canon law is recognised as the civil law of Malta, and a difficulty about mixed marriages was settled only in 1890. Owing to the rapid growth of the population and its density, large numbers are compelled to emigrate; 50,000 of them are scattered all over North Africa and the Levant. Education is provided for in a university (with 200 students), a lyceum (500 pupils), and about 170 government schools (22,000 pupils). Causes of discontent have arisen in the ecclesiastical jealousy of the predominant church, and social jealousy between the impoverished native nobility (for the most part counts and marquises created by the Knights of St John, and fully recognised since 1878) and the upper classes of the British. A constitution based on popular representation was conferred in 1887. The legislative council is partly official, partly elected; the governor, with the power of veto, being president. There is also an executive council; the Crown retains the right to legislate also through orders in council. There is no direct taxation. The government own two-sevenths of the land (the rest is divided about equally between the ecclesiastical establishments and private owners); from the rents of this and other Crown property, and from customs, licenses, &c., the annual revenue of £450,000 to £520,000 is derived. The public debt is £79,000 (1912). There is a railway, 8½ miles long, connecting Valetta (q.v.), the present capital, with the old capital Citta Vecchia, founded in 700 B.C. In Citta Vecchia is the cathedral of St Paul (1697). In the south of the island are megalithic Phœnician temples. The traditional scene of St Paul's shipwreck is on the north side of the Bay of St Paul. The annual imports have risen to £2,700,000, and the exports to about £1,000,000.

The *Hyperion* or *Ogygia* of Homer is sometimes identified with Malta. The Phœnicians colonised the island in the 11th century B.C., and after 700 found rivals in the Greeks, who were driven out about 480. The Romans finally took possession in 216 B.C., retaining the Greek name *Melita.* During the 5th century A.D. it fell successively under the Vandals and the Goths; in 533 Belisarius recovered it for the Byzantine empire; in the 9th century the Arabs occupied it; in 1282 it was conquered by Pedro of Aragon; and in 1530 given in perpetual sovereignty by Charles V. to the Knights of St John of Jerusalem, who raised stupendous fortifications, and sustained successfully a three months' siege by the Turks in 1565. The island surrendered to the French in 1798, was occupied by the British during the French war, and in 1814 finally became British.

See historical works on Malta by Miège (1840), Eton (1802), Avales (1830), Tullack (1861), Winterberg (1879), Bedford (1894), and Bono (Malta, 1899).

Malton, a town in the North and East Ridings of Yorkshire, on the Derwent, 22 miles NE. of York. It consists of New Malton, Norton, and Old Malton. The *Derventio* probably of the Romans, it has the Norman church of a Gilbertine priory (1150), and a free grammar-school, founded in 1545 by Archbishop Holgate; but no trace remains of a Norman castle. Iron and brass founding, tanning, brewing, &c. are carried on; and Norton is famous for its training stables. Till 1868 Malton returned two members, and then till 1885 one. Population of Malton urban district, under 5000; of Norton, 4000.

Malvern, Great, one of the most fashionable watering-places in England, is situated 9 miles SW. of Worcester, and 129 WNW. of London, on the east side of the Malvern Hills, at the foot of the Worcestershire Beacon (1444 feet). It has a fine cruciform church, with a central tower 124 feet high, rebuilt in the reign of Henry VII., and restored in 1860–1. In the centre of the town are large Assembly Rooms (1884) with winter promenade and gardens, and on the outskirts is Malvern College (1863–65), a handsome Gothic building, with 250 boys. Madame Goldschmidt (Jenny Lind) long resided near Malvern. Pop. (1801) 819; (1881) 7934; (1911) 16,513.

Malwa, a former kingdom of India.

Mamers, a town in the French dep. of Sarthe, 43 miles NNE. of Le Mans. Pop. 4000.

Mammoth Cave, in Kentucky, 85 miles by rail SSW. of Louisville. It is about 10 miles long; but it is said to require upwards of 150 miles of travelling to explore its multitudinous avenues, chambers, grottoes, rivers, and cataracts. The main cave is only 4 miles long, but it is from 40 to 300 feet wide, and rises in height to 125 feet. Lucy's Dome is 300 feet high, the loftiest of the many vertical shafts that pierce through all the levels. Some avenues are covered with a continuous incrustation of the most beautiful crystals; stalactites and stalagmites abound. There are several lakes or rivers connected with Green River outside the cave, rising with the river, but subsiding more slowly, so that they are generally impassable for more than six months in the year. The largest is Echo River, three-fourths of a mile long, and in some places 200 feet wide. The air of the cave is pure and healthful; the temperature remains constant about 54°.

Mam Tor, a Derbyshire height (1709 feet), 1¾ mile NW. of Castleton.

Man, Isle of, is situated in the Irish Sea, 16 miles S. of Burrow Head in Wigtownshire, 27 miles SW. of St Bees Head, and 27 E. of Strangford Lough. Its length is 33¼ miles, breadth 12¼ miles, and area 145,325 acres (227 sq. m.), of which nearly 100,000 are cultivated. At the south-western extremity is an islet called the Calf of Man, containing 800 acres. A chain of mountains extends from north-east to south-west, culminating in Snaefell (2024 feet). The coast-scenery from

Maughold Head on the east, passing south to Peel on the west, is bold and picturesque, especially in the neighbourhood of the Calf, where Spanish Head, the southern extremity of the island, presents a sea-front of extreme grandeur. The Douglas Head Marine Drive was opened in 1891. Most of the island consists of clay-slate. Through the clay-schist granite has burst in two localities, in the vicinity of which mineral veins have been largely worked. About 2000 tons of lead are extracted annually, some zinc, and smaller quantities of copper and iron. The principal mines are at Laxey on the east coast, and Foxdale near the west. The climate is mild and equable; myrtles and other exotics flourish throughout the year. The Manx cat is tailless, or nearly. The fisheries (herring, cod, &c.) afford employment to nearly 1000 men and boys. Fat cattle and wheat are shipped to English markets. Castle Rushen, probably the most perfect building of its date extant, was founded in 947. The ruins of Rushen Abbey (1154) are picturesquely situated at Ballasalla. Peel Castle, with the cathedral of St German, is a very beautiful ruin, dating from the 12th century. There are numerous so-called Druidical remains and Runic monuments; the Runic crosses, of which there are some forty, are especially numerous at Kirk Michael. The circular and artificial Tynwald Hill at St John's, near the centre of the island, is a perfect relic of Scandinavian antiquity. The towns, noticed separately, are Castletown, Douglas, the modern capital, Peel, and Ramsey. The principal line of communication is between Douglas and Liverpool, by means of a swift fleet of steamers. There is a submarine cable between Maughold Head and St Bees Head. In 1873 a railway was opened between Douglas and Peel; in 1874 to Castletown and the south; and in 1879 to Ramsey. Extensive improvements in the way of harbour-works, piers, and promenades have been carried out at Douglas, Ramsey, and Peel. Pop. (1821) 40,081; (1901) 54,758; (1911) 52,034, the decrease being due to emigration. Visitors number about 130,000 annually.

The Isle of Man was ruled by Welsh kings from the 6th until near the end of the 9th century, and then by Scandinavian kings, until Magnus, king of Norway, ceded his right in it and the Hebrides to Alexander III. of Scotland (1266). On Alexander's death the Manx placed themselves in 1290 under the protection of Edward I. of England; in 1406 the island was granted to Sir John Stanley in perpetuity, to be held of the crown of England. The Stanley family continued to rule it as Kings of Man, until 1651, when the style of Lord was adopted. On the death of James, tenth Earl of Derby, without issue in 1735, James, second Duke of Athol, descended from the seventh Earl of Derby, became Lord of Man. The Isle of Man having long been the seat of an extensive smuggling trade, the sovereignty of it was purchased by the British government, in 1765, for £70,000 and an annuity of £2000 a year, the duke still retaining certain manorial rights, church patronage, &c. The last remaining interest of the Athol family in the island was transferred to the British crown in 1829; the total amount paid for the island being £493,000. The Isle of Man forms a separate bishopric under the title of Sodor and Man, the bishopric of the Sudoreys—Scandinavian for 'Southern Isles'—having for a time been annexed to Man. The see is, for certain purposes, attached to the province of York; the bishop sits in the House of Lords, but does not vote.

The Isle of Man has home rule—its own laws, law-officers, and courts of law. The legislative body is styled the Court of Tynwald, consisting of the Lieutenant-governor and Council—the latter being composed of the bishop, attorney-general, two deemsters (or judges), clerk of the rolls, water bailiff, archdeacon, and vicar-general—and the House of twenty-four Keys, or representatives. A bill is separately considered by both branches, and on being passed by them is transmitted for the royal assent; it does not, however, become law until it is promulgated in the English and Manx languages on the Tynwald Hill. The House of Keys was formerly self-elective; but in 1866 an act was passed establishing a septennial election by the people; and another in 1880 abolished the property qualification for members, granted household suffrage in towns, £4 owner and £6 tenant franchise in the country, and conferred the suffrage on women. The armorial bearings of Man are three legs in armour conjoined at the thighs. The Manx people are of Celtic origin, with a strong dash of the Scandinavian. The language, belonging to the Goidelic group of the Celtic languages, is now but little spoken. Church service in Manx has been discontinued since the middle of the 19th century. There is no literature beyond a few songs and carols. The Prayer-book was translated into Manx in 1765, the Bible in 1772. A dictionary was compiled in 1835. Down to the middle of the 19th century the island was almost exempt from taxation, and consequently looked upon as a cheap place of residence, while its laws afforded protection to English debtors.

See works by the Rev. J. G. Cumming, Joseph Train, Brown, Hall Caine (1891 and 1894), Spencer Walpole (1893), A. W. Moore (various works—history, names, &c., 1893–1906); also *Chronica Regum Manniæ*, edited by Munch (Christiania, 1860); and the works published by the Manx Society (19 vols. 1858–68).

Manaar′, Gulf of, between Ceylon and the Madras coast, is nearly 200 miles wide at the widest, and is closed on the north by a low reef of rocks and islands called Adam's Bridge. It is famous for its pearl-fisheries.

Manacor′, a town of Majorca, in a fertile plain, 30 miles E. of Palma by rail. Pop. 12,000.

Mana′gua, the capital of Nicaragua, lies in a fertile district, on the south shore of Lake Managua, 53 miles by rail SE. of Leon. Pop. 40,000. For the lake, see Leon.

Manáos, capital of the Brazilian province of Amazonas, on the Rio Negro, 12 miles above its confluence with the Amazon. Pop. 60,000.

Manasarowar. See Tibet.

Manassas, formerly Manassas Junction, a village close to Bull Run (q.v.). The Confederates here won two victories.

Manbhum, an eastern district of Chota Nagpore (q.v.). Area, 4147 sq. m.; pop. 1,500,000.

Mancha, La (*Man'tcha*), a district of Spain, the southernmost part of the old kingdom of New Castile, comprising most of the province of Ciudad Real, with parts of Albacete, Toledo, and Cuenca. It is the country of Don Quixote.

Manche (*Mon*^{g}*sh*; 'sleeve'), a maritime Norman dep. of NW. France, derives its name from La Manche (the English Channel), which washes its rocky coasts. Greatest length, 81 miles; average breadth, 28 miles; area, 2289 sq. m. Pop. (1872) 544,776; (1911) 467,119. The dep. is divided into the six arrondissements of St Lô (the capital), Coutances, Valognes, Cherbourg, Avranches, and Mortain.

Man'chester (Sax. *Mamcestre*), a municipal, parliamentary, and (since 1888) county borough of Lancashire, is situated on the east bank of the Irwell, 31 miles E. of Liverpool and 187 NNW. of London. Salford is on the opposite bank; and the two boroughs, connected by sixteen bridges (besides railway viaducts), may be considered one city. Manchester is the acknowledged centre of the greatest manufacturing district in the world, and is surrounded by a ring of populous suburban townships, many of which have by degrees been incorporated with it. Pop. (1801) 75,275; (1851) 303,382; (1871) 351,189; (1901) 543,969; (1911) 714,333—or with Salford, 945,680. In and around Manchester and Salford two-thirds of the entire cotton manufactures of the United Kingdom are located; and there are some 700 other industries practised in the district, including bleaching, dyeing, with silk-works and manufactories of all kinds of animal and vegetable fibre. Both boroughs were enfranchised by the Reform Bill of 1832, Manchester returning two members and Salford one member to parliament. The Reform Bill of 1867 gave Manchester three and Salford two members, and that of 1885 six and three members respectively.

The Cathedral, or 'Old Church' (1422), is a fine Gothic structure, and between 1845 and 1868 underwent complete restoration; it comprises a stalled choir of great beauty, a retrochoir, lady chapel, lateral chapels, chapter-house, and a tower 139 feet high, with ten bells. Besides many Anglican, Roman Catholic, and dissenting churches, Manchester has 12 Jewish synagogues, German churches, a Greek church, and an Armenian church. The magnificent Gothic town-hall (1868–83), by Waterhouse, is triangular in form, built of brick, faced with freestone and granite, and cost £1,053,000. Its great hall is decorated with twelve remarkable pictures illustrating the history of Manchester, by Madox Brown. The clock-tower, 286 feet high, contains a fine peal of twenty-one bells. For the Royal Infirmary (1755) a new building was opened in 1909. The Royal Institution (1825–30), a noble Doric edifice by Barry, contains a gallery of paintings, a school of design, and a lecture theatre. The Royal Exchange (1864–74), an imposing building in the Italian style, has a meeting-hall with the vast area of 5170 square yards. The Free-trade Hall (1856) holds 5000 people, and stands on the scene of the 'Peterloo Massacre.' The Assize Courts (1864), by Waterhouse, are a splendid specimen of Gothic architecture, and cost £100,000. The Literary and Philosophical Society (1789) has a valuable scientific library and a chemical laboratory, and publishes memoirs. There are about seventy other societies and institutions.

The old water-supply was collected on the slopes of Blackstone Edge, distant about 20 miles; but in view of the rapid increase of the population the city council purchased Thirlmere Lake in Cumberland, from which comes, by works 100 miles long and carried out in 1885–94, a further supply of 25,000,000 gallons daily. There are now in Manchester and Salford eleven parks, with eight recreation grounds, covering altogether 300 acres. Manchester was the first borough to take advantage in 1852 of the Free Libraries Act. Manchester in 1890 received the Whitworth Institute, a park, library, and museum from the Whitworth legatees, to be incorporated with the Technical School and School of Art. The Chetham Library, founded by Humphrey Chetham in 1653, with many rare books and manuscripts, was the first free library in England. The John Rylands was founded by Mrs Rylands in 1899. Mention may be made also of the Athenæum, Royal Exchange, Portico, and Law and Foreign Libraries, &c. Among statues and monuments are those of the Duke of Wellington, Sir R. Peel, Watt, Dalton, Prince Albert, Bishop Fraser, Dr Joule, John Bright, Cobden, Humphrey Chetham, Cromwell, and O. Heywood.

The Grammar-school was founded by Hugh Oldham, Bishop of Exeter, in 1515, had a revenue of £4000 a year in 1825, and in 1868 was reorganised for 350 boys, with scholarships at Brazenose, Oxford, and St John's, Cambridge. There is also a hospital school, founded in 1651 by Humphrey Chetham, for maintaining, educating, and apprenticing forty (now 100) healthy and poor boys. Owens College (1851; chartered as an independent Victoria University, 1903) is due to the liberality of John Owens, who died in 1846, leaving by will £100,000 for the purpose; and in 1870 a further sum of £90,000 was expended on new buildings, &c. The college has professors and lecturers in the Arts, Science, and Law department, and in the Medical department, with departments for women and for evening classes, and excellent library and museum. The students number over 1100 (including about 250 women), besides evening scholars. The Technical School, with which in 1883 was incorporated the Mechanics' Institute, and in 1890 the Manchester Whitworth Institute, gives thorough technical training in theoretical and practical engineering, designing, spinning and weaving, printing, dyeing, and bleaching, metallurgy, chemistry, &c. The sanitary condition of Manchester is not a satisfactory one, and in consequence the death-rate was long very high, but by 1910 was reduced to 16 per 1000. Much has been done to improve matters; but the smoke nuisance remains, and the Irwell, which flows through a dense population, receives sewage from more than a million persons and pollution from thousands of public works.

Manchester is mentioned as a Roman station (*Mancunium*), and was called by the Anglo-Saxons *Manigceaster*. In the 13th century there was a fulling-mill, and dyeing yarns or cloth was practised. Camden, in the reign of Queen Elizabeth, writes of it as surpassing neighbouring towns in elegance and populousness, with woollen and cotton manufactures, a church, market, and college. In 1724 Stukely describes it as 'the largest, most rich, populous, and busy village in England. Here are about 2400 families, and their trade, which is incredibly large, consists of fustians, tickings, girth-webbs, and tapes.' The great revolution in the industrial life of England—the development of the factory system—began here about the middle of the 18th century, and was accompanied by the application of many inventions, notably the steam-engine, to the service of man. In 1720 the Irwell was made navigable. In 1762 the Bridgewater Canal put Manchester in communication with the coalfields of Lancashire and the salt-mines of Cheshire, and made an outlet to the sea. In 1830 Manchester had its first perfect railway. To render 'Cottonopolis' an inland seaport, the gigantic work of making a ship-canal from Eastham near the mouth of the Mersey, a distance of 35½ miles, was carried out in 1887–94, at a cost of £15,500,000. A perfect network of railways and canals radiates from Manchester in all directions. It became a city and the see of a bishop in 1847, and since 1893 its mayor is officially lord-mayor. The Anti-corn-law League had its origin here; and the *Manchester School* was a party of English Radicals, including Cobden, Bright, and Milner Gibson, which identified itself with free-trade principles and resistance to government interference (as with factory labour), supported a policy of *laissez faire*, and in foreign affairs was a peace party, insisting strongly on non-intervention. See works on Manchester by Whitaker (1771), Prentice (1850-53), Reilly (1861), Proctor (1880), Axon (1886), Saintsbury (1887), Crowther (1894), and Perkins (1901).

Manchester, (1) the largest city of New Hampshire, stands mostly on the east bank of the Merrimac River, 16 miles S. of Concord, and 59 NNW. of Boston. Its principal streets are wide and shaded with elms, and it has several public parks. The river here falls 54 feet, affording abundant water-power. The chief industry is the manufacture of cottons and woollens; but locomotives, fire-engines, sewing-machines, wagons, edged tools, boots and shoes, paper, &c. are also manufactured. Manchester is the seat of a R. C. bishop. Pop. (1900) 56,987; (1910) 70,063.—(2) A town of Connecticut, on the Hockanum River, 9 miles by rail ENE. of Hartford, with manufactures of cotton, woollens, silk, paper, &c.; pop. 12,600.—(3) A manufacturing town of Virginia, on the James River, opposite Richmond; pop. 11,000.

Manchuria, or the country of the Manchus, is the north-easternmost division of the Chinese dominions, bounded by the river Amur, the Usuri, the Russian Maritime Province, Corea, the Yellow Sea, and Mongolia. It embraces three provinces —Mukden, Heilung-chiang, and Kirin. Total area, 360,000 sq. m.; pop. 20,000,000. The east and centre are largely occupied by the Long White Mountains (8000 feet), whilst the northern province is crossed by the Chingan Mountains. The central parts of the country are watered by the Sungari, which after a course of 850 miles joins the Amur. The hills are rich in timber, pines predominating; in minerals, chiefly gold, silver, coal, and iron; and in fur-bearing and other animals. The rivers swarm with salmon and trout. The climate is temperate in summer (May to September), but very severe in winter. The soil is extremely fertile. Of the population perhaps a million are Manchus, the rest being Chinese immigrants. The principal towns are Mukden, the capital; Kirin; Harbin (or Kharbin), junction of the terminal lines of the Siberian railway; New-chwang (q.v.); besides Port Arthur and Dairen, under Japanese rule. The Russian occupation of northern Manchuria was a main cause of the Russo-Japanese war (1904-5), of which southern Manchuria was the main theatre. In the 17th century a Manchu chief ascended the throne of China, and founded the dynasty that reigned there till 1911. Japan holds the Liaotung peninsula, and has considerable railway and other trade privileges in southern Manchuria. In 1910 Russia and Japan agreed to maintain the *status quo* in Manchuria. See books by Hosie (1901) and Whigham (1904).

Man'dalay, chief town of Upper Burma, stands 2 miles from the left bank of the Irawadi, a little N. of Amarapura, the former capital, and 410 miles by rail (1889) N. of Rangoon. Founded in 1860, it was the capital of independent Burma until its capture by the British in 1885. Silk-weaving is the chief industry; the others are gold and silver work, ivory and wood carving, bell and gong casting, and knife and sword making. In 1886 one-tenth of the city was burned to the ground, and an inundation of the river caused immense damage; in 1892 two-thirds of the city were burned. Pop. 138,500.

Mandogarh, or MANDU', a ruined city of India, formerly capital of the Mohammedan kingdom of Malwa, 15 miles N. of the Nerbudda, and 38 SW. of Indore. The ruins stretch for 8 miles along the crest of the Vindhya Mountains.

Manduria, a town of southern Italy, 22 miles E. by S. of Taranto; pop. 13,120.

Mandvi, the seaport of Cutch, in India, on the north shore of the Gulf of Cutch; pop. 20,000.

Manfredonia, a seaport of Italy, on a bay of the Adriatic, 23 miles by rail NE. of Foggia. Founded by Manfred in 1261 from the ruins of ancient Sipontum, it has an old castle and a cathedral. Pop. 12,200.

Mangalore, a seaport and military station in South Kanara district, Madras. A clean, picturesque town, embosomed in cocoa-nut palm groves, it ships much coffee, has a R. C. cathedral and college, and is also the headquarters in India of the Basel Lutheran Mission. Thrice sacked by the Portuguese in the 16th c., Mangalore was taken by Hyder Ali in 1763. In 1784 its English garrison yielded to Tippoo Sultan after a nine months' siege. British since 1799, it was burned by the Coorg rebels in 1837. Pop. 50,000.

Manhattan Island, the island on which the oldest part of New York City stands.

Manica (*Manee'ca*), a gold-field long worked by the Portuguese, 130 miles NW. of the port of Beira. It is now mostly included with Mashonaland (q.v.). Part is Portuguese. The railway from Beira to Salisbury crosses it.

Manihiki Islands (*Mannyhee'kee*), a group of low, wooded atolls, scattered over the central Pacific, between the Marquesas and Union groups; total area, 55 sq. m.; pop. 2000. The principal islands are Caroline, Malden, Starbuck, Penrhyn, Humphrey, Vostok, Flint, &c. They belong to Britain. The more southerly were annexed to New Zealand in 1901.

Manila (*Manee'la;* often spelt *Manilla*), chief town of the Philippine Islands, stands on a wide bay on the south-west coast of Luzon, 650 miles SE. of Hong-kong, with which city it has been connected by telegraph since 1881. On the south bank of the little Pasig River stands the sleepy old town (founded in 1571), with the archbishop's palace, churches and monasteries, the cathedral, university of San Tomas, and Jesuit observatory. On the north bank are suburbs, Binondo, &c., commercial and native quarters. The city is specially liable to visitations of earthquakes, typhoons, and thunderstorms. The mean temperature for the year is 82° F. The pop. in 1910 was 234,410 including some 18,000 Chinese and 3000 Spaniards. Cigars and tobacco, sugar, Manilla hemp or abaca, and coffee are the chief exports; and cotton goods, rice, wine, silk, and flour the imports. In Manila Bay in 1898 Dewey destroyed the Spanish fleet; and since the American occupation of the Philippine Islands, the city, still the capital, has been replanned and harbour improvements carried out. The capitol, built for the Legislative Assembly (instituted 1907), is surrounded by government offices, library, museum, observatory, laboratories, and hospitals. The new university buildings are in the north of the town.

Manipur, a native state in the north-east of India, occupying some 8000 sq. m. of for the most part heavily timbered mountain-land between Burma, Assam, Chittagong, and Cachar; pop. about 350,000—mainly Kukis and semi-Hindu hill and forest tribes—collected most thickly in one valley, 650 sq. m., situated 2500 feet above sea-level. Most of the work in the country is performed by women. The men are incorrigibly lazy, but passionately fond of the game of polo.—The *capital*, called Manipur, also Imphail, is a vast group of suburban residences, in the midst of a large forest; pop. 67,100. In 1892 a British force of 470 men, sent to depose the rebellious 'senaputti' or commander-in-chief, was forced to retire, after the chief-commissioner and four others had been treacherously murdered. In April General Graham avenged this outrage, and the 'senaputti' was hanged. In 1907 the state was restored to its native ruler.

Manitoba (originally *Manit'oba;* now usually *Manito'ba*), a province of Canada, bounded by Saskatchewan, the North-west Territories, Ontario, Minnesota, and North Dakota. Area, extended to Hudson Bay by the addition in 1912 of 178,100 sq. m., comprises a total of 251,832 sq. m.; pop. (1901) 255,211; (1911) 455,614. The chief towns are Winnipeg (136,000), Brandon, and Portage la Prairie. The province is traversed by several rivers, among others the Churchill and the Nelson, which conveys from Lake Winnipeg to Hudson Bay the waters of the Saskatchewan, the Red River of the North (with its tributary the Assiniboine), and the Winnipeg River. The principal lakes are Winnipeg, 9500 sq. m.; Manitoba, 1800 sq. m.; and Winnipegosis, 2100 sq. m. The country consists for the most part of a level plain, with occasional undulations. The summer mean temperature is 65° to 70°—nearly the same as that in the state of New York. In winter the thermometer occasionally, but very rarely, sinks to 30°, 40°, and 50° below zero. The atmosphere is bright and dry, and the cold is not so much felt as in many countries with a higher temperature and a more humid atmosphere. Very little snow falls on the prairies, the average depth being about 18 to 24 inches; the native horses graze out of doors all the winter. The soil is of remarkable depth and fertility, and in favourable seasons the crops are large. Vegetables and roots are unusually prolific and of great size. Wheat-growing was for some few years the staple industry; but the farmers are now engaged more in mixed farming, including dairy-farming and the raising of cattle and sheep. In minerals the province is not very rich, but coal is found in southern Manitoba. Big game is still found in the less accessible parts of the province—moose, bear, and some kinds of deer. Small game is plentiful—principally prairie chicken and wild duck. A considerable fishing industry is carried on in the rivers and lakes. The government is administered by a lieutenant-governor, appointed by the governor-in-council. He is assisted by an Executive Council and a Legislative Assembly of 40 members elected by the people. There is only one House of Parliament in Manitoba. The province is represented by four members in the Dominion Senate, and by ten in the House of Commons. Keewatin (q.v.) was under the Lieutenant-governor.

Manitoba is in communication by rail with the Atlantic seaboard and the Pacific, and with all parts of Canada and the United States. The Canadian Pacific Railway (1885) was of immense advantage to the province. Another transcontinental line was nearly completed in 1913; and one was in progress to Hudson Bay. Until 1868 what is now Manitoba formed a portion of the territory under the control of the Hudson Bay Company, and hither in 1812 the Earl of Selkirk brought a party of Highland settlers. In 1868 the company gave up their rights, on certain conditions—among others a money payment of £300,000 and a considerable grant of land. The province was constituted by an Act of 1870. The Riel rebellion in 1869–70 arose out of a feeling of some of the inhabitants that their rights had not been considered in the transfer. See books on Manitoba by Bryce (1882), Christie (1885), Macoun (1883), and Legge (1893).

Manitou, a summer-resort at the base of Pike's Peak, Colorado, 6296 feet above sea-level. It is the Saratoga of the west, with soda springs and several large summer hotels. Pop. 1500.

Manitoulin Islands, a chain of wooded islands in Lake Huron, separating it from Georgian Bay. The chief are Grand Manitoulin (80 by 28 miles), Cockburn Isle, and Drummond Isle; the last belongs to Michigan, the rest to Ontario.

Manitowoc', capital of Manitowoc county, Wisconsin, at the mouth of the Manitowoc River, on Lake Michigan, 77 miles by rail N. of Milwaukee. It has a good harbour, and carries on shipbuilding, lumber-sawing, and the manufacture of furniture, machinery, &c. Pop. 13,000.

Manka'to, capital of Blue Earth county, Minnesota, on the right bank of the Minnesota River, 86 miles SW. of St Paul. It has a state normal school, R. C. college, &c. Pop. 10,000.

Mannheim (*Mann'hīme*), once capital of the Rhenish Palatinate, and now the chief trading-town in Baden, on the right bank of the Rhine, here joined by the Neckar, 53 miles S. of Frankfort. The town is remarkable for its cleanliness and regularity. The palace (1720–29) is one of the largest in Germany, covering 15 acres, with a façade 580 yards long, and 1500 windows. The Schillerplatz is adorned with colossal statues of Schiller, Dalberg, and the actor and dramatist Iffland (1759–1814). There are manufactures of iron, cigars, carpets, india-rubber, &c. Pop. (1875) 46,453; (1910) 141,131, of whom about 70,000 were Catholics. Mannheim was a mere village till 1606, when a castle was built by the elector-palatine, around which a town grew up, peopled chiefly by Protestant refugees from the Low Countries. It was totally destroyed by the French in 1689, rebuilt and strongly fortified, and in 1795 severely bombarded by the Austrians.

Manningtree, an Essex town, on the tidal Stour, 8¾ miles NE. of Colchester. Pop. 900.

Manorbier, a ruined castle on the Pembrokeshire coast, 5 miles ESE. of Pembroke. It was the birthplace of Giraldus Cambrensis.

Manorhamilton, a market-town of Leitrim, 23½ miles E. of Sligo. Pop. 900.

Manor Water, a Peeblesshire stream, running 10½ miles N. by E. to the Tweed, 1¾ mile WSW. of Peebles. Manor parish was the home of the 'Black Dwarf.'

Manresa, a town of Spain, on the Cardoner, 41 miles by rail NW. of Barcelona. It has a fine church (1020–15th century), the cave of Ignatius Loyola, and manufactures of cotton, broadcloths, brandy, &c. In 1811 it was fired by Marshal Macdonald. Pop. 22,000.

Mans, Le (*Mong*), a picturesque city of France, the capital formerly of the province of Maine, and now of the dep. of Sarthe, on the left bank of the river Sarthe, 132 miles SW. of Paris by rail. The cathedral, 390 feet long, has a Romanesque nave of the 11th and 12th centuries, and a matchless Pointed-Gothic choir of the 13th century, 104 feet high, with splendid stained glass. In the right transept is the monument of Berengaria, Cœur-de-Lion's queen. Le Mans does a large trade in poultry and clover-seed, and manufactures candles, woollens, lace, soap, &c. Pop. (1872) 42,654; (1911) 69,361. The *Cenomanum* of the Romans, and the birthplace of Henry II. of England, Le Mans witnessed in 1793 the dispersion of 10,000 Vendéans; and in 1871 the defeat, after a stubborn resistance, of 100,000 Frenchmen under Chanzy by Prince Frederick-Charles. A statue of Chanzy was erected in 1885, and one of the naturalist Belon in 1887.

Mansfield, a municipal borough (incorporated 1891) of Nottinghamshire, in Sherwood Forest, 17 miles N. of Nottingham. Its grammar-school (1561) has been rebuilt at a cost of £10,000; and there are a memorial cross (1850) to Lord George Bentinck, a town-hall (1836), an interesting parish church, &c. Mansfield stands in the centre of a mining district, and manufactures lace-thread and iron. Pop. (1851) 10,012; (1911) 36,888. See Harrod's *History of Mansfield* (1801).

Mansfield, capital of Richland county, Ohio, 179 miles by rail NE. of Cincinnati. It has iron-foundries and manufactories of flour, agricultural implements, stoves, tiles, &c. Pop. 21,000.

Mansourah, a town of Lower Egypt, on the Damietta branch of the Nile, 30 miles SW. of Damietta by rail. Pop. 40,500. The place was founded in 1220, and here St Louis of France was imprisoned in 1250.

Mantchuria. See MANCHURIA.

Mantes (*Mon^{g}t*), a town in the French dep. of Seine-et-Oise, on the Seine's left bank, 36 miles by rail WNW. of Paris. It has a striking tower (1344) and a beautiful church, a reduced copy of Notre Dame at Paris. The Celtic *Meduntа*, Mantes in 1083 was sacked by William the Conqueror, who here received the injury that caused his death; and here too Henry IV. was converted from Protestantism. Pop. 10,000.

Mantine'a, an ancient city of Arcadia, in the Peloponnesus, on the river Ophis. Here Epaminondas fell in the moment of a great victory over the Spartans, 362 B.C.

Mantua (Ital. *Man'tova*), a strongly fortified city of northern Italy, formerly capital of a duchy, 38 miles by rail N. of Modena and 25 S. by W. of Verona. It occupies two islands formed by the Mincio, and, standing in the midst of a marshy district, is one of the four fortresses of the Quadrilateral. Chief amongst the buildings are the ducal palace, dating from 1302; the Palazzo Te, outside the city walls on the south, the greatest monument to the skill of Giulio Romano as architect, painter, and sculptor; the cathedral of San Pietro; and the church of San Andrea, one of the finest Renaissance churches in Italy, containing the tomb of Mantegna. There are an academy of arts and sciences, a library with 80,000 vols. and 1000 MSS., a museum of antiquities, an observatory, &c. Virgil was born at Pietole (anc. *Andes*), now a suburb of Mantua. The industries include weaving, tanning, and saltpetre-refining. Mantua, an Etruscan town, was successively held by Romans, Ostrogoths, and Lombards, and from 1328 till 1708 was governed by the Gonzaga family. The last duke dying childless, his duchy was confiscated by Austria, who retained it till 1866. Pop. 33,000 (some 4000 Jews).

Manytch. See ASIA, p. 52.

Manzanares. See MADRID.

Manzanillo, (1) a port of Mexico, on a fine bay opening to the Pacific, 31 miles by rail WSW. of Colima. Pop. 4000.—(2) A port on the south coast of Cuba. Pop. 15,000.

Mapledurham, (1) Hampshire, 2 miles SW. of Petersfield, the seat of Gibbon the historian.—(2) Oxfordshire, on the Thames, 3½ miles NW. of Reading, a fine Tudor mansion (1523).

Mar, an ancient district of Scotland, between the Dee and the Don, comprising nearly the south half of Aberdeenshire, and subdivided into Braemar, Midmar, and Cromar.

Maracaybo (*Marakī'bo*), a fortified city of Venezuela, on the west shore of the strait which connects the lake and gulf of Maracaybo. It is a handsome town, with many gardens and squares, a college, theatre, German club-house, &c. The trade is chiefly in the hands of Germans, Danes, and North Americans. The staple exports are coffee, boxwood, lignum vitæ, cedar, and other woods, hides and skins. Pop. 44,284.—The Gulf of Maracaybo is a wide inlet of the Caribbean Sea, connected with the fresh-water Lake of Maracaybo, which is shut in by lofty mountains, and though deep is difficult of entrance by reason of a bar.

Maragha, a town of western Persia, 55 miles S. of Tabriz. Pop. 15,260.

Marajó, a low, fertile island (17,860 sq. m.) between the Amazon and Para estuaries.

Marakesh. See MOROCCO.

Maranham', or MARANHÃO, a maritime state of Brazil, bounded N. by the Atlantic. Area, 177,566 sq. m.; population, 631,000.—The chief city is Maranham, or São Luiz de Maranhão, on an island between the mouths of the Mearim and Itapicurú. It has a cathedral, a technical school, sugar and cotton factories, and docks. The exports are cotton, sugar, hides, gum, balsam, cotton-seed, india-rubber, &c. Pop. 40,000.

Marañon. See AMAZON.

Marash, a town of Asiatic Turkey, 80 miles NE. of Alexandretta, its port. It is a market for Kurt carpets and embroideries. Hittite antiquities have been discovered. Pop. about 50,000.

Mar'athon, a village on the east coast of ancient Attica, 22 miles NE. of Athens. It stood in a plain 6 miles long and from 3 to 1½ miles broad, between the sea and the mountains, and saw the great defeat of the Persian hordes of Darius by the Greeks under Miltiades (490 B.C.).

Marazi'on, or MARKET-JEW, a Cornish watering-place, on Mounts Bay, 3½ miles E. by N. of Penzance. Pop. of parish, 1200.

Marblehead a seaport of Massachusetts, 18 miles NE. of Boston. Pop. 7500.

Marburg (*Mar'boorg*), a quaint old town in the Prussian province of Hesse-Nassau, on the Lahn, 59 miles by rail N. of Frankfort. It is built on a terraced hill, whose summit is crowned by a stately castle, dating from 1065, in which was held in 1529 a conference between the Wittenberg and the Swiss reformers. The fine Gothic church with two towers 243 feet high, was built in 1235-83 by the Teutonic Knights over the splendid shrine of St Elizabeth. The university occupies new Gothic buildings of 1879. It was founded in 1527 for the Reformed Church; and among its earliest students were Patrick Hamilton and William Tyndale. It has 800 to 1000 students. Pop. 22,000.—(2) A town of Austria-Hungary, on the Drave, 30 miles NE. of Gratz. It is the seat of a bishop, and has notable schools and manufactories. Pop. 27,500.

March, a market-town of Cambridgeshire, on the Nen, 14 miles E. of Peterborough and 16 NW. of Ely. Pop. 8400.

March (*Marhh;* Slav. *Morava*), the principal river of Moravia, rises on the boundary with Prussian Silesia, and flows 214 miles south to the Danube, 6 miles above Presburg.

Marchena (*Marchay'na*), a town of Spain, 47 miles by rail E. by S. of Seville, with a ducal palace and sulphur-baths. Pop. 14,154.

Marcianisi (*Marchanee'zee*), a town of Italy, 18 miles by rail N. of Naples. Pop. 11,083.

Mardin, a town of Asiatic Turkey, 60 miles SE. of Diarbekir. Pop. 15,000.

Maree', LOCH, a beautiful lake of Ross-shire, 40 miles W. of Dingwall. Lying 32 feet above sea-level, it is 12½ miles long, 3 furlongs to 2½ miles broad, 360 feet deep, and 11 sq. m. in area. It is overhung by mountains 3000 feet high; sends off the Ewe, 3 miles long, to the sea; and contains twenty-seven islets, one with remains of an ancient chapel and a graveyard. Queen Victoria stayed here in 1877.

Marem'ma (corrupted from *Marittima*, 'seaboard'), a marshy region of Italy, extending along the Tuscan sea-coast from the Cecina to Orbitello, and about 1000 sq. m. in area.

Maren'go, a village of northern Italy, in a marshy district near the Bormida, 3 miles SE. of Alessandria. Here, on 14th June 1800, Napoleon defeated the Austrians.

Mareo'tis, or MAREIA, LAKE, the modern *El Mariût*, a salt lake or marsh of Egypt, extends southward from Alexandria, and is separated from the Mediterranean by a narrow isthmus of sand. In the 15th and 16th centuries it was a navigable lake; in 1798 the French found it a dry sandy plain; but in 1801 the English army cut the dikes of the canal that separated it from the Lake of Aboukir, to cut off the French water-supply, and Mareotis became once more a marsh. The like happened again in 1803, in 1807, and in 1882, when the sea was introduced directly through a cutting 15 feet wide and half a mile long.

Margarita (*Margaree'ta*), an island in the Caribbean Sea, belonging to Venezuela. Area, 380 sq. m.; pop. 40,000. Discovered by Columbus in 1498, Margarita has revived its famous pearl-fisheries, but its chief export is salted fish.

Margate, a seaport and municipal borough in the Isle of Thanet, Kent, 3 miles W. of the North Foreland and 74 E. by S. of London, is the favourite seaside resort of London holiday-makers, who, during the season, by rail and by steamer, pour into the town in their thousands. Possessed of many natural advantages in its bracing air, good bathing, and excellent firm sands, Margate offers besides all the customary attractions of a watering-place, with its pier (900 feet long), jetty (over ¼ mile long), theatre, assembly-rooms, baths, zoological gardens, &c. It contains also two interesting churches—one exhibiting traces of Norman and Early English work, and the other with a tower of 135 feet, forming a conspicuous landmark; the Royal Sea-bathing Infirmary (1792; enlarged 1882); a town-hall (1820); and an extensive deaf and dumb asylum (1875–86). Queen Victoria visited the town in 1835, where too Turner the painter was at school. Pop. (1801) 4766; (1911) 27,085.

Margaux (*Mar-go'*), a village 15 miles by rail NNW. of Bordeaux, near the Gironde's left bank. Its château (a handsome Italian villa) and celebrated vineyards are ½ mile distant. Pop. 1819.

Marghilan, two towns of Ferghana (q.v.).

Marianna, an episcopal city of Brazil, 3 miles E. of Ouro Preto. Pop. 5000.

Marianne Islands. See LADRONES.

Maria-Theresiopel. See SZABADKA.

Mariazell (*Maree'atzell'*), the most famous place of pilgrimage in Austria, in the extreme north of Styria, 25 miles N. of Bruck and 60 SW. of Vienna. The image of the Virgin (brought here in 1157) is enshrined in a magnificent church, rebuilt in 1644. Pop. 1165.

Marie Galante (*Maree' Galon*^{g}*t*), a wooded coral French island, in the West Indies, discovered by Columbus in 1493, lies 17 miles SE. of Guadeloupe. Area, 58 sq. m. Sugar, coffee, cocoa, and cotton are exported. Pop. 15,000. Chief town, Grandbourg or Marigot, on the SW. coast.

Marienbad (*Maree'enbad*), one of the most frequented of the Bohemian spas, 47 miles by rail NW. of Pilsen, and 2057 feet above sea-level. Its saline springs (48°–54° F.) had long been used, both internally and as baths, by the people of the vicinity, but it is only since 1807–8 that it has become a great health-resort. The waters are largely exported. Marienbad is surrounded by wooded heights, has a pop. of 5000, and is visited every season by over 14,000 patients.

Marienberg, a mining-town of Saxony, 38 miles SW. of Dresden. Pop. 7139.

Marienburg (*Maree'enboorg'*), a Prussian town, on the Nogat, 30 miles by rail SSE. of Danzig. From 1309 till 1457 it was the headquarters of the Teutonic Order, and thereafter till 1772 belonged to Poland. The Gothic castle (1274) was restored in 1817–42. Pop. 12,736.

Marienwerder (*Maree'enver'der*), a town of West Prussia, 3 miles E. of the Vistula and 55 by rail S. of Danzig. It was founded in 1233 by the Teutonic Knights, and has an old castle and a minster (1384). Pop. 10,000.

Marietta, capital of Washington county, Ohio, on the Ohio River, 105 miles SE. of Columbus. Founded in 1788, it is the seat of a college (1835), trades in the neighbouring petroleum, and has remains of the earth-builders. Pop. 13,350.

Marinette, a town of Wisconsin, on Green Bay, at the mouth of the Menomonee River, 177 miles by rail N. of Milwaukee, with a busy trade in lumber, &c. Pop. 18,000.

Marino (*Maree'no*), a town on the Alban Hills, 21 miles SE. of Rome, has an old castle of the Colonnas, and a cathedral. Pop. 6071.

Marion, (1) capital of Grant county, Indiana, on Mississinewa River, 157 miles by rail SE. of Chicago, with foundries, lumber-mills, &c. Pop. 24,200.—(2) Capital of Marion county, Ohio, 46 miles by rail N. of Columbus, with manufactures of machinery, farm implements, &c. Pop. 18,200.

Mariposa, a central county of California, with the Sierra Nevada on its north-east border. It contains the Yosemite Valley, besides a grove of giant sequoias.

Marisco Castle. See LUNDY.

Maritime Province (*Primorskaya*), part of eastern Siberia, extending along the Pacific from Corea to the Sea of Okhotsk, but not now including Kamchatka and north Saghalien; from the enormous area of 730,000 sq. m., it is now reduced to 210,000.

Maritza (anc. *Hebrus*), a river of Bulgaria and Turkey, rises in the Balkans, and flows 270 miles E. by S. and S. by W. past Philippopolis and Adrianople to the Gulf of Enos in the Ægean.

Maritzburg. See PIETERMARITZBURG.

Mariu'pol, the seaport for the south Russian coalfield, on the Sea of Azov, 65 miles W. of Taganrog. It was founded in 1779 by Greek emigrants from the Crimea. Pop. 50,000.

Market-Bosworth. See BOSWORTH.

Market-Deeping, a Lincolnshire town, on the Welland, 7½ miles SSE. of Bourn. Pop. 970.

Market-Drayton, or DRAYTON-IN-HALES, a town of Shropshire, on the Tern, 18 miles NE. of Shrewsbury. It has a grammar-school (1554) and a church dating from the 12th century, up whose spire Clive clambered as a boy. At Bloreheath, 3 miles to the east, the Yorkists won a victory in 1459. Pop. of parish, 5800. See works by Lee (1861) and Marshall (1884).

Market-Harborough, a market-town of Leicestershire, on the river Welland and the Union Canal, 16 miles SE. of Leicester, 18 N. of Northampton, and 84 NNW. of London. It has traces of a Roman camp; a fine Perpendicular church, built by John of Gaunt as an atonement for his intrigue with Catharine Swynford, with a broach spire 154 feet high; a corn exchange (1858); and a grammar-school (1614; restored 1869). Charles I. slept here before Naseby. Situated in a rich grazing country, it is a famous hunting-centre, and gives title to one of Whyte-Melville's novels. Population about 9000. See works by John H. Hill (1875) and J. E. Stocks (1890).

Markethill, a town of Armagh, 13 miles NW. of Newry. Pop. 750.

Market-Jew. See MARAZION.

Market-Rasen, a market-town on the Rasen, 15 miles NE. of Lincoln. Pop. 2300.

Market-Weighton, a town of Yorkshire, 19 miles ESE. of York. Pop. of parish, 1800.

Markinch, a town of Fife, 11½ miles SSW. of Cupar. Pop. 1650.

Markirch (*Mar-kirhh; Fr. Ste-Marie-aux-Mines*), a town of Upper Alsace, on the Leber, 40 miles SW. of Strasburg by rail, with important cotton and woollen mills. Pop. 12,000.

Marlborough (*Mol'bro*), an interesting market-town of Wiltshire, pleasantly situated in the valley of the Kennet, near Savernake Forest, 75 miles W. of London and 11 SSE. of Swindon. Its broad High Street contains some picturesque houses, and at the east end is St Mary's Church with the town-hall (1790); at the west St Peter's with the college. Near the latter is a British mound, on which early in the 12th century Bishop Roger of Salisbury built a castle. This afterwards became a royal residence; and here in 1267 Henry III. held the parliament which enacted the 'Statutes of Marleberge' for restoring good government after the Barons' wars. An ancient municipal borough, Marlborough, till 1867, returned two members, and till 1885 one. Population a little over 4400.—Marlborough College was incorporated in 1845, and obtained an additional charter in 1853; the number of pupils is between 500 and 600, about 70, sons of clergymen, being on the foundation. The nucleus of the college buildings was formerly a famous coaching-house; and their special glory is the new Early Decorated chapel, with apsidal chancel, completed in 1886, at a cost of £30,000. William Morris was a Marlborough boy. See works by Waylen (1854), Hulme (1881), Bradley (1893), and Lockwood (1893).

Marlborough, a provincial district of New Zealand, in the north-east corner of the South Island, 130 miles long by 30 broad; area, 3,051,920 acres, of which 200,000 are agricultural land and 1,300,000 pastoral. Amongst the minerals are gold, antimony, copper, and coal. Pop. 16,000.

Marlborough, a Massachusetts town, 38 miles by rail W. of Boston, with boot-factories, machine-works, &c. Pop. 14,600.

Marlow, GREAT, a town of Bucks, on the Thames, 29 miles W. of London by rail, has manufactures of lace and paper, an iron suspension bridge, a house where Shelley lived in 1817, and a grammar-school. It returned two members till 1867, and one till 1885. Pop. 4700.

Mar'mora, SEA OF (anc. *Propontis*), separating Thrace from Asiatic Turkey, and communicating with the Ægean by the Dardanelles, with the Black Sea by the Bosporus. It is 175 miles long, 50 broad, 4499 sq. m. in area, and 4250 feet in maximum depth. The Gulf of Ismid extends 30 miles eastwards into Asia. The largest of the islands is Marmora or Marmara (area, 50 sq. m.), famous for its marble and alabaster.

Marne (*Marn*), a river of France, rises in the plateau of Langres, and flows 326 miles NW. and W. past Châlons and Épernay to the Seine at Charenton, a few miles above Paris. It is navigable for 126 miles up to St Dizier.

Marne, a dep. of NE. France formed out of the old province of Champagne, is traversed by the river Marne, and to a less extent by the Seine and Aisne. Area, 3159 sq. m.; population, 436,000. Its arrondissements are Châlons-sur-Marne (the capital), Épernay, Rheims, Sainte-Ménéhould, and Vitry-le-François.

Marne, HAUTE, a dep. of NE. France, formed chiefly out of the old province of Champagne, and embracing the upper basins of the Marne and Meuse. Area, 2402 sq. m.; population, 215,000. There are three arrondissements, Chaumont (the capital), Langres, and Vassy.

Marnoch, a Banffshire parish, 8½ miles NNE. of Huntly. It figures in Disruption annals.

Marocco. See MOROCCO.

Maros-Vásárhely, capital of the Szekler districts in Transylvania, on the Maros, a tributary of the Theiss, 28 miles SE. of Klausenburg. It has a castle. Pop. 25,000.

Marple, a Cheshire town, 4 miles SE. of Stockport. Bradshaw the regicide was a native. Pop. 6500.

Marquesas Islands (*Markay'sas*), or MENDANAS, a volcanic group in Polynesia, since 1842 a French protectorate, N. of Tuamotu or Low Archipelago, between 8° and 11° S. lat. and 138° and 141° W. long. The name strictly applies to four or five islands discovered by Mendaña in 1595, but usually includes now the Washington group of seven islands, to the north-west. Total area, 492 sq. m. In Cook's time (1774) there were 100,000 inhabitants, but in 1838 they had decreased to 20,000, and now to 3000.

Marquette, capital of Marquette county, Michigan, on the S. shore of Lake Superior, 430 miles by rail N. of Chicago. It has a R. C. cathedral, foundries, blast-furnaces, sawmills, machine-shops, and a slate-quarry. Pop. 12,000.

Marsala (*Marsâ'la*; anc. *Lilybœum*), a seaport on the westernmost point of Sicily, 102 miles by rail and 55 as the crow flies SW. of Palermo. It has a citadel, a cathedral, and a large trade in wine, the well-known sherry-like Marsala. It got its present name from the Saracens, who occupied it in the 9th c., but were expelled by the Normans in the 11th. The harbour, filled up in 1567 to prevent a Turkish attack, was reconstructed during the 19th c. Garibaldi landed here in 1860. Pop. 50,750.

Marsden, a town of Yorkshire, on the Colne, 7 miles SW. of Huddersfield. It has woollen, cotton, and silk factories. Pop. 5800.

Marseilles (usu. *Marsayles'*; Fr. *Marseille*), the second city of France, and the chief town of the dep. Bouches-du-Rhône, is situated on the south coast, about 27 miles E. of the mouth of the Rhone, and 536 by rail SSE. of Paris. It is the principal commercial port of France, if not of the entire Mediterranean. Wheat, oil-seeds, coal, wine, spirits, beer, sugar, maize, oats, barley, coffee, oils, pepper, flour, and tallow are the chief imports; whilst the exports comprise clay tiles, wheat, oil-cakes, flour, sugar, oil, wine and spirits, soap, and candles. Marseilles is the headquarters of the Messageries Maritimes and other great French companies. The old harbour, a natural basin of nearly 70 acres, runs into the heart of the city; to the W. of it new docks, quays, and warehouses extend fully a mile along the shore, and cover a hundred acres; between these and a breakwater is an outer roadstead; and there are also dry-docks, slips, &c. Soap, vegetable oils, oil-cake, soda, sugar, macaroni, iron, lead, zinc, tiles, and leather are manufactured. The city of Marseilles is built on the slopes that overlook the old harbour, and at the foot, and has of late years extended to the south-east. Its buildings include the cathedral, built in the form of a Byzantine basilica (1852–93); the pilgrimage church (1214; rebuilt 1864), with an image of the Virgin greatly venerated by sailors; the church of St Victor (1200), with crypt and catacombs of the 11th century; the health office of the port, with fine paintings by Vernet, David, Gérard, and Guérin; the museum of antiquities, in the Château Borély; the Longchamp palace, a very fine Renaissance building (1870), with picture-gallery and natural history museum; the public library, with 95,000 volumes and 1530 MSS. There are also a botanical and a zoological garden, a marine and an astronomical observatory, a faculty of sciences, and schools of medicine, fine arts, Oriental languages, music, commerce, hydrography. Pop. (1861) 260,910; (1886) 376,143; (1911) 550,619, including a colony of 90,000 Italians.

Marseilles was founded by Phoceans from Asia Minor about 600 B.C., and down to 300 A.D. was a centre of Greek civilisation. The Greeks called it *Massalia*, the Romans *Massilia*. It supported Pompey against Cæsar, but was taken by the latter in 49 B.C., after an obstinate defence. During subsequent ages it fell into the hands of the Saracens (9th c.), Charles of Anjou (13th c.), Alphonso V. of Aragon (1423), and Henry III. of France (1575). In 1112 it had become a republic; but in 1660 it was deprived by Louis XIV. of the privileges it had enjoyed as a free port almost from its foundation. The years 1720–21 are memorable for the devastations of the plague, when nearly half the population of 100,000 perished. Marseilles was the scene of stirring events in 1792–93, and sent large bands of cut-throats to Paris; in 1871 it proclaimed the commune. In August 1885 there were 1250 deaths from cholera; but the insanitary condition of the place has, it is hoped, been remedied by the great drainage works inaugurated in 1891. Marseilles was the birthplace of Pytheas, Petronius, Thiers, and the sculptor Puget.

Marshall, capital of Harrison county, Texas, 40 miles W. of Shreveport. It has railway machine-shops, foundries, &c. Pop. 11,500.

Marshall Islands, a group in the western Pacific, annexed by Germany in 1885. Bisected by 10° N. lat., and having the Caroline group to the west, it consists of two parallel chains of low coral-reefs—one, the Ratak group, consisting of thirteen islands (48 sq. m.); the other, the Ralik group, eleven islands (107 sq. m.). Phosphate is exported. Pop. 15,000.

Marshalltown, capital of Marshall county, Iowa, near the Iowa River, 50 miles NE. of Des Moines. Pop. 13,400.

Marshfield, a Gloucestershire town, on the Cotswolds, 11½ miles E. of Bristol. Pop. 1200.

Marshfield, in Wisconsin, is 185 miles NW. of Milwaukee. Pop. 5500.

Marsivan', a town of Asia Minor, 23 miles NW. of Amasia. Pop. 15,000.

Marske-by-the-Sea, a Yorkshire watering-place, 3 miles SE. of Redcar. Near it are ironstone mines. Pop. of parish, 3000.

Mars-la-Tour. See VIONVILLE.

Marston Moor, in the West Riding of Yorkshire, 7 miles W. of York, the scene of a great parliamentary victory, 2d July 1644.

Martaban', a town in Burma, on the right bank of the Salween, opposite to Maulmain. The capital of Pegu down to 1324, it was taken by the Siamese 250 years later, and by the British in 1824 and in 1852. Pop. 2781. The Bay of Martaban receives the Irawadi and Salween.

Martha's Vineyard, an island on the south coast of Massachusetts, 21 miles long by 6 broad. It is a summer health-resort.

Martigny (*Marteen'yee*), or MARTINACH (anc. *Octodurus*), three united hamlets in the Swiss canton of Valais, on the Simplon railway, 24 miles SE. of the Lake of Geneva. Pop. 4417.

Martigues (*Marteeg'*), the 'Provençal Venice,' a town in the French dep. of Bouches-du-Rhône, is situated on several islands, united by bridges, at the entrance to the Étang de Berre, 20 miles NW. of Marseilles. Pop. 4340.

Martina (*Martee'na*), a town of S. Italy, between Taranto and Monopoli. Pop. 24,454.

Martinique (*Martineek'*; native *Madiana*), one of the Lesser Antilles, in the West India Islands. It is 43 miles long by 12 to 20 broad. Area, 380 sq. m.; population, a little under 185,000. The island was discovered by the Spaniards in 1493, colonised by the French in 1635, and except for three short intervals (1761–63, 1794–1802, 1809–14), when it was held by the British, it has been a French colony ever since. A mountain-knot in the north (4430 feet) and another in the south are connected by a low ridge, all being densely covered with trees. An eruption of Mont Pelée in 1902 entirely destroyed the town of Saint Pierre, the chief commercial place, with about 33,000 people. Fort de France (18,000) is the capital. The climate is moist and hot (annual mean 79° F.), and yellow fever is not unfrequent. The soil is very productive. About one-half of the land in cultivation is occupied with sugar-cane. The exports include sugar, molasses, and rum; the imports, textiles, flour, fish, rice, and cotton. Slavery was abolished in 1848; labour is largely performed by coolies (27,000). Railways connect the principal towns.

Martinsburg, capital of Berkeley county, West Virginia, in the Shenandoah Valley, 114 miles by rail W. of Baltimore. It has a large distillery, mills, railway shops, &c. Pop. 10,700.

Martin's Ferry, a town of Ohio, on the Ohio River, 89 miles by rail SW. of Pittsburgh, has iron-works, glass-works, &c. Pop. 9250.

Martos, a town of Spain, 16 miles SW. of Jaen, on a castle-crowned hill. Pop. 16,627.

Marugama, a seaport on the NW. coast of the island of Shikoku, Japan. Pop. 25,000.

Márwár. See JODHPUR.

Maryborough, the capital of Queen's County, 51 miles SW. of Dublin. Pop. 3300.

Maryborough, (1) a port of Queensland, on the Mary River, 25 miles from its mouth and 180 N. of Brisbane. Gold from Gympie (61 miles by rail), copper, sugar, and timber are the chief exports. Pop. 11,600.—(2) An important gold-mining town of Victoria, 90 miles NW. of Melbourne. Pop. 8000.

Maryhill, a north-west suburb of Glasgow.

Maryland, one of the United States, on the Atlantic, separated from Pennsylvania and Delaware by 'Mason and Dixon's Line,' and from Virginia by the Potomac River. It contains 12,210 sq. m.—very nearly the size of Holland—of which about one-fifth is water. The length from east to west is 196 miles, and the breadth 128 miles. The surface elevation varies greatly, from sea-level to an altitude of 3500 feet. In the west it is mountainous (see BLUE RIDGE); in the middle hilly and rolling; in the east and south-east low and undulating. The mean summer temperature is 75°, the mean winter temperature 34°. The annual rainfall varies from 38 inches in the mountains to 46 near the Atlantic. The minerals include fine bituminous coal; over 200 kinds of marble; copper, chrome, large beds of clay, and soapstone. The soil is well adapted to cultivation. The forest-trees are principally pine, chestnut, and oak. The staple fruit-tree is the peach, which covers many thousands of acres. Tobacco is the principal crop in the peninsula between the Chesapeake and the Potomac. Tomatoes, melons, small fruits, and all kinds of vegetables are cultivated on the eastern shore. Deer, wild ducks (especially the famous canvas-back), wild geese, swans, and turkeys are found, as well as woodcock, grouse, and quail (locally called partridge). The Chesapeake Bay divides Maryland into two unequal portions, the Eastern and the Western Shore. With its estuaries it gives the state a coast-line of more than 500 miles. Shad and herring are caught in large numbers, and the average annual supply of oysters reaches 20 millions of bushels, giving employment to more than 40,000 persons. Besides railways, Maryland has two canals (from Cumberland to Washington, 184½ miles, and between the Chesapeake and Delaware Bays, 12½ miles). Maryland returns six members to congress. The Legislature is styled the General Assembly, and consists of two houses. The seat of government is at Annapolis. Baltimore is the chief port and commercial centre. Other towns are Cumberland, Hagerstown, Frederick, Westminster, on the western shore; Salisbury, Easton, and Cambridge, on the eastern. Pop. (1830) 447,030; (1860) 687,049; (1900) 1,188,044; (1910) 1,295,346. Included in Charles I.'s grant to Lord Baltimore (1632), Maryland was named in honour of Henrietta Maria. It was among the first of the colonies to take an active part in the War of Independence. Divided in sentiment in the civil war of 1861–65, it yet remained within the Union. See Scharf's *History of Maryland* (1879) and Browne's *Maryland* (1895).

Marylebone, a NW. parliamentary borough of London, returning two members. Pop. 117,246.

Maryport, a seaport of Cumberland, at the mouth of the Ellen, 28 miles SW. of Carlisle by railway (1837). The town gets its name from the fact that Mary, Queen of Scots, landed here in her flight from Scotland, though it was called Ellenfoot down to 1750, when its harbour was constructed. A new dock was opened in 1884; and there are shipbuilding-yards, iron-foundries and iron-furnaces, sawmills, flour-mills, tanneries, breweries, &c. Pop. 12,000.

Marysville, capital of Yuba county, California, on the Yuba River, at the head of navigation, 52 miles by rail N. of Sacramento. It is a great resort of gold-miners, and contains flour-mills, a foundry, woollen-factory, &c. Pop. 5300.

Masampho (*Ma-san-po*), a Corean port on the south coast, near the mouth of the Nak-tong River. Pop. 25,000.

Masaya (*Mazī'a*), a town of Nicaragua, near the volcano of Masaya. Pop. 18,000.

Mascara', a town of Algeria, 50 miles SE. of Oran, 1800 feet above sea-level. Pop. 21,400.

Mascarenes, the collective name given (from the discoverer) to the islands of Réunion, Mauritius, and Rodriguez.

Mashhad. See MESHHED.

Mashonaland, or MASHUNALAND, the region lying NE. of Matabeleland, between 16° 30′—19° 10′ S. lat. and 30°—32° E. long. It embraces the plateau (4000-4600 feet) whose backbone is the Umvukwe Mountains, and in which rise some of the chief feeders of the Zambesi, Limpopo, Sabi, and Mazoe. It has rich soil, grass all the year round, and an abundance of running streams. A constant cold south-east wind tempers the heat, and renders the air strong and bracing, though some of the valleys breed fever. A peaceful and industrious people (497,000 in number), of Bantu race, the Mashonas and their kinsmen the Makalakas long lived in fear of their fierce neighbours, the Matabele. They are the best husbandmen in South Africa, and before being dispossessed of their country owned large herds of cattle. They now grow rice, Kaffir corn, maize, ground-nuts, sweet potatoes, tobacco, and cotton; this last they weave into blankets. They are also good iron-workers. Iron, copper, and gold (in quartz and river sand) exist in immense quantities. There are very ancient ruins and old gold-mines, especially at Zimbabye (q.v.). Mashonaland was put under British protection in 1888, and now, with Matabeleland, forms Southern Rhodesia (q.v.). See books cited at MATABELELAND, and books on Rhodesia by Du Toit (1897) and Hensman (1900).

Mask, LOUGH, an isleted lake of Galway and Mayo, measures 12 miles by 2 to 4.

Massa, or MASSA DI CARRARA, a city of N. Italy, 20 miles by rail SE. of Spezia. It has a cathedral and a ducal palace. Pop. 26,400.

Massachus'etts, one of the New England states of the American Union, is bounded E. by Massachusetts Bay, from which the state derives its familiar name of the Bay State. It is irregular in outline, its greatest length being about 182 and its average breadth 47½ miles; and it has an area of about 8315 sq. m.—larger than Wales. The surface is uneven, varying from low plains, near the Atlantic sea-coast, containing numerous small lakes, to a rolling country in the interior, becoming mountainous towards the western boundary. The highest of the peaks, most of them wooded to the summit, is Greylock (3505 feet). The soil is in many portions, particularly in the east, rocky and sterile; along the river-valleys, however, and in certain other sections it is fertile. The woodland in the state covers over 2100 sq. m. The rivers, while not important for navigation, are the source of valuable water-power which has been utilised in manufacturing; and in its annual output the state leads all others, except New York and Pennsylvania. The chief manufactures are textiles, boots and shoes, food preparations, building materials, clothing, iron and other metallic goods, leather, wooden wares, rubber goods, paper and wood-pulp, besides cotton, woollen, and worsted goods. There are 2150 miles of railway in the state. The 'commonwealth of Massachusetts' contains fourteen counties and returns 14 members to congress. The state senate consists of 40, the House of Representatives of 240 members. There are in the state two technical institutes and twelve colleges and universities, the latter including Harvard, Williams College, Amherst College, and Boston University and College. The leading cities are Boston, Worcester, Springfield, Holyoke, Fall River, Lowell, Lawrence, Lynn, Haverhill, Brockton, Salem, New Bedford, Taunton, Gloucester, Cambridge, the seat of Harvard University. Pop. (1800) 422,845; (1850) 994,514; (1880) 1,783,085; (1900) 2,805,000; (1910) 3,366,416.

The coast is supposed to have been visited by Northmen about 1000 A.D., but the first permanent settlement was made at Plymouth, near Cape Cod, by the Pilgrim Fathers, December 22, 1620. In 1628 a company of Puritans settled at Salem upon the coast farther north, and, together with settlements at Boston, Lynn, and elsewhere, became the Massachusetts Bay Company. The two colonies were united in 1692. After the War of Independence, begun in Massachusetts in 1776 with the battles of Lexington and Bunker Hill, the colony became one of the original thirteen states of the Union. See C. F. Adams, *Massachusetts, its Historians and its History* (1893).

Massafra, a town of Italy, 11 miles by rail NW. of Taranto. Pop. 9463.

Massillon, a city of Ohio, on the Tuscarawas River, 66 miles S. of Cleveland, with manufactures of iron, glass, and paper. Pop. 14,000.

Massow'ah, or MASSAUA, a town of Eritrea, built on a coral island in the Red Sea, in 15° 36′ N. lat., 39° 28′ E. long. It was seized by Turkey in 1557, but in 1866 given by her to Egypt, and in 1885 was occupied by Italy. The island is 1¼ mile in circumference, and is connected with the mainland by a causeway; and is the terminus of a military railway into the interior. Pop. about 2000, of whom 500 are Europeans (exclusive of the garrison). Fishing for pearls and mother-of-pearl is the principal industry. The imports include cottons, chemical products, animals, grain and flour, groceries, spirits, hides, and timber. Massowah is very hot (mean of the year, 85·8° F.) and unhealthy.

Masulipatam', a seaport in Madras presidency, 215 miles N. of Madras city. Vessels anchor 5 miles from shore. Here the English established an agency in 1611. In 1864 a storm wave destroyed 30,000 lives. Pop. 39,809.

Masuri. See MUSSOOREE.

Matabe'leland, a country stretching northwards from the Transvaal towards the Zambesi, and having Khama's territory on the south-west, and Mashonaland (q.v.) to the north-east. It measures about 180 miles from north to south and 150 from east to west, and embraces the watershed between the river-systems of the Zambesi and the Limpopo. When in the first quarter of the 19th century the despotic Chaka ruled over the Zulus, a section of the nation under a rival chief, Mosilikatze, rebelled and moved off towards the north. After remaining for a while in what is now the Transvaal, they settled in 1840 in their present country, almost exterminating the Mashona and Makalaka native tribes. The Matabele, who preserved the warlike habits of the Zulu race, number in all some 246,000 persons. Quartz reefs rich in gold exist in various parts of the country, and mines have been worked at Tati and elsewhere. The British South Africa Company in 1893 broke the power of Lobengula, son of Mosilikatze, whose kraal was Bulawayo, now connected by rail with Capetown, Salisbury, Beira, and Katanga. Since 1896 the natives have had a share in the government. The district is now the southern part of Rhodesia. See works by Baines (1877), Montagu Kerr (1886), Oates (1889), Colquhoun (1894), Selous (1893), and Norris (1895).

Matadi, in Belgian Congo, is at the head of the navigation of the Congo, 100 miles from its mouth, and the starting-point of the railway. Pop. 8000.

Matamo'ros, (1) a river-port of Mexico, opposite Brownsville, Texas, on the Rio Grande's S. bank, 40 miles from its mouth in the Gulf of Mexico. Pop. 13,740.—(2) A town, with coal-mines, in the Mexican state Puebla. Pop. 13,000.

Matanzas, a fortified seaport on the north coast of Cuba, 55 miles by rail E. of Havana, with distilleries, iron-foundries, and a large trade in sugar, molasses, rum, and cigars. Pop. 64,500.

Matapan', CAPE, the southernmost point, bold and precipitous, of the Morea in Greece.

Mata'ro, a seaport of Spain, 17 miles by rail NE. of Barcelona. Pop. 18,727.

Matera, an Italian cathedral city, 37 miles NW. of Taranto. Pop. 17,700.

Mathura. See MUTTRA.

Matlock, a Derbyshire parish, 17 miles N. by W. of Derby, containing Matlock Bath, Matlock Bridge, Matlock town, and Matlock Bank, which extend 2 miles along the romantic valley of the Derwent. Matlock Bath has hot springs of 68° F., charged with carbonic acid. At Matlock Bank are several hydropathics, one dating from 1851. Pop. 8500.

Matoppo Hills, the mountainous region in which the Matabele tableland (itself reaching 4500 feet above the sea) culminates, the watershed between the Limpopo and the Zambesi. Bulawayo (q.v.) is on their slopes; and amongst them Cecil Rhodes was buried.

Mat'sumai, or FUKUYAMA, a Japanese port in Yesso, now superseded by Hakodate (q.v.). In feudal days it was the seat of 'the lords of Matsumai.' Pop. 15,000.

Matsuyama, a Japanese town of 50,000 inhabitants, 5 miles from its port of Mitsu, on the west coast of Shikoku.

Matterhorn (French *Mont Cervin;* Italian *Monte Silvio*), a peak (14,705 feet) of the Alps between the Swiss canton of Valais and Piedmont. It was first scaled by Lord Francis Douglas, the Rev. C. Hudson, Hadow, and Whymper, with three guides, on 14th July 1865, when the three first named and one of the guides fell over a precipice and were killed. See Whymper, *Ascent of the Matterhorn* (1880).

Matto Grosso ('dense forest'), an inland state of Brazil, bordering on Bolivia. Area, 532,550 sq. m. (next in size to Amazonas); pop. 99,000. The capital is Cuyabá (q.v.).

Mattoon, a town of Illinois, 172 miles by rail S. by W. of Chicago. Pop. 11,500.

Maturin, a town of Venezuela, 25 miles above its port, Colorado, by rail. Pop. 10,351.

Maubeuge (*Mo-buzh'*), a fortified town in the French dep. of Nord, 4 miles from the Belgian frontier and 23 ESE. of Valenciennes. Pop. 14,000.

Mauch Chunk (*Mawk Chunk*), a mining-town of Pennsylvania, capital of Carbon county, among picturesque hills on the Lehigh River, 90 miles NNW. of Philadelphia. There is a switchback railway, 9 miles long, to Summit Hill—a place famous for its 'burning mines,' which have been on fire since 1858. Pop. 4100.

Mauchline, a town of Ayrshire, 12 miles ENE. of Ayr. It has long been noted for its wooden snuff-boxes and similar nicknacks. There is a monument (1830) to five martyred Covenanters; and 1 mile N. is Mossgiel, Burns's farm from 1784 till 1788, whilst in the village itself are 'Poosie Nancy's,' the scene of his *Jolly Beggars*, and Mauchline kirk, whose predecessor was the scene of his *Holy Fair*. Pop. 1600. See works by W. Jolly (1881) and the Rev. Dr Edgar (1886).

Maulmain, or Moulmein, a town in Tenasserim province, Burma, near the Salween's mouth. It is backed by a fine range of hills, on whose heights flash the gilded spires of innumerable pagodas. The population is about 60,000. The exports include teak-wood and rice; the imports piece-goods, hardware, and provisions.

Mauna Loa. See Hawaii.

Mauritania, or Mauretania, was anciently the NW. of Africa, corresponding to Morocco and W. Algeria. See also Senegambia.

Mauritius, or Isle of France, an island in the Indian Ocean, belonging to Great Britain since 1810, and situated 550 miles E. of Madagascar. It is of volcanic origin and elliptical in shape. A girdle of reefs, broken only by passages opposite the mouths of the small streams, renders it somewhat difficult of approach. The contour rises rapidly into a tableland, that shoots up into ridges; Rivière Noire (2711) is the culminating point of the island. Lavas, basalts, and volcanic lakes abound. Its picturesque beauty forms the appropriate background of Bernardin St Pierre's *Paul and Virginia*, and is well described in Besant and Rice's novel, *My Little Girl*. But during the 19th century the forests were cut down to make room for sugar-cane plantations; and this has made the rainfall insufficient and uncertain. The extinct fauna embraced the interesting dodo, the rail called Aphanapteryx, and a short-winged heron. Fossil tortoises of great size have been discovered. Terrific cyclones are common; one in 1892 did tremendous damage to Port Louis and other places. At Port Louis the annual mean is 78° F.; in the uplands the climate resembles that of the south of France. In 1854 the cholera carried off 17,000 people, and thirteen years later 30,000 perished of a malignant fever. The upper classes, very intelligent, cultured, and well educated, are mostly descended from the old French colonists. There is a large number of half-castes, and a considerable body of Negroes, Malagasy, Singhalese, Malays, Chinese, &c. But the greater part of the population consists of Indian coolies, who have been imported nearly every year since 1842 to work the sugar-fields. Pop. (1881) 359,874; (1911) 370,393, of whom 35,600 were Hindus, 120,000 Roman Catholics, 40,000 Mohammedans, and 7000 Protestants. The chief towns are Port Louis (q.v.), the capital, on the north-west coast; Curepipe (pop. 7880); and Mahébourg (4490) on the south coast. There are 105 miles of railway. The one great crop of the island is sugar; and the other exports include rum, cocoa-nut oil, vanilla, and aloe fibres (Mauritius hemp). The crown colony of Mauritius, with its dependencies the Seychelles Islands, Rodriguez, Diego Garcia, and several minor islands, is administered by a governor, aided by an executive council. The island, then uninhabited, was discovered by Mascarenhas (see Mascarenes) in 1507. The Portuguese held it till 1598; the Dutch, who named it after their Prince Maurice, from 1598 till 1710. It was the French governor Mahé de Labourdonnais (1735–46) who introduced the sugar-cane, and laid the foundation of its prosperity as a colony, during the French occupation (1715–1810). Theodore Hook was treasurer in 1812–18. See works by Grant (1801), Flemyng (1862), Ryan (1864), Boyle (1867), J. G. Baker (1877), G. Clark (1881), Épinay (French, 1890), Decotter (French, 1891), and Keller (1901).

Maxstoke, an Edwardian castle of Warwickshire, 3 miles SE. of Coleshill.

Maxwelltown. See Dumfries.

May, Isle of, a Fife islet in the Firth of Forth, 5¼ miles SSE. of Crail. It is 146 acres in area, rises 150 feet, was the seat of a priory, and has a lighthouse, whose flashing electric light is visible 22 nautical miles.

Maybole, a town of Ayrshire, 3¾ miles inland, and 9 by rail (1856) S. by W. of Ayr. In feudal times the capital of Carrick, and a burgh of barony since 1516, it is an old-world place, which once boasted twenty-eight baronial mansions, several of which still remain; besides which, it has a new town-hall (1887) and a fine Roman Catholic church (1879). Shoemaking is the staple industry. The abbey of Crossraguel (q.v.) is in the vicinity. Pop. 4900.

Mayence. See Mainz.

Mayenne (*Ma-yenn'*; Lat. *Meduana*), a French dep. formed out of the provinces of Maine and Anjou, now containing the arrondissements of Laval, Château-Gontier, and Mayenne, has an area of 1996 sq. m. and a pop. of (1872) 350,637; (1911) 297,732.—The *river* Mayenne, flowing 127 miles S., joins the Sarthe at Angers to form the Maine, a tributary of the Loire.—The *town* of Mayenne, on the river Mayenne, 78 miles by rail S. by W. of Caen, has a picturesque ruined castle (taken by the English in 1424), and manufactures calico and linen. Pop. 8360.

Mayfield, a Staffordshire village, on the Dove, 2 miles SW. of Ashborne. Here Moore wrote *Lalla Rookh*.

Maynooth', a village of County Kildare, Ireland, 15 miles NW. of Dublin by rail; population, 890. It has the ruined castle of the Geraldines, and is the seat of the Roman Catholic college, established (1795) by the Irish parliament during Pitt's ministry, to meet a necessity created by the destruction, through the French Revolution, of the places of education in France, upon which the Irish Catholic clergy had been driven to rely. The original endowment, an annual vote of £8928, was continued, although not without controversy and keen opposition on the part of zealous Protestants, by the imperial parliament after the act of union. In 1846 Sir Robert Peel carried a bill for a permanent endowment of £26,000 a year, to which was added a grant of £30,000 for building purposes; in 1869 the endowment was withdrawn, a capital sum of £364,000 being granted in its stead. The building erected under the original endowment is a plain quadrangle. The new college is a very striking Gothic quadrangle by Pugin, containing professors' and students' apartments, lecture-halls, and a singularly fine library and refectory. The chapel was (with the exception of a tower and spire 275 feet high) completed at a cost of £50,000, and dedicated in 1890. Designed by the late J. J. M'Carthy in the Decorated Gothic style, it consists of a great nave, choir, and sanctuary, ending in a five-sided apse, from which radiate five chapels. A great part of the college buildings was burned in November 1878, but has since been restored.

Mayo, a maritime county of the Irish province of Connaught, is bounded by the Atlantic, Sligo, Roscommon, and Galway. Area, 1,360,731 acres, of which nearly 26 per cent. is bog and 18 per cent. barren; pop. (1841) 388,887; (1901) 199,166; (1911) 192,177—almost all Catholics. The eastern half of the county is more or less a plain, the western half mountainous, the highest points being Muilrea (2688 feet), Nephin (2530), and Croagh Patrick (2370). Ironstone abounds, but is not worked; there are several valuable slate-quarries. The chief towns are Castlebar, Westport, Ballina, and Ballinrobe. The coast-line is about 250 miles, and is indented by Killala, Blacksod, and Clew Bays, Killary Harbour, and Broad Haven. Off Mayo, too, lie the islands Achil (35,283 acres), Clare (3959), &c. Loughs Mask and Corrib lie on the southern border, and Loughs Conn, Castlebar, Cullen, Carragh, Corramore within the county. A valuable salmon-fishery exists in the river Moy, and Lough Mask is the home of the 'gillaroo' trout. Four members are returned. The antiquities are chiefly ecclesiastical—four round towers, and at Cong a splendid ruined abbey of the 12th c.

Mayotte, one of the Comoro Isles (q.v.).

Maysville, capital of Mason county, Kentucky, on the Ohio River, 69 miles by rail NE. of Lexington. Pop. 6000.

Mazaghan, a port of Morocco, 120 m. SW. of Rabat. Pop. 25,000.

Mazamet (*Mazamay'*), a French town, 43 miles ESE. of Toulouse. Pop. 15,000.

Mazanderan', a Caspian province of Persia, consists of marshy coast-land, backed by the well-wooded slopes of the Elburz. Area, 10,400 sq. m.; pop. 300,000. The chief town is Sari, though Balfrush is the seat of the trade with Russia.

Mazarron, or ALMAZARRON, a seaport of Spain, 27 miles WSW. of Cartagena. Pop. 23,000.

Mazatlan', a Mexican seaport, at the entrance of the river Mazatlan into the Gulf of California, 230 miles SE. of Sinaloa. It has a cathedral, cotton factory, foundries, &c. Pop. 15,395.

Mazza'ra, a walled cathedral coast-town of Sicily, 32 miles by rail S. of Trapani. Pop. 13,074.

Mazzarino (*Mazzaree'no*), a town of Sicily, 15 miles SE. of Caltanisetta. Pop. 22,964.

Meadville, capital of Crawford county, Pennsylvania, on French Creek, 113 miles by rail N. of Pittsburgh. It manufactures woollens, paper, glass, machinery, oil, &c., and is the seat of Alleghany College (Methodist, founded 1815), and of a Unitarian theological school. Pop. 12,800.

Mealfour'vonie. See NESS, LOCH.

Meanee. See MEEANEE.

Mearns. See KINCARDINESHIRE.

Meath, a maritime county of Leinster, Ireland, bounded E. for 10 miles by the Irish Sea, and by the counties of Dublin and Louth. Area, 906 sq. m., or 579,861 acres, of which 34,300 are waste, bog, &c. Pop. (1841) 183,116; (1861) 110,373; (1911) 65,091, of whom 60,000 were Catholics. The soil is a rich loam; but close upon 67 per cent. of it is devoted to pasture. The surface is mostly undulating. The chief rivers are the Boyne and Blackwater. The principal towns are Trim, Navan, and Kells. John's Castle at Trim is one of the most extensive monuments of English rule in Ireland. There are a round tower and sculptured crosses at Kells, and a round tower at Donoughmore. Monastic ruins survive at Bective, Clonard, and Duleek. Meath returns two members.

Meaux (*Mo*), a town in the French dep. of Seine-et-Marne, on a height above the river Marne, 28 miles NE. of Paris. In its noble Gothic cathedral (12–16th century, but still unfinished) is the grave of Bossuet, who was bishop for twenty-three years. Meaux trades largely with Paris in corn, flour, cream-cheeses, &c. It was besieged by the serfs of La Jacquerie (1358), and captured from the League (1594). Pop. 12,704.

Mecca is one of the oldest cities of Arabia and the capital of the Hedjâz, and as the birthplace of Mohammed a holy city and focus of pilgrimage for Islam. It is situated in 21° 30′ N. lat. and 40° 8′ E. long., 50 miles E. of Jiddah, its port on the Red Sea, in a narrow barren valley, surrounded by bare hills penetrated by two passes. The streets are broad and airy, but unpaved and filthy; the houses, climbing the hills on either side, are of stone, and well built. There are charitable lodgings for the poorer pilgrims, and also public baths and a hospital. Drainage there is none, though there is plenty of water. The pop., which is notorious for its vice and corruption of every sort, is probably under 60,000, but is annually reinforced by at least as many pilgrims. The Great Mosque stands in the broadest part of the valley, and consists of a large quadrangle, capable of holding 35,000 persons, surrounded by arcades or cloisters, with pillars of marble and granite, and entered by nineteen gates surmounted by seven minarets. In the centre is the Káaba (i.e. 'cube'), the temple of Mecca ages before the time of Mohammed, who invented the legend that the Káaba was built by Abraham. It has been twice rebuilt in historical times, but the old form (which is not quite square), has been preserved; it measures about 18 paces by 14, and 35 or 40 feet high. The celebrated fetish, or Black Stone, is apparently a meteorite, about a span long, built into the south-east corner at the proper height for kissing. Hard by, and also within the court, is the well of Zemzem, the tepid water of which may once have been mineral, but the largest item in whose present analysis consists of sewage matter. In 1893 European scientists traced the recent destructive visitations of cholera to this same sacred well; and the Powers alarmed the Sublime Porte by demanding that it should be cleansed or shut up. Mohammed reconquered Mecca from the Koreish in 627, five years after his Flight or Hegira therefrom. It long remained under the rule of the caliphs, who spent large sums in its adornment. In 930 it was sacked by the Karmathians. Mecca afterwards fell under the influence of whatever dynasty—Fatimite, Ayyûbite, or Mameluke—happened to rule in Egypt; and thus finally it came into the possession of the Ottoman sultans, whose power, however, is nominal, whilst the real governor is the sherîf, or reputed head of the descendents of the Prophet.

See Snouck Hurgronje, *Mekka* (German, 1888); Robertson Smith in *Ency. Brit.* (1883 and 1911); Sir R. Burton's *Pilgrimage* (1855; new ed. 1894); Burckhardt's *Travels in Arabia* (1829); Wavell, *A Modern Pilgrim in Mecca* (1912).

Mechlin. See Malines.

Mecklenburg, two German grand-duchies, Mecklenburg-Schwerin and Mecklenburg-Strelitz, and bounded by the Baltic, Pomerania, Brandenburg, Sleswick-Holstein, and Lübeck. The former is a compact territory, abutting on the Baltic for 65 miles, its area being 5197 sq. m. (much less than Yorkshire). Mecklenburg-Strelitz (1144 sq. m.) consists of two detached portions, the grand-duchy of Strelitz, lying SE. of Mecklenburg-Schwerin, and the principality of Ratzeburg, wedged in between Schwerin and Lübeck. The region indicated forms part of the great North German plain, but is crossed by a low north-westward ridge. Along the line of this ridge there are more than 500 lakes. Except for some sandy tracts and turfy moors the soil is fertile; agriculture is the chief occupation. The chief ports are Wismar and Rostock (Warnemünde). Pop. of Schwerin (1875) 553,754; (1910) 639,879; of Strelitz (1875) 95,673; (1910) 106,347. The rural population are almost entirely Germanised Slavs, the nobility and the townsfolk for the most part of Saxon stock. The popular dialect is Platt-Deutsch or Low German; the religious confession Lutheran. Society in Mecklenburg is still organised on a feudal basis; serfdom was abolished only in 1824. At the head of each grand-duchy stands a grand-duke; but both grand-duchies are represented in one and the same national assembly, which meets every autumn at Sternberg and Malchin alternately. The principality of Ratzeburg and the towns of Wismar and Neustrelitz have each an independent administration.

Medellin, (1) a Spanish town (pop. 1477), the birthplace of Cortes, on the Guadiana, 66 miles by rail E. of Badajoz.—(2) The second city of Colombia, lies in a lovely mountain-valley 4850 feet above the sea, and 150 miles NW. of Bogotá. It has a cathedral, college, and manufactures of pottery, porcelain, and jewellery. Pop. 70,000.

Medford, a Massachusetts town, on the Mystic River, 5 miles by rail NNW. of Boston. It has manufactures, and is the seat of Tufts College (1852). Pop. 25,000.

Media, in ancient times, the NW. part of Iran or Persia, bounded by the Caspian Sea and Parthia on the E.

Medicine Hat, a manufacturing city of Alberta, on the South Saskatchewan River and C.P.R., 660 miles W. of Winnipeg, has railway works and natural gas. Pop. 5600.

Medina, El-, the second capital of the Hedjâz in western Arabia, is the holiest city of the Mohammedan world after Mecca, because it was there that Mohammed took refuge after his Hegira or Flight from Mecca in 622, and there that he lived till his death. 250 miles N. of Mecca, and 132 N. by E. of the port of Yanbu', it is 820 miles by rail from Damascus. It forms an irregular oval within a wall, 35 to 40 feet high, flanked by thirty towers, and enclosing the castle of the Turkish garrison. The Prophet's Mosque El-Haram, supposed to be erected on the spot where Mohammed died, and to enclose his tomb, is smaller than that of Mecca, being a parallelogram, 420 feet long and 340 broad, with a spacious central arcaded area. The present building is, however, only the last of many reconstructions. The Mausoleum, or Hujrah, in which the Prophet's body is supposed to lie undecayed, is an irregular doorless chamber in the south-east corner, and is surmounted by a crescented 'Green Dome,' springing from a series of globes. That his coffin rests suspended in the air is of course an idle Christian fable. Pop. 26,000.

Medina, a river of the Isle of Wight, flowing 12 miles N. to the Solent at Cowes.

Medina Sidonia (*Medee'na*), a city of Spain, 25 miles SSE. of Cadiz, stands on an isolated hill, and has a ruined castle, the ancestral seat of the dukes of Medina Sidonia. Pop. 11,699.

Medînet-el-Fayyum. See Fayyûm.

Mediterranean Sea, so named from its lying between the continents of Europe, Asia, and Africa, is the largest enclosed sea in the world, and is connected with the open ocean only by the narrow Strait of Gibraltar, 9 miles wide. Since 1869, however, it has been artificially connected with the Red Sea and Indian Ocean by means of the Suez Canal. The Mediterranean is 2200 miles long from the Strait of Gibraltar eastward to the Syrian coast; its width varies from 500 or 600 miles in some places to less than 100 miles between Sicily and Cape Bon, where it is divided by relatively shallow banks into two distinct hydrographic basins, the eastern one being the larger. It is connected with the Black Sea by the Dardanelles, Sea of Marmora, and Bosporus. The African and Syrian coasts are comparatively even and unindented; the shores of Europe and Asia Minor are cut up into numerous gulfs and bays, the largest of which is the Adriatic Sea. Various parts of the Mediterranean have been known by special names, such as the Tyrrhenian and Iberian Seas in the western, and the Levant, Ægean, and Ionian Seas in the eastern basin. The principal islands in the western part are Sardinia and Corsica, the Balearic and Lipari Islands. The continental islands of Sicily and Malta are situated on the banks dividing the two basins. In the eastern regions there are the large islands of Cyprus and Crete, with the Ionian Islands and the islands of the Archipelago. The Mediterranean is frequently subject to earthquakes, and Vesuvius, Stromboli, and Etna are among its active volcanoes. The countries bordering the Mediterranean have been the cradle of civilisation, and still this inland sea is commercially the most important waterway of the world.

The area of the Mediterranean is estimated at about 900,000 sq. m., or, including the Black Sea and Sea of Azov, at 1,053,000 sq. m. The area of land draining into the Mediterranean is estimated at 2,969,350 sq. m., or nearly 3,000,000 sq. m. The principal rivers flowing into the Mediterranean are the Rhone, Po, Danube, Dnieper, Don, and the Nile. On the ridge between Sicily and Africa which separates the Mediterranean into two basins, there is a depth of 200 fathoms; 2040 fathoms is the greatest depth recorded in the western, and 2187 fathoms the greatest in the eastern basin; the mean depth of the whole sea is 768 fathoms. The Mediterranean is usually called a tideless sea. At Algiers there is a rise of 3½ inches at springs, and half that amount at neaps; at other places the rise and fall is about 18 inches, and in the Gulf of Gabes the range reaches 5 feet. There is an extensive red coral fishery and tunny fishery on some parts of the coasts. The Mediterranean region appears to have been covered by the sea from early geological times, and during Tertiary times must have had much wider communication with the open ocean. See Murray's *Mediterranean Handbook* (3d ed. 2 vols. 1890).

Medmenham (*Med'nam*), a village of Bucks, near the Thames, 3 miles SW. of Marlow. Here stood a Cistercian abbey (1204); and here, soon after 1750, Sir Francis Dashwood, afterwards Lord le Despencer (1708–81), founded his mock brotherhood of 'Franciscans.'

Médoc', a French district on the left bank of the Gironde estuary, famed for the quantity and excellence of the wine it yields, some of the most famous growths of Bordeaux.

Medway, a river of Kent, rising in three headstreams in Sussex and Surrey, and flowing 70 miles north-eastward (including 12 miles of estuary), past Tunbridge, Maidstone, Rochester, Chatham, and Sheerness, until it joins the estuary of the Thames. It is tidal and navigable to Maidstone, but large vessels do not ascend above Rochester bridge. In 1667 the Dutch sailed up the Medway.

Meeanee, or Miani, a village in Sind, India, on the Indus, 6 miles N. of Hyderabad, was the scene of Sir Charles Napier's victory with 2800 men over a Baluch army, 22,000 strong, on February 17, 1843.

Meerane (*May-râ'nuh*), a prosperous manufacturing town of Saxony, 43 miles by rail S. of Leipzig. From a small country town, it has increased rapidly through its woollen manufactures and export trade with England, France, and America. Pop. 25,000.

Meerut, or Merath, a town in the United Provinces of India, 40 miles NE. of Delhi, about half-way between the Ganges and the Jumna. Its most important edifice is the English church, with a fine spire. Here in 1857 the great Mutiny broke out. Population, about 120,000, inclusive of the cantonment.

Meg'aris, a mountainous district of Greece, between Attica and the Isthmus of Corinth.

Meghna. See Ganges.

Megid'do (*g* hard), an ancient city of Palestine, in the plain of Esdraelon. In the battle there Josiah was slain in 609 B.C.

Mehadia (*Mehah'dia*), a town (pop. 2500) of SE. Hungary, 20 miles N. of Orsova by rail; 3 miles east of it, in a romantic mountain-valley, is the Herkulesbad, or waters of Hercules, eighteen warm springs, of which nine, richly impregnated with various salts, have been used since Roman times.—Mehadia, or Mahdiah, is also the name of an African seaport and health-resort, 115 miles SE. of the town of Tunis; pop. 3500.

Mehedia, a port of Morocco, on the Sebu, 21 miles NW. of Rabat.

Meigle (*Mee'gle*), a Perthshire parish, 21 miles NE. of Perth, with remarkable sculptured stones.

Meinam. See Siam.

Meiningen (*Mī'ning-en*), the capital of the German duchy of Saxe-Meiningen, lies in a narrow valley on the Werra, 43 miles by rail NW. of Coburg. The ducal castle (1682) contains a library, picture-gallery, coin-collection, &c. The town has been largely rebuilt since the fire of 1874. It was an appendage of Würzburg 1008–1542, and in 1583 came to the Saxon ducal family. Pop. 18,000.

Meissen (*Mī'sen*), a town of Saxony, on the left bank of the Elbe, 14 miles by rail NW. of Dresden. Its chief building is the cathedral (c. 1266–1479), one of the finest Gothic churches in Germany, surmounted by an exquisite spire (263 feet) of open work. The castle was built in 1471–83, and in 1710 was converted into the porcelain factory presided over by Böttger, a statue of whom was erected in 1891. In 1863 the castle was restored, and its walls adorned with frescoes by modern painters, the porcelain factory having been removed in 1860 to other premises; 800 men are employed. Other manufactures are iron, machinery, jute, and cigars. Here is the celebrated school of St Afra (founded 1543), where Gellert and Lessing were educated. Meissen was founded in 928, and was burned down by the Swedes in 1637. Pop. 36,000.

Meklong, a town of Siam, near where the Meklong enters the Gulf of Siam. Pop. 10,000.

Mekong, or Mekhong, the greatest river of the Siam peninsula, the boundary in great part since 1893 of Siam and Indo-China, is usually identified with the Lan-tsan, which rises in the neighbourhood of Chiamdo in Tibet. It pursues a generally southerly direction to the China Sea, which it enters by several mouths in Cochin-China, a country formed by its deltaic deposits. It has a total length of 2800 miles, but is navigable only to 14° N. lat. owing to rapids.

Melanesia. See Polynesia.

Melbourn, a parish 7 miles SE. of Derby. It has noted market-gardens.

Melbourne (*Mel'burn*), the metropolis of the Australian colony of Victoria, and the most important city of Australasia, stands at the northern extremity of Port Phillip Bay, and is bisected by the river Yarra; it is in 37° 49′ S. lat. and 144° 58′ E. long., and is 11,940 miles from London (*viâ* Brindisi and the Suez Canal). Since 1888 there is a ship-canal from a point near the mouth of the river to the Melbourne quays. Port Phillip Bay, the maritime approach, is a spacious land-locked inlet covering 800 sq. m. The entrance, known as 'The Heads,' is very narrow, and strong fortifications have been carried out since 1875. Williamstown and Port Melbourne, on the shores of the bay, are thriving ports. Melbourne is a chessboard city, its streets intersecting at right angles; the principal thoroughfares are of greater width (99 feet) than is desirable in such a warm climate. Collins Street is architecturally imposing, being lined on either side by tall, massive, and ornate buildings, chiefly banks, offices, warehouses, and hotels. In Bourke Street most of the theatres, music-halls, and retail shops are situated. Melbourne has a flourishing university, founded in 1853, with three affiliated colleges—Trinity (Episcopalian), Queen's (Wesleyan), and Ormond (Presbyterian). The last—a very fine structure—was built at the expense of the Hon. Francis Ormond, to whom Melbourne is indebted also for its working-men's college. The Wilson Hall is also a noteworthy adjunct of the university. The Exhibition building and the General Post-office are two of the most striking public buildings. The Houses of Parliament, erected in 1855–91 at a cost of nearly a million of money, form a magnificent pile of buildings. The Trades Hall (1857) stands on the northern boundary of the city proper. Melbourne possesses a public library of over 250,000 vols., and associated with it are a national art gallery and a technological museum. The town-hall has an immense assembly-room, and an organ of colossal size. Crowning the summit of the western hill of Melbourne are the law-courts, forming an extensive square, and topped by a lofty and graceful dome. Close by is the Melbourne branch of the Royal Mint (1872). Other notable public institutions are the Melbourne and Alfred hospitals, the Benevolent Asylum, the Immigrants' Home, the Orphan Asylums, the Custom-house, the Treasury, and the Public Offices, the last-named a vast and labyrinthine pile in which most of the government departments are housed. St Patrick's R. C. cathedral, a towering Gothic structure, is the most conspicuous ecclesiastical edifice in Melbourne. The Anglican cathedral of St Paul was consecrated in 1891. The Scots Church, the architectural gem of Collins Street, has a graceful soaring spire of 211 feet. In 1841 the pop. was 11,000; in 1851, the year of the gold discoveries, it was less than 25,000; in 1861, 191,000; in 1871, 206,780; in 1881, 282,907; in 1901, 494,129; in 1911, with suburbs, 600,160 (over two-fifths of that of the state). Foundries, flour-mills, boot and clothing factories, potteries, soap-works, wool-washing works, tan-yards, &c. are numerous. The Royal Park, the Carlton, Fitzroy, Botanical, and Flagstaff Gardens are recreation reserves. Abundant water (1857) comes from the Yan-Yean reservoir in the Plenty Valley. Save for a few days at a time of hot north winds, the climate is very fine.

Melbourne was first occupied by white men in 1835, and known as Doutta-Galla from the neighbouring tribe of blacks. In 1837 it was christened after the reigning premier, Lord Melbourne, in 1842 it was incorporated, and in 1851 it was advanced to the dignity of a capital when the Port Phillip province was separated from New South Wales and erected into the colony of Victoria. Then too the Victorian goldfields were opened up. The International Exhibition held in Melbourne in 1888 cost the colony a quarter of a million. A great conflict between labour and capital took place in 1890, and Melbourne like the rest of Australia suffered severely in the commercial crises of 1893. See *Victoria and its Metropolis* (Melbourne, 2 vols. 1889).

Melcombe Regis. See WEYMOUTH.

Melegnano (*Melenyâh'no*), formerly MARIGNANO, a town of northern Italy, by rail 12 miles SE. of Milan. Pop. 5438. Here in 1513 the French defeated the Swiss, and in 1859 the Austrians.

Mel'fi, an ancient town of S. Italy, 30 miles N. of Potenza. The once magnificent cathedral (1155) was almost entirely destroyed by an earthquake in 1851. Pop. 14,765.

Mel'ford, LONG, a picturesque village of Suffolk, 13 miles S. of Bury St Edmunds by rail. It has a very fine Perpendicular church 260 feet long. Pop. of parish, 3000. See two works by Sir W. Parker (1873) and E. L. Conder (1888).

Melfort, LOCH, an Argyllshire sea-loch, opposite Luing Island.

Melilla, a Spanish port, once a convict settlement, on the N. coast of Morocco, on the E. side of the mountainous promontory of Tres Forcas, which in 1893-94 nearly led to a war between Spain and Morocco; pop. 9000.

Melksham, a Wiltshire market-town on the Avon, 9¾ miles E. by S. of Bath. Pop. 3100.

Mellifont Abbey, a ruin 4 miles NW. of Drogheda, was the first Cistercian foundation in Ireland, founded by St Malachy in 1142. Its remains were excavated during 1884–85. See *Mellifont Abbey*, by K. F. B. (1886).

Melo, a town of Cerro Largo in Uruguay, on the Tacuari. Pop. 5000.

Melos (*Mel'los;* Ital. *Milo*), a Greek volcanic island, the most south-westerly of the Cyclades, 13 miles long by 8 broad, with 4200 inhabitants. Amongst the ruins of the ancient city of Melos was found the priceless Venus de Milo, now one of the chief treasures of the Louvre.

Melrose, a pleasant little town of Roxburghshire, on the south bank of the Tweed, and at the north base of the triple Eildons (q.v.), 37 miles SSE. of Edinburgh by rail. At Old Melrose, 2½ miles farther east, was founded about 635 the Columban monastery, of which St Cuthbert became a monk. It was burned by Kenneth MacAlpine in 839, and had been quite deserted for upwards of fifty years, when in 1136 the great Cistercian abbey of Melrose itself was founded by David I. Twice burned by the English, this was slowly rebuilt on a scale of increased magnificence between 1322 and 1505, only forty years after which date two fresh English invasions commenced the destruction that was speedily completed by the Reformers. The abbey was beyond doubt the most beautiful structure of which Scotland could boast in the middle ages. What now remains is the ruined conventual church, 215 feet long by 116 across the transepts, with some fragments of the cloister, which seems to have been a square of 150 feet. The carvings and traceries are scarcely surpassed by any in England. The second abbot, St Waltheof, the royal founder's stepson; Alexander II. and Johanna, his queen; the heart of Robert Bruce; the good Sir James, the Knight of Liddesdale, the hero of Otterburn, and others of the Douglas line; the 'wondrous Michael Scott;' and Sir David Brewster—all these are buried here; else the annals of Melrose have little to record. A burgh of barony since 1609, the town possesses a market-cross (1642), a suspension foot-bridge over the Tweed (1826), a hydropathic (1871), and half-a-dozen hotels. Pop. 2166.

Melrose, a town of Massachusetts, 7 miles by rail N. of Boston, with manufactures of boots, &c. Pop. 13,000.

Melton, a Suffolk village, on the Deben, 1¼ mile NE. of Woodbridge. Near it is a large lunatic asylum. Pop. of parish, 2000.

Melton-Mowbray, a town of Leicestershire, in the centre of a great hunting district, is seated on the river Eye near its junction with the Wreak, 15 miles NE. of Leicester, and 104 NNW. of London. It has a fine cruciform church, mainly Early English, and is famous for its manufactures of pork pies and Stilton cheese. Near the town in February 1644 the royalists defeated the parliamentarians; and amongst its natives have been Archbishop de Melton, who lies buried in the church, and 'Orator' Henley. Pop. (1801) 1766; (1901) 7454; (1911) 9202.

Melun (*Melun*$^{g\prime}$), the capital of the French dep. of Seine-et-Marne, on the Seine, near the Forest of Fontainebleau, 28 miles SE. of Paris. It manufactures leather, pottery, &c. Melun, the *Melodunum* of Cæsar, was after a six months' siege held by the English (1420–30). Pop. 10,723.

Melville, a polar island, crossed by 75° N. lat. and 110° W. long., and separated on the west by Fitzwilliam Strait from Prince Patrick Island.

Greatest length, 200 miles; greatest breadth, 130 miles. In 1819 Parry passed the winter here with his crews.—Melville Sound, 250 miles long by 200 broad, extends south-east of the island, and communicates with the Arctic Ocean on the west by Banks Strait, and with Baffin Bay on the east by Barrow Strait and Lancaster Sound.—Melville Peninsula projects from the N. American mainland at its north-eastern corner.—Another Melville Island lies across the entrance to Van Diemen Gulf off the shore of the Northern Territory of Australia; area, 143 sq. m.

Memel (*May'mel*), a fortified Prussian seaport, lies at the northern extremity of the Kurisches Haff, at its opening into the Baltic, 70 miles NNE. of Danzig. Founded in 1252, and almost totally destroyed by fire in 1854, it has a large harbour, exports timber, flax and linseed, coal, manure, grain, and herrings, and has manufactories of brandy, soap and chemicals, saw-mills, iron-foundries, breweries, and shipbuilding-yards. Pop. 21,500. For the river Memel, see Niemen.

Memmingen (*Mem'ming-en*), an old town of Bavaria, 33 miles SSE. of Ulm. Here Moreau defeated the Austrians, May 1800. Pop. 12,400.

Memphis, an ancient capital of Egypt, 12 miles S. of Cairo, excavated since 1905.

Memphis, a city and port of entry of Tennessee, stands on a high bluff on the east bank of the Mississippi River, 826 miles above New Orleans, and 230 miles by rail WSW. of Nashville. The river to this point is navigable for the largest sea-going vessels, and eight lines of railway terminate here; the trade of Memphis is accordingly very large. The river is spanned here by a steel cantilever bridge of five spans. Memphis is a handsome town, with wide, regular streets, and great warehouses bordering the esplanade that extends along the bluff. The public buildings include a custom-house, cotton exchange, a large hospital, a Roman Catholic college, &c. Memphis is one of the first cotton marts in the United States, and has foundries, machine-shops, oil, lumber, and flour mills, steam-gins, &c. The city was visited by fearful epidemics of yellow fever in 1878 and 1879, since when its drainage and sewerage have been thoroughly reconstructed. Pop. (1850) 8841; (1870) 40,226; (1900) 102,320; (1910) 131,105.

Menado. See Celebes.

Menai Strait, a channel between Carnarvonshire and Anglesey, running 14 miles east-north-east from its southern extremity to Bangor, where it widens out into Beaumaris Bay. Its width varies from about 200 yards to 2 miles, whilst the scenery on both sides is very picturesque. The navigation is hazardous, but for the sake of expedition vessels under 100 tons, and occasionally some of larger size, pass through the strait. At its entrance the tides sometimes rise 30 feet; ordinary neap-tides, however, do not rise more than from 12 to 15½ feet. Communication with Anglesey was formerly solely maintained by ferry-boats, but since 1825 access has been afforded by Telford's suspension bridge, 1710 feet long, and 100 feet above the water-level, and since 1850 by Stephenson's Britannia Tubular Bridge.

Menam. See Siam.

Mende, capital of the French dep. of Lozère, on the Lot, 66 miles NW. of Nîmes, with a cathedral, and cloth manufactures. Pop. 6000.

Mendip Hills, a range in Somersetshire, extending 23 miles SE. from Weston-super-Mare to Shepton Mallet, and 3 to 6 miles broad. The highest point is Black Down (1067 feet). The limestone of the Mendips is pierced by numerous caverns, some of which have yielded prehistoric remains; and lead-mining, now unimportant, has been carried on from pre-Roman days, calamine-mining being a later industry. See Compton, *A Mendip Valley* (1892).

Mendo'za, a western dep. of the Argentine Republic. Area, 62,000 sq. m.; pop. 240,000. The Andes occupy the western portion: Aconcagua (22,427 feet), the highest peak in America, is on the north-west frontier. The rest of the province is pampa land, fertile where it can be irrigated by the Mendoza and other streams, but elsewhere almost worthless.—The capital, Mendoza, 655 miles by rail W. by N. of Buenos Ayres, and 2320 feet above sea-level, is on the trans-continental railway, carried hither in 1884. An earthquake in 1861 destroyed Mendoza (founded 1559) and 13,000 of its 14,600 inhabitants; many of the ruins are still visible in the larger city raised on its site. Pop. 40,000.

Menin (*Menan*^{g}), a town of Belgium, 7 miles SW. of Courtrai, on the left bank of the Lys, which separates it from France. Pop. 23,000.

Menom'inee, capital of Menominee county, Michigan, at the mouth of Menominee River, on Green Bay, 179 miles by rail N. of Milwaukee, with a large trade in lumber, &c. Pop. (1880) 3288; (1910) 11,096.

Menstrie, a Clackmannanshire village, 4½ miles NE. of Stirling.

Mentana (*Mentah'na*), a village 12 miles NE. of Rome, where in 1867 the Garibaldians were defeated by the papal and French troops.

Menteith, Lake of, a beautiful sheet of water in south-west Perthshire, 17 miles W. by N. of Stirling. Lying 55 feet above sea-level, it has an utmost length and breadth of 1½ and 1 mile, and a depth in places of 80 feet. It sends off Goodie Water 9 miles ESE. to the Forth, and contains three islets—Inchmahome, Inchtalla, and Dog Isle. Inchmahome has remains of an Augustinian priory (1238), the refuge in 1547–48 of the child-queen Mary Stuart; whilst on Inchtalla is the ruined tower (1427) of the Earls of Menteith. See works by Dun (1866) and Sir W. Fraser (2 vols. 1880).

Mento'ne (Fr. *Menton*), a town in the French dep. of Alpes Maritimes, is pleasantly situated on the Mediterranean, 1½ mile from the Italian frontier and 14 miles by rail NE. of Nice. Owing to its southern exposure, and the fact that spurs of the Alps shelter it on the north and west, it enjoys a beautiful climate—average for the year 61°—and so has become a favourite winter health-resort. The vegetation is luxuriant, and lemons are largely grown. It stands on a promontory that divides its bay into two portions; the native town clings to the mountain side, whilst the hotels and villas extend along the water's edge. The harbour is protected by a sea-wall (1889). The place belonged to Monaco (q.v.) from the 14th c. until 1848. Great damage was done by an earthquake in February 1887. Pop. 10,000.

Mentz. See Mainz.

Menza'leh, Lake, a coast lagoon of Egypt, extending east from the Damietta branch of the Nile, is separated from the Mediterranean by a narrow strip of land, with several openings. It has an average depth of only 3 feet, and is 460 sq. m. in extent, studded with islands, the most interesting of them, Tennees (anc. *Tennesus*), with Roman remains of baths, tombs, &c. The Suez Canal traverses the E. portion.

Meppel, a Dutch town, 18 miles N. by E. of Zwolle. Pop. 10,160.

Me'quinez. See MIKNAS.

Meran, a town in the Tyrol, at the south side of the Alps, 100 miles by rail S. by W. of Innsbruck, is a celebrated winter-resort, especially for sufferers from chest diseases. Pop. 12,000.

Mercedes (*Mer-say'des*), in Argentina, (1) a city 61 miles by rail W. of Buenos Ayres (pop. 9000); and (2) a town 55 miles by rail ESE. of San Luis city (pop. 6000); (3) the capital (15,000) of Soriano province, in Uruguay.

Merchiston, a south-west suburb of Edinburgh.

Mercia, the great Anglian kingdom of central England. The name refers to the 'march' or frontier that had to be defended against the Welsh.

Mere, a Wiltshire town, 21 miles S. by E. of Bath. Pop. of parish, 1900.

Mergui, a seaport of Burma, on an island in the Tenasserim River, 2 miles from its mouth. Pop. 12,000.—The MERGUI ARCHIPELAGO is a group of mountainous, sparsely inhabited islands in the Bay of Bengal, lying off Burma.

Mer'ida (anc. *Augusta Emerita*), a decayed town of Spain, on the Guadiana's right bank, 36 miles by rail E. of Badajoz. Its Roman remains include Trajan's bridge of 81 arches, 2575 feet long; the ruins of half-a-dozen temples, an aqueduct, a circus, the Arch of Santiago, 44 feet high, &c. There is also an old Moorish palace. Merida was built in 23 B.C., and flourished as the capital of Lusitania. Pop. 12,000.

Merida, (1) capital of the Mexican state of Yucatan, 25 miles S. of the Gulf of Mexico, and 95 miles NE. of Campeachy. Founded by the Spaniards in 1542, it has a cathedral, a university, &c. Pop. 62,000.—(2) A town of Venezuela, lies 5290 feet above sea-level, and 70 miles S. of the lake of Maracaybo. Founded in 1558, it was destroyed by an earthquake in 1812, and again in 1894. It has a cathedral, a university, and woollen and cotton manufactures. Pop. 11,750.

Meriden, a city of Connecticut, 19 miles by rail N. by E. of New Haven, with manufactures of metal wares, cutlery, firearms, woollens, &c. Population, 30,000.

Meridian, capital of Lauderdale county, Mississippi, 135 miles by rail N. by W. of Mobile, has manufactures of iron, cotton, blinds, furniture, &c. Pop. 20,000.

Merion'eth, a triangular county of North Wales, with a maximum length and breadth of 45 miles by 30, a seaboard on Cardigan Bay of 38 miles, and an area of 660 sq. m., or 422,372 acres, is bounded by the counties of Carnarvon, Denbigh, and Montgomery. Pop. (1801) 27,506; (1881) 52,038; (1911) 45,565. The surface is rugged and mountainous, interspersed with picturesque valleys, lakes, and waterfalls. Aran Mowddy (2970 feet), Cader Idris (q.v., 2914), and Aran Benllyn (2902) are the highest peaks; Bala is the largest lake; whilst of rivers the principal are the Dee, Dovey, and Mawddach. The soil generally is poor, and large tracts are unfit for profitable cultivation. Sheep are bred, and flannels and woollens manufactured, but the principal wealth of the county arises from its mineral products. Slate and limestone are largely quarried, much manganese ore is produced, and gold has been mined in the vicinity of Dolgelly and Bala. Merioneth is divided into five hundreds, and thirty-nine civil parishes, partly in the diocese of Bangor, and partly in that of St Asaph. It returns one member. The principal towns are Dolgelly, Bala, Barmouth, Corwen, Festiniog, Harlech, and Towyn.

Meroë. See ETHIOPIA.

Merom, WATERS OF. See JORDAN.

Merrimac, a river rising among the White Mountains of New Hampshire, flowing south into Massachusetts, and falling into the Atlantic near Newburyport, after a course of 150 miles. It has numerous falls, affording immense water-power. It is navigable to Haverhill.

Merse. See BERWICKSHIRE.

Merseburg (*Mer'seh-boorg*), a town of Prussian Saxony, on the Saale, 8 miles S. of Halle. Its Domkirche is a four-towered pile, with Romanesque choir (1042), transept (*c.* 1274), and 16th-century nave—the whole restored in 1884–86. The organ (1666) has 4000 pipes. The picturesque 15th-century castle was once the bishop's palace, and afterwards (1656–1738) the residence of the dukes of Sachsen-Merseburg. Beer, iron, paper, and celluloid are manufactured. Pop. 21,000.

Mersey, an important river of England, separates, in its lower course, the counties of Chester and Lancaster, and has its origin in the junction of the Etherow and Goyt, on the borders of Derbyshire. It flows in a west-south-west direction, and is joined on the right by the Irwell 6 miles below Manchester, from which point it was made navigable to Liverpool for large vessels in the year 1720. Besides the Irwell the chief affluents are the Bollin and the Weaver from Cheshire. At its junction with the Weaver the Mersey expands into an estuary which forms the Liverpool channel, and which is 16 miles long and 1 to 3 miles broad (1¼ opposite Liverpool). In this estuary on the Cheshire side is the entrance to the Manchester (q.v.) Ship-canal. The estuary is much obstructed by sandbanks, but excellent pilotage, combined with the admirable construction of the sea-walls, renders the navigation comparatively secure. Entire length, with the estuary, 70 miles. A railway Mersey tunnel between Liverpool and Birkenhead was opened on January 20, 1886. The alluvial meadows along the Mersey are famous for their fertility; and by embanking the river, many thousands of acres of most valuable land have been reclaimed.

Merthyr-Tydvil or **Tydfil** (so called from the martyrdom here of a Welsh princess of that name), a parliamentary and county borough of South Wales, on the confines of the counties of Glamorgan and Brecknock, 24 miles N. by W. of Cardiff, its port, and 178 W. of London. Pop. (1801) 7705; (1871) 51,949; (1911) 80,990. Surrounded by lofty and bleak hills, the town stands on the banks of the Taff, and is partly built on slag foundations, the refuse of mines in the vicinity. Its streets are narrow and irregular, but since the formation of a Local Board of Health in 1850, great improvements have been effected in the widening of thoroughfares, the supply of pure water, and the construction of effective sewage-works. The industries depend on the numerous collieries and iron and steel works in the vicinity; Merthyr being the centre of the Glamorganshire coalfield. With Aberdare it is noted for the excellence of its steam coal, and the quantity of iron and steel annually turned out from the great works of Dowlais, Cyfarthfa, and Plymouth is enormous. In 1816, and again in 1831, the town was the scene of severe riots, the latter disturbance being only quelled by the military with a loss of twenty-three lives. The parl. borough (1867), which embraces Aberdare and two other outlying districts, and in 1911 had a pop. of 144,000, returns two members.

Merton, an urban district of Surrey, on the Wandle, 10 miles SW. of London by rail. Only a fragment remains of the Augustinian priory (1115) where the parliament met which passed, in 1235, the Statute of Merton. Here were educated Thomas Becket and Walter de Merton, Bishop of Rochester and Chancellor, who in 1264 founded Merton College, Oxford. Pop. 13,000.

Merv, an oasis of Turkestan, lying between Bokhara and the north-eastern corner of Persia, 512 miles by rail (1886) from the Caspian and 118 from the Oxus. The oasis consists of a district 60 miles long by 40 broad, watered by the river Murghab, and is inhabited by from 150,000 to 200,000 Tekke Turkomans. There is an old citadel, and adjoining it a new Russian fort garrisoned by nearly 3000 men; on the opposite bank of the Murghab a new Russian town is growing up. The oasis, in which Alexander the Great built a town, was held successively by the Parthians and the Arabs, who made Merv capital of Khorassan. It was the seat of a Nestorian archbishop in the 5th century, and of a Greek archbishop in the 14th. Under the Seljuk Turks Merv enjoyed its greatest splendour, and it decayed after being sacked by the Mongols in 1221. In 1856 the Turkomans made themselves masters of the oasis; but they in turn submitted to the Russians in 1883. Merv occupies an important strategic position at the intersection of the routes Bokhara-Meshhed and Khiva-Herat. See works by Marvin (1880), O'Donovan (1882), and Lansdell (1883–85).

Mesagna (*Mezan'ya*), a town in southern Italy, 12 miles SW. of Brindisi. Pop. 9601.

Meshhed ('place of martyrdom'), the principal city of north-east Persia, the capital of Khorassan, on a tributary of the Hari-Rud, 460 miles E. by N. of Teheran and 200 NW. of Herat. Above the walls shine the gilded dome and minarets of one of the most splendid mosques of the East, that of Imam Riza. Meshhed is the sacred city of the Shiites, and is held in as much veneration by them as Mecca is by the Sunnite Moslems; it is visited yearly by almost 100,000 pilgrims. The people make excellent felt-rugs, carpets, swords, turquoise jewellery, velvet, and cotton and silk goods. The Transcaspian Railway has given Russia the predominance in trade. Owing to its elevated situation (3055 feet), the city has a cold climate in winter. Close by are the ruins of Tus, the old capital of Khorassan, where Firdausi, Haroun-al-Raschid and the Imam Riza were buried. Pop. 50,000.

Meskoutin, or Hammam Meskoutin ('the Accursed Baths'), a place in Algeria, 48 miles (77 by rail) E. by N. of Constantine, with remarkable hot baths (203° F.), known to the Romans as *Aquæ Tibilitinæ*. They and the adjoining ferruginous and sulphureous springs (170°) are still used medicinally.

Mesolonghi. See Missolonghi.

Mesopotamia ('between the rivers'), the district between the rivers Tigris and Euphrates, extending from the foot of the Armenian mountains south-eastwards to near Bagdad. It has an area of about 55,000 sq. m. The soil of the great plain is sandy, but, when well watered or, as it was in ancient times, well irrigated, it develops extraordinary fertility. Under the Turks (since 1515) it has fallen more and more a prey to barrenness and neglect, but irrigation schemes are now on foot. Held successively by the Assyrians, Babylonians, Persians, Greeks, Romans, Arabs, and Turks, it has been the battle-ground of these mighty empires; and amongst its historic cities may be mentioned Harran, Serug (Seruj), Apamea, Edessa, Nisibis, Nicephorium (Rakka), Hit (Is), Mardin, Mosul (Nineveh), Amid (Diarbekr), and Thapsacus. In summer excessive heat (up to 122° F.) prevails; in winter the thermometer may go down to 14° F.

Messenia, the western of the three peninsulas that project southwards from the Peloponnesus, now a nomarchy of the kingdom of Greece.

Messina (*Messee'na*), the second city of Sicily, stands on the western shore of the Strait of Messina, 110 miles E. by N. of Palermo, and 195 SSE. of Naples. It occupies a narrow strip of coast between the hills and the deep, safe harbour, whose opposite or eastern side is formed by a sickle-shaped tongue of rock, that only leaves a narrow entrance on the north. Although a very ancient city, Messina possesses few antique buildings, the greater part of it having been laid out regularly after the earthquake of 1783. The archiepiscopal cathedral, begun by Count Roger the Norman in 1098, was destroyed with great part of the city by the dreadful earthquake of 28th December 1908. The historic citadel was built by Charles II. of Spain in 1680, three other castles in 1540–57. There are here a university, founded in 1549, a college of the fine arts, &c. Industries are the manufacture of muslin, linen, and silk goods, and the working of coral. The imports include wheat, cottons, flour, hides, coal, dried fish, woollens, iron; the exports, fruits, wine, essences, olive-oil. Pop. of the commune before the earthquake of 1908, 150,000; in 1911, 126,000.

Founded in 732 B.C. by the people of Cumæ, the place was first called Zancle (i.e. 'sickle')—a name changed in 495 to Messana (Messene). Held successively by Carthaginians, Mamertines, Romans, and Saracens, Messina was the scene in 1282 of the Sicilian Vespers' massacre, and from then to 1713 belonged to Spain. It revolted in 1671, but was reduced to submission in 1678. In 1743 the plague, and in 1783 an earthquake, wrought the ruin of the city. It was, moreover, bombarded by the Neapolitans in 1848, and in 1861 it was the last place in Sicily to yield to the Sardinian (Italian) troops.

The Strait of Messina (Lat. *Mamertinum fretum*, or *Fretum Siculum*), separating Italy from Sicily, is 24 miles long, and 2½ to 14 miles wide.

Metaurus (modern *Metauro* or *Metro*), a river of central Italy, entering the Adriatic near Fano. On its banks the Romans defeated the Carthaginian Hasdrubal in 207 B.C.

Methil, a coal-shipping port with a good harbour, on the south coast of Fife, 1 mile SW. of Leven. Docks were constructed in 1875, 1893–94, and 1908–13.

Met'kovich, in Dalmatia, the port of Mostar, 111 miles by rail SSW. of Sarajevo. Pop. 1500.

Mettray, a village of France, 5 miles N. of Tours by rail, noted for its great agricultural and industrial reformatory dating from 1839.

Metz (Fr. pron. *Mess*), the strongest fortress of German Lorraine, was before 1871 the principal bulwark of the north-eastern frontier of France, and capital of the dep. of Moselle. It stands on the river Moselle at the influx of the Seille, 216 miles E. of Paris; and its strength consists in its cordon of forts. The cathedral, a Gothic edifice (14th to 16th century), is remarkable for its vast size and its architectural lightness, and has a beautiful spire of open work, 363 feet high. Apart from tanning and the making of saddles and shoes, there are few industries, though there are several ironworks in the vicinity. Pop. (1869) 48,325; (1875) 37,925; (1910) 68,667, including the garrison. Metz, known to the Romans as *Divodurum*, was afterwards called Mettis (corrupted from Mediomatrici, the name of the people). Under the Franks it was the capital of Austrasia, and in 870 passed to the empire. In 1552 it was treacherously taken possession of by the French; and, although Charles V. besieged the place in 1552–53, they kept it till it was formally ceded to them in 1648. The fortifications were completely reconstructed by Vauban in 1674, and often strengthened. In August 1870 Bazaine was forced to retire with 179,000 men into Metz, which after a long siege (27th October) surrendered to the Germans; by the treaty of Frankfort it was annexed to Germany.

Meudon (*Meh-dong'*), a village 5 miles W. of Paris. The château, rebuilt by Mansard for the Dauphin in 1695, and fitted up for Marie Louise by Napoleon in 1812, was reduced to ruin during the bombardment of Paris in 1871. The Forest is a favourite holiday-resort. A chapel, dedicated to Notre Dame des Flammes, commemorates the terrible railway accident of May 1842, in which over 100 persons were burned alive. Rabelais was curé of Meudon. Pop. 9950.

Meulebeké (*Meh'le-bay'kay*), a Belgian town, 24 miles SW. of Ghent. Pop. 9063.

Meurthe-et-Moselle (*Murt-ay-mozell'*), a dep. of NE. France, formed, after 1871, out of what remained of the former deps. of Moselle and Meurthe. It has four arrondissements—Briey, Lunéville, Nancy (the capital), and Toul. Area, 2020 sq. m.; pop. (1872) 365,137; (1911) 564,730.

Meuse (Fr. pron. nearly *Mehz;* Dutch *Maas*), a river of France and Belgium, rises in the French dep. of Haute-Marne, and flows 500 miles N., then E., again N., and W. past Verdun, Sedan, Namur, Liége, and Maestricht, until it joins the Waal, one of the mouths of the Rhine, from the left opposite Gorkum. The united streams take the name of the Maas, which soon divides again. The southern branch passes through the Biesbosch and Hollandsche Diep, and, again dividing, reaches the sea in two wide estuaries, Haringvliet and De Krammer. The northern branch, called the Merwede as far as Dordrecht and to the west of that town the Old Maas, likewise reaches the sea in two channels, the Old and the New Maas. On this last stands Rotterdam (q.v.). The river is navigable from Verdun. Its principal affluents are the Sambre and Ourthe on the right.

Meuse, a dep. in NE. France, touching Belgium. Area, 2400 sq. m.; pop. (1872) 284,725; (1911) 277,955. Its arrondissements are Bar-le-Duc (the capital), Commercy, Montmédy, Verdun.

Mevagissey (*g* hard), a Cornish fishing-town, 5½ miles S. of St Austell. Pop. of parish, 1800.

Mexborough, a town of Yorkshire, 5¾ miles NE. of Rotherham, with ironworks and potteries. Pop. 14,400.

Mexico (or *Méjico;* Spanish pron. *Meh'hē-co*, from a native word), a federal republic of North America, embracing twenty-seven states, a federal district, and four territories. It extends between the United States and Guatemala, with an extreme length of nearly 2000 miles; its breadth varies between 1000 and (in the Isthmus of Tehuantepec) 130 miles. It has a coast-line of almost 6000 miles, but with scarcely a safe harbour beyond the noble haven of Acapulco: on the Atlantic side, with its sandbanks and lagoons, there are only open roadsteads, or river-mouths closed to ocean vessels by bars and shallows; harbour-works, however, have been constructed at Vera Cruz and Tampico. From the SE. and NW. extremities of the republic there extend the peninsulas of Yucatan and Lower California, enclosing the Gulfs of Campeche and California respectively. In area (751,300 sq. m.) Mexico almost equals Great Britain and Ireland, France, Germany, and Austria-Hungary together. Of the entire pop.—15,000,000 in 1910—the whites are estimated to form 19 per cent., the Indians 38, and the half-castes (*mestizos*) 43 per cent.

For the most part Mexico consists of an immense tableland, which commences in the United States, and rises to over 8100 feet at Marquez, 76 miles N. by W. of Mexico City: at El Paso, on the northern frontier, the elevation is only 3717 feet. The most important range is the Sierra Madre (over 10,000 feet, and extending from Tehuantepec into the United States); parallel with this run the sierras of the east coast and of Lower California. The surface of the country is also much broken up by short cross-ridges and detached peaks. There are numerous volcanoes, but only a few of them are more or less active. The more prominent are Orizaba (Citlaltepetl, 'star mountain'), 18,250 feet; Popocatepetl ('smoking mountain'), 17,520 feet; Ixtaccihuatl ('white woman'), 16,960 feet; Nevada de Toluca, 14,950 feet; and Malinche, 13,460 feet. On the Atlantic side the plateau descends abruptly to the narrow strip (about 60 miles) of gently sloping coast-land; towards the Pacific, where the coast-lands vary in width from 40 to 70 miles, the descent is more gradual. Of the lakes the largest is Chapala (q.v.). The rivers of Mexico are of little use for navigation. South of the Rio Grande del Norte, on the Texan frontier, they are mostly impetuous mountain-torrents. In the plateau region the climate is almost that of perpetual spring; but agriculture is dependent on irrigation, and an immense desert tract extends between Chihuahua and Zacatecas. On the coast-lands wood and water are abundant, and the soil fertile, but the climate is such that white men cannot work as labourers there. Northern Mexico is the original home of the 'cattle-ranche' business. The coast-belt and the terraces up to 3000 feet constitute the *tierras calientes*, where the temperature ranges from 60° to 110° F., and in the south magnificent tropical vegetation and yellow fever reign. The cold lands, or *tierras frias*, embrace all the country above about 8000 feet. South of about 28° N. there are only the wet and the dry season, the former from June to October. Farther north there are four seasons. The vegetation of Mexico has the same wide range as the climate. In the lowlands dye-woods and valuable timbers abound in the virgin forests, as well as medicinal plants, india-rubber, palms, &c.; and oranges and bananas, many varieties of cactus, agave, sisal, olives, sugar, coffee, cocoa, rice, indigo, cotton, and tobacco, besides the omnipresent maize, all thrive. The vine flourishes in some districts. In Lower California archil is collected. But agriculture in Mexico is steadily developing. Silver-mining has been an important industry ever since the conquest. Gold is also produced. Copper is largely mined in some sections. Other minerals are iron, copper, lead, sulphur, zinc, quicksilver, platinum, cinnabar, asphalt and petroleum, besides salt, marble, alabaster, gypsum, and rock-salt in great quantities. There are also said to be large deposits of coal. The manufacturing industries have in recent years, owing to good government and the help of foreign capital, developed rapidly; the chief manufacture is coarse cotton cloth. In 1910 there were 150 factories with 25,000 looms, consuming 60,000,000 lb. of raw cotton per annum. There are also 2000 distilleries and over 700 tobacco-factories paper and sugar mills; with manufactures of candles, glass, and henequen fibre. In 1890–1910 the imports varied from £6,500,000 to £28,000,000, and the exports rose from £15,000,000 to £26,000,000. Of the exports the precious metals represented more than half; henequen, coffee, hides, animals, and tobacco came next. Nearly two-thirds of the total trade is with the United States, and one-eighth with Great Britain. Great Britain imports from Mexico mainly mahogany, logwood, and silver ore; and exports thither cottons, woollens, and linens, iron, machinery, and coal.

The Mexican constitution is closely modelled upon that of the United States. The president, who is assisted by six secretaries of state, is elected for six years; the senators and representatives receive a salary of 3000 dols. a year; and the several states have elective governors and legislators. Under Diaz as president in 1876–1911 the progress in stability, order, and prosperity was marvellous. Federal revenue increased from under £2,000,000 to over £10,000,000, and the state and municipal revenues in like proportion. The interest on the public debt (£30,500,000) was regularly paid, and a large reserve fund existed. Instead of one bank there were over thirty, with a joint capital of over £10,000,000; and foreign capital to the amount of over £135,000,000 was invested in the country. The assessed value of property increased from £28,000,000 to over £100,000,000. Railways increased from 500 miles to over 15,500, seven great lines crossing the country connecting all the Atlantic and Pacific ports. The harbours were greatly improved, roads were made, and electric tramways introduced. Imports increased by four times, and the exports by eight times. Twenty-four agricultural colonies had been established in the country, and the export of agricultural produce increased eleven times. The irrigation of the great central tableland of Mexico is being actively considered. The value of cattle and horses increased from £1,500,000 to over £12,000,000; the mineral industries greatly increased. Education is compulsory, and the pupils at the public schools increased from under 200,000 to over 800,000. The confusions of 1911–14 were adverse to progress.

The *mestizos* are the farmers and rancheros, the muleteers and servants. Whites and *mestizos* speak Spanish. From Indians, speaking 150 dialects (in three main groups, Otomí, Maya-Quiche, and Nashua), are chiefly drawn the peons, or agricultural labourers. The Indians not employed on the estates usually live in communities resembling the old village communities of Europe. The houses in Mexico are mostly of *adobe*, one story high. The great mass of the people are Roman Catholics, but there is no established church. In 1867 the church property was confiscated; convents and religious houses were suppressed.

The oldest inhabitants, the Toltecs, had by the 8th or 9th century A.D. attained a comparatively high civilisation. About the 11th or 12th century the kindred but fiercer Aztecs became dominant, and grafted on the institutions of the Toltecs gloomy religious beliefs and bloody rites. Cortes and his Spaniards landed at Vera Cruz in 1519; and the conquest of the empire was as creditable to the audacity and bravery of the Europeans as it was dishonourable to their humanity. Mexico was long the richest province of Spanish America, and was systematically and mercilessly exploited for the benefit of Spain. Discontent on the part of the inhabitants, Spanish as well as of mixed blood, broke into open rebellion in 1810, and the capital was surrendered by the last of the viceroys in 1821. Iturbide proclaimed himself emperor next year; and after various convulsions and rebellions, the federal republic was established in 1823. For the next fifty years the history of Mexico is a mere record of chronic disorder and civil war. In 1845 Texas was incorporated with the United States; and after the war of 1848, Mexico ceded half a million square miles to the United States. The emperor Napoleon III. declared war against the president, Juarez, in 1862; the Austrian emperor of Mexico, Maximilian, imposed by the French, was executed in 1867, and the republic re-established. Diaz was re-elected president for the eighth time in 1910, but, as too autocratic, had to resign under pressure of revolution in 1911. In the ensuing welter of revolts and *coups d'état*, President Madero was set aside and killed, and the United States applied pressure to eliminate President Huerta.

See works by Prescott (1843), Lester (1878), Castro (1882), Bancroft, Wells, Ballou (1890), Miss Hale, Butler, Lummis (1898), Mrs Tweedie (1901), Martin (1906–7), Enock (1909), MacHugh (1914), and (for slavery in Yucatan) Turner (1911).

Mexico, capital of the republic, is situated 7347 feet above the sea, at the lowest level of the great lacustrine basin (1400 sq. m.) of the Anahuac plateau. The largest of the six lakes that occupy this hill-girt valley, Lake Tezcuco, amid whose waters, Venice-like, the city first rose, has now retired 2½ miles to the north-west. All the main streets converge on the Plaza Mayor, where the site of the old temple of Huitzilopochtli is occupied by the imposing cathedral (1573–1657). Facing the cathedral is the Municipal Palace, and on the sides of the *plaza* are the National Palace, the national Monte de Piedad, the post-office, and the national museum. Other noteworthy buildings are the picture-gallery and library, the school of mines, the mint, the former palace of the Inquisition (now a medical college), a sumptuous new legislative palace, and a national pantheon for the ashes of the great men of Mexico. There are also schools of law and engineering, an academy of fine arts. The principal streets are broad, clean, and well paved and lighted, with houses of stone gaily painted in bright colours. There are monuments to Columbus (1877), the last of the Aztec emperors, and others. There is a fine *alameda*, and tree-lined avenues stretch far into the country. Since 1607 many attempts have been made to drain the valley of Mexico, but till recently, in vain; typhoid fever is common; and it is only the extreme dryness of the atmosphere that renders the site habitable at all. New works, on a very large scale, to drain the valley, were begun in 1890 and finished in 1898, at a total cost of over $16,000,000. The trade of Mexico is chiefly a transit trade, although it has a few manufactures, slowly developing, as cigars, gold and silver work, paper, pottery, religious pictures, hats, saddlery, &c. The railway connections are extensive. Pop. 475,000.

Mexico, Gulf of, a basin of the Atlantic Ocean, is closed in by the United States and Mexico, and its outlet on the east is narrowed by the jutting peninsulas of Yucatan and Florida, which approach within 500 miles of each other. Right in the middle of this entrance is planted the island of Cuba, dividing the strait into two—the Strait of Florida and that of Yucatan. The extreme length from SW. to NE. is over 1100 miles; the area of the gulf, 716,200 sq. m. The shores are very shallow, more than 400,000 sq. m. being less than 100 fathoms deep; but 58,000 sq. m. exceed 2000 fathoms in depth. The best of the few good harbours are those of New Orleans, Pensacola, and Havana. The principal rivers the gulf receives are the Mississippi and the Rio Grande del Norte. See Gulf Stream.

Mézières (*Mayzee-ehr'*), the capital of the French dep. of Ardennes, on a bend of the Meuse, opposite Charleville (q.v.), 155 miles by rail NE. of Paris. In 1521 it was successfully defended by Bayard (statue, 1893), with 2000 men, against 40,000 Spaniards; in 1815 held out for two months against the Allies; and in 1870–71 capitulated after a frightful bombardment. In its Flamboyant church, restored in 1884, Charles IX. was married (1570). Pop. 6500.

Mezö-Tur, a town of Hungary, 40 miles by rail SE. of Budapest; pop. 27,000.

Mfumbiro, a volcanic mountain-range of Central Africa, west of Victoria Nyanza, reaching in one of its peaks (an active volcano) 11,000 feet.

Mhow, or Mhau, a British cantonment in Indore state, Central India, 13 miles by rail SW. of Indore city. It is 1919 feet above the sea. Pop. 40,000, mostly Hindus.

Miako. See Kyoto.

Michigan (*Mish'e-gan*; Chippewa *Mitchi Sawgyegan*, 'Great Lake'), the third in size of the five great fresh-water lakes of North America, and the only one lying wholly in the United States, between Michigan and Wisconsin. It is 335 miles long, and 50 to 88 broad; the mean depth is 325 feet, the maximum 870. It has the same elevation as Lake Huron (with which it is connected by the Strait of Mackinaw)—$581\frac{3}{10}$ feet above sea-level; this is 20½ feet lower than Lake Superior, and $8\frac{4}{10}$ feet above Lake Erie. Its surface area is 22,450 sq. m. There is a neap-tide of 1½ inch, and a spring-tide of about 3 inches. The shores of Lake Michigan are for the most part low. Its principal harbours are those of Chicago, Milwaukee, and Racine.

Michigan, one of the northern states of the American Union, the seventeenth in area and ninth in population, has an area of 58,915 sq. m., or more than that of England and Wales; 1114 sq. m. are occupied by 5173 small lakes. It is sometimes called the Peninsular State, being divided into two great peninsulas by Lake Michigan. The upper, lying between the north end of Lake Michigan and Lake Superior, is mostly rugged, broken, rocky, and comparatively barren, though teeming with mineral wealth. In the north-west, near Lake Superior, is the highest land in the state, among the hills known as the Porcupine Mountains (1830 feet). The lower peninsula lies between Lake Michigan and Lakes Huron and Erie. No part of it is more than 1780 feet above sea-level; and the mean height is only 160 feet above the environing lakes. The upper peninsula is 318 miles by 164; the lower 277 by 177. The greatest length of the state from Montreal River in the north-west to Maumee Bay on Lake Erie is about 500 miles. The state touches Ohio, Indiana, Illinois, and Wisconsin, being elsewhere bounded by the lakes and their outlets. The mean annual temperature is 46·1° F. (summer, 68·5°; winter, 23·8°); the annual rainfall is 35·8 inches. Both peninsulas, with occasional exceptions of swamps or small prairies, were originally covered with dense forests, the products of which have proved exceedingly valuable. The centre of the lower peninsula is a coal-bearing area of about 5000 sq. m., carrying, however, comparatively little workable coal. In the Michigan salt group are the rich brine wells of the Saginaw valley; in the Marshall or Waverley are the Huron grindstones. Michigan is exceptionally rich in iron and copper; the great Calumet and Hecla copper-mines are on the Keweenaw Peninsula, running into Lake Superior. Gypsum appears in immense deposits at Grand Rapids, in the lower peninsula. Building-stones abound in both peninsulas, and in the upper there are also statuary and other marbles, and such ornamental stones as agates, jasper, chalcedony, and chlorastolites. Glass sand is found in the extreme south-east; and lime, bricks, and tiles are made in many parts. Of the numerous mineral springs, nineteen have become popular resorts, and the waters of four have a commercial value. Lumbering is the second great industrial interest of the state, the forests of northern Michigan being mostly pine. Other leading manufactories are grist-mills, foundries and machine-shops, iron and steel works, and those of agricultural implements and of furniture. But agriculture remains the chief industry, employing about half the population. The most important crops are wheat, maize, oats, and barley; and in the 'fruit belt,' a narrow strip of about 200 miles in length on the west shore of Lake Michigan, peaches, plums, grapes, &c., are grown in great quantity. Much wool is produced. The commerce of the state is very great, and is promoted by three ship-canals.

The Michigan country was probably visited by Jean Nicolet in 1634, at the Sault de Ste Marie, where the first permanent white settlement was made by Father Marquette in 1668 for a Jesuit mission. Detroit was founded in 1701 by a French colony. The country passed to the English in 1760, and to the United States in 1796; it was again occupied by Great Britain in 1812, but was recovered by the Americans the next year. It was organised as Michigan territory in 1805, and admitted as a state in 1837. Pop. (1800) 551; (1840) 212,267; (1910) 2,810,173. Detroit has remained the chief city from the beginning, other cities being Grand Rapids, Saginaw, Bay City, Jackson, Muskegon, Kalamazoo, Port Huron, Lansing (the capital), Battle Creek, West Bay City, Manistee, Ishpeming, Menominee, Flint, Ann Arbor, Alpena. See W. Cook, *Michigan* (1905).

Michigan City, a town of Indiana, on Lake Michigan, 38 miles by water (57 by rail) ESE. of Chicago. It has a good harbour, contains a college, a state prison, and railway-shops, and manufactures cars, refrigerators, furniture, boots, &c. Pop. 20,000.

Micronesia. See Polynesia.

Middelburg, capital of the Dutch province of Zealand, in the island of Walcheren, and 4½ miles by rail NE. of Flushing. In former times it was one of the leading mercantile cities of the United

Provinces; but its commercial importance has greatly declined, though it has cotton-factories. Thomas Cromwell was a merchant here. The town-house, founded by Charles the Bold in 1468, is adorned with twenty-five statues of counts and countesses of Holland and Zealand. A once celebrated abbey (12th c.) is now used as administrative offices. Pop. 20,000.

Middle Level. See BEDFORD LEVEL.

Middlesbrough, a great iron-manufacturing and shipping centre in the North Riding of Yorkshire, is a municipal, parliamentary, and county borough, and capital of the district of Cleveland. It is on the south bank of the Tees near its mouth, 15 miles by rail ENE. of Darlington, 50 N. of York, and 246 N. by W. of London. In 1829 the site was occupied by a solitary farmhouse surrounded by marshy land; the town owes its remarkably rapid growth partly to the extension thither (in 1830) of the Stockton and Darlington Railway, but mainly to the discovery of iron ore in the adjoining Cleveland hills (1850). Another industry—that of boring salt—was added in 1886. There are here iron and steel works, blast-furnaces, chemical works, wood and iron shipbuilding-yards, saw-mills, marine engineering works, wire, nail, and tube works, salt and soda works, &c. A graving-dock was finished in 1875 at a cost of £120,000; and the South Gare breakwater (1864–88) is nearly 2½ miles long. The shipbuilding-yards employ 3000 men; and the export of coal is extensive. There are, besides Anglican and Nonconformist churches, a Roman Catholic cathedral and a synagogue. The town-hall and municipal buildings were erected at a cost of £120,000, and were opened in 1889 by the Prince and Princess of Wales. Among other public buildings are a market-house, corporation baths, royal exchange, high school, &c.; and there are theatres, clubs, masonic and temperance halls. The Albert Park of 72 acres was given in 1868 to the borough by Mr H. W. F. Bolckow (1806–78), the first mayor and member of parliament; on the celebration of Middlesbrough Jubilee in 1881 a monument to his memory was unveiled. There is also a monument in Exchange Place to Mr Vaughan, the founder of the Cleveland iron trade. The first governing body was established in 1841; the borough was incorporated in 1853; and since 1867. Middlesbrough returns one member to parliament. Pop. (1831) 154; (1841) 5463; of municipal borough (1861) 18,892; (1871) 39,824; (1881) 55,288; (1901) 91,302; (1911) 104,767. See books by H. G. Reid (1881) and J. Kirby (1900).

Middlesex, a small county in the south of England, bounded by Hertfordshire, Essex, Buckinghamshire, the Thames, and the county of London (as established in 1888). On the east the river Lea and on the west the Colne and Brent form the natural boundaries. Although the area is only 233 sq. m., the pop. is large (1,126,465 in 1911), which is accounted for by the neighbourhood of the county and city of London. (For the 'ancient' county, including the districts now in London county, see the table at ENGLAND, p. 253.) We first hear of Middlesex as a sub-kingdom dependent on Essex. Its position between the territory of the East Saxons and that of the West Saxons accounts for the name. The greater part of the surface was covered with a forest, of which Enfield Chase and Hampstead Heath are relics; but it was traversed by the great road which crossed the Thames, probably by a ford at Westminster, and led north-westward under the name of the Watling Street. There is but little tillage, except for market-gardens, and a great part of the county consists of grazing land, being occupied largely with villa residences, surrounded in many places with large parks. Brickfields occupy the western border, and the number of large suburban villages—without, however, any important town—is remarkable. Brentford, Uxbridge, and Ealing are to the west of London, and the first-named is usually reckoned the county town. Northward are Harrow, Enfield, and Tottenham. Eastward are Highgate and Hornsey. London, it may be well to note, was never in Middlesex.

Middleton, a town of Lancashire, on the Irk, 3 miles W. of Oldham and 6 NNE. of Manchester. Dating mainly from 1791, when it received a charter for a weekly market, it was incorporated as a municipal borough in 1886, the boundary being extended in 1891. It is chiefly dependent upon its manufactures of silk and cotton, and has an interesting parish church, a grammar-school (1572), public baths and libraries, &c. Pop. (1851) 5740; (1901) 25,178; (1911) 27,980.

Middleton, a town of Ireland, 13 miles by rail E. of Cork. At the college (1696) Curran was educated. Pop. 3200.

Middleton-in-Teesdale, a town of Durham, on the Tees, 9 miles NW. of Barnard Castle; pop. 5500.

Middletown, (1) a port of Connecticut, on the right bank of the Connecticut River, 15 miles below Hartford. It is a well-built city, dating from 1636, with wide, shaded streets, the Wesleyan University (1831), the Berkeley Divinity School (Episcopal), a large state hospital for the insane, a girls' industrial school, and manufactures of sewing-machines, tape, webbing, Britannia-ware, &c. Pop. 12,000.—(2) A town of New York, 67 miles NNW. of New York City. It contains the state homœopathic insane asylum, and manufactures iron, blankets, hats, &c. Pop. 15,000.—(3) A town of Ohio, on the Miami River and Canal, 35 miles N. of Cincinnati, with paper-mills and tobacco-factories; pop. 13,000.

Middlewich, an old-fashioned market-town of Cheshire, on the river Dane and the Grand Trunk Canal, 21 miles E. of Chester. Its salt-manufacture has declined. Pop. 4900.

Midhurst, a market-town of Sussex, on the Rother, a navigable tributary of the Arun, 65 miles by rail SW. of London and 12 N. of Chichester. Cobden was born close by, and Lyell was educated at the grammar-school (1672). Cowdray House, ½ mile NE., was built about 1530 by the Earl of Southampton, and for 239 years had been the seat of eight Viscounts Montague, when in 1793 it was reduced by fire to a beautiful ruin. Till 1885 Midhurst borough (35 sq. m. in area) returned a member to parliament. Pop. of parish, 1900.

Midi, CANAL DU. See GARONNE.

Midlothian. See EDINBURGHSHIRE.

Midnapur, a town of Bengal, on the Kasai River, 68 miles W. of Calcutta. Pop. 35,000.

Mid'somer Norton, a town of Somerset, 10 miles SW. of Bath, with malting and brewing, and a R.C. college (1814). Pop. 7300.

Miknas, or MEQUINEZ, a walled town of Morocco, 32 miles W. by S. of Fez and 70 from the coast. The palace is the sultan's summer residence, and the mosque of Muley Ismail is the royal burial-place. Pop. 30,000.

Milan (usu. *Mil'an;* Ital. spelling *Milano*), one of the three chief Italian cities, stands in the great plain of Lombardy, 80 miles NE. of Turin, 155 W. of Venice, and 25 S. of Lake Como. The city, nearly circular in shape, is surrounded on three sides by walls, has a circuit of nearly 8 miles, and is entered by 14 gates. The principal church is the cathedral of the archbishop, rebuilt by Gian Galeazzo Visconti in 1386, and completed by order of Napoleon I. in 1805–13. It is built entirely of marble, and in the Gothic style; but the windows and portals of the façade (partly of the 16th century) are not Gothic, but Italian. The exterior is adorned with pinnacles and 6000 statues in niches. Other churches are St Ambrose, founded in 868, on the site of one dedicated by the saint himself in 387; St Eustorgius, dedicated in 320; St Maria delle Grazie (1463), on the walls of whose refectory is Leonardo da Vinci's 'Last Supper;' and St Maurice the Greater (1497–1506), with paintings by Luini and his school. The Brera Palace (12th century), formerly a Jesuit college, has now a great gallery of paintings by Raphael, Da Vinci, Luini, Mantegna, the Bellinis, Titian, Vandyck, &c., an academy of art, a collection of casts, the magnificent monument of Gaston de Foix, the national library (1770) of 162,000 vols. and 3650 MSS., an archæological museum, and an observatory. In the famous Ambrosian Library (1609) there are 164,000 vols. and 8100 MSS., besides collections of drawings, engravings, and pictures. The city is adorned with numerous palaces, as that of the archbishop (1570); the royal palace, with fine modern frescoes; the Late Renaissance municipal palace (1558); the former castle of the Visconti (15th century), with frescoes by Luini; the Poldi-Pezzoli palace, &c. The arcaded colonnade of Victor Emmanuel (1865–67), lined with fine shops, forms a favourite promenade. The Arch of Peace, built of white marble (1807–38), commemorates the exploits of Napoleon. The Della Scala opera-house (1778) is the second in size (after San Carlo at Naples) in Italy; and the Milan *conservatoire* is the most famous school of music in Europe. Beccaria, Manzoni, the popes Pius IV. and Gregory XIV. were natives. The Great Hospital (1448) can accommodate 2500 patients. Owing to its situation Milan has always been a place of great commerce, much increased since the opening of the Gothard railway. It manufactures silks, velvets, gold, silver, and iron wares, railway carriages, tobacco, porcelain, and electric-light apparatus, besides being an active centre of the printing-trade. Pop. (1876) 283,225; (1881, city and suburbs) 295,543; (1911) 600,000.

Milan (Lat. *Mediolanum*) was conquered by the Romans in 222 B.C., and sacked by the Huns (under Attila) in 452, by the Goths in 539. It passed to the Longobards (569), the Franks, and the German empire. Here several of the German emperors were crowned with the Iron Crown. Frederick I. twice besieged it and razed it to the ground. Supreme power became (from 1277) vested in the Ghibelline Visconti, who extended the ascendency of Milan over the whole of Lombardy, and in 1395 became dukes. The successors of the Visconti were the Sforzas (1450–1535). From 1555 to 1713 Milan submitted to Spain, and from Spain passed to Austria. Under Bonaparte it was declared the capital of the Cisalpine Republic, of the Italian Republic, and, finally, of the Kingdom of Italy. From 1815 till 1859, when it became Italian, Milan was again the capital of the Austro-Italian dominions.

Milazzo (*Milat'so;* anc. *Mylæ*), a fortified seaport of Sicily, on a promontory 21 miles W. of Messina. Off Mylæ in 260 B.C. the Romans won a great sea-fight over the Carthaginians; and here in 1860 Garibaldi, with 2500 men, defeated 7000 Neapolitans. Pop. 16,000.

Milborne Port, a town of Somerset, 3½ miles NE. of Sherborne; pop. 5500.

Mildenhall, a Suffolk market-town, on the Lark, 12 miles NW. of Bury-St-Edmunds; pop. of parish, 3700.

Mile'tus, anciently the most flourishing city of Ionia, in Asia Minor, stood near the mouth of the Mæander. It was the birthplace of Thales, Anaximander, Anaximenes, and Hecatæus.

Milford, a parliamentary borough (contributory to Pembroke) and seaport of South Wales, in the county of Pembroke, on the north side of Milford Haven, 271 miles W. of London. The fortified Haven, which as a natural harbour is unequalled in area, complete shelter, and facility of entrance, stretches inland 10 miles, varies in breadth from 1 to nearly 2 miles, and has a depth in most places of from 15 to 19 fathoms. In 1485 the Earl of Richmond (afterwards Henry VII.) disembarked here from Brittany shortly before the battle of Bosworth. Docks designed by Sir E. J. Reed, and capable of accommodating vessels of the largest size, were completed in 1882, but not opened to shipping until 21st September 1888: their total area is 60 acres, and the depth of water inside 28 feet. Pop. 6400.

Milford, a town of Massachusetts, 36 miles W. by S. of Boston, with boot-factories; pop. 13,000.

Military Frontier. See CROATIA.

Militello, a town of Sicily, 21 miles SW. of Catania; pop. 10,000.

Millau (*Mee'yo*), a town in the French dep. of Aveyron, on the Tarn's right bank, 52 miles NW. of Montpellier. During the 16th and 17th centuries it was a Calvinist stronghold. Leather and gloves are manufactured. Pop. 20,000.

Millbury, Massachusetts, on the Blackstone River, is 39 miles by rail W. of Boston, and has cotton and woollen factories; pop 4700.

Milledgeville, the former capital of Georgia (q.v.), 32 miles ENE. of Macon; pop. 4400.

Mill Hill, a village of Middlesex, 8½ miles NW. of London by rail, with an important Nonconformist school and a R.C. missionary college.

Millom, a town of Cumberland, on the west side of the Duddon estuary, 30 miles SSE. of Whitehaven. It has mines and ironworks. Pop. 8600.

Millport. See CUMBRAE.

Millville, a city of New Jersey, on the Maurice River, 41 miles S. by E. of Philadelphia. It manufactures cottons and glass. Pop. 12,500.

Milnathort, a town of Kinross-shire, 1½ mile N. by E. of Kinross; pop. 1000.

Milngavie (*Mil-guy'*), a town of Dumbartonshire, 7 miles NNW. of Glasgow; pop. 4500.

Milnrow, a town of Lancashire, 2 miles ESE. of Rochdale. John Collier ('Tim Bobbin') was schoolmaster here. Pop. 8600.

Milnthorpe, a town of Westmorland, on the Kent, 7½ miles S. of Kendal; pop. 1000.

Milton-next-Sittingbourne, a town of Kent, at the head of a creek of the Swale, 10 miles ESE. of Chatham; pop. 4500.

Milverton, a town of Somerset, 13½ miles SW. of Bridgwater; pop. 1500.

Milwau'kee, capital of Milwaukee county, Wisconsin, and the largest city in the state, is situated on the west shore of Lake Michigan, at the common mouth of three improved and navigable rivers, which, with a canal, supply 20 miles of dockage. It is 85 miles by rail N. of Chicago, and overlooks Milwaukee Bay, which has a width of 7 miles and contains a harbour of refuge. The parked and terraced bluffs have an average height of 80 feet above the water. Milwaukee is built with light yellow bricks, and hence called 'the Cream City.' The streets are wide and lined on either side by magnificent elms. The public parks contain some 600 acres, and are connected by wide boulevards. The street railway lines are operated by electricity, and the streets mainly lighted by arc lights. A new and vast system of intercepting sewers is in operation, and the river is flushed by means of a huge tunnel from the lake, built at a cost of $250,000. In 1889 two new railway passenger depôts were built at a cost of $200,000 each; and more recent undertakings have been a new government building to cost $2,000,000, a new city-hall, and a public library and museum building. The public library contains 100,000 volumes. In 1888 was completed the Layton Free Art Gallery, the gift for which, exclusive of the value of pictures and statuary, was $300,000. Milwaukee, founded in 1835, is essentially a manufacturing city, chief products being lager beer, flour, pork, engines, machinery, iron and brass goods, &c. In October 1892 there was a tremendous fire. Pop. (1870) 71,440; (1880) 115,578; (1910) 373,511 (75,000 Germans).

Minas, capital of a mountainous Uruguayan province (area, 4844 sq. m.; pop. 60,000), 75 miles by rail NE. of Montevideo. Pop. 7000.

Minas Geraes (*Meenas Zhayrah'ez*), the most populous state of Brazil, lies inland from Espirito Santo and south of Bahia; area, 222,160 sq. m.; pop. 5,000,000. The surface rises in the Serra do Espinhaco to 5900 feet; the chief rivers are the navigable São Francisco and the Rio Grande, which with the Paranahyba forms the Paraná.

Minch (*Minsh*), the channel separating the island of Lewis from the mainland of Scotland. It is 24 to 40 miles wide, and has a rapid current. The *Little Minch*, separating Skye from North Uist, &c., is 14 to 20 miles wide.

Minchinhampton, a market-town of Gloucestershire, 3½ miles SSE. of Stroud. James Bradley is buried in the churchyard. Pop. of parish, 3700.

Minchmoor, a mountain (1856 feet), 3 miles SE. of Innerleithen, Peeblesshire.

Mincio (*Mintchio*), a tributary of the Po, rises in south Tyrol, flows (as the Sarca) 80 miles to Lake Garda, and thence has a southerly course of 93 miles past Mantua to the Po.

Mindanao. See PHILIPPINE ISLANDS.

Minden, a Prussian town in Westphalia, on the Weser, 40 miles W. of Hanover. Till 1873 a second-class fortress, it was already a town in Charlemagne's day, and suffered much in the Thirty Years' War, and again in the Seven Years' War, when, in 1759, the French were defeated here by an Anglo-Hanoverian army. It has a fine new bridge (1874), a Gothic town-hall, a Catholic church (11th c.—1379; till 1811 cathedral), and manufactures of tobacco, beer, brandy, glass, &c. Pop. 26,500. See also MÜNDEN.

Minehead, a watering-place (till 1832 parl. borough) of Somerset, on the Bristol Channel, 25 miles NW. of Taunton. Pop. 3500.

Minervino, an agricultural town of southern Italy, 44 miles W. of Bari. Pop. 20,000.

Mingrelia. See GEORGIA, CAUCASUS.

Minho (*Min'yo*; Span. *Miño*, anc. *Minius*), a river rising in Galicia, and flowing 174 miles SW. through Spain and along the Portuguese frontier to the Atlantic.

Minieh, a town of Egypt, on the left bank of the Nile, 150 miles above Cairo. It has a government cotton-factory. Pop. 27,500.

Minneap'olis, the largest city of Minnesota, stands on both sides of the Mississippi. The Falls of St Anthony, with a perpendicular descent of 16 feet, afford a water-power which has been a chief source of the city's prosperity. The streets are wide and handsome, and there are beautiful public parks. Notable buildings are the masonic hall, the post-office, the Exposition Building, and the Guarantee Loan edifice. This last is twelve stories high, built of granite and sandstone; it contains 400 offices, and on the roof is a garden where concerts are given. The state university here has nearly four thousand students of both sexes. There is a public library of over 150,000 volumes. The lumber and flour mills of Minneapolis, which dates only from 1838, are among the largest in the country. Pop. (1870) 13,066; (1880) 46,887; (1910) 301,408, many of them Scandinavians.—Five miles by rail SE. of Minneapolis are the Falls of Minnehaha ('Laughing Water'), celebrated in Longfellow's *Hiawatha*.

Minnehaha. See MINNEAPOLIS.

Minneso'ta (an Indian name, signifying 'sky-tinted water'), one of the north-central states of the American Union, the northernmost in the Mississippi valley. It is bounded by Manitoba, Ontario, Lake Superior, Wisconsin, Iowa, and North and South Dakota. Its area is 83,530 sq. m., or nearly as large as Great Britain. In Minnesota are the remote sources of the great rivers Mississippi, Red River of the North, and St Lawrence, whose waters flow in different directions to the Gulf of Mexico, Hudson Bay, and the Atlantic. Within the state the Minnesota River is the largest tributary of the Mississippi. Between the St Croix River and Red River of the North are hundreds of clear lakes, the largest of which are Red Lake (530 sq. m.), Mille Lacs, and Leech Lake. Over a half of the land area is under farms, but in the north there are extensive pine-forests, and in the north-east great marshes. The minerals include iron (which is extensively worked), slate, granite, and other rocks, and the red pipestone. The climate is bracing in winter, very dry and equable. Minnesota is an agricultural and especially a wheat-producing state; its principal manufactories are flour and lumber mills. The Mississippi is navigable as high as St Paul; the lakes, with Duluth for a port, open a water-way to the Atlantic; and there are over 7000 miles of railway in the state.

Minnesota was visited by French explorers in 1659–60, and the portion west of the Mississippi was part of the province of Louisiana purchased by the United States from France in 1803. In 1837 the Chippeway Indians surrendered all the land east of the Mississippi; immigration then began, and Minnesota became a territory in 1849, a state in 1858. In 1862 occurred a terrible massacre by the Indians, who in ten days killed some 800 persons. The principal cities are the capital, St Paul, Minneapolis, and Duluth. Pop. (1860) 172,023; (1880) 780,773; (1910) 2,075,708, including many Scandinavians and Germans.

Minorca, the second largest of the Balearic

Isles (q.v.), lies 25 miles NE. of Majorca. It is 28 miles long by 10 wide, and has an area of 284 sq. m. Pop. 40,000. Its coast is rocky and inaccessible, but broken by numerous inlets, and its surface low, undulating, and stony. The chief towns are Port Mahon and Ciudadela. The island has many megalithic remains (called talayots) and stalactite caves (at Prella).

Minsk, the chief town of a Russian government, on an affluent of the Beresina, 436 miles by rail WSW. of Moscow and 331 ENE. of Warsaw. Pop. 100,000. Area of government, 35,282 sq. m., 70 per cent. marsh, moor, and forest; pop. 3,000,000.

Miquelon (*Meek'elon^{g}*), Great and Little, two islands, connected by a long, narrow, sandy isthmus, off the SW. coast of Newfoundland, forming with St Pierre the only remaining French colony in North America. Fishing is the sole industry. Area, 78 sq. m.; pop. (with St Pierre) 4700.

Miraj, a native state of India in the southern Mahratta country; pop. 125,000. The capital is Miraj, near the Kistna River (pop. 20,000).

Miramar, a palace on the Adriatic, near Grignano, 6 miles NW. of Trieste, the home of the Archduke Maximilian, afterwards emperor of Mexico. See also Majorca.

Miramichi (*Meeramishee'*), the second river (220 miles) of New Brunswick, entering the Gulf of St Lawrence through Miramichi Bay. It is navigable to 2 miles above Newcastle.

Miran'dola, a cathedral city of northern Italy, 19 miles by rail NNE. of Modena. Pop. 20,000.

Mirecourt (*Meercoor'*), a town in the dep. of Vosges, 236 miles ESE. of Paris. Pop. 5000.

Mirfield, a manufacturing town of Yorkshire, 3 miles W. by S. of Dewsbury, and 4½ NE. of Huddersfield. It has a town-hall (1868), a parish church (restored in 1871 by Sir G. G. Scott), and manufactures of woollen cloths, carpets, blankets, and the like. The population, almost stationary since 1881, is 11,700.

Mirzapur, a town in the United Provinces, on the right bank of the Ganges, 45 miles by rail SW. of Benares. It manufactures shellac, carpets, and brass-wares. Pop. 55,300.

Miseno (*Meezay'no*), a promontory forming the western side of the Bay of Pozzuoli (*Cumœ*), 10 miles SW. of Naples. On it are ruins of the ancient city and naval station of Misenum.

Misiones (*Meezio'nes*), an Argentine territory, lies between the Uruguay and the Paraná, and is bounded on all sides but the SW. by Brazil and Paraguay; area, 20,823 sq. m.; pop. 50,000. Capital, Posadas (pop. 10,000), on the Paraná.

Miskolcz, a town of Hungary, 113 miles by rail NE. of Pesth; pop. 50,000.

Mississip'pi, one of the Gulf States of the American Union, lies west of Alabama and south of western Tennessee, and is bounded on the W. by the Mississippi River. Length, north to south, 335 miles; width, 150 miles; area, 46,810 sq. m. The surface, except in the Yazoo delta, is generally hilly, though nowhere mountainous, the highest hills rising only 800 feet above the sea-level. There are three distinct watersheds, represented by the Tombigbee, the Pascagoula, and the Yazoo. There are mineral springs here and there. Mississippi is essentially an agricultural state. The north-eastern prairie region, 70 miles long and 15 to 20 wide, with its fertile, black, calcareous soil, contains much of the best farming and grazing land in the state. There are no springs here, but cisterns dug in the rotten limestone, bored wells, and artesian wells furnish ample water. In the north the bottom-lands along the numerous creeks and rivers especially are well adapted to agriculture; while in the central portion stock-raising is carried on, and in the yellow-pine region large herds of sheep are raised. The *Yazoo Delta*, embracing the elliptical area of alluvial bottoms between the Mississippi and Yazoo rivers, was subject to inundations; but levees now protect the lands. The delta contains 4½ millions of acres of alluvial land, only 500,000 acres of which are under cultivation. Virgin forests of hardwoods cover the rest. Chief products are cotton, corn, oats, fruits, and vegetables. The winters are short and mild, the mean temperature 45° F., the annual rainfall 48 to 58 inches. Cotton is manufactured, and there is some trade in lumber. Mississippi was first settled by the French in 1699, as part of Louisiana. It was ceded to Great Britain in 1763; was admitted into the Union as a state in 1817; seceded in 1861; was readmitted into the Union, 1869. Vicksburg, Greenville, and Natchez are principal ports on the Mississippi River, and Pascagoula and Biloxi on the Gulf. Meridian is the second town, and Jackson is the capital. Pop. (1820) 75,448; (1850) 605,948; (1880) 1,131,597; (1910) 1,797,114.

Mississippi-Missouri. The Mississippi River (Algonkin *Missi Sipi*, 'Great River'), the largest river of North America, is, with its tributaries, wholly within the boundaries of the United States. It drains most of the territory between the Rocky and Alleghany Mountains, embracing an area of 1,257,545 sq. m., or more than two-fifths of the United States. Besides the Missouri, Ohio, Red River, and Arkansas, there are forty-one other tributaries navigable. The total length of the Mississippi is 2960 miles, of which 2161 are navigable; but the Missouri affluent is longer than the Upper Mississippi, and with the lower river gives a total of 4200 miles. The total navigable waters amount to 16,090 miles.

The source of the Mississippi is Lake Itasca (7 by 3 miles) in the north-west central part of Minnesota, which has, however, several feeders, the principal being Elk or Glazier Lake. The remotest springs of Itasca rise in 47° 34′ N. lat. and 95° 20′ W. long., and are 1680 feet above sea-level. As it issues from this lake the Mississippi is about 12 feet wide and 18 inches deep. Through pine-forests and swamps for hundreds of miles it winds from lake to lake, with frequent rapids and picturesque falls, until, 400 yards wide, at Minneapolis it plunges over the Falls of St Anthony—the head of river-navigation. After receiving the St Croix, the Mississippi becomes the boundary between the states of Minnesota, Iowa, Missouri, Arkansas, and Louisiana on the right, and Wisconsin, Illinois, Kentucky, Tennessee, and Mississippi on the left. On the Wisconsin boundary the river expands into Lake Pepin, and thereafter, fully a mile wide, flows between bluffs 200 and 300 feet high, and sometimes through dense forests. At Rock Island there are rapids with 22 feet of fall, and 125 miles farther down are the Des Moines rapids with 24 feet of fall. Around these obstructions to navigation the United States government has constructed ship-canals. For several miles after the entrance of the turbid Missouri the diverse waters refuse to mingle, the Missouri's muddy tribute taking the right bank and the Upper Mississippi's clear stream the left. From the mouth of the Ohio the trough of the Mississippi is about 1490 yards wide, but as it approaches the Red it is narrowed to 1000, and at New Orleans to 830. The usual depth of the channel southward from the Ohio is from 75 to 100 feet, and its surface is sometimes higher than the country beyond its banks; from the Missouri to the Gulf the Mississippi rolls in serpentine course through vast alluvial tracts or 'bottoms,' whose width varies from 30 to 150 miles. Though of unsurpassed fertility, scarcely one-tenth of these lands is cultivated owing to the dangers of the annual overflow. The melting of the ice and snow in the upper basin swells the lower current from March to June. Levees or embankments, largely built by the government, now extend for more than 1600 miles. Below the Red River the waters are discharged through numerous 'bayous' into the Gulf of Mexico. The main channel runs south-eastward, and finally divides into five or six passes—the principal, the South Pass. The vast deposits and the constant changes caused by floods tend to embarrass the entrance to the great river. To keep an open channel, Captain Eads made (1875–79) an admirably successful system of jetties at the South Pass, which has secured a depth exceeding 30 feet. The mouth of the Mississippi is essentially tideless. The principal cities on the great river are Minneapolis, St Paul, La Crosse, Dubuque, Keokuk, Quincy, Hannibal, St Louis, Memphis, and New Orleans, at several of which the river is crossed by railway bridges (at St Louis by two).

MISSOURI RIVER ('Big Muddy'), the principal branch of the Mississippi River, is formed by the confluence of the Jefferson, Gallatin, and Madison rivers, at Gallatin City, Montana, 4132 feet above the sea-level. These rivers rise in the Rocky Mountains, close to the sources of the Columbia and Colorado rivers, and to the Continental Divide. The Madison has the remotest source in a small lake of the same name in Yellowstone National Park in Wyoming, 44° 19′ N. lat. and 110° 50′ W. long., at an elevation of 7632 feet, and flows north-west and north to the junction of the Three Forks. Thence the Missouri flows N. and NE. to Fort Benton, the head of navigation, 225 miles from Gallatin City. About 40 miles above Fort Benton are the Great Falls, where the river descends 327 feet in 15 miles by a series of cataracts (the highest 87 feet). From Fort Benton the course is easterly, the river being flanked by bluffs about a mile apart until it passes the rapids 400 miles below, when the valley opens to a width of 10 miles. The Milk River is its first large tributary, but at the boundary of North Dakota the still larger Yellowstone (1152 miles) joins it. From the last junction, which is the head of navigation in the low-water season, the Missouri flows E. and SE. through North Dakota, to Bismarck (1610 feet above sea-level, where it is crossed by the splendid bridge of the Northern Pacific Railroad), and through South Dakota to Sioux City, whence flowing south the river bounds Nebraska and Kansas on the right and Iowa and Missouri on the left. On receiving the tributary Kansas the stream turns to the east, and flowing across the state of Missouri pours its muddy waters into the Mississippi, 20 miles above St Louis. The Missouri is 3047 miles long, of which 2682 are called navigable, but owing to its tortuous, treacherous, and obstructed channel navigation is attended with great risks. The chief towns on the banks are Bismarck, Yankton, Sioux City, Omaha, Council Bluffs, Nebraska City, St Joseph, Atchison, Leavenworth, and Kansas City.

See *Commerce and Navigation of the Mississippi* (1888), and works by Humphreys and Abbot (1861), Glazier (1893), Ockerson (1900), Mathews (1909).

Missolonghi (*Missolong'gee; g* hard), a Greek seaport, on the N. shore of the Gulf of Patras, 24 miles W. of Lepanto. A modern place, built on a swampy flat, it was vainly invested by the Turks in 1821–22; in 1825–26, after ten months of resistance, its garrison, reduced from 5000 to 3000 fighting-men, cut their way through the enemy, carrying with them a great number of the women and children. There is a statue (1835) over the grave of Bozzaris, and one (1881) of Lord Byron, where his heart is interred. Pop. 9000.

Missouri (*Mis-soo'ree*), one of the central states, and the fifth in order of population, of the American Union. It is 280 miles long from N. to S., and gradually increases southward in width from 208 miles to 312. Area, 68,735 sq. m., or nearly that of Scotland, Ireland, and Wales. The Missouri River divides the state into two unequal sections, north and south. North Missouri is generally level or slightly undulating, consisting of rolling prairies and level bottom-lands, with a luxuriant growth of timber along the streams. The southern section derives its distinctive features from the Ozark Mountains, throughout the greater part of their length rather tablelands, reaching their highest altitude (1500 feet) in Greene and Webster counties, and gradually breaking up into narrow ridges, spurs, knobs, and peaks farther east. The entire eastern boundary is washed by the Mississippi River, with a water front of 560 miles. The general drainage of the surface is indicated by long gentle slopes toward the Mississippi and Missouri rivers, except in the south-west, where the streams flow into the Arkansas. The extremes of heat and cold peculiar to this latitude are experienced; but the mean annual temperature is 54°, and the mean average rainfall is 41 inches. Missouri is pre-eminently an agricultural state. The soils are rich, deep, and unsurpassed in variety and productiveness. The principal crops are Indian corn, oats, wheat, potatoes, rye, barley, hemp, flax, cotton, sorghum, buckwheat, hay, and tobacco; whilst orchard products are grown in great abundance. There are vast numbers of grazing animals, though sheep are not largely raised. The immense quantities of dressed beef and pork shipped annually are constantly increasing. The mineral resources are exceedingly rich, comprising coalfields that cover more than 20,000 sq. m.; also vast deposits of iron ore, lead, and zinc; while copper, cobalt, nickel, fireclays, fine marble, granite, and limestone abound. Excellent transportation facilities are afforded by the Mississippi River along the eastern border, and by the Missouri River across the state; and the railroads are about 7000 miles in length. The metropolis of Missouri is St Louis. Next come Kansas City, St Joseph, Springfield, Sedalia, Hannibal, Joplin, Moberly, Carthage, Nevada, &c. Pop. (1820) 20,845; (1840) 140,455; (1860) 1,182,012; (1880) 2,168,380; (1910) 3,293,335. Missouri was first explored by De Soto in 1541. It formed part of the 'Louisiana Purchase' (1803); in 1821 Missouri was admitted into the Union, but the present limits of the state were not established till 1836.

Missouri River. See MISSISSIPPI.

Mistassini (*Mistassee'nee*), LAKE, in Labrador, 100 miles long by 12 broad, and some 300 miles N. by W. of Quebec, is an expansion of the Rupert, which flows into Hudson Bay.

Mistretta, a town of Sicily, near the north coast, 60 miles ESE. of Palermo.

Mitau (*Mitow'*), the capital of the Russian government of Courland, on the right bank of the Aa, 27 miles by rail SW. of Riga. Founded in 1271 by the Teutonic Knights, and annexed to Russia in 1795, it has a castle, begun by Biron in 1738, and a museum. Pop. 40,000.

Mitcham, a village of Surrey, 8½ m. by rail SW. of Victoria Station, London, lies in the centre of a district in which flowers and aromatic herbs (roses, lavender, camomile, &c.) are extensively grown. Pop. (Mitcham ward, Croydon) 30,000.

Mitchell, capital of Davison county, South Dakota, 70 miles by rail W. of Sioux Falls, has various manufactures; pop. 7000.

Mitchelstown, a market-town of County Cork, Ireland, 11 miles N. of Fermoy, scene of a memorable riot in 1887; 7½ miles NE. there are stalactite caves. Pop. 2300.

Mito, a town of the main island of Japan, near the coast, 70 miles NE. of Tokyo; pop. 38,800.

Mitrovicza, a town of Croatia-Slavonia, 24 miles SSW. of Peterwardein; pop. 12,000.

Mittweida (*Mit-vī'da*), a town of Saxony, 11 miles by rail N. by E. of Chemnitz; pop. 18,000.

Mitylene. See Lesbos.

Moate, a Westmeath market-town, 18 miles SW. of Mullingar; pop, 1300.

Mobangi. See Congo.

Moberly, in Missouri, 148 miles WNW. of St Louis, is in a rich coal country; pop. 11,000.

Mobile (*Mobeel'*), the principal city and only seaport of Alabama, is situated on the west side of Mobile River, and at the head of Mobile Bay, which opens into the Gulf of Mexico, and is defended by Fort Morgan. It is 141 miles by rail ENE. of New Orleans, and is built with broad shaded streets on a sandy plain, rising gradually from the river. It has a fine custom-house and post-office (1859), a city-hall and market-house (1857), a R. C. cathedral, a medical college, a Jesuit college, &c. Mobile contains a floating dry-dock and shipyards, foundries, cotton and cottonseed-oil mills, a tannery, a manufactory of chewing-gum, cigar-factories, &c. Before the war the chief business was the export of cotton; but since then this trade has greatly shrunk, while the export of timber has increased. Settled by the French in 1702, Mobile was a Spanish town until 1813, and still shows traces of this Latin origin. In 1879 the city limits were curtailed. Pop. (1870) 32,034; (1910) 51,521.

Mocha (usu. *Mokka*), a decayed seaport, once the capital of Yemen in Arabia, on the Red Sea, 130 miles WNW. of Aden. From early in the 16th c. until the middle of the 17th, Mocha was the port whence the coffee of Yemen ('Mocha coffee') was principally exported. Pop. 5000.

Modbury, a town of Devon, 12 miles E. of Plymouth. Pop. of parish, 1200.

Mod'ena (anc. *Mutĭna*), capital of a former duchy, stands on a broad plain in northern Italy, 23 miles by rail NW. of Bologna. Pop. 71,000. The ancient Via Æmilia divides it into the old and new city. The Romanesque cathedral dates from 1099, and has a fine façade; its campanile is one of the great towers of Italy. The ducal (now royal) palace, a picturesque structure of the 17th century, contains the Este library of 152,000 volumes and 8000 MSS., the Este archives, collections of coins, and pictures by Guido, the Carracci, Guercino, Correggio, &c. Modena possesses besides a university (1678), with 45 teachers and 500 students. The chief manufactured products are silk, leather, vinegar, and cast metals. Originally an Etruscan town, Modena was conquered successively by the Gauls and the Romans, and destroyed by Constantine the Great, the Goths, and the Longobards. The Este family became its masters in 1288, in 1452 became dukes, and were expelled in 1860, when the duchy was incorporated with the Kingdom of Italy.

Mod'ica, an inland town of Sicily, 45 miles SW. of Syracuse. Pop. 50,000.

Moel Famman, a hill (1823 feet) of North Wales, 4 miles W. of Mold.

Möen, a Danish island, 20 miles long, in the Baltic, at the SE. end of Zealand. Pop. 17,000.

Mœris (*Meeris*), Lake, the ancient Greek name of a brackish sheet of water in Egypt, now in the province of Fayyûm (q.v.), 50 miles SW. of Cairo; extreme length from NE. to SW., 35 miles. See a work by Major Brown (1893).

Moero, Mweru, or Meru, Lake, lies SW. of Tanganyika in Central Africa, on 9° S. lat. and 29° E. long., and is traversed by the Luapula. It was discovered by Livingstone in 1868.

Mœsia (*Mezia*), an ancient Roman province, divided by the river Cibrus (Zibritza) into two parts, the eastern corresponding to Bulgaria, and the western (Mœsia Superior) to Servia.

Moffat, a pleasant watering-place and burgh of barony (1635) in Upper Annandale, Dumfriesshire, 51 miles SSW. of Edinburgh by road, and 64 by a short branch (1883) of the Caledonian Railway. It lies 370 feet above sea-level, engirt by round grassy hills (the loftiest, Hartfell, 2651 feet), and in the midst of delightful scenery, chief features of which are 'dark Loch Skene,' the Grey Mare's Tail, and the Devil's Beef-tub. Its mineral springs, the principal of which, like that of Harrogate, is saline and sulphurous, have been celebrated since 1653; and its visitors have included Home, Hume, Carlyle, 'Ossian Macpherson,' Boswell, Blair, Burns, and William Black. Population, over 2000. See Turnbull's *History of Moffat* (1871).

Mogador', or Sueïra, a seaport 130 miles WSW. of the city of Morocco, on a rocky promontory opposite a small island. It is the best built town in the empire, having been laid out in 1760 by a French engineer. The exports include almonds, olive-oil, wool, goat-skins, hair, &c.; the imports woollens, cottons, glass, candles, and hardware. The manufactures are brass trays, daggers, furniture of ârar wood, woollen cloth, &c. Pop. 20,000, of whom 8000 are Jews, and 200 Europeans.

Mogileff. See Mohileff.

Moguer (*Mo-gayr'*), a small port of Spain, on the Rio Tinto, near its mouth, and 8 miles E. of Huelva. Pop. 10,000.

Mohacs (*Mo'hatch*), a town of Hungary, on the western arm of the Danube, 37 miles by rail ESE. of Fünfkirchen. Pop. 17,000. Here, on 29th August 1526, Louis II. of Hungary, with 25,000 Hungarians, was routed by 200,000 Turks. Here, too, on 12th August 1687, the Turks in their turn were defeated by an Austro-Hungarian army under Charles of Lorraine. These two battles marked the beginning and the end of Turkish dominion in Hungary.

Moham'merah, a town of Arabistan, Persia, on the Lower Karun, near the Turkish frontier. Pop. 5000.

Mohave Desert (*Mohah'veh*), a basin, with little water or vegetation, chiefly in the SE. of California, and extending into Arizona. The Mohave River rises in the San Bernardino range, and finally disappears in the Mohave Sink.

Moher, Cliffs of, a wall of rock facing the Atlantic, on the coast of Clare, 20 miles NW. of Ennis, 4 miles long and from 440 to 660 feet high.

Mohileff, or Mogileff, (1) the capital of a Russian government (area, 18,551 sq. m.; pop. 2,260,000), on the right bank of the Dnieper, 95 miles SW. of Smolensk. It has two archiepiscopal cathedrals, Greek (1780) and Roman Catholic (1692), an old castle, and a town-house (1679). Tanning is the principal industry. Pop. 50,000, largely Jews. The town was burned down by Peter the Great for strategical reasons in 1708. Here, on 23d July 1812, the French under Davoût defeated the Russians under Bagration.—(2) A town of Podolia, Russia on the left bank of the Dniester, 190 miles NW. of Odessa; pop. 30,000.

Mohill, a town of County Leitrim, 5 miles NE. of Dromod station; pop. 760.

Moidart, a coast-district, SW. Inverness-shire.

Moissac (*Mwassak'*), a town in the French dep. of Tarn-et-Garonne, on the Tarn, 111 miles SE. of Bordeaux; pop. 8200.

Mola, a seaport of Italy, on the Adriatic, 12 miles by rail SE. of Bari; pop. 15,000.

Mola di Gaeta. See Formia.

Mold, a town of Flintshire, on the Alyn, in a rich mineral district, 14 miles by rail W. by S. of Chester. Its fine 15th-century church, rich in stained glass, contains the grave of the painter Wilson. The county prison, recently built at a cost of £25,000, was sold in 1880 for £3500 to expelled French Jesuits, who renamed it St Germanus' House, in memory of the Britons' 'Alleluia Victory' over the Picts and Saxons. With Flint, &c., Mold returns one member. Pop. 4900.

Moldau (*Moldow;* Bohemian *Vltava*), the chief river of Bohemia, and an important tributary of the Elbe, rises in the Böhmerwald Mountains, on the south-west frontier, at an elevation of 3870 feet, and flows 278 miles SE. and N. past Budweis and Prague to the Elbe opposite Melnik.

Moldavia, a former principality, now the northern division of Roumania (q.v.).

Mole, two rivers of Devon and Surrey, affluents of the Taw and the Thames.

Molfetta, a seaport and cathedral city of southern Italy, on the Adriatic, 16 miles by rail NW. of Bari. Pop. 40,000.

Moline (*Mo-leen'*), a city of Illinois, on the Mississippi, 179 miles by rail W. by S. of Chicago, and separated from Rock Island only by a swift and narrow channel affording great water-power to many busy mills and factories. Pop. 20,500.

Mollendo (Span. *Mo-yen'do*), a port of Peru, lying SW. from Lake Titicaca. It has railway connection with Puno (107 miles), and thence to Arequipa (218). Pop. 2500.

Mollwitz (*Mol-veetz*), a village of Prussian Silesia, 7 miles W. of Brieg. An obelisk (1878) marks the battlefield where Frederick the Great defeated the Austrians, April 10, 1741.

Molo'ga, a town in the Russian government of Jaroslav, near the confluence of the Mologa and Volga, 68 miles WNW. of Jaroslav; pop. 10,000. —The river Mologa winds 337 miles SE. through Tver, Novgorod, and Jaroslav governments.

Molokai. See Hawaii.

Molton, South. See South Molton.

Moluc'cas (also called Spice Islands), the easternmost division of the Malay Archipelago, comprising most of the islands between Celebes and New Guinea, belonging to the Dutch. The northern group comprises Morotai (Morty) and Rau (Riao) in the north, Jilolo, Ternate, Tidor, &c. in the centre, Batchian (Batjan), Tawali, Mandioli, and Great and Little Obi in the south, with a total area of nearly 10,000 sq. m. (of which Jilolo has 7000). The pop. is estimated at 60,000, nearly half in the small but politically important islands of Tidor and Ternate. The Southern Moluccas comprise the two large islands of Buru (8500 sq. m.) and Ceram (7000), the small Amboyna, Uliasser, Banda, and Ceram Laut sub-groups, the outlying Ké and Aru clusters, &c., with a collective area of 16,500 sq. m., and a pop. of 350,000, of whom 200,000 are in Ceram, 60,000 in Buru, and 30,000 in Amboyna. Thus the Moluccas have a total area of over 26,000 sq. m., and a pop. of some 400,000, chiefly civilised Malays in the Little Moluccas (the small islands west of Jilolo), Banda, and Amboyna, elsewhere 'Alfuros' (uncivilised natives), some Indonesians, Malays, and Malayo-Papuans.

The Moluccas lie partly on the line of the great volcanic fault, which sweeps round in a vast curve from Sumatra to the Philippines and Japan, and which in the Moluccas is indicated by the still active volcanoes Gunong-Api (1870 feet) in Banda, Tidor (5730), Ternate (5650), Motir (2800), three cones in Jilolo, Tolo in Morotai. Despite their tropical position, being nearly bisected by the equator, the Moluccas enjoy a relatively healthy climate, and in some places the European race (Portuguese and Dutch) has even been acclimatised. The excessive heats are everywhere tempered by sea-breezes and by the mountainous character of the islands, which in Buru and Ceram rise to heights of 8000 and even 10,000 feet. Indigenous to most parts of this region are the clove, nutmeg, and other spices, allowed by the Dutch to be cultivated only in Amboyna and the Banda group; also the sago-palm, pandanus, dammar pine, and cajeput. Amongst animals are the babiroussa, the bird of paradise, the marsupial cuscus and flying opossum, the cassowary, the mound-building bird, the crimson lory, and many gorgeous parrots and pigeons.

Notwithstanding their small size, Ternate and Tidor have always been the chief centres of political power in the northern, and Amboyna in the southern Moluccas, as having long been occupied by civilised Malays. In Ternate is still centred most of the trade of the northern Moluccas, which export spices, tortoise-shell, trepang, beeswax, bark, and birds of paradise. Amboyna, capital of all the Dutch Moluccas, exports cloves. Banda is the home of the nutmeg, and yields sago and cocoa-nuts.

See A. R. Wallace, *The Malay Archipelago* (new ed. 1894); Reclus, *Universal Geography;* Martin's *Reizen* (1904); and German works by Bastian, Von Rosenberg, and Bernstein.

Mombas'a, a seaport of growing importance and largest town of the British East Africa Protectorate, is situated on a small coralline island 3 miles long by 2½ broad close to the coast, 150 miles N. of Zanzibar. It was held by the Portuguese pretty continuously from 1505 to 1698; was under British protection in 1825–30, and then under the sultan of Zanzibar, who in 1888 ceded it provisionally to the British East Africa Company. They were made definitive masters of the place two years later, when they also were put in possession of a vast tract of country, extending 400 miles along the coast, and inland up to the Victoria Nyanza (see Ibea); but in 1895 the company's territory was declared a British protectorate. Hence in 1896–1902 a railway was made to the Victoria Nyanza, a distance of 572 miles. The harbour, one of the largest, safest, and healthiest on the east coast of Africa, was in 1890 made a British naval coaling station. The town has been largely rebuilt; and extensive harbour-works were undertaken in 1890. Pop. about 30,000, mostly Africans, with some Arabs and Banyans. On the mainland opposite is Frere Town, the see of an Anglican bishop.

Momien, a Chinese frontier-town in the extreme west of Yunnan, 135 miles NE. of Bhamo.

Mompox, or Mompos, a town of the NW. of Colombia, on the Magdalena, 110 miles SE. of Cartagena. It was founded in 1538. Pop. 11,000.

Mon'aco, a small principality on the Mediterranean, 149 miles ENE. of Marseilles, and 9 from Nice; area, 8 sq. m.; population, about 20,000, of whom 2500 are in the town of Monaco, 6500 in Condamine, and 4000 in Monte Carlo. The territory, which is encircled by the French dep. of Alpes Maritimes and the sea, consists mainly of the rocky promontory on which the capital is built, and a small strip of coast. The family of Grimaldi acquired Monaco in 968, Mentone and Roquebrune and Castillon about 1230, and Antibes in 1237. Honoré II. put his country under a French protectorate in 1644. In 1846 Mentone and Roquebrune were annexed by Sardinia, and after 1859 the whole territory belonged for a short time to Victor Emmanuel; and in 1861 the lawful owner sold Mentone and Roquebrune to Napoleon III. for 4,000,000 francs. About 1000 of the inhabitants are employed in the rooms and gardens of the celebrated Casino. These gambling-rooms, built at Monte Carlo on ground leased till 1913 from the Prince of Monaco, belong to a joint-stock company, and have about 400,000 visitors annually. The climate of Monaco is milder than that of any other place in the Riviera; palms and aloes grow most luxuriantly, and rare wild flowers are found on its rocky promontory. See Pemberton's *Monaco, Past and Present* (1867), and works by Métivier (1865) and Miss Mayne (1910).

Monadhliath (usu. *Monalee'a*), Inverness-shire mountains (3087 feet), 20 miles W. of Kingussie.

Monaghan (*Mon'ahan*), an inland county of Ulster, Ireland, between Tyrone on the N. and Meath (in Leinster) on the S. Its greatest length from north to south is 37 miles; the total area being 319,741 acres (496 sq. m.), of which about 140,000 are under tillage. Pop. (1841) 200,442; (1911) 71,455, of whom about 50,000 were Catholics. The general surface is undulatory; the highest point is 1254 feet above the sea. Monaghan is interspersed with lakelets, and has many small streams. Limestone, freestone, and slates are worked. The flax crop has greatly increased of late years, and the linen manufacture is thriving. The principal towns are Monaghan, Carrickmacross, Clones, and Castle-Blayney. There are two county members. Monaghan possesses two round towers, at Clones and Inniskeen; and there are several raths and Danish forts.

Monaghan (Gaelic *Muinechan*, 'Monkstown'), the county town, is 76 miles NNW. of Dublin by rail. It returned two members to the Irish parliament, and is the centre of some trade in agricultural produce. Population, about 4300. See Evelyn P. Shirley's *History of the County of Monaghan* (1877–80).

Monasterboice, 6 miles NW. of Drogheda, has a round tower, Celtic crosses, and ruined churches.

Monastere'vin, a Kildare market-town, 37 miles SW. of Dublin; pop. 730.

Monastir', or Bitolia (anc. *Pelagonia*), a town of Servia (Turkey till 1912), 90 miles NW. of Salonica, makes carpets and filigree; pop. 60,000.

Moncalieri (*Mon-ka-lyay'ree*), a town of Italy, on the Po, 5 miles S. of Turin; pop. 5000.

Moncontour (*Mon^{g}con^{g}toor'*), a village in the French dep. of Vienne, 48 miles SW. of Tours. Here the Huguenots were routed, 3d Oct. 1569.

Moncton, a New Brunswick town, on the Petitcodiac, 89 miles NE. of St John, is the National Transcontinental Railway terminus; pop. 11,500.

Mon'dovi, a cathedral city of Italy, 58 miles S. of Turin by rail. Here, on 22d April 1796, Napoleon routed the Sardinians. Pop. 10,000.

Moneymore, a market-town of Londonderry, 4 miles NE. of Cookstown; pop. 350.

Monghyr, a picturesque city of Bihar, on the Ganges' right bank, 80 miles E. by S. of Patna, with a fort on a rocky crag; pop. 35,000.

Mongolia, the northern part of the Chinese dominions, a region of plateaux and desert (see Gobi), inhabited by nomadic Mongols, Kalmucks, &c.; area, 1,000,000 sq. m.; pop. *c.* 2,000,000. Outer Mongolia (capital, Urga, q.v.) took advantage of the 1912 revolution and Russian backing to secure autonomy under the *hutuktu* or Buddhist lama and Chinese suzerainty. See a book by Carruthers (1913).

Monk Bretton, a town of Yorkshire, 3¼ miles NE. of Barnsley; pop. 5000.

Monkland, Old and New, two Lanarkshire parishes, containing Coatbridge and Airdrie.

Monkwearmouth. See Sunderland.

Monmouth (*Mon'muth*), the county town of Monmouthshire, stands, girt by wooded hills, at the influx of the Monnow to the Wye, 16 miles N. of Chepstow, 18 S. of Hereford, and 26 WSW. of Gloucester. Its chief features are the ruined castle of John of Gaunt, in which Henry V. was born; the parish church, dating from the 14th century, and restored in 1882 by Street at a cost of £7000, with a graceful spire 200 feet high; the bridge over the Monnow (1272), with its 'Welsh gate,' and near it, a small Norman chapel; a fragment of a Benedictine priory, with 'Geoffrey of Monmouth's study;' the new town-hall, built in 1888 at a cost of £10,000; and a grammar-school (1614). In the neighbourhood are the temple-crowned Kymin (800 feet), commanding a glorious view; the Buckstone, a rocking-stone, displaced by tourists in 1885, but since re-poised; and, 7 miles SW., the superb ruins of Raglan Castle, defended for ten weeks in 1646 against Fairfax by the old Marquis of Worcester. First chartered by Edward VI., Monmouth unites with Newport and Usk to return a member. Pop. 5270. See *Charters of Monmouth* (1826), and works by Heath (1804) and Greene (1870).

Monmouth, capital of Warren county, Illinois, 179 miles by rail WSW. of Chicago, is the seat of Monmouth College (United Presbyterian, 1856), with 400 students, and manufactures farm implements, sewer pipes, and cigars. Pop. 9000.

Monmouthshire, a county in the west of England, bounded by Hereford, Gloucester, the estuary of the Severn, and South Wales. With a maximum length and breadth of 32 and 28 miles, it contains 546 sq. m., or 349,552 acres, of which more than one-half is under permanent pasture, and about one-twelfth in woods. Pop. (1801) 45,582; (1841) 134,368; (1911) 395,719. Its surface is for the most part hilly, especially in the north and north-west (the Sugar Loaf is 1954 feet high), but the Caldicot and Wentloog Levels, which for a distance of 25 miles skirt the southern coast, are so low as to require in places the protection of sea-walls and earthworks. The Wye, with its tributary the Monnow, the Usk, Ebwy, and Rumney, all flowing south into the estuary of the Severn, are the principal rivers. There are extensive orchards. The great wealth of Monmouthshire is derived from its minerals, coal and ironstone abounding in the region of Pontypool and Rhymney. The county comprises six hundreds, the county borough of Newport, and the municipal boroughs of Monmouth and Abergavenny. Three members are returned to parliament for the county, and one for the combined boroughs of Monmouth, Newport, and Usk. Towns other than the above are Blaenavon, Caerleon, Chepstow, and Tredegar. Monmouthshire, which until 1535 formed part of Wales, and which has been treated as such in Welsh Disestablishment Bills, &c., is noted for its beautiful scenery, and for the many remains of feudal castles, &c., scattered throughout it. Of these the finest examples are the castles of Raglan, Caldicot, and Chepstow, and the abbeys of Llanthony and Tintern. See the county histories by Williams (1796), Coxe (1801), and Bradney (1904).

Monnow, a river of Hereford and Monmouth, flowing 28 miles to the Wye at Monmouth.

Monongahe'la, a river rising in West Virginia and flowing north to Pittsburgh, where it unites with the Alleghany to form the Ohio.

Mono'poli, a town of S. Italy, on the Adriatic, 43 miles by rail NW. of Brindisi, with a cathedral, and ancient walls and castle. Pop. 24,000.

Monreale (*Mon-re-ah'le*), a city of Sicily, 5 miles SW. of Palermo. On its 'royal mount' (1231 feet high) stands the Norman cathedral (1176), with its mosaics. Pop. 20,000.

Monroe', a city of Michigan, on the Raisin River, 2 miles by a ship-canal from Lake Erie, and 40 by rail SSW. of Detroit, with flour-mills, a woollen-mill, &c. Pop. 7000.

Monrovia. See LIBERIA.

Mons (*Mon^{g}ss*; Flem. *Berghen*), the capital of the Belgian province of Hainault, on the Trouille, 38 miles SSW. of Brussels. Its fortifications were demolished in 1862; but the country around can be laid under water. The church of St Waudru (1450–1580) is a masterpiece of Gothic; and there are a town-hall (1458), a belfry (1662) 275 feet high, a good library, &c. The manufactures include woollen and cotton goods, cutlery, and sugar; in the vicinity is an extensive coalfield. Pop. 30,000.

Montagnana (*Mon-tan-yah'na*), a town of northern Italy, 32 miles SW. of Padua; pop. 10,000.

Montalcino (*Montalchee'no*), a cathedral city of Italy, on a hill (1900 feet), 22 miles SSE. of Siena.

Montana (*Montah'na*), one of the north-western states of the American Union, bounded by British Columbia, Alberta and Saskatchewan, North and South Dakota, Wyoming, and Idaho. In area—146,080 sq. m., or nearly five times the size of Scotland—it ranks third among the states and territories, but in population only forty-fourth. The density of the population is only 1.7 person per square mile. The Rocky Mountains occupy fully one-fifth of the surface, in the south and west; the rest of the state is made up of valleys or high, rolling prairies. The head-waters of the Columbia and Missouri have their sources in Montana. The mean elevation of the state is about 3000 feet; the highest peaks of the Rocky Mountains rise to 10,000 or 12,000 feet. The Yellowstone National Park forms part of the southern boundary. In the south-east the Bad Lands extend into the state from Wyoming. The climate is mild, and the atmosphere remarkable for its clearness. The soil contains all that is needed for sustaining vegetation, but it is almost valueless without irrigation; with that, however, the yield of grains and vegetables is enormous. Stock-raising, however, is more profitable than agriculture. But the great industry is the mining and reduction of gold, silver, lead, and copper ores. The first systematic working of placer mines for gold commenced in 1862; in 1863 the first gold-quartz mill was built. The portion of Montana east of the Rocky Mountains was part of the Louisiana Purchase; that to the west was part of Oregon and Washington. It was first visited by the French in 1742, and by Lewis and Clarke in 1804–6; these were followed by fur-traders and trappers, and by Jesuit missionaries. Gold was discovered in 1861. In 1864 the territory was organised, and in 1889 Montana became a state of the Union. The chief towns are the capital, Helena, and Butte City. Pop. (1870) 20,595; (1880) 39,159; (1910) 376,053.

Montargis (*Mon^{g}tarzhee'*), a town in the French dep. of Loiret, 47 miles E. by N. of Orleans, with a fine church (12th century—1868) and ruins of a vast castle. Here in 1371 is said to have occurred the famous judicial combat between 'the dog of Montargis' and Macaire its master's murderer. Pop. 13,000.

Montauban (*Mon^{g}tobon^g*), the capital of the French dep. of Tarn-et-Garonne, on the river Tarn, 31 miles N. of Toulouse. A well-built, handsome place, it has a modernised brick bridge (1335), 224 yards long; a fine cathedral (1739) in the Italian style; and a monument (1871) to Ingres, the painter, a native. It has woollen manufactures, and trades in wine, grain, leather, &c. Montauban was founded in 1144, became the seat of a bishop in 1317, embraced the Reformation in 1560, and acquired historical celebrity as the stronghold of the Huguenots, vainly besieged for three months in 1621. Nearly half the inhabitants still are Protestants, and it has a Protestant college. Pop. of town, 18,000; of commune, 30,000.

Montbéliard (*Mon^{g}bayl-yar'*; Ger. *Mömpelgard*), a town in the French dep. of Doubs, 48 miles NE. of Besançon. It lies in a valley between the Vosges and Jura Mountains, is surmounted by an old château (now a prison), and manufactures watch-springs, watchmaking tools, and cotton. A possession of the House of Würtemberg from 1397, it was a Protestant centre from 1525, was formally ceded to France in 1801, and suffered much in the Franco-German war. Cuvier was a native; there is a statue of him, as also of Denfert, the defender of Belfort. Pop. of town, 7500; of commune, 9000, mostly Lutherans.

Mont Blanc (*Mon^g Blon^g*), the highest mountain in Europe (if we regard the Caucasus as Asiatic), 15,782 feet above sea-level, is situated in France, close to the Italian frontier, 40 miles S. of the Lake of Geneva. The waters which spring from its western slopes are drained off to the Rhone, those which originate on the east side to the Po. It rises into several sharp peaks (*aiguilles*) and forms great glaciers—the Glacier du Géant, Mer de Glace, &c. In 1760 Saussure offered a prize for the discovery of a practicable route to the summit, which was gained in June 1786 by Dr Paccard and Balmat, a guide. There is an observatory (1890) at a height of 14,470 feet.

Montbrison, a French town in Loire, 35 miles SW. of Lyons, with mineral wells; pop. 8000.

Mont Cenis (*Mon^g Saynee'*), or MONTE CENISIO, an Alpine peak (11,792 feet) and pass (6884) between Savoy and Piedmont. Over the pass a road was constructed (1802–10) by Napoleon's orders, at an expense of £300,000. A railway tunnel, 13 miles W. of the pass and 7½ miles long, was begun in 1857 on the Italian side, and in 1863 on the French, and was finished in 1870 at a cost of £3,000,000.

Mont-de-Marsan (*Mon^g-de-Marson^g*), capital of the French dep. of Landes, 92 miles by rail S. of Bordeaux, with a mineral spring and manufactures of chemicals, iron, &c. Pop. 10,000.

Mont-Dore-les-Bains (*Mon^g-dor-lay-Ban^g*), a village of Auvergne, in the dep. of Puy de Dôme, 26 miles SSW. of Clermont-Ferrand. It lies 3412 feet above the sea-level, in the picturesque valley of the Dordogne. The eight mineral springs (102°–114°) were used by the Romans. The resident pop. of the village is 1800; but the baths, which are every year becoming better known, are thronged during the short season (July to September) with visitors from all parts.

Montebello Casteggio (*Mon-tey-bello Casted'jo*), an Italian village, 14 miles S. by W. of Pavia. The Austrians were twice defeated here—by the French in June 1800; and by French and Piedmontese in May 1859.

Monte Carlo. See MONACO.

Monte-Cassino (*Montey-Cassee'no*), the monastery founded (529) by St Benedict, stands nobly on beetling cliffs, 70 miles by rail NW. of Naples and 92 SE. of Rome. It was dissolved in 1866.

Monte Catini (*Montey Catee'nee*), a watering-place of Italy, by rail 30 miles NW. of Florence. Its saline springs range between 82° and 86° F. The season lasts from May to September.

Monte Corno. See APENNINES.

Monte Cristo, an uninhabited islet of granite off the Italian coast, 26 miles S. of Elba.

Montego Bay, a northern port of Jamaica (q.v.).

Monteith. See MENTEITH.

Montélimar (*Mon^g-tay-li-marr'*), a French town, 85 miles S. of Lyons; pop. 10,000.

Montene'gro (Italian translation of the native *Czrnagora*, 'Black Mountain'), an independent state in the Balkan Peninsula, between Herzegovina and Albania. Its area was extended in 1878 by the addition of a large district on the north, a narrow strip on its east side, and the port of Antivari on the Adriatic, in 1880 by the addition of the port of Dulcigno, and after the Balkan wars of 1912–13 increased by about one-half by additions to the east and south-east. The area, thus extended, is 5500 sq. m. Beyond the low coastal fringe, which has a climate like that of the south of France, comes a rugged mountain-region ranging up to 6500–8000 feet, a confusing maze of peaks and gigantic crags and blocks, wild gorges and natural caves, the bare gray rock everywhere visible. The streams in some cases have underground channels. The interior of the country is occupied by the branching valleys of the rivers Zeta and Moratcha, which flow into Lake Scutari. East and north the country, draining to the Danube and the Drin, is mountainous and well wooded, principally with beech and pine, and affords good pasturage to sheep, goats, and cattle. The exports consist chiefly of cattle, goats, hides, smoked fish and mutton, cheese, sumach, fruits, and wine; the imports, of wheat, gunpowder, hardware, groceries, cloth, and glass. The Montenegrins, a race of primitive mountaineers, are a brave, warlike, and simple people, noted for their honesty and their chastity. They live in small stone houses, in small villages. They belong to the Servian branch of the Slavs, number about 400,000, and belong, except about 14,000 Mohammedans and 12,000 Roman Catholics, to the Greek Orthodox Church. In the 14th century the country was tributary to Servia, but maintained its independence when Servia was subjugated by the Turks (1389). From that time down to 1880 the Montenegrins waged almost incessant war with the Turks, renewed victoriously in 1912, in alliance with Greece, Servia, and Bulgaria. From 1516 till 1851 the little state was governed by ecclesiastical princes; but the civil was then separated from the ecclesiastical functions, and the throne was declared hereditary. The prince, till then an absolute sovereign, granted a constitution in 1905, with an elective Skupshtina, or assembly, and in 1910 was proclaimed king. Of late education has made rapid strides, the men have taken to cultivating their fields, and roads have been constructed; while the old militia has been converted into a standing army with a war strength of 50,000 men. Cetinje (pop. 6000) is the capital. See works by Denton (1877), Carr (1884), Brown (1888), Wyon and Prance (1903).

Montenotte (*Monteynot'teh*), a village of northern Italy, 26 miles W. of Genoa, where Napoleon won his first victory over the Austrians in 1796.

Montepulciano (*Mon-tey-pool-tchee-ah'no*), an episcopal city of Italy, on a high hill, 43 miles by rail SE. of Siena. It was the birthplace of Politian and Bellarmine, and is famous for its red wine. Pop. 15,000.

Montereau (*Mon^{g}tero'*), a town in the French dep. of Seine-et-Marne, at the confluence of the Seine and Yonne, 49 miles SE. of Paris. Here in 1419 the Duke of Burgundy was assassinated; and near this Napoleon, in 1814, gained his last victory over the allies. Pop. 8000.

Monterey (*Monteyray'*), a cathedral city, 670 miles by rail N. of Mexico City. Founded in 1599, it was taken by Taylor in 1846. Pop. 86,000.

Monterey, a post-village of California, capital of California when it was a Mexican province, on Monterey Bay of the Pacific, 94 miles S. by E. of San Francisco by rail. Pop. 5000.

Monte Rosa, an Alpine mountain mass with four principal peaks, in the Pennine ridge which separates the Swiss canton of Valais from Italy. The highest peak, the Dufourspitze, 15,217 feet high, was first climbed by Mr Smyth in 1855.

Monte Sant' Angelo (*An'jelo*), a city of southern Italy, 28 miles NE. of Foggia, and 2790 feet above sea-level; pop. 23,000.

Monte Sarchio (*Sar'keeo*), a town of southern Italy, 13 miles NW. of Avellino; pop. 7000.

Montevideo (usu. *Mon-tey-vid'e-o;* Span. pron. *Monteyveeday'o*), the capital of the republic of Uruguay, is situated on the north shore of the La Plata estuary, 125 miles E. by S. of Buenos Ayres. It was built originally on a low promontory between the ocean and a horseshoe-shaped bay, 2 miles across; but its extensive suburbs now stretch far into the flat country behind, and have crept round the bay to the landmark which gives the city its name—the Cerro, a smooth, isolated cone, 505 feet high, crowned with a lighthouse and an old fort. At its base there are nearly a score of great *saladeros*, or beef-salting establishments, where 200,000 cattle yearly are killed; and here, too, is the largest of the city's dry-docks. High above the flat house-roofs rises the cathedral (133 feet), with two side towers and a dome. Other buildings are the large opera-house, town-hall, customhouse, exchange, the Cabildo (law-courts and parliament house), the school of arts and trades, the university, museum, the English and Basque churches, &c. Tramcars run in all directions; there are local electric lighting and telephone companies; and water is brought from a distance of 34 miles. The depth of water in the bay ranges from 9 to 15 feet, and vessels of heavy draught are compelled to anchor in the exposed roadstead outside; but great port improvements were begun in 1901. Pop. (1877) 110,200; (1912) 300,000, of whom nearly one-third were foreigners. A fort was built on the Cerro, by the Spaniards, in 1717, and the first settlement of the town made in 1726; in 1828 it became the capital of the newly-formed republic of Banda Oriental. See URUGUAY.

Montferrat (*Mon*^{g}*ferrah'*), formerly an independent marquisate and duchy of Italy, between Piedmont, Milan, and Genoa, in 1631–1703 acquired by the Dukes of Savoy, and now forming part of the kingdom of Italy. It consisted of two separate portions, both lying between the Maritime Alps and the Po, and having a united area of over 1300 sq. m. The capital was Casale.

Montgomery (*Montgum'mery*), the capital of Alabama, on the left bank of the Alabama River, 400 miles above Mobile. It contains a fine statehouse and a handsome Masonic hall, and has foundries, flour-mills, steam cotton-gins, a cotton factory, and oil-works. Several railways meet here, and an active trade is carried on, much cotton, especially, is shipped. Montgomery was for a time the capital of the Confederate States. Pop. (1880) 16,713; (1910) 38,136.

Montgomery, a town of the Punjab, in the Multan division, midway between Lahore and Multan. It was named in 1865 after the governor of the Punjab.

Montgomeryshire, an inland county of North Wales, 40 miles long and 35 broad, bounded NE. and NW. by the counties of Denbigh, Merioneth, Salop, Radnor, and Cardigan; area, 796 sq. m., or 510,110 acres, of which more than one-third is laid down in permanent pasture, and 58,000 acres are under tillage. Pop. (1801) 47,978; (1831) 65,700; (1881) 65,718; (1911) 53,146. The surface is for the most part barren, and in places mountainous, Plinlimmon (2469 feet), on the Cardigan border, the Berwyn Mountains in the NE., and the Breidden Hills—some 12 miles E. of Shrewsbury—being the principal elevations; but towards the English border it consists of a series of fertile and well-wooded valleys. The Severn, with its tributary the Vyrnwy (q.v.), and the Dovey—alike noted for their fishing—are the most important rivers, whilst Offa's Dyke (q.v.) traverses the south-east corner of the county. Of manufactures, that of Welsh flannel at Newtown is the most extensive. The county comprises nine hundreds, the municipal boroughs of Llanfyllin, Llanidloes, Montgomery, and Welshpool, and sixty-eight parishes. One M.P. is returned for the county, as also one for the Montgomery district of boroughs—viz. Llanfyllin, Llanidloes, Machynlleth, Montgomery, Newtown, and Welshpool.—The county town, Montgomery, is 7 miles S. of Welshpool, and was incorporated in 1885; pop. 950.

Montilla (*Monteelya*), a town of Spain, 23 miles SSE. of Cordova by rail; pop. 13,000.

Montluçon (*Mon*^{g}*lüsson*^{g}*'*), a town in the French dep. of Allier, on a castle-crowned hill whose base is washed by the Cher, 202 miles S. of Paris. It owes its rapid growth to the Commentry coalfield, and has ironworks and plate-glass manufactories. The population is about 34,000.—NÉRIS-LES-BAINS, 18 miles SE., is the *Neriomagus* of the Romans—of whom many traces are left—and since 1812 has again risen into repute through its warm alkaline mineral waters (126° F.).

Montmartre. See PARIS.

Montmédy (*Mon*^{g}*maydee'*), a town and fortress in the French dep. of Meuse, 25 miles N. of Verdun and 31 SE. of Sedan, lies in the valley of the Chiers, a tributary of the Meuse. It long was part of the Spanish Netherlands, was often taken and retaken, but became finally French in 1659, and was re-fortified by Vauban. It was, however, captured by the Germans in 1815 and again in 1870. Pop. 2400.

Montmorency, a river of Quebec, a tributary of the St Lawrence, famous for its beautiful falls, 8 miles NE. of Quebec. Here the stream is 100 feet wide, and falls 250 feet.

Monto'ro, a town of Spain, on the Guadalquivir, 26 miles ENE. of Cordova. Pop. 15,000.

Montpe'lier, the capital of Vermont since 1805, on the Winooski or Onion River, 206 miles by rail NNW. of Boston. It contains a granite statehouse, with a statue of Ethan Allen. Pop. 8000.

Montpellier (*Mon*^{g}*pel-yay'*), the capital of the French dep. of Hérault, on the Lez, 6 miles from the sea and 31 SW. of Nîmes. Pop. (1872) 54,466; (1911) 80,230. Lying near the centre of Languedoc, on the great route from Italy and Provence to Spain, with its seaport at a point offering the shortest land-route not only to all parts of Languedoc, but to north France, Montpellier's position was a highly favourable one during the middle ages. Its schools of medicine, law, and arts were formally constituted a university by a papal bull in 1289, at which time the schools of law and medicine (the latter founded by Arabian physicians) rivalled those of Paris. Among its students and professors have been Petrarch, Arnaud de Villeneuve, Rabelais, Rondelet the anatomist, Casaubon, Lobel, Clusius, the brothers Bauhin, Magnol, Tournefort, the elder De Jussieu, and De Candolle; Clarendon also and Locke were residents. The oldest botanic garden in France was founded here in 1592, and De Candolle laid out the first botanic garden upon the natural system in 1810. The medical school also has had a notable history; and in 1890 the university celebrated its sexcentenary and was reorganised. The town has an important picture-gallery and library. A centre of wine production, Montpellier suffered greatly by the phylloxera; it was here that the cure of grafting French vines upon American stocks was earliest applied. Of the mediæval town little remains, its fortifications and most of its buildings, save the cathedral and the adjoining bishop's palace (which now houses the school of medicine), having been destroyed in the religious wars, in the Revolution, or by municipal improvements. The chief modern buildings are the theatre and law-courts; but the principal glory of the town is its two great terraces, forming public promenades overlooking the undulating country away to the Mediterranean, Cevennes, Pyrenees, and Alps.

Montreal (*Montreawl'*; Fr. pron. *Mon^g-ray-ahl'*), the largest city of the Dominion of Canada, is built on the south-east side of an island formed by the junction of the Ottawa River with the St Lawrence, and may be said to be situated on the northern bank of the St Lawrence, spanned by the tubular Victoria Railway Bridge (1854–59; reconstructed as a truss-bridge 1898–99), the rails being 60 feet above the river's level. The city is about 4 miles long and 2 wide, the Central Mountain in the rear narrowing the city at its base. It is not the official capital of the province of Quebec, but it exerts an immense political and commercial influence, and is also the seat of the greatest universities, hospitals, convents, and seminaries in all Canada. Finally it is during the season of navigation—i.e. from May to November—the great maritime port of the Dominion, headquarters of several transatlantic shipping companies, irrespective of active lake and river and coast navigation. It is nearly 1000 miles from Montreal to the ocean proper, and 250 to the first salt water. Pop. (1871) 107,225; (1881) 140,747; (1911) 470,480 (with suburbs, 600,000), over half being of French descent. The growth of the commerce of Montreal is very remarkable, having more than doubled since 1870, though a great fire in 1901 caused damage to the amount of $4,000,000. The 1500 miles of the St Lawrence River contribute to growth of exports, and distribute largely the growth of import. The canal system which finds its outlet at Montreal is remarkable, the canals affording a continuous course of water-communication extending from the Straits of Belle Isle to Port Arthur at the head of Lake Superior, a distance of 2260 miles. Montreal is the headquarters of the Grand Trunk Railway, the Canadian Pacific Railway (to Vancouver City, 2906 miles), the South-Eastern Railway, the Central Vermont Railway. In the boot and shoe manufacture over 3000 hands are employed, in clothing-factories over 2500, in tobacco-factories 3000, in the breweries 500; and in the railway-workshops a perfect army of men. There are also rubber-factories, saw-mills, sack-factories, tool-factories, silk-factories, cotton-mills, and a variety of small industries protected by the tariff.

Of the Episcopal churches, Christ Church Cathedral has a tower 224 feet in height, and St George's of 230 feet. The Catholic churches are numerous and some of them splendid: St Peter's Church is a repetition on a smaller scale of the church at Rome; Notre Dame is said to hold 10,000 people; St Patrick's is the church of the Irish Catholics. M'Gill University (1821) has been active since 1852. Laval University of Quebec has a branch at Montreal; the seminary of St Sulpice (1657) is a theological institution; the Presbyterian College was chartered in 1865; and others in the long list are the Wesleyan Theological College (1873), the Congregational College, the Anglican Diocesan College, St Mary's Jesuit College (1848), the Jacques Cartier Normal School, &c. The *Montreal Gazette* (1778) was, after the *Quebec Gazette* (1764), the first paper published in Canada. There are several fine libraries, and musical, art, and historical associations also, which maintain in Montreal a taste for art, literature, and science not common in colonial commercial cities. Founded as Ville-Marie de Montreal in 1642, the town was in 1760 surrendered by the French to the British; in 1776–77 it was occupied by invaders from the revolted American colonies.

Montreux (*Mon^{g}truh'*), a group of villages on the north shore of the Lake of Geneva, 15 miles by rail SE. of Lausanne. The name properly belongs to one small hamlet, but is popularly extended to the adjoining villages of Clarens, Vernex, Veytaux, &c., with a pop. of 20,000. The beauty and climate of 'the Swiss Nice' attract many invalids. Near it is the castle of Chillon.

Montrose, a seaport of Forfarshire, 76 miles NNE. of Edinburgh and 42 SSW. of Aberdeen. It stands on a level peninsula between Montrose Basin (a tidal loch, measuring 2 by 1¾ miles, but almost dry at low-water) and the mouth of the river South Esk. A fine suspension bridge (1829), 432 feet long, leads to Inchbrayock or Rossie Island, in the Esk's channel, and is continued thence by another bridge; and there is also a railway viaduct (1883). Montrose has a plain town-hall (1763–1819); a large parish church (1791–1834), with a steeple 200 feet high; an academy (1820); a lunatic asylum (1868), 2 miles NNW.; good links; and a wet-dock (1840). The foreign trade—timber its staple—is chiefly with the Baltic and Canada. Flax-spinning is the principal industry; and ropes, canvas, soap, &c. are manufactured. Montrose was the birthplace of Robert Brown, botanist; Joseph Hume; Sir Alexander Burnes; and George Paul Chalmers, R.S.A. It has memories of Edward I., the two Melvilles, the Great Marquis, the Old Pretender, Dr Johnson, and Lola Montez. A royal burgh since 1352 and earlier, it unites with Arbroath, Brechin, Forfar, and Bervie to return one member. It is a flying-station. Pop. (1851) 15,238; (1911) 10,974.

Montserrat (*Mont-ser-rat'*; Lat. *Mons Serratus*, so named from its saw-like, fantastic outline), a mountain of Catalonia, in north-east Spain, 30 miles NW. of Barcelona. Its height is 4055 feet. The mountain owes its celebrity to the Benedictine abbey built half-way up, with its wonder-working image of the Virgin.

Montserrat (*Mon-ser-rat'*), one of the Lesser Antilles, belonging to Britain, lies 27 miles SW. of Antigua. It is about 11 miles in length, 7 in breadth, and has an area of 32 sq. m. Pop. between 15,000 and 16,000. The surface is mountainous (3000 feet), and heavily timbered. Sugar and limes and lime-juice are produced. The island, discovered in 1493, was colonised by the British in 1632. In 1664–68 and 1782–84, it was held by France. The chief town is Plymouth (pop. 1500).

Mont St Michel. See St Michel.

Monza (*Montsa*), a town of Italy, on the Lambro, 9 miles by rail NNE. of Milan. The ancient capital of the Lombard sovereigns, it was, in the middle ages, in spite of thirty-two sieges, conspicuous for the wealth of its citizens and nobles, and for its cloth-trade. The cathedral, founded in 595 by Theodelinda, contains many relics of this great queen. The famous Iron Crown, removed to Vienna in 1859, was restored in 1866. The town has an interesting town-hall (1293), a royal palace (1777), and manufactures of cottons, hats, leather, &c. Pop. 53,000.

Mooltan. See Multan.

Moorfoot Hills, a range in Midlothian and Peeblesshire, culminating in Blackhope Scar (2136 feet).

Moorhouse, a farm 3 miles W. of Eaglesham, Renfrewshire, was birthplace of Robert Pollok.

Moorwinstow. See MORWENSTOW.

Moose Jaw, a town of Saskatchewan, Canada, on the C. P. Rail., 40 m. W. of Regina; pop. 14,000.

Moradabad′, a town of British India, on the Ramganga, 100 miles E. by N. of Delhi. It is noted for its metal-work. Pop. 81,000.

Morano (*Morah′no*), a city of southern Italy, 37 miles NNW. of Cosenza; pop. 10,000.

Morar, a west coast district of Inverness-shire, with Loch Morar, 12 miles long and 2 wide.

Morar. See GWALIOR.

Morat (*Morah′*; Ger. *Murten*), a town in the Swiss canton of Freiburg, 12 miles ESE. of Neuchâtel, lies on the Lake of Morat (3½ by 2 miles, 1428 feet above sea-level). Here in 1476 the Swiss defeated Charles the Bold.

Mora′va. See MARCH (river).

Moravia (Ger. *Mähren*), a crown-land of the Austrian empire. Area, 8579 sq. m.; pop. (1870) 2,017,274; (1910) 2,620,914. It is enclosed on all sides by mountains, being separated from Silesia by the Sudetes, from Bohemia by the Moravian chain, and from Hungary by the Carpathians; while branches of these various chains intersect the whole country except in the south, where there are extensive plains. The March or Morava, from which the country derives its name, joins the Danube. The Oder, which rises among the mountains on the north-east, soon leaves the country. Moravia is essentially an agricultural region. The mineral products are coal and iron, with some graphite. The industries include the manufacture of woollen, linen, and cotton goods, and beet-root sugar, silk-weaving, lace-making, iron-founding, tanning, brewing, distilling, &c. Brünn is the capital, and another chief town is Olmütz. The majority (95 per cent.) of the people are Catholics. By nationality 71 per cent. are Slavs (Czechs and Moravians) and 28 per cent. Germans. From 1029 Moravia was associated with Bohemia, and in 1526, with all the other Bohemian lands, fell to Austria. In 1849 it was formally separated from Bohemia, and declared a distinct crown-land.

Moray Firth, an indentation of the German Ocean, on the north-east coast of Scotland, measuring 21 miles across its entrance from Tarbat Ness, in Ross-shire, to Stotfield Head, near Lossiemouth in Elginshire, and 39 miles thence to the mouth of the river Beauly. The name is applied in a wider sense to the whole extent of sea between Kinnaird's Head in Aberdeenshire and Duncansbay Head in Caithness.

Morayshire. See ELGINSHIRE.

Morbihan (*Morbeeon*^{g}′), a maritime dep. of France, formed out of ancient Brittany, with the Atlantic on the south and Finistère on the west. Area, 2624 sq. m.; pop. (1872) 490,352; (1911) 578,400. It is divided into the arrondissements of Vannes, L'Orient, Ploermel, and Pontivy.

More′a, the name borne since the middle ages by the ancient Peloponnesus, or southern peninsula of Greece.

Morecambe Bay, a sea-inlet of Lancashire and Westmorland, measuring 10 miles across the entrance (from Fleetwood to Walney), and 18 miles thence to its inmost recess.—The watering-place of MORECAMBE, 3½ miles WNW. of Lancaster, with good sea-bathing and other attractions, was incorporated as a municipal borough in 1902; pop. 12,100.

Moreleigh, or MORLEY, a Devon village, 5½ miles SSW. of Totnes.

Morelia (*Moray′lia*), capital of the Mexican state of Michoacan, in a valley 6400 feet above sea-level, 115 miles (234 by rail) W. by N. of Mexico City. It has a cathedral, and manufactures of cotton, tobacco, and candles. Morelia, which from 1541 to 1828 was called Valladolid, was the birthplace of the patriot Morelos, in whose honour the name was changed, and of Iturbide, emperor of Mexico. Pop. 40,000.

Morella (*Morel′ya*), a town of Spain, 80 miles N. by E. of Valencia; pop. 10,000.

Moresnet (*Moraynay′*), a small neutral territory between Belgium and Prussia, 5 miles SW. of Aix-la-Chapelle; area, 2 sq. m.; pop. 4000.

Moreton Bay, on the east coast of Queensland, Australia, is formed inside the islands of Moreton and Stradbroke. The bay is 40 miles long by 17 broad; its southern half is dotted with islands and sandbanks. Brisbane (q.v.) is on one of the streams falling into it.

Moreton-Hampstead, a town of Devon, 12 miles WSW. of Exeter. Pop. of parish, 1560.

Moreton-in-the-Marsh, a market-town of Gloucestershire, 6 miles SE. of Chipping-Campden. Pop. of parish, 1400.

Morgan, MOUNT. See MOUNT MORGAN.

Mor′garten, a mountain slope on the east margin of Lake Egeri, in the Swiss canton of Zug. Here 1400 men of the Forest Cantons routed 15,000 Austrians, November 15, 1315.

Moriah, MOUNT. See JERUSALEM.

Morlaix (*Morlay*), a picturesque and flourishing port in the Breton dep. of Finistère, on the tidal Dossen, 6½ miles from the sea and 38 ENE. of Brest. It has many quaint timbered houses, a huge railway viaduct 207 feet high, and manufactures of tobacco, paper, &c. Moreau was a native, and so probably was St Bernard, the author of 'Jerusalem the Golden.' Population about 15,000.

Morley, a municipal borough in the West Riding of Yorkshire, 5 miles SW. of Leeds, with woollen manufactures, coal-mines, and stone quarries. Mentioned in Domesday, it became a borough only in 1885, and had its boundary extended in 1891. Pop. 25,000.

Morningside, a south suburb of Edinburgh.

Moroc′co, or MAROCCO (Arab. *Maghreb-el-Aksa*, 'the farthest west'), a sultanate in NW. Africa, bounded E. by Algeria, and S. by Cape Nun and the Wad Draa, is now mainly a French protectorate, a northern zone being Spanish, as is Ifni, while Tangier and its district are internationalised. It contains about 220,000 sq. m., of which the 'Tell,' or fertile region west of the Atlas, contains 78,000, the Steppes or flat sterile upland pastures 27,000, and the Desert of Sahara 115,000 sq. m. Politically, Morocco comprises at present the old kingdoms of Fez and Morocco and the territories of Tafilet (Tafilalet) and Sus; but the latter two are almost independent, recognising the sultan only as the Prince of True Believers, an office which he holds as the most powerful of the Shereefs or descendants of Mohammed. Many of the Arab and most of the mountain tribes are practically independent. The pop. has been variously estimated at from 2,500,000 to 13,000,000—the actual number being perhaps between four and five million. Morocco is, as a rule, mountainous, the Atlas (q.v.) traversing it in several chains from south-west to north-east, and by various spurs both to the coast country and to the desert. There are, however, numerous level plains, some of which are of great extent, and very rich. There are also numerous more or less level plateaus similar to those of Algeria. Most of the country has been denuded of timber. Consequently the country looks bald, with its rolling hills and monotonous plains, green in spring, brown during summer and autumn. Farther south, and on the other side of the Atlas, where long droughts, followed by famines, are common calamities, and the rainfall is at the best of times scanty and uncertain, sandy wastes are the prevailing characteristic. In western Morocco, though the soil is sometimes thin, actual desert is rare.

The central range of the Atlas forms the watershed separating the streams which flow into the Atlantic and Mediterranean from those which run southward toward the desert, where they are often lost in marshy 'sinks.' And of the streams falling into the Atlantic and Mediterranean, many are in the hot season or after long droughts little better than a succession of pools connected by threads of water, though rolling in brown floods from bank to bank during the wet season. None of them are navigable for any distance. The climate of Morocco varies much, though the western slope, being tempered by the sea-breezes and protected from the hot desert-winds by the Atlas, is temperate, the thermometer seldom falling below 40° or rising above 90°. But in summer the interior valleys are very hot, and in winter snow often falls in Fez and Mequinez. Farther south extremes of heat and drought are more common, though as a rule the climate is equable, and, unless in swampy places during summer, extremely healthy. In the Sus country and the region of Tafilet rain is scarce and in places almost unknown. But farther north, and on the Atlantic and Mediterranean slopes, it falls with tolerable regularity every year between October and April, the amount being at times so great that the low lands are flooded and the rivers impassable. The Atlas is capped deep with snow in winter. Morocco is thus fitted for growing any crops of the temperate and tropical zones, and under a better government should become, as Barbary was in Roman times, the granary of Europe. Wheat and barley, if the country's resources were developed, would be produced in immense quantities. Maize forms the chief export of Mazagan. Various gums, oranges, figs, almonds, lemons, and dates are among the other vegetable products, with cotton, hemp, and sugar. Most European fruits grow well. The exports (barley, wheat, maize, beans, chick-peas, olive-oil, wool, almonds, dates, fowls, eggs, hides, bones, esparto, cattle, &c.) amount to about £3,600,000, and the imports (cotton goods, cloth, tea, coffee, sugar, candles, hardware, &c.) to £6,000,000, about one-third being from Great Britain. The interior of the country is so little known that little can be said with certainty regarding its mineral wealth. But enough has been ascertained to enable us to assert that gold (placer and in quartz), silver, copper, tin, argentiferous galena, nickel, antimony, iron, manganese, and rock-salt abound. Coal and petroleum have been indicated. But these mineral deposits are scarcely touched, and no European is allowed even to visit the mines. The flora of Morocco is essentially European on the western side of the Atlas. The fauna partakes of a similar character, the Barbary fallow-deer, wild boar, Barbary monkey (found also in Gibraltar), a species of porcupine, and wild cat being the most characteristic mammals; the lion is now very rare in the inhabited parts of the country. The birds and fishes are those of southern Europe; of the forty species of reptiles and amphibia known, twenty-two also belong to Spain—facts pointing to a time when the Strait of Gibraltar did not divide Europe from Africa. Locusts often devastate the country. The inhabitants consist of six principal groups—Berbers or Kabyles (Tuaregs, &c.), the aborigines, Arabs, Jews, a few thousand Spaniards, Moors (Arabs with an admixture of Spanish blood, living in towns, though the name is often given to all the Mohammedan inhabitants), and Negroes.

The sultan, who was the last independent sovereign in the Barbary States, was one of the most perfect specimens of an absolute monarch existing; his so-called ministers were simply the favourites of the hour. He received the entire revenue, believed to be about £1,800,000 per annum, and spent as little or as much of it as he pleased. Every office was directly or indirectly purchased, small salaries or none were paid, the holders recouping themselves by plunder and oppression. All justice was bought and sold. Yet, owing to the religious fanaticism of the people, and the mutual jealousies of the European Powers, whose representatives reside at Tangier, the political equilibrium was preserved. Spain holds directly a fortress at Ceuta, and four former convict settlements. The Grand Shereef of Wazan, as the nearest descendant of Mohammed, governs that city and is lord paramount of a large territory. Education is at a low ebb; the so-called 'university' of Fez is nowadays merely a seminary attached to the chief mosque for the training of religious acolytes. There are no roads except bridle-paths, and no wheeled carriages in the interior except the sultan's state coaches. The chief industry besides the rude agriculture of the Berbers and Arabs, and the breeding of horses and mules, is the making of 'morocco' leather, harness, slippers, red 'Fez' caps, cloth for native apparel, the chiselling of brass trays, the making of rough pottery and of inlaid flint-lock muskets, and the weaving of carpets (principally in Rabat). The best mechanics and the jewellers are Jews. The army, reorganised under European officers, has about 20,000 men, drilled, armed, and clothed after an approach to the European fashion, the rest being mainly undisciplined native levies. In addition there are French (75,000) and Spanish (70,000) armies of occupation. Morocco is connected with Spain by telegraph, and the telephone is in use in Tangier, Casablanca, and other coast-towns. The posts also are confined to the Europeans. Morocco has three capitals or imperial residences—Fez (q.v.), Makinas or Mequinez (q.v.), and Marakesch or the City of Morocco (q.v.). Beside these the principal coast-towns are Tangier, Tetuan, Larache (El-Arish), Rabat, Sallee, Casablanca, Mazagan, Saffi, and Mogador (q.v.). But all of them are decaying, most of them in partial ruins, and without any exception filthy, undrained, and insanitary.

Part of Mauritania under the Romans, the country fell under the Vandals in 429 A.D., but was restored to the Eastern Empire in 533. In 680 the Arab invasion began, and with little intermission the Arabs have ever since been possessors of the country, and the entire population are now the most fanatical adherents of Mohammedanism. At first, with Spain, part of the califate of Bagdad, it was not a distinct but united kingdom till the beginning of the 18th century. It is still very backward, and a passive resistance was offered to every improvement; but though Christian slavery has been abolished and traders have, nominally, access to all parts, the interior is little different from what it was a thousand years ago, and many cities and districts are still dangerous or impossible to visit. By the Anglo-French Convention in 1904, the right of France to promote administrative reforms in Morocco was recognised. A difficulty raised by Germany was arranged by a conference at Algeciras in 1905. French intervention in 1911 led to the arrival of a German cruiser at Agadir, and to strained relations between Germany and France. Ultimately Germany agreed to what was virtually a French protectorate of Morocco, and France concluded a treaty with Spain (1912) acknowledging Spanish interests in the northern zone. The Spanish zone is administered, under control of a high commissioner, by a Moroccan khalifa.

The city of Morocco (Arab. *Marakesch*), the southern capital, is 5 miles from the left bank of the Tensift, at the northern end of an extensive and fertile plain dotted with date-palms, 1447 feet above the sea, about 3½ days' journey from Mogador and Mazagan. A large portion of the immense space within the dilapidated walls is occupied by ill-kept gardens, open areas, and market-places. In the bazaar and merchants' quarter a considerable local trade is carried on with the country-people, the mountaineers from the neighbouring Atlas, and with Sus, Tafilet, Mazagan, Saffi, and Mogador. Morocco possesses many mosques, one of which, the Kutubia, has a tower after the model of the Hassan in Rabat and the Giralda in Seville, 230 feet high. There are several tanning and leather-dyeing establishments, though of late years European goods have been gradually displacing native manufactures. The population varies according to the presence or absence of the sultan, his court, and army. In ordinary times it does not exceed 60,000, of whom from 7000 to 8000 are Jews, living in a Ghetto. Few Europeans reside permanently in the city. On the south, outside the walls, stands the imperial palace, an irregular conglomeration of gardens and buildings covering about 180 acres. Morocco was founded in 1072, and reached the summit of its prosperity in the 13th century, when it is said to have had 700,000 inhabitants. Owing to its excellent situation in sight of the Atlas, from which cool streams are always flowing, its genial healthy climate, and its command of the trade-routes across the mountains, Marakesch is safe to have a great future when Morocco knows other masters than the Moors. See books by Hooker and Ball (1878), Stutfield, Thomson, Harris, Cunninghame Graham, Meakin, Bensusan (1904); and French works by Chenier, Godard, Renou, Martinière, Montbard.

Moron (*Moroan'*), a Spanish town, on the Guadaira, 32 miles by a branch-line SE. of Seville. Its ruined castle was once impregnable. Pop. 16,000.

Mor'peth, a market-town of Northumberland, on the winding Wansbeck, 16 miles N. of Newcastle. The parish church dates from the 14th century; the free grammar-school (1552) was rebuilt in 1859, after a chancery suit lasting 150 years. The town-hall (restored in 1870) was erected in 1714 by Sir John Vanbrugh, and the county-hall in 1818 at a cost of £80,000. Morpeth has flannel-factories, breweries, tanneries, iron-foundries, &c., with neighbouring collieries and quarries. From 1553 till 1832 it returned two members, but now only one; the parliamentary borough was extended in 1868. Pop. (1851) 10,011; (1911) 63,079, of whom only 7500 were in the municipal borough.

Morristown, capital of Morris county, New Jersey, on the Whippany River, 30 miles by rail W. of New York. It has ironworks and various mills; 3 miles to the north is a large state lunatic asylum. Pop. 12,500.

Morshansk, a town of Russia, 58 miles N. of Tamboff, almost wholly burned in 1874. Pop. 31,000.

Mortimer's Cross, a Herefordshire village, on the Lugg, 5½ miles NW. of Leominster. Here, in 1460, the Yorkists defeated the Lancastrians.

Mortlake, a parish of Surrey, on the south bank of the Thames, 2 miles ENE. of Richmond and 8 W. by S. of London. From 1619 to 1703 it was famous for tapestry; now malting and brewing are the industries. It is also a great boating-place, the Oxford and Cambridge race being rowed from Putney to Mortlake. It has associations with Archbishops Anselm and Cranmer, the astrologers Dr Dee and John Partridge, Cromwell, Swift and Stella, Sir Philip Francis, Sir Richard Owen, and Sir Richard Burton. Pop. of registration district, 30,500. See John E. Anderson's *History of Mortlake* (priv. printed, 1888).

Morvan (*Morvon*^{g}), Le, a barren district of France, a north-easterly extension of the central plateau, is mainly in the dep. of Nièvre.

Morvern, a peninsula of north-west Argyllshire, between Lochs Sunart and Linnhe. It is the 'Highland parish' of Norman Macleod.

Morwenstow, or Moorwinstow, a parish in the extreme north of the Cornish coast, 7 miles N. of Bude. Its church, dedicated to St Morwenna, is mainly of Norman date; R. S. Hawker was its vicar.

Mos'cow, formerly the capital of Russia, and still venerated as such by the Russian peasantry, stands on the little river Moskwa, a sub-tributary of the Volga, 403 miles by rail SE. of St Petersburg, 768 ENE. of Warsaw, and 967 NNE. of Odessa. Its centre is the enclosure called the Kreml or Kremlin ('Citadel'), which is surrounded by walls, crowned by eighteen towers and pierced by five gates. This enclosure is the most sacred spot in all the vast Russian empire. The most notable of the religious buildings inside the Kremlin are the cathedral of the Assumption (1326; rebuilt 1475–79); its interior is encrusted with mosaics and jewelled ornaments, adorned with venerated pictures, and sanctified by numerous relics; within its walls the early czars and all the Russian metropolitans and patriarchs have been consecrated, and the metropolitans buried. In the cathedral of the Archangel (1333; restored 1505) were buried the Russian czars down to the brother of Peter the Great. The cathedral of the Annunciation (1489; rebuilt 1554) was formerly the private chapel of the czars. There are numerous churches of minor rank, and several monasteries; in the Voznesenski monastery (1393) the czarinas are buried. In 1600 Boris Godunoff built in the Kremlin the Ivan Veliki tower, 270 feet high, the summit of which commands a magnificent view of Moscow, with her gilded cupolas and fantastic towers, her half Asiatic, half European architecture. Close by, at its foot, stands the gigantic 'king of bells,' 19 feet high, and 198 tons in weight; it was cast in

1653, but cracked, so never hung. Here are also the imperial palace (1849); the palace built in the reign of Ivan III.; the new palace Orushenaya, which serves as a museum of Russian antiquities; the palace of the patriarchs, with archæological treasures and rare MSS.; the arsenal (1701–36), before which is the trophy of 1812, a pile of 850 French cannon; and the Hall of the Synod, with a valuable library. Outside the Kreml the chief objects of interest are the colossal 'Temple of the Saviour' (1838–81), a building commemorative of 1812; the cathedral of St Basil (1554), a 'nightmare in stone,' with fantastic towers; the gigantic bazaar; the historical museum; the library of the synod and its typographical museum; the university (1755), with 3350 students; the public museum (1861), containing a library of 300,000 vols. and 5000 MSS.; a first-rate ethnological museum; the Golitzyn Museum (1865), &c.; an observatory; and a large foundling hospital (1764).

Next to St Petersburg, Moscow is the busiest industrial city in the empire, manufacturing cotton and woollen goods, silks, leather, tobacco, candles, metallic articles, machinery, paper, chemicals, bricks, carriages, pottery, and watches. Situated nearly in the centre of European Russia, midway between the Baltic, the Black Sea, and the Caspian, it is a chief meeting-place of Asiatic and European commerce. An enormous trade is done in grain, timber, furs, hides, tallow, and cattle; in the mineral products of the Ural region; in tea, sugar, and other groceries; in cottons, silks, and woollens, and various Russian manufactures. Pop. (1864) 365,000; (1909) 1,481,200.

Finnish first, it became Great Russian in the 12th century. In 1325 the metropolitan of central Russia moved his seat here; the Kremlin was built in 1300. The principality of Moscow continued to grow in area and in political influence, and Ivan III. (1462–1505) assumed the title Czar of all Russia. In 1713 Peter the Great founded St Petersburg and made it his capital; Moscow suffered greatly from fires in 1739, 1748, and 1753; and the cup of misfortune was filled to the brim when the city was set on fire and burned in 1812, according to the traditional belief the patriotic act of its own inhabitants to save it from Napoleon and the French.—The *government* of Moscow has an area of 12,855 sq. m., and a pop. of about 3,200,000.

Moselle (*Mozel'*; Ger. *Mo'sel*), a left-hand affluent of the Rhine, rises in the SW. of the Vosges Mountains in France, at an elevation of 2412 feet. Thence it winds 315 miles NW. and NE., past Épinal, Metz, Thionville, and Treves, as far as Toul, through Luxemburg and Rhenish Prussia, till it falls into the Rhine at Coblenz. It is navigable to Frouard, 214 miles. Its principal tributaries are the Meurthe, Seille, and Saar on the right, and the Orne, Sure, and Kyll on the left. The Moselle wines are well known.

Moselle was formerly a frontier department in the north-east of France, but the greater part of it was taken by Germany after the war of 1870–71, and became as of old part of Lorraine. The small portion left to France was joined to the dep. of Meurthe. See MEURTHE-ET-MOSELLE.

Moskwa, a navigable branch of the Volga's tributary, the Oka, rises in a marsh E. of Smolensk, and has a course of 305 miles, passing Moscow.

Mosquito Coast (*Moskee'to*), British from 1655 till 1850, is now an eastern section of Nicaragua (q.v.). The inhabitants, of Mosquito Indian and African blood, number about 15,000. The chief town is Bluefields (pop. 4700).

Mossame'des, a seaport on Little Fish Bay, in Angola. Pop. 6000.

Mossel Bay, formerly Aliwal South, a seaport of the Cape Province, 200 miles E. of Capetown. Pop. 5000.

Mossgiel (*Moss-geel'*; *g* hard). See MAUCHLINE.

Mossley, a manufacturing town of Lancashire, at the Yorkshire and Cheshire boundary, on the Tame, 3 miles NE. of Ashton-under-Lyne. A municipal borough since 1885, it has cotton and woollen mills and foundries. Pop. 13,200.

Moss Side, a southern suburb of Manchester.

Mostaganem', a coast-town of Algeria, 45 miles NE. of Oran. Once a place of 40,000, it decayed utterly, but has thriven again since the French took possession in 1833. Pop. 23,000.

Mos'tar, the chief town of Herzegovina, on the Narenta, 27 miles by rail NNE. of the port of Metkovich and 84 SSW. of Sarajevo. It takes its name (= 'old bridge') from a so-called Roman, but really Venetian bridge of one arch, 95 feet in span, has numerous mosques, and is the seat of a Roman Catholic and a Greek bishop. Pop. 16,400.

Mosul (*Mozool'*), a decayed town of Asiatic Turkey, in Mesopotamia, on the right bank of the Tigris, opposite the ruins of Nineveh, 200 miles up the river from Bagdad. Once it was a very prosperous city, with much industry—*muslin* takes name from it; now its bazaars are filled with the manufactures of the West, and almost the only export is gall-nuts. Pop. 70,000.

Motherwell, a town of Lanarkshire, 12 miles SE. of Glasgow. Owing its rapid growth to the amazing extension of its mineral industries, it has a good water-supply (1877), municipal buildings (1887), a public park (1887), large iron and steel works, &c. Pop. (1841) 726; (1861) 2925; (1871) 6943; (1881) 12,904; (1911) 40,380.

Motril, a Spanish town, 31 miles S. by E. of Granada, and 3 miles from the sea, with sugar and cotton works, and lead-mines. Esparto is exported. The port is Calahonda, 6½ miles SE. Pop. 20,000.

Moukden. See MUKDEN.

Moulins (*Moolan*^{g}*'*), capital of the French dep of Allier, on the Allier, here crossed by a bridge of thirteen arches, lies 196 miles by rail SSE. of Paris and 124 NW. of Lyons. A clean, well-built town, with pretty promenades, it has a cathedral (1468–1871), the choir old; a square tower of the castle of the dukes of Bourbon; and a 15th-century belfry. Marshals Villars and Berwick were natives, and Clarendon wrote here great part of his History. Nor must Sterne's Maria be forgotten. Pop. 20,000.

Moulmein. See MAULMAIN.

Moulsay, EAST and WEST, two Surrey parishes on the Thames, opposite Hampton Court, and 2½ and 3¾ miles WSW. of Kingston.

Moultan. See MULTAN.

Moultrie (*Moal'try*), FORT, a fortress on Sullivan's Island, at the mouth of Charleston Harbour, South Carolina, celebrated for the repulse by Colonel Moultrie of a British squadron in 1776.

Mountain Ash, a coal and iron urban district of Glamorgan, 4 miles NE. of Aberdare. Pop. 42,000.

Mount Bischoff. See BISCHOFF.

Mount Carmel, a borough of Pennsylvania, 135 miles NW. of Philadelphia. Pop. 20,000.

Mount Edgcumbe, seat of the Earl of Mount Edgcumbe, is opposite Plymouth.

Mount Melleray, a monastery of Irish Trappist monks (1830), on the southern slopes of the Knockmealdown Mountains, 3½ miles N. of Cappoquin in County Waterford.

Mountmellick, a town in Queen's County, on the Grand Canal, 7 miles N. of Maryborough by rail. It manufactures woollens, tobacco, leather, and beer. Pop. 2300.

Mount Morgan, a gold-mining township in Queensland, 28 miles SSW. of Rockhampton, The gold-mine at the summit of the mount, sold for £640 to a copartnery, including the brothers Morgan, became a limited liability company, with a capital of £1,000,000. Pop. 12,000.

Mount Pleasant, a town of Iowa, U.S., 235 miles SW. of Chicago by rail, has a pop. of 4118.

Mountrath, a market-town of Queen's County, 60 miles SW. of Dublin. Pop. 1250.

Mount's Bay. See St Michael's Mount.

Mountsorrel, a town of Leicestershire, on the Soar, 4 miles SE. of Loughborough, with granite quarries near. Pop. of parish, 2500.

Mount-Stuart. See Bute.

Mount Vernon, residence and burial-place of General Washington, is on the right bank of the Potomac, in Virginia, 15 miles below Washington. It is national property since 1856.—It has given name to many places in the United States, one of them a city, capital of Knox county, Ohio, on the Vernon River, 44 miles by rail NNE. of Columbus, with manufactories of doors and sashes, furniture, machinery, &c.; pop. 9000.—Also a residential city, 15 miles by rail ENE. of New York, on the Bronx River, which, with adjoining villages of the same name (East, Central, West), has a population of 31,000.—Mount Vernon, in Indiana, 142 miles ESE. of St Louis, has a population of 5150.

Mourne Mountains. See Down.

Mourzouk. See Fezzan.

Mousa, a Shetland island, 11 miles S. by W. of Lerwick. Here is a very perfect 'broch,' or dry-built circular tower, 42 feet high, with walls 15 feet thick.

Mousehole (*Mouz'l*), a Cornish village, 2 miles S. of Penzance. Here died Dolly Pentreath (1686–1788), reputed the last speaker of Cornish.

Moville, a seaside resort in County Donegal, on Lough Foyle, 19 miles NNE. of Londonderry. Off it New York steamers pause for the tender with and for mails. Pop. 1000.

Moy, a market-town of Tyrone, on the Blackwater, 6½ miles N. of Armagh. Pop. 470.

Moydart. See Moidart.

Mozambique (*Mozambeek'*), the collective name for the northern section of Portuguese East Africa, extending from the Rovuma to the Zambesi, and bordering on German East Africa, Lake Tanganyika, and British Central Africa. The coast-belt is low and swampy; but the interior rises into well-wooded plateaus, which furnish valuable timber. The soil is naturally fertile, and yields, in addition to maize, rice, manioc, &c., an abundance of natural products, such as cotton, sesame, coconut, medicinal plants, and india-rubber, the latter being the chief article of export. The imports are cotton goods, beads, hardware, arms and gunpowder, coals, spirits, and provisions. The shipping is mostly (seven-tenths) in British hands. Customs duties are exceptionally heavy; agriculture does not flourish; mining is little prosecuted, although the country is rich in minerals; and pearls abound on the reefs. The pop. of the province is estimated at one million.

Mozambique, the capital, stands on a small coral island lying close to the mainland, and has a fine government house, a cathedral, an arsenal, &c. Pop. 5000, of whom 4000 are natives, 400 Asiatics, and 200 Europeans. It was once a centre of the slave-trade; now its total trade ranges annually between £154,000 and £250,000. —The Mozambique Channel lies between Madagascar and the east coast of Africa.

Mozdok, a town of Russian Caucasus, on the Terek, 58 miles N. of Vladikavkaz. Pop. 15,000.

Mozuffernugger. See Muzaffarnagar.

Msket, or Mtsketha, capital of the old Georgian kings, now little more than a village, stands on the south side of the Caucasus, 10 miles NNW. of Tiflis. Its cathedral dates from the 4th century.

Mtzensk, a town of Russia, 31 miles by rail NE. of Orel. Pop. 17,000.

Much Wenlock. See Wenlock.

Much Woolton (i.e. 'Great Woolton'), a town of Lancashire, 6 miles SE. of Liverpool. Near it are large quarries. Pop. 4300.

Mudki (*Moodkee*), a Punjab village, 26 miles S. of the Sutlej, between Firozpur and Karnal. Here, in 1845, Sir Hugh Gough repulsed the Sikhs.

Mühlberg, a town of Prussian Saxony, on the Elbe, 36 miles SE. of Wittenberg. Pop. 3500. Here, on 24th April 1547, Charles V. defeated the Elector of Saxony.

Mühlhausen (*Mülhow'zen*), a town of Prussian Saxony, on the Unstrut, 25 miles by rail NNW. of Gotha. An imperial free city in the 13th century, it came finally to Prussia in 1815; it has manufactures of woollen and cotton goods, hosiery, &c. Pop. 35,000.

Muirkirk, a town of Ayrshire, 26 miles E. by N. of Ayr, and 720 feet above sea-level. It is the seat of great ironworks (1787). Pop. 3800.

Mukden, or Moukden, capital of Manchuria, is a great railway centre, situated on a branch of the river Liao, 425 miles NE. of Peking. The Chinese call it Shingking. In 1625 Nurhachu, the founder of the late Chinese dynasty, made it his capital. It was the scene of severe fighting in the war of 1904–5. Good coal exists in the vicinity. The port is Newchwang (q.v.). Pop. 158,000.

Mukdishu. See Magadoxo.

Mulgrave Castle, the seat of the Marquis of Normandy, in the North Riding of Yorkshire, 4 miles W. of Whitby.

Mulgrave Islands, a name given to some of the Marshall Islands (q.v.) from their discoverer, the navigator Lord Mulgrave (1744–92).

Mulhacen. See Sierra Nevada.

Mülhausen (*Mülhow'zen;* Fr. *Mulhouse*), a town of Alsace-Lorraine, on the Ill and the Rhone and Rhine Canal, 68 miles by rail SSW. of Strasburg and 20 NW. of Basel. It is a place of first-rate industrial importance. The cotton manufacture employs 16,000 workpeople in the town and 60,000 in the adjacent villages. Mülhausen has printing and dye works for cotton, linen, calico, wool, and silk fabrics, chemical factories, iron, machinery, and other metal works, &c. Pop. (1821) 13,027; (1861) 45,887; (1910) 95,041. Mülhausen, a free imperial city in 1273, joined the Swiss Confederation in 1515; in 1798 it was incorporated with France, and came to the front as an industrial place after 1829; and it became German after the war of 1870–71.

Mülheim (*Mül'hime*), a manufacturing town of Rhenish Prussia, on the Ruhr, 16 miles N. of Düsseldorf, with ironworks and a trade in coal. Pop. with suburbs, 112,600.—MÜLHEIM-AM-RHEIN, 3 miles above Cologne, manufactures silk, velvet, thread, leather, &c. Population, over 53,000.

Mull, an Argyllshire island, the largest of the Hebrides after Lewis and Skye, is separated from the mainland by the Sound of Mull (19 miles long and 1¼ to 3¼ miles wide), and is engirt by a number of smaller islands—Gometra, Ulva, Staffa, Iona, &c. It is 347 sq. m. in area, and has a maximum length and breadth of 30 and 29 miles, but is so deeply indented, especially towards the Atlantic, by a dozen sea-lochs and bays—the chief, Loch-na-Keal and Loch Scridain—that the coast-line cannot be less than 300 miles. Benmore (3185 feet) is the loftiest summit, Bentalloch the most beautiful, where there is much that is beautiful—these misty heights, the stretching moors, the sea-cliffs at Carsaig, the terraced basaltic plateaus, the glens, streams, and lakes, and the patches of wood and green pasture. The climate is good for the Highlands, and the soil of fair fertility, but grazing answers much better than corn-crops. Tobermory, in the north, 28 miles WNW. of Oban, is the only town. It was founded in 1788 at the head of its sheltered harbour, and has a pier (1864), a telegraph, a new water-supply (1882), and 1000 inhabitants. A ship of the Spanish Armada sunk there has occasioned much treasure-hunting. Aros and Duart Castles are interesting ruins; and Mackinnon's Cave was pronounced by Dr Johnson 'the greatest natural curiosity he had ever seen.' Pop. 3900.

Mullingar', the chief town of Westmeath, 50 miles WNW. of Dublin by rail, on the Royal Canal and the river Brosna. It is a trading town, has infantry barracks, and is a centre for anglers. Pop. 5500.

Multan (*Mooltan*), an ancient city of India, in the Punjab, 4 miles from the left bank of the Chenab, surrounded except on the south by a wall 10 to 20 feet high. The European quarter lies to the north and west of the city, whilst to the south is the citadel, which contains two Mohammedan shrines, the ruins of an ancient Hindu temple, and a massive obelisk (70 feet) to the memory of Vans Agnew and Anderson, murdered here in 1848. The vicinity abounds in mosques, tombs, shrines, &c. It has much trade, and manufactures silks, cottons, carpets, glazed pottery, and enamel work. In 1849 it was taken and annexed. Pop. 100,000.

Mumbles, a lighthouse at the west extremity of Swansea Bay.

München. See MUNICH, GLADBACH.

Muncie, capital of Delaware county, Indiana, 54 miles by rail ENE. of Indianapolis, is a railway junction, and manufactures furniture, castings, &c. Pop. 23,000.

Münden, a town of Hanover, at the influx of the Werra and Fulda to the Weser, 15 miles NE. of Cassel. Girt by wooded hills, it has a school of forestry (1868), and manufactures india-rubber, glass, sugar, &c. Pop. 10,000. See MINDEN.

Munich (Ger. *München*), the capital of Bavaria, in a barren plain, 1700 feet above sea-level, chiefly on the west bank of the impetuous Isar, a tributary of the Danube. By rail it is 440 miles SSW. of Berlin, 272 W. of Vienna, and 867 SE. of London. The elevated site and the nearness of the Alps render the city liable to sudden changes of temperature, sometimes ranging over 20° in twenty-four hours. Pop. (1801) 48,885; (1880) 230,023; (1910) 596,467, of whom 84 per cent. were Catholics. Munich is one of the handsomest cities in Germany, and the richest in art-treasures, while itself famous for its school of painting. Especially under Louis I. (1825–48), who spent £1,000,000 in beautifying the city, it was decorated with buildings of almost every style of architecture; wide and handsome streets have been constructed; and the squares and gardens adorned with statues and other monuments. Among the imposing edifices are the Glyptothek (1816–30), with its magnificent collection of ancient and modern sculpture, including the famous Æginetan marbles; the Old Pinakothek (1826–36), containing paintings by the old masters, besides engravings, drawings, and antique vases; the New Pinakothek (1846–53), devoted to the works of modern painters; the Royal and National Library, with over 1,400,000 volumes and 30,000 MSS.; and the Bavarian National Museum. The New Palace includes an older palace and chapel, the Königsbau (1826–35), in the style of the Pitti Palace at Florence, with Schnorr's frescoes of the Nibelungenlied, and the sumptuous Banqueting Hall. Other public structures are the Court Theatre; the old and the new town-house; the Temple of Fame, a Doric colonnaded building containing busts of illustrious Bavarians, in front of which rises the colossal statue of Bavaria, 65 feet high; the Generals' Portico (1844), a copy of the Loggia dei Lanzi at Florence; and the Maximilianeum, on its terrace on the right bank of the Isar, a college for civil servants. The Gate of Victory was designed after Constantine's triumphal arch in the Forum; the old Isar gate has elaborate frescoes; and the Propylæa (1862) commemorates the Greek war of independence. The oldest church is St Peter's (1294). The huge brick cathedral of Our Lady (1468–88) is remarkable for its two unfinished towers (325 feet), now capped with cupolas; in the interior is the elaborate tomb of the Emperor Louis the Bavarian. St Michael's, or the Jesuits' church (1583–91), contains a monument by Thorwaldsen to Eugène Beauharnais; the Theatine Church (1767) contains the royal burial-vault; the Louis Church (1830–44) is embellished with Cornelius' fresco of the 'Last Judgment;' the beautiful church of Mariahilf (1831–39) is noted for its gorgeous painted glass and fine wood-carvings; and the basilica of St Boniface (1835–50) for its sixty-six monoliths of gray Tyrolese marble and resplendent interior decoration. The Court Chapel is a perfect casket of art-treasures. The university, removed from Landshut to Munich in 1826, has 260 professors and teachers, and some 7000 students; its library contains over 500,000 volumes. Munich's stained-glass works, iron, brass, and bell foundries, lithographing and engraving works, and manufactories of optical and mathematical instruments, and various artistic articles are deservedly noted. Still more famous are the enormous breweries of Bavarian beer, which annually produce about 50,000,000 gallons, of which 37,000,000 are consumed in the city itself.

In 1158 Henry the Lion established here a mint and a salt-emporium. In the 13th century the dukes of the Wittelsbach dynasty selected Munich for their residence and fortified the town. In 1327 it was nearly destroyed by fire, and was rebuilt by the Emperor Louis the Bavarian; and when the fortifications were razed at the close of the 18th century, the limits of the town were enlarged. Identified with Munich are Klenze and Gärtner the architects, Schwanthaler the sculptor, and Cornelius, Kaulbach, Piloty, and Diez, the painters. See Mrs Howitt-Watts' *Art-student in Munich* (2d ed. 1879).

Munkacs, a market-town of Hungary, at the foot of the Carpathians, 101 miles by rail NE. of Debreczin, has mines of iron and rock-crystals, called Hungarian diamonds. The citadel, on a height, is now a state-prison. Pop. 16,000.

Munnipore. See MANIPUR.

Munster, the south-west and largest of the four provinces of Ireland. It contains the six counties of Clare, Cork, Kerry, Limerick, Tipperary, and Waterford. Area, 6,064,579 statute acres. Pop. (1841) 2,396,161; (1861) 1,513,558; (1911) 1,035,495 (97 per cent. Catholics).

Münster, capital of Westphalia, 101 miles by rail N. by E. of Cologne and 106 SSW. of Bremen. It retains numerous remains of mediæval architecture, including the mixed Romanesque and Gothic cathedral (12th–14th c.); the Gothic town-hall, in which, in 1648, the peace of Westphalia was signed; the castle, built in 1767, and surrounded by fine pleasure-grounds; and the 16th-century town wine-cellar, with its old pictures. The Catholic university of Münster was dissolved in 1818; there is now an academy, with a Catholic theological and a philosophical faculty, about 470 pupils, and a library of 123,000 volumes. The industrial products include woollen, cotton, and silk fabrics, and paper, besides dyeing, printing, and enamelling. Pop. (1875) 35,705; now, with suburbs, 90,283, mainly Catholics. In 791 Charlemagne made Mimigardevord the see of the new bishop of the Saxons, and about 1050 a monastery (whence Münster) was founded on the spot. In the 13th c. the city became a Hanse Town; and in 1535 was the scene of the violent movement of the Anabaptists, till the bishop repossessed himself of the city. In both the Thirty Years' War and the Seven Years' War Münster suffered severely. The principality, into which the bishopric had been elevated in the 12th century, was secularised in 1803, and the Congress of Vienna gave the greater part of it to Prussia.—There is another Münster in Alsace, 12 miles SW. of Colmar by rail; pop. 5000.

Murano. See VENICE.

Murcia (Span. pron. *Moor'theea*), a town of Spain, 46 miles by rail SW. of Alicante and 50 N. by W. of Cartagena. An old-fashioned Moorish town, it is embosomed in gardens of mulberry, orange, fig, palm, and other fruit trees. The cathedral, reconstructed in 1521, is surmounted by a fine bell-tower. Silks, saltpetre, soda, gunpowder, musical instruments, and glass are manufactured. Population, 125,000.—The province of Murcia has an area of 4478 sq. m. and a pop. of 600,000.

Murfreesborough, capital of Rutherford county, Tennessee, in 1819–26 capital of the state, is 33 miles by rail SE. of Nashville. Close by the battle of Stone River was fought, 31st December 1862 and 2d January 1863. Pop. 5000.

Murghab, a river that rises in the mountains north-east of Herat, flows north-west, and loses itself in the desert of Turkestan beyond Merv.

Murray River, the principal river of Australia, 1120 miles long. It rises in the Australian Alps, flows north-west along the frontiers of New South Wales and Victoria, and in South Australia passes southward through the shallow Lake Alexandrina to the sea at Encounter Bay. It is navigable part of the year as far as Albury.

Murrumbidgee, a navigable river of New South Wales, flows 1350 miles westwards to the Murray. The Lachlan is a tributary. It is now utilised for great irrigation works; see BURRINJUCK.

Murshidabad', a town of India, on the left bank of the Bhagirathi, a branch of the Ganges, 124 miles N. of Calcutta. During the 18th century it was the capital of Bengal; but when, in 1772–90, the British made Calcutta their headquarters Murshidabad began to decline, and its population fell below 30,000. The chief buildings of note are the palace of the Nawab (1837), the Imambara ('house of prayer'), and a mosque. Two miles south of the city is Motijhil or Pearl Lake; on its bank stood the palace of Suraj-ud-Dowlah, in which Clive enthroned Mir Jafar, and where the English Residents—Warren Hastings the first—dwelt. The city is noted for ivory-carving, embroidery in gold and silver lace, silk-weaving, hookahs, and musical instruments.

Murten, battle. See MORAT.

Murviedro (*Moor-vee-ay'dro*; 'old walls'), or SAGUNTO, a town of Spain, 18 miles NNE. of Valencia, stands on the site of Saguntum, a Greek colony, the siege of which by Hannibal in 219 B.C. began the second Punic war. Pop. 7000.

Murzuk. See FEZZAN.

Muscat', or MASKAT, capital of the independent state of Oman or Muscat, in the south-eastern corner of Arabia. Its situation in a narrow rocky pass from the interior to the Indian Ocean makes it important for the commerce between eastern Arabia, Persia, India, East Africa, and the Red Sea. Its total trade is about £1,000,000 annually, the chief exports being pearls, fish, salt, dates, drugs, dyestuff, horses; and the imports, coffee, rice, sugar, piece-goods, oil, &c. Pop. 25,000. In 1508 the Portuguese took possession of Muscat, and under them it developed into a prosperous commercial centre. From 1658 it was governed by native rulers (*imams*). Most of the trade is with India; and there is a British Political Agent to advise the Sultan.

Muscatine, capital of Muscatine county, Iowa, is mostly on rocky bluffs on the west bank of the Mississippi, 211 miles by rail WSW. of Chicago. It has pork-packing, flour and lumber mills, and plough and furniture factories. Pop. 15,300.

Muscovy. See RUSSIA.

Musha Islands. See OBOK.

Muske'gon, capital of Muskegon county, Michigan, is on the Muskegon River, which here (4 miles from its mouth in Lake Michigan) widens into Muskegon Lake, the best harbour on the east side of Lake Michigan. Muskegon is 40 miles by rail NW. of Grand Rapids, and saws and ships enormous quantities of lumber. It has also foundries, machine-shops, boiler-works, &c. Pop. 24,000.

Musselburgh, an old-fashioned town of Midlothian, near the mouth of the Esk in the Firth of Forth, 6 miles E. of Edinburgh by a branch-line (1847). Since 1832 it has united with Leith and Portobello to return one member, the burgh including the large fishing-suburb of Fisherrow, with a small tidal harbour, and the pretty village of Inveresk, whose conspicuous spired church was rebuilt in 1805 by 'Jupiter' Carlyle, and occupies a Roman prætorium. Musselburgh's chief features are its golf-links (since 1817 also the Edinburgh racecourse). Loretto school (marking the site of a famed place of pilgrimage), Pinkie House (1613), the 'Roman' bridge, the quaint tolbooth, and a statue (1853) of David Moir. Colonel Yule was a native. The manufactures include paper, nets, leather, &c. Pop. (1841) 6366; (1911) 15,938. See Paterson's *History of Musselburgh* (1857).

Mussooree, or MASURI, a sanatorium on a range of Himalayan foot-hills 7433 feet high, 12 miles NE. of Dehra, in the United Provinces of India. It forms a municipality with Landaur (q.v.).

Mus′tapha, a suburb of Algiers (q.v.).

Muta Nzige. See ALBERT-EDWARD NYANZA.

Muttra, or MATHURÁ, a town of India, in the United Provinces, on the right bank of the Jumna, 30 miles above Agra. There are numerous temples and mosques; the river is lined with magnificent flights of stairs, leading down to the bathing-places in the sacred river; large numbers of pilgrims resort to the city on the occasion of its religious festivals; and troops of monkeys and river-turtles are supported by charity. The city, for centuries a centre of Buddhism, was sacked by Mahmud of Ghazni in 1017, and plundered by the Afghans in 1756; in 1803 it passed to the British. Pop. 61,800.

Muyscas. See COLOMBIA.

Muzaffarnag′ar, a town in the United Provinces, 80 miles NE. of Delhi. Pop. 23,450.

Muzaffarpur′, a Bihar town, on the Little Gandak, 140 miles N. by rail of Patna. Pop. 45,620.

Mycale (*Mī′ka-lee*), a promontory of ancient Ionia, over against Samos; in the channel between, the Greeks defeated the Persian fleet, 479 B.C.

Myce′næ, a very ancient city in the north-eastern part of Argolis, in the Peloponnesus, built upon a craggy height. It was the capital of Agamemnon's kingdom, and the principal city in Greece. About 468 B.C. it was destroyed by the inhabitants of Argos, and never rose again to its former prosperity. In Strabo's time its ruins alone remained; these are still to be seen in the neighbourhood of Kharvati, and are noble specimens of Cyclopean architecture. The most celebrated are the 'Gate of Lions,' chief entrance to the ancient Acropolis, and the 'Treasury of Atreus.' Excavations by Schliemann in 1876–89 brought to light another subterranean treasury and ancient tombs containing terra-cottas, vases, weapons, gold death-masks, &c. See Schliemann's *Mycenæ and Tiryns* (trans. 1877).

Mysia, a district of ancient Asia Minor, having the Propontis (Sea of Marmora) on the N., and the Ægean on the W.

Mysore, or MAISUR, a native state of southern India, almost surrounded by districts of the Madras Presidency. Area, 30,000 sq. m.; pop. (1881) 4,186,188; (1911) 5,806,193. Mysore is an extensive tableland much broken by hill-ranges, and divided into two portions by the watershed between the Kistna and Kaveri. Gold is mined at Kolar. The rivers are used for irrigation. The annual value of the exports (betel-nut and leaves, coffee, cotton, piece-goods, cardamoms, rice, silk, and sugar) exceeds £1,200,000; of the imports (piece-goods, cloth, wheat, &c.), £1,500,000. The ruinous misgovernment of the native prince led the British to assume the administration in 1831; but in 1881 Mysore was restored to the native dynasty. The famine years (1876–78) told with great severity.—The capital, MYSORE, situated amid picturesque scenery, 245 miles WSW. of Madras, is a prosperous, well-built town. On the south stands the fort, which encloses the rajah's palace, with a magnificent throne. Population above 70,000.

Mzensk, a town in the Russian government of Orel, 200 miles SSW. of Moscow. Pop. 17,000.

NAAS (*Nayce* or *Nay′as*), a garrison town of Kildare, 20 miles SW. of Dublin by rail. Once the capital of Leinster, it obtained charters from Henry V., Elizabeth, and James I., but was disfranchised at the Union. Pop. 3800.

Nabha, a Sikh principality of the Punjab, E. of Patiala; area, 928 sq. m. Pop. 250,000.

Nablus (*Na-bloos′*; corrupted from Gr. *Neapolis*; anc. *Shechem*), a town of Palestine, between Mounts Ebal and Gerizim. The Samaritans' religious centre, it was Justin Martyr's birthplace.

Nadder, a Wiltshire stream, flowing 18 miles E. to the Avon at Wilton.

Nadiad. See NARIAD.

Nad′iya, a town of Bengal, on the Bhagirathi River, 63 miles N. of Calcutta. Pop. 14,105.

Naga Hills, a mountainous district of British India, the south-eastern extremity of Assam, with an area of 5710 sq. m. and a population of 100,000 aboriginal Nagas and other semi-savages.

Nagar. See BEDNOR.

Nagasaki (*Nagasâh′kee*), a seaport of Kyūshū, Japan, for two centuries the only Japanese gate of communication with the outer world. Its harbour, famous for its beauty, is a narrow inlet about 3 miles long. Near its head is the low, fan-shaped island of Deshima, to which from 1637 to 1859 the Dutch traders were limited. The great Takashima coal-mine is on an island 8 miles to seaward. Nagasaki has a fine dockyard and patent slip. Pop. (1892) 60,581; (1908) 176,480.

Nagina (*Nagee′na*), a town in the United Provinces, 48 miles NW. of Moradabad. Pop. 20,503.

Nagoya, a town of Japan, 170 miles W. of Tokyo, has a famous ancient castle and the most important potteries in Japan. Pop. 400,000.

Nagpur (*Nagpore*), cap. of the Central Provinces, India, 450 miles ENE. of Bombay. Pop. 101,415.

Nagy-Szeben. See HERMANNSTADT.

Nagy-Varad. See GROSSWARDEIN.

Nahant, a summer-resort of Massachusetts Bay, 12 miles NE. of Boston. Pop. 1190.

Naihati (*Nyhat′ee*), a town of Bengal, 23½ miles NW. of Calcutta by rail. Pop. 50,000.

Nailsworth, a Gloucestershire town, 6 miles SE. of Stonehouse. Pop. 3000.

Naini Tal (*Ny′nee Tal*), the summer-resort and sanatorium of the United Provinces of India, nestles between spurs of the Himalaya, beside a beautiful lake 6409 feet above sea-level, 70 miles N. of Bareilly. By a landslip here in 1880, 150 lives were lost. Pop. 12,500, but much more in the season (September).

Nairnshire, the fourth smallest county of Scotland, is washed on the north for 10 miles by the Moray Firth, and elsewhere bounded by Elgin and Inverness shires. Till 1891 it consisted of a main body, with a maximum length of 18 miles, a mean breadth of 11, and an area of 169 sq. m., and also of five detached portions situated in Elgin, Inverness, and Ross shires, which, having a total area of 31 sq. m., were annexed to Nairnshire in 1476, but disjoined therefrom by the Boundary Commissioners in 1891. The chief rivers are the Nairn and the Findhorn, the former rising in Inverness-shire, and flowing 38 miles north-eastward to the Moray Firth. The surface has a generally southward ascent from the fertile and well-wooded 'laigh of Moray' near the coast, till at Carn Glas on the southern boundary it attains 2162 feet. Loch Loy (1⅛ by ¼ mile) is the largest of seven small lakes. Less than one-fifth of the entire area is in cultivation. The chief antiquities are Kilravock (1400) and Cawdor Castle (q.v.); at Auldearn, near Nairn, Montrose won his fourth victory. With Elginshire the county returns one member; and with Inverness, &c. Nairn town returns another. Pop. (1801) 8322; (1841) 9217; (1881) 10,455; (1911) 9319—1 in 10 Gaelic-speaking.

NAIRN, the county town, stands on the west bank of the river Nairn at its mouth in the Moray Firth, 16 miles by rail ENE. of Inverness. A pleasant little watering-place, with a small harbour and golf-links, it was made a royal burgh by William the Lion. Grant, the African traveller, was a native. Pop. 4700.

Nai′robi, the cap. of the protectorate of British East Africa, S. of Mount Kenia. Pop. 14,000.

Nakhichevan, or NAHITCHEVAN, a town of Russian Armenia (Transcaucasia), near the Persian frontier, 100 miles SE. of Erivan. Pop. 13,000.

Namaqualand, or NAMALAND, a region north of the Cape Province, extending from the Orange River to Damaraland (q.v.). Since 1885 a German possession, with the exception of the British territory of Walvisch Bay (q.v.), it has an area estimated at 460,000 sq. m. It is mainly a sterile and barren region, but has become of more economic importance since the discovery of diamonds in 1908. A few little bays along the coast, such as Angra-Pequeña (q.v.) and Walvisch Bay, afford safe anchorages. The Rhenish Mission has several stations. The country is named from the natives, the Namaquas, a tribe of Hottentots.—LITTLE NAMAQUALAND is a barren district of the Cape Province (q.v.), south of the Lower Orange River. Much copper is mined here.

Namur (*Namür′*; Flem. *Namen*), a city of Belgium, at the confluence of the Sambre with the Meuse, 35 miles by rail SE. of Brussels. The greater part of the picturesque citadel (1784) is transformed into a pleasure-ground with a stadium; and the other old fortifications have been razed since 1866. The town itself has suffered so much by war that it offers little of interest—the cathedral, completed in 1772, with the grave of Don John of Austria; the Jesuit church of St Loup (1653), a large military school, an antiquarian museum, monuments of Leopold I. and the geologist Omalius d'Halloy (1783–1875), &c. Namur is noted for its cutlery, and also manufactures firearms, leather, paper, and tobacco. Population, 32,000.—The province of Namur, on the French frontier, lying between the Belgian provinces of Hainault and Luxembourg, has an area of 1400 sq. m. Pop. 363,000.

Nanaimo (*Nany′mo*), a town on the east coast of Vancouver Island, 74 miles by rail NNW. of Victoria. There are large coal-mines in the district, which has a pop. of 8300.

Nancy (*Non^{g}see*), a beautiful French town, capital of Meurthe-et-Moselle, lies on the river Meurthe, at the foot of vine-clad hills, 220 miles by rail E. of Paris and 94 W. of Strasburg. It owes much of its architectural adornment to Stanislas Leszcinski, who, after abdicating the crown of Poland in 1735, resided here as Duke of Lorraine till his death in 1766. His statue (1831) adorns the Place Stanislas, the principal square, which is surrounded by the hôtel-de-ville, the bishop's palace, and the theatre. Other noteworthy features are the cathedral (1742); the churches Des Cordeliers and Notre Dame de Bon Secours (1738), St Epvre (1875); the 16th-century ducal palace, with the Lorraine museum; statues of General Drouot (1853) and Thiers (1879); and half-a-dozen gates. The institutions include a university, a lyceum, and a library of 40,000 volumes. Nancy, which has grown in importance since the German annexation of Alsace-Lorraine, manufactures cotton and woollen goods, artificial flowers, iron, tobacco, &c.; but its staple industry is embroidery on cambric and muslin. Pop. (1872) 52,565; (1911) 119,949. The capital of the duchy of Lorraine (q.v.), it was the scene of the death of Charles the Bold (1477), and the birthplace of Callot and Claude Lorraine.

Nanda Devi. See HIMALAYA.

Nandidrug. See NUNDYDROOG.

Nanking, capital of the province of Kiangsu, formerly the capital of China, on the Yangtsze River, 130 miles from its mouth. Its name signifies the Southern Capital. Since the removal of the seat of government to Peking (Northern Capital) in the 15th century, the official name has been Kiangning. From 1853 to 1864 it was the capital of the Taiping rebels, who destroyed nearly all the magnificent public buildings for which the city was once famous. Till then the walls, 50 to 70 feet high, enclosed an area nearly 20 miles in circumference. The most memorable of the ruined buildings were the Porcelain Tower (1430), the summer palace, and the tombs of the kings, with remarkable sepulchral statues. It was the headquarters of the Republicans in the revolution of 1911. The manufacture of 'nankeen' (hence named) and of satin has been revived; its once famous pottery and paper are now hardly produced. In 1842 Nanking was held by the British. Pop. 267,000.

Nanning, a port of China, on the Yu-kiang, 100 miles from the Tonquin frontier. Pop. 37,000.

Nantes (*Non^{g}t*), sixth largest city of France, capital of Loire-Inférieure, lies on the right bank of the tidal Loire, 35 miles from the sea, and 248 by rail SW. of Paris. The old town having been demolished between 1865 and 1870, Nantes is one of the handsomest cities in all France, with its noble river, quays, bridges, shady boulevards, squares, and statues. The unfinished cathedral (1434–1852) contains Colomb's splendid monument (1507) to the last Duke and Duchess of Brittany, and another (1879) to General Lamoricière. The ducal castle, founded in 938, and rebuilt in 1466, was the occasional residence of Charles VIII. and most of his successors, and the place where, on 15th April 1598, Henry IV. signed the famous Edict of Nantes. Other noteworthy buildings are the splendid church of St Nicholas (1854), the palais-de-justice (1853), the theatre (1787), and the post-office (1884), besides a museum, a picture-gallery, and a library. In the 19th and 20th centuries great sums have been expended on harbour-works, but the rise since 1845 of the port of St Nazaire, near the mouth of the Loire, and the increasing difficulty in the navigation of the river, have reduced the commercial importance of Nantes; to restore which is the object of the ship-canal (1891) between the two places. The chief exports are hardware, cereals, and preserved provisions, the chief imports sugar, iron, cocoa, and wines. Industries are shipbuilding (decayed), sardine-preparing, and the manufacture of sugar, leather, iron, nets, soap, machinery, &c.; whilst 10 miles below Nantes is the vast government steam-engine factory of Indret, employing from 2000 to 3000 hands, and familiar to readers of Daudet's *Jack.* Pop. of Nantes (1872) 112,947; (1886) 120,106; (1911) 170,535. The *Portus Namnetum* of the Romans, and the former capital of Brittany, Nantes witnessed the 'noyades' of the execrable Carrier and the fall of the Vendéan leader Cathélineau (1793). Fouché and Jules Verne were natives.

Nanticoke, a mining borough of Pennsylvania, in the Wyoming Valley, 24 miles SW. of Scranton. Pop. 13,000.

Nantuck'et, an island (15 miles long) off the SE. coast of Massachusetts. On the N. shore is Nantucket town (pop. 3000), with a nearly land-locked harbour. Once a great seat of the whale-fishery, it is now mainly a summer-resort.

Nantwich, a market-town of Cheshire, on the Weaver, 4 miles SW. of Crewe. It has some quaint old timber houses; a fine cruciform parish church, with a central octagonal tower, 110 feet high; a Gothic town-hall (1858); a market-hall (1867); a grammar-school (1611); and brine-baths (1883). The *Halen Gwyn* ('white salt town') of the Welsh, Nantwich was once the second largest town in Cheshire, the seat of 300 salt-works in Leland's day, since when the industry has gradually quite died out. Boot and shoe making now is the principal industry. A great fire (1583), and its siege by the royalists under Lord Byron (1644) are the chief events in the history of Nantwich. Pop. (1851) 5424; (1911) 7815. See works by Platt (1818) and Hall (1885).

Napier, chief port and city of the provincial district of Hawke's Bay, New Zealand, on the east coast of the North Island. Port Ahuriri (or Scinde Island) is within the municipal boundary. Timber, wool, and tinned and frozen meat are exported. Napier is the seat of the bishop of Waiapu. Pop. (with suburbs), 11,700.

Naples (*Nay'pels;* Gr. and Lat. *Neapolis,* Ital. *Napoli*), till 1860 the capital of the kingdom of Naples, is the largest of Italian cities, and, with the doubtful exception of Constantinople, the most beautifully situated in Europe, 161 miles by rail SE. of Rome. The attractiveness of Naples, due not only to its site, but to its delightful climate, has inspired the proverb, 'See Naples and die.' Its charms have remained proof against defective drainage, impure water-supply, and the fever preserves of its poorer quarters, in course of removal since 1889. The impetus to this work was given by the cholera outbreak in September 1884, when in one night nearly 2000 people were attacked, and half of them died. The new drainage-works carry the sewage to Cumæ, thus relieving the sea-margin of the liquid poison that used to stain the water black. An aqueduct opened in 1885 furnishes pure drinking-water to every part of the city. More recent still are a new harbour, solid embankments, and commodious promenades, new streets cut through the more populous quarters, and a fine embankment carried along the sea-front.

Naples occupies the base and flanks of a hill-range rising, amphitheatre-wise, from the sea, and divided into two unequal parts by the Capodimonte, S. Elmo, and Pizzofalcone heights. The most ancient and populous part of the city lies in the eastern crescent, and is intersected from north to south by the historic and densely peopled Via Toledo (now Via di Roma). A fine quay extends eastward to the Castel del Carmine. Westward runs the less ancient city, smaller in extent, but freer as to air and prospect. Along the sea-margin extend public gardens and the Riviera di Chiaja. Naples is three miles long and two broad. It has a modern look, but in spite of external change still presents the same noisy, vivacious, mercurial life. Its National Museum is becoming daily richer in archæological treasure-trove from Pompeii, while its splendid aquarium teems with typical specimens of the flora and fauna of the Mediterranean. Of architectural interest Naples has little. Besides her five forts and four gates of mediæval construction, she has upwards of 300 churches, including the archiepiscopal cathedral (1272–1316) of St Januarius, whose blood is said to liquefy in the phials containing it on three yearly festivals. The university (1224), with about 100 teachers and 5600 students, the royal palace, the catacombs, and, still more, the law-courts are worth visiting. The National Library (1804) has 500,000 books and 8000 MSS.; the University Library (1812), 300,000 books; and the Brancacciana (1673), 150,000 books and 3000 MSS. The San Carlo Theatre (chiefly for opera) is one of the largest in Italy, though much less popular than the San Carlino. Naples is one of the busiest ports of the kingdom, exporting wine and olive-oil, chemicals and perfumery, live animals and animal products, hemp and flax, cereals, curriery, &c.; and importing cereals, metals, cottons, woollens, earthenware, glass, curriery, silks, groceries, specie, hemp and flax, dyes, chemicals, &c. She trades principally with Britain and France. Naples has many employments, but till the 20th century had few industries, mainly of woollen, silk, and linen manufactures, gloves, soap, perfumery, jewellery, earthenware, hats, and carriages. Macaroni is largely produced on the Neapolitan seaboard. Fishing supports many of the inhabitants. The neighbourhood is the market-garden of Italy. Pop. (1881) 463,172; (1911) 723,208.

Naples owes its foundation to the two Greek settlements of *Palæopolis* and *Neapolis* ('Old and New Town'), combined in Parthenope. In 328 B.C. it was subdued by Rome, and under the empire became a fashionable resort. It had been held successively by Normans and Hohenstaufens, when the popes conferred the sovereignty of Naples on Charles of Anjou. The Angevine dynasty, expiring in 1435, was succeeded by that of Aragon, which had ruled Sicily from the time of the Sicilian Vespers (1282). The territory of Naples (great part of south Italy) was united to Sicily, forming the kingdom of the Two Sicilies, and till 1707 was governed by Spanish viceroys. Naples was wrested then from Spain by Austria, but in 1735 was given to Don Carlos, third son of Philip V. of Spain, who founded the Bourbon dynasty. In 1789 the troops of the French Republic invaded Naples and converted it into the Parthenopean Republic (1799). A second invasion by Napoleon (1806) ended in the proclamation of his brother, Joseph, as king of Naples; and, when Joseph assumed the Spanish crown in 1808, that of Naples was awarded to Joachim Murat. On the defeat and execution of Murat in 1815 the Bourbon monarch, Ferdinand IV., was restored. But in 1861 Naples was incorporated in the new kingdom of Italy.

Nara, an ancient town of Japan, 24 miles S. of Kyoto, with a Buddhist temple of the 8th century. Pop. 33,000.

Narbada. See Nerbudda.

Narberth, one of the Pembroke boroughs, 11½ miles NE. of Pembroke. Pop. 1100.

Narbonne (*Narbonn'*), a town in the French dep. of Aude, on the La Robine branch of the Canal du Midi, 8 miles from the Mediterranean, and 93 by rail ESE. of Toulouse. The removal since 1865 of the fortifications has been an improvement, but the place remains dirty and unattractive, with only three noteworthy buildings. These are the Romanesque church of St Paul (1229); the quondam cathedral of St Just (1272–1332), only the fine Gothic choir of which, 131 feet high, has been completed; and the former archbishop's palace, now the hôtel-de-ville, in one of whose three old towers Louis XIII. in 1642 signed the order to arrest Cinq Mars, and in which are a museum, library, and picture-gallery. The white heather-honey of Narbonne maintains its ancient celebrity; the wine is chiefly used for blending purposes. Population, 23,000. Narbonne was the earliest Roman colony (118 B.C.) beyond the Alps. Varro and Montfaucon were natives.

Nariad, a town of Bombay, 29 miles SE. of Ahmadabad by rail. Pop. 31,500.

Narragansett Bay. See Rhode Island.

Narva, a Russian town, 101 miles WSW. of St Petersburg, on the Narova, 10 miles from its mouth in the Gulf of Finland. Charles XII. won a great victory here in 1700. Pop. 18,000.

Narvik, a Norwegian port opposite the Lofoten Islands, shipping iron ore brought by rail from the mines of Gellivara in Sweden. Pop. 7000.

Naseby, a Northamptonshire parish, 7 miles SW. of Market-Harborough. Here, on 14th June 1645, 7500 royalists under Charles I. and Prince Rupert were totally defeated by 14,000 parliamentarians under Fairfax and Cromwell.

Nash'ua, a city of New Hampshire, 40 miles by rail NW. of Boston, at the junction of the Merrimac and Nashua rivers. The falls of the latter, rendered available by a canal 3 miles long, supply motive-power to cotton-factories and ironworks, paper and carpet mills, &c. Pop. 26,000.

Nashville, capital and second largest city of Tennessee, on the Cumberland River, 200 miles above the Ohio, and 185 by rail SSW. of Louisville. The city, which is a great railway centre, is built mainly on the left bank of the river, which is crossed by a suspension bridge and a railway drawbridge to the suburb of Edgefield. Nashville is a handsome, well-built town, with an imposing state capitol of limestone ($1,500,000), a penitentiary (400 cells), a large lunatic asylum, the Nashville University (1806), Vanderbilt University (Methodist Episcopal South, 1875), Central Tennessee College (for coloured Methodists, 1866), Fisk University (Congregationalist, 1867), Roger Williams University (Baptist), the state normal college, &c. The city has a large wholesale trade, the staples being cotton and tobacco; while its manufactures include cotton, flour, oil, paper, furniture, timber, leather, iron, and spirits. Founded in 1780, Nashville became the legal capital in 1843. In December 1864 the Confederates under Hood were completely defeated here by General Thomas. Pop. (1870) 25,865; (1880) 43,350; (1910) 110,364.

Nasik, a town of Bombay, on the Godavari, 31 miles from its source, 100 miles NE. of Bombay, is a great Hindu place of pilgrimage. Pop. 21,490.

Nasirabad, capital of Maimansingh district, in the E. of Bengal, 75 miles N. of Dacca. Pop. 20,500.

Nassau (*Nass'ow*), formerly a German duchy, now the Wiesbaden district of Hesse-Nassau (q.v.). The reigning duke sided against Prussia in 1866, and his duchy was incorporated with Prussia; on the extinction of the male line of the Orange branch by the death of William III. of Holland, in 1890, the Duke of Nassau became Grand-duke of Luxemburg.

Nassau, on New Providence, is the capital of the Bahamas (q.v.), a bishop's see, and a great winter-resort of American invalids. Pop. 12,000.

Natal, now a province of the Union of South Africa, on the SE. coast of Africa, was erected into a separate colony in 1856. Zululand (10,461 sq. m.) was added in 1897, and after the Boer war (1902) part of the Transvaal (Utrecht, Vryheid, and part of Wakkerstroom districts, in all 6970 sq. m.) was also added, making a total of 35,306 square miles, with a seaboard of about 360 miles, and extending inland to the Drakensberg or Qwathlamba Mountains. Durban, its port and largest town, lies 800 miles ENE. of the Cape of Good Hope. The coast-region, extending for 30 miles inland, is highly fertile, the climate being subtropical and healthy. In 1856 the cultivation of the sugar-cane was introduced on the coast, and besides supplying all South Africa, the colony exports sugar to England. The immigration of Indian coolies for sugar culture began in 1863, and in 1911 there were 141,000 coolies in the province with their attendant traders. The Assam tea-plant was successfully introduced in 1877. Coffee and tobacco have been reared, as have also indigo, arrowroot, and ginger. All tropical fruits thrive well. The midland terrace is more fit for the cereals and usual European crops; while on the higher plateaus along the foot of the mountains are immense tracts of the finest pasturage for cattle and sheep. The climate is very healthy; the thermometer ranges between 90° and 38° F., but the heat even in summer is seldom oppressive. The mean annual temperature at Pietermaritzburg, the capital, is 64·71°. The winter begins in April and ends in September. In summer thunder-storms are very frequent and severe in the uplands. The annual rainfall averages nearly 40 inches, the greatest fall being in summer. The province has one admirable harbour in Durban (q.v.) or Port Natal. The Tugela, Buffalo, Umkomanzi, Umgeni, Umzimkulu, and Mooi rivers have permanent streams, and though not navigable, are often available for irrigating purposes. The area of the coal-measures is estimated at 1400 sq. m. Copper has been found, and much is hoped from the iron near the coal. The province is also known to be rich in asbestos, mica, and plumbago, and some gold is obtained. Great forests of fine timber abound in the mountain-passes. There are 1070 miles of railways, and many more being constructed. The colonial government was representative, the first ministry being constituted in the end of 1893. The law is a modification of old Dutch law. Natal's chief exports are bullion, wool, sugar, tea, and coal. The annual value of exports by sea reaches £5,000,000 (those to the United Kingdom in 1912 amounting to £2,477,000), and the imports by sea, £3,000,000. Before the Union the revenue was £3,600,000, and expenditure a little less. The trade is mainly with the mother-country, also with Australia, India, and North and South America. In 1876 the pop. numbered 326,957 (20,490 whites); in 1911, 1,191,958, including 98,582 whites, 141,568 Indian coolies, and 951,808 natives. Eland and hartebeest are the only big game left; the hippopotamus and alligator are found in some of the rivers. Snakes are plentiful.

Natal was discovered by Vasco da Gama in 1497, on Christmas Day (hence its name). A large body of discontented Boers from Cape Colony settled in the country in 1837, but after a short struggle and long negotiations with the Cape authorities, accepted British rule, the malcontents migrating to Transvaal. Natal was annexed in 1843, made part of Cape Colony in 1844, and constituted a distinct colony in 1856. In 1909 it became a constituent province of the Union of South Africa. In 1873 the chief Langalibalele was suppressed; and Natal suffered severely in connection with the Zulu war (1879), the Transvaal war (1881), and the Boer war (1899–1902).

See books by Peace, Noble, and Bird (1889), Russell (1900), others quoted at CAPE OF GOOD HOPE PROVINCE, and the blue-books and almanacs.

Natal, a seaport of Brazil, capital of the province of Rio Grande do Norte, at the mouth of the river of that name. Pop. 20,000.

Natchez, capital of Adams county, Mississippi, on the east bank of the Mississippi, 214 miles by rail NNW. of New Orleans. The public buildings include a Roman Catholic cathedral and a U. S. marine hospital. Natchez, settled by the French in 1716, was named from an Indian tribe. Pop. 12,000.

Natick, a town of Massachusetts, on Charles River, 18 miles by rail WSW. of Boston. It makes shoes, baseballs, chairs, &c. Pop. 9518.

National Parks. See YELLOWSTONE, and YOSEMITE. Others in the States are the Sequoia National Park, and the General Grant National Park, both in California, and the Hot Springs Reservation in Arkansas. In Canada a domain 26 miles by 10 in extent has been set aside as a national park at Banff in Alberta (by rail 562 miles NE. of Vancouver); it embraces one of the most beautiful sections of the Rocky Mountains, and contains hot sulphur-springs. Roger's Pass, 135 miles to the west, is also reserved as a government park. See besides the article NIAGARA.

Natron Lakes. See NITRIAN DESERT.

Nau'cratis, an ancient city of Egypt, in the Nile delta, 47 miles SE. of Alexandria.

Naugatuck', in Connecticut, on the Naugatuck River, 22 miles by rail NNW. of New Haven, manufactures gloves, rubber goods, cutlery, and iron-wares. Pop. 13,000.

Nauheim, or BAD-NAUHEIM, in Hesse-Darmstadt and near the Taunus Mountains, 24 miles N. of Frankfort. Its hot, saline, and chalybeate springs are impregnated with carbonic acid. Pop. 5000.

Naumburg (*Nowm'boorg*), a quaint old town of Prussian Saxony, on the Saale, in an amphitheatre of vine-clad hills, 30 miles by rail SW. of Leipzig. Of its six churches, the triple-towered cathedral (1207–42) is a noble Romanesque and Gothic structure. The manufactures include ivory carvings, combs, hosiery, wine, &c. The yearly 'cherry feast' commemorates the raising of the siege of Naumburg by the Hussite leader Procop in response to the supplication of the children (28th July 1432); but recent historians cast doubt on the whole episode. The seat of a bishopric (1059–1564), Naumburg suffered much in the Thirty Years' War; in 1814 it came to Prussia. Pop. 27,000.

Nauplia (*Now'pleea*), a fortified seaport in the Morea, Greece, at the N. end of the Gulf of Argos or Nauplia, 25 miles S. of Corinth. Pop. 6,000.

Naushara, or NOWSHERA, a town of the native state of Bahawalpur (q.v.), under the Punjab, 20 miles from the left bank of the Indus, on the railway between Mooltan and Karachi. Pop. 15,000.

Nauvoo' (from a Heb. word for 'beautiful'), a village of Illinois, on the east bank of the Mississippi River, 14 miles above Keokuk. It was built by the Mormons in 1840, and soon contained a pop. of 15,000. Its principal feature was a great temple of white limestone (1841–45); but it had also mills and factories, and the beginnings of a university. After the expulsion of the Mormons in 1846, the temple was half destroyed by fire in 1848, and further ruined by a tornado in 1850. The town was occupied by a French Socialist community. Pop. 1000.

Navan (*Nah'van*), a market-town in Meath, at the junction of the Boyne and Blackwater, 16 miles W. of Drogheda by rail. Pop. 4000.

Navarino (*Navaree'no*; officially *Pylos*), on a bay on the south-west coast of the Morea in Greece, contains only 1462 inhabitants, but has an excellent deep harbour. The Bay of Navarino was the scene of a great sea-victory of the Athenians over the Spartans (425 B.C.); and on the 20th October 1827 it saw the annihilation of the Turkish and Egyptian navies by the British, French, and Russian fleets.

Navarre (Basque *Nava*, 'a mountain plain,' and *erri*, 'country'), one of the kingdoms which arose in the Pyrenees after the downfall of the Goths, but since 1512 divided into Spanish Navarra, and French or Basse-Navarre (now Basses Pyrénées). Spanish Navarra, by far the greater division, has an area of 4000 sq. m.; pop. 312,000, speaking Basque in the north.

Naver, a Sutherland stream, flowing 19 miles N. by E. to Torrisdale Bay out of Loch Naver (6¼ miles × ½ mile).

Navigators' Islands. See SAMOA.

Nawanagar, a seaport of India, and capital of a Kathiawar state (area, 1379 sq. m.; pop. 316,147), stands on the Gulf of Cutch, 310 miles NW. of Bombay. Pop. 58,530.

Naworth Castle. See LANERCOST.

Naxos, the largest and most fertile of the Cyclades, is situated in the Ægean, midway between Greece and Asia Minor. It is 20 miles in length, and has a pop. of 25,000. The shores are steep, and the island is traversed by a ridge of mountains, which culminate in Dia (3289 feet). The wine of Naxos was famous in ancient as it is in modern times, hence the island was celebrated in the legends of Dionysus and Ariadne. It was Turkish from 1566 till Greece became a kingdom. Naxos, the capital (pop. 2000), is the seat of a Greek bishop and a Latin archbishop.

Nazareth, the home of Jesus, anciently in the district of Galilee, 21 miles SE. of Acre, is still a small but flourishing town of Palestine. The principal building is the Latin convent, on the supposed scene of the Annunciation. Pop. 10,000, of whom 6500 are Christians (mostly Roman Catholics and Greek Catholics) and 3500 Moslems.

Naze, THE, or LINDESNAES, the southernmost headland of Norway (q.v.), near the entrance of the Skager Rack, with a lighthouse.—A headland of Essex, 5 miles S. of Harwich. Naze means 'nose' or 'promontory.'

Neagh, Lough (*Lohh Nay*), the largest lake of the British Islands, in Ulster, Ireland, is surrounded by the counties of Armagh, Tyrone, Londonderry, Antrim, and Down. It is 16 miles in length and 10 in average breadth, contains 98,255 acres, is 102 feet in greatest depth, and is 48 feet above sea-level. The chief of its numerous feeders are the Upper Bann, Blackwater, and Callan; and its surplus waters are carried off northward to the North Channel by the Lower Bann. The southern shores are low, marshy, and dreary. Fish abound—trout, char, and pullen.

Neanderthal (*Ne-an'der-tal*), a romantic valley between Düsseldorf and Elberfeld in Rhenish Prussia. In a limestone cave here was found in 1857 the skeleton of a prehistoric man.

Neath, a parliamentary and municipal borough and river-port of Glamorganshire, on a navigable river of the same name, 8 miles ENE. of Swansea by rail. It is believed to stand on the site of the Roman *Nidum;* and near it are the remains of a castle burned in 1231, and ruins of Neath Abbey, described by Leland as 'the fairest abbey in all Wales,' but now sadly decayed and begrimed by smoke and coal-dust. Neath has copper and tin-plate works, iron-foundries, and chemical works. It is one of the Swansea district boroughs. Pop. (1851) 5831; (1911) 17,586.

Nebraska, a central state of the American Union, the eleventh in area, lies between South Dakota, Iowa (separated by the Missouri River), Kansas, Colorado, and Wyoming. Area, 76,855 sq. m. The surface is chiefly an elevated, undulating prairie; it is very level in the eastern and southern portions, but in the north and west the 'Bad Lands' extend into the state, while north of the Niobrarah River there are great sandhills. The average elevation of the state rises from about 1200 feet in the east to 6000 feet towards the western border. The principal rivers, the Platte, Niobrarah, and Republican, all flow east. The atmosphere is dry and invigorating; great extremes of heat and cold are sometimes experienced. Wolves, foxes, skunks, rabbits, &c. abound. The soil is mostly a rich black mould, 2 to 8 feet deep. The staple crop is maize. Tobacco and sugar-beet also are cultivated. The manufactures include agricultural implements, canned provisions, vitrified brick, woollen clothing, soap, and beet-sugar. Pop. (1860) 28,841; (1880) 452,402; (1910) 1,192,214. The principal cities are Omaha, Lincoln (the capital), Beatrice, Hastings, and Nebraska City. Nebraska, included in the Louisiana Purchase, was organised in 1854, with an area of 351,558 sq. m. But of this vast area great portions were afterwards carved out for Colorado, Dakota, and Idaho. Nebraska became a state in 1867.

Nebraska City, capital of Otoe county, Nebraska, on the west bank of the Missouri, 74 miles below Omaha (44 by rail). It contains the Nebraska College (Episcopal, 1863), mills and factories, &c. Pop. 5000.

Nebraska River. See Platte.

Neches River (*Netch'ez*), rises in eastern Texas, and flows 350 miles SSE. to Sabine Lake, its waters passing thence into the Gulf of Mexico.

Neckar, the principal river of Würtemberg, rises on the eastern declivity of the Black Forest, and winding 250 miles, joins the Rhine at Mannheim—the other towns on its banks being Tübingen, Heilbronn, and Heidelberg. From Cannstadt, about midway, the Neckar is navigable. Fair wines are grown on its banks.

Nedjd. See Arabia.

Needham Market, a Suffolk town, on the Gipping, 3 miles SE. of Stowmarket. Pop. 1313.

Needles, a group of chalk rocks off the W. end of the Isle of Wight, 4¾ miles SW. of Yarmouth. The westernmost bears a lighthouse.

Needwood Forest, a former royal forest in Staffordshire, along the Trent.

Neerwinden (*Nayr'winden*), a small village in the north-west corner of the Belgian province of Liége. Here the French under Luxembourg defeated the English under William III. (29th July 1693), and here under Dumouriez they were defeated by the allies (18th March 1793).

Negapatam', a seaport on the Coromandel coast, 180 miles S. by W. of Madras city. Originally Portuguese, it was taken by the Dutch in 1660, and by the English in 1781. It exports cottons, live-stock, ghi. Pop. 57,221.

Negri Sembi'lan. See Straits Settlements.

Negro, Rio. See Rio Negro.

Negropont. See Eubœa.

Neidpath, a ruined castle, on the Tweed, 1 mile W. of Peebles.

Neilgherry Hills (*Neelgerry*, *g* hard; properly *Nilgiri*), a mountainous district in the south of India, rising abruptly from the plains to the height of 6000 feet, though single peaks shoot up to 8760 feet. They have a delightfully cool climate, and are much resorted to by invalided Europeans, the chief station being Ootacamund.

Neilston, a Renfrewshire town, on the Levern, 2 miles SW. of Barrhead. Pop. 2200.

Neisse (*Nīce-seh*), a fortified town of Prussian Silesia, on the Neisse, an affluent of the Oder, 50 miles SE. of Breslau. It manufactures arms, linen, and chemicals, and has great wool-markets. Emin Pasha was born here. Pop. 26,000.

Nejd. See Arabia.

Nellore, a town of India, on the Pennar, 107 miles N. of Madras. Pop. 32,336.

Nelson, a municipal borough (1890) of Lancashire, 3½ miles NNE. of Burnley. Pop. 40,000.

Nelson, a city of British Columbia, on Kootenay Lake, centre of a mining and lumbering district. Pop. 4700.

Nelson, the capital of a provincial district in New Zealand, on a harbour at the north end of South Island, where the Maitai enters Blind Bay. Founded in 1841, it has a cathedral, museum, and various manufactures. Pop. 8000.

Nelson River flows 400 miles north-eastwards through Manitoba, from Lake Winnipeg to Hudson Bay (q.v.). It is navigable for 127 miles from its mouth, though only some 70 or 80 miles for large steamers.

Neme'a, anciently the name of a well-watered valley of Argolis, in the Peloponnesus.

Nemi (*Nay'mee*), Lake of, an extinct crater, 20 miles S. of Rome, accounted for its beauty the gem of the Alban Mountains. There was here a famous temple of Diana.

Nemours (*Nemoor'*), an ancient town of 5000 inhabitants in the French dep. of Seine-et-Marne, 40 miles SE. of Paris by rail.

Nen, a river of England, rising near Naseby, and flowing 70 miles NE. to the Wash, past Northampton, Oundle, Peterborough, &c.

Nenagh (*Nay'na*), a Tipperary town, 28 miles NE. of Limerick by rail. Its Norman keep is called Nenagh Round. Pop. 4800.

Nepal (*Ne-pawl'*), a native kingdom of India, on the southern slope of the Himalayas, between Tibet and Bengal. It is 512 miles in length, by 70 to 150 in breadth. Area, 54,000 sq. m.; pop. estimated by native authorities at 5,500,000, more probably 3,500,000. The northern parts of the state embrace the main range of the Himalayas, with Everest, Dhawalagiri, &c. On the south of the state lies the Terai. The intervening territory consists of mountain-ridges, embracing valleys drained by the Kurnali, Gandak, Kosi, &c. The climate varies greatly according to altitude; the principal valley, in which stands the capital Khatmandu (q.v.), has a climate like that of southern Europe. The soil is very fertile. The hillsides are terraced and the land is irrigated. Copper, iron, sulphur, &c., are little worked. The forests contain valuable timber trees. The valleys are inhabited by numerous different hill-tribes, partly aboriginal, partly of Mongolian or Chinese descent; but the dominant race are the Goorkhas, whose ancestors came from Rajputana in the 12th century, though it was not until 1769 that they made themselves masters of Nepal. In 1815 Sir David Ochterlony defeated the Goorkha armies in the west; and in 1816 a British force, 33,000 strong, compelled the Goorkhas to sign a treaty of peace: they have since been helpful, especially during the mutiny; and there is a British Resident at the capital.

Nerbudda, or NARBADA, a river of India, rises on the Amarkantak plateau, 3493 feet above sea-level, and flows west, through the Central Provinces, past Jabalpur, through the great depression between the Vindhya Mountains on the north and the Satpura Mountains on the south, and reaches the Gulf of Cambay half-way between Baroda and Surat. The river, a sacred stream, has a total length of 800 miles, and is navigable to Broach, 30 miles from its mouth.

Nerchinsk. See NERTCHINSK.

Néris-les-Bains. See MONTLUÇON.

Nertchinsk, a mining-town of eastern Siberia, in the Trans-Baikal Territory, on the Nertcha, a tributary of the Shilka (a head-stream of the Amur), 875 miles E. of Irkutsk. Pop. 6750.—NERTCHINSKIY-ZAVOD, 180 miles SE., on a tributary of the Argun, is also a mining centre, many of the workers being convicts. Pop. 5000.

Ness, LOCH, a long, narrow lake of Inverness-shire, the second largest in Scotland, 6½ miles SW. of Inverness. Lying 50 feet above sea-level, it extends 22½ miles north-north-eastward, and has an average breadth of 1 mile, with an area of 19 sq. m. It receives the Morriston, Oich, Foyers (q.v.), and other streams, and sends off the river Ness 7 miles to the Moray Firth. It lies in the valley of Glenmore, on the line of the Caledonian Canal (q.v.), and is enclosed by steep mountains—the highest, Mealfourvonie (2284 feet). Owing to its depth (in places 780 feet) it never freezes much. See FORT AUGUSTUS.

Neston and Parkgate, a town on the Dee estuary, 12½ miles NW. of Chester. Pop. 4600.

Netherlands, a triangular region between France, Germany, and the sea, lying mainly in the basins of the Scheldt, the Meuse, and the lower Rhine, and now divided between the kingdoms of Holland (q.v.) and Belgium (q.v.).

Nethou. See PYRENEES.

Netley, a place on the east side of Southampton Water, 3 miles SE. of Southampton, with a ruined Cistercian abbey, founded in the time of Henry III., and the Royal Victoria Military Hospital (for 878 patients), the foundation-stone of which was laid by Queen Victoria on 19th May 1856.

Neu-Brandenburg (*Noy-Brandenboorg'*), a town of Mecklenburg-Strelitz, on Lake Tollens, 20 miles NNE. of Neu-Strelitz by rail. Pop. 12,000.

Neuburg (*Noyboorg*), an ancient town of Bavaria, on the Danube's right bank, 29 miles NNE. of Augsburg. Pop. 10,000.

Neuchâtel, or NEUFCHÂTEL (*Nuh-sha-tel'*; Ger. *Neuenburg*), a canton in the west of Switzerland, between Lake Neuchâtel and the French frontier. Most of its streams flow into the Rhine; several are feeders of the Lake of Neuchâtel, which, lying 1420 feet above sea-level, and 472 feet deep, is 25 miles long by from 3 to 6 wide. The Thiele carries its waters into the lake of Bienne, and thence into the river Aar. Pop. (1870) 97,284; (1910) 132,184, of whom three-fourths speak French, and four-fifths are Protestants. The speciality of the canton is watch-making, which occupies 20,000 persons, mainly in their own homes. Neuchâtel was associated with Prussia from 1707 till 1806, when Napoleon bestowed it upon General Berthier; in 1814 it was restored to the House of Brandenburg. A republican constitution was adopted in 1848; and there was civil war in 1856. The connection with Prussia was dissolved in 1857, and Neuchâtel became a member of the Swiss Confederation.

NEUCHÂTEL, chief town of the canton, occupies a magnificent site on the north-west shore of the Lake of Neuchâtel, 85 miles by rail NNE. of Geneva. It is noted for its many charitable, educational, and artistic institutions, and has a château (restored 1866), a college (1828), a statue of Farel (1875), &c. It manufactures watches, jewellery, &c. Pop. (1870) 13,321; (1910) 23,505.—The famous Neufchâtel cream-cheeses are made at NEUFCHÂTEL-EN-BRAY, a small Norman town, 25 miles SE. of Dieppe by rail.

Neuilly (*Nuh-ee-yee'*), or NEUILLY-SUR-SEINE, a town in the French dep. of Seine, N. of the Bois de Boulogne, and practically a suburb of Paris. Here, near the Seine, and in a beautiful park, stood Louis-Philippe's favourite Château de Neuilly, built by Louis XV., and burned at the revolution of 1848. Pop. 45,000.

Neu-Mecklenburg. See NEW IRELAND.

Neumünster (*Noymünster*), a town of Holstein, 20 miles by rail S. by W. of Kiel, with cloth-mills, dyeworks, breweries, &c. Pop. 36,000.

Neu-Pommern. See NEW BRITAIN.

Neusatz (*Noy-zatz*), or UJ VIDÉK, a town of Hungary, on the Danube's left bank, opposite Peterwardein (q.v.). Pop. 34,000.

Neusiedler Lake (*Noyzeed'ler*), a shallow, brackish lake on the north-west frontier of Hungary, 22 miles SE. of Vienna, which has lost much of its former area (133 sq. m.) by draining.

Neuss (*Noyss*), a town of Rhenish Prussia, near the left bank of the Rhine, 4 miles W. of Düsseldorf by rail. Its church of St Quirinus was founded in 1209. Neuss has ironworks, foundries, flour and iron mills, and manufactures of cottons, woollens, leather, paper, chicory, &c. Pop. (1910) close on 40,000.

Neustadt (*Noy-stat*), a town of Prussian Silesia, 25 miles SW. of Oppeln. It manufactures woollen and linen fabrics and carpets. Pop. 20,000.—(2) NEUSTADT, or WIENER-NEUSTADT, one of the most beautiful towns of Lower Austria, 32 miles S. of Vienna by rail. It is overlooked by the old castle of the Dukes of Babenberg, now a military academy, whose fine Gothic chapel (1460), rich in painted glass, is the burial-place of Maximilian I. Locomotives and machinery, wire, bells, pottery, starch, leather, and ribbons are manufactured. The city, called 'the Ever-faithful,' was founded in 1192, and rebuilt after a great fire in 1834. Pop. 33,000.—(3) NEUSTADT-AN-DER-HARDT, a town of Rhenish Bavaria, at the foot of the Hardt Mountains, 20 miles W. of Spires. It manufactures paper, cloth, soap, wine, &c. Pop. 20,000.

Neustrelitz (*Noy-stray'litz*), capital of the grand-duchy of Mecklenburg-Strelitz, in a hilly district, between two lakes, 62 miles NNW. of Berlin. Founded in 1733, it is built in the form of an eight-rayed star, and contains the ducal palace, with magnificent gardens. Pop. 12,000.

Neustria, the portion of the Frank empire containing Soissons, Paris, Orleans, and Tours.

Neuwied (*Noy'veed*), a town of Prussia, on the Rhine's right bank, 8 miles below Coblenz, was capital of the principality of Wied; the castle has a beautiful garden, with many Roman antiquities. The town contains a great institute of the Moravian Brethren. Pop. 20,000.

Neva, a river of Russia, flows westward from the south-west corner of Lake Ladoga to the Bay of Cronstadt, in the Gulf of Finland, passing through St Petersburg, and carries to the sea an enormous volume of water (greater than that of the Rhine) from the lakes Ladoga, Onega, Ilmen, &c. Its total length, with windings, is about 40 miles; its width varies from 4000 feet to 180; and in places the navigation is embarrassed by reefs and rapids. It is frozen on an average from November 25 to April 21.

Nevada (*Nevah'da*), one of the Pacific states of the American Union, is bounded by Oregon, Idaho, Utah, Arizona, and California. Its greatest length from north to south is a little less than 500 miles, and its greatest width more than 300 miles. In area (110,700 sq. m.) it is the sixth largest state of the Union; in population it is the lowest of all the states, but increasing—(1870) 42,491; (1880) 62,266; (1910) 81,875. Nearly the whole of Nevada is included in the Great Basin (q.v.), once occupied by a vast inland sea, whose deepest depressions are yet marked by Walker, Humboldt, Carson, Pyramid, and Winnemucca lakes, and by other 'sinks' and *playas*, while the ancient shore-lines are clearly visible in places. The climate, now nearly rainless, was once moist; the soil of the Great Basin is now almost totally unfit for agriculture. At present Nevada is a high plateau with an average altitude of 4000 feet, crossed by numerous ranges of mountains, separated by valleys from 5 to 20 miles in width. Some of these valleys are barren and desolate; others, through which the rivers flow, have areas of arable land. The mineral production of Nevada, especially of silver, has been enormous in the past; and mining is still the chief interest. Nevada lies almost wholly in the great basin of interior drainage, where none of the water reaches the sea. The Humboldt River pursues a winding course of 350 miles. There are numerous hot springs. The atmosphere is dry, the temperature subject to extremes, and the rainfall exceedingly light. The Mormons established a few temporary camps in 1848, and in 1850 a settlement was made at Genoa; but the real history of the state begins with the discovery of silver in 1859. Nevada was separated from Utah in 1861, and in 1864 was admitted a state. The larger towns are Reno, Virginia City, and Carson (the capital).

Never Never Country, a name given to part of the central Australian desert, north of Lake Eyre, mainly in the state of South Australia, but including part of western Queensland.

Nevers (*Neh-vayr'*), capital of the French dep. of Nièvre, and formerly of the province of Nivernais, is picturesquely seated on a hillside at the influx of the Nièvre to the Loire, 159 miles by rail SSE. of Paris. The *Noviodunum* of Cæsar, it has been the seat of a bishop since 506; its beautiful cathedral belongs mainly to the 13th century. The industries comprise the manufacture of cannon, iron cables and chains, porcelain (introduced by Italians about 1565), &c. Pop. 23,000.

Neviansk, a town in the Russian government of Perm, 50 miles N. of Ekaterinburg by rail, stands on the Siberian side of the Ural Mountains, and on a tributary of the Tobol. The district is rich in gold and iron. Pop. 18,000.

Neville's Cross, 1¼ mile SW. of Durham, the scene of the defeat and capture of David Bruce, 17th October 1346.

Nevin, a Carnarvonshire fishing-town on Carnarvon Bay, 5 miles NW. of Pwllheli. It is one of the six Carnarvon boroughs. Pop. 1800.

Nevis, one of the British Leeward Islands, 2 miles SE. of St Kitts, with which it is administratively connected. It is circular in form, rises in the centre to a wooded ancient crater (3200 feet), and has an area of 50 sq. m. Sugar is the principal crop, and limes and oranges are grown. Pop. (1881) 11,864; (1911) 12,945. The capital is the port of Charlestown (pop. 1400). Nevis was discovered by Columbus in 1498, colonised by England in 1628, and long a great slave-mart. It has suffered much from hurricanes and earthquakes.

Nevis, BEN. See BEN NEVIS.

Nevis, LOCH, a sea-inlet of West Inverness-shire, 14 miles long and 1 to 4 miles broad.

Newabbey, a Kirkcudbrightshire parish, 8 miles S. of Dumfries, with the beautiful ruins of New or Sweetheart Abbey, founded for Cistercians by Deverguila in 1275.

New Albany, capital of Floyd county, Indiana, on the north bank of the Ohio River, nearly opposite Louisville, and 317 miles by rail S. by E. of Chicago, 267 E. of St Louis. It contains iron and brass foundries, rolling-mills, potteries and brick-yards, flour, woollen, cotton, and planing mills, &c.; while its plate-glass works are the largest in the United States. Pop. (1880) 16,423; (1910) 25,275.

New Almaden. See ALMADEN.

New Amsterdam. See NEW YORK, ST PAUL.

Newark, a ruined tower of Selkirkshire, on the right bank of Yarrow Water, 4¼ miles WNW. of Selkirk town. It figures in the *Lay of the Last Minstrel*. See also PORT-GLASGOW.

New'ark, (1) the capital of Essex county, New Jersey, on the Passaic River, 9 miles by rail W. of New York. A handsome city, with parks and elm-shaded streets, it has a city-hall, court-house, public library, nearly 150 churches, and 400 industrial establishments, producing brass and iron work, hardware and machinery, carriages, trunks, saddlery, boots, hats, clothing, jewellery, &c. The line of docks is over a mile long. Newark was settled in 1666 by a colony from Connecticut, and received a city charter in 1836. Pop. (1850) 38,983; (1890) 181,830; (1910) 347,469.—(2) Capital of Licking county, Ohio, on the Licking River (here crossed by four iron bridges), 33 miles by rail E. by N. of Columbus. Stoves, boilers, machinery, wagons, flour, woollens, and glass-ware are manufactured. Pop. (1880) 9600; (1910) 25,404.

Newark-upon-Trent, a town of Notts, on a navigable branch of the Trent, 18 miles by rail NE. of Nottingham, and 120 N. by W. of London. It is approached from the north by a causeway, 1½ mile long, constructed by Smeaton in 1770, and carried over the flat island formed by the Trent on the west and the Newark branch on the east. The fine parish church, built mainly between 1350 and 1489, has an octagonal spire 223 feet high. Other edifices are the town-hall (1805), corn exchange (1848), hospital (1881), coffee-palace (1882), free library (1882), and grammar-school, founded by Archdeacon Magnus in 1529. Newark has a very important corn-market and great malting industries, besides iron and brass foundries, manufactures of boilers and agricultural implements, and plaster of Paris works. Incorporated by Edward VI., it returned two members to parliament till 1885. Pop. (1851) 11,230; (1911) 16,408. A British town and Roman station, Newark in Saxon times became the seat of a castle, which was rebuilt in 1125 by Alexander, Bishop of Lincoln (hence the name *New Wark*), and was long known as the 'key of the north.' King John died in it (1216); and in the Great Rebellion it stood three sieges, in the second of which it was relieved by Prince Rupert (1644), whilst in the third it was surrendered to the Scots by order of Charles I., who had just delivered himself up (5th May 1646). It was then dismantled, and is now represented only by a very picturesque ruin in a public garden. See works by Shilton (1820) and Cornelius Brown (1879).

Newbattle Abbey, Midlothian, 1 mile S. by W. of Dalkeith, the seat of the Marquis of Lothian, on the site of a Cistercian monastery (1140). Andrew Cant and Robert Leighton were ministers of Newbattle.

New Bedford, a city and port of entry of Massachusetts, is on the Acushnet estuary (here crossed by a bridge 4000 feet long), 3 miles N. of Buzzard's Bay and 56 by rail S. of Boston. The public buildings include a city-hall of granite, a custom-house, a public library, and a fine high school ($126,000). There is a broad drive (4 miles) round Clark's Point, where there is a granite fort. For a century (1755–1854) New Bedford was the chief centre of the American whale-fisheries, sending out more than 400 whaling-vessels. Besides several great cotton-mills, it has foundries, oil-refineries, and manufactories of drills, cordage, boots, flour, glass, plated ware, carriages, candles, &c. Pop. (1880) 26,845; (1910) 96,652.

Newbern, capital of Craven county, North Carolina, at the junction of the navigable Neuse and the Trent (here crossed by a long bridge), 107 miles by rail SE. of Raleigh. It manufactures railroad-cars, cotton-seed oil, and wood-pulp, and does oyster-canning. Pop. 10,000.

Newbiggin, a Northumberland watering-place, 7¼ miles E. by N. of Morpeth. Pop. 3500.

New Brighton, a Cheshire watering-place, 4 miles N. of Birkenhead, included in Wallasey.

New Brighton, since 1898 part of Richmond, one of the five boroughs of New York city, on the NE. shore of Staten Island.—There is another New Brighton in the coal district of Pennsylvania, 30 miles NW. of Pittsburgh.

New Britain, a town of Connecticut, 9 miles SW. of Hartford, producing hardware, cutlery, locks, jewellery, hooks and eyes, hosiery, &c. It has two parks, the state armoury, and a normal school. Pop. 44,000.

New Britain, by Germans called NEU-POMMERN, an island of the Western Pacific, a member of the German Bismarck Archipelago (q.v.), separated from the north-east coast of New Guinea by the Dampier Strait. In the forest-clad interior there are several volcanoes, active and quiescent, the highest being the Father (3900 feet). The climate is hot and moist. Cocoa-nuts, yams, bananas, bread-fruit, betel-nuts, and similar fruits are the chief products. The natives are Melanesian cannibals. Area, 9600 sq. m.

New Brunswick, an eastern province of Canada, washed on the E. by the Gulf of St Lawrence, and on the S. by the Bay of Fundy. It has an area of 27,322 sq. m.—rather smaller than Scotland. Its coast-line, with many fine harbours, is 500 miles in length, interrupted only at the point of juncture with Nova Scotia, where an isthmus 11 miles broad connects the two provinces. The surface is generally undulating. There are low hills skirting the Bay of Fundy and the rivers of St John and Restigouche. These two rivers are 450 and over 200 miles long; the Miramichi River is 220. The lakes are numerous but small, the largest being Grand Lake, 30 miles long and 3 to 7 miles wide, communicating with the St John River. Pop. (1881) 321,233; (1911) 351,889, of whom nearly one-third were Catholics. The principal towns are St John (with Portland, 42,500), Fredericton (the capital), and Moncton. The climate is subject to extremes, ranging between 80° and – 15°. Except in a strip of country adjacent to the Bay of Fundy, the soil is very fertile, and every kind of grain and roots produced in England is grown, as well as others; live-stock is raised. The province, which has cheap coal, manufactures sawn lumber, leather, cotton and woollen goods, wooden-ware, paper, iron-castings, nails, mill machinery, bolts and nuts, railway engines and carriages. Iron, gypsum, petroleum, and other minerals are exploited. Timber is the chief export. Land is cheap, and sport excellent. New Brunswick, as a part of Nova Scotia, was ceded by France to Great Britain in 1713, but the boundaries were not settled until 1763. The first British settlers emigrated from Scotland to the Miramichi district in 1764; and in 1783, at the close of the American revolution, a large body of the loyalists from the United States settled near St John.

New Brunswick, capital of Middlesex county, New Jersey, is at the head of navigation on the Raritan River, 31 miles by rail SW. of New York. It contains a Roman Catholic cathedral, and is the seat of Rutger's College (1771), connected with which is the theological seminary of the Dutch Reformed Church, as well as an observatory and a state agricultural college and model farm. New Brunswick is noted for its great india-rubber factories, and has also iron and brass foundries, and manufactories of hosiery, lamps, needles, paper-hangings, &c. Pop. 23,400.

Newburgh, a city of Orange county, New York, is on the west bank of the Hudson (here 1¼ mile wide), 57 miles by rail N. of New York, amid the grand scenery of the Highlands. Its handsome edifices, villas, and gardens, rising 300 feet from the river, command a noble prospect. The city has, besides foundries, boiler-works, shipyards, and powder-mills, manufactures of woollen and cotton goods and carpets, leather, flour, soap, oilcloth, brushes, paints, plaster, tiles, &c. Butter, grain, flour, and coal are shipped. Newburg saw the disbandment of the American army, 23d June 1783; and 'Washington's Headquarters' is preserved as the property of the state. Pop. 28,000.

New'burgh, a royal burgh of Fife, near the Firth of Tay, 11 miles ESE. of Perth. It arose in connection with the neighbouring Benedictine abbey of Lindores (*c.* 1196); and in its vicinity also is the famous Cross Macduff. Pop. 2000. See A. Laing's *Lindores and Newburgh* (1876).

New'bury, a thriving market-town of Berkshire, on the 'swift' Kennet, 17 miles W. by S. of Reading and 55 from London. Its gray old church, restored in 1867 at a cost of £15,000, is a fine Perpendicular edifice, with a noble tower added in 1510 by John Winchcombe or Smallwoode, otherwise 'Jack of Newbury,' a famous clothier, who sent a hundred of his own men to fight at Flodden. The large Italian corn exchange was built in 1862, in which year was started a great yearly wool-market; and still more recent are the handsome municipal offices and the new grammar-school, though this claims King John for its founder (1216). Newbury—'new' only as distinguished from the old Roman station of *Spinæ* (now Speen)—besides has many ancient and wealthy charities. It was incorporated by Elizabeth in 1596, and the borough boundary was extended in 1878. Pop. (1801) 4275; (1851) 6574; (1911) 12,107. Two hard-fought battles took place here in the Great Rebellion—the one between Charles and Essex, on 20th September 1643; the other between Charles and Manchester, on 27th October 1644. The advantage of the first was, on the whole, on the side of the king, but it cost the lives of Lords Falkland, Carnarvon, and Sunderland, to whom a memorial was erected in 1878. The second would have been a decisive royalist defeat but for Manchester's hesitancy.

See the *History of Newbury* (1839), a work on the two battles by W. Money (1881), and his *History of Newbury* (Oxford, 1887).

New'buryport', a city and port of entry of Massachusetts, on the Merrimac's S. bank, 3 miles from its mouth, and 37 by rail NE. of Boston. It has a long, shady High Street, with a six-acre pond, and manufactories of cottons, shoes, combs, hats, pumps, &c. Here Whitefield (died 1770) is buried. Pop. 15,000.

New Caledonia, a South Pacific island, belonging to France, and lying midway between the Fiji Islands and Queensland; on it the Loyalty Islands and Isle of Pines are dependent. Surrounded by coral-reefs, it is 240 miles in length, 25 in average breadth, and 6450 sq. m. in area. The interior is greatly broken by irregular mountain-chains (highest point, Mount Humboldt, 5380 feet). Nouméa, the capital (with railway), is on the south-west coast. The minerals include nickel, copper, cobalt, antimony, chrome, &c. Wines and spirits, flour, drapery, groceries, ironmongery, machinery, coal, &c. are imported; and nickel, cobalt, and other metals, preserved meat, copra, coffee, &c., exported. Every year about 130 vessels of 200,000 tons visit the island, one-half being British. The total pop. in 1906 numbered 55,886, including—aborigines, 32,427; free Europeans, 22,759; convicts, 1750; liberated convicts, 3980. The island was discovered by Captain Cook in 1774, and was annexed by France in 1853. She began to use it as a convict station, but convicts are no longer sent there.

New Castile. See CASTILE.

Newcastle, (1) a watering-place in Down, 11 miles SW. of Downpatrick. Pop. 1800.—(2) A town, 27 miles SW. of Limerick. Pop. 2600.

New Castle, capital of Lawrence county, Pennsylvania, on the Shenango River, 50 miles by rail NNW. of Pittsburgh, has rolling-mills, foundries, and nail-factories. Pop. 36,280.

Newcastle, a port of New South Wales, 75 miles NE. of Sydney by rail, at the mouth of the Hunter River. Coal and wool are the main exports. The harbour is defended by a fort. Pop. (1881) 15,595; (1911) with suburbs, 62,400.

Newcastle Emlyn, a Carmarthenshire town, on the Teifi, 26 miles NNW. of Carmarthen. Pop. 900.

Newcastleton, a Roxburghshire village, on Liddel Water, 21¼ miles S. by W. of Hawick. Pop. 880.

Newcastle-under-Lyme, a parliamentary and municipal borough of Staffordshire, on the Lyme brook, and in what used to be the Lyme Forest, 16 miles NNW. of Stafford and 147 by rail NW. by N. of London. Pop. (1801) 4604; (1911) 20,201. Amongst new public buildings are the town-hall (1890) and the high school (1876). The high school was reconstructed in 1874; its distinctive features are the study of natural science and modern languages. The parish church, Early English and Decorated, was rebuilt in 1876 from designs of Sir Gilbert Scott, and has a quaint old square tower of red sandstone, and a fine peal of bells. Brewing, malting, and the making of paper and army clothing (formerly hats) are industries, whilst the district is noted for its potteries and coal-mines. Of the castle all traces have disappeared. The town now returns only one M.P. (two from 1353 till 1885).

Newcastle-upon-Tyne, a city and county, on the north bank of the Tyne, 275 miles from London, 117 from Edinburgh, and 10 from the German Ocean. It is the seat of a bishopric founded in 1882, and it returns two members to parliament. Pop. (1801) 28,294; (1841) 71,850; (1881) 145,359; (1911) 266,603. The city, built for the most part on steep slopes and gently rising ground, abounds in contrasts, such as the grim old keep and the High Level Bridge; the modern Grey Street and the ancient Side; the stately stone buildings erected by Grainger and the half-timbered Elizabethan houses with projecting stories and latticed casements; the Elswick Works, a mile in extent, and Jesmond Dene, one of the loveliest ravines in the country; the closely-packed hillsides and the rolling expanse of common called the Town Moor. The church of St Nicholas, now the cathedral, said to have been founded in 1091, was destroyed by fire in 1216. The present building belongs to the Decorated and Perpendicular periods; the nave and transepts dating from 1359, the chancel from 1368, and the tower with its beautiful architectural crown from about 1435. The reredos was erected in 1888. There is also a Roman Catholic cathedral (1844), from designs by Pugin.

The central part of Newcastle with its stately and ornate buildings is a monument to the genius of Richard Grainger (1798–1861). Grey Street and Grainger Street, built in 1834–38, are the finest thoroughfares in the city. Monuments have been erected to Earl Grey (1838) and George Stephenson (1862). With the town-hall (1863) are associated the corporation offices and the corn-market. Other public buildings are the guildhall (1658) and exchange on the Sandhill, the Moot Hall (1810), the general post-office (1876), the central police-courts (1874), the jail (1823–28), the Wood Memorial Hall (1870), the Trinity House (chapel, c. 1651; hall, 1721; almshouse, &c., 1782–95), the Central Exchange News-room and Art Gallery (1838), the Assembly Rooms (1774–76), the (branch) Bank of England (1834), the Royal Arcade (1831–32), the Butchers' Market (1835), and the barracks (1806). There are two theatres. The museum of the Natural History Society (1883–84, costing £42,000), contains collections of British birds, fossils from the coal-measures, and a unique series of Bewick's drawings. The Literary and Philosophical Society (1793) has a library of about 40,000 volumes. The public library (1881) contains over 70,000 volumes. The College of Medicine (1851) and the College of Science (1871) are both affiliated to the university of Durham: the College buildings were opened in 1888, and have since been greatly extended. The Royal Free Grammar-school, founded in 1525, has since 1870 occupied new premises. Among benevolent institutions are the Royal Infirmary (1751), the Jesus Hospital (1681), the Keelmen's Hospital (1701), the Trinity Almshouses (incorporated 1492), the Northern Counties Institution for the Deaf and Dumb (1861), the Fleming Memorial Hospital (1887), and the Northern Counties Orphan Institution (1876). The Central Station in Neville Street (1850: remodelled 1893–94) is a great railway terminus. The public pleasure-grounds of Newcastle are the Town Moor (987 acres), Castle Leazes, and Nuns Moor, the Leazes, Elswick, Brandling, Heaton, and Armstrong Parks, the Cruddas recreation-ground, and Jesmond Dene. For the Armstrong Park and Jesmond Dene, Newcastle is indebted to Lord Armstrong.

Newcastle is connected with Gateshead by three bridges: (1) the High Level Bridge, erected in 1846–49 from the plans of Robert Stephenson and T. E. Harrison, at a cost of £491,153; it is 1337 feet long, and consists of six cast-iron arches, which, springing from piers of solid masonry, support a railway at a height of 112 feet and a roadway at a height of 83 feet above high-water. (2) The Swing Bridge, erected 1868–76, at a cost of £233,000, on the site of the Roman, mediæval, and 18th-century bridges; the movable portion is 281 feet long. (3) The Redheugh Suspension Bridge, erected 1868–71, at a cost of £35,000, is 1453 feet in length. (4) A new railway bridge, opened in July 1906 by King Edward, who at the same time conferred on the mayor the dignity of Lord Mayor. The port of Newcastle is a very ancient and important one. By constant dredging the river is now navigable by large vessels to Elswick. The quay is about 1540 yards in length. Since the 13th century the chief trade of Newcastle has been in coal. In shipbuilding, the river Tyne is second to the Clyde. The principal manufactures of Newcastle are locomotive and marine engines, machinery, heavy ordnance, carriages and harness, white and red lead, sheet and pipe lead, glass of various kinds, earthenware, chemical manures, alkali, cement, bricks, tiles, fireclay goods, colours, shovels, grindstones, wire rope, nails, sails, &c. The works of Sir W. G. Armstrong, Whitworth, & Co., founded in 1847, comprise blast-furnaces, engine-shops, foundries, and steel-works. Since the amalgamation of the original firm with that of C. Mitchell & Co., in 1882, several warships have been completed at Elswick, including the ill-fated *Victoria*. Newcastle is the birthplace of Lords Eldon and Collingwood, Mark Akenside, Hutton the mathematician, and Lord Armstrong. Under the Romans the high ground overlooking the river near the castle was the site of the military station of Pons Ælii. At the time of the Conquest it was a monastic settlement, known as Monkchester. Robert Curthose in 1080 constructed a fortress here; but the present Norman keep was built between 1172 and 1177 at a cost of £911, 10s. 9d. In 1644 Newcastle, which had declared for the king, was besieged for ten months by the Scots under General Leslie. Tragic events were the visitations of the Asiatic cholera in 1831 and 1853, and the great fire of 1854. See works by Gray (1649), Bourne (1736), Mackenzie (1827), Welford (3 vols. 1884–87), Charleton (1885), and Boyle (1890).

New-chwang, the port of Manchuria, and a treaty port since 1858, stands on the river Liao, 20 miles from its mouth and 120 from Mukden. Vessels are, however, obliged to load and discharge at Ying-tzu, at the mouth of the river, now called also by the name of the old city farther up, a greatly decayed place. Ying-tzu imports cotton, woollen, and silk goods, sugar, paper, metals, opium, tobacco, &c., and exports beans, silk, ginseng, skins, and horns. The port is closed four or five months with ice. Pop. 60,000.

New Cumnock. See Cumnock.

New England, the six Eastern States of the United States of America—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut—embracing an area of 65,000 sq. m. The people, distinctively known as Yankees, are celebrated for industry and enterprise. The joint pop. is now about 6,500,000.

New'ent, an old market-town 8 miles NW. of Gloucester. Pop. of parish, 2500.

Newera Elia, better Nuwara Eliya, the sanatorium of Ceylon, near Mt. Pedrotallagalla, on a plain 6240 feet above the sea. Pop. 6000.

New Forest, a triangular district of south-west Hampshire, 9 miles SW. of Southampton, bounded by the river Avon, the Solent and English Channel, and Southampton Water. It measures 14 by 16 miles, and has an area of 144 sq. m., or 92,365 acres, of which, however, only 64,232 belong to the crown demesnes. The name dates from 1079, when the Conqueror here made a 'mickle deer-frith,' and cleared away several hamlets. This afforestation, enforced by the savage 'Forest laws,' was regarded as an act of the greatest cruelty; and the violent deaths here of two of his sons, Richard and William Rufus, were looked on as special judgments. The deer were removed under an act of parliament (1851); and under another of 1877 the New Forest now is managed by the court of Verderers as a public pleasure-ground and cattle-farm. Enclosed plantations occupy one-fourth of the entire area, the rest being open woodland, bog, and heath. The chief trees are oaks and beech. The former once supplied timber for the navy; the beech-mast still feeds large herds of swine. There is also a herd of small, rough-coated ponies. The hollies, the rhododendrons, and therewith the general absence of underwood, give a beautiful park-like aspect to the forest, within which or on whose verge are Lyndhurst, Beaulieu, and Lymington.

See Gilpin's *Forest Scenery* (ed. by Heath, 1879); Blackmore's *Cradock Nowell* (1866); and J. R. Wise's *New Forest* (1863; 4th or 'Artist's ed.,' 1883).

Newfoundland (*New'fundland'*), a British island colony in North America, not yet incorporated with the Dominion of Canada, lies at the mouth of the Gulf of St Lawrence, separated from

Labrador on the north by the Straits of Belle Isle (q.v., 11 miles broad). It is 370 miles in length and 290 miles in breadth, and has an area of 40,200 sq. m. Pop. (1874) 168,958; (1911) 242,619. By the Anglo-French agreement of 1904, the French withdrew their troublesome claim to certain exclusive rights 'on the French Shore.' In 1910 the fisheries dispute with the United States was settled by arbitration; the award upholding most of the British claims. The island presents a wild and sterile appearance. The mountains in the Avalon Peninsula to the SE. (connected with the rest of the island by an isthmus only 3 miles in width) rise to over 2000 feet. The number of the lakes and 'ponds' is remarkable, and about one-third of the whole surface is covered with fresh water. The coast-line is everywhere deeply indented with excellent harbours. There is considerable cultivation along the seaboard of the settled districts, but the best land and timber are in the river-valleys and upon the west coast. There are great wood-pulp works at Grand Falls and elsewhere. Potatoes, turnips, hay, carrots, clover, barley, and oats are cultivated with success. The chief seat of copper-mining is around the shore of Notre Dame Bay. Gold has been found. Rich deposits of lead ore exist. Gypsum, marble, and roofing-slate are found in abundance. Coal and iron exist side by side near the west coast. Cod, herring, and salmon are the most important fish. The annual value of the cod-fishery, lobster-canning, and other fish products is about £2,000,000; seal-fishing is also important. Large wood-pulp and paper mills have been established recently. There are about 800 miles of railway.

Newfoundland was discovered in 1497 by John Cabot, and visited by the Portuguese Cortereal in 1500; by 1578, 400 vessels, 50 of them English, were engaged in the fisheries here. In 1583 Sir Humphrey Gilbert took possession of the island for Queen Elizabeth; in 1621 Sir George Calvert (afterwards Lord Baltimore) settled in the Avalon peninsula. In 1713 the island was ceded to Britain, while the French retained the right, extended in 1783, to catch and dry fish on a defined part of the coast. The government, established in 1855, consists of the governor, an executive council of 7 members, a legislative council of 15 (appointed by the crown), and a general assembly of 36 (elected). The E. coast of Labrador Peninsula politically forms part of Newfoundland. See works by Auspach (1827), Little (1855), Fraser Rae (1881), Murray, Howley, Harvey, Prowse, Smith, Millais, Rogers, M‘Grath (1911).

New Galloway, a royal (till 1885 also parliamentary) burgh of Kirkcudbrightshire, 25 miles W. of Dumfries. Close by was born Mr S. R. Crockett, the novelist. Pop. 350.

New Granada. See Colombia.

New Guinea, the largest island next after the Australian continent, from which it is separated by the shallow island-studded Torres Strait, 80 to 90 miles wide at its narrowest part. The two regions at one time formed continuous land, and an upheaval of less than sixty fathoms would again unite them. Elsewhere the mainland is washed by deep waters ranging from 500 to 1300 fathoms. The island stretches 1500 miles NW. and SE. from Cape Goede Hoop, just south of the equator, to South Cape; its width varies from under 20 miles to 480 miles at 141° E. long. It forms a large central mass from which two peninsulas project south-east and north-west, and has a total area roughly estimated at 320,000 sq. m., or six times as large as England. It is essentially mountainous, being traversed by lofty ranges, rising in some places 2000 or 3000 feet above the snow-line. These ranges develop in the broader central parts two or more parallel chains with a general south-easterly trend. Thus, the Arfak Hills of the north-west peninsula (10,000 feet) are continued in the central region by the Charles-Louis range (4000–9000 feet) and the Nassau (Snowy) range, with peaks over 15,000 feet. The northern coast-range is known as the Finisterre Mountains (11,500 feet). Between these two chains run the Bismarck and Krätke ranges (10,000 feet). All these mountain-ranges converge in the south-east peninsula in a single lofty chain which traverses the whole of British New Guinea, the various sections of which take the names of the Albert Victor, Yule, Owen Stanley, and Lorne ranges. The prevailing formations appear to be very old plutonic and sedimentary rocks. There are deposits of coal, gold, and copper. Earthquakes are frequent, but no active volcanoes appear to exist, although there are several recent craters. The three largest rivers appear to be the Amberno (Mamberan, or 'Great River') in Dutch, the Empress Augusta in German, and the Fly in British territory. In the rainy season the Empress Augusta is navigable for many miles by large vessels; the Markham also gives access to the interior. The Fly, discovered in 1845 by Blackwood, was ascended in a steam-launch in 1889 for over 600 miles by Sir W. Macgregor. The tides ascend for about 150 miles. Among other great rivers are the Bamu, Turama, Kikor (or Philp), and Purari, all of which have their deltas about the head of the Gulf of Papua. The east side of that gulf is joined by other navigable streams from the Owen Stanley range.

The whole of New Guinea lies within the track of the south-east trade-winds, followed by the north-west monsoons, whose rain-bearing clouds are condensed on the cold alpine slopes of the island. The consequent large rain or snow fall, combined with an average high temperature of from 85° to 90° F., results in a hot, moist climate on all the low-lying coast-lands and fluvial valleys—hence fever is endemic. But some of the uplands beyond the fever zone may be found adapted for the establishment of health-resorts, such as that above Port Moresby. New Guinea is almost everywhere clothed with a rich and highly diversified flora. Sir W. Macgregor's party in 1889, after passing successively through the domains of tropical plants, such as the cocoa-nut, sago, banana, mango, taro, and sugar-cane, and of such temperate or sub-tropical growths as the cedar, oak, fig, acacia, pine, and tree-fern, were gladdened on the higher slopes by the sight of the wild strawberry, forget-me-not, daisy, buttercup, and other familiar British plants; while towards the summits these were succeeded by a true alpine flora, in which Himalayan, Bornean, New Zealand, and sub-antarctic forms were all numerously represented. In New Guinea the Asiatic and Malayan floras are far more richly represented than the Australian. On the other hand, the New Guinea fauna is closely related to that of Australia, as is seen in the almost total absence of placental mammals, and the presence of over thirty species of marsupials (such as the cuscus and kangaroo) and the bower-bird. The spiny ant-eater is allied to the Australian echidna, and like it oviparous. Of the bird of Paradise, a typical New Guinea bird, many varieties occur, and many gorgeous parrots, cockatoos, pigeons, &c. Reptiles are numerous. Between the Australians and Papuans, who form the great bulk of the New Guinea population, there is little in common except the dark colour, considerably darker, however, in the latter than in the former. But the New Guinea natives seem to combine at least four ethnical elements : *Papuan* proper, diffused over the whole region ; *Negrito ; Papuo-Melanesian ;* and *Malay.* A new pygmy race (mainly Negrito) was discovered in the Dutch territory in 1912. Cannibalism still occurs ; some tribes are predatory ; many others are peaceful, industrious, and keen traders, displaying skill in pottery, wood-carving, and husbandry.

New Guinea appears to have been first sighted by D'Abrea in 1511 ; it received its present name in 1546 from Retez (Roda), who was struck by the resemblance of its inhabitants to those of the Guinea coast. In 1793 the East India Company occupied the island of Manassari in Geelvink Bay. In 1848 the Dutch proclaimed their sovereignty over the western half of the island as far as 141° E. long., and this meridian was accordingly taken as the western boundary of the eastern half in 1884, when that section was divided between Great Britain and Germany. The boundary between the northern or German and the southern or British division approximates to the main water-parting. The areas and populations of the three territories are thus roughly estimated :

	Area in sq. m.	Population.
Dutch New Guinea	151,000	200,000
British „	90,000	350,000
German „	70,000	110,000
Total	311,000	660,000

In the Dutch section Merauke is now the administrative centre. German New Guinea, officially known as Kaiser Wilhelm's Land, is a protectorate administered from the Bismarck Archipelago, and yields for export tobacco, areca, sago, bamboo, ebony, and other woods. British New Guinea, which includes the D'Entrecasteaux and Louisiade Archipelagoes, was administered as a protectorate till 1888, when the sovereignty of Britain was proclaimed. It was made over in 1906 to the Australian Commonwealth, which now has to provide £25,000 annually for its administration. The territory is officially called Papua, the chief station being Port Moresby. Revenue does not yet cover expenditure ; but exports, chiefly gold, pearl-shells, bêche-de-mer, and copra, rose in 1907–10 from £50,000 to £100,000 a year.

See, besides A. R. Wallace's *Malay Archipelago* (1869 ; new ed. 1894) and A. H. Keane's *Eastern Geography* (1887), works by D'Albertis (1881), Chalmers and Gill (1885 and 1887), Guillemard (1887), J. P. Thomson (1892), Macgregor (1896–97), Krieger (1900), Grimshaw (1910), and Wollaston (1912) ; and for *Papua or British New Guinea,* J. H. P. Murray (1912).

New Hampshire, the 'Granite State,' the most northerly of the thirteen original United States of North America, lies between the province of Quebec, Maine and (for 18 miles) the Atlantic Ocean, Massachusetts, and the *right* bank of the Connecticut River. Area, 9305 sq. m.—a fourth larger than Wales. The average elevation of the state is about 1200 feet, the highest point being Mount Washington (6293 feet), in the White Mountains ; among the other peaks over 5000 feet high are those bearing the names of the successive presidents, Adams, Jefferson, Madison, and Monroe. The largest lake is Winnipiseogee (72 sq. m.) ; the principal rivers are the Connecticut, Merrimac, and Piscataqua. From Dover Point to its mouth the Piscataqua is about half a mile wide ; and the volume and swiftness of its current at ebb-tide prevent the freezing of the water in Portsmouth harbour during the coldest winters. The Merrimac is said to turn more spindles and propel more shuttles than any other river in the world. The mean annual temperature at Concord is 46° F. There are still over a million acres of forest in the state. Of late New Hampshire has become very popular as a summer-resort, and the farmers, who owing to the rough and sterile soil could not compete in the great markets with those of the West, now find a new and important market brought to their very doors. But manufacturing is the leading industry in New Hampshire, the chief centres being Manchester (the largest city), Nashua, and Dover. Dartmouth college was founded in 1769. The earliest settlements were made in 1623 near Dover and Portsmouth. In 1641–79, 1689–92, and 1699–1741 New Hampshire was joined to the Massachusetts colony, but during the intervening dates and until 1775 it was under royal governors of its own. A provisional government was formed in 1776, a state constitution adopted in 1784 ; and New Hampshire was the ninth state (1788) to ratify the national constitution. Among the eminent men born here have been President Pierce, Daniel Webster, Lewis Cass, Salmon P. Chase, and Horace Greeley. Pop. (1840) 284,574 ; (1880) 346,991 ; (1910) 430,572.

New Hanover, one of the Bismarck Archipelago, lying off the north-east coast of New Guinea, with an area of 570 sq. m.

New Harmony, a village (pop. 1200) of Indiana, 28 miles by rail NW. of Evansville, was first settled in 1815 by a German community of religious socialists, called Harmonists. In 1824 the village was purchased by Robert Owen for his community, which failed after three years.

Newhaven, a Sussex seaport, at the mouth of the Ouse, 8½ miles E. of Brighton and 56 S. of London, noted for its steamboat traffic, particularly to Dieppe (5½ hours). It has a large fort (1864–69) and a little Norman 12th-century church, with an east tower and small semicircular apse. Pop. 6700.

Newhaven, a fishing-village of Midlothian, on the south shore of the Firth of Forth, 1 mile WNW. of Leith, and 2 miles N. of Edinburgh. Dating from about 1490, it has a tidal harbour, reconstructed in 1876–77 at a cost of £10,000, and is famous for its fish dinners and fishwives. It is included in the burgh of Leith.

New Haven, the chief city and seaport of Connecticut, and capital of New Haven county, at the head of New Haven Bay, 4 miles from Long Island Sound, and 73 miles by rail ENE. of New York. Its broad streets are shaded with elms, and the public squares, parks, and gardens, with its handsome public and private edifices, make it one of the most beautiful of American cities. It has since 1718 been the seat of Yale College, founded in 1701 at Saybrook, and having over 325 professors and lecturers, 3000 students, and libraries of 380,000 volumes. New Haven also contains the Sheffield scientific school, and the Hopkins grammar-school (1660). The harbour has a jetty and a breakwater surmounted by a lighthouse, and the port has a large coasting trade. But New Haven is of more consequence as a manufacturing town, employing many thousands of hands in its large works, and producing hardware, wire, locks, clocks, cutlery, firearms, corsets, india-rubber goods, carriages, furniture, paper, matches, musical instruments, &c. New

Haven was settled in 1638 by a company from London, and the colony was not united to that of Connecticut until 1662; and till 1873 it was recognised as, jointly with Hartford, the capital of the state. It was incorporated as a town about 1665, and chartered as a city in 1784. Pop. (1850) 22,529; (1880) 62,882; (1910) 133,605.

New Heb'rides, a chain of islands in the Western Pacific, extending NNW. to SSE., and lying W. of Fiji and NE. of New Caledonia. There are in all some thirty islands (area, 5110 sq. m.), of which twenty are inhabited, the people, mostly of the Melanesian race, numbering about 70,000. There are active volcanoes, but the islands rest upon a coral foundation. The larger islands are Espiritu Santo (70 miles long by 40 wide), Mallicolo, Ambrym (in eruption in 1913), Efate or Sandwich, Erromango, Tanna, Aneityum, Epi, Maiwo (Aurora), and Aragh (Pentecost). All are wooded, and some lofty, reaching 3000 feet. They were discovered by the Portuguese Quiros in 1606, and explored by Cook in 1773. The chief exports are copra, maize, timber, and coffee; the imports, clothing, boats, flour, rice, tinned meats, tobacco, beer and wines, and manufactures of wood and metal, &c. There are three Roman Catholic schools in Efate, and one Presbyterian school in Santo. An Anglo-French agreement, signed in 1906, provides for a joint administration of the islands by two high commissioners (French and English), establishes a joint high court, and guards against the interference of any third power. The native pop. is estimated at between 50,000 and 100,000. The white settlers are: French, 417; British, 225.

New Holland, a port on the Humber, opposite Hull, with which it is connected by steam ferry.

New Ireland, now, as part of the German Bismarck Archipelago, called NEU-MECKLENBURG, a long, narrow island in the Pacific, lying NE. of New Guinea. Area, 4900 sq. m.; length, 300 miles; width, 15 miles. The hills rise to 6500 ft.

New Jersey, one of the thirteen original states of the American Union, is bounded by New York, the Hudson River, Staten Island Sound, Raritan Bay, the Atlantic, Delaware Bay, and the Delaware River. Its greatest length is 167 miles; its width from 32 to 59 miles; and its area 7577 sq. m.; it being the smallest of all the states save three, but ranking eighteenth in population. In the north-west are two portions of the Appalachian system. The Blue or Kittatinny Mountains (1400–1800 feet) extend along the Delaware from the Water Gap. The Navesink highlands, south of Sandy Hook, reach a height of 282 feet, and support two lighthouses. The central portion of the state is generally level and fertile; the southern part is in large measure sandy, covered with pine-woods, and marshy near the coast. The state is abundantly watered; its chief rivers, the Passaic, Raritan, Little and Great Egg Harbor, flow south-east into bays. The coast from Sandy Hook to Cape May is generally protected by peninsular or island beaches. About 60 per cent. of the total land area is included in farms. The chief products—mainly agricultural—are maize, oats, wheat, rye, hay, potatoes and sweet potatoes, cattle, butter, and milk. The leading mineral products are iron ore, limestone, zinc, and slate. Glass, pottery, machinery, leather, silk, and sugar are the chief manufactures. New Jersey has two canals, and some fifty railroads, with 3000 miles of length. Its south-west portion has Philadelphia for a market; its north-east section, including its two largest towns, is a suburb of New York. Its coast from Navesink to Squan is covered with villas, cottages, and hotels. Cape May, Long Branch, and Atlantic City are noted seaside resorts. Asbury Park, Ocean Grove, Seabright, &c. are growing places, crowded in summer. Newark and Jersey City are by far the largest cities; next come Paterson, Camden, Hoboken, Trenton, Elizabeth, New Brunswick, and Orange. Pop. (1800) 211,149; (1840) 373,306; (1880) 1,131,116; (1910) 2,537,167. In 1617 the Dutch settled at Bergen, near New York; in 1623 Cornelius May ascended the Delaware, and built a fort four miles below the site of Camden. In 1664 the territory was granted by Charles II. to the Duke of York. See the History by Raum (1880).

New Lanark. See LANARK.

New London, a port of entry of Connecticut, is on the right bank of the river Thames, 3 miles from Long Island Sound, 51 by rail E. of New Haven, and 126 NNE. of New York. The manufactures include woollens, sewing-silk, agricultural machinery, hardware, and crackers (*Anglicé*, biscuits); fruit-canning also is carried on. The harbour (30 feet deep) is one of the best in the States. On the left bank of the river is a U. S. navy yard. New London was settled in 1645, and in 1781 was burned by Benedict Arnold. Pop. 20,000.

Newlyn, a Cornish fishing-village and artists' headquarters, on Mount's Bay, 2 miles SW. of Penzance.

Newmarket, the 'racing capital of England,' lies on the border of Suffolk and Cambridgeshire, 14 miles ENE. of Cambridge and 69 NNE. of London. Twice almost destroyed by fire, in 1683 and 1700, it chiefly consists of one long street, and contains an unusual number of hotels and fine private houses, belonging to the great patrons of the turf. Principal edifices are the Jockey Club (1773); the adjoining Subscription Rooms (1844); the Proprietary Club (1882); the Rous Memorial Hospital (1883); with almshouses for eight jockeys and trainers or their widows; St Mary's Church, Perpendicular in style; and All Saints (1877). The town owes its prosperity to its horseraces, as old at least as 1605; and nearly half the male population are jockeys, trainers, or stablemen (Holcroft the dramatist was once one of their number). The race-ground, on Newmarket Heath, to the west, which is traversed by the Devil's Dyke, is owned partly by the Jockey Club, partly by the Duke of Rutland, and, with its soft elastic turf, is one of the very finest in the world. Of its ten courses, the longest is 4¼ miles in circuit. The training-ground bears a like character for excellence; and 400 horses are constantly in training. There are seven annual meetings, the principal events being the Two Thousand at Easter and the Cesarewitch in October. Pop. (1851) 3356; (1911) 10,484. See J. P. Hoare's *History of Newmarket* (3 vols. 1886).

Newmarket, a town of County Cork, 8 miles NW. of Kanturk station. Pop. 900.

Newmarket-on-Fergus, a village of County Clare, 12 miles SE. of Ennis. Pop. 500.

New Mexico, a state in the SW. of the United States, is bounded by Colorado, Oklahoma, Texas, Mexico, and Arizona. The area is 122,580 sq. m.—larger than that of Great Britain and Ireland—and the pop. (1880) 119,565; (1910) 327,301. The surface of New Mexico belongs to the great plateau upon which rests the Rocky Mountain system. From an altitude of 6000 to

6500 feet in the north it descends gradually to about 4000 feet along the Mexican border, and sinks to 3000 or 3500 in the Llano Estacado of the south-east. Except in the east the whole region is traversed by broken ranges of mountains having in general a north and south trend. In the northern central part the Santa Fé, Las Vegas, and Taos ranges form part of the main axis of the Rocky Mountains, with peaks over 12,000 feet high. Farther south, and east of the Rio Grande, are numerous broken ranges; and west of the Rio Grande the Sierra Madre rises above the level of the *mesa* (plateau). These mountains and the intervening *mesas* are cut by deep cañons. Among the mountains, especially in the north-east, are many 'parks' noted for their beauty and fertile soils. The precious metals are found in almost all parts of the territory. Some of the mines were rudely worked by the early Spaniards, who compelled the Pueblos to labour like slaves. Copper and iron occur in valuable deposits, and near Santa Fé are the famous turquoise mines. There are also fields of both bituminous and anthracite coal. Mineral and hot springs are numerous. The great mountain-divide causes the drainage of New Mexico to flow south to the Gulf of Mexico, and west to the Pacific Ocean. The Rio Grande traverses the central part of the territory and receives many tributaries. The Rio Pecos which joins it in Texas drains the south-eastern part. In the north-east are streams which unite to form the Canadian River, and in the west are the headwaters of the San Juan, Little Colorado, and Gila, all affluents of the Colorado. In the river-valleys the soil is fertile and produces excellent crops; and many acres in other parts are being successfully cultivated by irrigation. The climate is healthful, and on the whole remarkably uniform, and the atmosphere is very pure and dry. There are extensive forests on the mountains, and in the hilly regions of the western part of the territory, and on the pastoral plains nutritious grasses which support great numbers of cattle and sheep. Stock-raising is a leading industry; the herds need no housing in the winter.

After the Mexican war, part of the territory was acquired by the United States in 1848; additions were made by a later purchase from Mexico, and by a cession from Texas. The bulk of the pop. is no longer Mexican, or of Mexican descent, but Anglo-Saxon; and there are 18,000 Indians. The territory when originally organised in 1850 included Arizona and parts of Colorado and California. The scheme for its incorporation in 1906 with Arizona (then to become a state of the Union) was successfully opposed; but it became a separate state in 1911. The principal towns are Santa Fé (the capital), Albuquerque, Las Vegas, Fernandez de Taos, and Socorro.

New Mills, a town of Derbyshire, on the Goyt, 8¼ miles ESE. of Stockport. It has manufactures of calico, cotton band, iron, &c. Population, 9000.

Newmilns, a police-burgh of Ayrshire, on the Irvine, 7½ miles E. by S. of Kilmarnock. It manufactures lace and muslins. Pop. 4800.

Newnham, a town on the Severn, 11 miles SW. of Gloucester. Pop. 1000.

New Orleans (*Or'lee-anz;* but often *Or-leens'*), the chief city of Louisiana, and a great port and mart, is situated on both sides of the Mississippi River—the greater portion on the east bank—107 miles from its mouth, and 1190 miles SW. of New York. The city proper has a river frontage of 13 miles, and its western district, 'Algiers,' of 3 miles. The Mississippi makes two bends here, whence the city was called 'The Crescent City,' but it is now shaped like the letter S. The river is from 600 to 1000 yards wide, and 60 to 240 feet deep. The bar at its mouth was removed in 1874–79 by the Eads jetties in South Pass, and vessels of 30 feet now easily reach New Orleans. The city is the second in the United States for exports; next to Liverpool it is the greatest cotton market of the world. It is the terminus of three canals, and of six large railroads and three local lines, while thirty lines of steamships connect it with other American and foreign ports. Since 1875 it has made great progress in manufactures, particularly in cotton goods, cotton-seed oil, machinery, lumber, furniture, fertilisers, sugar-refining, rice-milling, beer, cigars, &c. The site is perfectly flat, and lies from 3 to 6 feet below the level of the Mississippi at high-water, being protected from overflow by levees or dykes of earth. Similar levees in the rear keep out the waters of Lake Pontchartrain. The soil is saturated with water, and cellars are impossible. Hence also in its cemeteries the dead are buried in mounds above the level of the ground. The climate is warm and damp, the mean temperature for the year being 69° F. The summer is tempered by winds from the Gulf, and is not oppressively warm. On account of its situation, the city is badly drained.

The imposing custom-house of granite cost $4,500,000; the cathedral of St Louis (1794) is a good sample of Creole-Spanish architecture. The archiepiscopal palace (1737) is the oldest building. Other noteworthy structures are the cotton exchange, U. S. mint, St Charles Hotel, Christ and St Patrick's churches, Tulane University (known as the University of Louisiana from 1834 to 1883), the affiliated Sophie Newcomb Memorial College (1887) for the higher education of girls, and the Jesuit College of the Immaculate Conception. The Howard Memorial (1888), Tulane, and Louisiana state libraries, all free, contain together 120,000 volumes. The Charity Hospital (1784) is the largest institution of its kind in the States, with accommodation for 800 to 1000 persons. There are several parks little improved, but with monuments to Jackson, Lee, Franklin, and others.

The site of New Orleans was first visited in 1699 by Bienville, who in 1718 laid the foundations of the city, and in 1726 made it the capital. In 1763 it was ceded to Spain by France, with the rest of Louisiana; but when in 1765 the Spanish governor attempted to take possession, he was driven out, and the people established a government of their own till 1769, when the Spaniards occupied it. It was ceded to France in 1802, and transferred to the United States a few days later. Incorporated as a city in 1804, it was divided in 1836–52 into three separate municipalities, in consequence of the jealousies between the Creoles and the Americans. Other outstanding events have been the defeat of the British by Andrew Jackson in 1815; the capture in 1862 by the Federal fleet; serious political troubles with fighting in 1874 and 1877; and the lynching in 1891 of 11 Italian *maffiosi*. In 1880 the capital of Louisiana was removed from New Orleans to Baton Rouge. Pop. (1802) 10,508; (1840) 102,193; (1880) 216,190; (1910) 339,075—very cosmopolitan.

New Plymouth, the chief town of the provincial district of Taranaki, New Zealand, 220 miles NW. of Wellington by rail. Two miles off is an extensive harbour. Pop. 5200.

Newport, (1) the capital of the Isle of Wight, on the navigable Medina, near the centre of the island, 4½ miles S. of Cowes and 10 SW. of Ryde. The church, rebuilt in 1854–56 on the site of one nearly 700 years old, is a fine Decorated edifice, and contains Marochetti's beautiful monument, erected by Queen Victoria in memory of the Princess Elizabeth (died at Carisbrooke Castle in 1650). Newport besides has a town-hall (1810); a free grammar-school (1612), the scene in 1648 of the fruitless negotiations between the parliament and Charles I.; a girls' endowed school (1761); a diocesan school (1860); and a literary institute and museum. To the north-west are a reformatory (1838) and barracks (1798). A municipal borough, Newport returned two members till 1867, and then one till 1885. Pop. (1851) 8047; (1911) 11,154.—(2) A thriving town of Monmouthshire, and a parliamentary, municipal, and county borough (the first conjointly with Monmouth and Usk), is seated on the river Usk, about 4 miles from its mouth, 24 miles SSW. of Monmouth and 145 W. of London. A principal outlet for great collieries and iron and steel works, it has greatly increased its shipping trade and its dock accommodation, which covers more than 130 acres. Amongst its public buildings are the town-hall (1885), erected at a cost of £30,000, and St Woollos' Church, partly Norman and partly Perpendicular. Newport manufactures india-rubber, gutta-percha, and railway and telegraph plant and wagons, and has brass and iron foundries, breweries, potteries. In 1839 the town was the centre of a Chartist outbreak. Pop. (1801) 1087; (1881) 38,427; (1911) 83,691.—(3) A Shropshire urban district, on the Shrewsbury Canal, 11 miles WSW. of Stafford. Chartered by Henry I., and burned in 1665, it has a 15th-century church, a grammar-school (1656), and manufactures of machinery and agricultural implements. Population, 3250.—(4) A town of Pembrokeshire, on Newport Bay, 6 miles E. by N. of Fishguard. Pop. 1100.

Newport, a town of Fife, on the Firth of Tay, 1½ mile by water SSE. of Dundee. It has a small harbour designed by Telford (1822), and municipal buildings (1890). Pop. 3700.

Newport, (1) a watering-place of County Mayo, 11 miles NW. of Castlebar. Pop. 470.—(2) A town of Tipperary, on the Mulkear, 11 miles NE. of Limerick. Pop. 600.

Newport, (1) capital of Campbell county, Kentucky, is on the Ohio, opposite Cincinnati, and at the mouth of the Licking River, which separates it from Covington. The city contains large rolling-mills, a foundry, bolt-works, tile-works, and steam-mills. Pop. (1880) 15,693; (1910) 30,309.—(2) Fourth of the cities of Rhode Island, on the west shore of the *island* of Rhode Island, in Narragansett Bay, 5 miles from the ocean, and 69 miles by rail S. by W. of Boston. It has a deep, excellent harbour, defended by Fort Adams, and a torpedo station; also cotton-mills, a brass-foundry, lead and fish-oil works, &c. There are a brick state-house, a custom-house, a city-hall, the Redwood Library, many palatial villas, and large hotels; it is one of the most fashionable watering-places in America. In Touro Park stands the 'Round Tower,' or 'Old Stone Mill,' which suggested Longfellow's 'Skeleton in Armour.' It was settled in 1638 by eighteen adherents of Roger Williams; Bishop Berkeley resided here. Till 1900 it shared with Providence the dignity of capital of the state. Pop. (1880) 15,693; (1890) 19,457; (1910) 27,149.

Newport News, an important seaport of Virginia, on the estuary of the James River, 75 miles SE. of Richmond. Pop. 30,000.

Newport-Pagnell, an urban district of Buckinghamshire, at the influx of the Ousel to the Ouse, 56 miles NNW. of London. The fine parish church was restored in 1858. Pop. 4200.

Newquay, a bathing-resort on the N. coast of Cornwall, 12 miles N. of Truro. Pop. 4400.

New Quay, a watering-place on an inlet of Cardigan Bay, 5 miles SW. of Aberayron. Pop. 1200.

New River, an artificial cut, running 38 miles southward from Chadswell Springs in Hertfordshire into reservoirs at Hornsey and Stoke Newington. It was designed for the water-supply of London, and completed (1609–20) at a cost of £500,000 by Sir Hugh Myddelton, goldsmith, who died poor in 1631. It was in 1904, with the seven other water companies, taken over by the Metropolitan Water Board at a valuation of £5,967,123.

New Rochelle, a town of villas, on Long Island Sound, 17 miles NE. of New York. Pop. 30,000.

New Romney. See ROMNEY.

New Ross, a market-town and river-port of Leinster, on the Barrow, in Wexford, till 1898 partly in Kilkenny, 92 miles S. by W. of Dublin, and 15 NE. of Waterford. The two portions of the town are connected by an iron swing-bridge (1869). Before the Union New Ross—Old Ross lies 5 miles E.—returned two members, and down to 1885 one. Pop. 5500.

Newry, a seaport in County Down, till 1898 partly in Armagh, on the Newry River, 38 miles SSW. of Belfast by rail. A canal connects it with Carlingford Lough and with Lough Neagh. Flax spinning and weaving, with rope and sail making, tanning, and granite-polishing, are the industries. The castle was taken by Edward Bruce in 1318. Newry returns one M.P. Pop. 12,000.

New Shoreham. See SHOREHAM.

New Siberia, a Siberian group of uninhabited islands, rocky and icebound, in the Arctic Ocean, between the mouths of the Lena and Indigirka. The principal are Kotelnoi (the largest), Liakhov, Fadeyeff, and New Siberia.

New South Wales, the oldest colony of Australasia, now a state of the Australian Commonwealth. The name formerly applied to the whole of the eastern part of Australia; but since the delimitation of the other 'colonies' New South Wales, lying between Queensland, Victoria, and South Australia, has an area of 310,700 sq. m., five times the size of England. Of the Australian states it is fourth in area, and in 1911 first in population. A series of mountain-chains, 20 to 100 miles distant from the sea, extend southward from near Cape York. The southernmost are the Australian Alps, running into Victoria, which culminate in Mounts Townsend (7350 feet) and Kosciusko (7308 feet). Northward are the Blue Mountains, west of Sydney, with peaks 4000 feet, and containing the Jenolan Caves (q.v.). Liverpool Range is more northerly; and the New England hills, north-east, rise 5000 feet. With the exception of some isolated mountains, the region to the west consists of vast plains, up to the Barrier Ranges near South Australia. The mountains give birth to short and rapid streams toward the sea, but long and sluggish ones westward. The Hawkesbury or Nepean, Hunter, Clarence, Shoalhaven, and Macleay are eastern. The Lachlan, 700 miles long, runs into the Murrumbidgee, which flows 1350 miles before falling into the Murray. The Murray, after 1100 miles on the New South Wales border, passes into South Australia. The Darling, rising in Queensland, has more than 1000 miles through the colony before reaching the Murray. The Macquarie and Namoi go northward to the Darling. The dry interior has few streams. There are some fine bays on the coast. The capital, Sydney (q.v.), is on Port Jackson, and is the headquarters of the Australian naval squadron. The sea-coast, with from 40 to 70 inches of rain a year, differs much from the western interior, where in some years as little as 5 inches may fall. But the climate is so uncertain that a region may suffer from fearful drought in one season and floods in another. Cold and ice with heavy snows may be experienced on the lofty plains; but Sydney, 33° 50′ lat., had no snow in thirty years. Though in summer the thermometer may rise to beyond 100°, the nights are generally cool. The eucalyptus-tree prevails in the colony, but acacias also are common, and pines and cedars, as well as palms in the north-east. The fauna consists mainly of marsupials. Birds are of great variety, many of very beautiful plumage, and some of pleasant note. Insects are numerous, and not always welcome. Lizards and snakes may run to a good size, but there are no alligators. Fish, especially in the bays, are plentiful. The Silurian and Devonian formations, with granitic, igneous, and metamorphic rocks, are rich in gold, silver, lead, copper, tin, and other metals. Gold, known in 1823, and first worked in 1851, near Bathurst, is found over an area of 70,000 sq. m. The output to 1912 was close on £60,000,000. Silver abounds in the Barrier Ranges near South Australia; discovered in 1883, the silver area is 100 miles by 12; the Broken Hill product, to 1910, amounting to about £70,000,000. Copper extends over 8000 sq. m. Tin, lead (chiefly from silver-mines), antimony, manganese, bismuth, &c. are mined. Iron is abundant, but not profitable owing to the cost of labour. The diamond, emerald, zircon, sapphire, topaz, &c. occur. Asbestos, zinc, mercury, cobalt, alum, graphite, kaolin, and building-stone are also found. Coal, the most valuable mineral, extends over 24,000 sq. m.; in 1911, 8,691,604 tons were raised, value £3,167,165. There is rich kerosene shale in the Blue Mountains.

New South Wales is a great pastoral country, and owns 45,000,000 sheep. The stock was originally imported from Bengal and the Cape; but as their wool was rather hairy, the breed was improved by the introduction of Spanish merinoes. Wool exports exceed 300,000,000 lb. weight annually. While 140,000,000 acres are devoted to flocks and herds, there are little over 3 million acres devoted to culture, of which total 2,128,826 acres are under wheat, and 213,127 acres maize. The principal crops are wheat, maize, barley, oats, potatoes, lucerne, and tobacco, with sugar and wine. The sugar-plantations in the north-east are not so productive as in Queensland; nor are the apple-orchards and potato-furrows equal to those of Tasmania. But all the fruits that thrive in England and Italy grow here. The trade of New South Wales, once a free-trade colony, exceeds that of any of the neighbouring states. From 1893 to 1911 the exports varied from £20,577,673 to £32,144,092, and the imports from £15,801,941 to £27,330,340. The chief exports to Britain are wool, tin, silver ore, copper, tallow, and leather. The imports from Britain are iron goods, clothing, cottons and woollens. Over 3800 miles of railway are in use. The governor is appointed by the Imperial Government. The executive is of 8 ministers; the Upper House or Legislative Council has 54 members; the Lower, or Legislative Assembly, 90 members, receiving £300 a year. The franchise is adult, including females since 1902. The parliament is triennial. In 1901 New South Wales joined with the other Australian colonies in forming the Commonwealth of Australia, and to the Federal parliament it sends 6 senators and 26 members to the House of Representatives. The revenue in 1911–12 was £15,776,816. The public debt, contracted for useful works, was £100,000,000. The military forces (including cadets) comprise about 35,000 men. The pop. (1911), 1,648,448, of whom 790,491 were females, included 4287 aborigines, black and half-caste. The Church of England claims nearly one-half the population, the Roman Catholic about one-fourth. There are technological, industrial, and general museums, picture-galleries, public libraries, schools of arts, and mining schools; and a noble state university, having affiliated colleges, crowns the educational edifice. The colony was established in 1788, under Governor Phillip, with a party of transported prisoners from England. For years the settlement suffered much from want of food. The introduction of free colonists, to whom grants of land were given, promoted pastoral and agricultural pursuits; and the change from despotism to responsible government was gradually made. The cessation of transportation in 1840 was followed by social and political advance; and the gold discovery in 1851 gave a great impetus to industry and prosperity. A great wave of depression in 1893 has been followed by a marked revival of prosperity.

See AUSTRALIA and works there cited; Dilke's *Problems of Greater Britain* (1890); and works on New South Wales by Flanagan (1862), Trollope (1874), Lang (1875), Griffin (1888), Coghlan (1890), and Barton (1890 *et seq.*).

Newstead Abbey, 10 miles NNW. of Nottingham, on the border of Sherwood Forest, was founded for Augustinian Canons by Henry II. in atonement for Becket's murder (1170), and in 1540, after the dissolution, was given to 'Sir John Byron the Little, with the great beard.' His descendant, the poet Lord Byron, made the half-ruinous old place his home in 1808, but sold it in 1818, since which time about £100,000 have been spent on its restoration.

New Sweden. See PENNSYLVANIA.

Newton, (1) capital of Harvey county, Kansas, 134 miles by rail SW. of Topeka, is the centre of a rich coalfield. Pop. 8000.—(2) A city of Massachusetts, 7 miles WSW. of Boston, and almost surrounded by the Charles River, manufacturing cloth, silk, machinery, &c. Pop. 40,000.

Newton-Abbot, an urban district of Devonshire, at the influx of the Lemon to the Teign estuary, 15 miles (by rail 20) S. of Exeter. Ford House has lodged both Charles I. and William of Orange, who here in 1688 was first proclaimed king. The foundation-stone of an agricultural college was laid in 1912. Pop. 13,700.

Newton Heath, a north-eastern ward of the city of Manchester.

Newton-in-Makerfield (otherwise NEWTON-LE-WILLOWS), with its suburb of Earlstown, a thriving town of Lancashire, 16 miles E. of Liverpool and 16 W. of Manchester. An important railway junction, it has grown rapidly, and has printing-works, paper-mills, iron-foundries, a sugarrefinery, brick-fields, and railway-works. On the neighbouring fine racecourse a meeting is held annually in July. At Parkside, ½ mile distant, Mr Huskisson met with the accident which caused his death, at the opening of the railway (1830). Newton returned two M.P.s from 1558 to 1832. Pop. (1801) 1455; (1881) 10,580; (1911) 18,451.

Newton-Stewart, a town of Wigtownshire, near the mouth of the Cree, 50 miles by rail W. of Dumfries. It owes its name to a son of the Earl of Galloway, who obtained a charter making it a burgh of barony in 1677. Its buildings are a fine town-hall (1884) and an endowed school, the Ewart Institute (1864). Pop. 2000.

Newton-upon-Ayr. See Ayr.

Newtown (Welsh *Drefnewydd;* anc. *Llanfair Cedewain*), a town of Montgomeryshire, 13 miles SSW. of Welshpool. It is the centre of the Welsh flannel manufacture, and also produces tweeds, shawls, &c. With Montgomery, &c., it returns one member. Robert Owen was a native. Pop. (with Llanllwchaiarn) 6000.

Newtownards, a town of County Down, 14 miles E. of Belfast by rail. Flax-spinning, muslin weaving and embroidering, and nursery-gardening are industries, and there are large markets. Pop. 9000.

Newtownbarry, a Wexford market-town, 9 miles NW. of Ferns. Pop. 900.

Newtown Hamilton, a market-town, 12 miles SE. of Armagh. Pop. 600.

Newtown St Boswells, a Roxburghshire village, 40½ miles SE. of Edinburgh, on the Tweed, opposite Dryburgh. Pop. 620.

New Westminster, formerly the capital of British Columbia, is on the north bank of the Fraser River, 10 miles from its mouth and 113 miles by rail and steamer NNE. of Victoria, on Vancouver Island. Here are saw-mills and great salmon-canning establishments. Pop. 13,200.

New York, the 'empire state' of the American Union, is the twenty-ninth in area and the first in population. It has a very irregular outline; two-thirds along the shores of Lake Erie, the Niagara River, Lake Ontario, the St Lawrence, and Lake Champlain, and the rest artificial straight lines. Area, 49,170 sq. m., or almost that of England. Long Island is the largest, and Manhattan, containing the most populous part of New York City, the most important of the many islands. The state is traversed by numerous chains of mountains and hills, among which lie beautiful valleys. There is also much rolling land, and there are several extensive plains. The greatest elevations are in the E. and NE., but nearly all the SE. part is hilly or mountainous. From this highland region the land slopes gradually, and declines in a series of terraces, north and west toward Lake Ontario. The most level portions are those bordering that lake and the St Lawrence River. The mountainous region in the east is cut by the gap of the Mohawk River. The narrow valley of this stream, once traversed by a mighty river which drained the great Ontario basin, joins at right angles the deep depression in which are Lake Champlain, Lake George, and the Hudson River. Both of these valleys pass directly through the Appalachian system of mountains, and divide the state into three distinct sections. The mountains are also disposed in three groups. The Adirondacks (highest point, Mount Marcy, 5400 feet), in the NE., are completely isolated by the valleys of Lake Champlain and the Mohawk River. South of the Mohawk valley are the Catskills with the Helderberg and Shawangunk Mountains, covering an area of about 500 sq. m. The Shawangunk Mountains are continuous with the Blue or Kittatinny Mountains of Pennsylvania. The Taconic range of New England enters the state still farther south, and passes south-westerly into New Jersey. This range is cut by the Hudson River, and forms the celebrated Highlands. There are extensive iron-mines, deposits of lead, copper, zinc, &c., and abundance of building-stones. The salt-springs, especially those of the Onondaga salt group, are of great value. There are also valuable petroleum springs, and mineral and medicinal springs.

The most important river belonging entirely to the state is the Hudson. The Oswego, draining a chain of central lakes, the Black, and the Genesee are affluents of Lake Ontario; the St Lawrence forms part of the northern boundary; the Niagara connects Lakes Erie and Ontario, and the Delaware, the Susquehanna, and the Alleghany rise within and drain the southern portions of the state. New York lies mainly in the lake region of North America, and claims the eastern part of Lake Erie, one-half of Lake Ontario, and one-half of Lake Champlain. Lake George and the Adirondack lakes are in the NE. The mountains, rivers, lakes, and waterfalls (including Niagara) of New York make it famous for its scenery. Other beautiful falls are the Falls of the Genesee, Trenton Falls, the Kaaterskill Falls in the Catskills, and those of Cohoes, Ticonderoga, and at Watkin's Glen. The average temperature is about 47° F., with a range of over 100°. More than one-half the area is under cultivation. In the lake valleys there are many vineyards; hops and tobacco are crops; near New York and the other large cities market-gardening is profitable. But manufacturing is the leading industry, and in the value of its manufactured products New York is the foremost state of the Union. Moreover, its geographical position and its natural avenues of communication with other parts of the country, together with the system of canals and railroads, make it the leading commercial state. Of several canals the Erie is the most important, and within the state there are over 13,000 miles of railway.

Before the coming of the whites the territory now known as New York was occupied by the Iroquois Indians. Almost simultaneously, in 1609, Samuel Champlain discovered the lake which bears his name, and Henry Hudson explored the Hudson River as far as the present site of Albany. A few years later settlements were made by the Dutch, but they were looked upon as intruders by the English, who in 1664 forced them to surrender their city of New Amsterdam (New York City, q.v.). In the struggle for independence, in the war of 1812, and in the civil war New York played a prominent part. No other state has so many large cities and thriving towns. New York City is the centre of a thickly populated district, which is second only to London in the number of its people and the importance of its commercial interests. The other most important cities are Albany (the capital), Buffalo, Rochester, Syracuse, Troy, Utica, Yonkers, Binghamton, Schenectady, Auburn, Elmira, Oswego, Kingston, Poughkeepsie, Cohoes, Newburgh, Hudson, and Dunkirk. Pop. (1800) 589,051; (1850) 3,097,394; (1880) 5,082,871; (1910) 9,113,614.

New York City, the largest and most important city on the American continent, the second wealthiest on the globe, and, next to London, the most populous in the world. It is situated at the mouth of the Hudson River, which enters the Atlantic Ocean through New York Bay. Previous to 1874 the city only included Manhattan Island, but in that year and in 1895 it was extended; and in 1898 a greater extension took in Kings county, part of Queens county (Long Island), Richmond county (Staten Island), and the towns of East Chester and Pelham. For administrative purposes the whole is now divided into five boroughs—Queens, Brooklyn, Richmond, the Bronx, and Manhattan—and the total area is 309 square miles.

The bar at Sandy Hook, 18 miles south of the city, which divides the Atlantic Ocean from the outer or lower bay, is crossed by two ship-channels, from 21 to 32 feet deep at ebb-tide. The lower bay covers 88 sq. m. The Narrows, through which all large ships pass on their way to the inner harbour, is a strait between Long Island and Staten Island, about a mile in width, and like other approaches is defended by forts. New York's harbour or inner bay covers about 14 sq. m.; it is one of the amplest, safest, and most picturesque on the globe, open all the year round. Bridges span the East River and Harlem River, and there are some thirty steam-ferries. The city is the centre of finance and commerce of the United States. Of the total trade of the States about 46 per cent. passes through New York, and the tonnage of vessels entering the port (1910–11) was 13,428,950, and of the vessels cleared 13,366,893. The annual exports of merchandise amount to about $607,000,000, the imports to over $779,000,000. Much business is also done at the wharves of Brooklyn (q.v.). Liberty Island, in the harbour, about 1¾ mile from the city, contains the statue of Liberty (1886) by Bartholdi. The New York and Brooklyn (q.v.) Suspension Bridge and the new East River Bridge (1896–1904) span the East River.

Old New York is laid out very irregularly. Here the money interests and wholesale traffic are centred; Wall, New, and Broad streets being the great centres of banking and speculative enterprises. The newer part of the city, from 14th Street to the end of the island, northward, is divided into twelve great avenues and several smaller ones, from 75 to 150 feet in width, running north and south. These are crossed at right angles by streets, mostly 60 feet in width, running from river to river. Fifth Avenue, the great modern central thoroughfare, divides the city into eastside and westside. Several of the city's avenues are traversed their full length by elevated electric passenger-railroads. Twenty street blocks measure a mile, and every tenth street is double the usual width, designed for business purposes. Wooden buildings have been interdicted in the lower part of the city. The modern method is to build roomy, tall, fireproof and semi-fireproof structures for apartment-houses and for business purposes, the ascent being by elevators. Most of these are 75 to 100 feet in height, but they may reach fifty-five stories, constructed of steel frames filled in with non-combustible material. Many of them are costly and elegant. Among prominent public edifices are the City Hall, County Court-house, Custom-house, Treasury Building, Tombs (prison), Barge Office, Masonic Temple, Academy of Design, Cooper Union, Post-office, Produce Exchange, Madison Square Garden Hall, University of the City of New York, Lenox Library, Temple Emanuel, Trinity Church, and the Roman Catholic cathedral, besides large, imposing hotels and palatial dwellings and business depôts. Immense retail bazaars and arcades are found on Broadway, Grand Street, 14th, 23d, and 125th Streets, and 3d, 6th, and 8th Avenues.

The city government is under a mayor and board of aldermen; these offices are mostly filled by adopted citizens from Ireland and Germany. New York has a fire-department conducted at an annual expense of $5,000,000, divided into 300 companies with 3000 men. The Croton Aqueduct conveys an ample supply of water from the Croton River and its lakes, a distance of about 40 miles, to the four reservoirs of the city. The New York General Post-office building, erected of granite, at a cost of $6,500,000, was first occupied in 1875. The Battery Green encloses twenty-one acres, and occupies the southern point of Manhattan Island. On its west side is Castle Garden (q.v.), Central Park (1857), comprising 843 acres of beautifully laid out grounds, contains the Egyptian obelisk (1880), and museums of Art and Natural History. Other parks are Riverside, Jerome, Van Cortlandt parks. Nearly 300 newspapers (daily, weekly, and monthly) are published—some in foreign languages. There are three general colleges—Columbia, the University of the City of New York, and the College of the City of New York, besides the Normal College, Union Theological Seminary (Presbyterian), the Episcopal Seminary, &c. Among libraries may be named the Astor (300,000 vols.), Mercantile (250,000), and Columbia College (110,000). The Museum of Art, Museum of Natural History, and Lenox Gallery are free. Noted clubs are the Manhattan, Union, New York, St Nicholas, Knickerbocker, Union League, University, Lotus, Harmonic, and Century.

John Verrazani, a Florentine navigator, was the first European who entered New York Bay, in 1525. In 1614 the Dutch built a fort on Manhattan Island, and in 1623 a permanent settlement was made, named Nieuw Amsterdam. In 1674 Manhattan Island came into the possession of Great Britain, who gave it the name New York, in honour of James, Duke of York. At the Revolution the population was less than that of Philadelphia and Boston. It was evacuated by the forces of Great Britain in 1783, and from 1785 to 1789 was the seat of government of the United States. Pop. (1774) 22,861; (1800) 60,489; (1825) 166,136; (1850) 550,394; (1860) 813,669; (1870) 942,292; (1880) 1,206,599; (1890) 1,515,301; and 'Greater New York' (1910) 4,766,883. See Histories by Lossing (1885), Roosevelt (1891), and Grant Wilson (4 vols. 1891–93); and *Historic New York*, by Misses Goodwin, Royce, and Putnam (1898).

New Zealand, a British dominion (1907) in the South Pacific, comprises three main islands—North Island, South or Middle Island, and Stewart Island, the last being much the smallest—besides a number of islets. The North and South Islands are long and narrow, so that no place is more than 75 miles from the coast. They lie 1200 miles E. of Australia, and stretch 600 miles farther south. The main islands have a length of 1100 miles, and lie between 34° 22′ and 47° 18′ S. lat. and 166° 27′ and 178° 34′ E. long. The total area of the colony is 106,240 sq. m., or about one-eighth less than that of Great Britain and Ireland. Cook Strait, a deep and somewhat stormy passage of 13 miles, separates the North and South Islands. Foveaux Strait (15 miles) divides the South Island from Stewart Island. In its northern half the North Island is deeply indented by the sea, and contains many excellent harbours; the southern half has but one harbour, that of Wellington in the SW. corner. The coast of the South Island is little broken except in the mountainous north-east and south-west corners; but the volcanic projections of Banks and Otago peninsulas supply commodious harbours. The great ports are Auckland, Napier, and Wellington in the North Island, and Lyttelton, Dunedin (Port Chalmers), and Bluff Harbour in the South Island. New Zealand is composed of rocks of all geological ages, and the chief mountain-chains are of great antiquity. Both of the great islands are traversed by a great mountain-chain running NE. and SW., which practically divides them into an eastern and a western side, between which traffic is mainly carried on by sea. Resting on the main chain of the North Island on its west side lies a vast triangular plateau. On this stand up two extinct volcanoes—the majestic cone of Mount Egmont, near the west coast, and the massive Ruapehu (9008 feet) in the centre, with the active cone of Tongariro hard by. In this plateau the chief rivers of the North Island take their rise. The Waikato, the largest and longest, passes through the beautiful Lake Taupo, and at length flows out on the west coast. The better lands of the South Island are now mostly taken up, but in the North Island there remain vast tracts of excellent land waiting to be cleared. Much of it belongs to the natives. Two-thirds of the South Island is covered by the broad and lofty chain of the Southern Alps, and its eastern and southern offshoots. It culminates in Mount Cook (12,349 feet), mantled by glaciers of greater magnitude than any in the Alps of Europe. This elevated region is penetrated by the great valleys of the numerous rivers flowing away to the east and south. The principal rivers are the Buller, Waimakariri, Waitaki, Clutha, and Waiau. The vast Canterbury plains skirt the east coast, and the Southlands plain lies between the mountains of Otago and the south coast. The west coast consists of a narrow belt of low land clothed with impenetrable forest, save where miners and farming settlers have made clearings, and where the broad river-beds come down to the sea. In the North Island much of the finest land is covered by forests of tropical luxuriance, which ascend the mountains to a height of 4000 feet, but the greater part of the South Island is very scantily supplied with timber, and mountains and lowlands alike are open and well grassed. The climate is one of the best and healthiest in the world. Owing to the great length of the islands it presents considerable variety, and the direction of the mountain-chains increases the difference due to latitude alone. The average temperature is remarkably equable, and the air is singularly fresh, being constantly agitated by winds (sometimes chilly and boisterous). The average daily range of temperature is 20°. The average annual temperature of the North Island is 7° higher than that of London, and of the South Island 4°. The great peninsula north of Manukau Harbour enjoys a humid semi-tropical climate, and is the home of the kauri pine. Near the western seaboard the climate is more equable and much moister than on the long eastern and northern slopes. More rain falls than in England, and the weather is generally more changeable, but there are fewer wet days. The country is everywhere well watered, and prolonged droughts are unknown. Snow seldom falls even in the south. The mildness of the winter allows cattle and horses to remain in the fields without shelter. For variety, picturesqueness, and wild grandeur, the scenery of New Zealand is unrivalled in the southern hemisphere. In the North Island is the wonderland of the volcanic belt, remarkable for its hot lakes and pools, which possess great curative virtue for all rheumatic and skin diseases, its boiling geysers, steaming fumaroles, sulphur-basins, and pumice plains. The exquisite siliceous terraces of Rotomahana are now buried beneath the debris of Mount Tarawera, shattered by the gigantic explosion of June 1886. In the South Island the Central Alps of the Mount Cook district display to the visitor the grandest glaciers in the temperate zones, and splendid clusters of snowy mountain-peaks. Farther south are the lovely Otago lakes, embosomed in mountains 5000 to 8000 feet high. Near Milford Sound are the famous Sutherland Falls, 1904 feet high.

New Zealand is a group of true oceanic islands. Originally it contained no mammals except two species of bat. The next highest animals were a few small lizards. Among the birds are several parrots, one of which—the mountain kea—has acquired the habit of killing sheep, and several wingless kiwis or apteryxes, the puny surviving relatives of the gigantic but extinct Moas. The Maoris brought dogs with them, and doubtless the native rat also. Cook gave them pigs. The colonists introduced the common domesticated animals of Europe. Many kinds of English birds, and also black swans from Australia have been established in the country. Unfortunately rabbits also have been acclimatised, and become a serious pest, which it costs more than £100,000 a year to keep in check. Fresh-water fishes of many kinds have been introduced with great success. Nearly all the native trees and shrubs are evergreen. The most important plants are the timber-trees. The Phormium or native flax grows wild in great profusion. Ferns of many kinds greatly abound, including numerous tree-ferns. The fruit and other trees of temperate zones thrive admirably. European grasses and trefoils spread with great rapidity, and so do weeds of every kind. Considerable tracts of the Canterbury and the inland plains are shallow and arid, and require irrigation. The principal crops are wheat, oats, barley; of other agricultural produce wool, frozen meat, butter and cheese are the most important.

The chief mineral product is gold, now mainly from quartz-mines. The annual produce, which declined till 1890 (when it was £773,438), increased (1903–11) to about £2,000,000. Silver, lead, copper, antimony, and petroleum are produced in small quantities. The coal raised is about 2,000,000 tons. The manufactures, stimulated by high protective duties, are mainly woollen cloths, wools, hosiery, blankets, soap, candles, leather, biscuits and confectionery, boots and shoes, paper, machinery and implements, apparel, ropes and twine, beer, &c. From 1893 to 1912 the imports rose from £7,000,000 to £20,000,000 a year, and the exports from £9,000,000 to £19,000,000. The imports from Britain to 1911 were between £4,000,000 and £12,000,000; the exports to Britain between £7,000,000 and £19,000,000. The chief exports were in 1911, wool (£6,548,509), frozen meat (£3,386,165), gold (£1,816,989), butter and cheese (£2,743,427), kauri gum (£395,707), flax (£314,835), grain, tallow, sheep, hides, and leather. The imports are mainly clothing and cloth; iron and steel goods; sugar; paper, books, and stationery; spirits, wines, and beer; tea; tobacco and cigars; fruit; and oils. The revenue of the dominion (1893–1912) increased from £4,407,964 to £10,721,387, and always exceeds the expenditure. The debt in 1912 was £82,200,000. There are 2800 miles of railway; and the islands are connected both with Australia and with Canada, and so with the rest of the world, by telegraphs. Elementary education is free, compulsory, and secular. The four university colleges at Auckland, Christchurch, Dunedin, and at Wellington are affiliated to the University of New Zealand, an examining body which grants degrees.

White pop. (1851) 26,707; (1861) 99,022; (1871) 256,260; (1881) 489,933; (1911) 1,008,468, besides 49,844 Maoris (almost all in North Island). In 1906 those born in New Zealand were 606,247; in England 116,560, in Scotland 47,767, in Ireland 42,460, and in Wales 2144. Only 18,856 were foreign subjects—about 2600 Chinese. Of the total, 719,087 were Protestants. Anglicans predominate in Canterbury, Presbyterians in Otago, and there are many Wesleyans. Up to 1876 the North Island was divided into four provinces—Auckland, Hawke Bay, Taranaki, and Wellington; and the South Island into five—Nelson, Marlborough, Canterbury, Westland, and Otago. These are now known as provincial districts, and subdivided into numerous counties. The colony is administered by a governor with a ministry of 8 members, a legislative council of 45 members appointed by the governor, and a legislative assembly of 80 members (four being Maoris elected by natives) elected by adult suffrage, including women. Wellington is the capital (pop. 70,729). Auckland is the largest city (pop. 102,676). The other chief towns are Napier, Wanganui, and New Plymouth in the North Island; and Nelson, Blenheim, Christchurch (80,193), Timaru, Oamaru, Dunedin (64,237), and Invercargill in the South Island. Stewart Island has a sparse population on the north-east coast, and several excellent harbours. The Maori natives belong to the Polynesian race, and are well-built, generous, and warlike; cannibalism was associated with their warfare. They still own large areas of land, on which they raise crops and keep great numbers of sheep, but they are not very industrious. The islands were discovered by Tasman, [and called *Nova Zeelanda*, in 1642, but became known really through Captain Cook. Some trade sprang up early in the 19th century, and the islands became definitely British in 1840; there were wars with the Maoris in 1843 and 1869, and self-government was granted in 1852. See books on New Zealand by Pennefather (1893), Reeves (1898), Scholefield (1909), and Herz (1912); besides the official and other handbooks; and histories by Rusden (1895) and Frank Parsons (Phila. 1904).

Nezhin, or Nizhan, a town in the government of Tchernigov, Russia, on the Oster River, about 80 miles NE. of Kiev. It has a historico-philological institute of high rank, with a library of 60,000 volumes. Tobacco is cultivated in the vicinity, and vegetables and fruit are important products. Pop. 32,100.

Ngami (*Ngah'mee; ng* as in *sing*), Lake, a former South African lake, in NW. Bechuanaland, and situated at the northern extremity of the Kalahari Desert, in 20° 30′ S. lat. and 23° E. long., at an altitude of 2810 feet. When discovered by Livingstone in 1849, it was a lake of about 50 miles long by 10 to 20 miles broad, its chief tributary being the Cubango. It is now only a reed-grown swamp in the dry season.

Ngan-king, one of the interior Chinese ports, capital of the province of Ngan-hwei, opened to foreign commerce in 1897, is situated on the Yang-tsze-kiang, 190 miles SW. of Nanking. Pop. about 40,000.

Niagara (*Nīag'ara*—originally *Neeagah'ra*; 'Thunder of Waters'), a river of North America, which forms part of the boundary between New York state and the province of Ontario. It flows from Lake Erie to Lake Ontario, a course of 36 miles, during which it makes a total descent of 326 feet—about 50 feet in the rapids immediately above the great falls, and nearly 110 feet in the seven miles of rapids below. It encloses several islands, the largest Grand Island, which is nearly 10 miles long. Four miles below this island are the most famous falls in the world. Goat Island divides the cataract into two—the Horseshoe (Canadian) Fall, with a descent of 158 feet, and the American fall, 162 to 169 feet; the width of the former is about 2640 feet, of the latter 1000 feet. The flow of about 15,000,000 cubic feet a minute (nearly nine-tenths passing over the Canadian fall) has been diminished by abstractions—now restricted by law in both countries—for power purposes. The depth of water on the crest of the falls is less than 4 feet, except in a few places, notably at the apex of the Horseshoe Fall, where it is about 20 feet. The limestone edge of both falls is rapidly wearing away in the centre. For seven miles below the falls (to the point, that is, where it has been supposed that the falls originally stood) the river is shut in between perpendicular walls of rock, from 200 to 350 feet high. For some distance below the falls there is still water, the body of water which pours over the precipice sinking, and only coming to the surface again two miles below, where the whirlpool rapids begin; a little lower is the whirlpool, where a sharp turn sends the waters hurling against the Canadian side, and then sweeping round in a great eddy before they find a vent at a right angle with their former course. Just below the cataract the river is crossed by an iron arch bridge for carriages and foot-passengers, and a mile and a half farther down there are two railway bridges—one a cantilever bridge—about 100 yards apart. On both shores the lands bordering on the river, for some distance above and below the falls, are under the immediate control of the respective governments. The 'New York State Park at Niagara Falls' (1885) embraces 115 acres, and the 'Queen Victoria Niagara Falls Park' (1888) about 154 acres. Only in 1890 was the tunnel begun for the utilisation of the water-power of the falls to generate electricity for transmission to more or less distant centres; by 1900 one company alone had usefully applied 40,000 horse-power, and by 1904 the plant on the Canadian side alone represented 675,000 horse-power (partly transmitted to Toronto).—Niagara Falls, a city of New York, is connected by bridges with the Canadian side. Pop. 30,000.—Niagara Falls, Ontario. See Clifton.—Niagara, a summer-resort of Ontario, is situated on Lake Ontario, at the mouth of the Niagara, 15 miles from the falls. Pop. 1300.

Nias (*Nee'as*), a Dutch island, W. of Sumatra. The surface is mountainous, attaining 1970 feet. Area, 1767 sq. m.; pop. 170,000, who grow pepper, rice, coconuts, tobacco, sugar-canes, &c.

Nicæa. See Nice.

Nicaragua (*Nĭkarâh'gwa*), an independent state of Central America, stretching right across the isthmus from the Caribbean Sea to the Pacific, between Costa Rica and Honduras, with an area of 49,200 sq. m. The Central American Cordilleras (4000–5000 ft.) form the backbone of the country. On the west the surface sinks rapidly to a longitudinal depression (110 feet), the southern two-thirds of which are filled by the large lakes of Nicaragua (115 miles long, 45 broad, and 140 feet deep) and Managua (35 miles long, 20 broad, 30 feet deep). This depression is studded with a chain of volcanic cones, mostly quiescent, from 3800 to 6800 feet high. The western districts are the chief seats of the population; there stand the towns Managua (the capital), Leon, Granada, Chinandega, Rivas. Rivers flowing eastward are the Coco or Wanks (350 miles long), the northern boundary; the San Juan (125 miles), which drains Lake Nicaragua and separates Nicaragua from Costa Rica; the Bluefields and the Rio Grande (230 miles). The low coast-belt, called the Mosquito Territory (q.v.), is lined with salt lagoons. The mountain-spurs east of the main chain are rich in minerals—gold, silver, coal, copper, tin, iron, lead, zinc, antimony, quicksilver, marble, &c. The forests include mahogany, rosewood, logwood, fustic, sandalwood, india-rubber, medicinal plants, gums, and dye-woods. The rich soil of the cultivated western region yields maize (the staple food), coffee, cocoa, sugar, cotton, rice, tobacco, indigo, and a great variety of tropical fruits. Of the population of 600,000, one-third are Indians, and one-half mulattoes and negroes. The country is governed by a president (elected for four years), a legislative assembly of eleven members, and a senate of ten. A ship-canal from sea to sea, 170 miles long, by way of the San Juan River and Lake Nicaragua, was begun by a U.S. company in 1889; but, though some authorities held this route preferable on various grounds, the works were soon suspended, and ultimately the Panamá Canal (see PANAMÁ) was taken up by the U.S. government. During the Spanish supremacy (after 1550) Nicaragua was a province of Guatemala. In 1821 it asserted its independence, and its history down to 1865 is a record of war and dissension; there were revolutions in 1893, and an insurrection in 1912. See works by Squier (1852), Belt (1873), Leoy (Paris, 1873), Bancroft (1882), and Bonvallius (Stockholm, 1886).

Nice, or NICÆA, a city of ancient Bithynia, in Asia Minor, situated on the eastern shore of Lake Ascania. The First and Seventh Ecumenical Councils were held here in 325 and 787 A.D.

Nice (*Neece;* Ital. *Nizza*), chief town of the French dep. of Alpes Maritimes, stands on a beautiful well-sheltered site on the coast, 140 miles E. by N. of Marseilles and 110 SW. of Genoa. On the north of the city the hills rise in terraces and shield it from the cold winds; on the south it faces the sea, which tempers the heat in summer. Owing to the advantages of its situation, Nice has for many years been celebrated as a winter-resort for invalids, the number of visitors ranging between 15,000 and 45,000. The mean temperature of winter is 49° F., of summer 72°. Pop. (1872) 42,363; (1911) 142,940. The New Town on the west is the part frequented by foreigners, particularly English (whence its name of 'English town'). Beautiful promenades stretch along the seashore, and are overlooked by villas and hotels. Numerous bridges across the little river Paglione (Paillon) connect the New Town with the Old or Upper Town. This part, with narrow streets, clusters at the foot of a rocky height, the Castle Hill; on the other (east) side of this hill is the harbour, which was enlarged to twice its original size in 1889, and deepened to 25 feet. The Castle Hill is an isolated mass of limestone 318 feet high, crowned by a ruined castle, and laid out in public gardens. The chief public buildings are the cathedral, the Gothic church of Notre Dame, the natural history museum, art gallery, library, observatory, casino, &c. The people manufacture artistic pottery, perfumery, and macaroni, grow flowers and southern fruits, the last of which they preserve, and produce inlaid work in olive-wood. The chief export is olive-oil. The ancient Ligurian town of Nicæa, founded by a colony of Phocæans from Massalia (Marseilles), became subject to Rome in the 2d century B.C. It was in the hands of the Saracens in the 10th century. In 1543 it was pillaged by the Turks. From 1600 onwards it was repeatedly taken by the French; they held it from 1792 to 1814; and in 1860 it was ceded to France by Sardinia (Savoy). Masséna was born near the city, and Garibaldi in it.

Nicholas II. Land, a large mountainous volcanic island with glaciers, north of Cape Chelyuskin, discovered in 1913 by Vilkitski, who explored its NE. coast to 81° N. 96° E.

Nic′obar Islands, a group of twenty islands (area, 684 sq. m.) in the Indian Ocean, south of the Andamans. Twelve are inhabited. The northern islands are low and planted with coconut trees, and the southern mountainous (2000 feet) and covered with timber. The people belong to two races, an indigenous inland tribe, little civilised, and the coast people, 6000 in number, who are of mixed Malay blood. The archipelago was occupied by Denmark 1756–1856. In 1869 it was annexed by Britain. Nankauri, on the island Kamorta, has a good harbour.

Nicome′dia, the capital of ancient Bithynia, situated at the NE. angle of an inlet of the Propontis, was built in 264 B.C. by Nicomedes I. The small town of Ismid now occupies its site.

Nicop′olis, a town of Bulgaria, on the Danube, 56 miles W. of Rustchuk; pop. 8000.

Nicosia, (1) called also LEVKOSIA, the capital of Cyprus, situated near the middle of the northern half of the island, has some manufactures of silk, leather, and cotton. Pop. 16,000.—(2) A city of Sicily, 40 miles NW. of Catania. Pop. 18,000.

Nictheroy, a town of Brazil, the capital of the state of Rio de Janeiro, on the east side of the entrance to the bay, and 5 miles E. of the city of Rio de Janeiro. It has beautiful suburbs. Pop. 35,000.

Nidderdale, the valley of the river Nidd, which rises at the foot of Whernside, in Yorkshire, and flows SE. and E. to the Ouse above York.

Niddry Castle, a Linlithgow ruin, 1 mile SSE. of Winchburgh. Queen Mary fled hither from Lochleven.

Niederwald (*Nee′dervalt*), the western end of the Taunus range, that abuts upon the Rhine opposite Bingen. On a commanding site was erected in 1883 the national memorial of the war of 1870–71—a pedestal, surmounted by a bronze figure of Germania, 34½ feet high. Toothed-railways carry visitors up from Rüdesheim and Assmannshausen at the foot, both noted for their wine.

Niemen (*Nee′men*), a river of W. Russia, whose lower course (70 of its 500 miles) lies within East Prussia, where it is called the Memel, rises S. of Minsk. It is navigable to Grodno; below Tilsit it divides into two branches, which reach the Kurisches Haff each by four mouths.

Nierstein (*Neer′stīne*), a village of Hesse-Darmstadt, on the Rhine, 10 miles SSE. of Mainz, famous for its Rhine wine. Pop. 5000.

Nieuwe Diep, or Willemsoord, a small port of North Holland, 1 mile E. of the Helder (q.v.).

Nieuwveld Mountains. See Cape Colony.

Nièvre (*Nyehvr; y* consonantal), a central dep. of France, occupies a portion of the watershed between the Loire and the Seine. Area, 2632 sq. m.; pop. (1872) 339,917; (1911) 299,312. Arrondissements, Nevers, Château-Chinon, Clamecy, and Cosne; capital, Nevers.

Niger, a river of West Equatorial Africa, whose name first appears in Ptolemy, and may be derived from a native root *gir* or *jur*. The problem as to its course remained almost till the 19th century one of the most perplexed in the whole range of geography—it was an affluent of the Nile; an affluent of the Congo; an independent river terminating in an inland basin; and so on. It was left to Mungo Park and other workers in the service of the African Association (1788) to lay the basis of our present knowledge. The Niger proper (Joliba, Isa, Quorra, &c.) has a total length of 2600 miles, and the area of the entire basin (including that of the Benuë) is estimated at 1,023,280 sq. m. The head-waters are situated in the Samory region, inland from Sierra Leone and Liberia, and are contiguous to the sources of the Senegal. The Tembi and its sister streams soon gather into a good navigable river, which holds a north-easterly course as far as Timbuctoo (q.v.), 2 miles from the river. Beyond this, split into channels, it holds a more easterly direction for 200 miles, and then with its now united forces turns south-east to cut its way through a rocky tract of country, and to pass in succession Say; Bussa, where Park came to his untimely end; Rabba, one of the largest cities on its course; and Egga, where the river turns more to the south. Having received in the Benuë a rival in volume, the united river traverses a series of bold, picturesque hills by a narrow gorge, and begins to break up into one of the most remarkable mangrove-covered deltas in the world. The upper and middle basin of the Niger is under French authority; the lower basin constitutes (British) Nigeria.

Nigeria, since 1900 a British protectorate in West Equatorial Africa, includes all the territories administered till that date by the Royal Niger Company, and the Niger Coast Protectorate. On the east it is bounded by (German) Cameroon north-eastwards to the south-west corner of Lake Tsad; on the west by French Senegal and Niger and the (French) *hinterland* of Dahomey. It includes the whole of the lower basin of the Niger from Ilo downwards, and nearly the whole of its great tributary, the Benuë. Its area is from 400,000 to 500,000 square miles, and the population is estimated to be between 30 and 40 millions. The British United African Company (after 1886 the Royal Niger Company) began operations in 1879, and finally acquired rights over nearly the whole region now called Nigeria. In 1899 the government arranged to take over all the powers and rights of the company on 1st January 1900, on payment of £565,000, and certain royalties on minerals for ninety-nine years. For administrative purposes the protectorate was divided into Northern and Southern Nigeria by a straight line between Lagos and Cameroon; but these divisions were united by the end of 1913. Northern Nigeria is fertile, with great agricultural resources, and fairly healthy. Cotton, indigo, rubber, hides, ivory, and minerals (silver, tin, and lead) are the chief products. The native Haussa race is civilised and industrious. The chief towns are Kano, Yola (capital of Adamawa), Wurno (capital of Sokoto), Gando, Bida, Zungeru, Yakoba, Sokoto, and Zaria, with a reserved port in south Nigeria at the mouth of the Forcados River. There is a military force of about 3000 Haussas of all arms. Southern Nigeria includes the whole of the Coast Protectorate and part of the Niger Protectorate; in 1906 with Lagos (q.v.) it was constituted the colony of Southern Nigeria. Asaba, Benin, and Idda are the chief inland towns; and on the coast, Wari, Barutu, Akassa, Brass, New Calabar, Bonny, Opoba, Old Calabar, and Port Harcourt. The chief products are palm oil and kernels, rubber, ivory, indigo, gums, coffee, and hides. There are railways from Baro to Kano, and from Lagos to Zungeru. See works by Mockler-Ferryman (1902), Falconer (1911), and Morel (1911).

Niigata (*Nee-ee-gah'ta*), a seaport of western Japan, at the mouth of the Shinano River, opened to foreign trade in 1859. Pop. 63,500.

Nijni-Novgorod (*Nidj'nee Nov'gorod;* 'Lower Novgorod'), a great commercial city of Russia, at the confluence of the Oka with the Volga, 274 miles E. of Moscow. The great fair (July—Sept.) still brings buyers and sellers from all climes between Germany and China. During it the resident pop. (92,273 in 1904) is increased fivefold; and the value of the goods sold is not much short of £20,000,000.—The *government* of Nijni-Novgorod has an area of 20,000 sq. m. and a pop. of 2,000,000.

Nijni-Tagilsk (*Nidj'nee Tah-gilsk′; g* hard), a Russian town amid the Ural Mountains, 150 miles E. of Perm by rail, with great platinum, copper, and iron works. Pop. 35,000.

Nikko, a tourist-resort in Japan, 75 miles N. of Tokyo, famous for its scenery and its temples.

Nikolaevsk (*Ni-ko-lah-evsk*), a decayed town of Siberia, 23 m. from the Amur's mouth. Pop. 5000.

Nikolaieff (*Nikolīeff'*), headquarters of the Russian Black Sea fleet, in the government of Kherson, at the confluence of the Ingul with the Bug, and 42 miles from the Black Sea. It also exports grain. Pop. 95,400.

Nikolsburg (*u* as *oo;* Czech *Mikulov*), a town of Moravia, 27 miles S. of Brünn by rail, lies at the foot of hills famous for their rich red wines. In the middle of it, on a rock, stands the castle of the princely Dietrichstein family. Pop. 10,000.

Nikosia. See Nicosia.

Nile, the longest river of Africa, of the greatest interest historically and geographically, and to the ancient Egyptians pre-eminently *the* sacred river, draws its largest supplies of water from the Victoria and Albert Nyanzas. Its furthest head-streams (Shimiyu, Isanga, &c.) flow into the Victoria Nyanza from the south. The Nile leaves Victoria Nyanza at its northern end, pouring over the Ripon Falls, 150 to 170 yards wide but only 12 feet high, and then for 300 miles races between high rocky walls, over rapids and cataracts, at first north-west, then west, until it joins the Albert Nyanza (q.v.) near its north-east corner. About 20 miles from this lake the river leaps down 120 feet into a wild gorge, with high rocky walls. The section between the two Nyanzas is called the Victoria Nile or Somerset River. At its south-western extremity the Albert Nyanza is joined by the river Semliki, which drains the Edward Nyanza. The combined river leaves the northern extremity of the Albert Nyanza as the Bahr-el-Jebel, and from that point flows in a general northerly direction to the Mediterranean. At Lado (5° N. lat.) it enters the plains, and moves thence slowly and sluggishly down to Khartoum, 900 miles to the north. The whole of this stretch is navigable for fairly large river-steamers. In 7½° N. lat., however, the main channel divides into two arms, which flow, at no great distance apart, through a low swampy region. In 9½° N. lat. the Bahr-el-Jebel is met by the Bahr-al-Ghazal from the west, which gathers the waters of many rivers. Sixty miles east of the confluence the river, now called White Nile, receives the Bahr-el-Zeraf, and 30 miles farther east still the Sobat, from the Galla country. Hence the White Nile flows almost due N. to Khartoum without receiving a single tributary. At Khartoum (in 15° 37′ N. lat.) the White Nile, or Bahr-al-Abiad, is joined from the south-east by the Blue Nile, the Bahr-al-Azrak, 950 miles long, from Lake Tana (5658 feet above sea-level) on the Abyssinian plateau. From Khartoum the Nile flows north-north-east, and 200 miles below that city is joined from the right by the Atbara or Black Nile. In its course through the Nubian Desert the great river makes two deep bends, first round by the north, then round by the south, and subsequently resumes its northerly flow. Below Khartoum navigation is rendered extremely dangerous by the cataracts which obstruct the bed of the river, the sixth occurring not far north of Khartoum, the first near Assouan, in Egypt, just above 24° N. lat. The course of the river from Assouan to the sea, its inundations, &c., are described under Egypt (q.v.). The total length of the river cannot be stated precisely; from Victoria Nyanza it is estimated to measure 3400 miles. Irrigation is largely regulated by the great Nile Barrages at Rosetta and Damietta, constructed by French engineers in 1843–61, and practically reconstructed by British engineers in 1886–90 at a cost of £405,000; and by the immense dams at Assouan (completed 1912) and Assiout, at a total cost of nearly £5,000,000.

The ancients had little authentic knowledge of the Nile above Meroe, half-way between Berber and Khartoum. The Emperor Nero began the work of searching for the sources of the Nile by sending two expeditions into Nubia. Ptolemy speaks of two streams issuing from two lakes 6 and 7 degrees south of the equator and uniting in 2° N. lat., and being joined in 12° N. lat. by the Astapus, which likewise flowed from a lake (Coloe). The two lakes in the far south were fed by the melting snows of a great range of mountains, the Mountains of the Moon. This remained the sum total of information about the river down to the 19th century, except that in 1770 Bruce discovered that the Blue Nile issued from Lake Tana. The Egyptian government in 1839–42 sent three expeditions as far as Gondokoro. In 1858 Speke reached the Victoria Nyanza, in 1860 Sir Samuel Baker discovered Albert Nyanza, and in 1868–71 Schweinfurth explored the western feeders of the White Nile. Stanley, in 1875, sailed all round Victoria Nyanza, and in 1889 traced the course of the Semliki, and discovered (Albert) Edward Nyanza and Mount Ruwenzori. The British occupation of Uganda, between the Victoria and Albert Nyanzas, and the arrangement made with the Congo State in 1894, tended to retain the whole valley of the Nile, from the Nyanzas to the Mediterranean, under British influence.

See works of the explorers named, also others by Wilson and Felkin, Petherick, Junker, &c., with Walter Budge's *The Nile* (1890). For the battle of the Nile, see ABOUKIR.

Nilgir′i. See NEILGHERRY.

Ni′mach (*Neematch*), a town of India, in the native state of Gwalior, on the north-west border of Malwa, 370 miles SW. of Delhi by rail, 1613 feet above sea-level, with an agreeable climate. There has been a British cantonment here since 1817. Pop. 20,000.

Nimeguen (*Neem′e-gen;* Fr. *Nimègue;* Dutch *Nijmegen*), a town of Holland, in Guelderland, on the left bank of the Waal, 73 miles by rail E. of Rotterdam. It is built on the slope of the 'Hill of the Huns,' on which the Romans formed the permanent camp of *Noviomagum.* Near by stood till 1796 a castle, said to have been founded by Cæsar and inhabited by Charlemagne; here still stands a little sixteen-sided Romanesque baptistery of the 12th or 13th century. On another eminence is a modern Belvidere. The fortifications have been demolished; but Nimeguen retains its Renaissance town-hall (1554), and the fine Gothic church of St Stephen (dating from 1272). The manufactures include tobacco, eau de Cologne, metal-work, beer, &c. Pop. (1875) 22,929; (1910) 56,035. Regained by the Spaniards (1585–91), Nimeguen is celebrated for its great peace congress in 1678–79, at which France made treaties with Holland, Spain, and Austria.

Nîmes (*Nēēm*), the capital of the French dep. of Gard, lies in a fertile plain, engirt by the vine-clad Cevennes, 31 miles by rail NE. of Montpellier and 30 SW. of Avignon. The old town, with narrow crooked streets, is separated by shady boulevards from the well-built faubourgs; and mediæval and modern edifices are a much mutilated cathedral, the prison (formerly citadel, 1687), the palais-de-justice, St Paul's (1850), St Baudile's (1875), &c., with a most magnificent fountain, and a monument (1874) to Antoninus Pius. But the glory of Nîmes is its Roman remains of the ancient *Nemausus.* These include the 'Maison Carrée' (now a museum, with Delaroche's masterpiece, 'Cromwell looking on Charles I.'s corpse'), a splendid specimen of Corinthian architecture; an amphitheatre (now a bull-arena), 70 feet high, and seating 20,000 spectators; the exquisite Nymphæum; a mausoleum ('La Tour Magne'), baths, and two gates, whilst 14 miles NE. is the 'Pont du Gard,' most perfect of aqueducts. Nîmes manufactures silk and cotton goods, carpets, shawls, wine, brandy, boots, &c. Pop. (1872) 60,020; (1911) 80,437, one-third Protestants. Supposed to have been colonised from *Massilia* (Marseilles), Nîmes, one of the great cities of Roman Gaul, was taken by the Visigoths (465), the Franks (507), and the Saracens (725), and subsequently became an appanage of Aragon, but was restored to France in 1259. The inhabitants adopted Calvinism in the 16th century; and it was a stronghold of the Camisards. In 1791 and 1815 it was the scene of bloody religious and political reactions. Nicot, Guizot, and Daudet were natives.

Nin′eveh, long capital of the ancient kingdom of Assyria. Rich in 1818 conjectured that the mounds of Kouyunjik, opposite the modern town of Mosul, concealed its ruins beneath, but it was not until the excavations of Botta in 1842 and Layard in 1845 that the remains of Nineveh were revealed to the world.

Ning-po, a treaty-port of the Chinese province of Che-keang, stands in a fertile plain, 16 miles from the mouth of the Takia (Ning-po) River and 100 S. of Shanghai. It is surrounded by a wall 25 feet high and 16 thick, and contains numerous temples, colleges, &c., chief amongst them the temple of the Queen of Heaven, founded in the 12th century, though the present building dates from 1680. The imports are chiefly cottons and woollens, tin, iron, medicines, &c.; the exports, green tea, cuttle-fish, sedge hats and mats, silk goods, and cotton. Pop. 400,000.

Niort (*Nee-orr'*), capital of the French dep. of Deux-Sèvres, on the Sèvre Niortaise, 43 miles NE. of La Rochelle. An important railway junction, it has an old castle, an hôtel-de-ville (1530), a fine public garden, and the 16th-century church of Notre Dame, with a spire 246 feet high. Tanning and glove-making are the leading industries. The population is about 20,000. Niort, which in the 14th century was held for eighteen years by the English, was the birthplace of Madame de Maintenon.

Nip'igon, an island-studded lake of Ontario, 30 miles NW. of Lake Superior, with which it is connected by the Nipigon River. It is 70 miles long, but its deeply indented coast-line measures 580 miles. Its greatest depth is 540 feet.

Nip'issing, a lake (50 × 28 miles) of Ontario, NE. of Lake Huron, into which (Georgian Bay) it drains through French River (55 miles).

Nippon. See JAPAN.

Nisch (*Neesh*), the chief town of central Servia, 152 miles by rail SE. of Belgrade, conspicuous in the Turkish wars from 1375 to 1878, when it was regained by Servia; pop. 25,000.

Nishapur', a town of the Persian province of Khorassan, 53 miles W. of Meshed. It was the birthplace, and contains the grave, of Omar Khayyám. Pop. 11,000.

Nith, a beautiful Scottish river, rising in Ayrshire, and flowing 71 miles SSE. (mainly through Dumfriesshire), until, 14 miles below Dumfries, its estuary joins the Solway Firth.

Nitrian Desert, containing the Natron Lakes, lies W. of the Damietta branch of the Nile, and was of old famous for its monasteries and hermits.

Nivelles (*Nee-vel'*; Flem. *Nyvel*), a Belgian town, on the Thines, 19 miles by rail S. of Brussels. Its fine Romanesque church (1045) contains the relics of Pepin's daughter, St Gertrude. In 1381 the townsfolk of Ghent were defeated here by Count Louis of Flanders, and 6000 burned in a monastery. Nivelles manufactures cotton, paper, lace, &c. Pop. 14,000.

Nivernais (*Nivernay'*), formerly a province in the middle of France, nearly corresponding to the present dep. of Nièvre.

Nizam's Dominions. See HYDERABAD.

Nocera (*No-chay'ra*), an episcopal city of south Italy, 8 miles NW. of Salerno. Pop. 20,000.

Nogent-le-Rotrou (*Nozhon^g-leh-Rotroo'*), a town in the French dep. of Eure-et-Loir, on the Huisne, 93 miles by rail SW. of Paris, with the ruined château of the great Sully, his violated sepulchre, and a statue of General Saint-Pol, who fell before Sebastopol. The Germans here won two fights in 1870–71. Pop. 6000.

Noisseville (*Nwass-veel*), a village of Lorraine, 5 miles E. of Metz, where in 1870 Bazaine vainly attacked the German besiegers of Metz.

Nola, an episcopal city of Italy, 16 miles ENE. of Naples, on a very ancient Campanian site. Augustus died here, 14 A.D. Pop. 16,000.

No Man's Land, a name given to various outlying districts prior to settlement, especially Griqualand East, and parts of South Australia.

Nome, the largest town in Alaska, on the south shore of the Seward Peninsula, is the centre of a productive gold-mining district. Pop. about 13,000 in 1900, and 2500 in 1908.

Nootka Sound, a harbour on the west coast of Vancouver Island, British Columbia, its entrance protected by an island of the same name.

Nord, the most northerly dep. in France, now very nearly corresponding with the old French Flanders; area, 2193 sq. m.; pop. 2,000,000. The arrondissements are Lille (capital), Douai, Cambrai, Valenciennes, Avesnes, Hazebrouck, and Dunkirk.

Norddeich, a wireless time-signal station on the East Friesland coast, 17 m. NW. of Aurich.

Nordenham. See BREMERHAVEN.

Norderney (*Norderni*), a small treeless island, 3 miles off the East Friesland coast, is a bathing resort; area 4 sq. m.; pop. 5000.

Nordhausen (*Nordhow'zen*), a flourishing town of Prussian Saxony, pleasantly situated at the southern base of the Harz Mountains and the west end of the fertile *Goldene Aue* ('golden plain'), on the Zorge, 48 miles by rail NNW. of Erfurt. A free imperial city from 1253, Nordhausen fell to Prussia in 1803. Pop. 33,000.

Nördlingen (*Nörd'ling-en*), a town in the west of Bavaria, on the Eger, 44 miles NW. of Augsburg by rail, with carpet manufactures. Here in 1634 the Swedes were defeated by the Imperialists with a loss of 12,000. Pop. 10,000.

Nore, a sandbank in the estuary of the Thames, 3 miles NE. of Sheerness and 47 from London. Off its east end is the floating light, which revolves 50 feet above high-water. The naval 'mutiny at the Nore' broke out on 20th May and lasted until 13th June 1797.

Norfolk (*Nor'fok*), an eastern county of England, bounded by the North Sea, Suffolk, Cambridgeshire, Lincolnshire, and the Wash. With an extreme length and breadth of 67 miles by 42, it has an area of 2055 sq. m. or 1,315,064 acres. Pop. (1801) 273,371; (1831) 390,000; (1881) 444,637; (1911) 499,116. Its coast-line, upwards of 90 miles in length, is for the most part flat, and skirted by low dunes, except near Cromer, and again at Hunstanton, where cliffs, from time to time undermined by the sea, rise to a height of from 100 to 200 feet. Inland the surface is undulating, well timbered, and well watered, the principal rivers being the Ouse, Bure, Yare, and Waveney, which last three fall into the sea near Yarmouth, and in their course link together the numerous Broads (q.v.). The soil consists chiefly of light loams and sands—in places there are extensive rabbit-warrens, and with so much wood (over 50,000 acres) there is naturally an abundance of game. Agriculture has here been brought to the highest state of perfection; upwards of 3400 acres are occupied as market-gardens and orchards; whilst great attention is paid to the rearing of turkeys and geese for the London markets, and on the rich marsh-lands in the extreme west of the county, as well as on the pastures bordering the various rivers, great quantities of cattle are grazed. Norfolk comprises the city and county borough of Norwich, the county borough of Yarmouth, the municipal boroughs of Lynn and Thetford, and 700 civil parishes, mostly in the diocese of Norwich. Its parliamentary divisions are six in number. Towns other than the foregoing are Dereham, Diss, Downham Market, North Walsham, Swaffham, and Wymondham. In the history of the county the most notable incidents have been the settlements within its borders of the Flemish refugees and Walloons in the reigns of Henry I., Edward III., and Queen Elizabeth; and Ket's rebellion (1549). Venerable antiquities are the ruins of priories at Castle Acre, Thetford, and Walsingham, the castles of Norwich, Castle Rising, and Caistor, the earthworks at Buckenham, Caistor, and Thetford, and the old halls of Blickling, Holkham, Houghton, Oxburgh, and East Barsham. Among Norfolk 'worthies' (omitting those noticed under Norwich) are Sir John Fastolf, the Earl of Surrey, Sir Thomas Gresham, Skelton and Shadwell (poets-laureate), Sir Edward Coke, Spelman, L'Estrange, Sir Cloudesley Shovel, Sir Robert Walpole and his son Horace, Tom Paine, Windham, Godwin, Lord Nelson, Porson, Manby, Sir Astley Cooper, Elizabeth Fry, Fowell Buxton, Lord Cranworth, Captain Marryat, Cattermole, Borrow, Bulwer Lytton. See the 'Victoria History' (1901 *et seq.*), and those by Blomefield (11 vols. 1805–10), Chambers (1829), Rye (1885), and White (new ed. 1890).

Norfolk, a city and port of entry of Virginia, on the right bank of the Elizabeth River, 8 miles from Hampton Roads, and 33 miles from the sea. Its large deep harbour is fortified. A government navy yard, dry-dock, and hospital are at Gosport, a naval suburb of Portsmouth, on the opposite bank of the river. Norfolk ships cotton, oysters, and early fruits and vegetables. Off here the turret-ship *Monitor* defeated the Confederate *Merrimac*, 9th March 1862. Pop. (1880) 21,966; (1910) 67,452.

Norfolk Island lies in the Western Pacific, about half-way between New Zealand and New Caledonia, 400 miles NNW. of the former. The coasts are high and steep, and the surface generally uneven, rising in Mount Pitt to 1050 feet. The island is 6 miles long, and has an area of 13½ sq. m. The soil is fertile and well watered, and the climate healthy. The Norfolk Island Pine grows to a height of 200 feet. Norfolk Island was discovered by Cook in 1774. In 1788–1805, and again in 1826–55, it was a penal settlement for convicts sent from New South Wales. In 1856 many of the inhabitants of Pitcairn Island (q.v.) were transferred hither by the British government. The pop. is now about 1000. Norfolk Island is the headquarters of the diocese of Melanesia, founded in 1861. The people govern themselves, under the superintendence of the government of New South Wales; they fish, farm, and supply provisions to passing vessels.

Norham Castle (*Norr'am*), the Border fortress of the Bishops of Durham, on the Tweed's right bank, 8 miles SW. of Berwick. Founded in 1121, and deemed impregnable in 1522, it has memories of Kings John, Edward I., and James IV., but is known best through *Marmion*. The picturesque ruins comprise a great square keep, 70 feet high. See Jerningham's *Norham Castle* (1883).

Nor'icum, a Roman province, corresponding to Styria, Carinthia, and part of Salzburg in Austria. The name survives in the Noric Alps.

Nor'manby, a town of Yorkshire, 3½ miles SE. and mainly within the parliamentary bounds of Middlesbrough.

Nor'mandy, formerly a province of France, lying along the seaboard of the English Channel, between Brittany and French Flanders. In area it corresponded approximately to the modern deps. of Seine-Inférieure, Eure, Orne, Calvados, and Manche, its capital being Rouen. From the middle of the 9th century its coasts were harried by the vikings of the north (Scandinavia); by 912 they had established themselves in such force along the Seine that Charles, king of the Western Kingdom, was glad to make an agreement with their leader Rolf or Rollo, Duke of the Northmen, who became the king's vassal and a Christian. After the conquest of England by Duke William (1066), Normandy continued an appanage of the English crown until 1203–4, when the duchy was taken away from John by the king of France, on the plea that as the murderer of his nephew Arthur he (John) had forfeited his French fiefs. The claim to the title was, however, only formally renounced by Henry III. in 1259. Twice subsequently Normandy was in English hands: Edward III. conquered it in 1346, and Henry V. in 1417–18; but the English were finally driven out in 1450. The Channel Islands (q.v.) are a remnant of the Norman possessions still belonging to the descendants of the Norman kings of England. See works by Blackburn (1869), Macquoid (1874), and Miltoun (1905).

Nor'manton, a town in the West Riding of Yorkshire, by rail 3 miles NE. of Wakefield and 10 SE. of Leeds, a railway junction and seat of coal-mining and iron-working. Pop. 15,000.

Noronha, Fernando (*Noron'ya*), a volcanic group of one large (6½ miles by 2) and several small islands belonging to Brazil, in the South Atlantic, 200 miles ENE. of Cape San Roque. The islands are fertile and thickly wooded. The group was visited in 1775 by Cook, in 1832 by Darwin, and in 1873 by the *Challenger* Expedition. The main island is a penal settlement.

Norristown, capital of Montgomery county, Pennsylvania, on the left bank of the river Schuylkill (crossed by three bridges to Bridgeport), 17 miles by rail NW. of Philadelphia. It contains a fine marble court-house, cotton-mills and woollen factories, rolling-mills and foundries, flour-mills, and manufactories of glass, tacks, &c. Pop. 28,000.

Norrköping (*Nor'chö-ping*), first manufacturing town of Sweden after Stockholm, stands at the head of the Bråvik, 113 miles by rail SW. of Stockholm. The rapid river Motala from Lake Vetter affords water-power for cloth-mills, cotton spinning and weaving; and there are manufactures of sugar, paper, tobacco, &c., and shipbuilding. Pop. 46,400.

North Adams, a manufacturing village of Massachusetts, on the Hoosac River, near the west end of the Hoosac tunnel, 143 miles by rail W. by N. of Boston. It has woollen and cotton mills, shoe and print-cloth factories, a foundry, &c. Pop. 22,000.

Northal'lerton, the capital of the North Riding of Yorkshire, 30 miles NNW. of York. It has a town-hall (1874); a fine cruciform church, Norman to Perpendicular in style; a cottage hospital (1877); and sites of a Roman camp and a Norman castle of the bishops of Durham. At Standard Hill, 3 miles N., was fought, on 22d August 1138, the great battle of the Standard, in which Archbishop Thurstan routed David I. of Scotland. From 1640 to 1832 Northallerton returned two members, and then till 1885 one. Pop. 4800. See works by Ingledew (1858) and Saywell (1886).

Northamp'ton, the capital of Northamptonshire, and a county, parliamentary, and municipal borough, is seated on rising ground on the Nen's left bank, 66 miles NW. by N. of London and 50 SE. of Birmingham. It has a fine town-hall (1861–64), with other municipal offices; a county hall; corn exchange (1850); museum, free library, and schools of science and art (enlarged 1889); large hospitals; a theatre (1884); infantry barracks (1797; rebuilt 1877–78); and thirteen churches, the most interesting of which are St Peter's (Norman), St Sepulchre's (Norman and Decorated, one of the few remaining round churches in England), All-Saints', and St Giles'. The town is the English centre of the boot and shoe manufacture; leather is dressed, some lace is made, and extensive breweries are in operation. On the outskirts of the town is a fine race-course, on which meetings are held in April and November. In the autumn of 1892 Abington Abbey and 20 acres therewith were offered as a free gift to Northampton by Lord Wantage. In the grounds is a mulberry planted by Garrick. Pop. (1801) 7020; (1831) 15,351; of the county borough, (1911) 90,064, and of the parliamentary borough, which returns two members, 74,519. Northampton was burnt by the Danes (1010); it had a castle (of which traces now remain) built about 1075, and a university, founded in 1260, but abolished some few years later. In a battle (10th July 1460) fought in the meadows below the town, Henry VI. was defeated by the Yorkists; a great fire (20th September 1675) almost entirely destroyed the town.

Northampton, capital of Hampshire county, Massachusetts, stands near the west bank of the Connecticut River (here crossed by a bridge to Hadley), 103 miles by rail W. of Boston and 3 miles NW. of Mount Holyoke. It contains the state lunatic asylum, the Clarke Institute for deaf-mutes, a public library, housed in the handsome Memorial Hall, and Smith College for women. The manufactures include paper, silk, cotton and woollen goods, sewing-machines, cutlery, baskets, brushes, jet ornaments, &c. Pop. 20,000.

Northamp'tonshire, or NORTHANTS, a midland county of England, 67 miles long, and 25 where broadest, is surrounded by Rutland, Lincoln, Cambridge, Huntingdon, Bedford, Buckingham, Oxford, and Warwick. Area (with the Soke of Peterborough), 998 sq. m., or 638,612 acres, more than half pasture. Pop. (1801) 131,757; (1841) 199,208; (1881) 272,558; (1911) 348,515. In the north-east near Peterborough the county is flat, and forms part of the Bedford Level (q.v.), but elsewhere the surface is undulating, the highest ground—about 800 feet above sea-level—being found in the neighbourhood of Daventry. The Nen and the Welland are the chief rivers. Corn and green crops are largely grown; many cattle are grazed on the broad pastures, and dairy-farming is carried on; but although Northants is a great hunting county, the breeding of horses is not much encouraged. Limestone is quarried in the north-east, and excellent ironstone is found near Kettering and Wellingborough. The county comprises twenty hundreds, the county borough of Northampton, the municipal boroughs of Brackley, Daventry, Higham Ferrers, and Peterborough, and has 346 civil parishes, almost entirely in the diocese of Peterborough. The Soke of Peterborough is a separate administrative county. The parliamentary divisions are four, each returning one member. Northamptonshire has witnessed the battles of Edgecote (1469) and Naseby (1645), the beheading of Mary, Queen of Scots, at Fotheringay Castle (1587), and the imprisonment of Charles I. at Holmby House (1647). Of its natives, besides Richard III. and (perhaps) Catharine Parr, the best known are Archbishop Chichele, Sir Christopher Hatton, Catesby, Thomas Fuller, James Harrington, Bishop Cumberland, Dryden, Charles Montagu, Earl of Halifax, William Law, Doddridge, James Hervey, Cartwright ('the father of Reform'), Dr Paley, William Lisle Bowles, Clare (the peasant poet), the Earl of Cardigan (leader of the Balaclava charge), and Dean Mansel. See the 'Victoria History' (1905 *et seq.*), and those by Bridges (1791), Baker (1822–41), and Whellan (1874).—Hampshire (q.v.) is the county of *South*ampton.

North Berwick, a fashionable watering-place of Haddingtonshire, at the entrance to the Firth of Forth, 23 miles by a branch-line (1848) ENE. of Edinburgh, and 10 by water SSE. of Elie in Fife. Beyond it rises conical North Berwick Law (612 feet); and westward stretch splendid golf-links. Tantallon Castle, 3 miles E., fronting the Bass Rock, is a magnificent ruin, finely described in Scott's *Marmion*. A stronghold of the Douglases, and the birthplace of Gawin Douglas, it resisted James V. in 1528, but in 1639 was 'dung down' by the Covenanters. Robert III. made North Berwick a royal burgh, and till 1885 it returned, with Haddington, &c., one member to parliament. Pop. 3300. See Richardson's guide-book (1907).

North Cape, the northernmost point in Europe, in 71° 10′ N. lat., is on the island of Magerö. The northernmost point on the continent is Cape Nordkyn (71° 6′ N. lat.), 6 miles farther S., and 45 miles E. of North Cape.

North Carolina, one of the thirteen original United States, is situated on the Atlantic seaboard, S. of Virginia. Its extreme length is 500, its breadth 186 miles. Area, 52,250 sq. m., or larger than that of England. The eastern part is low, and in parts swampy, the central part undulating, and the western mountainous; but almost everywhere the soil is remarkably fertile and the climate healthy. The highest mountains in the United States east of the Mississippi are in North Carolina, more than fifty peaks exceeding 6000 feet—Mitchell's Peak (6707 feet) the highest. Most of these are clothed to their tops with thick forests, but some have prairie-like summits covered with turf. All this picturesque region, known as 'the Land of the Sky,' is a favourite resort in summer for southerners and in winter for northerners. North Carolina is rich in mineral products—silver, gold, zinc, iron, copper, plumbago, coal, corundum, granite, marble, mica, &c. Maize, cotton, wheat, oats, hay, tobacco, and sweet potatoes are the most valuable products. A chief industry in eastern North Carolina is the making of tar, rosin, and turpentine. Since 1880 the manufactures of cotton and woollen fabrics have largely increased, tobacco-factories have been enlarged, and in 1888 the first silk-factory in the southern states was established. Fisheries are important. The state has 4600 miles of railway. The chief port and largest city is Wilmington, the capital Raleigh. In 1584 Raleigh's first expedition landed on Roanoke Island. In 1629 Charles I. granted to Sir Robert Heath the territory, also claimed by Spain and called Florida, from lat. 30° to 36° as *Carolana Florida.* In 1653 a colony from Virginia settled on the Roanoke and Chowan rivers. In 1663 Charles II. granted the region across the continent between lat. 31° and 36° N. (extended to 29° and 36° 30′) to eight of his favourites, under the name of Carolina. The proprietors adopted a constitution prepared by Locke and Shaftesbury. In 1729 the king bought out the proprietors, and North Carolina became a royal province. It was the last state but one to ratify the federal constitution in 1789. It was the last, too, of the eleven Confederate States to pass the ordinance of secession in 1861. The capture of Fort Fisher in January 1865 led to the federal occupation of Wilmington, the advance on Raleigh, and the surrender of General Johnston, which practically ended the war of secession. Pop. (1800) 487,103; (1840) 753,419; (1880) 1,399,750; (1910) 2,206,287—making North Carolina the fifteenth state in order of population. Presidents Jackson, Polk, and Johnson were natives.

North Dakota, a state of the American Union, bounded by Canada (Saskatchewan and Manitoba), Minnesota, South Dakota, and Montana; area, 70,795 sq. m.—a fifth larger than England and Wales; pop. (1910) 577,056. The surface is largely undulating plain. The Turtle Hills in the north cross the Canadian frontier; and a belt of high plateau, the Coteau du Missouri, crosses the state from the NW., dividing it into two unequal sections, through the SW. of which flows the Missouri River, with its tributaries, including the Little Missouri. Devil's Lake or Minniwaukon, in the NE., has no outlet and is salt. Great part of the NW. overlies beds of lignite. In the NE. are the rich wheat lands of the Red River basin. Some of the great 'Bonanza' farms of North Dakota are from 10 to 80 sq. m. in extent; continuous furrows are sometimes ploughed for miles in a line. Other crops are maize, flax, oats, rye, potatoes, buckwheat, and hay. The cattle interest is great; the ranche system prevails in the less settled districts. The rainfall is relatively low. The winters are cold, but dry and sunny. The first settlement was by French Canadians near Pembina about 1780. Dakota territory, including North and South Dakota, was organised in 1861. The two Dakotas were admitted as separate states in 1889. The capital of North Dakota is Bismarck; the largest town is Fargo (14,300), others being Grand Forks and Jamestown.

Northern Territory, a territory of the Commonwealth of Australia, till 1911 attached to South Australia (q.v.).

Northleach, a Gloucestershire town, 10 m. NE. of Cirencester, with grammar-school. Pop. 640.

North Marston, a Bucks parish, 7½ miles N. of Aylesbury. Here is Schorne College (1875).

Northowram, a town now part of Halifax.

North Pole. See Arctic Ocean.

North Queensferry. See Queensferry.

North Sea, or German Ocean, a southern extension of the Arctic Ocean. Its northern boundary would be represented by a line drawn from the Shetland Islands to the opposite coast of Norway, and its southern boundary is the Strait of Dover; W. it is bounded by Great Britain, and E. by Norway, Denmark, Germany, Holland, and Belgium. With the Atlantic it communicates through the Strait of Dover and the English Channel on the south, and on the north by the Pentland Firth and the channel between the Orkney and Shetland Islands; and with the Baltic by the Skagerrack and Cattegat. The North Sea is over 600 miles in length and about 400 miles in maximum width, and its area exceeds 160,000 sq. m. By far the greater proportion of this area is less than 100 fathoms in depth, the only part where deeper water—360 fathoms—is found being off the coast of Norway. The sea is very shallow towards the south and east, and the coasts in this direction are low and flat, being in some places below the level of the sea, whereas to the north and west, where the water is deeper, the sea-coast is high, and the deep 'Norwegian Gully' is faced by the high and bold cliffs of Norway. The sea-bottom is very irregular, a number of banks running across from the Yorkshire coast towards the Skagerrack, the most important of which is the Dogger Bank (q.v.), and there are also depressions like the Silver Pit; off the low-lying coasts of Holland, Belgium, and Britain there are numerous shoals and sandbanks formed of the materials brought down by the rivers. The North Sea receives many rivers, the principal being the Thames, Ouse, Humber, Tyne, Tweed, Forth, and Tay, the Scheldt, Rhine, Weser, and Elbe. The North Sea has been from the earliest times one of the most important highways of the world, and is surrounded by some of the most prosperous commercial nations. Its fisheries are among the greatest in existence, providing employment for thousands of fishermen.

North Shields. See Shields.

Northum'berland, the most northern county of England, separated from Scotland by the Tweed, and from Durham by the Tyne and Derwent. The German Ocean bounds it on the E., and Cumberland, with a part of Roxburghshire, on the W. Among the English counties it ranks fifth in size, having an area of 1,290,312 acres. Its greatest length is 70 miles and its greatest breadth 47 miles. The surface, except near the coast, is picturesquely broken into rounded and conical hills and high moorland ridges. The main valleys are fertile and well wooded. The principal heights belong to the Cheviot Hills (q.v.), and are seated in the north-west part of the county. These are Cheviot (2676 feet), Hedgehope (2348), Cushat Law (2020), Bloody Bush Edge (2001), and Windy Gyle (1963). The Simonside Hills near Rothbury attain 1447 feet. The chief rivers are the Tyne, Wansbeck, Coquet, Aln, Breamish, Till, and Tweed. In the south-west are some small sheets of water called the Northumbrian Lakes, the largest of which is Greenley Lough. Off the coast lie Lindisfarne or Holy Island, the Farne Islands, and Coquet Isle. The climate is cold; still, the winters are often much milder than in the south, and the average rainfall, except in the Cheviot district, is considerably less than in Devon, Dorset, Hampshire, and Sussex. Northumberland contains 515 civil parishes, and, ecclesiastically, is in the province of York. It is divided into nine wards (answering to hundreds or wapentakes), three of which formed part of Durham till 1844; and it comprises four parliamentary divisions—the Tyneside, Wansbeck, Hexham, and Berwick-upon-Tweed. The principal towns are Newcastle-upon-Tyne, Alnwick, Morpeth, Hexham, and North Shields. A large portion of the county is agricultural, especially the fertile tracts along the principal valleys and near the coast. The western portion is pastoral, the Cheviots supporting large flocks of hardy sheep. The staple trade is in coal, and the chief manufactures are connected with its mining and transit; the collieries are in the SE. The salmon-fisheries of the Tyne and Tweed have long been famous. Pop. (1801) 168,078; (1841) 266,020; (1881) 434,086; (1911) 696,893.

In the 6th century Northumberland was colonised by the Angles, forming part of the kingdom of Bernicia. Being a Border county, it suffered much during the Scottish wars, and from the 11th to the 17th century was frequently the scene of much bloodshed. The battles of Otterburn, Homildon Hill, and Flodden were fought on its soil. Northumberland is very rich in memorials of the past, some of which are noticed separately under Bamburgh, Dunstanburgh, Hexham, Alnwick, Holy Island, Norham, &c. Natives have been Bishop Ridley, Thomas Bewick, Akenside, Lord Eldon, George and Robert Stephenson, Grace Darling, the second Earl Grey, Birket Foster, and Lord Armstrong. See works by Wallis (1769), Hutchinson (1778), Mackenzie (1825), Hodgson (1820–40), Hartshorne (1858), and Bateson (1893 *et seq.*).

Northumbria, the most northern of the ancient English kingdoms, stretching from the Humber northwards to the Firth of Forth, and separated from Cumbria and Strathclyde by the Pennine range and the Ettrick Forest.

North Walsham. See WALSHAM.

North-west Frontier Province, a new province of India (1901) under a chief commissioner, comprising the districts of Peshawar and Kohat, with parts of Bannu, Dera Ismail Khan, and Hazara, all heretofore in the Punjab; area, 39,000 sq. m.; pop. 3,800,000. Peshawar is capital.

North-west Passage, a route for ships from the Atlantic to the Pacific by the north of America; proved by Franklin and his followers to exist, but to be impracticable for commerce. The *North-east Passage* is that by the north of Asia, utilised by Nordenskiöld.

North-west Provinces, a lieutenant-governorship of British India (from 1835), occupying the upper basin of the Ganges and Jumna, and extending from Bihar to the Punjab. Oudh, from 1857 a separate government, was in 1877 put under the same lieutenant-governor, and in 1901 the name of the whole was changed to the United Provinces of Agra and Oudh (q.v.). The province, which constitutes the great part of Hindustan proper, is mainly a great alluvial plain, sloping from the Himalayas, and comprises the Doab, Rohilkhand, Bundelkhand, &c., and the Upper Ganges valley. It is the great wheat country of India, but is not on a level with Bengal as to resources or trade. The headquarters of Hinduism, and containing some of the most sacred memorials of the Aryan race, it was long subject to Moslem sway; still a seventh of the population are Mohammedans. Area of the United Provinces, 133,300 sq. m.; population, 48,000,000 (40,737,000 Hindus).

North-west Territories, in Canada (q.v.), has been most currently used of Alberta, Saskatchewan, Assiniboia, and Athabasca, rearranged and organised in 1904 as the two provinces of Alberta and Saskatchewan. Yukon is since 1898 a separate territory; but under the term North-west Territories still fall the unorganised regions north of 60° N. lat. and west of Hudson Bay, to which were given the names of Mackenzie, Franklin, and (since 1905) Keewatin, whose southern parts were given to Manitoba and Ontario in 1912, when Ungava was added to Quebec.

Northwich, a town of Cheshire, on the river Weaver and the old Watling Street, 18 miles ENE. of Chester. Underneath and around are brine-springs, used for making salt since before the Christian era, and the town is being undermined by the pumping of the brine. Pop. 18,000.

Norwalk (*Nor'ok*), a town of Connecticut, at the mouth of Norwalk River, on Long Island Sound, 41 miles by rail NE. of New York. It has a good harbour, oyster-fisheries, the largest straw-hat factory in America, foundries and ironworks, and manufactories of felt-hats, cloth, woollens, shirts, shoes, locks, and door-knobs. Pop. (with South Norwalk) 24,200.—(2) Capital of Huron county, Ohio, 55 miles by rail WSW. of Cleveland. It manufactures organs, shoes, ploughs, sewing-machines, tobacco, and fanning-mills. Pop. 8000.

Norway (Norweg. *Norge*), the western division of the Scandinavian peninsula, extends from lat. 57° 59′ N. in the south-west to 71° 11′ in the north-east, overlapping Sweden and Lapland on the N. Quite 1160 miles in length (coast-line 3000 miles), it varies in width from 20 to 100 miles north of 63° N. lat.; below that line it swells out to 260 miles. Area, 124,495 sq. m. Norway is separated from Sweden by the Kjölen Mountains (3000 to 6000 feet), the backbone of the peninsula, which bifurcate south of 63°; the western branch widens out into a broad plateau, undulating between 2000 and 4000 feet and embossed with mountain-knots—Dovre, Jotun, Lang, Fille, Hardanger Fjelde (*fells*)—the separate peaks of which shoot up to 6000 feet and higher (Galdhöppigen, 8399 feet). Norway presents a bold front to the Atlantic; on the inner or eastern side—the 'Eastland'—the slope is more gradual. Finmark, which is inhabited chiefly by Lapps, is a monotonous undulating plateau (1000 to 2000 feet). The greater part of the country lies between the same degrees of latitude as Greenland, and it is mainly owing to the Gulf Stream that Norway is habitable. In winter the west coast districts are the warmest, and the cold increases in intensity according to the distance inland. The places that have the lowest winter mean (11·8°) are all inland (where mercury sometimes freezes at −40° F.). The prevalent south-west winds bring considerable rainfall, 40 to 70 inches in the year, to the west coast of southern Norway; in the interior only 12 to 16 inches fall. The pop. has much more than doubled since 1820, when it was 977,500; in 1911 it was 2,392,698. There is one town with over 100,000—Christiania (244,000); four have above 20,000—Bergen (77,000), Trondhjem (45,000), Stavanger (307,00), and Drammen (25,000); eight above 10,000, all seaports. The density of the population is only 18 per sq. m.; but then fully 70 per cent. of the total area is wholly uncultivable, and 22 per cent. is forest.

From the North Cape to below 59° N. lat., to the point nearest Scotland (280 miles distant), the precipitous coast is protected from the Atlantic waves by a belt of rocky islands, called the Skjærgaard ('Skerry Fence'). The outermost are the mountainous Lofoten and Vesteraalen chains, where 30,000 fishermen congregate in winter to prosecute the herring and cod fisheries. All the islands of the Skjærgaard are frequented by enormous quantities of sea-birds. The peninsular rampart is crowned with several gigantic glaciers—the shores (6000 feet) of Lyngen Fjord in the north are lined with them, besides great snowfields; south Norway possesses the second largest glacier in Europe (Vatnajökull in Iceland being the largest), the roof-shaped Justedal (4600 to 5400 feet), which has an area of 580 sq. m. (87 miles long by 6 to 22 miles wide). Throughout Norway the limit of perpetual snow ranges from 3100 feet on Justedal to 5150 on the Dovre Fjeld. The lofty west coast region is everywhere cleft by gigantic fissures, very narrow and winding, into which the sea-water flows—the fjords. In some cases they are of great depth, much deeper than the sea outside (200 fathoms): Sogne Fjord, for instance, is 2820 feet deeper; Hardanger

Fjord, 930 feet. Sogne Fjord cuts its way to the foot of the Jotun Fjeld, 106 miles from the ocean, and Hardanger Fjord is 68 miles long. The finest of the valleys stretching inland from the fjords is Romsdal, where the rounded, pure gneiss mountains tower up to 6000 feet with almost perpendicular walls. The steep sides and extremities (2000 to 4000 feet) of these fjords and valleys are braided with waterfalls. The only considerable break in the lofty coast-wall is the basin of Trondhjem. The southern coast-lands, bordering the Skagerrack and the wide Christiania Fjord, are comparatively low and tame. East of the peninsular rampart the valleys converge upon Christiania Fjord. Most of these valleys are traversed by mountain torrents and streams, the longest being the Glommen (350 miles) and Drammen (163). Some of these streams in their lower courses expand into long narrow lakes. The coast of northern Norway is estimated to have risen between 400 and 600 feet.

Norway's natural wealth lies in her fisheries (especially for cod and herring), her forests, and her shipping; her manufactures, her mines, and her agriculture are all unable to meet the home demands. Salted fish and cod-liver oil are largely exported. Over 100,000 persons are engaged in the cod and herring fisheries. The forests, their saw-mills, and wood-pulp factories give much employment. The rearing of cattle, sheep, and goats—in the north reindeer—constitutes important branches. The area under cultivation is only 2 per cent. of the entire surface of the country, and meadows and grazing land add another 2·8 per cent. The output of the copper and iron mines of Röros and the silver-mines of Kongsberg has greatly declined. The total mineral output of Norway (iron pyrites, silver, copper, apatite, nickel) has risen since 1900. The purely industrial establishments are grouped mainly around Christiania, and include textile factories, machine-shops, chemical-works, flour-mills, breweries, &c. The use of water-power for electrical enterprises is growing. The Norwegians rank amongst the busiest sea-carriers of the world, the Norwegian mercantile marine ranking third among maritime nations, or first in proportion to population. The number of ships is about 8000, the tonnage 1,600,000 tons. The total exports of Norwegian goods amount annually to from £8,500,000 to £13,000,000 (about £5,500,000 to Britain), the chief being fish, timber and wood-pulp, minerals, oils, tallow, tar, hides, horns, textiles, paper, and dyestuffs. The imports have an annual value of from £15,500,000 to £27,000,000 (about £5,700,000 from Britain), and include grain, textiles, bacon, butter, iron, coffee, coals, wines, tobacco, &c.

The Norwegians share with the Swiss the distinction of being the most democratic people in Europe; all titles of nobility were abolished in 1821. In 1912 practically all offices except in the cabinet, diplomatic service, army, navy, and church, were thrown open to women. During the 19th century large numbers of the population emigrated, mostly to the United States. In 1897 the number fell to 4669, in 1903 increased to 26,831, and then fell again. Since 1871 earnest endeavours have been made to diminish the consumption of spirituous liquors, mainly through the Gothenburg licensing system. The railway lines radiate chiefly from Christiania, and have a total length of over 1600 miles. Norway is now visited in summer by large numbers of tourists. Attendance at school is free and compulsory. Besides primary schools, there are 100 secondary schools, ten normal schools, and the university of Christiania. Except 52,700 persons (including 10,286 Methodists, 5674 Baptists, 1969 Roman Catholics, Jews, Mormons, &c.), the entire population belong to the Lutheran Church (8000 Lutheran nonconformists). The language of the educated is Danish, the pronunciation diverging slightly; the dialect of the people is substantially similar. The Storthing or parliament consists of 123 (paid) members, women being eligible and electors (since 1907); and divides for legislative purposes into two chambers. The national expenditure averages over six millions, and is balanced by the revenue. The national debt amounted in 1910 to £18,300,000. There is universal military service. The navy is serviceable only for coast defence.

When we first hear of Norway it was occupied by Lapps and by several Gothic tribes. Harold Haarfager (863–930 A.D.) unified the country by making himself over-king over numerous minor kings or chiefs as far north as Trondhjem. Many of these, refusing to become his vassals, emigrated with their followers to Orkney, Shetland, the Hebrides, Ireland, and Iceland. Olaf Tryggveson (991–994), a typical viking, yet made his people Christian at least in name; Olaf, saint and king, welded the country into a united Christian kingdom (c. 1015). Canute the Great sought to incorporate Norway with his Danish kingdom (1028). Harold Hardraada, who died at Stamford Bridge near York in 1066, conquered Denmark. Magnus Barefoot waged war in the Orkneys and Hebrides, and fell in Ireland in 1103. Iceland acknowledged the supremacy of Haco, who died at Kirkwall in 1263, after his defeat at Largs. In 1319 the crown passed through a female heir to the Swedish royal house, and again through marriage to the Danish (1380). The great Queen Margaret of Denmark united all three kingdoms (1383). The Hebrides had been ceded to Scotland in 1266; the Orkneys and Shetlands were pledged to Scotland in 1468. From 1536 Denmark treated Norway as a conquered province; and it was not till 1814 that the cession of Norway to Sweden gave the Norwegians (who at first opposed the transference) their national rights again, with a free constitution, under the Swedish king. In 1821 the Norwegians abolished all titles of nobility; and the union of democratic—almost republican—Norway with aristocratic Sweden never worked smoothly. The nationalist movement became pronounced in 1890. A movement for an even larger measure of home rule, and diplomatic representation distinct from that of Sweden, ended in the refusal by Sweden to grant the concessions asked and in the formal proposal by Norway, in 1905, to withdraw from the union with Sweden. After some negotiations and the meetings of Swedish and Norwegian parliaments, a separation was amicably agreed to, and in October Norway was again a distinct and independent state. By a vast majority, the Norwegians agreed to ask Prince Carl, second son of the Crown-prince of Denmark, to become their king; and the new king was welcomed, as Haakon VII. (Haco), in December.

See books on Norway by Mary Wollstonecraft (1796), J. D. Forbes (1853), Wood (1880), Du Chaillu (1881), Vincent (1881), Lovett (1885), Daniels (1911); guides by Nielsen, Baedeker, Tönsberg, Bennett, Jörgensen, and Wilson; and for the history, Laing's *Heimskringla* (1833; new ed. 1890), Carlyle's *Early Kings of Norway* (1878), Boyesen's *History of Norway* (new ed. 1900), and Nisbet Bain in the 'Cambridge History' (1905).

Norwich (*Nor'ridge*), a cathedral city, the capital of Norfolk, and a parliamentary, county, and municipal borough, with two members of parliament and (since 1910) a Lord Mayor, is situated on the Wensum, immediately above its confluence with the Yare, 18 miles W. of Yarmouth and 114 NNE. of London. The population is about 121,500. Built on the summit and slopes of a hill which gradually rises from the river, the city, with its hamlets, covers an area of 7472 acres, as compared with that of 1300 enclosed by its ancient walls (1294–1342). Its narrow, winding streets are rich in examples of early architecture—as Pull's Ferry and the Bishop's Bridge (1295), both on the river-banks; St Giles' Hospital (1249); the Ethelbert Gateway (*c.* 1272); Bishop Salmon's Gateway (*c.* 1325); the Guildhall (completed 1413); Erpingham Gate (1420); the Music House (partly Norman, and once a residence of Sir Edward Coke); the Bridewell (Decorated and Perpendicular, *c.* 1400); and the Dolphin Inn (1587). The cathedral, almost wholly Norman in plan, but the growth of more than four centuries, occupies a site close to the river, and was founded in 1096 by Bishop Herbert Losinga: its dimensions are 407 feet in length by 72 in breadth (or 178 across the transepts), and it is surmounted by a noble (Norman) tower and (Decorated) spire of 315 feet—the highest in England next to Salisbury. Close by is the grammar-school, founded as a Mortuary Chapel in 1319, and famous as the place of education of Lord Nelson, Rajah Brooke, and other celebrities; also St Andrew's Hall (Perpendicular; formerly the church of the Black Friars), in which are held the triennial musical festivals, first established at Norwich in 1824. Next after the cathedral the most striking edifice is the castle, crowning the summit of a sugar-loaf mound in the centre of the city: its massive quadrangular Norman keep, the only portion now standing, was in 1886–94 converted from a prison to a museum. On the cattle-market beneath the castle is held annually, on Maundy Thursday, the famous cattle and sheep fair, formerly held on Tombland, and so graphically described in Borrow's *Lavengro*. The churches, forty-four in number, are for the most part built of flint, and in the Perpendicular style: those of St Peter Mancroft, St Andrew, St Giles, St Lawrence, St Michael Coslany, and St Stephen are the finest examples; whilst of modern public buildings may be mentioned the hospital (founded 1771 and rebuilt 1879–83), an Agricultural Hall (1882), and a Volunteer Drill-hall (1886). Formerly one of the largest seats in England of the worsted-weaving trade, the city is still noted for its textile fabrics—especially its crapes; but the principal manufactures now carried on are those of mustard, starch, ornamental ironware, boots and shoes, whilst extensive breweries and a vinegar distillery, as well as large nursery-gardens on the outskirts of the town, give employment to many hands. The bishopric was translated hither from Thetford in 1094; and the chief subsequent event was the encampment of Ket's rebels on Mousehold Heath (1549). There were disastrous floods in August 1912. Thomas Bilney; Archbishop Parker; Dr Caius; Greene (the dramatist); Bishops Cosin and Tanner; Sir Thomas Browne; Dr Samuel Clarke; 'Old' Crome, his son, Cotman, Stark, and Vincent (the 'Norwich school' of painters); Mrs Opie; Crotch (the composer); W. Taylor; Professor Brewer; Sir W. J. Hooker; Gurney and his sister, Elizabeth Fry; Lindley (the botanist); and Harriet Martineau and her brother James, were citizens.

See works by Stacy (1819), Bayne (1858), Goulburn (1876), Jarrold (1883), and Jessopp (1884); and the *Records*, ed. Hudson and Tingey (1906–10).

Norwich (*Nor'ritch* or *Nor'witch*), capital of New London county, Connecticut, at the head of the Thames River, 13 miles by rail N. of New London. The chief portion of the city lies on an eminence between the Yantic and Shetucket rivers, which here unite to form the Thames. There are manufactories of paper, cotton and woollen goods, worsted, picture cords, pistols, files, locks, iron pipes, &c., besides rolling-mills and ironworks. The city's site was granted by Uncas the Mohican to an English ensign who in 1656 reached him by night with a canoe-load of provisions, when he was besieged; a memorial obelisk was erected in 1825. Pop. 20,000.

Norwood, partly in the boroughs of Croydon, Camberwell, and Lambeth, gives name to a parliamentary division (pop. 93,000) of Lambeth.

Noss. See BRESSAY.

Nossi-Bé (*Bay*), a volcanic island NW. of Madagascar; area, 130 sq. m.; pop. 10,000.

Nostell, or NOSTAL, a hamlet 5½ miles SE. of Wakefield, with ruins of a famous Augustinian priory, founded 1121.

Notley Abbey, Bucks, 2 miles NNE. of Thame, a ruined Augustinian canonry (1162).

Noto, an ancient episcopal town of Sicily, 16 miles SW. of Syracuse by rail; pop. 32,000.

Notodden, a Norwegian town in Hittersdal, 60 miles SW. of Christiania, near the great cascades of Tinfoss, which provide power for generating electricity, largely used in producing nitrates, &c.

Nottingham, capital of Nottinghamshire, a city, parliamentary (three members), municipal (1897), and county borough, is seated on the Trent, 126 miles NNW. of London and 38 S. by E. of Sheffield. Its appearance was much improved by the erection of a town-hall, University College, and other public buildings; by the opening and laying out of an arboretum of 17 acres, of a public park and recreation grounds of over 150 acres, and of a tract of open land, called 'Bulwell Forest' (135 acres); as also by the spanning of the Trent—which is here 200 yards wide—with a broad granite and iron bridge in the place of a former narrow structure of seventeen arches. Crowning a precipitous rock, which rises 133 feet above the river, stands the castle, built (1674–83) on the site of an ancient Norman fortress, dismantled during the Parliamentary wars, and itself much damaged by fire during the Reform Bill riots of 1831. It was restored in 1878, and transformed into an art museum. Near to it are the county hall (1770); St Mary's Church (restored 1867–85), a cruciform building in the Perpendicular style, 216 feet in length; and a spacious market-place, 5½ acres in extent, having at its eastern end the exchange, with a richly-decorated façade (rebuilt 1814). In another group not far off are the guildhall and other municipal offices (1888), in the French Renaissance style of architecture; two theatres (1865–84); and University College (1879–81; chartered in 1903), with 1700 students, and a library, natural history museum, &c. Other edifices are a hospital (1781, with additions 1829–79); a Roman Catholic cathedral (1844); and the high school, founded as a grammar or free school in 1513, moved into new buildings in 1867, and since

1882 controlled under a new scheme. Of the various manufactures carried on in the town the most important are those of lace and hosiery; baskets, bicycles, cigars, and needles are also made, whilst several iron-foundries are in operation, and malting and brewing are carried on. A great Michaelmas goose-fair is held. There is a new water-supply (1912) from the Derwent. Pop. 260,000. Charles I. raised his standard (1642) at Nottingham; and it was the scene of riots (1795–1816), partly owing to a bread-famine and partly to the Luddites. See works by Dickinson (1816), Wylie (1853–65), Hine (1876), Stevenson (1890), and the *Records of the Borough* (1882–1900).

Nottinghamshire, or NOTTS, an inland county of England, bounded by Yorkshire, Lincolnshire, Leicestershire, and Derbyshire. Its greatest length is 50 miles; average breadth, 20 miles; and area, 844 sq. m., or 540,123 acres. Pop. (1801) 140,350; (1831) 225,400; (1881) 391,815; (1911) 604,098. Apart from the valley of the Trent, which is very flat, the general aspect of the county is undulating and well wooded, the highest ground—600 feet above the sea-level—being in the west, in the vicinity of Sherwood Forest (q.v.). In the south are the Wolds, consisting of upland moors and pasture-lands broken up by many fertile hollows, whilst the northern boundary for upwards of 15 miles is skirted by the Car, a tract of low-lying land, formerly a swampy bog, but since 1796 drained and brought into cultivation. The Trent, with its tributaries, the Erewash, Soar, and Idle, is the principal river. As regards productiveness the county is not above mediocrity, except in the Vale of Belvoir to the east of Nottingham. The principal mineral products are coal, gypsum, iron ore, and limestone. The manufactures are noticed under the chief towns—viz. Nottingham, Newark, Mansfield, Retford, and Worksop. Almost wholly in the diocese of Southwell, Notts is divided into six wapentakes, nine poor-law unions, and 266 parishes, and returns seven M.P.s, one for each of its four divisions (Bassetlaw, Newark, Mansfield, and Rushcliffe), and three for Nottingham (its capital and assize town). Of its natives the best known are Archbishops Cranmer, Secker, Sterne, and Manners-Sutton; Garnet (the Jesuit); Denzil, Lord Holles; General Ireton; Colonel Hutchinson; Lady Mary Wortley Montagu; Bishop Warburton; Dodsley, Kippis, and Wakefield (the authors); Admiral Earl Howe; Sandby and Bonington (the artists); Dr Erasmus Darwin; Edmund Cartwright; Kirke White and Bailey (the poets); Lord Byron; 'Speaker' Denison; and 'General' Booth. See works by Thoroton (1797), Bailey (1852–55), Briscoe (1881), White (1885), C. Brown (1891), and W. Stevenson (1893); and the 'Victoria History' (1906 *et seq.*).

Notting Hill, a London district, in Kensington metropolitan borough.

Nouméa. See NEW CALEDONIA.

Novara, a town of north Italy, 60 miles N. of Turin by rail. Here the Sardinians were utterly defeated by the Austrians in 1849. Pop. 55,000.

Nova Scotia, a province of Canada, consists of a long, narrow peninsula, and the island of Cape Breton, which is separated from the mainland by the Strait of Canso. It is bounded N. by Northumberland Strait and the Gulf of St Lawrence; NE., S., and SE. by the Atlantic; W. by the Bay of Fundy; and NW. by New Brunswick, with which it is connected by an isthmus only 11 miles wide, separating the Bay of Fundy from Northumberland Strait. The greatest length is 350 miles, the greatest breadth 100 miles, and the land area 21,000 sq. m.—one-third less than that of Scotland. One-fifth of the total area consists of lakes, rivers, and inlets of the sea. Of upwards of 7,000,000 acres occupied, nearly 3,000,000 are in crop and pasture, and over 50,000 are gardens and orchards. Pop. (1806) 67,515; (1851) 276,117; (1871) 387,800; (1901) 459,574; (1911) 492,338.

The coast-line is about 1900 miles in length, and the shores abound with excellent harbours. There are numerous rivers, few of them more than 50 miles long. Bras d'Or in Cape Breton (q.v.) is a much indented sea-inlet. Lake Rossignol is 20 miles in length; Ship Harbour, a lake 15 miles long. Mines Basin, the east arm of the Bay of Fundy, penetrates 60 miles inland, and terminates in Cobequid Bay. The tides rise 30 to 50 feet in the basin with great impetuosity, and form a 'bore.' On each side of the Cobequid range are two extensive areas of fine arable lands; the Annapolis valley is especially rich. The northern part of Cape Breton is bold and steep (North Cape, 1800 feet). The principal cities and towns are Halifax, Sydney, Glace Bay, Amherst, Sydney Mines, Yarmouth, New Glasgow, and Truro. The extreme of cold is 20° below zero, and of heat 94° in the shade. Spring is rather tedious, and the winter variable; fogs are prevalent along the coasts, but do not penetrate far inland. Rye, oats, and barley, buck-wheat, Indian corn, tomatoes, potatoes, turnips, and all root-crops grow in abundance; wheat is not much grown; hay is a very important crop. Apples, pears, plums, cherries, and other garden fruits attain the utmost perfection. Attention is now devoted to dairying and to the raising of live-stock. Sport is excellent throughout the province. The manufactures are being developed, especially iron and steel. Mining (gold, coal, iron, &c.) is extensively carried on. The fisheries of Nova Scotia are among the finest in the world. The waters abound with mackerel, cod, herring, shad, salmon, halibut, haddock, lobsters, &c. The chief exports are fish, minerals, lumber, farm products, and general manufactures. There are 1400 miles of railway. Education is free, and there are six colleges. The public affairs are administered by a lieutenant-governor, and executive council of twenty-one members, and a legislative assembly of thirty-eight members elected by the people for four years. The province is represented in the Dominion parliament by ten senators and sixteen members of the Lower House.

Discovered by Cabot in 1497, the country was partly settled in 1604 by the French, to whom it was known as *Acadie*. It long remained a bone of contention between France and England, but became finally British in 1713. The Acadians who refused to fall in with the new settlement were expelled in 1755 (Longfellow's *Evangeline* is not historically just); the well-being of Nova Scotia dates from the immigration of loyalists from the United States after the Revolutionary war. It entered the Dominion in 1867. See works by Haliburton (1829), Murdoch (1867), and Hannay (1889), besides the histories of Canada.

Nova Zembla (Russ. *Novaja Zemlja*, 'New Land'), an Arctic land lying between the Kara Sea and Barents Sea. Long and narrow, it measures 600 miles from north to south and 60 in average width, and is cut in two nearly midway by a narrow winding sea-passage, the Matochkin Shar. The centre and north are mountainous, rising to 4000 feet or higher, and are covered with snow and ice. Although not permanently inhabited, it is visited by Russian and Norwegian seamen and hunters. It was known to the hunters of Novgorod in the 11th century, but was rediscovered by Willoughby in 1553.

Nov′gorod ('new-town'), a famous city of Russia, is situated on the Volkhof, near where it issues from Lake Ilmen, 110 miles SSE. of St Petersburg by rail. It is the cradle of Russian history. In 864, according to tradition, Rurik (a Varangian, apparently a Scandinavian) was invited hither by the neighbouring tribes, and with him Russian history begins. In the 12th century it had connections with the Hanse cities, and it became the market of north-east Europe. 'Novgorod the Great,' a kind of republic, had 400,000 inhabitants, but in 1471 the czar Ivan III. nearly destroyed the town, and bereft it of its liberties. St Sophia, founded in the 11th century, is built on the model of St Sophia at Constantinople. Pop. 27,000.—The *government*, lying E. of that of St Petersburg, contains 3000 lakes and for three-fourths is covered with forests; area, 46,000 sq. m.; pop. 1,600,000.

Novi, a town of Italy, 30 miles NW. of Genoa; pop. 20,000. Here in 1799 the French were defeated (15th August) and victorious (6th November).

Novibazar′ (also *Jenipasar* and *Rascia*), a town of Servia as extended in 1912–13, on the river Rashka, an affluent of the Morava, 120 miles SE. of Saraievo; pop. 14,000. The sanjak, of which Servia obtained the north-east and Montenegro the south-west, is mountainous and barren, but so long as it was in Turkish territory between Servia and Montenegro, was of strategic importance.

Novogeorgievsk, a Russian fortress of the first rank, on the Vistula, 20 miles NW. of Warsaw. With Warsaw, Ivangorod, and Brest Litovsk, it forms the Polish Quadrilateral.

Novorossisk′, a fortified port on the Black Sea, to the SE. of Anapa in Caucasia. A breakwater and quay were built in 1890–1900. Pop. 42,000.

Novotcherkask′, a town of southern Russia, capital of the province of the Don Cossacks, on the Aksaï, a tributary of the Don, 40 miles from the Sea of Azov, and 70 ENE. of Taganrog. The administration was transferred hither from Tcherkask in 1805; but the choice was not a happy one, the distance of the town from the Don (12 miles) being much felt. Pop. 50,000.

Noyon (*Nwa-yon*^{g}*′*), a town in the French dep. of Oise, 67 miles NNE. of Paris by rail. It has a fine cathedral in the Transition style of the 12th century, an hôtel-de-ville (1485–1523), and a former episcopal palace. Pop. 8000. The *Noviodunum* of Cæsar, Noyon was a residence of Charlemagne and Hugo Capet, and the birthplace of Calvin.

Nubia is a comparatively modern name for a large region of Africa, formerly a portion of Ethiopia (q.v.), and extending on both sides of the Nile from Egypt to Abyssinia; touching the Red Sea on the east and the desert on the west. *Nubia Proper*, or *Lower Nubia*, extends from Aswan to Dongola; beyond that is *Upper Nubia*. *Anglo-Egyptian Soudan* has come to be used for Nubia south of the twenty-second parallel of north latitude, together with the recovered Egyptian territory actually in the Soudan, and the Equatorial Provinces. The name Nubia is geographical, and has no political meaning. Both in its lower and upper sections Nubia is for the most part an expanse of rocky desert, with patches where grass sometimes grows, and ravines in which moisture enough is found to keep alive a few mimosas or palms, and to raise pasture for gazelles and camels. There are also wells and small oases here and there. The great 'Nubian Desert' lies east of the Nile, opposite the great western bend of the river. Below Khartoum rain is almost unknown; the climate is accordingly excessively hot and dry, and, except in the river-ports after the fall of the Nile, is very healthy. The only exception to the general aridity is the narrow strip of country on both sides of the Nile, which nowhere exceeds four miles in breadth, and in many places is only a quarter of a mile wide. The most fertile part is near Dongola. A mountain barrier bounds the valley on both sides of the Nile, and consists of granite and sandstone.

Nuble, a province of Chili; capital, Chillan (q.v.).

Nueva Esparta. See Margarita.

Nuevo Leon (*Nway′vo Lay-oan′*), a northern state of Mexico; Monterey (q.v.) is the capital.

Nukha (*Noo-hha*), a town of Caucasia; it is on the southern slope of Caucasus, and 120 miles E. of Tiflis. Pop. 30,000.

Numidia (Gr. *Nomadia*, 'land of Nomads'), the Roman name for part of the north coast of Africa, largely corresponding with Algiers.

Nun, Cape. See Morocco.

Nuncham Park, an Oxfordshire seat, on the Thames, 5¼ miles SSE. of Oxford.

Nundydroog, or Nandidrúg, a fortified hill and health-resort in Mysore, 31 miles N. of Bangalore, and 4810 feet above the sea. It was stormed by a British force in 1791.

Nun′eaton, a municipal borough of Warwickshire, on the river Anker and the Coventry Canal, 14 miles NNW. of Rugby, 9 N. by E. of Coventry, and 22 E. of Birmingham. It has a good Gothic parish church, some remains of a 12th-century nunnery, with a modern church built thereon, and a grammar-school (1553). The ribbon manufacture has given place to worsted, cotton, and woollen spinning. 'George Eliot,' born at Arbury farm to the south, went to school at Nuneaton, and here saw her *Felix Holt* riot. The borough was incorporated in 1907. Pop. 37,000.

Nuremberg (Ger. *Nürnberg*), a city in the Bavarian province of Middle Franconia, in a sandy but well-cultivated district, on the little Pegnitz (a sub-affluent of the Main), 95 miles N. by W. of Munich, and 145 ESE. of Frankfort. It is the quaintest and most interesting town of Germany, on account of the wealth of mediæval architecture which it presents in its many-towered walls, its gateways, its picturesque streets with their gabled house-fronts, its bridges, and its beautiful Gothic fountains. The Burg or royal palace was built (*c.* 1024–1158) by Conrad II. and Frederick Barbarossa; in its courtyard is a coeval linden-tree. Of eight fine churches the two finest are St Lawrence (1274–1477), with two noble towers 233 feet high, exquisite stained glass, the famous stone tabernacle (1495–1500) by Adam Krafft, and the wood-carvings of Veit Stoss; and St Sebald's (*c.* 1225–1377), with the superb shrine of Peter Vischer. Other noteworthy objects are the Italian Renaissance town-hall (1622); the new law-courts (1877); the gymnasium, founded by Melanchthon (1526); the Germanic museum (1852); an industrial museum (1871); a library of 200,000 volumes; Albert Dürer's house; and the statues of him, Hans Sachs, and Melanchthon, with the 'Victoria' or soldiers' monument (1876). Although the glory of Nuremberg's foreign commerce has long since passed away, the home trade is still of high importance. It includes the specialities of metal, wood, and bone carvings, and children's 'Dutch' toys and dolls, which, known as 'Nuremberg wares,' find a ready sale in every part of Europe, and are largely exported to America and the East. In all there are close on 200 factories, producing also chemicals, ultramarine, type, lead-pencils, beer, &c.; and the town besides does a vast export trade in hops, and import trade in colonial wares from the Netherlands. Pop. (1818) 26,854; (1875) 91,018; (1910) 332,651—the great majority Protestants. First heard of in 1050, Nuremberg was made a free imperial city in 1219. In 1417 the Hohenzollerns sold all their rights to the magistracy. This put an end to the feuds which raged between the burggrafs and the municipality; and Nuremberg for a time became the chief home in Germany of the arts and of inventions—watches or 'Nuremberg eggs,' air-guns, globes, &c. In 1803 it retained its independence, with a territory of 483 sq. m., containing 80,000 inhabitants; but in 1806 it was transferred to Bavaria. See books by Headlam, Rée, and Bell (1905).

Nushki, a town of British Baluchistan, 90 miles SW. of of Quetta by rail (1905).

Nuwara Eliya. See Newera Elia.

Nyangwe, a station on the Upper Congo or Lualaba, whence Stanley descended in 1876.

Nyasa, or Nyassa (*Nee-ah'sa*), the southernmost of the equatorial great lakes of East Africa, is situated about 260 miles SE. of Tanganyika and 400 inland from the east coast. It lies at an altitude of 1570 feet, is very deep in the middle, shelving rapidly from the shores, which are rocky and high. Long and narrow, it measures 350 miles from north to south and an average of 40 from east to west. The river Shiré goes S. from its southern extremity to the Zambesi. Although the Portuguese knew of the lake as Maravi early in the 17th c., Livingstone was the first to fix in 1859 its situation and to navigate it.

Nyasaland Protectorate is a region west and south of Lake Nyasa, in which, since 1878, the African Lakes Company and British missionaries have been at work. In 1889 it was declared within the British sphere of influence, and in 1891 formally created the British Central Africa Protectorate; in 1907 the name was changed to the Nyasaland Protectorate. The name British Central Africa has been used for the whole area within the British sphere from Lake Nyasa on the east, right across Africa to the German and Portuguese west coast possessions, with Belgian Congo to the north, and the Zambesi dividing it from Southern Rhodesia. For the portion under the British South Africa Company (Northern Rhodesia, formerly North-eastern and North-western Rhodesia), see Rhodesia. The Protectorate of British Nyasaland is administered by an Imperial Governor and Commander-in-Chief, assisted by Legislative Councils, both nominated. There are fourteen districts, each under a Resident. Lying on the western and southern shores of Lake Nyasa, it forms the eastern boundary of Northern Rhodesia, and has an area of 40,000 sq. m. and a population of about 1,000,000 (800 Europeans). Chinde, at the mouth of the Zambesi, is, by concession of the Portuguese government, port for the protectorate. Blantyre (pop. 7000) is the largest place; Zomba, on the Shiré, is the seat of the commissioner. Other places are Bandawe, Port Maguire, and Fort Johnston. The Livingstonia mission here was originally founded in accordance with a suggestion of Dr Livingstone, as was also the Lakes Company, with the express purpose of counteracting the influence of the Arab slave-dealing marauders who were the curse of the region. The missions and the company had a fierce struggle with the slave-catching interest, until relieved by the government establishments. There are also settlements on Lake Moero and on Lake Bangweolo. The imports of the protectorate (cottons, provisions, hardware, machinery, agricultural implements, &c.) have an annual value of about £280,000; the exports, coffee, cotton, tobacco, ivory, india-rubber, oil-seeds, rhinoceros horns, hippopotamus teeth, strophanthus seed, beeswax, rice, are worth £180,000. Wheat is also grown; merino sheep thrive.

Nyborg. See Fünen.

Nyiregyháza, a town of Hungary, 130 miles E. by N. of Budapest. It is the centre of an extensive wine district, with allied manufactures. It has an important annual fair. Population, 40,000.

Nykerk (*Nye'kerk*), or Nieuwkerk, a Dutch town, 28 miles SE. of Amsterdam by rail, and 1½ mile from the Zuider Zee; pop. 10,000.

Nyköping (nearly *Nee-chup'ing*), a seaport of Sweden, on a bay of the Baltic, 62 miles SW. of Stockholm (100 miles by rail); pop. 10,000.

OAHU. See Hawaii.

Oajaca (*O-a-hah'ka*), a mountainous Pacific state in the south of Mexico. The capital, Oajaca, lies 5060 feet above the sea, in the fertile valley of the Atoyac. It has a large cathedral (1729), a quaint bishop's palace, the State Institute, manufactures of chocolate, cotton goods, cigars, candles, and soap. Pop. 40,000.

Oakengates, a Shropshire urban district, 14 miles W. of Shrewsbury; pop. 12,000.

Oakham, the county town of Rutland, in the vale of Catmose, 25 miles WNW. of Peterborough. The castle, every peer passing which must forfeit either a horseshoe or a fine, is in ruins except the hall, used for county business. The fine parish church, with a lofty spire, was restored by Scott in 1858–59 at a cost of £6100; and Archdeacon Johnson's grammar-school (1584; reconstituted 1875) has an endowment of £1200 a year. Beer, boots, and hosiery are made. Pop. 3700.

Oakland, capital of Alameda county, California, on the east side of San Francisco Bay, 4½ miles from San Francisco. It has wide streets adorned with evergreen oaks, and is surrounded with gardens and vineyards. It is the terminus of the Southern Pacific Railroad, and has a steam ferry to San Francisco and a harbour extending to Alameda (q.v.). Besides a Congregational seminary, a large R.C. college (1889), and the state home for the blind, the city contains canning-factories, manufactories of cottons, woollens, jute, iron, nails, shoes, pottery, carriages, &c. Pop. 150,000.

Oakworth, a town in the West Riding of Yorkshire, 3 miles SW. of Keighley, with cotton and worsted industries; pop. 4300.

Oamaru (*O-a-ma-roo'*), a port and bathing-resort of New Zealand, 78 miles by rail NE. of Dunedin; pop. 5000.

Oatlands Park, Surrey, near the Thames, 3 miles ESE. of Chertsey, a former royal palace, purchased in 1794 by the Duke of York, and in 1858 opened as an hotel.

O'ban, a fashionable watering-place of Argyllshire, 84 miles WNW. of Stirling, and 136 of Edinburgh, by a railway opened in 1880. It curves round a beautiful and almost land-locked bay, which, sheltered from every wind by the island of Kerrera on the west and by the high shores of the mainland, forms a spacious haven, crowded in summer by yachts and steamers. A mere 'clachan' when Dr Johnson visited it in 1772, Oban began to be feued in 1803–20, and in 1832 was constituted one of the Ayr parliamentary burghs. It is now the great tourist headquarters of the West Highlands, possessing some thirty hotels and splendid steamboat facilities. Objects of interest are the picturesque ruins of Dunolly and Dunstaffnage Castles, and prehistoric cave-dwellings, discovered in 1890–4. Pop. 5600.

Obeid, El, capital of Kordofan, 220 miles SW. of Khartoum, with trade in gum-arabic, ivory, gold, and ostrich-feathers. There is a railway (1912) to Khartoum. Pop. 10,000. Near it, in Nov. 1883, an Egyptian force, under Hicks Pasha, with an English staff, was exterminated by the Mahdi.

Ober-Ammergau (*Ammergow'*), a village of 1500 inhabitants, in the valley of the Ammer in Upper Bavaria, 45 miles SW. of Munich. Here the famous Passion Play (established 1633) has been performed every ten years.

Oberhausen, an important manufacturing town in the Rhine province of Prussia, 40 miles N. of Cologne. It has large iron and other works, and coal-mines. Pop. 90,000.

Oberland. See Bern.

Obi, or Ob, the great river of Western Siberia, rises in two branches, the Biya and the Katun, in the Altai Mountains, within the Chinese frontier, and flows 2120 miles NW. and N. to the great Gulf of Obi in the Arctic Ocean. Its chief tributaries are the Irtish, Tcharysh, Tom, and Tchulym, all navigable. It has been proved to be accessible for some time yearly to sea-borne trade with Europe round the North Cape.

Obock, a French possession on the African coast of the Red Sea, inside Bab-el-Mandeb, and opposite Perim, now part of French Somaliland (Côte des Somalis). It has been superseded as a port by Djiboutil.

Ocean Grove, a Methodist Episcopal seaside resort and pleasure retreat, on the New Jersey coast, established by a church society in 1870, is 6 miles by rail S. of Long Branch, and 54 from New York. Bathing, riding, and driving are as stringently forbidden on Sundays as are theatricals, smoking, or drinking at all times; and the 25,000 summer visitors spend much of their time in religious services in an *Auditorium* built to hold 5000 persons.

Oceania, a name sometimes given to the fifth division of the globe, comprising all the islands which intervene between the south-eastern shores of the continent of Asia and the western shores of America. It naturally divides itself into three great sections—the Malay Archipelago, Australasia or Melanesia, and Polynesia (q.v.).

Ochil Hills (*Oa'hil*), a pastoral range occupying parts of the Scottish counties of Clackmannan and Fife, and extending 24 miles from the vicinity of Stirling north-east to the Firth of Tay. Chief summits are Bencleugh (2363 feet), Dunmyat (1375), and King's Seat (2111). See Beveridge's *Between the Ochils and the Forth* (1888).

Ochiltree (*Oa'hil-tree*), an Ayrshire village, on Lugar Water, 11½ miles E. of Ayr. Pop. 660.

Ocmulgee. See Georgia.

Oconto, capital of Oconto county, Wisconsin, on Green Bay, at the mouth of the Oconto River, 149 miles by rail N. of Milwaukee. It has large steam saw-mills. Pop. 5600.

Odense (*O'den-seh*; 'Odin's island'), the chief town of the Danish island of Fünen (q.v.). Its cathedral was founded in 1086. Population, 42,000.

Odenwald, a mountainous system partly in Baden and Bavaria, but mainly in Hesse (q.v.).

Oder (Slavon. *Vjodr*), one of the principal rivers of Germany, rises in the Oderberg on the tableland of Moravia, 1950 feet above sea-level, and flows 550 miles NW. and N. through Prussian Silesia, Brandenburg, and Pomerania, to the Stettiner Haff, whence it passes into the Baltic by the triple arms of the Dievenow, Peene, and Swine, which enclose the islands of Woollin and Usedom. The rapidity of the current and the silting at the embouchures of the numerous tributaries render the navigation difficult. Canals connect the Oder with the Spree, Havel, and Elbe; the Warthe is a navigable tributary. On the banks are Ratibor, Brieg, Breslau, Frankfort-on-the-Oder, Stettin, and Swinemünde.

Odessa, the fourth city of Russia, on the Black Sea, midway between the estuaries of the Dniester and Dnieper, by rail 967 miles SSW. of Moscow and 381 S. of Kieff. It is built facing the sea on low cliffs, seamed with deep ravines and hollowed out by galleries in the soft rock, in which numbers of the poorest inhabitants herd together. Above ground its streets are long and broad, and cross each other at right angles. Odessa was only founded in 1794, near a Turkish fort that fell into Russian hands in 1789; but it quickly became the port for the corn-growing districts of South Russia. Its progress was greatly aided by its being a free port from 1817 to 1857, and again by the railway to Kieff (1866). The pop. increased from 3150 in 1796 to 25,000 in 1814, 100,000 in 1850, 184,800 in 1873, and 500,000 (very many Jews and some Greeks) in 1912. In 1905 there were fleet mutinies, riots, massacres of Jews, and a local civil war. The harbour or roadstead, protected by moles, is blocked by ice about a fortnight in the year. The exports include wheat, sugar, wool, and flour; the imports, raw cotton, oils, groceries, iron and steel, coal, food-stuffs, fruits, tea, tobacco, machinery. The chief industries are flour-milling, sugar and oil refining, the manufacture of tobacco, machinery, leather, soap, chemicals, biscuits, &c. Odessa has a university (1865) with 3000 students, a public library (1829) with 140,000 vols., the cathedral (1802–49) of the Archbishop of Kherson, a very fine opera-house (1887), palatial grain-warehouses, corn-elevators, and the 'palais royal,' with its gardens and park. Monuments to Count Worontsoff (1863), the Duke de Richelieu (1827)—both great benefactors of Odessa—and Pushkin (1889) adorn the city. Water is brought by aqueduct (27 miles long) from the Dniester. Numerous coast batteries have been built.

Odeypoor. See Udaipur.

Odiham, a market-town of Hampshire, 23 miles NE. of Winchester. Pop. of parish, 2700.

Oedenburg (*Ödenboorg'*; Hung. *Soprony*; the *Scarabantia* of the Romans), a town of Hungary, 3 miles W. of the Neusiedler See and 48 S. by E. of Vienna. It manufactures candied fruits, sugar, soap, &c. Pop. 33,600.

Œland, a Baltic island, 4 to 17 miles from the east coast of Sweden. It is 55 miles long and 5 to 12 broad; pop. 30,000. Scarcely more than a limestone cliff, it is scantily covered with soil, but in some parts is well wooded.

Oels, a manufacturing town of Prussian Silesia, 16 miles ENE. of Breslau by rail. Pop. 12,000.

Œr'ebro, a town of Sweden, where the Svarta enters the Hjelmar Lake, 170 miles W. of Stockholm by rail, with an old castle. Pop. 30,000.

Oesel, a Baltic island belonging to Livonia, and lying across the mouth of the Gulf of Riga. It is 45 miles long from NE. to SW., and has an area of 1000 sq. m., with a pop. (chiefly Esthonian) of 60,000. The surface is broken by low hills, marshy, and well watered and wooded. The only town is Arensburg, on the south-east coast (pop. 4000). Long governed by the Teutonic Knights, Oesel became Danish in 1559, Swedish in 1645, and Russian in 1721.

Ofen. See PESTH.

Offa's Dyke, the ancient boundary between Mercia and Wales, extending from the mouth of the Dee to that of the Severn.

Offenbach, a manufacturing town of Hesse-Darmstadt, on the Main's south bank, 5 miles by electric railway SE. of Frankfort. Among its manifold industrial products are chemicals, fancy leather goods, machines, and carriages. Pop. 75,600.

Ogasawara. See BONIN.

Ogden, capital of Weber county, Utah, is situated, at an elevation of 4340 feet, at the confluence of the Weber and Ogden rivers, where the former passes through the Wahsatch Mountains, 37 miles N. of Salt Lake City. A great railway junction, it has a Methodist university (founded 1890), a foundry and mills, breweries, and manufactories of woollens, brooms, boots and shoes, &c. Pop. 25,600.

Ogdensburg, a port of New York, on the St Lawrence, at the mouth of the Oswegatchie, opposite Prescott, Canada, and 515 miles by rail NNW. of New York City. It has a Catholic cathedral, a large lake and river trade, a huge grain-elevator, and manufactories of flour, lumber, and leather. Pop. 16,000.

Ogowé, or **OGOWAY**, a river of West Africa, rises on the west side of the watershed that parts its basin from that of the Congo, in 2° 40′ S. lat., 14° 30′ E. long., and flowing north-west and west, finally curves round by the south to Nazareth Bay, on the north side of Cape Lopez. It forms a wide delta of some 70 sq. m. in extent. During July–September it shrinks to a narrow current; at other times it is a deep, broad stream; but numerous islands and sandbanks and shallows prevent vessels of any size from ascending. It has been dominated by France, through her colony on the Gabun (q.v.), since 1885.

Ohi'o, next to the Missouri the largest affluent of the Mississippi, is formed by the union of the Alleghany and Monongahela at Pittsburgh, Pennsylvania, and flows west-south-west 975 miles, with a breadth of 400 to 1400 yards. In its course it separates the northern states of Ohio, Indiana, and Illinois from the southern states of West Virginia and Kentucky. Towns on its banks are Pittsburgh, Wheeling, Cincinnati, Louisville (where there are rapids of 22 feet in a mile, with a steamboat canal), Evansville, New Albany, Madison, Portsmouth, Covington, and Cairo. The chief affluents are the Tennessee, Cumberland, Wabash, Kentucky, Great Kanawha, Green, Muskingum, and Scioto. It is usually navigable from Pittsburgh; in 1884 it rose 71 feet.

Ohio, the fourth in population of the states of the American Union, lies between Lake Erie and the Ohio River. It stretches from north to south 210 miles, and from east to west 220 miles; area, 40,000 sq. m., equal to that of Ireland and Wales. The country is an extensive, moderately undulating plain; in many places streams have forced a way through bold cliffs of sandstone. A low ridge enters the state near the north-east corner and crosses it in a south-westerly direction; this 'divide' (1300 feet above sea-level) separates the waters of Lake Erie and the Ohio River. North of this ridge the surface of the country gently declines toward the lake. The central part of Ohio is almost a level plain, about 1000 feet above the sea, slightly inclining southward. The southern part is somewhat hilly, the valleys growing deeper as they approach the Ohio River, whose tributaries here water many extensive and fertile valleys. The coalfields cover over 12,000 sq. m.; and immense deposits of limestone, freestone, and mill-stones abound. In no other state have been found so many evidences of man's antiquity exemplified in implements of stone, bone, copper, and clay; while the most extensive and elaborate systems of earthworks in America are at Newark, near Chillicothe, and on the Miami bluffs near Waynesville. Ohio is one of the chief manufacturing states in the Union, leading all others in the manufacture of farm machinery, carriages and wagons, woollen and cotton goods, furniture, and wine and spirits. It has also great rolling-mills and iron-factories, glass-factories, potteries, and oil-works. In agriculture the state is first in the Union in many regards; its annual production of maize is some 155,000,000 bushels, of wheat 23,000,000, of wool about 15,000,000 lb. Cattle and hogs are reared in large numbers. In the southern sections cattle may be left in the fields all winter. The belt adjoining Lake Erie is famous for its fruit; excellent melons are grown in almost all parts of the state. The oil-fields and stores of natural gas are sources of wealth.

Ohio is part of the original North-west Territory, claimed mostly by Virginia under charters from English kings. In 1787 the Ohio Company of Associates was organised by soldiers of the revolution war, and under their auspices a large tract of land was purchased from government. In 1788 Marietta and Cincinnati were founded. In 1791 the Indians became troublesome, and in 1794 a signal victory was gained over them by General Wayne. Soon after settlers occupied rapidly the land, and Chillicothe was made the seat of government. In 1803 Ohio was admitted into the Union. Ohio has given birth to four presidents—Grant, Hayes, Garfield, and Benjamin Harrison. The largest cities are Cleveland, Cincinnati, Columbus (the capital), Toledo, Dayton, Youngstown, and Akron. Pop. (1816) 230,760; (1850) 1,980,329; (1870) 2,665,260; (1880) 3,198,062; (1910) 4,767,121.

Ohlau (*Oa-low'*), a town of Prussian Silesia, 20 miles SE. of Breslau, on the Oder; pop. 9000.

Oich, a loch of Inverness-shire, measuring 4 miles by ¼ mile, 105 feet above the sea, at the summit-level of the Caledonian Canal (q.v.). It sends off the Oich, 6¾ miles NNE. to Loch Ness.

Oikell, a Sutherland stream, running 35 miles SSW. and E. by S. to the Dornoch Firth.

Oil City, Pennsylvania, on the Alleghany River, 133 miles by rail N. by E. of Pittsburgh, is a great oil market, and contains, besides oil-refineries, engine and boiler factories, and a large cooperage. There were fearful inundations here in June 1892. Pop. 16,000.

Oil Rivers. See NIGERIA.

Oise (*Wâz*), a dep. in the north of France, separated from the English Channel by Seine-Inférieure; area, 2270 sq. m.; pop. (1881) 404,555; (1901) 411,028. The rivers are the Oise, a tributary of the Seine, 150 miles long, with its affluents the Aisne and Therain. The arrondissements are those of Beauvais (the capital), Clermont, Compiègne, Senlis.

Oka, a navigable river of central Russia, the Volga's chief affluent from the south, rises in Orel, and flows 706 miles NE. to the Volga at Nijni-Novgorod. Towns on its banks are Orel, Bielev, Kaluga, Riazan, and Murom; affluents are the Moskwa, Kliasma, and Tzna.

Okavango. See NGAMI.

Okeechobee, a lake of Florida (q.v.).

Okehampton, a Devon municipal borough, 26 miles W. by N. of Exeter. It returned two members till 1832. Pop. 3200.

Okhotsk, SEA OF, an inlet of the North Pacific Ocean, on the east coast of Siberia, nearly enclosed by Kamchatka and the Kuriles and Saghalien. On its north shore, at the mouth of the Okhota, is the seaport of Okhotsk (pop. 300).

Oklaho'ma, between Texas and Kansas, was organised in 1890 as a territory, and in 1907, absorbing the Indian Territory, became a state. In 1890 it consisted of two detached sections separated by the Cherokee Outlet, which, sold by the Indians in 1893, was then incorporated with the territory. The Public Land Strip situated N. of the Texas 'pan-handle' and S. of the parallel 37° N., ceded to the United States by Texas at its annexation, was not included in any state or territory until its incorporation in Oklahoma, and was known as No Man's Land. The area is 70,500 sq. m.; pop. 1,657,155, including 8 per cent. negroes and 5·3 per cent. Indians. The surface, which rises gradually toward the north and west, is for the most part an upland prairie. The most important elevations are the Wichita Mountains in the south. Oklahoma is fairly well watered by the Red and Arkansas rivers and their affluents, but many of the streams are brackish, and so saturated with alkaline salts as to be at times unfit for drinking purposes or for irrigation. Rainfall in the old territory of Oklahoma is lighter and less uniform than in Indian Territory. In the river-valleys and in some of the upland regions there are fertile and productive spots. The Public Land Strip has an arid and unproductive soil covered here and there with a sparse growth of cactus, yucca, and sage-brush. The climate is subject to sudden changes produced by 'northers.' In 1886 the tribes to whom the lands of Indian Territory had been granted ceded the western portion of their domain to the United States. Notwithstanding the stipulation that it should be used only for settlement by other Indian tribes or freedmen, western speculators claimed that the lands were the property of the government, and open, like other public lands, for settlement under the Homestead laws. In 1879 an organised effort was made to take forcible possession of the lands, but the adventurers from Texas, Kansas, and Missouri were finally ejected by United States troops. After many difficulties from the renewed invasions of the 'boomers,' negotiations with the Indians were renewed, as a result of which, upon the receipt of an additional sum, the Indians waived all claims. This unoccupied area was opened for public settlement on April 22, 1889. No one was allowed to enter the borders until noon, but by twilight the population had increased by at least 50,000. Claims were selected, town sites staked out, and portable houses erected before nightfall. The territory was organised in 1890, and was, with the Indian Territory added, made a state in 1907. Chief centres of population are Oklahoma (64,000), Muskogee (25,000), Enid, Shawnee, and Guthrie.

Old'bury, a busy manufacturing town of Worcestershire, 5½ miles WNW. of Birmingham, stands in a rich mineral district, and has iron and steel works, factories for railway plant, edge-tools, chemicals, &c.; pop. 32,000.

Oldcastle, a Meath market-town, 72 miles NW. of Dublin; pop. 670.

Oldenburg (*Ol-den-boorg*), a grand-duchy of northern Germany, consisting of three distinct territories—Oldenburg Proper, the principality of Lübeck, and Birkenfeld; total area, 2500 sq. m. (less than Devonshire); population, 482,400. Oldenburg Proper, which comprises ⅞ths of this area, is bounded by the German Ocean and Hanover. The principal rivers are the Weser, the Jahde, and various tributaries of the Ems. The country is flat, part of the great sandy plain of northern Germany, and mainly moors, heaths, marsh or fens, and sandy tracts. The principality of Lübeck, consisting of the secularised bishopric of the same name, does not contain the city (north of which it lies), and is surrounded by Holstein. Its area is 209 sq. m. The principality of Birkenfeld (q.v.) lies among the Hundsrück Mountains, in the very south of Rhenish Prussia; its area is 192 sq. m. Oldenburg became an independent state in 1180. The family that then established its power has continued to rule to the present day, giving, moreover, new dynasties to Denmark, Russia, and Sweden. Danish from 1667 to 1773, Oldenburg acquired the Lübeck territories in 1803, and Birkenfeld at the Congress of Vienna, when it became a grand-duchy.

The capital, OLDENBURG, is pleasantly situated on the Hunte, 30 miles WNW. of Bremen by rail. It has the grand-ducal palace, with fine gardens and art collections, a public library of 130,000 volumes, a picture-gallery, museum, &c. Oldenburg is the seat of an active river-trade, and is noted for its great cattle and horse fairs. Pop. 30,000.

Oldham, a parliamentary, municipal, and county borough of Lancashire, on the Medlock, 7 miles NE. of Manchester, 5 SSE. of Rochdale, and 38 ENE. of Liverpool. It has grown since 1760 from a small village, through its proximity to the Lancashire coalfields and the extension of its cotton manufactures. It has nearly 300 mills, with more than 12 million spindles, which consume one-fifth of the total British imports of cotton; and the other manufactures include fustians, velvets, silks, cords, &c., besides huge weaving-machine works and foundries. The making of hats was once a leading industry. The town-hall (1841) is a good Grecian edifice, enlarged in 1879 at a cost of £29,000; and there are the lyceum (1854–80), a school of science and art (1865), public baths (1854), an infirmary (1870–77), and the Alexandra Park of 72 acres (1865). Oldham received its charter in 1849. It was enfranchised by the Reform Bill of 1832, and returns two members, the parl. borough (which extends into Ashton-under-Lyne parish) covering 19¼ sq. m., the municipal only 7⅖. Pop. of the former (1911) 210,900 ; of the latter (1801) 12,024 ; (1841) 42,595 ; (1881) 111,343 ; (1911) 147,483.

Old Point Comfort, a village and watering-place of Virginia, at the mouth of James River, on Hampton Roads, is the site of Fortress Monroe.

Old Sarum. See SARUM.

Oléron (*Olayron*$^{g'}$), a fertile island 2 to 10 miles off the west coast of France, and part of the dep. Charente-Inférieure. It is 19 miles long by 5 broad. Pop. 17,000, mostly Protestants.

Olifant River, a forked stream of South Africa, rises in the mountains north-east of Capetown, and flows 150 miles NW. to the Atlantic.—Another stream of the same name rises in the Transvaal, and goes east to the Limpopo.

Olinda, a city of Brazil, 4 miles NE. of Pernambuco. Pop. 8000.

Olivenza, a fortified Spanish town, 20 miles SSW. of Badajoz. Pop. 10,000.

Olives, MOUNT OF, or MOUNT OLIVET, a limestone ridge E. of Jerusalem, from which it is separated by the narrow Valley of Jehosaphat. The modern Jebel-al-Tôr, it took its familiar name from a once magnificent grove of olive-trees on its western flank.

Ollerton, a town of Notts, on the Maun and near Sherwood Forest, 8½ miles NE. of Mansfield ; pop. 700.

Olmütz, a town of Moravia, on the March, 129 miles NNE. of Vienna. Olmütz and the country round were very strongly fortified, but the fortifications have been removed, and parks and gardens laid out on their site. Chief buildings are the 14th-century cathedral (restored 1887); the church of St Maurice (1472), whose organ has 48 stops and 2342 pipes ; the noble town-hall, with a steeple 255 feet high ; the archiepiscopal palace ; and the lofty Trinity column on the Oberring. The university (1581–1855) is reduced to a theological faculty, with 200 students and a library of 75,000 volumes. Pop. 27,000. Olmütz, which in 1640 was superseded by Brünn as capital of Moravia, suffered severely in both the Thirty and the Seven Years' Wars.

Olney, a pleasant little town of Buckinghamshire, on the Ouse, 11 miles W. by N. of Bedford and 10 SE. of Northampton. At the corner of the market-place still stands the house where Cowper lived from 1767 to 1786, writing with John Newton the *Olney Hymns* (1779). The place has memories of Scott the commentator, of Carey, and many more missionaries. Brewing and bootmaking are industries. Pop. 3000. See Thomas Wright's *Town of Cowper* (1886).

Olonetz', a government of Russia, bounded by Finland, Archangel, Novgorod, and St Petersburg ; area, 50,000 sq. m. ; population, 440,000. Petrosavodsk is the capital.

Oloron (*Oloron*$^{g'}$), a town in the French dep. of Basses-Pyrénées, on the Gave d'Oloron, 22 miles by rail SW. of Pau ; pop. 8000.

Olten, a Swiss town, on the Aar, 23 miles SE. of Basel ; pop 8000.

Olympia, scene of the Olympic games, was a beautiful valley of Elis, in the Peloponnesus, watered by the Alpheus. Great excavations have been carried out by the Germans since 1875.

Olympia, capital of Washington state, on a peninsula at the south end of Puget's Sound, 65 miles from the Pacific Ocean, and 121 by rail N. of Portland, Oregon. Pop. 7000.

Olympus, the ancient name of many mountains, especially a ridge (10,000 feet) between Macedonia and Thessaly, the abode of the Greek gods.

Omagh (*O'ma* or *O-ma'* ; Gael. *Oigh magh*, 'seat of the chiefs'), county town of Tyrone, on the Strule, 34 miles S. of Londonderry, grew up around an abbey founded in 792 ; pop. 4800.

O'maha, the chief city of Nebraska, is on the right bank of the Missouri, by rail 495 miles W. of Chicago and 501 NW. of St Louis. It is the terminus of four important railways, and the Missouri is spanned by a bridge (2750 feet, cost $1,250,000) to Council Bluffs, where a number of others (including the Union Pacific) start. The city is built on a plateau 80 feet above the river, and has wide streets and street railways. Among the large buildings are the city-hall, U.S. court-house and post-office, Chamber of Commerce (1885), Exposition (1886), Creighton College, the high school, &c. The manufactures comprise linseed-oil, boilers, safes, &c. ; but Omaha, founded in 1854, became famous for the largest silver-smelting works in the world, and the third largest pork-packing business in the States. Near it are the headquarters of the military department of the Platte. Population, 124,000 ; South Omaha, 26,000.

Oman', the most eastern portion of Arabia, a strip of maritime territory, extending between the Strait of Ormuz and Ras-el-Had, and bounded on the SW. by the deserts of the interior. At a distance of from 20 to 45 miles inland a chain of mountains runs parallel to the coast, reaching 6000 feet in Jebel Akhdar. There are some richly fertile tracts in this region, which is under the rule of the sultan of Muscat.

Omdurman (*Om-door'man*), a town of the eastern Soudan, on the Nile, opposite Khartoum (q.v.), which, as the headquarters of Mahdism, for a time it superseded.

Omsk, chief town of the Siberian province of Akmolinsk, at the Om's confluence with the Irtish, 1800 miles E. of Moscow, with a military academy, Greek and R. C. cathedrals, museum, governor's palace, &c. ; pop. 90,000.

One'ga, a seaport in the north of Russia, at the Onega's mouth in the White Sea, 87 miles SW. of Archangel ; pop. 3000.

Onega, LAKE, in the north of Russia (after Ladoga, to which it sends off the Swir southwestward, the largest lake in Europe), is 146 miles long, 50 in greatest breadth, 3764 sq. m. in area, and 1000 feet deep. The northern end is studded with islands and deeply indented with bays. The shores in other parts are flat. Icebound generally for five months, the lake is the scene of busy traffic at other seasons. Fish abound. Surveys were completed in 1890 for a canal to connect Lake Onega with the White Sea, and to be 145 miles long, 10 feet deep, and 63 wide, mostly along natural water-ways.

Oneglia (*O-nel'ya*), a town on the Gulf of Genoa, 3 miles NE. of Porto Maurizio by rail. Pop. 10,000.

Oneida (*Onī'da*), a manufacturing post-village of New York, on the Oneida Creek, 58 miles SE. of Oswego ; pop. 8300. Four miles S. was the Oneida Community, long the headquarters of the Perfectionists.

Ongar, or CHIPPING-ONGAR, a town of Essex, 6 miles E. by N. of Epping, and 23¼ NE. of London. It has memories of the Taylor family. Pop. of parish, 1400.

Onta′rio, the easternmost and smallest (7240 sq. m.) of the five great lakes of North America, receives at its south-west corner the waters of the upper lakes by the Niagara River, and at its north-east corner issues into the St Lawrence. Its surface, which is subject to periodical variations of about 3½ feet, is 326$\frac{3}{10}$ feet below the surface of Lake Erie and 246$\frac{6}{10}$ feet above the ocean-level. Its mean depth is about 300, its maximum depth 738 feet. It is 190 miles long, 55 in its widest part, and over 500 in circumference. Ports are Kingston, Coburg, Port Hope, Toronto, and Hamilton on the Canadian shore, and Sackett's Harbor, Oswego, and Charlotte in the United States. Lake Ontario is connected with Lake Erie by the Welland Canal, with the Erie Canal and river Hudson by the Oswego Canal, and by the Rideau Canal with the Ottawa. The lake is subject to violent storms, and it is probably owing chiefly to the constant agitation of its waters that it freezes only for a few miles from the shore. The shores are generally very flat, but the Bay of Quinte, near Kingston, a crooked arm of the lake, 50 miles long, possesses attractive scenery. Burlington Bay, on which Hamilton lies, is a large basin almost enclosed by a fine natural bank of sand. The name is Indian.

Onta′rio, the most populous and wealthy province of Canada, is bounded by Hudson Bay, Quebec, the St Lawrence and the Great Lakes (separating it from the United States), and Manitoba. Its area of 220,500 sq. m. was increased in 1912 to 366,000 by the addition of the eastern part of Keewatin, called Patricia. An enclave on the Nelson River was also granted Pop. (1911) 2,523,274. The surface is generally undulating; for the Laurentian Hills, see CANADA, p. 148. The principal rivers are tributaries of the Ottawa which forms part of the NE. boundary. Among smaller lakes are Simcoe, Nipissing, and Nipigon. Immense crops are raised of all the products of a temperate climate, and in the south-west corner of the province Indian corn is a regular crop, and grapes, peaches, and tomatoes ripen in the open air. Stock-raising, dairy-farming, and fruit-growing are important industries. Iron is found in many parts; copper, lead, plumbago, apatite, antimony, arsenic, gypsum, marble, and building-stone are abundant; there are also gold and cobalt. The nickel deposits at Sudbury and silver at Cobalt are very rich. Petroleum wells in the SW. and salt wells near Lake Huron are very productive. The principal manufactures are agricultural implements, iron and wood ware, wagons and carriages, railway rolling-stock (including locomotives), cottons and woollens, leather, furniture, flax, hardware, paper, soap, &c. The most thickly populated part of Ontario more nearly resembles England than any of the other colonies. There is only one large city, Toronto (376,500); but smaller cities and towns (including Hamilton, Ottawa, and London, between 90,000 and 46,000) are scattered all over the province. Ontario has a perfect network of railways (about 11,000 miles, steam and electric). Water-ways and water-power are exceptionally developed. The exports are, in order of value, agricultural products, animals and their produce, manufactures, lumber, and minerals. The public affairs are administered by a lieutenant-governor and a legislative assembly. Methodists are the most numerous religious body, followed by Presbyterians, Roman Catholics, and Anglicans. Ontario, long known as Upper Canada, was largely founded by immigration of loyalists from the United States after the revolutionary war. See CANADA.

Oodeypore. See UDAIPUR.

Oojein. See UJJAIN.

Ookiep (*O-keep*), a copper-mining station in the north-west of the Cape Province, 90 miles SE. of Port Nolloth by rail.

Oori. See LIMPOPO.

Oosterhout, a Dutch town in North Brabant, 6 miles NE. of Breda; pop. 12,000.

Ootacamund′, or UTAKAMAND, the chief town in the Neilgherry Hills, the principal sanatorium of the Madras Presidency. It stands on a hill-girt plateau, 7228 feet above the sea, 350 miles WSW. of Madras city, and 24 from the nearest railway station on the Madras line. There are a public library (1859), the Lawrence Asylum (1858) for the children of British soldiers, and botanic gardens. The mean annual temperature is 58° F. The first house was built in 1821. Pop. 16,000.

Ophir, the region to which Solomon's ships traded, has been identified with the east coast of Africa near Sofala, the south of Arabia, and the west coast of India, as well as other less likely countries (see ZIMBABYE). The name has been given to a mountain of Sumatra, near the equator (9600 feet); and to one 45 miles NE. of the town of Malacca (5700 feet).

Openshaw, a SE. suburb of Manchester.

Oporto (Port. *O porto*, 'the port'), the second city of Portugal, stands high on the steep, rocky, right bank of the Douro, which reaches the sea 3 miles W. One of the crags overlooking the river is crowned with a Crystal Palace (1865). Many of the former monasteries are put to other uses: one is a citadel, another the exchange, a third barracks. There are seven principal churches, including the cathedral (built by Henry the Navigator), the old Gothic church of Cedofeita (originally founded in 559), and the Church dos Clerigos, with a tower 213 feet high. The English factory (1785), the bishop's palace, and the hospital of St Antony are noticeable secular buildings. Oporto possesses a polytechnic academy, a medical school, art academy, commercial museum, library (1796) of 200,000 vols. and 9400 MSS., and two picture-galleries. On the south side of the river, connected with Oporto by a lofty bridge, is the suburb of Villa Nova de Gaia, with a pop. of 10,000, and extensive wine-cellars. The railway to Lisbon (209 miles) crosses the river a little higher up, on a fine steel bridge; the arch spans 549 feet, and its centre is 203 feet above the river. The pop. of Oporto is about 200,000. They are chiefly engaged in the manufacture of cloth and silks, hats, porcelain, ribbons, tobacco, soap, and candles, in metal-casting, tanning, brewing, distilling, cork-cutting, sugar-refining, and brick-making, and in commerce and shipping. Oporto is the principal place of export for port wine; other exports are cattle, oranges and other fruits, cork, copper, onions, meat, hides, and wool. The imports consist chiefly of corn and flour, cod-fish, metals, machinery, textiles, rice, raw sugar, hides, coal, and timber. Originally the *Portus Cale* of the Romans (whence 'Portugal'), this city was long a stronghold of the Christians against the Moors. In 1808 the inhabitants were especially hostile to the French; they stoutly opposed Miguel (1828); and they were active in the republican movement.

Opoteca (*Opotay′ca*), a town of 1000 inhabitants, in Honduras, 15 miles NNW. of Comayagua, once famous for its great silver-mines.

Oppeln, a town of Prussian Silesia, on the Oder, 51 miles SE. of Breslau. Its church of St

Adalbert was founded in 995; and there is an old castle on an island in the river. The manufactures include pottery, cigars, cement, beer, leather, &c. Pop. 34,000.

Oppenheim (*Op'penhime*), a town of Hesse-Darmstadt, on the Rhine's left bank, 20 miles SSE. of Mainz by rail; pop. 4000.

Oran (*Orân'*; Arab. *Waran*), a seaport of Algeria, on the Gulf of Oran, 261 miles by rail W. by S. of Algiers and 130 by sea S. of Cartagena in Spain. It climbs up the foot of a hill, has a thoroughly French appearance, and possesses a Roman Catholic cathedral (1839), a grand mosque, a college, a seminary, and two citadels or castles. It is the chief naval station in Algeria. An outer harbour, E. of the old one, was begun in 1905. Alfa, iron ore, and cereals are exported. Oran was built by the Moors. In the 15th century it was a prosperous commercial town, but was taken by the Spaniards in 1509 and made a penal settlement. Taken and retaken by Turks and Spaniards, it was finally annexed by the French in 1831. Pop. 100,000.—The *department* has an area of 23,000 sq. m.; pop. 230,000.

Orange, or GARIEP (*Gareep'*), the largest river of South Africa, rises in the Kathlamba Mountains, in the east of Basutoland, and winds 1000 miles W. by N. to the Atlantic. It separates the Cape Province, on the south, from the Orange Free State, Griqualand West, Bechuanaland, and German Namaqualand. Its principal tributaries are the Caledon and the Vaal. Its volume varies greatly between the dry season, when it is not navigable, and the rainy season, when it overflows its banks. Its mouth is obstructed by a bar.

Orange (Fr. pron. *Oron^{g}zh'*), a town in the French dep. of Vaucluse, on the Aigue's left bank, 18 miles by rail N. of Avignon. The *Arausio* of the Romans, which contained 40,000 inhabitants, it has splendid Roman remains—a triumphal arch, 72 feet high, and a theatre whose façade was 340 feet long by 118 high. There are a Romanesque cathedral and statues of two of the counts. Pop. 10,000. Orange was the capital of a small independent principality, which was ruled by its own sovereigns from the 11th century to 1531, when it passed to the Counts of Nassau, and so was associated with the fortunes of Holland; becoming finally French in 1713.

Orange, a city of New Jersey, 12 miles W. of New York by rail, and 3 miles by tram-car from Newark. The slope of Orange Mountain is laid out in beautiful parks, with villas. There are manufactures of hats, carriages, &c. Pop. 30,000.

Orange Free State, an original province of the Union of South Africa, between the Vaal and Orange rivers, and surrounded by the Cape Province, the Transvaal, Natal, and Basutoland. This region is a plateau, rising 3000 to 5000 feet above sea-level, with very little wood, except alongside the numerous watercourses that traverse it. Its vast undulating plains slope down to the Vaal and the Orange, and are dotted over with isolated hills called 'kopjes'—magnificent pasture-land. Area, 50,000 sq. m.; pop. (1880) 133,518; (1911) 526,906—175,435 being whites, mainly of the Dutch Reformed Church. Pastoral pursuits predominate—the rearing of merino sheep, cattle, horses, goats, and ostriches. Corn (wheat, maize, Kaffir corn) is grown chiefly in the east. Coal is mined in the north, and diamonds in the south-west, towards Kimberley. Bloemfontein (q.v.), capital of the province, and seat of the supreme court of the Union, is connected by railway with the chief ports and towns of South Africa. The exports include wool, diamonds, hides, ostrich-feathers, &c. When the Dutch Boers left the Cape Colony (1836) and occupied this country, it was inhabited by Bushmen, Bechuanas, and Korannas. The Cape government appointed a resident in the republic in 1845, and three years later it was annexed by Britain; in 1854 it was given up to the Boers, who established a republic (Orange Free State); but in consequence of its joining the Transvaal in the Boer war (1899-1902), it was annexed by Britain as a crown colony. In 1907 self-government was granted to the Orange River Colony; and in 1910 it joined the Union as the original province of the Orange Free State. See books named at CAPE PROVINCE.

Oranienbaum, a palace and small town (pop. 6000) of Russia, opposite Cronstadt (q.v.).

Orchom'enos, an ancient city of Bœotia, capital of the kingdom of the Minyæ, was situated at the NW. corner of Lake Copaïs, where it was joined by the Cephissus. In 1880 Schliemann excavated an old 'treasury.'—A second Orchomenos, in Arcadia, lay NNW. of Mantinea.

Or'egon, one of the Pacific states of the American Union, bounded by Washington, Idaho, California, and Nevada. Area, 96,030 sq. m., or almost twice that of England. Oregon on the west is literally rock-bound by the Coast Range of mountains, having, however, numerous indentations, which furnish good harbours. The Columbia River, which bounds the state on the north, affords the largest and deepest entrance. Seventy miles east of the Coast Range is the Cascade Range, rising to 6000 to 8000 feet, and surmounted by snow-capped peaks of nearly double that altitude. From the Cascade Range eastward to the Blue Mountains, about 70 miles, and farther on to the eastern boundary the surface is diversified by mountains and valleys, rolling plains, and tablelands. Here the soil and climate are suitable for agriculture and grazing. In Western Oregon, between the Coast and Cascade ranges, is the Willamette valley, 130 miles long and 60 wide, every foot of which is arable—adapted to grain and fruit. The climate is mild, in spite of the northerly situation, owing to the Japanese oceanic current and the shelter of the mountain-ranges. On the coast there is fog in summer and excessive rain in winter; in the Willamette valley the summers are pleasant, the winters wet; in Eastern Oregon there is a good deal of snow in winter. The grain-crops are wheat, oats, barley, rye, and maize. Flax-seed, hay, potatoes, tobacco, and hops are also raised. Great quantities of butter and cheese, and of fruit, both green and dried (prunes, apples, pears, peaches, grapes, and cherries), are annually shipped. The wealth of Oregon in timber is remarkable. Among the other industries are the tinning of salmon, the rearing of sheep, and mining. The minerals comprise coal, iron ore, gold, copper, nickel, quicksilver, fireclay, chrome, silver, manganese, zinc, lead, and platinum.

Oregon formerly included all the land between the Rocky Mountains and the Pacific Ocean north of 42° N. lat. John Jacob Astor established Astoria (q.v.) in 1811; in 1813 it was sold to the North-western Fur Company, and it afterwards passed to the Hudson Bay Company. There was joint occupation by Britain and the United States from 1818 until 1846, when the long dispute was compromised, the boundary line with British America being fixed at 49° N. lat. Oregon became a territory in 1848, and, with reduced limits, a state in 1859. The principal cities are Portland (207,000), Salem, the capital (14,000), Astoria (9600), and Eugene (9000). Pop. of the state (1860) 52,464; (1880) 174,768; (1910) 672,675.

Oregon River. See Columbia.

Orel′, a town of Russia, on the Oka, 222 miles by rail SSW. of Moscow, manufactures ropes, tallow, bricks, machinery, and verdigris. It was burned down in 1848 and 1858. Population, 90,000.—Area of the *government*, 18,000 sq. m.; pop. 2,630,000.

Orenburg (*O′ren-boorg*), a town of Russia, on the river Ural, by rail 727 miles ESE. of Moscow; pop. 100,000.—The *government* has an area of 73,300 sq. m. and a pop. of 2,100,000.

Oren′se, capital of a Galician province of Spain (area, 2700 sq. m.; pop. 406,000), near the Portuguese frontier, on the Minho's left bank, 60 miles from its mouth; pop. 17,000.

Orford, a Suffolk fishing-town on the Ore, 5 miles SSW. of Aldeburgh. It has a Norman keep, till 1832 returned two members, and was a municipal borough till 1887. Pop. of parish, 850. On the promontory of Orford Ness, 2½ miles ESE., are two lighthouses.

Orihuela (*Oreehooay′la*), a town in the Spanish province of Alicante, on the Segura, 38 miles N. of Cartagena. It has a cathedral and college, and manufactures silk, linen, hats, &c. Pop. 35,000.

Orino′co, one of the great rivers of South America, has its origin on the slopes of the Sierra Parima, in the extreme south-east of Venezuela. Flowing at first W. by N., a mountain-stream, it divides, a little below Esmeralda (65° 50′ W. long.), and sends off to the south an arm, the Cassiquiare, 180 miles to the Rio Negro, a tributary of the Amazon. The other branch on reaching San Fernando (68° 10′ long. and 4° 2′ N. lat.) is met by the strong current of the Guaviare; the united stream then turns due north, and, after passing over the magnificent cataracts of Maypures and Atures, and picking up the Meta and the Apure, turns east and traverses the llanos of Venezuela, its waters being here 4 miles broad. About 120 miles from the Atlantic, into which it rolls its milk-white flood, its delta (8500 sq. m.) begins. Of the numerous mouths seven are navigable. The waterway principally used by ocean-going vessels, which penetrate 240 miles up to Ciudad Bolivar (Angostura), is the Boca de Navios, 3¾ to 23 miles wide. The total length of the river is some 1550 miles, of which 900, up to the cataracts of Atures, are navigable, besides a farther stretch of 500 miles above the cataracts of Maypures. Most of the larger affluents are also navigable—the Meta, for instance, to within 60 miles of Bogotá in Colombia. See lives of Raleigh for his last voyage; and works by Humboldt, Bonpland, Schomburgk, and Mozans (1910).

Orissa, an ancient kingdom of India, extended from Bengal on the N. to the Godavari on the S. The present province of Bihar and Orissa was formed in 1912. Orissa was long a Buddhist stronghold; in 474 a new dynasty made it Brahmanical, and introduced the worship of Siva. Orissa ceased to be an independent state in 1568, being conquered for the Great Mogul. Its next masters were the Mahrattas, who seized it in 1742; but they were forced to surrender it to the English in 1803. The British portion of Orissa has an area of 10,000 sq. m. and a population of 4,500,000; the tributary states, a hilly country, with dense jungle, lying between the low coast districts and the interior plateau, have an area of 14,000 sq. m. and a pop. of 2,000,000. All this region was visited by severe famine in 1868–69. The principal river is the Mahanadi, and the chief towns Cuttack, Balasor, and Puri. The irrigation of a large portion of Orissa is provided for by a costly system of canals.

Oriza′ba, a town of the Mexican state of Vera Cruz, 82 miles WSW. of Vera Cruz City, and 181 ESE. of Mexico, lies in a fertile garden country, 4030 feet above the sea. It has a cotton-factory, paper and corn mills, and railway-shops. Pop. 33,000.—The *volcano* of Orizaba, 25 miles to the north, is a noble pyramid of 18,205 feet. Its last severe eruption was in 1566.

Orkney Islands, a group of ninety Scotch islands, islets, and skerries, of which only twenty-nine are inhabited, and which have an aggregate area of 376 sq. m., the largest being Pomona or Mainland (207 sq. m.), Hoy (53), Sanday (26), Westray, South Ronaldshay, Rousay, Stronsay, Eday, Shapinshay, Burray, Flotta, &c. They extend 50 miles north-north-eastward, and are separated from Caithness by the Pentland Firth, 6½ miles wide at the narrowest. With the exception only of Hoy (q.v.), which has fine cliffs, and in the Ward Hill attains 1564 feet, the scenery is generally tame, the surface low and treeless, with many fresh-water lochs. The area under cultivation has more than doubled since 1850, but is still less than one-half of the total area. The live-stock during the same period has trebled. The holdings are small—16½ acres on an average; and agriculture and fishing are the principal industries. Kirkwall and Stromness, the only towns, are noticed separately, as also are the standing-stones of Stennis and the tumulus of Maeshowe. Orkney unites with Shetland to return one member to parliament, but it was dissevered therefrom as a county by the Local Government (Scotland) Act, 1889. Pop. (1801) 24,445; (1861) 32,395; (1911) 25,897. The Orkneys (Ptolemy's *Orcades*) were gradually wrested by Norse rovers from their Pictish inhabitants; and in 875 Harold Haarfager conquered both them and the Hebrides. They continued subject to the Scandinavian crown—under Norse jarls till 1231, and afterwards under the Earls of Angus and Stratherne and the Sinclairs—till in 1468 they were given to James III. of Scotland as a security for the dowry of his wife, Margaret of Denmark. They were never redeemed; and in 1590, on James VI.'s marriage with the Danish princess Anne, Denmark formally resigned all claims to the Orkneys. The landed proprietors are chiefly of Scotch descent, the islanders generally of mixed Scandinavian and Scotch origin. See Tudor's *Orkneys and Shetland* (1883).

Orleans (*Or′leens* or *Or′le-anz;* Fr. pron. *Or-lay-on*$^{g'}$), a city of France, the capital now of the dep. of Loiret, and formerly of the old province of Orléannais, which comprised most of the present deps. of Loiret, Eure-et-Loir, and Loir-et-Cher, with portions of four others. It stands in a fertile plain on the right bank of the Loire, here crossed by a nine-arched bridge (1760), 364 yards long, and by rail is 75 miles SSW. of Paris. The walls and gates have given place since 1830 to handsome boulevards, but the town as a whole wears a lifeless appearance. There are the cathedral, destroyed by the Huguenots in 1567, and rebuilt from 1601 onwards; the *Mairie* (1530); and the 15th-century *Musée* (till 1853 the hôtel-de-ville); besides the houses of Agnes Sorel, Diane de Poitiers, and Joan of Arc, of whom there are three statues. The commerce is far more important than the industries (of which the chief is market-gardening). Pop. (1872) 48,976; (1901) 59,568; (1911) 72,096. The Celtic *Genabum*, Orleans about 272 A.D. was renamed *Civitas Aureliani*, form which the present name is derived. It was besieged by Attila in 451, and twice plundered by the Northmen (855 and 865). In 1428–29 it was besieged by the English, but was delivered by Joan of Arc, the Maid of Orleans. It suffered much in the Huguenot wars, and was occupied by the Germans Oct. 11 to Nov. 9, 1870, and then became the headquarters of the Army of the Loire until its crushing defeat on Dec. 3–5.

Orme's Head, GREAT. See LLANDUDNO.

Or'miston, a Haddingtonshire village, on the Tyne, 12 miles ESE. of Edinburgh. Moffat, the missionary, was born here.

Ormskirk, a town of Lancashire, 12 miles NNE. of Liverpool. It has a grammar-school (1612); a church, with a spire and the burial-vault of the Earls of Derby; and manufactures of cordage, iron, silk, cotton, &c. Pop. 7400.

Or'muz, or HORMUZ, a ruined town on the island of Jerun (12 miles in circuit), in the strait of Ormuz, at the entrance of the Persian Gulf, 4 miles S. of the Persian coast. About 300 B.C. there existed on the mainland, 12 miles E., a city Ormuz; this in the 13th century was the headquarters of the Persian trade with India. But about 1300 its ruler transferred his people to the site of the present town, to escape the Mongols. The new city maintained its commercial supremacy even after Albuquerque's capture of it in 1507. It was taken from the Portuguese in 1622 by an English fleet, and given to Shah Abbas of Persia, who transferred the trade to his port of Gombroon, 12 miles north-west on the mainland. The Portuguese castle still stands.

Orne (*Orn*), a French dep. formed out of the provinces of Normandy, Alençon, and Perche. Area, 2370 sq. m.; pop. (1861) 423,350; (1911) 307,433. Its arrondissements are Alençon (the capital), Argentan, Domfront, and Mortagne.

Orontes (*Oron'tees*), the ancient name of a river in Syria, now called *Nahr-el-Asi*. It rises in the highest part of Cœle-Syria, near Baalbek, and flows 147 miles N. and W. past Antioch to the Mediterranean. Its lower course is remarkably beautiful, the rocky banks rising 300 feet.

Orota'va (*a* as *ah*), a town on the north coast of Teneriffe, one of the Canaries; pop. 10,000.

Orpington, a village of Kent, 12 miles by rail SE. of London, where Ruskin's books began to be published in 1873 (see E. T. Cook's *Studies in Ruskin*, 1890); pop. of parish, 5030.

Orrell, a town of Lancashire, 3 miles W. of Wigan; pop. 6300.

Or'sova, the name of two towns on the Danube at the Iron Gates. OLD ORSOVA, a Hungarian place, is 478 miles by rail SE. of Vienna, and is a station for the Danube steamers; pop. 5000.—NEW ORSOVA, on an island in the Danube, is a fortified town held by Austria-Hungary since 1878.

Ortegal', CAPE, the north-west extremity of Spain (q.v.), in Galicia.

Orthez (*Or-tay*), a town in the French dep. of Basses-Pyrénées, on the Gave de Pau, 41 miles by rail E. of Bayonne. The 'Tour de Moncade' (1240), the stately castle of the Counts of Foix, which Froissart visited in 1388, was reduced to a ruin by Richelieu. Near Orthez Wellington defeated Soult, 27th February 1814. Pop. 6000.

Ortler Spitz, highest (12,874 feet) of the Rhætian Alps, in Tyrol, close to the Swiss frontier.

Orton, a Westmorland market-town, 8 miles SW. of Appleby. Pop. of parish, 850.

Orto'na, a town of Italy, on the Adriatic, 104 miles by rail SSE. of Ancona. It has a cathedral and a recently improved harbour. Pop. 15,000.

Oru'ro, capital of the Bolivian dep. of Oruro, and sometimes of the republic, stands 11,960 feet above the sea, near the salt lake of Aullagas, and possesses mines of silver, gold, and tin. Founded in 1590, it had 70,000 inhabitants in the 17th century, but now has 20,000.

Orvieto (*Or-vee-eh'to*), a city in the Italian province of Perugia, 78 miles NNW. of Rome, crowns an isolated tufa rock, which rises 765 feet above the river Paglia, and 1327 above sea-level. The cruciform cathedral (1290–1580), one of the most beautiful specimens of Italian Gothic, is built of black and white marble, and measures 295 feet by 109. The façade is unsurpassed for its mosaics, sculptures, and elaborate ornamentation. The interior also is magnificently decorated with sculptures and with paintings by Luca Signorelli, Fra Angelico, &c. The bishop's palace and St Patrick's Well (1527; disused), with its 250 steps, are also noteworthy. Pop. 20,000. Orvieto, called in the 7th c. A.D. *Urbs Vetus*—whence its present name—has by some been supposed to occupy the site of the Etruscan Volsinii. In the middle ages it gave shelter to thirty-two popes in times of trouble.

Orwell. See IPSWICH.

Osa'ka, or OZAKA, an important city of central Japan, situated at the head of the gulf of the same name, and at the mouth of the Yodo River, which issues from Lake Biwa. Its fine castle, the stones of whose walls are of astonishing size, was constructed in 1583, and the palace, built in its precincts and destroyed in 1868, was perhaps the most magnificent structure in Japan. Intersected with canals, Osaka is the commercial centre of the empire, and the headquarters of the rice and tea trade. Pop. 1,227,000.

Osborne House. See COWES.

Oscott, a Roman Catholic college, 4 miles N. of Birmingham. Dating from 1752, and rebuilt in 1835, it has since 1889 become a seminary.

Oshkosh, capital of Winnebago county, Wisconsin, on the Fox River, at its entrance to Lake Winnebago, 80 miles by rail NNW. of Milwaukee. The lake (30 miles by 12) forms, with the Fox and Wisconsin rivers, which are connected by a canal, a water-route between Lakes Michigan and Superior. The city extends along the lake for 4 miles, and carries on a great trade in lumber. It has also extensive door and sash factories, and large manufactories of furniture, matches, carriages, and soap, besides pork-packing establishments. It is the seat of a state normal school, and close by is a state lunatic asylum. Oshkosh was incorporated in 1853, and burned down in 1859; it was again partially destroyed by fire in 1874 and 1875, and in 1885 a cyclone overwhelmed part of the suburbs. Pop. 33,000.

Oskaloosa, capital of Mahaska county, Iowa, 104 miles WNW. of Burlington. It mines bituminous coal, and manufactures flour, woollens, boilers, electric appliances, &c. Here are Penn College (Quaker) and two others. Pop. 9500.

Osmington, a Dorset parish, 4 miles NE. of Weymouth. Here is a mounted figure of George III. cut out in the turf.

Osnabrück, a town in the Prussian province of Hanover, in the fertile valley of the Hase, 75 miles by rail SSW. of Bremen and 70 WSW. of Hanover. Its great Catholic cathedral, whose see was founded by Charlemagne about 810, and re-established in 1857, is in the Transition style of the first half of the 13th century, and rich in relics and monuments; the town-hall (1486–1512) contains portraits of all the plenipotentiaries who here on 24th October 1648 signed the peace of Westphalia. Osnabrück has important iron and steel works, and manufactures of railway plant, agricultural machinery, gas-meters, paper, tobacco, &c. Dating from 772, it suffered much in the Thirty Years' War, but recovered, thanks to its linen industry, during the 18th century. The name *Osnaburgs* given to coarse linens in England is derived hence. Pop. 66,000, one-third Catholics.

Osrhoene (*Oz-ree'nee*), a district in the north-west of Mesopotamia, containing Edessa (q.v.).

Ossa, the ancient name of a mountain on the east side of Thessaly, near Pelion (q.v.), and separated from Olympus by the vale of Tempe.

Ossett, a town in the West Riding of Yorkshire, 3 miles W. of Wakefield. Pop. 14,000.

Ossining, the name of what used to be called Sing-Sing (q.v.).

Ostashkoff, a town of Russia, 107 miles W. by N. of Tver. Pop. 12,000.

Ostend', a fashionable watering-place in the Belgian province of West Flanders, on the German Ocean, 77 miles by rail WNW. of Brussels. Its *Digue*, or sea-wall, 3 miles long, 40 feet high, and 35 yards broad, forms a favourite promenade, as also do the two *Estacades*, or wooden piers, projecting on both sides of the harbour's entrance. Harbour extensions were carried out in 1900–5, and further works have been found necessary. As a station for Dover and London steamers, and the terminus of various lines of railway, Ostend is a lively and active place of transport traffic (butter, rabbits, oysters, &c.), and the resort in the season (July to September) of 16,000 to 50,000 visitors from all parts of the Continent. It is, moreover, an important fishing-station, and has a good school of navigation, a handsome Kursaal (1878), an hôtel-de-ville (1711), a fish-market, and a lighthouse (1771; 175 feet). The manufactures include linen, sailcloth, candles, and tobacco. The population is about 44,000. Dating from 1072, Ostend is memorable for the protracted siege by the Spaniards which it underwent from 7th July 1601 to 20th September 1604. Twice again it surrendered—to the Allies in 1706, and to the French in 1745. The fortifications have been demolished since 1865.

Ostero'de, a town of Hanover, at the western base of the Harz Mountains, on the Söse, an affluent of the Leine, 30 miles by rail NW. of Nordhausen. Its church of St Giles (724; rebuilt 1578) contains the graves of the Dukes of Grubenhagen, and there is also a fine town-hall. Pop. 8000.—OSTERODE, in East Prussia, on the Drewenz, 77 miles NE. of Thorn, has a castle of the Teutonic knights (1270). Pop. 15,000.

Ostia, a city of Latium, at the mouth of the Tiber, 14 miles SW. of Rome. It was a mere ruin in 830, when Gregory IV. founded a village—the modern Ostia—near the ancient one, whose ruins extend for a mile and a half along the Tiber.

Ostrau, the name of two neighbouring towns in Moravia and Silesia, 80 miles W. by S. from Cracow. Moravian Ostrau has extensive iron-works and other manufactures; pop. 37,000. Polish Ostrau is the centre of a rich coalfield; pop. 20,000.

Ostrog, a town of Russia, in Volhynia, 176 miles W. of Kieff; pop. 20,000, mostly Jews.

Ostu'ni, a city of south Italy, 22 miles NW. of Brindisi by rail; pop. 25,000.

Osu'na, a town of Spain, 66 miles by rail ESE. of Seville, stands on a triangular hill crowned by the castle of the Girons, Dukes of Osuna, and by a collegiate church (1534); pop. 20,000.

Oswe'go, the capital of Oswego county, New York, is situated at the mouth of Oswego River (here crossed by three bridges), on Lake Ontario, at the extremity of the Oswego Canal (to Syracuse), 326 miles by rail NW. of New York City. It has a United States government building, court-house, city-hall, state armoury, &c., and is the principal port on the lake, with a breakwater, large elevators, and 4 miles of wharves. The river falls here 34 feet, and the water-power is utilised in flour-mills, knitting-mills, &c. Oswego starch and corn-flour are household words. Pop. 24,000.

Os'westry, a thriving market-town and municipal borough (1397) of Shropshire, 18 miles NW. of Shrewsbury. It has an old parish church, restored in 1872 at a cost of £10,000; a fragment of the Norman castle of Walter Fitzalan, progenitor of the royal Stewarts; and a 15th-century grammar-school, rebuilt in 1810 and enlarged in 1863–78. Railway workshops were established in 1865, and sewerage and water works in 1866. Oswestry derives its name from St Oswald, slain here in 642. In 1644 it was captured by the parliamentarians. Pop. 10,000. See works by Price (1815) and Cathrall (1855).

Otago (*Otah'go;* prob. from Maori *Otakou*, 'red earth'), the most southern provincial district of New Zealand, in the South Island, till 1876 one of the original six provinces in the colony. It was colonised in 1848 by the Otago Association. It has a coast-line of 400 miles, and an area of over 16,000,000 acres. Pop. (1891) 153,005; (1911) 191,130. Gold was discovered here in 1861. Dunedin (q.v.) is the capital.

Otaheite. See TAHITI.

Otaru, a large seaport of Yezo (Hokkaido), Japan, on the west coast, 22 miles W. of Sapporo. It has important herring-fisheries and a well-protected harbour, and has railway connection with Sapporo. Pop. 100,000.

Otchakoff, a Russian seaport, on the north shore of the Dnieper's estuary, 38 miles ENE. of Odessa. After it had been bombarded by the Allied fleet in 1855, the Russians demolished the fortifications. In 1887 a ship-canal was opened here, which makes the estuary of the Bug and Dnieper accessible to large ships. Pop. 15,000.

Otley, a market-town in the West Riding of Yorkshire, on the Wharfe's right bank, and at the north base of Otley Chevin (925 feet), 10 miles NW. of Leeds. It has an interesting church, a court-house (1875), a mechanics' institute (1869), and a grammar-school (1602). Machine-making is the principal industry, with worsted and leather manufactures. Pop. 10,000.

Otranto (anc. *Hydruntum*), a decayed seaport in the extreme south-east of Italy, 29 miles by rail SE. of Lecce, and on the Strait of Otranto, 45 miles from the opposite coast of Albania. Long the chief port for Greece, it has a ruined castle, which gave title to Horace Walpole's story, and an archiepiscopal cathedral, restored since the capture of Otranto in 1480 by the Turks. Pop. 3000.

Ott′awa, one of the largest rivers of British North America, rises nearly 300 miles due north of Ottawa City, flows 300 miles west to Lake Temiscamingue, and thence 400 miles south-east, and falls into the St Lawrence by two mouths, which form the island of Montreal. During its course it sometimes contracts to 40 or 50 yards; elsewhere it widens into numerous lakes of considerable size. Of its many tributaries the chief are the Petewawa, Bonnechère, Madawaska, and Rideau on the right, and the Coulonge, Gatineau, and Rivières du Lièvre and du Nord on the left. These, with the Ottawa, form the means of transit for the largest lumber trade in the world.

Ottawa, the capital of the Dominion of Canada, is situated upon the south bank of the Ottawa River, 120 miles from its influx into the St Lawrence at Montreal. The river here forms the splendid Chaudière Falls (200 yards wide and 40 feet high), above which a suspension bridge spans the river, and which supply the motive-power for the numerous lumber-mills, flour-mills, factories, &c. East of the city the river Rideau forms a second fall. The Rideau Canal (1827) passes through the centre of the city, and connects with the Rideau Lakes, and so with the great lakes beyond. Opposite the city, to the NE., the Gatineau River joins the Ottawa. The industries of Ottawa are mostly connected with lumber. In the winter thousands of men are engaged in cutting timber and drawing it to the streams, and in the spring the freshets carry the rafts down to the mills. Flour, iron wares, bricks, leather, and matches are also manufactured. The parliamentary buildings, constructed in the Italian Gothic style after 1860, are on a bluff on the river-bank. They include the handsome library building and the Victoria Tower (180 feet). Adjoining buildings on Parliament Hill are devoted to departments of the Dominion government. The residence of the governor-general—an old-fashioned, ugly building, called Rideau Hall—is about a mile from the city. The post-office, city-hall, banks, and telegraph-offices are handsomely built of stone. Ottawa is the place of residence of the bishop of Ontario (Church of England), and of the Roman Catholic bishop of Ottawa, who has a cathedral here. There are a normal school and a collegiate institute, a very large college conducted by the Oblate Fathers, a ladies' college, a musical academy, an art school, a well-equipped geological museum, and the parliamentary library, with 300,000 volumes. The city was begun in the last years of the 18th century by a settler named Wright, of Boston, Massachusetts, who built himself a residence near the Chaudière, and called the village which he founded Hull. The construction of the Rideau Canal (1827) stimulated the settlement, which was called Bytown. In 1854 its name was changed to Ottawa, and the town was created a city. Pop. (1861) 15,000; (1881) 27,412; (1901) 59,120; (1911) 87,062, about one-half being Roman Catholics. In 1858 Ottawa was chosen as the administrative capital of Canada. The first parliament met here in 1865.

Ottawa, (1) capital of La Salle county, Illinois, at the confluence of the Fox and Illinois rivers, 82 miles by rail WSW. of Chicago. It has a spring rich in bromine and iodine, and manufactures glass, flour, cutlery, tiles, fire-proofing, organs, and pianos. Pop. 10,000.—(2) Capital of Franklin county, Kansas, on the Osage River, 68 miles by rail SW. of Kansas City, with a college, foundry, and railway-shops, manufactures flour, furniture, carriages, and soap. Pop. 8000.

Otter, a Devon stream running 24 miles to the English Channel, 5 miles SW. of Sidmouth.

Otterbourne, a Hampshire parish, 4 miles SW. of Winchester.

Otterburn, a small village in Redesdale, Northumberland, 16 miles S. of the Border, and 32 miles NW. of Newcastle, on the benty uplands a little to the west of which, during the moonlit night of 19th August 1388, 2300 Scots under the Earls of Douglas, Dunbar, and Moray, defeated 8600 English under Harry Percy ('Hotspur'), the latter being made prisoner, and Douglas slain. See Robert White's monograph (1857).

Ott′ery St Mary, a town of Devonshire, on the river Otter, 11 miles (15 by rail) E. of Exeter. Twice the scene of a great conflagration, in 1767 and 1866, it retains its magnificent collegiate church, a reduced copy of the cathedral of Exeter (q.v.), with the only other transeptal towers in England. Begun about 1260 by Bishop Bronescombe, it is Early English, Decorated, and Perpendicular in style, and was restored by Butterfield in 1849–50. The Old King's Grammar-school was demolished in 1884. Alexander Barclay was a priest here; Coleridge was a native; and 'Clavering' in *Pendennis* is Ottery St Mary, the Devonshire residence of Thackeray's stepfather. Silk shoe-laces, handkerchiefs, and Honiton lace are manufactured. Pop. 3700.

Ottoman Empire. See TURKEY.

Ottum′wa, capital of Wapello county, Iowa, on the Des Moines River, 75 miles by rail W. by N. of Burlington, in the heart of the state's bituminous coalfields. The residence portion extends along the high bluffs. A number of railways meet here. Great dams concentrate the river's water-power; and there are planing, flour, starch, and linseed-oil mills, foundries, plough, cutlery, and screen factories, bridge-works, cooperages, and furniture, boiler, and pork-packing works. Pop. 22,000.

Ouchy. See LAUSANNE.

Oudenarde (Fr. pron. *Ood′nârd;* Flemish *Ow-de-nar′day*), a town of Belgium, on the Scheldt, 37 miles W. of Brussels. It has a fine flamboyant Gothic town-hall (1535) and two interesting churches. Margaret of Parma was born here. Pop. 7000. In 1706 Oudenarde was taken by Marlborough; and a French attempt to retake it brought about the third of Marlborough's four great victories over the French, 11th July 1708.

Oudh (*Owd*), or AWADH, a great plain sloping southward to the Ganges and watered by the Gumti, Gogra, and Rapti rivers, was made a British commissionership in 1858, and from 1877 was administered by the lieutenant-governor of the North-west Provinces (q.v.); but since 1901 the latter term is disused, the two areas being jointly known as the United Provinces of Agra and Oudh. Area of Oudh, 24,000 square miles; population, 12,558,000. The bulk of the inhabitants of Oudh are Hindus, though the dominant native race for centuries has been Mohammedan. The Brahmans are about one-eighth of the whole population. The principal towns are Lucknow (the capital), Faizabad, Bahraich, Shahabad, Rai Bareli. Oudh was one of the oldest homes of Aryan civilisation in India. After being the seat of a long native Hindu dynasty it was subjugated by the ruler of Kanauj, and in 1194 was made subject to the Mussulman empire of Delhi. In 1732–43 it became virtually an independent state, and the dynasty of the Nawabs lasted until the annexation by the British in 1856. During the mutiny of 1857 Oudh was a centre of rebellion.—For the city of Oudh, see Ajodhya.

Oughterard (*Ohh-ter-ard'*), market-town on the W. shore of Lough Corrib, 17 miles NW. of Galway. Pop. 600.

Oulton, (1) a Suffolk parish, on Oulton Broad, 2½ miles W. of Lowestoft. George Borrow lived and died here.—(2) A village in Rothwell parish, West Riding of Yorkshire, 5½ miles ESE. of Leeds. Richard Bentley was born here.

Oundle, a small but ancient and pleasant town of Northamptonshire, 13 miles SW. of Peterborough by rail, has an old church, partly Early English and partly Decorated, restored in 1864. Lace is made. Here St Wilfrid died. Laxton's Grammar-school dates from 1550. Pop. 3000.

Ouro Preto (*Ooro Pray'to;* 'Black Gold'), a city of the province of Minas Geraes, Brazil, stands among barren mountains, 3780 feet above sea-level, and 200 miles N. by W. of Rio Janeiro. The gold-mining is now trifling. Pop. 10,000.

Ouse (*Ooz*), a river of Yorkshire, formed by the union of the Swale and the Ure near Boroughbridge, and flowing 60 miles south-eastward past York, Selby, and Goole. About 8 miles below the last town it joins the Trent, and forms the estuary of the Humber (q.v.). The last 45 miles (from York) are navigable for large vessels. Its principal affluents are the Wharfe, Aire, and Derwent.—The Great Ouse, rising close to Brackley, in the south of Northamptonshire, flows 160 miles north-eastward through Buckingham, Bedford, Huntingdon, Cambridge, and Norfolk, till it falls into the Wash, 2½ miles below Lynn. It is navigable for 50 miles. It receives the Ivel, Cam, Lark, and Little Ouse.

Ousuri, or Usuri. See Amur.

Ovenden, a NW. suburb of Halifax.

Over, a town of Cheshire, 4¼ miles W. of Middlewich, part of Winsford urban district.

Over Darwen. See Darwen.

Overton, a parliamentary borough of Flintshire (detached), near the Dee, 23 miles NNW. of Shrewsbury. With Flint, &c., it returns one member. Pop. 1200.

Overtown, a Lanarkshire village, 1½ mile SE. of Wishaw.

Overyssel (*y* like *ī*), a Dutch province, lying east of the Zuider Zee, and separated from Guelderland on the south by the river Yssel; area, 1300 sq. m.; pop. 400,000. The chief cities are Zwolle, Deventer, and Kampen.

Oviedo (*Oveeay'do;* anc. *Ovetum* or *Asturum Lucus*), the capital of the Spanish province of Asturias, 20 miles by rail SSW. of Gijon on the Bay of Biscay and 87 N. by W. of Leon. Sheltered to the north by a hill 470 feet high, it has four main streets, branching off from a central square, and possesses a cathedral, a university (1604), a theatre, a botanic garden, a fine aqueduct, &c. The cruciform cathedral, dating from 781, but mainly rebuilt 1388–1528, is a noble specimen of Gothic, with a tower 284 feet high, the remains of fourteen early kings and queens of Asturias, many relics, and a fine old library. Linens, woollens, hats, and firearms are manufactured; near by are ironworks, and at Prutia (12 miles W.) a government foundry, producing cannon, rifles, bayonets, &c. Pop. 53,000.

Ovoca. See Avoca.

Owe'go, capital of Tioga county, New York, on the Susquehanna River (here bridged), at the mouth of Owego Creek, 228 miles by rail NW. of New York City. It manufactures pianos, flour, soap, leather, &c. Pop. 4600.

Owensboro, capital of Daviess county, Kentucky, on the Ohio, 160 miles below Louisville (112 by rail). It has tobacco-factories, whisky distilleries, foundries, flour and planing mills, &c. Pop. 10,000.

Owen Sound, a town and port of entry of Ontario, at the head of Georgian Bay, 122 miles by rail NW. of Toronto. It possesses a deep sheltered harbour (12 miles by 5), trades in lumber and grain, and manufactures furniture and wooden wares, machinery, woollen goods, &c. The Canadian Pacific steamers leave here for Port Arthur. Pop. 13,000.

Owston Ferry, a Lincolnshire town, on the Trent, 7 miles N. of Gainsborough; pop. 1200.

Owosso, or Owasso, a city of Michigan, on the Shiawassee River, 78 miles by rail NW. of Detroit. The river supplies abundant water-power, and there are flour and planing mills, furniture and sash factories, foundries, and railway-shops. Pop. 10,000.

Oxenhope, a town in the West Riding of Yorkshire, 5 miles S. of Keighley; pop. 2500.

Oxford, the capital of the county, the home of the university, and the seat of the bishopric of the same name, stands about the confluence of the rivers Cherwell and Thames, 52 miles (63 by rail) WNW. from London. Up to 1885 the city returned two members to parliament; since that date only one. Until about 1830 the area and population of the city remained almost stationary, extending only a little beyond the limit of the old city wall as reconstructed in the reign of Henry III. But since then the city has grown rapidly, and the rural districts of St Giles' on the north, St Clement's on the west, Grandpont on the south, and Botley on the east have been covered with lines of close-built streets. Pop. (1801) 11,000; (1861) 27,560; (1881) 40,837; (1911) 53,048. The topography of Oxford is simple in the extreme. The river Thames (locally called the 'Isis'), takes here a sharp bend to the east, and about a mile from the angle receives the Cherwell, flowing from the north. All the old part of the town stands in the rectangle thus formed by the rivers. The centre of the town is at a place called 'Carfax' (derived from *quadrifurcus*, 'four-forked'), from which four main streets (traversed since 1883 by tram-lines) run to the four points of the compass. *North* runs Cornmarket Street ('the Corn'); *east*, High Street ('the High') to Magdalen Bridge over the Cherwell; *south*, St Aldgate's Street to Folly Bridge over the Isis; and *west*, Queen Street to the Castle and station. Among Oxford's countless buildings are All Souls College (founded 1437); the Ashmolean Museum (1682); Balliol College (c. 1268); the Bodleian Library (1602; 800,000 books, 30,000 MSS.); Brasenose College (1509); Christ Church College (1525–46; its chapel the cathedral 1120 and onwards); the Clarendon Building (1712–30, till 1830 the University Press); Corpus Christi College (1516); the Divinity Schools (1445–80); the Examination Schools (1882); Exeter College (1314); Hertford College (1874); the Indian Institute (1884); Jesus College (1571; still partly Welsh); Keble College (1870); Lincoln College (1429); Magdalen College (1458); Manchester College (1893); Mansfield College (1886); the Martyrs' Memorial (1841); St Mary's Church (1300–1488), with a spire

180 feet high; Merton College (1264); the New Museum (1856-60); New College (1379); Oriel College (1326); Pembroke College (1624); Queen's College (1340); the domed Radcliffe Library (1749; since 1861 a reading-room for the Bodleian); the Radcliffe Observatory (1795); St John's College (1555); the Sheldonian Theatre (1669; in which 'Commemoration' is held); the Taylor Institution (1843); Trinity College (1554); the Union Society (1823; new building 1859); University College (1249; *not* founded by King Alfred in 872); The University Press (1830); Wadham College (1613); and Worcester College (1714). To which may be added Somerville College (1879), Lady Margaret Hall, and St Hugh's Hall, all for women.

The university of Oxford, which dates from the 12th century, comprises twenty-one colleges. It has a teaching body of about 140 professors, readers, and lecturers, and about 4000 undergraduates, including about 250 unattached or non-collegiate students. A few of its great alumni have been Duns Scotus, Roger Bacon, Wolsey, Raleigh, Jewel, Hooker, Sir Philip Sidney, William Harvey, Blake, John Hampden, Burton, Herrick, Jeremy Taylor, Lovelace, Hobbes, Clarendon, Evelyn, Locke, Wycherley, Addison, Steele, Collins, Dr Johnson, Wesley, Chatham, Adam Smith, Gibbon, Gilbert White, Fox, Southey, Shelley, De Quincey, Landor, Keble, Cardinals Newman and Manning, Gladstone, Froude, Freeman, Green, Ruskin, Matthew Arnold, Clough, and Swinburne.

See, besides Anthony Wood's great works, others by the Rev. C. W. Boase ('Historic Towns' series, Longmans, 1887); Maxwell Lyte (1886); Dr Brodrick (1886); the Rev. E. Marshall ('Diocesan Histories' series, 1882); A. Lang (new ed. 1890); and A. Clark (1891); 'A Mere Don' (1894); with Parker's *Handbook for Oxford*, as an admirable guide to the architectural features of the city.

Oxfordshire, an inland county of England, in shape very irregular, and with an extreme length and breadth of 48 miles by 26; is bounded by Warwickshire, Northants, Bucks, Berkshire, and Gloucestershire. Area, 749 sq. m., or 479,220 acres; pop. (1808) 109,620; (1881) 179,559; (1911) 189,484. Flat and bleak in the north and west, except near Edgehill (q.v.), on the Warwickshire border, and undulating in the central district, the county in the south presents a succession of richly wooded hills, alternating with picturesque dales, and terminating on the south-east border with a branch of the Chiltern Hills, which, near Nuffield, attain a height of nearly 700 feet above the sea-level. Foremost, however, among the natural beauties of Oxfordshire are the numerous rivers by which it is watered, notably the Thames, with its affluents the Windrush, Evenlode, Cherwell, and Thame. The soil in general is fertile. Ironstone is extensively worked near Banbury, whilst there are manufactures of blankets at Witney, paper at Shiplake and Henley, and, to a certain extent, gloves at Woodstock. The county contains fourteen hundreds, the county borough of Oxford, the other municipal boroughs of Banbury, Chipping Norton, Henley-on-Thames, and Woodstock, and 303 civil parishes, all in the diocese of Oxford. Three members are returned for the county, as also one for the city of Oxford and two for the university. The battlefields of Chalgrove (1643) and Cropredy Bridge (1644) may be mentioned; and among Oxfordshire worthies are Edward the Confessor, Leland (the antiquary), Viscount Falkland, 'Doctor' Fell, Warren Hastings, Miss Edgeworth, Charles Reade, and Green (the historian). See the 'Victoria History' (1907 *et seq.*).

Oxus, the ancient name of the Amu or Amu-Daria, a river in western Asia, called by Arab writers the Jihûn. It rises in the elevated table-lands between the Tian-Shan Mountains and the Hindu-Kush, and flows west as far as 66° E. long. through Badakshan, and then north-west through Bokhara and Khiva, and empties itself by several mouths into the southern end of the Sea of Aral. There are two main head-streams issuing at 13,042 and 14,177 feet respectively, and uniting in 71° 20′ E. long. at 7500 feet. The Oxus receives few tributaries after it turns north-west, its course then running through the deserts of Turkestan. The delta is 90 miles long, and embraces many lakes and marshes. The principal use made of the river is for irrigation; Khiva owes its prosperity to its waters. The Oxus is navigated by steamers up to about 68° E. It is believed that before the Christian era the Oxus flowed into the Caspian, and that since 600 A.D. it has twice changed its course. Between Merv and Bokhara it is spanned by a railway viaduct (1888), 6804 feet long. See works by J. Wood (1841; new ed. by Colonel Yule, 1872) and MacGahan (1876).

Oykell. See OIKELL.

Oyster Bay, a watering-place of New York State, on an inlet of Long Island Sound, 30 miles E. by N. of New York. Pop. 22,000.

PAARL, capital of a district in the Cape Province, 40 miles NE. of Capetown by rail; pop. 12,000.

Pabbay, an Inverness-shire island, 6½ miles S. of Barra.

Pabna, a town of Bengal, on an arm of the Ganges, 115 miles N. of Calcutta. Pop. 20,000.

Pachacamac′, a village of Peru, 18 miles SE. of Lima, with the ruins of a temple from which Pizarro took immense treasure.

Pachmarhi, a sanatorium in the Central Provinces, India, 2500 feet above the plains.

Pachuca, a Mexican silver-mining town, 55 m. NNE. of Mexico, capital of Hidalgo; pop. 40,000.

Pacific Ocean occupies about one-half of the water-surface of the globe and more than one-third of the area of the world. It is almost landlocked towards the north, communicating with the Arctic Ocean by the narrow (40 miles) and shallow Behring Strait, whereas it opens widely into the deep Southern and Antarctic Oceans. Its length from north to south (the Antarctic Circle) is about 9000 miles; its greatest breadth, at the equator, is over 10,000 miles; its area is approximately 70,000,000 sq. m. It was first seen by Europeans in 1513, when Balboa, with a few followers, viewed its waters from the summit of a peak in Darien; the first European to sail upon it was Magellan (1520), who gave it the name Pacific. Sir Francis Drake was the first Englishman to sail upon it (1577). The area of land draining into it—7,500,000 sq. m.—is less than half of that draining into the Atlantic. The largest American river flowing into it is the Yukon (2000 miles); others are the Fraser, Columbia or Oregon, Sacramento, and Colorado. The South American rivers are little more than mountain-streams. The Asiatic rivers include some of the largest rivers of the world—the Amur, Hoang-ho, Yang-tse-kiang, Mekong, and Menam. Generally speaking, the American and Australian coasts bordering the Pacific are mountainous and free from indentations, while the Asiatic coasts are low and fertile, with many gulfs and bays, and fringed with island groups.

The Pacific Ocean is remarkable for the innumerable small islands and island groups which stud its surface, but the area occupied by the truly oceanic islands is very small; they are principally congregated towards the central and western portions of its basin, while the eastern portion is comparatively free from islands. The larger islands—Borneo, New Guinea, Celebes, Java, Sumatra, &c.—are continental. The oceanic islands—the Sandwich Islands, Ladrones, Carolines, Gilbert Islands, Solomons, Fiji, Friendly Islands, Samoa, &c.—of the Pacific are all either of volcanic or coral origin, the volcanic islands within the zone of coral-reef builders being fringed with coral reefs, while many are entirely of coral formation. Some of the greatest depths in the world occur in the Pacific, in its western basin; on the whole it is deeper than the Atlantic, its mean depth being about 2500 fathoms. The eastern basin is comparatively uniform in depth, between 2000 and 3000 fathoms. The western basin is much more diversified, numerous groups of islands, shallow water, and immense depths occurring irregularly. The *Challenger* found a depth of 4575 fathoms (nearly 5¼ miles) between the Caroline and Ladrone Islands, the *Tuscarora* 4655 fathoms to the north-east of Japan, the *Planet* 5348 fathoms north-east of the Philippines. The surface-currents of the Pacific Ocean depend to a great extent upon the direction of the prevailing winds, the principal of which are the two trade-winds, blowing more or less constantly, the one from the north-east, the other from the south-east. Between these two regions is what is called the equatorial belt of calms. In addition to the trade-winds, there are the monsoons, which blow with great regularity, but the direction of which changes according to the season. A cold surface-current flows constantly northwards from the Antarctic. The great equatorial current flows to the westward. The temperature of the surface-waters of the Pacific varies with the season, but in the tropical regions the variation is very small. The highest temperature occurs among the islands of the Malay Archipelago and off the Mexican coast, where the mean temperature rises to 85° F. The temperature of the water below the surface as a general rule decreases as the depth increases, the lowest temperature occurring at great depths, where the bottom temperature appears to be nearly constant all the year round, usually about 35° F.

Pacto'lus (mod. *Sarabat*), anciently the name of a small brook of Lydia, in Asia Minor, flowing to the Hermus, and famous for its gold-dust.

Padang, capital of a residency on the west coast of Sumatra at the mouth of the Padang River. Pop. 90,000.

Paddington, a parliamentary and metropolitan borough of London. Pop. 142,600.

Paderborn, a town of Westphalia, 50 miles SW. of Hanover. It has been largely rebuilt since a destructive fire in 1875. The fine Romanesque cathedral (R. C.), completed in 1163, is built over the sources of the Pader (a feeder of the Lippe), and contains the silver coffin of St Liborius. Other edifices are St Bartholomew's Chapel (1017) and the town-house (1615; restored 1870–76). There are glass, soap, and tobacco factories, breweries, railway and printing works, and mineral springs close by. Pop. 30,000.

Padiham, a town of Lancashire, 3 miles W. of Burnley and 8 NE. of Blackburn. Cotton is the staple manufacture, with coal-mining and stone-quarrying. Pop., with Hapton, 13,600.

Padstow, a Cornish seaport, on the Camel's estuary, 12 miles WNW. of Bodmin; pop. 2500.

Pad'ua (Ital. *Pad'ova*), a city of north Italy, 23 miles by rail W. by S. of Venice and 18 SE. of Vicenza, is still surrounded with walls. The municipal palace (1172–1219) is a huge structure resting on arches, with balconies running round the upper story. The roof (1420) of its great hall (267½ feet long, by 89 wide, and 78 high) is perhaps (with the exception of King's Chapel, Cambridge) the largest in Europe unsupported by pillars. The churches (nearly fifty) include the cathedral (1552–1754); St Antony (1230–1307); St Justina (16th century); and the chapel of the Annunciation (1303), with frescoes by Giotto. The 'saint's school' is adorned with frescoes by Titian and his pupils, illustrating the life of St Antony. Donatello's fine equestrian statue of Gattamelata, the Venetian captain, stands in front of the church of St Antony. Padua has enjoyed greatest fame from her university, founded by the emperor Frederick II. in 1221, though the fine Renaissance buildings date only from 1493–1552; there are now 200 teachers and over 1300 students. To it are attached one of the oldest botanical gardens in Europe, and a library (1629) of 200,000 vols. and 2500 MSS. The city museum (1881) contains antiquarian, art, and numismatic collections, a library, and archives. Pop. 96,000. Padua's most celebrated natives were Livy and the painter Mantegna. *Patavia* came under the Roman supremacy in 215 B.C. Venice held it from 1405 to 1797, and then Austria, until it was incorporated in Italy in 1866.

Padu'cah, capital of McCracken county, Kentucky, on the Ohio River, 48 miles above its mouth, just below the entrance of the Tennessee, and 226 miles WSW. of Louisville. It has shipyards, foundries, railway-shops, flour, saw, and planing mills, and manufactures soap, vinegar, ice, furniture, tobacco, &c. Pop. 23,000.

Pæstum, an ancient Greek city of southern Italy, on the Gulf of Salerno, with three well-preserved Doric temples.

Pago-Pago, or PANGO-PANGO, an excellent harbour and coaling-station on Tutuila, one of the Samoan islands belonging to the United States.

Pahang. See STRAITS SETTLEMENTS.

Paignton (*Pain'ton*), a Devon watering-place, 2¼ miles S. of Torquay. Near it is a ruined palace of the bishops of Exeter. Pop. of the urban district, 11,300.

Painswick, a Gloucestershire town, 6 miles SSE. of Gloucester; pop. 2700.

Paisley, a busy manufacturing town of Renfrewshire, stands, backed by the Braes of Gleniffer (749 feet), on the White Cart, 3 miles above its influx to the Clyde, 7 WSW. of Glasgow and 16 ESE. of Greenock. Although commonly identified with the *Vanduara* or *Vindogara* of Ptolemy, which Skene places rather at Loudoun Hill in Ayrshire, it first is heard of certainly about 1157 as *Passeleth*, a possession of Walter Fitzalan, the first Scottish ancestor of the royal Stewarts. He six years later founded here a Clugniac priory, which was dedicated to SS. James, Mirin, and Milburga, and which in 1219 was raised to the rank of an abbey. It was burned by the English in 1307; suffered much at the Reformation in 1561, and still more by subsequent vandalism; and now is represented chiefly by the aisled Decorated nave (15th century: the Abbey parish church, restored since 1862), and by the chapel of St Mirin, called the 'Sounding Aisle' (1499), with the altar-tomb of Marjory Bruce. Near the abbey are statues of Wilson the ornithologist and Tannahill, who, like Professor Wilson ('Christopher North'), were natives of Paisley. There are also statues of George A. Clark, founder of the town-hall, and (since 1891) of Sir Peter and Thomas Coats. Motherwell and Alexander Smith were residents; Elderslie, 2 miles W., is the traditional birthplace of Wallace. Public edifices are the municipal (formerly county) buildings (1818); sheriff court-house (1885); the Clark town-hall, Italian in style, and built in 1879–82 at a cost of £110,000; the new county buildings (1891), containing one of the finest council halls in Scotland; the Coats free library and museum (1871), with a picture-gallery and an observatory; the grammar-school (1576; rebuilt 1864); and the Neilson educational institution (1852). The Coats Memorial Baptist Church (1891–94), Early English in style, with a Gothic crown completing the central tower, is, it is claimed, the finest ecclesiastical edifice built in Scotland since the Reformation, having cost £100,000. The Fountain Gardens (1868), the Brodie Park (1877), and St James's Park, round which is the racecourse, have an area respectively of 6, 22, and 40 acres.

The linen, lawn, and silk-gauze industries, important during the 18th century, are now extinct; as, too, are the 'Paisley shawls,' so celebrated between 1805 and the middle of the 19th century, their sale sometimes exceeding £1,000,000 per annum. The manufacture of linen sewing-thread, introduced in 1722 by the witch-denouncer Christian Shaw of Bargarran, has been nearly superseded since 1812 by that of cotton thread, which has assumed gigantic proportions. There are also works for dyeing, bleaching, tartans, woollen shawls, carpets, chemicals, starch, corn-flour, soap, paper, and preserves, and for engineering, the building of ships and motor-cars, &c. Paisley is connected with Glasgow by electric tramway. The Cart since 1786 has been deepened (to 18 feet in 1888–90); and water-works (1834–90) furnish 6,000,000 gallons per diem to Paisley and Johnstone. Paisley was made a free burgh of barony in 1488, the fourth centenary of that event in 1888 being graced by the presence of Queen Victoria, who afterwards placed a memorial of the Stewarts in the ruined choir of the abbey. Since 1833 it has returned one member to parliament. In 1843 the corporation had to suspend payment, nor was the burgh clear of debt until 1877. Pop. (1801) 24,324; (1841) 48,125; (1881) 55,627; (1911) 84,455. See Cosmo Innes's *Registrum Monasterii de Passelet* (Maitland Club, 1832), two works by Semple (1872–74), Dr Cameron Lees's *Abbey of Paisley* (1878), Robert Brown's *History of Paisley* (2 vols. 1886), and Metcalfe's (1909).

Pakenham, a Suffolk parish, 5 miles ENE. of Bury St Edmunds; pop. 900.

Pakhoi, a seaport of China, opened to trade in 1876, stands on the northern shore of the Gulf of Tonking. Pop. 25,000.

Palamcottah, a town of India, in Madras, 50 miles NNE. of Cape Comorin. Pop. 40,000.

Palanpur', capital of a native state in Gujarat, lies 83 miles N. of Ahmedabad by rail. Pop. 20,000.—The *state* has an area of 3177 sq. m. and a pop. of 225,000.

Palap'we, or PALAP'YE, a former capital of the Bechuanaland protectorate, is 60 miles NE. of Shoshong, long Khama's chief town, near the Transvaal frontier, and on the trade route and telegraph line to Matabeleland; pop. 10,000.

Palat'inate (so called because governed originally by a Count Palatine—i.e. 'of the palace;' Ger. *Pfalz*), two German states, which were united previously to the year 1623. They were distinguished as the Upper and Lower Palatinates, having Amberg and Heidelberg as their capitals; and they are now divided among Bavaria, Prussia, Baden, and Hesse.

Pal'atine Hill (*Palatium* or *Mons Palatinus*), the central hill of the famous seven on which ancient Rome (q.v.) was built.

Palem'bang, capital of a residency (formerly an independent kingdom) near the south end of Sumatra, stands on the river Musi, 50 miles from its mouth; the houses of the town are built on great log rafts on either bank. Pop. 60,000.

Palencia (anc. *Pallantia*), a walled city of Spain, in Old Castile, 180 miles by rail NNW. of Madrid and 29 NNE. of Valladolid. The Gothic cathedral was built 1321–1504. The university founded here in 1208 was removed to Salamanca in 1239. Pop. 16,000. Area of the *province* of Palencia, 3256 sq. m.; pop. 200,000.

Palenque (*Palen'kay*), great ruins in Mexico, between the Michol and Chacamas rivers, in the north of the state of Chiapas, 6½ miles E. of the village of Santo Domingo de Palenque. They extend over 20 to 30 acres, are buried in a dense tropical forest, and consist of vast terraced truncated pyramids, surmounted by solid edifices of cut stone, covered with figures in relief, or figures and hieroglyphics in stucco, with remains of brilliant colours. 'The Palace' is 228 feet long, 180 feet deep, and 25 feet high, not reckoning the terrace. See works by Charnay (Eng. trans. 1887) and La Rochefoucauld (Paris, 1888).

Paler'mo, formerly the capital of Sicily, now in point of population the fifth city of Italy, an archbishopric, and a seaport. It stands on a bay in the north-west corner of the island, at the mouth of a fertile valley called the Conca d'Oro ('Golden Shell'), 120 miles by rail W. of Messina, and occupies a picturesque site backed by mountains—on the north by Mount Pellegrino. The cathedral of St Rosalia, built (1169–85) by an Englishman, Archbishop Walter, contains the tombs of Roger I. and the emperors Henry VI. and Frederick II. There are close upon three hundred churches and chapels in Palermo. The royal palace, built by Roger I., is principally of Spanish construction; other public buildings are the archbishop's palace, town-house, law-courts, university, arsenal, &c. The university (1447) has 200 teachers and about 1400 students. There are also a national museum, the town library (1775) with 216,000 vols. and 3300 MSS., and the national library (1804) with 170,000 vols. and 12,000 MSS. Machinery, essences, sumach, turnery, iron-founding, books, gloves, and shoes represent the industries. But Palermo is an important seaport, with a large, though not growing, trade. Oranges, lemons, dried fruits, sumach, tartar, grain, oils, manna, sulphur, wine, animal produce, and lemon-juice are the principal exports. The imports include grain and vegetables, cottons and woollens, coals, live-stock, iron, timber, groceries, silk, hides, petroleum, machinery, linen, metals, and glassware. Population, 342,000. *Panormus*, the stronghold of Carthage in Sicily, was conquered successively by Pyrrhus (276 B.C.), the Romans (254 B.C.), the Vandals (440 A.D.), Belisarius (535), the Saracens (835), the Pisans (1063), and the Normans from Apulia (1071). Henceforward it was the capital of the kingdom of Sicily, first of the Norman kingdom, then of that of the Angevins and their Spanish successors. It suffered severely from earthquakes in 1693, 1726, and 1823. The city revolted against the Bourbon kings of Naples in 1820 and 1848, and was freed from them in 1860 by Garibaldi.

Pal′estine, Canaan, the Land of Israel, or the Holy Land, scene of most of the great events of sacred story, is a country in the SW. of Syria. Palestine proper (i.e. without the territory beyond Jordan) contains an area of about 6000 sq. m., or less than Yorkshire. The territory beyond Jordan may be reckoned at 2000–3000 sq. m. in addition. It is bounded N. by the river Kasimîyeh, E. by the Jordan, and W. by the sea. At first sight the map shows ridge upon ridge of hills running east and west, sloping gradually to the west, and descending steeply to the east. On the west is a long strip of low seaboard varying in breadth, vanishing altogether at the foot of Carmel, and broadening southward into the Plain of Philistia. Palestine, as a whole, is physically divisible into four parts: (1) The maritime district, extending along the Mediterranean, and including Philistia; (2) the central tableland or 'hill-country' of Judæa, culminating in the Lebanon towards the north and spreading out into the great plain of the Badiet-et-Tîh to the south; (3) the depression of the Jordan Valley and Dead Sea, separating Eastern from Western Palestine; and (4) the tableland of Edom, Moab, and the region of Trachonitis to the east of the Jordan Valley, bounded by an abrupt and lofty escarpment, and stretching away towards the east into the Desert of Arabia. In North Galilee the watershed runs at an average height of 2800 feet above the sea, while the highest peak rises to a height of 3934 feet. In Samaria the hills are lower, not rising above 3000 feet, while south of Jerusalem the hills again rise to over 3300 feet. The north country contains the Plains of Buttauf and the rich plain of Esdraelon, 20 miles long and 9 miles broad, elevated, at its highest point, 250 feet above the sea. The principal elevations are Jebel Jermûk, 3934 feet; Carmel, 1740 feet (12 miles long); Mount Ebal, 3084 feet, and Mount Gerizim, 2849 feet; Tell Asûr, 3318 feet; and Râs esh Sherifeh, 3258 feet. The Maritime Plain, formed partly by the denudation of the mountains and partly by accumulation of sand, possesses a fertile soil; deep gullies run across it, with, in some cases, perennial streams. The Jordan Valley begins with the rise of the stream 1000 feet above the Mediterranean, and in 100 miles falls to 1292 feet below it. This is a drop of nearly 2300 feet, or 23 feet in a mile. The valley itself varies in width from 5 miles, where it begins, to 13 miles in the Plain of Jericho. The country terminates southward with the Jeshimon, the 'Solitude' of the Old Testament or the 'Wilderness of Judæa' of the New, a plateau of white chalk rising in cliffs 2000 feet high above the Dead Sea. Palestine is poorly supplied with rivers. Among the best known are the Kishon (Mukatta), flowing to the Mediterranean; the Jalud and the Farah flowing into the Jordan from the west; the Jabbok (Zerka) and the Arnon (Mojib) flowing into the Jordan from the east. There are the three lakes of Huleh (the 'Waters of Merom'), the Sea of Galilee, and the Dead Sea, and plenty of springs.

The climate of Palestine is extremely hot in summer, when the temperature reaches 100° F., and in winter it is wet and cold, though frost does not occur on the plains. There are heavy dews. The 'former rain' and the 'latter rain' are those which occur at the autumnal and vernal equinoxes. The distinctive trees of the country are the terebinth, the olive, the cedar, and the sycamore. The shittim-wood is supposed to have been the acacia. The rose of Sharon is a white narcissus; and the lily of the valley is the blue iris. The crocodile is still found in one or two of the rivers. The wild-goat—*ibex*—is found in large herds in the southern wilderness; the lion is extinct; the bear lingers in the mountains; the hyæna is common; the wolf is rare; the dog is an unclean creature living in the outskirts of towns, and feeding on garbage. Of birds, all those mentioned in the Bible which can be identified may yet be found. The locust still devastates the crops, and the grasshopper serves for food.

Since the 2d century, Palestine has been a land of pilgrimage, and many early Christian writers describe the country. After the Moslem conquest, Mohammedans wrote largely of it. The Crusaders left accounts of their wars. Modern exploration began in the 19th century with Seetzen, Burckhardt, Buckingham, Irby and Mangles, Tobler, De Saulcy, Van de Velde, and Williams. The researches of Robinson in the years 1838–52, forced upon the world the necessity for an exhaustive survey of the country, which was carried out (1865–77 as regards Western Palestine) for the Palestine Exploration Fund (1865), chiefly by Major Conder, R.E. The whole of Western Palestine was (1880–81) mapped on a scale which includes every ruin as well as every spring, every watercourse, every wood, and every hillock. At least 150 lost Biblical sites have been recovered; by means of these the boundaries of the tribes can now be laid down; one-fourth only of the Bible names remain to be identified. The topography of Josephus, of the Talmud, of the pilgrims, and of the chroniclers has also been illustrated and recovered. All important heights have been ascertained; the levels of the Dead Sea and the Sea of Galilee are laid down; all the remaining ruins have been planned and drawn. The survey of Eastern Palestine was begun under the same auspices in 1881.

The present condition of the country shows the beginning of rapid changes in every direction. There are railways from Jaffa to Jerusalem, from Haifa and from Beyrout to Damascus, the two last connecting with the Mecca railway; there are many practicable roads; and there is even an hotel at Jericho. As regards Jerusalem, a new town has sprung up outside the walls; it is said that there are close upon 50,000 Jews in and about the Holy City; the Mount of Olives is being covered with buildings. There are Jewish colonies between Ramleh, Lydda, and Jaffa; there are German colonies in the same region; Circassians occupy Ammân, and are settling in the Haurân; the people from the Lebanon are coming down and covering the country east of the Jordan.

The name Palestine originally belonged merely to the coast strip occupied by the Philistines. The rest of the country west of the Jordan was, prior to the Jewish Conquest (1274 B.C.), occupied by some six or seven Canaanitish nations, all except the Hittites apparently of Semitic stock. East of the Jordan were the peoples of Moab, Ammon, Edom, and Midian, also Semitic, like the Israelites themselves. Jerusalem became the capital of a southern kingdom of Judah; the northern Israelite kingdom of the Ten Tribes had its capital at Shechem, Tirzah, and Samaria in succession. The Ten Tribes mostly disappeared during the captivity in Assyria (after 720 B.C.), a small remnant mixed with Assyrian colonists forming the Samaritan people. After the people of the southern kingdom returned from the great captivity in Babylon (538 B.C.), they occupied most of the country formerly belonging to the whole people of Israel, and are henceforward known to history as the Jews. The kingdom of Herod the Great (37–4 B.C.) covered most of the land divided by Joshua among the twelve tribes, but was now divided into Galilee, Samaria and Judæa, Idumæa and east of Jordan, Peræa, Gaulonitis, Auranitis, and Trachonitis. A period of prosperity ended with the siege and capture of Jerusalem by the Romans (70 A.D.), whereupon the Jews were scattered to the four winds; and Palestine, held by Persians, Saracens, Latin Crusaders, Turks, has never since been the home of a nation. In its palmiest days Palestine may have had from 2 to 3 millions of inhabitants; the present pop., estimated at 650,000, is very mixed in origin, but consists mainly of Syro-Arabian fellahin, speaking the Syrian dialect of Arabic.

See the *Survey of Western Palestine* (8 vols. 1881 *et. seq.;* discussing excavations, fauna, flora, geology, &c., by Conder, Kitchener, Warren, Tristram, Hull, &c.); *The Survey of Eastern Palestine;* Tristram, *The Land of Israel* (2d ed. 1872); Conder, *Palestine* (1889), and *Tent Work in Palestine* (1878); Thomson, *The Land and the Book* (1859; new ed. 1880–86); Guy le Strange, *Palestine under the Moslems* (1892); G. A. Smith, *Historical Geography of the Holy Land* (1894); Baedeker's guide by Socin, and Cook's; books by Temple (1888), Henderson (1893), Cooke (1901), Kelman and Fulleylove (1902), Hitchens (1910), Huntington (1912); works cited at JERUSALEM.

Palestine, capital of Anderson county, Texas, 151 miles by rail N. of Houston; pop. 10,500.

Palestrina (*Pa-les-tree'na;* anc. *Prœneste*), an Italian city, 22 miles E. by S. of Rome, on the slope of an offset of the Apennines, contains the chief castle of the Colonnas and the palace of the Barberini, the owners after 1630. It is built almost entirely upon the gigantic substructions of the ancient Temple of Fortune. Pop. 8000.

Palghat, a town of Malabar district, 68 miles SE. of Calicut by rail; pop. 46,000.

Páli, the commercial capital of Jodhpur (q.v.), 45 miles by rail SE. of Jodhpur city.

Palikao, a place on the canal between Peking and its port on the Peiho. Here in 1860 the Anglo-French troops defeated the Chinese.

Palit, or PERLIS. See STRAITS SETTLEMENTS.

Palk Strait, the northern portion of the shallow passage between south India and Ceylon (q.v.).

Pallas, in Co. Longford, 2½ miles SE. of Ballymahon, was the birthplace of Oliver Goldsmith.

Pallice, LA, a harbour opened in 1889 for large vessels trading to La Rochelle (3 miles distant).

Palma, (1) capital of Majorca (q.v.) and of the Balearic Islands, stands on the Bay of Palma, on the south coast. The Gothic cathedral dates from 1232–1601. The tomb of Raymond Lully is in the church of St Francis. There is a beautiful exchange (1426–46), an old Moorish palace, and a 16th-century town-hall. Population, 68,000, manufacturing silks, woollens, jewellery, &c. The port is protected by a mole, and the town by a wall and batteries.—(2) A town of Sicily, 14 miles SE. of Girgenti. Pop. 16,000.—(3) The name of one of the larger of the Canary Islands (q.v.).

Palmbeach, a fashionable watering-place of Dade county, on the Atlantic coast of Florida, 65 miles N. of Miami. Pop. 300, multiplied many times in the season.

Palmerston. See PORT DARWIN.

Palmy'ra, in the 2d and 3d centuries a magnificent city of northern Syria, situated in an oasis on the edge of the Arabian desert, 150 miles NE. of Damascus. The Semitic name was Tadmor, Palmyra (='city of palms') being the Greek and Latin equivalent. Magnificent remains of the ancient city still exist, chief among them being the great temple of the Sun (or Baal); the great colonnade, nearly a mile long, and consisting originally of some 1500 Corinthian columns; and sepulchral towers, overlooking the city.

Palni Hills, a range of southern India, linking the southern ends of the Eastern and Western Ghâts; height of the higher ridge, 7000 feet.

Palo Alto (*Pâh-lo*), 33 miles SE. of San Francisco, the seat of a university founded by Senator Leland Stanford, opened in 1891, and partly destroyed by the earthquake of April 1906.

Palos (*Pâh'lōs*), a Spanish port at the mouth of the Rio Tinto, 5 miles SE. of Huelva. Once an important place, whence Columbus started on his great voyage, it has now sunk to a village of 1000 inhabitants.

Pamir (*Pameer';* 'roof of the world;' often called the Pamirs), the nucleus of the Central Asian highland system, is a lofty plateau-region, with a mean elevation of 13,000 feet, uniting the western terminations of the Himalaya and the Tian-Shan Mountains, and both with the Hindu-Kush. It is traversed by mountain-ridges which rise from 4000 to 5000 feet above the plateaus, and whose culminating points attain 25,500 feet above sea-level. Between these ridges are a series of broad valleys. On the west side the Pamir sinks rapidly in terraces to the deserts of Turkestan. These lofty plateaus are exposed to great extremes of heat and cold, and are visited by terrible snow and sand storms. Nevertheless the Kirghiz drive up their flocks and herds for summer pasture, and from time immemorial their passes have been traversed by traders and travellers—e.g. by the famous Marco Polo on his journey to the court of Kublai Khan. Among the lakes are Karakul, 120 sq. m., and Shivakul, 100 sq. m. The Pamir occupies the frontiers of Russian, Chinese, and Afghan Turkestan, Bokhara, and Cashmere; and Russian movements there are watched with jealousy by China as well as by Britain. See Geiger, *Die Pamirgebiete* (1887); and the Earl of Dunmore, *The Pamirs* (1893).

Pam'lico Sound, a shallow body of water, some 75 by 10 to 25 miles, on the coast of North Carolina, separated from the ocean by long, narrow islands of sand, with narrow passages.

Pampelu'na, or PAMPLONA, a fortified city of northern Spain, stands on a tributary of the Ebro, 111 miles by rail NW. of Saragossa, and 50 S. by W. of Bayonne in France. It has a citadel (a copy of that of Antwerp), a Gothic cathedral (1397), a viceregal palace, a fine aqueduct, and some manufactures. *Pompeiopolis* was built by Pompey in 68 B.C. From 907 it was the capital of Navarre. Pop. 30,000.

Pamphylia, anciently a country on the south coast of Asia Minor, between Lycia and Cilicia.

Panamá, ISTHMUS OF, formerly called the

Isthmus of Darien (q.v.), embraces the narrowest part (35 miles) of Central America, connecting Costa Rica on the W. with Colombia on the E. Formerly a department of Colombia, it asserted its independence in 1903 and formed a republic, which was at once recognised by the United States, and since by the chief European powers. With an area of 32,400 sq. m. and a pop. of about 400,000, it is traversed by a low chain of mountains, forming the barrier between the Atlantic and Pacific Oceans. The chief trading ports are Panamá and Colon (Aspinwall).

PANAMÁ, capital of the republic, stands on a projecting volcanic rock on the Pacific side; the massive walls the Spaniards built to protect their treasure city still stand in places. Old Panamá, founded in 1518, was captured and destroyed by the buccaneers under Morgan (1671). Modern Panamá was built two years later, 4½ miles distant from the old city; pop. 38,000, the majority of Indian and negro descent, and half-breeds. Fires have destroyed Panamá repeatedly, as well as its sister city Colon. The principal buildings are the cathedral (1760), town-hall, and bishop's palace (1880). Panamá is connected with Colon on the Atlantic by the Panamá Railway (48 miles long), built by Americans in 1850–55.

PANAMÁ CANAL.—The idea of connecting the Atlantic and Pacific Oceans by a canal across the Central American isthmus is as old as the 16th century; but no steps were taken to carry out any plan until Ferdinand de Lesseps, of Suez fame, convened in Paris in 1879 an international congress to discuss the plan of cutting through the Isthmus of Panamá. On February 28, 1881, the first detachment of canal employés arrived at Colon; in 1882 the Canal Company purchased the Panamá Railway. De Lesseps announced that a tide-level canal without locks could be completed for 600,000,000 francs. Work was begun, and loans followed until the company was forced into liquidation in 1889. The Panamá scandals followed (1892–93), with prosecutions and imprisonments. In 1902 the United States arranged to purchase the works, with the right to finish the canal; but the necessary treaty was rejected by Colombia in 1903. Panamá revolted (see above), and as a new republic signed a treaty, giving the Americans control of the Canal Zone. On the Atlantic side a dam converts the lower Chagres (q.v.) valley into a great lake, entered by locks at Gatun. The course of the river is followed to Obispo, whence a cut of 9 miles through the hills by Culebra gives access to the Pacific coast plains by locks at Pedro Miguel and Miraflores. The canal is 50 miles long, and rises 85 feet. The first vessel steamed through in November 1913.

Panc'sova, a town of Hungary, on the Temes, near its junction with the Danube, 9 miles NE. of Belgrade; pop. 20,000.

Pandharpur, a town of India, 112 miles SE. of Poona, on a branch of the Kistna; pop. 35,000.

Pangbourne, a Berkshire parish, on the Thames, here joined by the Pang, 5½ miles WNW. of Reading; pop. 1700.

Pan'ipat, a town of the Punjab, 53 miles N. of Delhi, near the old bank of the Jumna, and on the great military road of northern India to Afghanistan. Hence it has been the scene of three great battles (1526, 1556, 1761) between the people of India and her invaders, the two first Mongol victories, and the third an Afghan victory over the Mahrattas. Pop. 30,000.

Panjab. See PUNJAB.

Panjdeh. See PENJDEH.

Panjim. See GOA.

Panna, capital of a native state (area, 2568 sq. m.; pop. 193,000) in Bundelkhand, 173 miles SW. of Allahabad. Pop. 14,676.

Pannanich Wells. See BALLATER.

Pannonia, an ancient Roman province, bounded N. and E. by the Danube, and including most of modern Hungary, Slavonia, Bosnia, Croatia, Carniola, Styria, and Lower Austria.

Panormus. See PALERMO.

Panshanger, the seat of Earl Cowper, 2½ miles W. by N. of Hertford.

Panteg, a Monmouthshire urban district, with ironworks, 2 miles SE. of Pontypool; pop. 10,000.

Pantellaria, a volcanic island in the Mediterranean, 36 miles in circumference, and 60 miles SW. of Sicily. It is a great convict prison.

Papal States. See CHURCH (STATES OF THE).

Pap'a Stour, a Shetland island, 34 miles NW. of Lerwick; pop. 200.

Pap'a Westray, an Orkney island, 25 miles N. by E. of Kirkwall; pop. 260.

Papenburg (*Pâ-pen-boorg'*), a small port of Hanover, 25 miles W. of Oldenburg by rail and near the Ems; pop. 8000.

Paphlagonia, anciently a province of Asia Minor, along the south shore of the Black Sea.

Paphos, two ancient cities in Cyprus. Old Paphos (now *Kyklia*) was in the western part of the island, 1¼ mile from the coast, and was famous for a temple of Venus, who was said to have risen from the sea close by. The other Paphos (*Papho* or *Baffa*) was on the sea-coast, 8 miles W., and was the place in which Paul preached.

Papua (*Papoo'a*). See NEW GUINEA.

Par, a Cornish seaport, 4¼ miles SSW. of Lostwithiel.

Pará, the name which the river Tocantins (q.v.) receives in its lower course (138 miles), 20 miles wide opposite the city of Pará. The Paranan, an arm of the Amazon, which isolates Marajó Island, runs into it.

Pará (official name *Belém*), a seaport of Brazil, on the east bank of the river Pará, 70 miles from its mouth. The harbour is nearly landlocked by wooded islands. Tram-cars and telephones are in general use, and there is a railway to Bragança (108 miles). The principal buildings are the theatre, the government building, custom-house, and cathedral (1720). Pará is the emporium of the Amazon river-trade, supplying the interior with foreign goods, and exporting india-rubber, cacao, Brazil nuts, fish, &c. Pop. 200,000.—Area of the *state* of Pará, 444,000 sq. m.; pop. 800,000.

Paraguay (*Paragway'* or *Paragwī*), an important river of South America, an affluent of the Paraná (q.v.), rises in the Brazilian state of Matto Grosso, pursues a generally southward course of about 1800 miles through plains, swamps, and forests in Brazil, between Brazil and Bolivia, and then through Paraguay to its junction with the Paraná, a few miles above Corrientes. Its chief affluents are the Cuyabá, Tacuary, Mondego, and Apa on the left, and the Jauru, Pilcomayo, and Vermejo on the right. It is navigable for steamers to the mouth of the Cuyabá.

Paraguay, an inland republic of South America, divided into two distinct portions by the Paraguay River. Eastern Paraguay, or Paraguay proper, is a parallelogram between the Paraguay and Paraná rivers, and is bordered by the Brazilian and Argentine republics. Western Paraguay, or the Chaco (see Gran Chaco), the smaller part, lies mainly between the Paraguay and its tributary the Pilcomayo. The total area of Paraguay is estimated at about 172,000 sq. m.—a territory considerably larger than Great Britain and Ireland. The population of Paraguay is composed of whites of Spanish descent, Indians, a few negroes, and a mixture of these several races, and in 1910 was estimated at 752,000, exclusive of the Indians in the Chaco. The northern portion of Paraguay is in general undulating, covered by low, gently-swelling ridges, separated by large grass plains, dotted with palms. There are mountains in the north-east and north-west corners. The southern portion is one of the most fertile districts of South America, consisting of hills and gentle slopes richly wooded, of wide savannahs, which afford excellent pasture-ground, and of rich alluvial plains, some of which are marshy, but a large proportion are of extraordinary fertility and highly cultivated. The banks of the rivers Paraná and Paraguay are occasionally belted with forest; but in general the lowlands are destitute of trees. The temperature occasionally rises to 100° in summer, but in winter is usually about 45°. The natural productions are very varied, although such minerals as exist are not worked. Much valuable timber is found in the forests, also dye-woods, india-rubber, orange-trees, gum-yielding trees, the maté, or Paraguay tea shrub (growing wild in the NE.), which yields one of the chief articles of commerce. Wax and honey are collected, as is also cochineal, and the medicinal plants are very numerous. The chief cultivated crops are maize, rice, coffee, cocoa, indigo, manioc, tobacco, maté, cotton, fruits, and sugar-cane. Tapirs, jaguars, pumas, ant-eaters, wild-boars, peccaries, and deer abound; the rivers teem with fish, and their banks are the resort of alligators and coypus. Snakes, including enormous boas, are numerous, but very few of them are venomous. Asuncion is connected by railway with Buenos Aires. The commerce of the country has greatly increased since 1880. In 1880 the value of exports was £252,000, that of imports less; in 1912 their respective values were £847,000 and £1,070,000. The chief exports are yerba-maté, tobacco, hides, oranges, timber, bark for tanning, and lace; the imports, cotton goods, hardware, wine, grain, rice, linen, silk, petroleum, &c.—25 per cent. of the imports being from Britain, mostly passing through Brazil and the Argentine Republic. There are no direct exports to Britain. The revenue fluctuates much—from about $9,000,000 to $15,000,000; the expenditure generally exceeds the revenue. The foreign debt is about £6,500,000, the interest of which is sometimes seriously in arrears or unpaid. Trade in the towns is almost wholly in the hands of Italians, French, and Germans. The military force consists of 2500 men. The established religion is the Roman Catholic. Education is free and compulsory; but of the adult Paraguayans only one in five can read and write.

Paraguay was discovered by Juan Diaz de Solis in 1515, and settled as a province of the viceroyalty of Peru in 1535. The warlike Guaranis long successfully resisted the Spanish arms. In the 17th century the home government placed in the Jesuits' hands the entire administration, civil as well as religious. From this time forward the progress of civilisation as well as of Christianity was rapid. On the expulsion of the Jesuits from Paraguay in 1768, the province was again made subject to the Spanish viceroys. In 1810 Paraguay joined with the other states in declaring its independence. In 1814 Dr Francia was proclaimed dictator, and exercised absolute power till his death in 1840. In 1865–70 the Paraguayans made a heroic but unavailing fight against the combined forces of Brazil, the Argentine Confederation, and Uruguay, closed by the defeat and death of the president Lopez at the battle of Aquidaban, March 1, 1870. The results of the war may be read in the returns of the pop.—(1857) 1,337,439; (1873) 221,079, including only 28,746 men and 106,254 women over fifteen years of age. Of late the country has made considerable progress. In 1870 a new constitution was adopted. It is modelled on that of the Argentine Confederation. Asuncion (the capital) has a pop. of 80,000. See works by Robertson (1840), Mansfield (1856), Page (New York, 1867), Kennedy (1869), Masterman (1869), Thompson (New York, 1869), Washburn (1871), Mulhall (1885), Graham (1901), Grubb (1911), and Koebel (1912).

Parahyba (*Par-a-ee'ba*), capital of the Brazilian state of Parahyba, on the Parahyba River, 10 miles from the sea. It has a cathedral, government palace (formerly the Jesuit college), and large sugar-mill (1889). At the mouth of the river is a bar; but a railway (12 miles) was built in 1889 to the port and pier of Cabedello. The exports include sugar, cotton, and cotton-seed, chiefly to Great Britain. Pop. 35,000.—The *state*, the easternmost in the republic, has an area of 29,000 sq. m. and a population of 700,000.—A more important Parahyba River, farther south, enters the Atlantic in the state of Rio de Janeiro, after a course of nearly 500 miles. It is navigable for 50 miles from its mouth.

Paramar'ibo, capital of Dutch Guiana, on the Surinam, 10 miles from its mouth. Pop. 35,000.

Paramatta. See Parramatta.

Paraná, (1) a river of South America, rises as the Rio Grande in the Brazilian state of Minas Geraes, and is known as Paraná after its junction with the Paranahyba (not the Parnahyba, q.v.). Thence its course is S., SW., and W., separating Paraná state from Matto Grosso and from Paraguay, round the southern border of which republic it sweeps westward to its confluence with the Paraguay River. It then rolls southward through the Argentine provinces, past Santa Fé, below which its channel frequently divides and encloses numerous islands, and finally south-eastward, till it unites with the Uruguay, above Buenos Ayres, to form the Rio de la Plata. The entire length is over 2000 miles; it drains 1,100,000 sq. m. At San Pedro (33° 40′ S. lat.) a delta begins. The principal towns on its banks are Corrientes, Paraná, Santa Fé, and Rosario—all Argentinian. The river is navigable to the influx of the Paraguay (705 miles), and except at low water to the mouth of the Iguassu (460 miles). Immediately above this point occurs one of the most remarkable rapids in the world, extending for 100 miles between ranges of frowning cliffs.—(2) A southern state of Brazil, on the coast, with an area of 85,453 sq. m., and a pop. of 570,000, including several colonies of Germans and Italians. The capital is Curitiba (60,000), with a railway (69 miles) to the port of Paranaguá.—(3) Capital of the Argentinian province of Entre Rios, stands on a high bluff overlooking the Paraná, opposite Santa Fé, 410 miles by steamer from Buenos Ayres; pop. 35,000.

Paray-le-Monial (*Par-ay-leh-Mon-ee-âhl'*), a town in the French dep. of Saône-et-Loire, 48 miles by rail W. by N. of Mâcon. In its chapel Mary Alacoque (d. 1690) believed herself to have had a vision of the Saviour, and it is now the object of pilgrimages. Pop. 3000.

Parchim (*Par-hheem*), a town of Mecklenburg-Schwerin, 23 miles SE. of Schwerin; pop. 10,600.

Par′dubitz, a town of Bohemia, on the Elbe's left bank, 55 miles E. of Prague; pop. 20,000.

Parham, a Suffolk village, 2¼ miles SSE. of Framlingham. Moated Parham Hall here was the seat of the Willoughbys.

Paris (Fr. pron. *Par-ee′*), capital of France, and the largest city in Europe after London, is situated in 48° 50′ N. lat. and 2° 20′ E. long., on the river Seine, about 110 miles from its mouth. It lies in the midst of the fertile plain of the Île-de-France, at a point to which converge the chief tributaries of the river, the Yonne, the Marne, and the Oise; and is the centre of a great network of rivers, canals, roads, and railways; hence its commercial importance. The present city is bounded by fortifications—a rampart (1840–60) upwards of 22 miles in length. The extension of the city boundary to this line explains the increase of pop. from 1,174,346 in 1856 to 1,696,741 in 1861; subsequent pop. (1866) 1,825,274; (1881) 2,269,023; (1911) 2,888,110. Montmartre, within the fortifications, is 400 feet high; the city is encircled at a distance of from two to five miles by an outer range of heights, including Villejuif, Meudon, St Cloud, and Mont-Valérien (650 feet), some of which are crowned by the detached forts which now form the main defences of the city. At the fifty-six gates in the walls of Paris are paid the octroi dues. The Seine divides the city into two parts, and forms the islands of La Cité and St Louis, both covered with buildings.

France has long been the most highly centralised country in Europe, and Paris as its heart contains a great population of government functionaries. Paris is a city of pleasure, and attracts the wealthy from all parts of the world; hence it is a city of capitalists and a great financial centre. The provincial universities of France have been deprived of their attraction by the schools of Paris, to which flock the youth of France. The publishing trade has followed the same course. The chief and peculiar industries of Paris produce articles which derive their value from the skill and taste bestowed on them by individual workmen, and include jewellery, bronzes, artistic furniture, and decorative articles known as 'articles de Paris.' The private houses as well as the public buildings of Paris are built of a light-coloured limestone, quarried in the neighbourhood of the city. With this material they are reared in huge blocks to a height of six or seven stories, each floor constituting a distinct dwelling; access to all the floors in a tenement being gained by a common stair, which is usually placed under the charge of a porter or *concierge* at the entrance. Very frequently the tenements surround an open quadrangle. Among the great new streets formed in the time of Napoleon III. are the Rue de Rivoli, two miles in length, the Rue de la Paix, the Rue du Faubourg St Honoré, and the Rue Royale. The Boulevards, which extend in a semicircular line on the right side of the Seine, between the nucleus of the city and its surrounding quarters, present the most striking feature of Paris life. In all the better parts of the city they are lined with trees, seats, stalls, and kiosques. Among the public squares or *places* the most noteworthy is the Place de la Concorde, which connects the Gardens of the Tuileries with the Champs-Élysées, and embraces a magnificent view of some of the finest buildings and gardens of Paris. In the centre is the famous obelisk of Luxor (73 feet), brought hither in 1836. On the site of this obelisk stood the revolutionary guillotine, at which perished Louis XVI., Marie Antoinette, Philippe Égalité, Charlotte Corday, Danton, and Robespierre. Of the other squares the following are some of the finest: the Place du Carrousel, including the site of the Tuileries burned by the Commune and not restored; the Place Vendôme, with Napoleon's Column of Victory; the Place de la Bastille, where once stood that famous prison-fortress; the Place Royale; and the Place de l'Hôtel de Ville. Triumphal arches are a feature in the architecture of Paris. The Porte St Martin and Porte St Denis were erected by Louis XIV. to commemorate his victories in the Low Countries; the Arc de Triomphe de l'Étoile, built in 1806–36 at a cost of more than £400,000, is profusely adorned with bas-reliefs and alto-reliefs. The great streets which radiate from the Arc de Triomphe were among the most magnificent of those constructed by Napoleon III. The Seine in passing through Paris is spanned by twenty-eight bridges. The most celebrated and ancient are the Pont Notre Dame (1500), and the Pont-Neuf (1578–1604), which crosses the Seine at the north of the Île-de-la-Cité. The bridges all communicate directly with spacious quays, planted with trees, which line both banks of the Seine. Among the churches the grandest and most interesting is the cathedral of Notre Dame, which stands on a site successively occupied by a pagan temple and a Christian basilica of the Merovingian time. The main building, begun in the 12th century, is 400 feet long, 150 wide, and 110 high. The height of two towers is 218 feet, that of the flèche 300. It has been said that if the pillars of Notre Dame could speak they might tell the whole history of France. In 1793 it was converted into a 'Temple of Reason.' The building was carefully restored in 1845. The Sainte Chapelle, built by St Louis in 1245–48, is perhaps the greatest existing masterpiece of Gothic art, and was restored by Napoleon III. at a cost of £50,000. St Séverin is partly in the English Gothic of the 15th century; it was erected during the English occupation of Paris. St-Germain-des-Prés, probably the most ancient church in Paris, was completed in 1163; St Étienne du Mont contains the tomb of St Geneviève; and St Germain l'Auxerrois has very fine decorations. Among modern churches is the Madeleine (1806–42), like a Corinthian temple; also the imposing Romanesque-Byzantine Sacré Cœur (1875–1900), crowning the height of Montmartre. The Panthéon (1764) was begun as a church, but converted by the Constituent Assembly into a temple dedicated to the great men of the nation, next restored to the church by Napoleon III. and rededicated to St Geneviève, but once more, on the occasion of the funeral of Victor Hugo (1885), reconverted into a valhalla; here are the tombs also of Voltaire, Rousseau, and Carnot.

Paris has upwards of forty theatres. The leading houses are the Opéra, the Théâtre Français—chiefly devoted to classical French drama—the Opéra Comique, and the Odéon, which receive a subvention from government. The new opera-house, completed in 1875, cost, exclusive of the site, £1,120,000. Beyond the fortifications at the west of Paris is the Bois de Boulogne, converted by Napoleon III. from a wood covered with stunted trees into one of the most beautiful gardens in Europe. East of Paris is the Bois de Vincennes. Paris has three large and twelve lesser cemeteries, of which the principal one is Père-la-Chaise (over 200 acres). The Morgue at the upper end of the Île-de-la-Cité is a building in which the bodies of unknown persons found in the Seine are placed temporarily for recognition. The vast caverns under southern Paris, whence the limestone for building has been quarried, were converted in 1784 into catacombs, in which are deposited the bones of the dead, collected from the ancient cemeteries of Paris. Two most interesting civil buildings of the 15th century still exist—the Hôtel de Cluny, one of the finest existing monuments of the Gothic Flamboyant style; and the Hôtel de Sens, the old palace of the archbishops of Sens, now used for business purposes. The Palace of the Tuileries was begun in 1566 by Catharine de Médicis, and enlarged by successive monarchs, until it formed a structure nearly ¼ mile long, running at right angles to the Seine. It was connected with the Louvre (begun 1541 on the site of a 13th-century castle, and completed by Louis XIV.) by a great picture-gallery; between the two palaces lay the Place du Carrousel. The Tuileries continued to be occupied as the residence of the imperial family; but the Louvre proper formed a series of great galleries filled with pictures, sculptures, and collections of Egyptian, Greek, and Roman antiquities. The Commune attempted to burn the whole pile, but only succeeded in destroying the Tuileries and a corner of the Louvre. North of the Louvre is the Palais Royal, a mass of buildings, including the old palace of the Orleans family, the Théâtre Français, and a quadrangle of shops, restaurants, and cafés, enclosing a park or garden open to the public, 700 feet long by 300 feet wide. The Palace of the Luxembourg, south of the Seine, since 1879 the meeting-place of the French senate, was built by Marie de Médicis in the Florentine style. Close to it a gallery has been constructed for the reception of the works of living artists acquired by the state. The Hôtel de Ville, north of the Seine, was burned by the Commune, but has been rebuilt and restored in the style of its predecessor. On the island of La Cité stands the Palais de Justice, a vast pile, also set fire to by the Commune; some parts of it date from the 14th century (the Sainte Chapelle being within its precincts), and others are modern. The old Conciergerie here constitutes one of the prisons of Paris. The largest of the numerous hospices or almshouses is La Salpêtrière for old women; Bicêtre receives only men. The Hospice des Enfants Trouvés is the famous Parisian foundling hospital. The Crèches receive the infants of poor women for the day at the cost of 20 centimes. The oldest and most noted hospitals are the Hôtel Dieu, La Charité, and La Pitié.

The chief institutions connected with the University of Paris, and with education generally, are still situated in the Quartier Latin. The Sorbonne, the seat of the Paris faculties of letters and science, and a library, &c., has been rebuilt and increased in size (1885–93). Near the Sorbonne is the Collège de France, where gratuitous lectures are also delivered by eminent scholars and men of letters. The Scotch College stands as it did in the 17th century. The École Polytechnique, the School of Medicine and the School of Law, the Observatory, and the Jardin des Plantes are situated in the same quarter of Paris. The principal of the public libraries are those of the Rue Richelieu, now called the Bibliothèque Nationale, rivalled only by the British Museum in the number of its books and manuscripts. No city on this side of the Alps is richer than Paris in fine-art collections, and among these the museums at the Louvre stand pre-eminent. Among its chief treasures may be mentioned the famous Venus of Milo, and the great works of the Italian, Flemish, and Spanish masters; there is a long succession of galleries in which are exhibited Egyptian, Assyrian, Elamitic, Greek, Roman, mediæval, and Renaissance relics and works of art. The Musée Carnavalet is the historical museum of the municpality. The Palais des Beaux-Arts is used as an exhibition of art, manufactures, and architectural models. The Hôtel de Cluny contains curious relics of the arts and usages of the French people from the earliest ages. The Museum of Artillery at the Hôtel des Invalides is devoted to arms and armour, flags and war dresses. The Musée Guimet includes objects used in religious ceremonies, savage, Indian, Chinese, &c. The Mint deserves notice for the perfection of its machinery; and the Gobelins, or tapestry manufactory, may be included under the fine arts. The Conservatoire des Arts et Métiers contains a great collection of models of machinery, and class-rooms for workmen. The Palace of Industry, built for the exhibition of 1854, now forms a permanent exhibition. The building for the exhibition of 1878, named Palace of the Trocadéro, is now used for musical entertainments and as an architectural and ethnological museum. For the exhibition of 1889 was erected the Eiffel Tower, of iron, 985 feet high. On the left bank of the Seine is the École Militaire (1752); near it is the Hôtel des Invalides, founded in 1670 for disabled soldiers, containing in its crypt the remains of Napoleon, deposited there in 1840. The prefect of the Seine is the chief of the municipal government, and is appointed by the government. There is a large elected municipal council. Each of the 20 arrondissements has a maire and two assistant-councillors. The prefect of police is at the head of the civic guard or gensdarmes, the fire-brigade, and the sergents de ville or city police, who are armed with swords. The cleaning, sewerage, and water-supplies of Paris are under the charge of the prefect. Paris is now abundantly supplied with pure and wholesome water. Large cattle-markets are held near the licensed abattoirs or slaughter-houses, since 1818 all in the suburbs. There are in the heart of the city numerous *halles*, or wholesale, and *marchés*, or retail markets; the principal, the Halles Centrales, near the church of St Eustache, covering nearly 20 acres.

The small town of *Lutetia*, on the Île-de-la-Cité, was the capital of the Parisii, an unimportant tribe of Gauls, and did not take their name till the time of the Roman emperors, of whom Constantius Chlorus and Julian lived much at Paris. Christianity came to the banks of the Seine with St Denis in the 2d or 3d century; St Geneviève settled here in the 5th. Clovis, the Frank emperor, made it his home and the capital of the Frankish states. Philip Augustus in the 13th century greatly extended the city and increased its privileges; and Paris has down the centuries been not merely the capital of France and the centre of its social and political history, but in a very special sense the headquarters of French literature and art. Of recent episodes, the most notable was the siege by the German armies, from September 1870 till the capitulation in January 1871. The disastrous Communard outbreak was suppressed in May 1871.

See the guidebooks of Murray, Baedeker, Joanne, and topographical works by Du Camp (7th ed. 6 vols. 1884), Colin (1885), Pontich (1884), and the official *Annuaire Statistique* (since 1883); G. A. Sala, *Paris Herself Again* (1879); P. G. Hamerton, *Paris in Old and Present Times* (1884; new ed. 1892); books by A. J. C. Hare (1888), De Amicis (1892), Grant Allen (1897), H. Belloc (1900), T. Okey (1904); besides historical works by French authors, such as Piton (1891), Hoffbauer (1890), Lebeuf (15 vols. 1863), Dulaure (7 vols. new ed. 1874), De Gaulle (1840), Gabourd (1863–65), Arago (2d ed. 1867); and the copious *Histoire Générale de la Ville de Paris*, issued, since 1866, by the municipal authorities.

Paris, (1) capital of Bourbon county, Kentucky, on Stoner Creek, 19 miles by rail NE. of Lexington. It has a military institute, and manufactures whisky, flour, cordage, &c. Pop. 6000. —(2) Capital of Lamar county, Texas, 98 miles by rail NE. of Dallas, making brooms, furniture, sashes, wagons, ploughs, &c. Pop. 10,000.

Parkersburg, capital of Wood county, West Virginia, on the Ohio River (here crossed by a railway bridge 1¼ mile long), at the mouth of the Little Kanawha, 195 miles by rail E. by N. of Cincinnati. It has great oil-refineries, chemical works, lumber-mills, and manufactories of furniture, barrels, &c. Pop. 18,000.

Parma, a town of Italy, from 1545 to 1860 the capital of the duchy of Parma, is situated on the ancient Via Emilia, and on the river Parma, 12½ miles S. from the Po, and by rail 56 miles NW. of Bologna and 79 SE. of Milan. It is surrounded by walls and has a citadel (1591); the streets are straight and wide. Of some sixty churches the chief is the Lombardo-Romanesque cathedral (1059–74), with frescoes by Correggio. Other notable edifices are the splendid baptistery (1196–1281); the church of Madonna della Steccata (1521–39), containing the tombs of the Farnese dukes; the ducal palace, containing art-galleries (Correggio's works), a library (300,000 vols. and 5000 MSS.), the archives, &c.; and numerous other palaces, public and private. There are also a university (1599), with 100 teachers and over 500 students, a music school, a museum of antiquities, &c. The principal industrial products are pianofortes, silks, cast-iron wares, woollens, earthenware, paper, soap, &c. Pop. 52,000. Founded by the Etruscans, Parma became a Roman colony in 183 B.C. It was besieged and taken by Frederick II. in 1245, and again invested, but without success, in 1248. It then belonged successively to the houses of Correggio, Este, Visconti, and in 1511 to the pope.

Parnahyba (*Pârnâee'ba*), a river of Brazil, rises in the Serra Mangabeiras, about 9° S. lat., throughout its course (650 miles) forms the boundary between the states of Maranhão and Piauhy, and enters the Atlantic by six mouths. Fourteen miles from its mouth is the unhealthy town of Parnahyba; pop. 10,000. See also PARANÁ.

Parnassus, a mountain in Phocis, on whose southern slope lay Delphi (q.v.), the seat of the famous oracle, and the fountain of Castalia. The highest peak (8036 feet) was the scene of the orgies of the worship of Dionysus (Bacchus); all the rest was sacred to Apollo and the Muses.

Paropami'sus, an ancient name still used for a ridge, less than 1000 feet above the adjacent country, which forms part of the northern edge of the great plateau of Persia and Afghanistan, almost connecting the Hindu Kush (q.v.) on the east with the Elburz Mountains to the west.

Paros, one of the larger Cyclades (q.v.); it has an area of 64 sq. m. and a pop. of about 8000, of whom some 2500 live in the capital, Parœkia. The quarries of the famous white Parian marble, near the summit of Mount St Elias (anc. *Marpessa*), are not yet exhausted.

Parramatta, a town of New South Wales, stands on a western extension of Port Jackson, 14 miles W. of Sydney. The streets are wide and regular. 'Colonial tweeds,' 'Parramatta cloths' (first made at Bradford from wool exported hence), beer, soap, candles, and tiles are manufactured. Much fruit, especially the orange, is grown here. Population, over 34,500. Parramatta is, after Sydney, the oldest town in the state, having been laid out (as 'Rosehill') in 1790.

Parret, a river of Dorset and Somerset, running 35 miles N. and NW. to the Bristol Channel at Stert Point.

Parry Islands, a name sometimes given to Melville Islands, and adjoining Arctic Islands.

Parsonstown, or BIRR, a market-town of King's County, on the Brosna, 89 miles by rail W. of Dublin. The castle, anciently the seat of the O'Carrols, was granted by James I. to Laurence Parsons, ancestor of the present proprietor, the Earl of Rosse. There are barracks, a statue (1747) of the Duke of Cumberland, and another in bronze (1876) by Foley of the Earl of Rosse, the astronomer. Pop. 4000.

Partabgarh, (1) a division of Oudh, east of Allahabad; area, 1439 sq. m.; pop. 1,000,000. There is a town of Partabgarh; pop. 10,000.—(2) A native state of Rajputana, bordering on Gwalior; area, 959 sq. m.; pop. 63,000. Its capital is Partabgarh, in the centre.

Parthia, anciently a district in what is now northern Persia, lying between Media on the west and Bactria on the east. Parthia had been subject successively to the Assyrians, Medes, Persians, Greeks (Alexander the Great and his generals), and the Seleucids of Syria, when from 250 B.C. to 224 A.D. it became an independent kingdom, its most famous ruler Mithridates I. (171–138 B.C.). The capital was Ctesiphon. The Parthian empire was finally overthrown by Ardashir, who founded the dynasty of the Sassanids. See histories of Parthia by Rawlinson (1873 and 1893).

Partick, a town of Lanarkshire, situated chiefly on a rising ground on the Kelvin, immediately above its junction with the Clyde, and 3 miles WNW. of the Cross of Glasgow, of which city it now forms three wards. Nine-tenths of the workmen of Partick are engaged in shipbuilding-yards, but there are also brass-founding, machine-making, &c. A large proportion of the inhabitants are engaged in business in Glasgow. Partick was made a police-burgh in 1852-66; it depended on Glasgow for its gas and water supply even before it was annexed in 1912. Pop. (1851) 3131; (1881) 27,410; (1911) 66,848. See Wallace's *Parish of Govan* (1877).

Partinico (*Partinee'ko*), a town of Sicily, 32 miles SW. of Palermo by rail; pop. 25,000.

Parton, a Cumberland seaport, 1½ mile N. of Whitehaven; pop. of parish, 1600.

Pasade'na, a town of California, 10 miles E. of Los Angeles; pop. 36,000.

Pascagoula (*ou* as *oo*), a navigable river of SE.

Mississippi, formed by the junction of the Leaf and Chickasawha. It flows 85 miles south to a small bay on the Gulf of Mexico.

Pasco. See Cerro de Pasco.

Pas-de-Calais (*Pâh-de-Calay′*; originally the name of the Strait of Dover), a dep. in the north of France, formed out of Artois and Picardy. Area, 2550 sq. m.; pop. (1861) 724,338; (1911) 1,068,155. There are six arrondissements—Arras (the capital), Béthune, St Omer, St Pol, Boulogne, and Montreuil.

Pasewalk (*Pâ-ze-valk*), a town of Prussia, 26 miles by rail WNW. of Stettin; pop. 11,000.

Passage, a fishing-village, 6 miles SE. of Waterford; pop. 560.

Passage West, a seaport 7 miles SE. of Cork; pop. 1800.

Passa′ic, a city of New Jersey, on the Passaic River, 11 miles by rail NW. of Jersey City. It has foundries and print-works, and manufactures woollens and shoddy, whips, india-rubber, chemicals, &c. Pop. 55,000.

Passamaquoddy Bay, in North America, opens out of the Bay of Fundy, at the mouth of the St Croix River, between Maine and New Brunswick. It is 15 miles long by 10 wide, and shut in by a cluster of islands.

Passar′ovitz, a town of Servia, 9 miles S. of the Danube and 40 SE. of Belgrade. Pop. 14,000.

Passau (*Passow′*), a town of Bavaria, stands on a rocky tongue of land, on the right bank of the Danube, beside the influx of the Inn, close to the Austrian frontier, 72 miles by rail SE. of Ratisbon. The cathedral was rebuilt after a fire in 1680; the bishop's palace is now in part public offices. Passau was long an important fortified post, being the key of the Danube in that part of its course. There were two strong citadels, one dating from 737, the other from 1215–19. The town grew up around an old Roman camp, and in 739 was made the seat of a bishopric founded by St Boniface. Bavarian since 1803, it manufactures leather, porcelain, parquet-floors, boats, metal-ware, and mirrors. Pop. 21,000.

Passy, a western suburb of Paris (q.v.).

Pasto, a town in the south-west of Colombia, in a fertile valley 8350 feet above sea-level. Above it rises the volcano of Pasto (14,000 feet above the sea). Pop. 30,000.

Paston, a Norfolk coast parish, 8 miles NNE. of Norwich.

Patagonia (from *patagones*, the large 'footsteps' seen by early Spanish voyagers; or from the Indian *patacuna*, 'terraces'), the most southern region of the South American continent, extending from S. lat. 39° southwards to the Strait of Magellan. Length, upwards of 1000 miles; greatest breadth, 480 miles; area, 400,000 sq. m., including islands. Like the rest of the continent, Patagonia is divided by the Andes into two very unequal and dissimilar territories. Since 1881 nearly the whole country east of the watershed is recognised as part of the Argentina; Chili has contented herself with the country to the west and a strip along the southern coast.

Western or Chilian Patagonia (63,000 sq. m.), a narrow strip between the mountains and the sea, is rugged and mountainous. Along the coast are numerous islands, the principal being Chiloe, the Chonos Archipelago (q.v.), and Wellington Island. In the Cordilleras proper the summits are less lofty towards the south; the volcanoes of Minchinmavida and Corcovado are 8000 and 7510 feet high, and Monte San Valentin 12,697 feet. In Chiloe the mean temperature of winter is about 40°, that of summer rather above 50°. The atmosphere is very damp; prevailing western winds constantly deposit their burden of rain. South of 47° S. lat. hardly a day passes without rain, snow, or sleet. This continual dampness has produced luxuriant forests. Coal is mined near Punta Arenas (Sandy Point), where there is a Chilian penal settlement (pop. 12,000). The population consists of small nomadic tribes of Araucanian stock and a few Chilian settlers.

Eastern or Argentine Patagonia consists mainly of high undulating plains or plateaus rising in successive terraces, and frequently intersected by valleys and ravines. These plateaus are occasionally covered with coarse grass, or stunted bushes and herbs; elsewhere the surface is rugged with heaps of stones or ridges of bare rock. Keen blasts sweep chiefly from the west; and as this wind has already parted with its moisture on the other side of the mountains, hardly any rain falls in Argentine Patagonia during seven or eight months of the year. The soil in many places is strongly impregnated with saltpetre, and salt-lakes and lagoons are numerous. Along the eastern base of the Andes there is a great tract of picturesque and fertile forest-clad territory. The principal rivers of Argentine Patagonia rising in the Andes are the Rio Negro (q.v.), which forms its northern boundary, the Chubut (q.v.), and Deseado. Herds of horses and, in the more favoured regions, cattle are bred; guanacos, pumas, foxes, armadillos, skunks, and tucotucos (a peculiar rodent) are met with; and among the birds are rheas, condors, hawks, partridges, flamingoes, and ducks. Argentine herdsmen are beginning to pasture their cattle in the northern valleys, and Chilian immigrants are moving eastwards. The Patagonians proper or Tehuelche Indians, who are confined to Eastern Patagonia, are now almost quite extinct. They are often large but not gigantic men, sometimes over, generally under, 6 feet. Patagones, 18 miles from the mouth of the Rio Negro, has a pop. of about 2000, composed of Spanish settlers, negroes, and convicts. There is a Welsh colony on the Chubut (q.v.). Magellan sailed along the Patagonian coast in 1520. English works on Patagonia are Falkner's (1774), Snow's (1857), Musters's (1871), Beerbohm's (1877), Lady F. Dixie's (1880), Coan's (1880), Skottsberg's (1911).

Patan, a town of India, in Baroda, 64 miles NW. of Ahmadabad, with lofty walls and ancient ruins. It manufactures swords, pottery, silks, and cottons. Pop. 40,000.

Pateley Bridge, a town of Yorkshire, on the Nidd, 11 miles WSW. of Ripon.

Paterno, a town of Sicily, 11 miles NW. of Catania, at the base of Mt. Etna. Pop. 30,000.

Paterson, capital of Passaic county, New Jersey, is on the Passaic River (which here has a perpendicular fall of 50 feet), and on the Morris Canal (connecting it with the Delaware River), 15 miles by rail NW. of New York City. It has locomotive-works, an iron-forge and rolling-mill, and manufactures cotton, paper, linens, and woollens, &c.; but chiefly it is famous for its more than 100 silk-factories, which have made it 'the Lyons of America.' Pop. (1870) 33,579; (1880) 51,031; (1890) 78,347; (1910) 125,600.

Pathhead, a village, on the Tyne, 11 miles SE. of Edinburgh. Pop. 400.

Patiala (*Putteeâh′la*), a native Indian Punjab state, partly S. of the Sutlej, partly in hills. Area, 5400 sq. m.; pop. 1,400,000. The capital, Patiala, has a pop. of 50,000.

Patmos (mod. *Patino*), a rocky and barren island, in the Ægean Sea, one of the Sporades, lies to the south of Samos; area, 16 sq. m. The apostle John, exiled hither, saw here the visions of the Apocalypse. On a mountain stands the monastery of 'John the Divine,' built in 1088. The island is inhabited by about 4000 Greek sponge-fishers.

Patna, an Ayrshire village, on the Doon, 10 miles SE. of Ayr; pop. 500.

Patna, called also AZIMABAD, a city of Bihar, 140 miles E. of Benares by rail, extends 9 miles along the Ganges and 2 miles back from the river. The chief buildings are the Gola or government granary (1786), the government opium-factories, Patna College, the shrine of Shah Arzani, the mosque of Sher Shah, a Roman Catholic church, and a Mohammedan college. Its railway communication, and its central position at the junction of three great rivers, the Son, Gandak, and Ganges, render Patna of great importance as a commercial centre. *Pataliputra* was founded about 600 B.C. The massacre here of British prisoners in 1763 led to annexation; and mutiny broke out at Dinapur, the military station west of Patna, in 1857. Bankipur, the civil station, is between the city and Dinapur. Patna was in 1912 made capital of Bihar and Orissa. Pop. (1872) 158,900; (1881) 170,654; (1911) 136,153.

Patna, a native state of the Central Provinces, India; area, 4000 sq. m.; pop. 300,000. Patna, the chief town, has a pop. of 2000.

Patras', or PATRÆ, the chief seaport in the west of Greece, on the S. shore of the Gulf of Patras, by rail 81 miles W. by N. of Corinth and 137 W. by N. of Athens, is the seat of an archbishop, and has a spacious harbour (1880) protected by a mole. It ships great quantities of currants, also olive-oil, wine, valonia, &c. Population, about 38,000. *Patræ* alone of the 'twelve cities' of Achaia still exists as a town.

Patricroft, a town of Lancashire, 5 miles W. of Manchester, with a huge iron-foundry, machine-works, &c., included in the borough of Eccles.

Patrington, a decayed town of Yorkshire, 15 miles ESE. of Hull; pop. of parish, 1000.

Pattan. See PATAN.

Patterdale, a village of Westmorland, at the head of Ullswater, 8½ miles N. of Ambleside.

Pau (*Po*), the chief town of the French dep. of Basses-Pyrénées, on the right bank of the Gave-de-Pau, 66 miles by rail ESE. of Bayonne and 143 SSE. of Bordeaux. It occupies a rocky height, 623 feet above sea-level, and commands magnificent views of the Pyrenees. The ancient capital of the kingdom of Béarn and French Navarre, it has a noble five-towered castle. Rebuilt about 1363 by the Comte de Foix, and restored by Louis-Philippe and Napoleon III., this castle was the birthplace of Henri IV., as also of his mother Jeanne d'Albret; and Abd-el-Kader was a prisoner here in 1848. Bernadotte was a native. Linen and chocolate are manufactured; and in the vicinity Jurançon wine is grown, and many swine are fed. Pau is a great English resort, especially during the winter season (October to May), and is famous for its golf-links. Population, 37,000. See a work by Count Henry Russell (new ed. 1891).

Pauillac (*Po-eel'yac*), a French port on the left bank of the Gironde's estuary, 30 miles N. by W. of Bordeaux by rail. Pop. 5000.

Paul, a town and urban district of Cornwall, 2 miles S. of Penzance. Pop. 6000.

Pavia (Ital. *Pavee'a*), a city of northern Italy and a bishop's see, on the left bank of the Ticino, 2 miles above its confluence with the Po, and 21 miles by rail S. of Milan, is still partly surrounded by walls, and was called the 'city of a hundred towers.' The Lombard basilica of San Michele is mentioned as early as 661; in it the old 'kings of Italy' were crowned; in 1863 it was granted the title of 'royal basilica,' and was restored 1863–76. The unfinished cathedral, commenced in 1488, shelters the ashes of St Augustine and Boëtius and also Roland's lance. The Certosa, 5 miles N., is a celebrated Carthusian monastery (1396). The castle of the Visconti (begun in 1360) is a massive square arcaded structure. The university, said to have been founded by Charlemagne, but not formally constituted until 1361, has 1600 students and 160 teachers. Attached to it are two colleges—Borromeo (1563) and Ghislieri (1569)—for poor students, and a library (1772) of 250,000 vols., a botanic garden, &c. Pop. 40,000. Pavia (anc. *Ticinum;* later *Papia*, whence the modern name), was founded by Gallic tribes, and was sacked by Attila (452) and by Odoacer (476); Theodoric selected it as his capital after 489. Later on the Lombards made it their capital, and then it became the chief city of the kingdom of Italy. It was sacked in 1500 and 1527–28 by the French, who in 1525 were defeated here by the imperialists, Francis I. being taken prisoner. It fell to Austria in 1814, and to Italy in 1859. Lanfranc and Pope John XIV. were natives.

Pavlograd, a town of South Russia, 45 miles by rail ENE. of Ekaterinoslav. Pop. 20,000.

Pawtuck'et, a city of Rhode Island, on the Pawtucket River, 4 miles by rail N. of Providence. On account of a fall of nearly 50 feet on the river, it was made in 1790 the site of the first cotton-factory in the United States. It now contains numerous large mills, where cottons, woollens, haircloth, and thread are manufactured, besides great calico-printing works, and bleaching and dyeing establishments, &c. Pawtucket, settled about 1655, became a city in 1886. Population, 52,000.

Paxo, an Ionian island, has with Antipaxo an area of 8½ sq. m. and a pop. of 6000.

Paysandú, the chief town of a Uruguayan department (pop. 52,000), on the Uruguay River, 280 miles by rail NW. of Montevideo. It exports tinned meat. Pop. 20,000.

Payta, or PAITA, a good port in the north of Peru, only 370 miles distant from the point on the Maranon to which steamers from the Atlantic come. Pop. 5000.

Paz, LA. See LA PAZ.

Pea'body, a town of Massachusetts, 16 miles NNE. of Boston. Formerly called South Danvers, it was in 1868 named after the philanthropist Peabody, who was born here. Pop. 16,000.

Peace River, a large river of Canada, rises in two branches in the Rocky Mountains, in British Columbia, and, flowing 1100 miles north-east, joins the Slave River by five widely separate mouths. The delta thus formed is, with that of the Athabasca River, the most fertile part of the country. The river, much encumbered with rapids, was explored by Mackenzie (1792–93). The district is rich in minerals.

Peak, the hilly district of north-west Derbyshire, having Castleton for its capital, 10 miles NE. of Buxton. Measuring some 30 by 22 miles, it is watered by the Dove, Derwent, and Wye, and culminates in Kinderscout (2082 feet), other eminences being Axe Edge (1810 feet) and Mam Tor (1710). The Peak Cavern or Devil's Hole near Castleton penetrates 750 yards; and crowning a rock above the village is Peveril Castle, so named from its first lord, a bastard of William the Conqueror's. The wonders of the Peak were celebrated early by Thomas Hobbes (1666) and Charles Cotton (1683); modern works are by Croston (1862; new ed. 1889), Bradbury (1879), Jennings (1880), and Leyland (1891), besides others cited at DERBYSHIRE.

Pe'-chi-li, GULF OF, a land-locked extension of the Yellow Sea (q.v.), between Corea and the Chinese province of Shan-tung, into which the Pei-ho (q.v.) discharges.

Pechora. See PETCHORA.

Peckforton Castle, the Cheshire seat (1851) of Lord Tollemache, 4 miles SSW. of Tarperley.

Pecos, a river of New Mexico and Texas, flowing 800 miles SSE. to the Rio Grande.

Pedrotallagalla. See CEYLON.

Peeblesshire, or TWEEDDALE, a southern county of Scotland, bounded by Edinburgh, Selkirk, Dumfries, and Lanark shires. Irregular in outline, it has a maximum length and breadth of 29 and 21 miles, and an area of 347 sq. m. or 222,240 acres. The Tweed, rising in the extreme south, winds 36 miles NNE. and E., descending therein from 1500 to 450 feet; and from it the surface rises into big, round, grassy hills—Windlestraw Law (2161 feet), Minchmoor (1856), Hartfell (2651), Broad Law (2754), &c. Among the Tweed's numberless affluents are Talla, Biggar, Lyne, Manor, Eddleston, Leithen, and Quair Waters, of which the Talla supplies Edinburgh with water. Less than one-fifteenth of the entire area is under corn and root crops; but nearly 200,000 sheep graze on the hillsides. The antiquities include over fifty hill-forts, the 'Romanno terraces,' a Roman camp at Lyne, the ruined castles of Neidpath and Drochil, and the old mansion of Traquair. Peebles and Innerleithen are the towns. The county unites with Selkirkshire to return one member. Pop. (1801) 8735; (1841) 10,499; (1911) 15,258.

PEEBLES, the pleasant county town, stands on the Tweed, 22 miles S. of Edinburgh. It has a new parish church (1887) and five other modern churches; the Chambers Institution (1859), with library, museum, &c., in the old house of the Yester and Queensberry families; a hydropathic; a cross; a public park (1887); tweed manufactures; and the tower of St Andrew's Church (1196), restored in 1882 by Dr William Chambers, who rests beneath its shadow, and who, like his brother Robert, was a native. Mungo Park was a surgeon here. Peebles was made a royal burgh in 1367, and till 1832 returned one member. Pop. 5500.

See Dr A. Pennicuik's *Description of Tweeddale* (3d ed. 1875), Dr John Brown's *Minchmoor* (1864), *Charters of Peebles* (1873), and the histories of Dr W. Chambers (1864) and Sir G. Douglas (1899).

Peekskill, a manufacturing village, on a beautiful point of the Hudson River, 42 miles N. of New York; pop. 15,000.

Peel, a coast-town of the Isle of Man, 11½ miles by rail NW. of Douglas. On Peel Hill (450 feet) is a tower called Corrin's Folly; and on an island sheltering the harbour stand the beautiful ruins of Peel Castle, celebrated by both Scott and Wordsworth. It dates from the 12th century, but was mainly rebuilt by the fourth Earl of Derby in 1593. St German's Cathedral, a cruciform ruin, with a crypt and low central tower, is included in its area. Fishing is Peel's chief industry, but the place attracts yearly more and more visitors. Pop. 4000.

Pegu', a town of Lower Burma, on the river Pegu, 46 miles NE. of Rangoon, was long the capital of a powerful kingdom; travellers in the 16th century speak of its magnificence. It was destroyed in the middle of the 18th century. A celebrated pagoda still stands within part of the old walls. Pop. 15,000.—The *river* flows 180 miles S. to the Rangoon or Hlaing River.

Pei-ho, a river of China, rises near the borders of Mongolia, flows NE. and SE., past Peking and Tien-tsin, and falls into the Gulf of Pe-chi-li after a course of more than 350 miles. Its mouth is defended by the forts of Taku.

Peipus (*Pī-poos*), LAKE, in NW. Russia, lies between the government of St Petersburg and Livonia. On the south it is connected with Lake Pskoff by a long, narrow channel, the length of both lakes being 87 miles, the greatest breadth 30, the area 1356 sq. m., and the depth from 14 to 49 feet. Their waters, which abound in fish, are carried to the Gulf of Finland by the Narova. The shores are marshy and flat.

Pekin, capital of Tazewell county, Illinois, on the Illinois River, 10 miles S. of Peoria. It has foundries, flour-mills, distilleries, and manufactures organs, ploughs, wagons, &c. Pop. 10,000.

Peking, or PEI-CHING ('Northern Capital'), the capital of the Chinese republic, is in 39° 54′ 36″ N. lat. and 116° 27′ E. long. It is situated in a sandy plain, and is surrounded by walls with sixteen gates, each surmounted by towers 100 feet high; and it consists, in fact, of two cities—the Inner and the Outer—known also as the Manchu or Tatar and the Chinese, the Northern and the Southern. The walls of the Manchu city average 50 feet in height, and are fully 60 feet wide at the bottom; those of the Chinese city (rectangular in plan) are 30 feet high and 25 wide. The circuit of the two cities measures 21 miles, including an area of nearly 26 sq. m. Peking is one of the most ancient cities of the world; in the 13th century A.D. its Tatar conquerors fell before the invading Mongols; Kublai, a grandson of Genghis Khan, made Peking his capital in 1280, and there he was found by Marco Polo, who styles the city *Khan-baligh*, 'city of the Khan'—hence *Cambaluc*. Soon the Mongols were driven out by the Chinese Ming dynasty, the founder of which fixed his capital at Nanking (q.v.). The third Ming emperor returned to Peking in 1421. The Manchus, who became masters of the empire in 1643, found this city ready for them. A new era in its history commenced in 1860, when it surrendered to the English and French allies.

The Manchu or Inner City is divided into three portions; and at the heart of it are two enclosures, into the innermost of which entrance is forbidden to all except such as have official claims to admission. It is called the 'Purple Forbidden City,' is very nearly 2¼ miles in circuit, and in it are the palaces of the former emperors and other members of the imperial family. The *T'âi Ho*, or 'Hall of Grand Harmony,' is built of marble on a terrace 20 feet high, and rising itself other 110 feet; its principal apartment is 200 feet long and 90 wide.

Surrounding the Forbidden City is the 'August City,' about 6 miles in circuit, and encompassed by a wall 20 feet high. In the W. part of the 'August City' is the 'Western Park' with a large artificial lake, a summer-house, gardens, the copper statue of Buddha (60 feet high), and the temple of 'Great Happiness.' In the General City are the principal offices of the government, the observatory, the Provincial Hall for literary examinations, the Colonial Office, and the 'National Academy.' In the north-eastern corner is the Russian mission, and west from it the 'Palace of Everlasting Harmony,' a grand lamasery for over a thousand Mongol and Tibetan monks. A little farther W. stands, amidst cypresses, the temple of Confucius. To the 'Temple of Emperors and Kings,' near the south wall, the emperors went to worship the spirits of nearly two hundred predecessors; the great Tutelary Temple of the capital is grimy, and full of fortune-tellers. All the foreign legations and Christian missions are within the Inner City. The new R. C. cathedral (1888) is conspicuous.

The Chinese or Outer City is very sparsely populated; much of the ground is under cultivation or wooded. The 'Altar to Heaven,' with its adjunct the 'Altar of Prayer for Grain,' and the 'Altar of Agriculture,' are both near the southern wall. The 'Altar to Heaven' stands on a splendid triple circular terrace of white marble, richly carved, in a grove of fine trees. The 'Altar of Prayer for Grain,' a similar but smaller structure, was burned down in 1889. The principal streets of the Chinese City are more than 100 feet wide, but the side streets are mere lanes. The streets are seldom paved, and are deep either in mud or in dust. In the smaller streets the houses are miserable shanties; in the main streets both private houses and shops are one-story brick edifices, the shops gay with paint and gilding. There are three Catholic cemeteries (Portuguese, French, and native) and a Russian one; and there are mission buildings, Russian and other, and hospitals. Free schools and charitable institutions are not infrequent. The climate of Peking is severe, the temperature in winter being from 25° to 10° F., and in summer the heat is great, the thermometer rising to 105°, though the usual summer temperature is 75° to 90°. The population is usually believed to be a million or somewhat less; the Chinese outnumbering both Manchus and Mongols. Peking was connected by railway with Tien-tsin in 1897; the line to Hankow, on the Yang-tsze-kiang, was completed in 1902. There are also lines to Tang-ku, to Mukden, and to Kalgan, &c. There is also direct telegraphic communication with Europe. Since 1868 there is a university, and since 1906 a medical school. Peking was the scene of the troubles connected with the 'Boxer' rising in 1900, the siege of the legations, and their relief by the allied forces, who occupied the 'Forbidden City' after the flight of the Chinese court to Singanfoo. See works cited under CHINA.

Pelesch, a royal castle of Roumania, built in 1873–84, on the south side of the Transylvanian Alps, 70 miles N. of Bucharest.

Pelew Islands, also PALAU, twenty-five mountainous, wooded, coral-fringed islands in the Pacific, SE. of the Philippines, sold by Spain to Germany in 1899; area, 170 sq. m.; pop. 3000. With the Western Carolines and the Mariannes they form a district of the New Guinea Protectorate.

Pelion, the ancient name of a wooded mountain-range in Thessaly, extending along the east coast. According to the myth, the Titans, to scale Olympus, the gods' abode, piled Ossa on Pelion, the highest peak (5310 feet) of the range.

Pella, capital of Macedonia and birthplace of Philip II. and Alexander the Great, stood amidst marshes, a few miles NW. of Thessalonica.

Peloponnesus. See GREECE, MOREA.

Pelotas, a town of Rio Grande do Sul, near Lagõa dos Patos, prepares jerked beef; pop. 30,000.

Pemba, a coral island of the Zanzibar Protectorate, 50 miles NE. of Zanzibar Island; area, 380 sq. m.; pop. 80,000.

Pemberton, a coal and cotton town in Lancashire, 2 miles from Wigan; pop. 25,000.

Pembina, capital of Pembina county, North Dakota, on the Red River of the North, at the mouth of the Pembina River, 68 miles by rail SW. of Winnipeg and 293 NW. of St Paul.

Pembrey, a Carmarthen town, on the Burry. Burry Port (pop. 4600) was detached in 1903.

Pembroke, the county town of Pembrokeshire, on a navigable creek of Milford Haven, 9 miles W. of Tenby and 80 W. by N. of Cardiff. On the extremity of the ridge on which the town is built stands Pembroke Castle, founded in 1094 by Arnulf de Montgomery, a very imposing ruin, with a Norman keep 75 feet high and 52 in diameter. Beneath is a huge natural cavern, 70 by 50 feet. The birthplace of Henry VII., this castle in 1648 was taken by Cromwell after a six weeks' siege. Monkton Priory, with its roofless Decorated choir, is another interesting structure. The Pembroke district of boroughs, returning one member, comprises Pembroke, Milford, Tenby, Wiston, and also (since 1885) Haverfordwest, Fishguard, and Narberth. Pembroke for more than four centuries has given the title of earl to the House of Herbert. At Pembroke Dock, or Pater, 2½ miles north-west, is the naval dockyard and arsenal, established in 1814. With an area of 80 acres, it has since 1861 been fortified at a cost of more than a quarter of a million. Pop. of Pembroke, 16,000; of Pembroke district of boroughs, 39,000.

Pembrokeshire, a maritime county of South Wales, the westernmost of the Principality. Measuring 30 by 25 miles, it has an area of 611 sq. m., or 391,181 acres, of which three-fourths is arable. The coast-line is much of it rugged and precipitous; and inland the surface is undulating, green hills alternating with fertile valleys, and attaining a maximum altitude of 1754 feet in the Precelly range, which traverses the north of the county from east to west. Rivers are the Teifi, separating Pembrokeshire from Cardigan, and the East and the West Cleddau. Coal, slate, lead, and iron have been worked. St David's Cathedral and half-a-dozen mediæval castles make up the antiquities with Ogam inscriptions, neolithic implements, and Roman coins. At Haverfordwest and Tenby a colony of Flemings was established in 1107. They adopted the English tongue; and Pembrokeshire, or 'Little England beyond Wales,' is now over more than half its area inhabited by an English-speaking population, although it is the remotest of all the Welsh counties. It was harried by Owen Glendower in 1405; and on 22d February 1797 it witnessed the last French invasion, when 600 regulars and 800 jail-birds landed near Fishguard, only to surrender to some militia and yeomanry under Lord Cawdor. Pembrokeshire returns one member. Pop. (1801) 56,280; (1861) 96,278; (1911) 89,960. See works by Fenton (1811) and Phillips (1909).

Penang (*Pulo Pin'ang*, 'Betel-nut Island'), officially PRINCE OF WALES ISLAND, one of the British Straits Settlements (q.v.), lies at the northern extremity of the Strait of Malacca, 2 to 10 miles from the west coast of the Malay Peninsula, and 360 miles NNW. of Singapore. Length, 15 miles; breadth, 5 to 10 miles; area, 107 sq. m., three-fifths being hilly. A sanatorium crowns the highest point, 2920 feet above sea-level. The whole is covered with forest and vegetation, coconut and areca palms predominating. In the low lands the thermometer ranges from 70° to 95°, and at the sanatorium from 60° to 75°. The rainfall averages 111 inches a year. The exports include tin, spices, sugar, and tobacco. One-half of the inhabitants are Chinese, nearly one-fourth Malays, and one-sixth Tamils and others from India. Georgetown, the capital, is situated at the NE. extremity, and is defended by forts. Pop. 30,000. Province Wellesley, on the peninsula opposite, forms part of this same settlement, and is 45 miles in length by 4 to 11 in breadth, with an area of 270 sq. m. It produces tapioca, sugar, rice, and cocoa-nuts. Another dependency is the Dindings, including the island of Pangkor, 80 miles S. of Penang. The native raja ceded Penang to Britain in 1785 for a pension of £1000; Province Wellesley was acquired in 1798. Pop. (including Province Wellesley and the Dindings) 278,000.

Penarth, a Glamorganshire seaport, 3 miles S. of Cardiff, with a large dock (1851–65); pop. in 1851, 105; now, 15,500.

Pendennis Castle. See FALMOUTH.

Pendle Hill. See CLITHEROE.

Pendleton, a NW. suburb of Manchester, wholly within the borough of Salford.

Penge, an urban district of Kent, 6 miles S. of London Bridge Station; pop. 22,000.

Peniche (*Pay-nee'shay*), a seaport in the Portuguese province of Estremadura; pop. 3000.

Penicuik (*Pennycook*), a town of Edinburghshire, on the North Esk, 10 miles S. of Edinburgh by road, but 16 by a branch line (1872). It has a Romanesque church-tower and large paper-mills, dating from 1709; whilst 2 miles NNE. are Glencorse barracks (1804–82), originally a dépôt for French prisoners. Pop. 3000. See Wilson's *Annals of Penicuik* (1891).

Penielheugh, an eminence (774 feet) in Roxburghshire, 4½ miles NE. of Jedburgh, crowned by a Waterloo column, 150 feet high.

Penistone, a market-town in the West Riding of Yorkshire, on the Don, 13¼ miles NNW. of Sheffield. It has steel-works, collieries, &c., and a railway viaduct 76 feet high. Pop. 3400.

Penjdeh, an important strategical position, near the fork of the Khushk and Murghab rivers, was seized from Afghanistan by the Russians in March 1885, and since 1887 has been formally included in Russian Turkestan.

Penkill Castle, an Ayrshire mansion, 3 miles E. by N. of Girvan, with paintings by W. B. Scott and memories of Rossetti.

Penkridge, a town of Staffordshire, on the Penk, 6 miles S. of Stafford by rail. Pop. 2400.

Penmaenmawr, a Carnarvonshire watering-place (pop. 4000) 4 miles SW. of Conway by rail. On Penmaenmawr mountain (1553 feet), the northern extremity of the Snowdon group, are remains of a great British fort, Dinas Penmaen.

Pennar, or PUNNAIR, two rivers of southern India, both running eastwards through Madras Presidency to the Indian Ocean—the first (355 miles) a little N. of Nellore, the second (245) N. of Cuddalore.

Pennine Alps. See ALPS.

Pennine Range, 'the backbone of England,' a chain running southward from Northumberland to Derbyshire, and varying in height from 1200 feet to near 3000 (in Cross Fell).

Pennsylvania, since 1830 the second in population of the United States, is a parallelogram lying between New York and Maryland, Ohio and New Jersey. The Delaware is the boundary on the E.; and in the NW. the state has 45 miles of coast on Lake Erie. It is 160 miles wide and 302 long (E. to W.); in area (45,000 sq. m.) it is the thirty-second state of the Union. The Appalachians (q.v.) cross the state from NE. to SW.; between the Blue or Kittatinny Mountains on the east and the higher Alleghany range (some peaks 2500 feet) on the west lie numerous minor forest-clad chains. The surface is naturally divided into three sections, the low district south-east of the mountains containing some of the best farming land; the mountainous region embracing a fourth of the area of the state, and celebrated for its picturesque scenery (especially for the gaps cut by the rivers *through* the ranges of hills); and the broken hilly plateau in the west, covering half the state, much of it heavily wooded. The geology is remarkable for the great development of the different periods of Palæozoic. The breaking of the strata and the enormous pressure to which the eastern coal-deposits have been subjected has resulted in giving Pennsylvania the most valuable anthracite basins of the country. The excellent bituminous coal (especially around Pittsburgh) is practically inexhaustible; iron ore has contributed materially to the prosperity of the state; petroleum and natural gas are important products of western Pennsylvania; her anthracite coal-basins are, however, the specialty. The anthracite tract covers an area of 472 sq. m., and is situated in the highland district between the Delaware and Susquehanna rivers. The proximity of coal and iron in such vast quantities has made Pennsylvania a great mining and manufacturing state; it leads in the manufacture of pig-iron. The successful boring for petroleum in 1859 produced an excitement hardly surpassed by the discovery of gold in California. There has been extensive utilisation of natural gas for heating and manufacturing purposes. Gold, silver, copper, and tin exist, but not in paying quantities; there are large zinc-works at South Bethlehem, and nickel is obtained in Lancaster county. The eastern part of the state is drained by the Delaware and its tributaries the Schuylkill and Lehigh. The Susquehanna, with its affluents, occupies the central drainage area. The greater part of western Pennsylvania is drained by the Alleghany and Monongahela rivers, uniting at Pittsburgh to form the Ohio. The climate is subject to extremes, and much modified by differences of elevation. Nearly one-fourth of the state is wooded; lumbering is one of the sources of wealth in the north, and farther south and west are great forests of hemlock, which maintain some of the largest tanneries in the world. The soil, except in the mountains, is rich and fertile. The mountain regions and the western plateau are well suited for grazing. The most important industries of Pennsylvania are mining and manufacturing. Shipbuilding is an important interest.

The first permanent settlement was made in

1643 at Chester by Swedes, whose colony of New Sweden was twelve years later conquered by the Dutch. In 1664 the English obtained possession, and the territory now called Pennsylvania was in 1681 granted by Charles II. to William Penn. In the revolutionary and in the civil war Pennsylvania took a prominent part. Many of the miners and ironworkers are of Irish, Hungarian, and Italian birth, and serious riots have not seldom occurred; a large proportion of the farmers are of German descent, and still speak the *patois* known as 'Pennsylvania Dutch.' Philadelphia, chief manufacturing city of the Union, ranks third in population (1,549,000). Other cities are Pittsburgh (534,000), Allegheny (145,000), Scranton (130,000), Reading (96,000), Erie (66,500), Wilkesbarre (67,000), Harrisburg, the capital (64,000), Lancaster (47,000), Altoona (52,000), Johnstown (55,500), Allentown (52,000). Pop. of the state (1800), 602,365; (1840) 1,724,033; (1880) 4,282,891; (1910) 7,665,111.

Pennsylvania Castle. See PORTLAND (ISLE).

Penob'scot, a river of Maine. The West Branch rises near the Canadian frontier, and flows E. and SE. to meet the East Branch or Seboois River. Afterwards its course is SSW. to Penobscot Bay, a broad and sheltered inlet of the Atlantic, 35 miles long and 20 wide, with numerous islands. The river is tidal and navigable for large vessels to Bangor, 60 miles from its mouth.

Penrhyn, great slate-quarries in Carnarvonshire, near Bethesda (q.v.). Penrhyn Castle, close to Bangor, is the seat of Lord Penrhyn.

Penrith, a market-town of Cumberland, in a picturesque and fertile valley, on the outskirts of the Lake District, 18 miles SSE. of Carlisle. It has a fine old ruined castle, where Richard III. (then Duke of Gloucester) is said to have resided, and a grammar-school (1395; refounded 1564). In the churchyard are two ancient monuments, the 'Giant's Grave' and the 'Giant's Thumb,' often visited by Sir Walter Scott; and north-east of the town is the wooded Beacon (937 feet). There are sawmills, tanneries, and breweries, but the chief trade is agricultural. Pop. 9000. See works by J. Walker (1856) and G. Watson (1893).

Penryn (Corn. 'head of the river'), a town of Cornwall, at the head of a creek of Falmouth harbour, 3 miles NW. of Falmouth town, with which it returns one member to parliament (till 1885 two). Scarce a trace remains of Glasney College, founded in 1264 for thirteen Black Augustinian Canons; and none of a palace of the bishops of Exeter. Neighbouring quarries supply the famous Penryn granite—the material of Waterloo Bridge, the Chatham Docks, &c.; and the town has besides some manufactures of paper, woollen cloth, gunpowder, &c. Incorporated by James I., it was taken by Fairfax in 1646. Pop. 3000.

Pensaco'la, the capital of Escambia county, Florida, is 244 miles by rail ENE. of New Orleans, on the west shore of a deep bay opening into the Gulf of Mexico. The entrance is defended by Fort McRee and Fort Pickens, the latter on Santa Rosa Island; and near by is a navy-yard. Pensacola contains foundries and lumber and planing mills, and ships much yellow pine. It was settled by the Spaniards before 1700, occupied by the British in 1763–81, taken from them by Andrew Jackson in 1814, and passed with Florida to the United States in 1819. Pop. 23,000.

Penshurst, a parish of Kent, 4 miles SW. of Tunbridge; pop. 1700. Penshurst Place, a splendid old mansion, was the birthplace of Sir Philip Sidney and Algernon Sidney.

Pentland Firth, a dangerous but much navigated channel between the Atlantic and German Oceans, separating the mainland of Scotland from the Orkney Islands. It is 14 miles long and 6¼ broad at the narrowest. The Pentland Skerries, 5 miles NE. of Duncansbay Head, consist of two islets and several rocks. On the larger of the islets is a lighthouse (1794).

Pentland Hills, Scotland, extend 16 miles SW. from a point 3 miles S. of Edinburgh, through the counties of Midlothian, Peebles, and Lanark, have a breadth of 4 to 6 miles, and attain a maximum height in Carnethy (1890 feet) and Scald Law (1898). In the battle of the Pentlands or Rullion Green, 2 miles NNW. of Penicuik, Sir Thomas Dalyell routed 900 westland Covenanters, 28th November 1666.

Pentonville, a populous district in London in the parish of St James's, Clerkenwell, the first buildings in which were erected in 1773 on fields belonging to Henry Penton, Esq. The name has since been extended to part of Islington parish, in which stands (in Caledonian Road) *Pentonville Prison*, built in 1840–42.

Penza, a large rural town of Russia, 330 miles by rail SE. of Moscow, has a cathedral (17th century), a botanical garden, and manufactures of paper, soap, &c. Pop. 64,000.—The *government* has an area of 15,000 sq. m. and a pop. of 1,800,000.

Penzance' (Corn., 'holy headland'), a town of Cornwall, the most westerly in England, at the head of Mount's Bay, 10 miles ENE. of Land's End, 80 W. by S. of Plymouth, and 306 (by road 281) WSW. of London. Standing on a finely-curved shore surrounded by rocky eminences, it is famous for its mild, equable climate, though the annual rainfall is heavy (43 inches). Its fine esplanade commands splendid land and sea views; and its chief buildings, constructed largely of granite, include a market-hall (1837) with a statue before it of Sir Humphry Davy (a native), an infirmary (1874), a post-office (1883), and public rooms (1867), Italian Renaissance in style, and comprising a guildhall, museum, library, &c. The harbour has two piers (1772–1845) half a mile long, forming a tidal basin of 21 acres; and docks have been added since 1882. Penzance is a headquarters of the mackerel and pilchard fisheries; market-gardening is an important industry; and of recent years the place has grown much in favour as a watering-place. Burned by Spaniards in 1595, and sacked by Fairfax in 1646, it was incorporated in 1614, and from 1663 to 1838 was one of the five 'coinage towns.' Population, 13,500. See works by Lach-Szyrma (1878) and Millett (1876–80).

Peo'ria, capital of Peoria county, Illinois, on the west bank of the Illinois River, at the outlet of Peoria Lake, 161 miles by rail SW. of Chicago. It is an important railway centre, and is connected by steamboat navigation with the Mississippi and by canal with Lake Michigan. It has a Roman Catholic cathedral, a high school, a medical college, hospitals, and parks, the largest Jefferson. Mines of bituminous coal supply the great distilleries, breweries, foundries, manufactories of flour, oatmeal, starch, glucose, pottery, &c. In the lower city are large stockyards. Pop. 67,000.

Pera, a suburb of Constantinople (q.v.).

Peradeniya. See KANDY.

Perak', one of the Federated Malay States on the west side of Malacca, since 1874 under the protection of Britain. Area, 8700 sq. m.; pop. 494,000. The interior attains 8000 feet above sea-level. The soil is fertile, and covered mostly with luxuriant vegetation. Tin is the chief product, and after it rubber, besides lead, rice, sugar, tobacco, coffee, tea, spices, &c. See books by M'Nair (1877) and Swettenham (1894).

Percy's Cross, a Northumbrian monument, 6 miles SSE. of Wooler, to Sir Ralph Percy, who fell fighting against Edward IV. (1463).

Perekop, ISTHMUS OF, connecting the Crimea (q.v.) with the mainland of Russia. In the north of it is the small town of Perekop; pop. 5000.

Pereslavl, a town of Russia, 96 miles NE. of Moscow by rail. It has a 12th-c. cathedral, cotton-manufactures, and lake-fisheries. Pop. 10,000.

Per'gamus, or PERGAMUM, an ancient city of Mysia in Asia Minor, on the river Caïcus, 15 miles from its mouth. It still exists as *Bergama*, and is noted for the splendour of its ruined temples, palaces, aqueducts, gymnasia, amphitheatres, and city walls. These were excavated for the Prussian government in 1878–86.

Périgueux (*Payr-ee-guh'*), a town of France, formerly capital of Périgord, now in the dep. of Dordogne, and situated on the right bank of the Isle, a tributary of the Dordogne, 95 miles by rail NE. of Bordeaux. The cathedral of St Front is a Byzantine edifice, built in 984–1047, but spoilt by 'restoration' in 1865. The town museum is especially rich in Roman and other antiquities. Statues of Montaigne, Fénelon, and the soldiers Daumesnil and Bugeaud adorn the town. Iron is mined and worked, and woollens are manufactured. The celebrated *pâtés de Périgueux*, made of partridges and truffles, are largely exported. Population, about 34,000. The Romans built another town on the opposite side of the river to the Gallic *Vesunna*, at the junction of five Roman roads. Close to the modern town are remains of a vast amphitheatre, aqueducts, baths, and temples. The tower of Vesunna, 89 feet high and 200 in circumference, has walls 6 feet thick, but has neither doors nor windows. The district of Périgord is noted for its caves and archæological finds.

Perim (*Per-eem'*), a barren island, since 1883 a coaling and telegraph station belonging to Britain, in the Strait of Bab-el-Mandeb, at the southern entrance to the Red Sea, 97 miles W. of Aden, 1½ from the Arabian shore, and 9 from the African. It is 3½ miles long by 2½ wide, and crescent shaped, the two horns embracing a deep and spacious harbour. The island, held by the British in 1799–1800, and again occupied in 1857, is under the jurisdiction of Bombay Presidency. Pop. about 400, mostly coolie coal-heavers. See H. Spalding, *Perim as it is* (1890).

Perleberg (*Per'leh-berg*), a Prussian town, in Brandenburg, 80 miles NW. of Berlin. Pop. 10,000.

Perm, a town of Russia, on the Kama, by which it is 685 miles NE. of Kazan. It is the chief seat of the extensive transit trade between European Russia and Siberia, and has a cathedral, tanneries, distilleries, flour-mills, oil-works, and a government arsenal and cannon-foundry. Pop. 46,000.—The *government* has an area of 128,000 sq. m. and a pop. of 3,670,000.

Pernambu'co, or RECIFE (*Re-see'feh*), the busiest seaport of North Brazil, stands at the easternmost point of the coast. It consists of three portions, connected by bridges—*Recife* ('the reef') proper, with narrow, winding streets, the chief seat of commerce, on a peninsula; *San Antonio*, with straight, wide streets, on an island between the peninsula and the mainland; and *Boa Vista*, where are the merchants' villas, on the mainland. The principal buildings embrace two arsenals, an observatory, the palace of the Bishop of Olinda (8 miles to the north), a law school, &c. The harbour, formed by a reef, has been much improved since 1889. Cottons, machinery, and tobacco are manufactured, and shipbuilding is carried on. The principal exports are sugar and cotton, with rum, hides, dye-woods, &c.; the principal imports are cottons and woollens, fish and meat, vegetables, minerals, wines, &c. Britain, the United States, and France have the largest shares in this trade. Population, about 150,000. Recife was founded by the Spaniards in the second half of the 16th century. Sir James Lancaster captured it in 1595, the Dutch in 1630, and the Portuguese in 1654.—The *state* has an area of 50,000 sq. m. and a pop. of 1,254,000.

Pernow (Ger. *Pernau*), a seaport of the Baltic Provinces of Russia, stands at the mouth of the river Pernow, at the northern extremity of the Gulf of Riga, 100 miles N. of Riga. Besides linseed and barley, it ships large quantities of flax, principally to Great Britain. Pop. 15,000.

Perpignan (*Per-peen-yon*^{g}*'*), a town and a fortress in the French dep. of Pyrénées-Orientales, stands on the river Têt, 7 miles from the Mediterranean, 40 by rail S. of Narbonne, and 17 from the Spanish frontier. It commands the passes of the Eastern Pyrenees, and is defended on the south by a citadel, which encloses the old castle of the Counts of Roussillon, and by a detached fort. There are a cathedral (begun in 1324), the Moorish-Gothic cloth-hall or bourse (1396), a town-house (1692), the building of a former university (1349—French Revolution), a palace of justice, and a college. The industries include the making of good red wine, brandy, cloth, &c. As capital of the former county of Roussillon, Perpignan was in the hands of the kings of Aragon from 1172 to its capture by France in 1475; it was restored to Spain in 1493; but Richelieu retook it in 1642. Pop. 40,000.

Perranza'buloe ('Perran in the sands'), a Cornish coast parish, 10 miles N. by W. of Truro. The rude little stone oratory (25 by 12½ feet) of St Piran, sent to Cornwall by St Patrick in the 5th century, had been buried in the sands for a thousand years, when it was discovered in 1835. Perran Round is a circular enclosure, with seven rows of seats that could seat 2000, in which miracle plays were performed of old. See works by Haslam (1844) and Trelawny (8th ed. 1884).

Perryville, a village of Kentucky, 40 miles SW. of Lexington, was the scene of a hard-fought battle between the Union and Confederate armies of Buell and Bragg, 8th October 1862.

Persep'olis ('Persian City'), the Greek name for the capital of ancient Persia, was situated to the east of the river Medus (Murghab), 14 miles above its confluence with the Araxes (Bendemir), 35 miles NE. of Shiraz. A series of most remarkable ruins is now all that remains of that city, with which 'no other city could be compared either in beauty or in wealth,' and which was called 'The Glory of the East.' Three groups are chiefly distinguishable in the vast ruins existing on the spot. First, the Great Hall of Xerxes, or Chehel-Minár (Forty Pillars), with the Mountain of the Tombs (Rachmed), also called Takht-i-Jamshíd or the throne of Jamshíd, after the reputed founder of Persepolis. The next in order is Naksh-i-Rustam, to the north-west, with its tombs; and the last, the building called the Haram of Jamshíd. See the travels of Chardin, Niebuhr, Ker Porter, Rich, &c.; Fergusson's *Palaces of Nineveh and Persepolis Restored*, Vaux's *Nineveh and Persepolis*, Rawlinson's *Five Great Monarchies*, and for photographic views, *Persepolis*, by Stolze and Nöldeke (Berlin, 1882).

Pershore, a pleasant, old-fashioned market-town of Worcestershire (q.v.), in a fruit-growing district, on the Avon, 9 miles SE. of Worcester. Holy Cross, the church of a Benedictine abbey, originally founded in 689, is but a fragment—choir, south transept, and central tower, mainly Decorated in style. It was restored by Scott in 1863-65. Pershore manufactures stockings and farm implements. Pop. of parish, 3000. See a work by Styles (1838).

Persia, called by the natives IRÁN, the most important native kingdom of western Asia, is bounded by Russian Caucasia, the Caspian Sea, the Russian Transcaspian provinces, Afghanistan, Beluchistan, the Strait of Ormuz, the Persian Gulf, and Asiatic Turkey. Extending 900 miles from E. to W. and 700 miles from N. to S., it has an area of about 638,000 sq. m., consisting for the most part of a great tableland from 2000 to 5000 feet in height. North of this the majestic range of Elburz (with its peak Demavend, q.v.) runs, south of the low Caspian shores, eastward towards Afghanistan and the Paropamisus; and a mountain belt running from the NW. to SE. with snow-capped peaks, descends by steep terraces towards the Persian Gulf, and bounds it on the W. (see ASIA). Demavend is an extinct volcano; and earthquakes occasionally occur. A great part of the province of Khorassan and the north half of Kerman, which form the great central plain, and detached portions of all the other provinces, with the exception of those on the Caspian Sea, forming more than three-fourths of the surface of Persia, are desert—that is to say, are uncultivated owing to the want of rain; but by far the greater portion of this region consists of light dry soil, which only requires irrigation to become fruitful. This great central desert contains a few oases. A narrow strip of low and level country extends along the Persian Gulf and the Strait of Ormuz. Some parts of the country are of exceeding fertility and beauty; the immense valleys, some of them 100 miles in length, between the various ranges of the Kerman Mountains, abound with the rarest and most valuable vegetable products. Great portions of the provinces of Fars, Arabistan, Kurdistan, and Azerbijan have been lavishly endowed by nature with the most luxuriant vegetation; while the provinces of Ghilan and Mazanderan, which lie between the Elburz and the Caspian Sea, and the southern slopes of the Elburz are as beautiful as wood, water, and a moderately hot climate can make them.

Persia has hardly one river that can properly be termed navigable, though some of them are several hundred miles in length, and of great width and volume of water. The Karun (q.v.) was opened to foreign steam-navigation from its mouth to Ahwaz in 1889. Most of the ancient irrigation works are ruins. Persia abounds with saline lakes, the chief being Urmia (q.v.) and Bakhtegan (60 miles by 9). Persia possesses three climates—that of the Dushtistan, of the elevated plateau, and of the Caspian provinces. In the Dushtistan, the southern lowland, the autumnal heats are excessive, those of summer more tolerable, while in winter and spring the climate is delightful. On the plateau the climate of Fars is temperate. To the north and north-west the winters are severe. The desert-region of the centre and east, and the country on its border, endure most oppressive heat during summer and piercing cold in winter. The Caspian provinces, from their general depression below the sea-level, are exposed to a degree of heat in summer almost equal to that of the West Indies, and their winters are mild. Rains, however, are frequent and heavy, and many tracts of low country are marshy and extremely unhealthy. Except in the Caspian provinces, the atmosphere of Persia is remarkable above that of all other countries for its dryness and purity. The cultivated portions of Persia, when supplied with moisture, are very fertile, producing an immense variety of crops. The chief cultivated products are admirable wheat, barley, and other cereals, cotton, sugar and rice (in Mazanderan), and *tumbaku* or tobacco for the *narghileh* or water pipe. The vine flourishes in several provinces, and the wines of Shiraz are celebrated. Mulberries are also largely cultivated, and silk is a most important product. The forests of the Elburz swarm with wild animals, as wolves, tigers, jackals, boars, buffaloes, foxes, and the Caspian cat. Leopards abound in Mazanderan, and lions in parts of Fars and Arabistan. The horses have always been celebrated for their beauty, speed, and endurance. The Caspian rivers abound with fish, especially sturgeon, great quantities of which are cured and exported to Russia. Except only salt, the mineral products are insignificant, though iron, copper, lead, antimony, coal, sulphur, and naphtha exist in plenty.

The settled population are chiefly Tajiks, the descendants of the ancient Persian race, with an intermixture of foreign blood. To this class belong the agriculturists, merchants, artisans, &c. The Tajiks are Mohammedans of the Shiite sect, with the exception of the remaining Parsees (some 9000 in number), who are found chiefly at Yezd, and still retain their purity of race and religious faith. The nomad or pastoral tribes are of four distinct races—Turks (not Osmanli Turk), Kurds, Lúurs, and Arabs. Of the four the Turk is the most numerous, and to it belongs the present Kajar dynasty. There is a small population of native Christians—the Nestorians of Urmia and Telmais, and Armenians, whose principal settlement is at Julfa (Ispahan). They have bishops there and at Tabriz. Including a few Roman Catholics and Protestants, the whole number of Christians can hardly exceed 90,000. The Jews number 40,000. There can be no doubt that in antiquity, and even during the middle ages, while the irrigation-works still fertilised large tracts of country, Persia supported a great population; in the 17th century it was estimated at 40 millions. In 1905 the population was estimated at about 9½ millions, and the principal cities thus: Teheran, 250,000; Tabriz, 180,000; Ispahan, 80,000; Meshhed and Kermân, 70,000 each; Yezd, 55,000; Barfurush and Shiraz, 50,000 each; Hamadan, Kazvin, Kom, Kashan, Resht, from 30,000 to 40,000 each. Of the nomads 260,000 are Arabs, 720,000 Turks, 675,000 Kurds and Leks, 234,000 Lúurs, and 20,700 Beluchis and gypsies. The houses are generally built of mud, and, seen from without, look contemptible, but the interiors of the houses of the wealthy are sometimes perfect paradises of elegance. The miserable look of the towns is greatly redeemed by the beauty of the gardens which surround them. The roads are utterly neglected.

Persian trade is comparatively small. Silk has declined, opium is increasing, cottons and woollens, shawls, carpets, and felts are manufactured both for home use and for export. The exports mainly consist of wheat, rice, wine, raisins, almonds and nuts, olive-oil, tobacco, drugs, gums, resins, manna, opium, colouring matters, boxwood, walnut-wood, silk, wool, carpets, skins and furs, wax, pearls, turquoises, sulphur, naphtha, salt; the chief imports are cotton goods from Britain, and broadcloths, jewellery, arms, cutlery, watches, earthen, glass, and metal wares, &c. In the first decade of the 20th century the annual imports were worth 5 to 9 million pounds; exports, 2¾ to 7. The imports of British produce have of late years varied from £300,000 to £500,000; while the exports to Britain were worth from £100,000 to £250,000, without reckoning the much greater value sent to India and other British dependencies. In the north-west, north, and north-east districts a decided Russian superiority in trade is in parts disputed by British and Indian competition; in the south and west British ascendency is established. A Trans-Persian and other railways have been proposed. One has been made from Teheran to Shah Abdul Azim (6 miles, with short branches). Tramways have been laid down in Teheran. The Karun river has been open since 1888 to foreign (mainly British) navigation. Russia has easy access by the Caspian. The principal centres of trade are Tabriz, Teheran, and Ispahan; the chief ports Gombroon (Bender-Abbas), Lingah, and Bushire on the Persian Gulf, and Enzeli, Meshed-i-Sar, and Bender-i-Gez on the Caspian. The government was till 1906 a despotism, limited only by the power of the priests, domestic intrigues, dread of private vengeance, and an occasional insurrection. The 'Shah,' or 'Padishah,' possessed absolute authority over the lives and property of his subjects. His deputies, the governors of provinces and districts, possessed like authority over those under them; their actions were, however, liable to revision by the Shah, who might summarily inflict any punishment upon them for real or alleged misgovernment. Frightful bribery and extortion prevail. Mouhammad Ali Shah granted parliamentary government in 1906, suppressed it by force in 1908; but it was restored and the Shah deposed in 1909. In 1907, by an agreement between Great Britain and Russia, British and Russian spheres of influence were marked off. The annual revenue in 1890–1913 may be stated at from £1,400,000 to £2,600,000. The regular army is really composed of about 30,000 to 60,000 men.

The Medes (akin to the Persians), who occupied the NE. of Persia, rebelled against the Assyrians and founded a kingdom in 708 B.C., subverted in 537 by the Persians under Cyrus, who established a vast and mighty empire, extending from the Ægean to the Oxus and Indus. Cambyses conquered Egypt (525 B.C.); Darius I. and Xerxes I. failed in 490 and 480 to subdue Greece. After the reign of Artaxerxes I. (465–425) decay set in, and Alexander the Great reconstructed a new Persia under Greek influence. At his death Persia fell to the Seleucidæ, but Bactria and Parthia soon became independent; and then the Arsacidæ, a Parthian dynasty, ruled all Persia from 138 B.C. to 218 A.D., when the Sassanian princes, of the old Persian stock, restored a real Persian empire, which contended with Rome on equal terms, repeatedly defeated Roman armies, and took a Roman emperor captive (260 A.D.). The Sassanians were crushed in 639 A.D. by the Mohammedan Arabs, under whom Persia became a favoured province of the Caliphs. After the 9th century various Turkish, Persian, or Tartar dynasties ruled over portions of Persia, but were swept away by the Mongols of Genghis Khan (1335). Timur the Tartar made Persia part of his dominion (1370). A Turkish dynasty had great representatives in Ismail (1500–23) and Abbas the Great (1585–1628). The present Turkoman dynasty was established by Aga-Mohammed in 1795. See books on Persia by Arnold (1876), Wills (1883–86), Benjamin (1886), Curzon (1891), Browne (1893–1910); Morier's tale of *Hajji Baba;* and histories by Rawlinson (of ancient Persia, 1876), Malcolm (1828), Watson (1866), and Clements Markham (1874).

Persian Gulf, an arm of the Indian Ocean which penetrates 650 miles north-westward between Arabia and Persia. Its breadth varies from 55 miles at the mouth to 250 miles, and the area is estimated at 77,450 sq. m., not including the islands, which are scattered over the western half, or lie close inshore along the eastern side. The chief of these islands are Ormuz, at the mouth; Kishm, 810 sq. m. in extent; and the Bahrein Islands. The Great Pearl Bank stretches along the western side from Ras Hassan to nearly half way up the gulf. On the Arabian side the coast is low and sandy, occasionally broken by mountains and cliffs; while on the Persian side it is higher and abrupt, with deep water close inshore, owing to the mountain-ranges of Fars and Laristan running close to the water's edge. The islands, mostly barren and destitute of springs, present numerous traces of volcanic eruptions. With the exception of the Shat-el-Arab (see EUPHRATES), the Persian Gulf receives only insignificant streams. Its eastern side offers good anchorage, either in the numerous bays or in the lee of islands. The greater portion of its southern shores now belongs to the Imam of Muscat, while the whole of the northern shore belongs to Persia. The greatest depth does not exceed 50 fathoms. The submarine telegraph cables of the government of India traverse the whole length of the Persian Gulf, and connect with the systems of Persia and India.

Perth, the county town of Perthshire, on the right bank of the tidal Tay, 43 miles NNW. of Edinburgh, 22 WSW. of Dundee, and 62 NE. of Glasgow. The beauty of its surroundings—the noble river; the two wooded heights, Moncreiffe and Kinnoull Hills, 725 and 730 feet high; and away to the north, the Grampians—makes the 'Fair City' worthy of the name. A handsome nine-arch bridge (1772; widened 1871), 840 feet long, and stretching over a waterway of 590 feet, leads to the suburb of Bridgend, where Ruskin spent much of his childhood; along the Tay's west bank extend two beautiful public parks, the North and South Inches, 98 and 72 acres in area. St John's Church is the only old building—a cruciform Decorated pile, with an earlier central square tower. Other edifices are St Ninian's Episcopal Cathedral (1850–90), an Early Middle Pointed structure; the Tudor municipal buildings (1879), the Grecian county buildings (1819–67), the city hall (1844), the infirmary (1837–69), and the penitentiary and general prison for Scotland (1812–59), besides the water-works (1830–80), two museums, the Albert statue (1864), and the auction-mart (1875). Railways have largely diverted the river-trade; and dyeing is now the leading industry, with manufactures of ink, gaugeglasses, linen, iron, beer, &c. A royal burgh since 1210 or earlier, and taking precedence of all others save Edinburgh, Perth returns one member. Pop. 36,000.

Perth, or St Johnstoun, as it was formerly called, has a wealth of historic memories—the bloody combat on the North Inch between sixty members of the clans Chattan and Kay (1396); the murder of James I. (1437); Knox's 'thundering sermon against idolatry' in St John's (1559); the Gowrie Conspiracy (1600); and Montrose's victory of Tippermuir (1644); besides sixteen ecclesiastical councils and fourteen parliaments, and visits innumerable from royal personages, including the two Pretenders and Queen Victoria. See *Perth Memorabilia* (1806), Maidment's *Chronicle of Perth* (Maitland Club, 1831), and works by Penny (1836), Lawson (1847), Peacock (1849), J. Wilson (1860), and Cowen (1904).

Perth, the capital of Western Australia, occupies a picturesque site on the north bank of the Swan River, 12 miles from Fremantle, its port, at the mouth. Perth has a university (1912), a town-hall, Protestant (1888) and R. C. cathedrals, mechanics' institute and museum, and the governor's residence. Pop., with suburbs, 104,600.

Perth, capital of Lanark county, Ontario, on the river Tay, 141 miles by rail WSW. of Montreal, contains mills and manufactories of machinery, leather, woollens, &c. Pop. 3600.

Perth Amboy, a port of entry of New Jersey, opposite South Amboy on the other side of the mouth of the Raritan River, on the Kill van Kull, 26 miles by rail SW. of New York. There is a steam-ferry to Tottenville on Staten Island opposite. The manufactures include corks. bricks, white-ware, and drain-pipes. Pop. 32,000.

Perthshire, the fourth largest county of Scotland, bounded by Inverness, Aberdeen, Forfar, Fife, Kinross, Clackmannan, Stirling, Dumbarton, and Argyll shires. Its greatest length, from east to west, is 77 miles; its greatest breadth, from north to south, 68 miles; and till 1891 its area was 2601 sq. m., or 1,664,690 acres, of which 38,274 were water. In that year no fewer than eighteen alterations were made by the boundary commissioners, Perthshire receiving eight small enclaves from Forfar, Fife, Kinross, and Stirling shires, whilst giving off to the last three a like number, including the Culross and Tulliallan portion (13,125 acres). Partly Lowland, but mainly Highland (Strathmore the dividing line), it is called by Scott 'the fairest portion of the northern kingdom,' and such, indeed, it is, with its mountains and glens, its rivers and lakes, its forests and fertile vales. The chief rivers are the Forth and Tay, the former receiving the Teith, Allan, and Devon, the latter the Tummel, Lyon, Isla, Braan, Almond, and Earn; whilst amongst upwards of eighty lakes are Lochs Tay, Ericht, Earn, Rannoch, Lydoch, Katrine, Achray, Vennachar, and Menteith. In the south rise the Ochils, with White Wisp (2110 feet), and Blairdenon Hill (2072); in the south-east the Sidlaw Hills, with Dunsinane (1012) and King's Seat (1235); and the Highland area is largely occupied by the Grampians, of whose forty-six summits exceeding 2300 feet may be mentioned Ben Lawers (with cairn, 4004), Benmore (3843), Ben-y-Gloe (3671), Schiehallion (3547), Ben Vorlich (3224), Ben Ledi (2875), Ben Vrackie (2757), and Ben Venue (2393). The soil is extremely varied, in places of great fertility—e.g. in Strathearn and in the Carse of Gowrie, which skirts the north side of the Tay's estuary; but barely a fifth of the entire surface is in tillage, the rest being pasture, woods, deer-forests, mountain, and desolate moorland, such as Rannoch. The woods cover nearly 100,000 acres; and the annual rental of the Perthshire deer-forests, grouse-moors, and rod- and net-fishings exceeds in some years £70,000. Ancient divisions were Athole (N.), Rannoch (NW.), Breadalbane (W.), Balquhidder (SW.), Menteith (S.), Perth (SE.), Gowrie (E.), Stormont and Strathearn (central). The county since 1885 returns two members, one for the eastern and one for the western division, besides one for Perth. Other towns and villages are Aberfeldy, Abernethy, Alyth, Auchterarder, Birnam, Blair-Athole, Blairgowrie, Callander, Comrie, Coupar-Angus, Crieff, Doune, Dunblane, Dunkeld, Pitlochry, Rattray, Scone, and Stanley. Perthshire contains a Roman camp at Ardoch, and the battlefields of the Grampians, Tippermuir, Killiecrankie, and Sheriffmuir; whilst possessing memories of Bruce, Gawin Douglas, Queen Mary, Rob Roy, Burns, Scott, Lady Nairne, Wordsworth. The mansions, which are very numerous, include Taymouth, Drummond, and Blair Castles. Pop. (1801) 125,583; (1831) 142,166; (1881) 129,007; (1911) 124,342, about 9 per cent. Gaelic-speaking. See works by Drummond (1879), Marshall (1880), Hunter (1883), and Millar (1890).

Peru (*Per-oo'*), a republic of South America, extending from near 2° to 17° 20′ S. lat. Previous to the annexations by Chili, the Peruvian territory stretched southward to 22° 10′, with a length along the Pacific coast of 1400 miles, and a width of 300 miles. It borders on the Pacific, Ecuador, Brazil, Bolivia, and Chili. The area is roughly estimated at 500,000 sq. m. The population was in 1900 estimated to be about 4,600,000, the aboriginal Inca Indians forming 57 per cent., the *Mestizos* or half-castes 23 per cent., and the rest being of pure Spanish descent, negroes, Chinese, &c. The *Coast* extends from the base of the Andes to the Pacific Ocean, and consists of a sandy desert crossed by some forty rivers along whose banks there are fertile valleys; the *Sierra*, or region of the Andes, about 250 miles wide, contains stupendous chains of mountains, elevated plains and tablelands, warm and fertile valleys and ravines; and the *Montaña*, skirting the eastern slopes of the Andes, consists of tropical forests traversed by great tributaries of the Amazon. The absence of rain on the coast strip of land between the mountains and the sea is caused by the action of the lofty uplands of the Andes on the trade-wind; the last particle of moisture is wrung out of the wind by the very low temperature, and deposited as snow, and the wind rushes down to the Pacific coast, cool and dry. From November to April there is usually constant dryness on the coast, from June to September the sky is obscured for weeks by mist, sometimes accompanied by drizzling rain. The maximum temperature is about 78° in summer and 60° in winter. Since 1570 there have been seventy destructive earthquakes recorded on the west coast, including those of 1868 and 1877.

The Peruvian Andes attain 22,000 feet. The mountain-system consists of three chains or *cordilleras*. Two of these chains, running parallel and near each other, are of identical origin. The western one is the maritime cordillera and comprises the volcanoes. The eastern cordillera is a magnificent and almost continuous range, in great part of Silurian formation, with clay-slates and eruptive granitic rocks. The western cordillera is cut through by several streams which flow into the Pacific, and the eastern cordillera by six tributaries of the Amazon, but the central chain is an unbroken water-parting, consisting mainly of crystalline and volcanic rocks. The valleys and plateaus between these ranges form the *Sierra* of Peru, and include every variety of climate and scenery. They may be divided into four sections, commencing from the north; in the third is Cuzco, the capital of the Incas, while the fourth section is the basin of Lake Titicaca, about 150 miles in length and breadth. The lake itself is 80 miles long, and 12,545 feet above the level of the sea. The Sierra of Peru is the original home of the potato. The animals which specially belong to the Peruvian Sierra are the domestic llamas and alpacas, and the wild vicuñas, the viscacha, the chinchilla, deer, dogs, and foxes; notable among birds are the condor and the flamingoes, geese and wading birds of Lake Titicaca.

The *Montaña* is the region of tropical forests within the basin of the river Amazon; the forests drained by the Marañon, Huallaga, and Ucayali forming the northern portion. The whole length of the Montaña, from the Marañon to the Bolivian frontier, is 800 miles. The subtropical portion, comprising the eastern slopes of the Andes, is the region of the cinchona-trees, and of the coca, and here coffee and cacao of the finest quality are cultivated. From the forest-covered plains come india-rubber, sarsaparilla, and a great variety of useful and ornamental timber. The *fauna* of the forests includes monkeys, bats, bears, pumas, jaguars, tapirs, wild cats, deer, and many rodents; with curassows, ibises, cranes, spoonbills, parrots, toucans, and many snakes. The chief crops of the fertile valleys on the coast of Peru are sugar, cotton, and grapes. Good wine and spirits are made; and before the disastrous Chilian war (1879) mulberries, silkworms, and cochineal were successfully cultivated. The exportation of guano from the Chincha Islands began in 1846 and ended in 1872, the supply being exhausted; and the nitrates of Tarapacá were seized and annexed by Chili. The staple exports of the Sierra of Peru are silver and wool, the great centre of mining industry being at Cerro Pasco. Copper is also exported; and there are rich gold washings. Petroleum is obtained in Piura and elsewhere. From the Montaña the exports are cinchona bark, coca, coffee, cacao, tobacco, india-rubber, and sarsaparilla, besides maize and wheat.

In the five years 1906–10 the exports varied from $53,757,000 to $64,000,000, and the imports from $43,565,000 to $55,148,000 (10 'soles' or dollars = £1), about one-half of the total trade being with Great Britain. The exports to Britain are chiefly copper and silver ore, wool, cotton, rubber, sugar, and guano; the imports from Britain being cotton and woollen manufactures, ironwork and machinery, and jute goods. In the five years to 1912 the revenue varied from $27,845,000 to $32,000,000, and the expenditure from $26,853,000 to $32,500,000. The system of railways consists of a dozen short lines in the coast-valleys, and of two long lines across the Andes. The first of these, from Callao and Lima to Oroya, &c., was begun in 1870, and tunnels the Andes at an altitude of 15,645 feet. The other great line across the Andes connects the port of Mollendo with Cuzco, Lake Titicaca, and Bolivia, passing by Arequipa. The summit is crossed at a height of 14,660 feet. There are over 1600 miles of railway. Great public works were mainly responsible for raising the debt from £4,400,000 (1868) to £49,000,000 (1872). The financial difficulties culminated with the disastrous war with Chili, when the nitrate of Tarapacá, the chief resource of Peru, passed into the hands of the enemy. The payment of interest ceased in 1876, having been regularly paid since 1849; in 1890, when the outstanding interest of the debt amounted to £23,000,000, the bondholders had the railways, mines of guano deposits, and state lands ceded to them for 66 years; and Chili made itself responsible for some part of the payment.

The bulk of the Peruvian population is composed of the aboriginal Inca Indians, whose language, called Quichua, is still spoken in the Sierra. The Incas had attained to a high state of civilisation before the arrival of the Spaniards: they cultivated many of the arts, and had some knowledge of astronomy. Three centuries of oppression under Spanish rule have deteriorated the character of the Inca Indian, but he is still industrious and honest. The wild Indians of the Montaña were never subjugated by the Spaniards. Spanish administration caused a rapid diminution of the population. The Indians of the Sierra were decimated, while those of the coast-valleys disappeared altogether. Negro slaves were then introduced, and kept in bondage until 1855, when slavery was abolished. From 1860 to 1872 as many as 58,646 Chinese coolies were imported. Lima (q.v.), the capital of Peru, is nearly in the centre of the coast region, and has a population of almost 150,000. Trujillo is the chief coast town to the north, and Arequipa to the south; there are many ports, including Callao and Mollendo. The Roman Catholic is the religion of the state, but practically (not legally) there is tolerance for dissent. Besides the university of Lima, there are lesser universities at Cuzco, Arequipa, and Trujillo, besides several state-supported high schools, and about 2000 primary schools with 150,000 enrolled pupils.

For four centuries before the Spanish Conquest under Pizarro (1532) the Incas swayed a mighty empire, under a highly civilised and centralised system of government. After the rapid conquest, there were many quarrels between the Spanish occupants and the mother-country; but the people were incessantly ground down in order to satisfy the continual demands of Spain for treasure. A great national rising in 1780 was crushed, but left the seeds of the desire for national independence, secured by the liberation wars of 1821–24. Subsequently Peru repeatedly had considerable spells of peace and prosperity. But the quarrel with Chili led to war in 1879, invasion and disastrous defeats ending in 1884 in the permanent cession of Tarapacá, the occupation (to be terminated after 10 years on a plebiscite to that effect) of Tacna and Arica, and other concessions favourable to Chili.

See works on exploration, antiquities, &c. by Markham (1862, 1880, 1910), Hutchinson (1873), Duffield (1877), Squier (1877), Enock (1907), Martin (1911), and others; on the conquest by Prescott (1847), Robertson, Helps, &c.; for the war of independence, works by Stevenson, the autobiography of Lord Dundonald; for the war with Chili, Markham (on the Peruvian side, 1883).

Peru, (1) a city of Illinois, at the head of navigation on the Illinois River, 100 miles by rail WSW. of Chicago. It contains zinc-works, a foundry, a plough-factory, and several ice-houses. Pop. 8000.—(2) Capital of Miami county, Indiana, on the Wabash River, and on the Wabash and Erie Canal, 75 miles by rail N. of Indianapolis. Its factories produce woollens, bagging, furniture, basket-ware, &c. Pop. 11,000.

Perugia (*Per-oo'ja*), a city of Italy, stands (1600 feet above sea-level) on the Tiber's right bank, 11 miles E. of the Lake of Perugia (anc. *Lacus Trasimenus*) and 127 miles by rail N. of Rome. It is surrounded with walls pierced by gates, one of them very ancient. The broad Corso unites two squares, in one of which stands the Gothic cathedral, dating from the end of the 15th century, and adorned with many paintings, carvings, &c. The church of St Dominic (1632) contains the tomb of Pope Benedict XI. by Giovanni Pisano, and stained windows (1402); the remarkable church of St Peter (11th c.) has granite pillars and pictures by Raphael, Perugino, Parmigiano. In the cathedral square stand also the Gothic municipal palace (1281); the great fountain, adorned with statues by Niccolo and Giovanni Pisano; the statue of Pope Julius III. (1555), described in Hawthorne's *Marble Faun;* and the old money-changers' hall (1453–57), decorated with some of Perugino's best works. In the vicinity of the city many Etruscan tombs were discovered in 1840; they contained cinerary urns, lamps, vases, bronze armour, ornaments, &c. The university (1307) has 30 teachers and 350 students, a botanical garden, an observatory, a library (1852) of 60,000 vols., &c. Silk and woollen goods, wax-candles, and liqueurs are manufactured. Pop. 66,000. Perugia (anc. *Perusia*) was one of the twelve Etrurian cities. It was captured by the Romans in 310 B.C. and in 40 B.C., and by Totila (549 A.D.). At different periods it was subjected to the popes, at other times it was in the power of native despots, and in 1860 it was made a part of the kingdom of Italy. In the 15th century it became the centre of the Umbrian school of painting.

Perugia, Lake of. See Trasimene Lake.

Pes'aro (anc. *Pisaurum*), a town of Italy, on the right bank of the Foglia, here crossed by a bridge of Trajan's age, 1 mile from the Adriatic and 37 miles NW. of Ancona by rail. Walled and defended by a citadel (1474) and a fort, it has two cathedrals. Pop. 27,000. Pesaro is associated with Tasso, and was Rossini's birthplace.

Pescadores Islands. See Formosa.

Peschiera (*Pes-kee-ay'ra*), a fortress of Italy, a member of the Quadrilateral, stands partly on an island in the Mincio and partly on the right bank of that river, at its outlet from the Lake of Garda, 14 miles by rail W. of Verona. Pop. 3000.

Peshaw'ar, or Peshawur, a town of India, 10½ miles from the entrance of the Khyber Pass, 190 E. by S. of Kabul, and 276 by rail NW. of Lahore. It is since 1903 the capital of the North-west Frontier Province (formerly in the Punjab). Although occupying a strategic position of the utmost importance, its fortifications are inconsiderable. Pop. about 100,000.

Pesth (*Pest*), or more correctly Budapest, because since 1873 it has been united with Buda (Ger. *Ofen*) into one municipality, is the capital of Hungary, and next after Vienna the second city of the Austro-Hungarian monarchy. It stands on the Danube, Buda on the right bank and Pesth on the left, 173 miles by rail SSE. of Vienna. The two towns are connected by many bridges, a chain bridge (designed by Clark Brothers of England in 1842–49), 1280 feet long, uniting the busiest quarters of the two; another chain bridge, built in 1903–5, a little lower; the Margaret and Franz-Joseph bridges; and railway bridges. Pesth is the growth mainly of the 19th century; it has many fine streets and squares, the magnificent quays (3 miles long) being the favourite promenades. The buildings include the Jewish synagogue; the parish church (1500) and the new Leopold basilica (1851–68); the national museum (1850), with valuable picture-galleries and a library of 400,000 volumes and 63,000 MSS.; the academy of sciences (1862); the university (1635), established first at Tyrnau, then at Buda in 1777, and lastly at Pesth in 1873, with 300 lecturers and about 7000 students, equipped with laboratories, &c., and a library of 300,000 volumes; the parliament house, the old town-house, the redoubt (1859–65), the custom-house (1870–74), barracks, the military academy (1872), the slaughter-house (1870–72), &c. Whilst Pesth stands on a plain, Buda straggles over steep hills. It is a much older town, its central features being the castle on the citadel (1749–71), with the chapel of St Sigismund, in which are preserved the regalia of Hungary and the hand of St Stephen; the church of the Ascension and that of St John (13th century); the palaces of the premier and Archduke Joseph; the monumental tomb of Gul Babas (1543–48), a Turkish saint; and the lunatic asylum (1860–68).

Both towns are exceptionally well provided with baths, which are supplied both by the Danube and by natural springs of mineral waters. Some of these last—Hunyadi Janos, Rakoczy, &c.—are exported. The artesian well (1868–79) in the public garden of Pesth yields, at a depth of 3182 feet, water of a temperature of 165° F. The water-works of Pesth were planned and built by the English engineer Lindley in 1868. There is in Pesth a polytechnic (in Buda, 1846–72), with faculties of chemistry, architecture, and engineering. There are two beautiful public gardens, one in Pesth, the other on Margaret Island in the Danube, just above the town. The squares and streets of both Pesth and Buda are adorned with many monuments, among them the Honved Memorial (1893). The manufacture of machinery and agricultural implements, wagons, ships, small-arms, spirits, tobacco, beer, gold and silver wares, cutlery, starch, glass, &c., the grinding of corn, washing of wool, and printing are all prosecuted on the large scale. But the commerce is even more important: immense quantities of corn are brought into the town, and exported further either as corn or flour; wool, wine and spirits, seeds, hemp, tobacco, plums, honey and wax, bacon, hides, feathers, timber, coal, and manufactured wares are the principal articles of the extensive trade. Vast numbers of swine are fattened and killed in huge yards just outside Pesth. Pop. of Budapest (1813) 36,153; (1857) 116,683; (1910) 880,371. The Romans had a military colony on the site of Buda. In the 13th c. there existed here a flourishing German town, Old Buda, destroyed by the Mongols in 1241; but it soon recovered, and Buda was regarded as the capital down to its capture by the Turks in 1527. From 1541 to 1686 the Turks held Buda, though it was often besieged. Pesth meanwhile was reduced to a heap of ruins.

Petcho'ra, a large river in the north of European Russia, rises on the western slope of the Urals, flows N. through the eastern parts of the governments of Vologda and Archangel, then SE. for 150 miles, and finally sweeping northward, and expanding into an isleted estuary 30 miles wide, falls into the Arctic Ocean, after a course of 975 miles. See a work by Seebohm (1880).

Peterborough, a city in the administrative county of the Soke of Peterborough (Northamptonshire), mainly on the left or north bank of the river Nen, at the edge of the fen-country, 76 miles N. of London and 42 NE. of Northampton. Here, at Medeshamstede, in 655, was founded a great Benedictine abbey, which, destroyed by the Danes in 870, was restored in 966, plundered by Hereward in 1069, and again burned down in 1116. Its noble church, the cathedral since 1541 of a new diocese carved out of that of Lincoln, was built between 1118 and 1528, and thus, whilst essentially Norman, offers every variety of architecture down to the Perpendicular. It is 471 feet long, by 202 across the transept, and 81 high. The Early English west front (*c.* 1200–22) consists of three mighty arches, and 'is perhaps,' says Freeman, 'the grandest conception for a single feature which mediæval architecture has produced, a Greek portico translated into Gothic language.' Noteworthy also are the flat painted wooden ceiling of the 12th century, the portrait of 'Old Scarlett' the sexton (1496–1594), the blue slab inscribed 'Queen Catharine, A.D. 1536,' and the grave for twenty-five years (1587–1612) of Mary Queen of Scots. In 1643 Cromwell and his troopers did hideous havoc to monuments, stained glass, and cloisters. In 1883 the fine central tower was condemned as unsafe; but it has been lovingly rebuilt, and in 1890 the cathedral was reopened after restoration, resumed in 1895. Two ancient gateways, the bishop's palace and the deanery (once the abbot's and prior's houses), and the chancel of a Becket chapel (now a museum) make up the remaining objects of interest. A training-college for schoolmasters (1864), a grammar-school, the town-hall (1671), the corn exchange (1848), a cattle-market of five acres (1867), and the bridge over the Nen (dating from 1140, but in its present form from only 1872) may be mentioned. Peterborough is an important railway centre, has manufactures of agricultural implements, and carries on a large trade in malt, coal, farm-produce, &c. Incorporated as a municipal borough in 1874, it has returned two members from 1547 till 1885, and since then one. Pop. (borough), 33,574; (Soke), 44,718. See works by Gunton (1686; new ed. 1825), Britton (1828), Paley (1849), Davys (3d ed. 1863), Sweeting (1869), and Poole (1881).

Peterborough, chief town of Peterborough county, Ontario, on the Otanabee River, 82 miles by rail NE. of Toronto. It exports lumber and agricultural products, and manufactures flour, woollens, farming implements, machinery, furniture, canoes, &c. Pop. 18,400.

Peterhead′, a seaport and municipal burgh of Buchan, Aberdeenshire, on a peninsula, 32 miles by road, but 44 by a branch-line (1862), NNE. of Aberdeen. Founded in 1593, it is somewhat irregular in plan, but clean and largely built of the celebrated 'Peterhead granite,' whose reddish variety is so much used for monumental purposes. The Keiths, Earls Marischal, were superiors of the place till the '15, when the Old Pretender landed here, after which their forfeited estates were purchased by the Edinburgh Merchant Maiden Hospital, to whose governors many improvements are owing. Of Marshal Keith a bronze statue was presented to the town in 1869 by King William of Prussia; and the market-cross, a granite Tuscan pillar (1833), bears the arms of the Earls Marischal. The public buildings include the town-hall (1788), with a spire 125 feet high; the parish church (1803), with one of 118 feet; the free library and museum (1891); the academy (1846); and convict-prison (1889). Industries are woollen manufacture, boat-building, and granite-polishing. Peterhead was made a head-port in 1838. From 1788 it gradually became the chief British seat of the seal and whale fisheries, until in 1852 it sent out 30 ships; but since then there has been a great decline. At present Peterhead is chiefly important for its great herring-fishery, which during the herring season brings some 5000 persons to the place. The south harbour was commenced in 1773, and the north harbour in 1818, a canal being formed between them in 1850; whilst a new harbour was formed and the south harbour deepened under Acts of 1873 and 1876. Their three basins, hewn out of the solid rock, together cover about 22 acres, and have cost £300,000; but all three are as nothing compared with the great harbour of refuge, commenced in 1886, and to be completed in 1921 (by convict labour), at a cost of £1,044,520. In the neighbourhood are the ruins of Inverugie, Ravenscraig, and Boddam castles, all strongholds of different branches of the Keiths; Buchan Ness, the most easterly point of Scotland, with a lighthouse (1827); and the Bullers of Buchan (q.v.). Since 1833 Peterhead has united with Elgin, &c. to return one member. Pop. (mun. and parl. burgh) 13,600. See works by W. Laing (1793), Arbuthnot (1815), and Peter Buchan (1819).

Peterhof (*Pay′ter-hof*), a palace of the emperor of Russia, on the S. shore of the Gulf of Finland, 18 miles W. of St Petersburg. Built by Peter the Great in 1711, it contains fine paintings, and is surrounded by beautiful parks. The town of Peterhof has 15,000 inhabitants.

Petersburg. See St Petersburg.

Petersburg, a city of Virginia, on the south bank of the Appomattox River, 23 miles by rail S. of Richmond. The falls above supply water-power for tobacco-factories, foundries, cotton, flour, and paper mills. In 1864 Grant, failing to take Richmond, besieged Petersburg, and was repulsed with heavy loss. Pop. 30,000.

Petersfield, a Hampshire market-town, 20 miles NNE. of Portsmouth by rail. Till 1833 it returned two members, and then till 1885 one. Pop. of parish, 4000.

Peterwardein (*Paytervar′dine*), one of the strongest fortresses in the Hungarian dominions, is situated in a marshy, unhealthy locality on the Danube's right bank, 44 miles by rail NW. of Belgrade, and is connected with Neusatz opposite by a bridge of boats. Pop. of town, 6000.

Petherton, South, a Somerset town, on the Parret, 4½ miles N. of Crewkerne. Pop. 2000.

Petra (the Greek equivalent of the Heb. Sela, 'Rock'), the ancient stronghold of the Nabatæans, was situated in the 'desert of Edom' in northern Arabia, near the points of intersection of great caravan-routes from Palmyra, Gaza, Egypt, and the Persian Gulf, four days' journey from the Mediterranean and five from the Red Sea. From it Arabia Petræa got its name.

Petropavlovsk′, (1) a town of Asiatic Russia, on the river Ishim, 175 miles WNW. of Omsk. Pop. 40,000.—(2) A small port on the east coast of Kamchatka, with an admirable harbour.

Petropolis, a town of Brazil, 25 miles N. of Rio. It was originally a colony of Germans (1845), and superseded Nictheroy as capital of the state of Rio de Janeiro in 1894–1903. Pop. 20,000, mainly Germans.

Petrovsk′, a town of Russia, 65 miles NW. of Saratov, on a tributary of the Don. Pop. 15,000.

Petrozavodsk′, a town of Russia, on the west shore of Lake Onega, 300 miles NE. of St Petersburg, has a cannon-foundry and small-arms factory. Pop. 14,000.

Pettigoe, a village of Donegal and Fermanagh, 23½ miles NW. of Enniskillen.

Petworth, a market-town of Sussex, on an eminence near the West Rother River, 14 miles NNE. of Chichester. Petworth House, the seat of Lord Leconfield, is an 18th-century mansion, with a fine park and many portraits and other relics of the Percies and Wyndhams. Pop. of parish, 3000. See F. H. Arnold's *Petworth* (1864).

Pev′ensey, a village of Sussex, on the English Channel, 12 miles by rail W. by S. of Hastings. The Romans built here a castle, whose walls enclose a Norman keep. The church is Early English. William the Conqueror landed on the shore of Pevensey Bay. Pop. of parish, 500. See Lower's *Chronicles of Pevensey* (3d ed. 1880).

Peveril Castle. See PEAK.

Pewsey, a small market-town of Wiltshire, in a fertile vale, 18 miles E. of Devizes and 7 SSW. of Marlborough. Pop. of parish, 2000.

Pézenas (*Payz-na′*), a town of France (dep. Hérault), on the left bank of the river Hérault, 32 miles by rail SW. of Montpellier. The vicinity produces excellent wine and brandy, and makes woollen and linen goods. Here Molière wrote *Les Précieuses Ridicules*. Pop. 6000.

Pfäfers (*P′fay′fers*), hot springs in the Swiss canton of St Gall, in the deep and gloomy gorge of the Tamina torrent, which joins the Rhine at Ragatz, 2½ miles to the north.

Pfalz, German for the Palatinate (q.v.).

Pfalzburg. See PHALSBOURG.

Pforzheim (*P′fortz′hime*), the chief manufacturing town of Baden, at the northern border of the Black Forest, 20 miles SE. of Carlsruhe by rail. It contains the remains of an ancient castle, from 1300 to 1565 the residence of the Margraves of Baden-Durlach, and was the birthplace of Reuchlin. The town is famous for the manufacture of gold and silver ornaments, in which 8000 people are employed, and has further chemical and iron works, machine-shops, tanneries, paper-mills, &c. Pop. 69,000.

Phalsbourg, or PFALZBURG, a town of Lorraine, stands on the north-west shoulder of the Vosges, 25 miles NW. of Strasburg. It was fortified by Vauban in 1680; invested, but not taken, by the Allies in 1814–15; and bombarded and taken by the Germans in 1870, after which they razed the fortifications. It was the birthplace of Erckmann, and is widely known through the Erckmann-Chatrian novels. Pop. 4000.

Phantassie, a Haddingtonshire seat, near East Linton, was the birthplace of Rennie.

Pharsa′lus, now FERSALA, a town of Thessaly, to the south of Larissa, on a branch of the Salambria, notable for Cæsar's great victory over Pompey, 9th August 48 B.C.

Pha′sis, a river in Colchis, now called Rion or Faz. It rises in the Caucasus, and flows west into the Euxine near the ancient city of Phasis.

Phigalia, an ancient town of SW. Arcadia. From its temple of Apollo, at Bassæ, 6 miles distant, a sculptured frieze was brought to the British Museum in 1812. Next to the Theseum at Athens it is the most perfect architectural ruin in all Greece. See Cockerell, *Temples of Ægina and Bassæ* (1860).

Philadelphia. See ALA-SHEHR.

Philadelphia, the chief city of Pennsylvania and the third city of the United States, is situated on the Delaware River, about 100 miles by ship-channel (*viâ* Delaware Bay and River) from the Atlantic Ocean, 90 by rail SW. of New York City and 136 NE. of Washington. It lies along the Delaware from the mouth of the Schuylkill River at League Island, northward, for about 15 miles, and has an average breadth of some 8 miles. Philadelphia is notably a 'city of homes' of the well-to-do middle class. The dominant architecture of the older sections is of the severely plain, substantial style (mainly in red brick) which characterised its Quaker founders, and is laid out with the regularity of a chessboard. A marked departure has, however, lately taken place in the style of both the public and the private buildings of Philadelphia, as shown in the city hall and public buildings (1871 *et seq.*), built, at a cost of $20,000,000, of white marble upon a granite base, in French Renaissance style, and covering an area of 486 by 470 feet. The height of the tower and dome is 537 ft. 4½ in.; or 573 ft. 4½ in. with the colossal figure of Penn (36 ft.), to surmount the whole, the structure being thus the second highest in the world. Other buildings are the Masonic Temple, of granite (cost $1,500,000); a United States government building of granite—containing the Post-office, court-rooms, &c.—(cost $8,000,000); a custom-house of marble, modelled after the Parthenon at Athens; a naval asylum; the United States Mint; the Academy of Fine Arts; the Academy of Natural Science (Gothic), with a scientific library and museum; the Academy of Music; and the buildings of the University of Pennsylvania.

Nearly every street of importance is traversed by electric tramways, on the overhead trolley system. There are numerous well-shaded commons in the older portion of the city. In the Fairmount Park, some 3000 acres in extent, and bisected by the Schuylkill River and its affluent the Wissahickon, was held in 1876 the Centennial Exhibition; and in its environs are the Zoological Garden, the Fairmount Water-works (supplying 100,000,000 gallons daily), the beautiful Horticultural Hall and Memorial Hall—remains of the Centennial Exhibition—the Laurel Hill Cemetery, &c. Among the statues are bronze equestrian figures of Generals Meade, McClellan, and Reynolds. The churches include the old Swedes' Church (1700), Christ Church (Episcopal, 1727–54), where Washington's pew is preserved, and a R. C. cathedral. Philadelphia is noted for its benevolent institutions: prominent are the Pennsylvania Hospital (1751); Episcopal, Presbyterian, and Methodist hospitals, and the St Joseph's and St Agnes' hospitals; the hospitals in connection with the university and the several medical schools, &c. Besides the Girard College, founded in 1831 by the miser-philanthropist Stephen Girard for poor male white orphans, the city contains the Drexel Industrial Institute (endowed with $2,000,000) and the Cahill R. C. High School; whilst in Philadelphia or its immediate environs are the Williamson Free School of Mechanical Trades (endowed with some $2,200,000), state institutions for the blind and deaf and dumb, the Franklin Institute (1824, for the mechanic arts), Spring Garden Institute (for drawing, painting, and mechanical handiwork), the Episcopal Academy (1785), several R. C. colleges and convents, and Episcopal, Lutheran, and R. C. theological seminaries. Crowning all these is the University of Pennsylvania, founded as an academy by the sons of William Penn, which became a college in 1755, and a university in 1779; now it has over 4000 students and 450 professors and instructors, and embraces faculties of arts, science, architecture, natural history, finance and economy, medicine, dentistry, veterinary medicine, law, and physical education. The Jefferson Medical College (1825), with nearly 600 students, is a famous medical school; others are the Hahnemann Medical College (1869), the Medico-Chirurgical College (1880), the Woman's Medical College (1850), and the Philadelphia Polyclinic and College. The capital employed in manufacturing is estimated at $477,000,000, the number of hands employed at 260,000, and the value of the annual products at $733,000,000. Among prominent industries are the manufacture of locomotives, carpets, woollens, and worsteds, upholstery, cottons, and iron and steel products (saws, principally made by one firm, employ 5000 workmen, and have an annual value of $2,500,000). There are sugar-refineries, oil-refineries, chemical works, and many breweries. The imports are of the annual value of about $78,000,000, and the exports about $80,000,000.

Founded in 1682, Philadelphia the year after was made the capital of Pennsylvania. It was the central point in the war of independence, and the city still preserves the Carpenters' Hall (1770), where the first congress met (1774), and the old State House (1735) or Independence Hall, where the Declaration of Independence was adopted in 1776. At Philadelphia the federal union was signed in 1778; and here, too, the constitution was framed in 1787. From 1790 to 1800 Philadelphia was the federal capital. Franklin, Paine, and Cobbett lived here; C. G. Leland was a native. Pop. (1700) 4500; (1800) 70,287; (1860) 568,034; (1880) 847,170; (1910) 1,549,008. See Scharf and Thompson's *History of Philadelphia* (3 vols. 1884); *Philadelphia and its Environs* (Lippincott, 1890); and works by W. P. Hazard (1879), T. Westcott (1877), F. Cook (1882), S. C. Woolsey (1888), and Agnes Repplier (1899).

Philæ (*Fye'lee;* Egyptian *Pālek*), a Nile island of Nubia, near Assouan and S. of Syene. It is a small granite rock, fringed with rich verdure, about 400 yards long and 150 broad, almost covered with ancient buildings of great architectural beauty. They include a hypæthral or roofless hall, commonly called 'Pharaoh's bed;' the great temple of Isis, to whom the island was sacred; and the propylon or gateway, 60 feet high and over 120 wide, which is the oldest part of the temple (about 361 B.C.). The deepening of the dam at Aswan submerged the ruins, and, it is said, preserved them from serious injury by encrusting salts.

Philiphaugh (*Philiphawhh'*), on Yarrow Water, 3 miles WSW. of Selkirk, the property from 1461 till 1889 of the line of the 'Outlaw Murray' of the ballad. Here, on 13th September 1645, Montrose was defeated by David Leslie, who butchered more than a hundred Irish prisoners.

Philippeville (*Philipveel'*), a seaport of Algeria, the harbour of Constantine, from which it lies 54 miles NNE. by rail. There is a magnificent harbour (1882) protected by two moles, one 4590 feet long, the other 1310. The town was built since 1838. Pop. 26,000.

Philippi (Gk. pron. *Fil'ipee*), a city of Macedonia, named after Philip II. of Macedon, who enlarged it because of the neighbouring goldmines. Two battles were fought in 42 B.C. between Antony and Octavianus on the one side and the republicans under Brutus and Cassius on the other, in the second of which the republic finally perished. The apostle Paul addressed an epistle to the church he had founded here.

Philippine Islands, a large insular group forming a northern section of the Eastern Archipelago, from which it is separated by the two profound abysses of the Sulu (Mindoro) and Celebes Seas, 2000 to 4000 fathoms deep. It is washed on the east side by the Pacific Ocean and on the northwest by the China Sea, lies in 4°—21° N. lat. and 117°—127° E. long., and comprises a vast aggregate of over 2000 islands of all sizes, ranging from mere rocks and reefs to Luzon and Mindanao, the former rather more, the latter somewhat less, than 40,000 sq. m. in area. The other chief members of the group, collectively called Visayas, are Mindoro, 9000 sq. m.; Palawan (Paragua), 5500; Samar, 5000; Panay, 4500; Negros, 4300; Leyte, 3000; Cebu and Bohol, both 1500; and Masbate, 1200. The total area is 116,000; the census of 1910 showed a population of 8,276,802. The archipelago is disposed nearly due north and south, and is essentially mountainous and volcanic. Two main ridges ramify through the group, and comprise several volcanoes; the highest peak being Apo in the SE. of Mindanao (10,400 feet). The underground forces are still active, and reveal themselves by tremendous eruptions, and especially by earthquakes, which are almost continuous. Manila was nearly destroyed by the earthquake of 1863. Cyclones, here called typhoons, range as far south as about 10° N. lat. Thanks to the general elevation of the land and the prevailing sea-breezes, the climate, although moist and hot, is less insalubrious than that of most tropical lands. The temperature varies from about 77° F. in December to 86° F. in May. The rainfall is 68 to 70 inches. The magnificent primeval forests contain dyewoods, hard-grained timbers, and medicinal and other useful plants. On the plantations are grown rice, maize, sugar-cane, cotton, coffee, and tobacco (second only to that of Cuba). The largest wild mammal is the buffalo, and next to it the gibbon; there are several other species of apes and lemurs, antelopes and deer. The carnivora are chiefly represented by several species of civet, the insectivora by the porcupine. The only dangerous animals are the crocodile, snakes, and some other reptiles. Birds are very numerous, of the gallinacean family especially. Insects are very various; and the fresh and marine waters abound in fishes, turtles, molluscs, and sponges. Of minerals the most widely diffused are coal and iron; copper also occurs, as well as gold, lead, sulphur, cinnabar, quicksilver, alum, besides jasper, marble, and fine building stones. The original inhabitants of the Philippines were undoubtedly the Negritos (*Atas, Itas*), now reduced to a few isolated groups numbering altogether less than 20,000. Half-caste Negrito communities are extremely numerous, the indigenous element having amalgamated with the intruding Indonesian and Malay peoples. The Indonesians (akin to the Polynesians) are mostly pagans, whereas nearly all the Malays are either Roman Catholics or Mohammedans. The Tagal and Visayan languages are the predominant types.

Discovered in 1521 by Magellan, who was killed here, the Philippines were officially annexed to Spain in 1569, and till 1898 remained an integral part of the Spanish dominion. A rebellion in 1896 went on till the Spanish-American war was begun in 1898. As a result of the war the islands were ceded to the United States (1898) on a payment of £4,000,000. Besides Manila (the capital; pop. 234,000), there are several other considerable towns—Bauang (39,000), Lipa (38,000), Argao (35,000), Laoag (34,000), Batangas (33,000), and Cárcar (32,000). The exports amount to £8,000,000 annually—chiefly of sugar, hemp, tobacco, and copra. There is a submarine cable to Hongkong. See works by Sir J. Bowring (1851), Foreman (1906), Robinson (N.Y. 1901), and Blair and Robertson (55 vols. 1903 *et seq.*).

Philippo'polis, capital of Eastern Roumelia or Southern Bulgaria, on the navigable Maritza, 110 miles by rail W. by N. of Adrianople. It manufactures silk, cotton, tobacco, leather, &c., and prepares and exports otto of roses. It is the seat of a Greek and a Bulgarian archbishop. Population, 48,000.

Philippsburg, a town of Baden, on the Rhine's right bank, 16 miles N. of Carlsruhe. Fortified until 1800, it was often besieged. Pop. 2500.

Philipstown, a market-town of King's County, 49 miles W. by S. of Dublin, took its name from Queen Mary's consort, Philip of Spain. Pop. 660.

Phillipsburg, a city of New Jersey, on the Delaware River (crossed by railroad bridges), opposite Easton, at the western terminus of the Morris Canal, and 73 miles W. of New York by rail. It contains a rolling-mill, foundries, boiler and locomotive works, &c. Pop. 14,000.

Phocæa, the most northerly of the Ionian cities in Asia Minor, stood on a peninsula between the gulfs of Elais and Smyrna.

Phocis, a province of ancient Greece, west of Bœotia, and N. of the Gulf of Corinth. With Phthiotis it forms a province of modern Greece.

Phœnicia (Gr. *Phœnike*) was a comparatively narrow strip of country lying to the north of Palestine, along the coast of the Mediterranean Sea, bounded by that sea westwards, and eastwards extending to the mountain-crests of Bargylus and Lebanon. The coast-line was about 230 miles in length, and the area of Phœnicia proper about 3000 sq. m. The tract included within these limits is one of a remarkably diversified character; lofty mountain, steep wooded hill, chalky slope, rich alluvial plain, and sandy shore succeeding each other. This was the home of a famous and enterprising Semitic people, the Phœnicians, who in 1600–1300 B.C. seem to have been dependent on Egypt. After this date the country rose to a high pitch of prosperity and influence, and its people became famous for their trading and nautical enterprise, for their great colonies, their glass manufactures, purple dye, and metal utensils. Perhaps their greatest gift to civilisation was the alphabet, from which practically all civilised systems of writing and printing are derived; possibly they developed it out of one of the Egyptian hieroglyphic systems. Sidon and Aradus were amongst the most ancient cities; Tyre the greatest and most populous. Carthage was the greatest foreign colony, surpassing the mother-country in power; but there were Phœnician settlements in states in Asia Minor, the Greek islands, Cyprus, Crete, Sicily, the Balearic islands, and southern Spain (Carthagena, Tartessus, &c.). Phœnicians traded for tin and copper with Cornwall and the Scilly islands, and with the Baltic for amber; and seem to have been a means of exchanging the produce of Greece and the extreme west with those of Babylon, Persia, India, and East Africa. Hiram of Tyre cherished friendly relations with David and Solomon. Like Palestine, Phœnicia had to bow the neck to the Assyrian yoke (880–630 B.C.). Egypt and Babylon then quarrelled over Phœnicia, which next fell a prey to Persia (527–333), and, after the famous seven months' siege of Tyre to 332, to Alexander the Great and his successors. See works by Canon G. Rawlinson (1889).

Phœnix, since 1891 the capital of Arizona, in the Salt River valley, 35 miles N. by a branch-line from the Southern Pacific railway, and 890 miles SE. of San Francisco. Pop. 11,000.

Phœnix Park. See DUBLIN.

Phœnixville, a town of Pennsylvania, on the Schuylkill River, 28 miles NW. of Philadelphia. Here are the extensive works of the Phœnix Iron Company and the Phœnix Bridge Company. Other manufactures are cotton goods, stockings, shirts, needles, pottery, &c. Pop. 11,000.

Phrygia (*Fridj'ia*), a country in Asia Minor, which at the time of the Persian invasion comprised the districts of Lesser and Greater Phrygia—the former stretching along the shores of the Propontis and the Hellespont to Troas (afterwards part of Mysia), the latter occupying the centre of Asia Minor.

Phthiotis, the south-east corner of Thessaly, the home of Achilles.

Piacenza (*P'yachentz'a*), a city of northern Italy, on the right bank of the Po, a little below its confluence with the Trebbia, 43 miles by rail SE. of Milan, and 35 NW. of Parma. It is defended with bastioned walls and an outer ring of forts. The cathedral, in the Lombard-Romanesque style (1122–1233), has an immense crypt, a campanile 223 feet high, and paintings by L. Carracci, Guercino, &c. The church of Sant' Antonino, the original cathedral, was founded in 324, but has been several times rebuilt. The church of Santa Maria della Campagna is adorned with fine frescoes by Pordenone; and it was for San Sisto that Raphael painted the celebrated Sistine Madonna, sold in 1754 by the monks to Frederick Augustus of Saxony. Among the other buildings are the Palazzo Farnese (1558), once a sumptuous edifice, but since 1800 in use as barracks; the communal palace (1281); the palace of justice; and 2 miles E. the theological seminary founded by Cardinal Alberoni. The municipal library contains 150,000 volumes. The principal square is adorned with colossal bronze equestrian statues of Alessandro and Ranuccio Farnese. Manufactures of silks, cottons, pottery, hats, &c. are carried on. Founded as Placentia by the Romans in 219 B.C., Piacenza was captured by the Gauls in 200 and by Totila in 546, was the scene of two church councils in 1095 and 1132, was sacked by Sforza in 1447, and finally was united with Parma (q.v.). Pop. 38,500.

Piana Dei Greci (*Piah'na Day-ee Greh'chee*), a town of Sicily, 10 miles SW. of Palermo. It was the chief Albanian colony in Sicily in the 15th century. Pop. 10,000.

Piatigorsk, a town in Russian Caucasia, at the southern foot of Mount Beshtau (4587 feet), facing Mount Elburz, and 124 miles by rail NW. of Vladikavkaz, with warm sulphur-springs (83·7° to 117·5° F.). Pop. 47,000.

Piatra, a town of Moldavia, 60 miles W. by S. of Jassy, on the Bistritza, at the foot of the Carpathians, has a trade in timber. Pop. 20,000.

Piauhy, a maritime province of northern Brazil, of which Paranahyba (q.v.) is the principal town.

Piazza (*Peeatz'a*), an episcopal town of Sicily, 16 miles SE. of Caltanisetta. Pop. 30,000.

Pic'ardy (*Picardie*), an ancient province in the north of France, bounded W. by the English Channel, and now forming the dep. of Somme, with portions of Aisne and Pas-de-Calais.

Pic du Midi (*Peak dü Meedee'*), a summit of the Pyrenees, 9466 feet high, in the south-east corner of the French dep. of Basses-Pyrénées.

Pichincha (*Pitcheen'tcha*; 'boiling mountain'), the most populous province of Ecuador, embraces the Quito plateau and its slopes. Area, 8300 sq. m.; pop. 205,000. The active volcano of Pichincha, 8 miles NW. of Quito, the chief town, has five peaks, two of which (15,918 feet) Mr Whymper ascended in 1880. The enormous crater, nearly a mile across at the top, and 1500 feet at the bottom (which is 2500 feet below), is said to be the deepest in the world.

Pickering, in the North Riding, 32 miles NNE. of York, has a ruined castle and a fine parish church. Pop. 3700.

Picton, capital of Prince Edward county in Ontario, 38 miles SW. of Kingston, has canning industries. Pop. 3600.

Pictou (*Pictoo'*), a port on the N. coast of Nova Scotia, on a large and sheltered harbour, 85 miles NNE. of Halifax. Coal, mined near by, is exported. Sir J. W. Dawson was a native. Pop. 3200.

Picts' Work Ditch. See Catrail.

Piedmont, or Piemont (*Peed'mont*; Fr. pron. *Pyay-mon*^{g}*'*; *pied*, 'foot,' *mont*, 'mountain'), a former Italian principality, which now forms the north-west part of the kingdom of Italy, is by the Alps separated from Switzerland on the N. and from France on the W. It embraces the provinces of Alessandria, Cuneo, Novara, and Turin. Area, 11,389 sq. m.; pop. 3,424,500. See a work by S. Butler (new ed. 1913).

Pieria (*Pye-er'i-a*), a coast district of ancient Macedon, at the base of the Olympus, the fabled birthplace of the Muses and of Orpheus.

Pierre (*Pee-err'*), the capital of South Dakota, is a small town in the centre of the state, on the Missouri River, at the mouth of Bad River, 781 miles by rail WNW. of Chicago. Pop. 3700.

Piershill. See Jock's Lodge.

Pietermaritzburg (*Peetermar'itzboorg*), or Maritzburg, capital of Natal (q.v.), occupies a fine situation on the flat ground by the river Umsundusi, 54 miles N. of Durban by rail. Close by are the Town Hill and other heights. It takes its name from its founders, the Boer leaders Pieter Retief and Gert Maritz. Pop. 30,000 (14,000 Europeans).

Pike's Peak, a peak (14,134 feet) of the Rocky Mountains, in Colorado, 65 miles S. of Denver, discovered by Captain Pike, U.S.A., in 1806. It is situated in 38° 50′ N. lat. and 105° 2′ W. long. On its summit is one of the highest meteorological stations in the world. There is a railway to the top, 9 miles long (4½ miles of curves), with a maximum gradient of 1 in 4.

Pilatus, Mount (Swiss pron. *Pee-lah'toos*; Lat. *Mons Pileatus*, 'the hooded peak,' from its top being frequently enveloped in cloud; the Pilate legends have grown out of the altered name), an isolated mountain at the W. end of the Lake of Lucerne, rising opposite the Rigi. The lower half is clothed with wood and meadow; the upper portion is a mass of bare and jagged peaks, in the Tomlishorn attaining 6998 feet. Below the summit lies Lake Pilatus. On two of the peaks there are hotels; and since 1889 there has been a tooth-and-rack railway from Alpnach to the top, whence there is a splendid view of the Bernese Alps.

Pilcomayo (*Pil-co-mye'o*), a river of South America, which takes its rise in two branches in the Bolivian Andes, in the dep. of Potosí, flows in a very winding course south-east through the Gran Chaco, separating Paraguay and Argentina, and finally joins the Rio Paraguay a little below Asuncion. Its length is 1700 miles. The volume of water brought down is comparatively insignificant, much being spent in lagunes on its way. It is rendered like brine by the great salt lakes of the Chaco. There have been many attempts, all fruitless, made to open the river route between Argentina and Bolivia.

Pilibhit, a town in the United Provinces, 30 miles NE. of Bareilly by rail. Pop. 33,799.

Pillar Mountain, in Ennerdale, Cumberland, 2927 feet high.

Pillau (*Pil-low'*), a Prussian fortified town, on a spit of land at the entrance of the Frisches Haff, 30 miles W. of Königsberg by rail. Pop. 10,000.

Pillnitz, the ordinary summer residence of the Saxon royal family, in a beautiful situation on the Elbe, 5 miles SE. of Dresden.

Pilsen, the second town of Bohemia, in a fertile and beautiful valley, 67 miles by rail SW. of Prague. There are numerous active industries, producing building materials, machinery, metalwork, porcelain, spirits, liqueurs, leather, &c. In the neighbourhood are mines of iron, alum, vitriol, coal, and sulphuric acid; and the town gives its name to the best Bohemian beer. Pilsen was stormed by Ziska in the Hussite War and by Count Mansfeld in the Thirty Years' War (1618); it was Wallenstein's headquarters in 1633–34. Pop. 81,000.

Pim'lico, a district of Westminster, south of the Green Park.

Pind Dadan Khan, a town in the Punjab, 1 mile N. of the Jhelum and 110 miles NW. of Lahore. The people (17,724) make brass and copper utensils, pottery, and woollens.

Pindus. See Greece, p. 311.

Pine Bluff, capital of Jefferson county, Arkansas, on a high bluff on the S. bank of the Arkansas River, 120 miles from its mouth, and 43 by rail SSE. of Little Rock. It ships cotton, and manufactures iron, cotton-seed oil, flour, bricks, &c. Pop. 15,000.

Pinero'lo, or Pignerol, a cathedral city of north Italy, at the east foot of the Alps, 23 miles SW. of Turin. From 1042 a town of Savoy, it was until 1713 strongly fortified, having a citadel, in which the Man with the Iron Mask, Lauzun, and Fouquet were imprisoned. This fortress was in French hands, 1536–74, 1630–96, 1704–6, and 1801–14. Cloth, paper, leather, cotton, and silk are manufactured. Pop. 20,000.

Pinkie, the scene of a battle fought on 10th September 1547 near Musselburgh in Midlothian, in which 14,000 English under the Protector Somerset routed twice that number of Scots.

Pinner, a Middlesex ecclesiastical parish, 2½ miles NW. of Harrow, with the Commercial Travellers' School (1855). Pop. 7000.

Pinos (*Pee'nōs*), Isla de, an island in the West Indies, south of Cuba, of which it is the largest dependency. Discovered by Columbus in 1494, it is part low and swampy, and part hilly (1500 feet). Area, 1200 sq. m.

Pinsk, a town of West Russia, 98 miles by rail E. of Brest-Litovsk. Pop. 37,000.

Piombino (*P'yombee'no*), a former principality of Italy, lies opposite the island of Elba. Its extent was 139 sq. m.; and its pop., previous to its incorporation with Italy in 1860, about 25,000. The town of Piombino, on a promontory 50 miles S. of Leghorn, is connected by a branch-line (1892) with Campiglia, and is the seat of large iron-rolling mills. Pop. 10,000.

Piotrkow (Ger. *Petrikau*), a town of Russian Poland, 87 miles by rail SW. of Warsaw. Pop. 38,000.—The *government* has an area of 4730 sq. m. and a population of 2,000,000, and is a centre of the cotton and woollen industries.

Piqua, a city of Ohio, on the Miami River (here crossed by two bridges), 28 miles by rail N. of Dayton. It has manufactures of flour, furniture, mattresses, &c. Pop. 13,500.

Piræus (*Pye-ree'us;* Gr. *Peiraieus*), called also Port Draco, the harbour of Athens since the days of Pericles; this ruler and Cimon before him built the three 'long walls' that connected it with the capital (5 miles to the NE.), and so ensured a safe passage from one to the other. Its fortifications were destroyed by Sulla in 86 B.C., and from that time the town sank into decay. The modern Piræus, which has grown up since 1834, is a mean-looking place, with a naval and military school, arsenal depôts, and some manufactures. A railway connects it with Athens and with the north of Greece. The imports include coal, railway plant, petroleum, sheep, and cattle; the exports, tabacco, valonia, hides, bones, horns, cheese, wool, &c. Pop. 73,600.

Pirano (*Pee-rah'no*), a seaport of Austria, on a promontory on the S. side of the Gulf of Trieste, and 12 miles SW. of Trieste city. Pop. 15,000.

Pirmasens (*Peer-mah'zens*), a town of the Bavarian Palatinate, 34 miles by rail W. of Landau. It manufactures shoes and musical instruments. Close by the Prussians defeated the French in 1793. Pop. 38,500.

Pirna, a Saxon town, stands on the Elbe's left bank, 11 miles by rail SE. of Dresden. Here are a fine 16th-century church; a castle (1573), used as a lunatic asylum since 1811; manufactures of glass, chemicals, tobacco, stoves, &c.; and great sandstone-quarries. Pop. 20,000.

Pirot', a town of Servia, on the Nischava, 30 miles ESE. of Nisch. Pop. 11,000.

Pisa (*Pee-za*), one of the oldest cities of Italy, the rival of Venice and Genoa, is situated on the Arno, 6 miles from its mouth, by rail 49 miles W. of Florence, and 13 NE. of Leghorn. It was formerly a great port, but as the river has silted up and long ceased to be navigable, its commerce has been transferred to Leghorn. The cathedral (1063–1118), with a noble dome, fine paintings by Cimabue, Andrea del Sarto, &c., has the form of a Latin cross, 311 feet long by 252 wide; the nave is 109 feet high. Externally it has a magnificent façade of four superimposed rows of pilasters and arches, and fine bronze doors by Giovanni da Bologna and others. Near the cathedral stands the round marble campanile, the 'Leaning Tower of Pisa' (1174–*c.* 1350), a magnificent specimen of the southern Romanesque architecture, which is 183 feet high, and deviates 16½ feet from the perpendicular—a peculiarity not due to original design. The marble Baptistery, or Church of St John (1152–1278), opposite the cathedral, is circular, and supports a dome, crowned with a cupola. The interior, noted for its wonderful echo, contains the grand and elaborate pulpit of Niccola Pisano (1260) and a large marble font. The beginning of the Campo Santo, the famous burial-place, was several loads of earth brought from Jerusalem; in 1278–83 it was surrounded by cloisters by Giovanni Pisano, whose walls were adorned with fresco-paintings by Orcagna and others. The university (1338) has a natural history museum, a botanical garden, a library (1742) of 200,000 volumes, and about a thousand students. Amongst natives may be named the popes Eugenius III. and Nicholas V., the Visconti, Giovanni (but not Niccola) Pisano, and Galileo. The industrial activity is now confined to cottons, silks, ribbons, and the working of coral and alabaster. Dromedaries are bred at a royal farm near. Pop. 65,200.

Pisagua (*Pee-zah'gwa*), a small port of the now Chilian province of Tarapacá, 40 miles N. of Iquique by rail; pop. 6000. It was bombarded during the Chilian civil war in 1891.

Piscat'aqua, a river which is part of the boundary between Maine and New Hampshire, and forms the harbour of Portsmouth.

Pisek', a walled town of Bohemia, on an affluent of the Moldau, 84 miles by rail S. by W. of Prague. It manufactures iron, brass, paper, boots, hats, &c. Pop. 15,000.

Pisgah, the mountain-range to the east of the Lower Jordan, also called Abarim, one of whose summits is Mount Nebo (2644 feet).

Pishín, a district of British Baluchistan, just north of Quetta, which has been governed by a British political agent since 1878. Area, 3600 sq. m.; elevation, 5000 feet; pop. 60,000. A branch of the Indus line traverses it.

Pisidia, an ancient southern division of Asia Minor, was separated from the sea by the narrow strip of Pamphylia.

Pistoia (*Pis-to'ya;* anc. *Pistoria*), a walled town of Italy, stands 21 miles by rail NW. of Florence, on a spur of the Apennines. The cathedral (12th and 13th centuries) contains a magnificent altar of silver (1286–1407); the church of St Bartholomew, a fine white marble pulpit by Guido of Como (1250); St Andrea's, Giovanni Pisano's pulpit (1301); and St John's, a font by Giovanni Pisano. The principal manufactures are iron and steel wares, and firearms—the word 'pistol' in all probability takes its name through *pistolese*, 'a dagger,' from Pistoia (Pistola). Pop. 30,000. Here Catiline was defeated in 62 B.C.

Pitcairn Island, a solitary island in the Pacific Ocean, between Australia and South America, in 25° 3′ S. lat. and 130° 8′ W. long., measures 2½ miles by 1 mile. When discovered by Carteret in 1767 it was uninhabited. In 1790 it was taken possession of by nine of the mutineers of H.M.S. *Bounty*, with six Tahitian men and a dozen women. Four years later the Tahitian men one night murdered all the Englishmen, except one, who afterwards assumed the name of John Adams. Thereupon the women, in revenge, murdered all the Tahitian men. According to another account, the white men and the Tahitians murdered each other at intervals. Certain it is that at the end of ten years John Adams was left alone, with eight or nine women and several children; and from them the present inhabitants (about 200) are descended. Adams, changed by these tragic adventures, set about the Christian education of his companions. The little colony was discovered in

1808 by an American sealing ship; the first British vessel to visit it arrived in 1814. The islanders in 1831 had increased to 87, so at their own request they were removed to Tahiti by the British government. But, disgusted by their Tahitian relatives, most of them came back to Pitcairn Island after about nine months. The island was annexed to Britain in 1839. Nearly 200 of the islanders were transferred to Norfolk Island in 1856, but a number of them again returned. Pitcairn Island enjoys a lovely climate; its mountainous surface reaches 1008 feet in Outlook Ridge; the soil is fertile, and produces yams, taro, maize, pumpkins, sweet potatoes, bananas, &c. The people are degenerating, from intermarriage and their being able to live without exertion. See works by Sir J. Barrow (1831), Lady Belcher (1870), and T. B. Murray (1854; new ed. 1885).

Pitcaithly, or PITKEATHLEY, mineral springs in Perthshire, 4½ miles S. of Perth.

Pitch Lake. See TRINIDAD.

Pitcur, Perthshire, 3 miles SE. of Coupar-Angus, has a large weem and a ruined castle.

Pitlochry, a Perthshire village, on the Tummel's left bank, 13 miles NNW. of Dunkeld. It is a great health and summer resort, and has a tweed factory. Pop. 1700.

Pitsligo, NEW, a town of Aberdeenshire, 11 miles SW. of Fraserburgh. Pop. 2000.

Pittenweem, a seaport of Fife, a royal (since 1542) and parliamentary burgh (St Andrews group), 3½ miles NE. of Elie by rail, with fisheries and a ruined 12-century priory. Pop. 2000.

Pittsburgh (*Pitts'burg*), the second city of Pennsylvania, is built on a narrow strip of land where the Allegheny and Monongahela rivers meet to form the Ohio: it extends 7 or 8 miles up the rivers, and 2 or 3 down the Ohio. By rail it is 444 miles from New York, 354 from Philadelphia, and 468 from Chicago. Allegheny City (q.v.), north of the Allegheny River, was annexed in 1906. The business portion of Pittsburgh is on a plain, less than a mile in width, while the hills are covered with handsome residences. In this region, where the prevailing soft shales and sandstones have been worn away by the rivers to a depth of 500 or 600 feet, the horizontal layers of coal are exposed; the great Pittsburgh coal layer, 8 feet thick, like a broad black band extends around the city 300 feet above the river. The court-house, costing $2,500,000, is of Quincy granite, and is connected with the jail by a 'bridge of sighs.' The government building cost $1,500,000, and there are besides a city hall, the Exposition Building, a large R. C. cathedral, and Trinity Church (Episcopal). Pittsburgh is the seat of a university and a Catholic college; its Carnegie free library was built, and the Carnegie Institute built and endowed, in 1890; the Phipps Conservatory in 1893. The different parts of the city are connected by several lines of electric cars.

Pittsburgh is now one of the most important industrial cities in the United States. The district, which practically extends over 25 miles up the Allegheny and Monongahela rivers and 10 miles down the Ohio (including the allied borough of McKeesport and about thirty smaller boroughs), is the great centre of the steel, iron, and glass industries of the United States. Its coalfields are very rich, and it is an extensive shipping-point for bituminous coal. Including the great Carnegie steel-works at Homestead, and the Westinghouse works, the district contains nearly 3500 manufactories, with an estimated capital of over $1,800,000,000, and employing over 240,000 people. Its manufactures include everything that can be made of iron, from a 58-ton gun to nails and tacks; steel in its various applications; all descriptions of glass and glassware; silver and nickel-plated ware; Japan and Britannia ware; pressed tin, brass, copper, bronzes; earthenware, crucibles, fire-pots, bricks; furniture, wagons and carriages; brushes, bellows, mechanical supplies of all kinds; natural-gas fittings, and tools for oil and gas wells. After 1883 natural gas was largely used for domestic and manufacturing purposes; but of late the supply is less abundant, and the manufactories have returned to the use of coal. Over $15,000,000 have been spent in dams and locks on the Allegheny, Monongahela, and Ohio, to give slack-water navigation, and an ultimate expenditure of $50,000,000 is contemplated. The traffic on these rivers is enormous, chiefly coal and iron manufactures. Much lumber-rafting is done on the Allegheny. The assessed value of Pittsburgh in 1903 was $375,163,000, and the revenue for general purposes was just over $7,094,200. In 1754 a few English traders built a stockade here, but were driven away by the French. The latter replaced the stockade by a fort, which, in honour of the governor of Canada, they called Duquesne. In 1758 it was taken by the English, who next year commenced a large and strong fortification, which, in honour of the elder Pitt, then prime-minister, they called Fort Pitt. The settlement became a borough in 1804, and in 1816 was incorporated as the city of Pittsburgh. Pop. (1810) 4768; (1840) 21,115; (1870) 86,076 (with Birmingham, included soon after, 121,799); (1880) 156,389; (1900) 321,616; (1910) 533,905.

Pittsfield, capital of Berkshire county, Massachusetts, 151 miles by rail W. of Boston. Beautifully situated on a plateau where six lakes round the city give rise to the Housatonic River, it has a marble court-house, a handsome athenæum, and a fine park. Cotton and woollen goods, silk, boots and shoes, and tacks are manufactured. Pop. 32,000.

Pittston, a mining-town of Pennsylvania, on the Susquehanna River, 9 miles by rail NE. of Wilkesbarre. Besides a railway bridge, there are two other bridges connecting it with West Pittston. It has foundries, knitting-mills, and a silk-factory. Pop. 16,300.

Piuro (*P'yoo'ro*), near the Val d'Aosta, once a rich city full of palaces, was crushed with all its wealth and thousands of people by the fall in 1618 of an overhanging mountain. It now is a chaos of wooded knolls and moss-grown rocks.

Pladda, an islet with a lighthouse off the SE. extremity of Arran.

Plainfield, a city of New Jersey, on Green Brook, 24 miles by rail WSW. of New York. Clothing, hats, and machinery are manufactured. Pop. 20,500.

Plaistow, a district in the county borough of West Ham.

Plasencia, a decayed town of Spain, in Estremadura, 130 miles W. by S. of Madrid, is surrounded with double walls (1197), and has a fine Gothic cathedral (1498). Pop. 10,000. The monastery of San Yuste, to which Charles V. retired, lies 24 miles E.

Plassey (Bengali *Palási*), a battlefield, 96 miles N. of Calcutta, on the Bhágirathi River, which has eaten away the scene of the struggle. Here Clive defeated Suraj ud Dowlah, subahdar of Bengal, 23d June 1757, a victory which laid the foundation of British supremacy in India.

Platæa (Gr. *Plataiai*), a city in the western part of Bœotia, on the borders of Attica, and at the foot of Mount Cithæron, 6 miles from Thebes. In 479 B.C. it witnessed the glorious victory won by the Lacedæmonian Greeks, under Pausanias and Aristides, over the Persians; in 429–27 it was besieged by a Theban-Lacedæmonian force, and razed to the ground.

Platte, or NEBRASKA, an affluent of the Missouri, formed by the junction of the North and South Forks, which rise among the Rocky Mountains, in Colorado, and flow 800 and 550 miles. It winds 450 miles eastward, in a wide shallow stream, over the treeless plains of Nebraska.

Platten-See. See BALATON.

Plattsburg, capital of Clinton county, New York, on Lake Champlain, at the mouth of the river Saranac, 73 miles by rail S. of Montreal. It has planing-mills, machine-shops, and manufactures of iron, wagons, and sewing-machines. In Plattsburg Bay, on September 11, 1814, a British flotilla was defeated. Pop. 11,000.

Plattsmouth, capital of Cass county, Nebraska, on the Missouri, below the mouth of the Platte, and 21 miles by rail S. of Omaha. It manufactures flour, engines, organs, &c. Pop. 4000.

Plauen (*Plow'en*), a town of Saxony, on the Elster, 78 miles S. of Leipzig by rail. It manufactures cotton goods, muslin, cambric, jaconet, embroidered fabrics, cigars, paper, and machinery. Pop. 121,000.

Playford, a Suffolk parish, 4 miles ENE. of Ipswich. Clarkson lived and died here.

Plessis-les-Tours. See TOURS.

Plevna, a town of Bulgaria, 19 miles S. of the Danube, and 85 NE. of Sophia; pop. 23,000. Here in December 1877 Osman Pasha, the Turkish general, after a three months' defence, was forced to surrender to the Russians.

Plinlimmon, a large mountain-mass (2469 feet) of Wales with three summits, on the boundary between Montgomery and Cardigan, 10 miles W. of Llanidloes. The name is said to be a corruption of a Celtic word signifying Five Rivers, the Severn, Wye, and three other rivers rising here.

Plock (Ger. *Plozk*), an ancient town of Russian Poland, on the Vistula, 60 miles NW. of Warsaw, with an 11th-century cathedral. Pop. 31,000.

Plojeshti, or PLOESCI, a town of Roumania, 37 miles by rail N. of Bucharest, with petroleum-refineries. Pop. 50,000.

Plombières (*Plomb-yehr'*), a spa in the French dep. of Vosges, 14 miles S. of Épinal, was brought into fashion by Napoleon III., though its waters were known to the Romans. There are nearly thirty springs of from 66° to 150° F.; they are helpful against skin diseases, gout, rheumatism, dyspepsia, female complaints, &c. A handsome casino was opened in 1876. Pop. 2000.

Plumstead. See ERITH.

Plus'carden, a ruined Cistercian priory (1230), partly restored, 6 miles SW. of Elgin.

Plymouth (*Plim'muth*), one of the most famous of English seaports, an ancient parliamentary, municipal, and county borough, lies in the extreme SW. corner of Devonshire, 226 miles by rail (216 by road) WSW. of London, 128 SW. of Bristol, and 53 SW. of Exeter. It occupies the northern shore of Plymouth Sound, immediately at the mouth of the Plym. The remaining space between it and the Hamoaze, the estuary of the Tamar, is occupied by the much smaller town of Stonehouse (see DEVONPORT), while still farther west, along the Hamoaze itself, stretches the third of the 'Three Towns,' Devonport (q.v.), now all united by continuous lines of houses. The chief government establishments are at Devonport—the dockyard, gun-wharf, steam-factory, and principal barracks; while Stonehouse has the victualling yard, marine barracks, and naval hospital. Plymouth is the chief seat of commerce, trade, and manufacture. The site is a very fine one. Between the two natural inlet harbours of Sutton Pool and Mill Bay stretches the bold rocky ridge of the Plymouth Hoe, its eastern end occupied by a citadel built by Charles II. Northward the ground rises in a series of long hills, along which the town stretches until it passes into a suburban hill of singular attractiveness. From the Hoe there are magnificent views both seaward and landward. Here, according to tradition, the captains of the fleet assembled to meet the Armada whiled away the time with a game of bowls, which was not interrupted by the news of the enemy's approach; and here stand a tercentenary memorial to the Armada heroes (1890), and a statue (1884) of Sir Francis Drake (one of Boehm's finest works). The upper portion of the lighthouse erected by Smeaton on the Eddystone (q.v.) was also rebuilt here in 1882–84. Old Plymouth is chiefly clustered round the shores of Sutton Pool—a dingy unattractive set of narrow streets; but of recent years miles of excellent thoroughfares and many handsome buildings have been erected, chief among them a noble Gothic guildhall, opened in 1874 by the Prince of Wales, Lord High Steward of the borough. The 15th-century church of St Andrew is a fine Perpendicular edifice; Charles Church (1646–58) is a singularly good example of post-Reformation Gothic; the Roman Catholic cathedral is an effective Early English edifice (1858). The Cottonian collection of sketches by the leading continental masters is at the Proprietary Library; there is a good local museum at the Athenæum; the South Devon Hospital was opened in 1884 at a cost of £40,000; and the Marine Biological Laboratory in 1888. In Mill Bay are the Great Western Docks, which are capable of taking the largest merchant-vessels. Sutton Pool, the ancient tidal harbour of Plymouth, in addition to a large general trade, is the seat of important fisheries. Manufactures, mainly chemical, are carried on—at Cattedown chiefly, but also at Mill Bay. There is a large foreign, and a very extensive coasting trade, and the port is used by many lines of great passenger-steamers.

Though only a fishing-village at the Conquest, under the name of Sutton, Plymouth has for centuries played a leading part in the national life. It was the favourite port of the Black Prince; the chief Elizabethan rendezvous of Drake, Hawkins, Grenville, and Raleigh; the final port of departure of the *Mayflower* with the Pilgrim Fathers. In the civil wars it sided with the parliament, and it was the first town to declare for William of Orange. In the great French war it rivalled Portsmouth in naval activities. Among its natives are Sir John Hawkins, Sir Richard Hawkins, Joseph Glanvill, R. S. Hawker, Mortimer Collins, with Northcote, Haydon, S. Prout, Sir C. Eastlake, P.R.A., and S. Hart, the artists. Plymouth was first incorporated by Henry VI. in 1439, and has since always returned two members to parliament. Pop. (1801) 43,194; (1881) 76,080; (1911) 112,030.

Plymouth Sound is a deep inlet, 2½ to 3 miles wide, and 3 deep, into which the river Tamar falls from the west, and the river Plym from the east. It is sheltered by a great breakwater, constructed in 1812–41 at a cost of £1,300,000—an insulated mole of stones, a mile in length, stretching across the middle of the Sound, 2 miles from the Hoe. About half a mile from the Hoe is a little islet, Drake's Island, which is strongly fortified. A formidable stone fort has also been built on an artificial island immediately within the breakwater; while on either shore there are extensive forts and batteries. The estuary of the Plym is called the Cattewater, and is a capacious inner mercantile anchorage, protected by the Batten breakwater. The estuary of the Tamar is called the Hamoaze, and from the spot at which it enters the Sound between Devil's Point and Mount Edgcumbe to Saltash is nearly 4 miles in length—a still more thoroughly protected anchorage for vessels of the largest size, and occupied by men-of-war. Plymouth Sound is exceedingly beautiful, and has even been likened to the Bay of Naples. On its western shore is Mount Edgcumbe, the delightful seat of the Earl of Mount Edgcumbe. Picturesque Rame Head is crowned by the ruins of a mediæval chapel; and the Yealm's estuary, with the peaked Mewstone at its mouth, is full of romantic beauty.

See Worth's *History of Plymouth* (1871; new ed. 1891), and *The Three Towns Bibliotheca* (1873); Jewitt's *History of Plymouth* (1873); and four works by J. B. Rowe (1873–76).

Plymouth, (1) capital of Plymouth county, Massachusetts, on Plymouth Bay, 37 miles by rail SE. of Boston, is famous as the landing-place in 1620 of the Pilgrim Fathers. Plymouth Rock is a granite boulder at the water's edge on which they landed. It is covered by a handsome granite canopy, and there is also a national monument (1858–89) to the pilgrims; the pedestal, also of granite, stands on a hill overlooking the landing-place, and is 46 feet high, surmounted by a figure of Faith, 36 feet high, with Morality, Education, Freedom, and Law grouped round the base. In Pilgrim Hall (1824–25) are many relics. Pop. 12,000.—(2) A mining-town of Pennsylvania, on the Susquehanna, 20 miles by rail SW. of Scranton. Pop. 17,000.—(3) The capital of Montserrat (q.v.).

Plympton, a Devon market-town, near the Plym, 4½ miles E. by N. of Plymouth. It returned two members till 1832. At its grammar-school (1658) were educated Sir Joshua Reynolds (a native) and Haydon. Pop. of parish, 1200.

Plynlimmon. See Plinlimmon.

Pnom Penh. See Cambodia.

Po (anc. *Eridanus* and *Padus*), the largest river of Italy, rises on Monte Viso, one of the Cottian Alps, at an altitude of 6405 feet, close to the French frontier, and flows 360 miles E. to the Adriatic. Over 55 miles from its mouth, above Ferrara, it begins to form its delta, 60 miles wide from north to south, and growing rapidly in area. Ravenna, once on the seashore, now stands 4 miles inland. The Po receives from the left the Ticino, Adda, Mincio, &c., and from the right the Trebbia. Below Piacenza its stream, now considerably above the level of the plain, has from ante-Roman days been embanked.

Pocklington, an urban district in the East Riding of Yorkshire, 16 miles ESE. of York. It has an Early English church (restored 1850) and a grammar-school (1514; reconstituted 1876), where Wilberforce was educated. Archbishop Ullathorne was son of a grocer here. Pop. 2500.

Podgoritza, a town of Montenegro, 16 miles E. of Cetinje, ceded by Turkey in 1879. Pop. 10,000.

Podolia, or Kamenetz, a government of West or 'White' Russia, north of Bessarabia, and touching Austria. Area, 16,224 sq. m. pop. 3,700,000, mostly Russniaks.

Point de Galle. See Galle.

Pointe-à-Pitre. See Guadeloupe.

Poitiers (Fr. pron. *Pwahteeay'*), the capital of the French dep. of Vienne, occupies the summit and slopes of a little eminence, round whose base flow the Clain and the Boivre, 61 miles SSW. of Tours. Before the revolution it had an immense number of religious edifices, which even yet are sufficiently numerous. The most interesting are the little Temple de St Jean, originally a baptistery of the 6th or 7th century; the abbey church of St Radegonde, with the saint's cenotaph, much visited by pilgrims; and the noble cathedral of St Pierre (1161–15th century), in which, or in the older edifice that occupied its site, twenty-three councils were held—the first in the 4th, and the last in the 15th century. Other edifices are the Palais-de-Justice (the palace formerly of the Counts of Poitou) and the Hôtel-de-Ville (1876). A university, founded by Charles VII. in 1431, as now reconstituted has the three faculties of law, science, and literature. There are besides a public library of 70,000 volumes and 500 MSS., and museums of art and archæology. Pop. 41,000. Poitiers, the *Limonum* of the Romans, derives its present name (earlier *Poictiers*) from the Pictavi or Pictones. In and around it are numerous Celtic and Roman remains, a dolmen, baths, fragments of a huge amphitheatre, &c.; and here in 1882 the remains of a whole Gallo-Roman town were discovered, with temple, baths, and streets, spread over 14 acres. In the vicinity Alaric II., the Visigoth, was defeated and slain by Clovis in 507; and between Poitiers and Tours Charles Martel won his great victory in 732 over the Saracens. Later still (19th September 1356), at a spot 5 miles north of Poitiers, Edward the Black Prince defeated King John of France, killing 11,000 and taking more than 2000 prisoners, among these the monarch himself and one of his sons. St Hilary was the first bishop of Poitiers, which long was capital of the province of Poitou.

Poitou (*Pwahtoo'*), a former province of south-western France, coincident with the present deps. of Deux Sèvres, Vendée, and Vienne.

Pokhurn (*Pokaran*), a town of India, in the Rajput state of Jodhpur, 70 miles NW. of Jodhpur. Pop. 15,000.

Pola, the chief naval station of Austria-Hungary, near the south end of the peninsula of Istria, 105 miles by rail S. of Trieste, with a sheltered, deep, and spacious harbour. The town is protected by forts and batteries, and is overlooked by the citadel. The naval arsenal is of great importance. The cathedral dates from the 15th century. Pola is also a shipping port, exporting wood, fish, sand, and building stones, and importing provisions, coal, and bricks. Pop. (1851) 1100, now 70,000. Pola was destroyed by Augustus, but rebuilt at the request of his daughter Julia, and hence was named *Pietas Julia.* About 200 A.D. it had 30,000 inhabitants, and was a station of the Roman fleet. It was destroyed in 1267 by the Venetians, who had conquered it in 1148; and in 1379 the Genoese, after routing the Venetians in a sea-fight off the town, once more ravaged it. But it only passed from Venice in 1797 to Austria, who made it her chief naval harbour in 1848. It contains many Roman remains, among them a well-preserved amphitheatre, 450 feet long and 360 broad.

Poland (called by the natives *Polska*, a word of the same root as *Pole*, 'a plain'), a former kingdom of Europe, was, immediately previous to its dismemberment, bounded N. by the Baltic Sea from Danzig to Riga, and by the Russian provinces of Riga and Pskov; E. by the Russian provinces of Smolensk, Tchernigoff, Pultowa, and Kherson; S. by Bessarabia, Moldavia, and the Carpathian Mountains; and W. by the Prussian provinces of Silesia, Brandenburg, and Pomerania. Its greatest length from N. to S. was 713 English miles, and from E. to W. 693 miles, embracing an area of about 282,000 sq. m. (40,000 larger than Austria-Hungary is now). This extensive tract forms part of the great European central plain, and is crossed by only one range of hills, which run NE. from the Carpathians, forming the watershed between the Baltic and Black Seas. The soil is mostly a light fertile loam, though there are large barren tracts of sand, heath, and swamp, especially in the east. Much of the fertile soil is rich pasture-land, and much is occupied with forests of pine, birch, oak, &c. Rye, wheat, barley, and other cereals, hemp, timber, honey and wax, cattle, sheep, and horses, vast mines of salt and coal, some silver, iron, copper, and lead constitute the natural riches of the country; and for commerce the Vistula, Dnieper, Dwina, and their tributaries afford great facilities. The present population of the provinces included in the Poland of former days consists of Poles, Lithuanians, Germans, Jews, Malo-Russians, Roumanians, Gypsies, &c. The Poles, who number 10,000,000, form the bulk of the population; the Lithuanians, 2,100,000 in number, inhabit the north-east of the country; the Germans, of whom there are 2,000,000, live mostly in the towns; the Jews are very numerous, being reckoned at 2,200,000. Of Roman Catholics there are about 9,400,000; of members of the Greek Church (including Uniates), 7,900,000; of Protestants, 2,360,000; the rest are Jews, Armenians in Galicia, &c.

The Polish people takes its name from the Poliani, a tribe that early became dominant amongst the Slavonic inhabitants of the Polish area. The history of the kingdom begins with its Christianisation about the end of the 10th century; in the 11th the kingdom was extended beyond the Oder, the Carpathians, and the Dniester. In the 12th century a contested succession led to dissensions and the loss of Pomerania. In the 13th the Teutonic Knights were summoned by the kings to assist them, but soon became the most formidable enemy of the Polish monarchy, conquering large districts and necessitating frequent wars. The Mongol invasion of 1241 devastated the country, and was followed by the immigration of German colonists and Jews. The marriage of Hedwig or Jadviga, daughter of King Louis, in 1385 to Jagiello, grand-duke of Lithuania, led to the union of Lithuania and Poland under the Jagellon dynasty—a union made permanent and indissoluble in 1569. The kingdom at its greatest extent was subdivided into about forty palatinates, which were mostly governed by hereditary chiefs. The people were divided into two great classes—nobles and serfs. The noble class, which was the privileged and governing class, included the higher nobles, the inferior nobles (a numerous class, corresponding to the knights and gentry of other countries), and the clergy, and numbered in all 200,000; the serfs formed the agricultural labourers, and were attached to the soil. Their condition is described by all travellers as a very pitiable one. Such trade as the country had was mostly in the hands of the Germans and Jews. The nobles were the proprietors of the soil, and appropriated the larger portion of its products. They were brave and hospitable, but quarrelsome, and generally preferred their own interests to that of their country; the serfs were sunk in poverty and ignorance. Long ere the union with Lithuania, the diet, first summoned in 1331, had absorbed almost all the kingly power, and was becoming the centre of furious and selfish dissensions amongst the nobles, which did more than anything else to ruin the nation. Other causes were the feuds of Catholics and Protestants, and the persecution of the Greek Catholics; the miserable condition of the serfs, downtrodden by the nobles; and the want of natural frontiers. The crown was practically elective—another source of difficulty and civil war. Moldavia and Wallachia, long under a Polish protectorate, were taken by the Turks; Livonia was conquered by Sweden (1605), and ceded in 1660; and Brandenburg became independent (1657). The Cossacks, goaded by Jesuit persecution, went over to Russia (1654). Sobieski's glorious victory over the Turks (1683) brought little good to the country, torn as it was by the dissensions of the nobles. Disputed elections and rival claimants to the crown led to the intervention of the adjoining powers, and the *first partition* (1772) of Poland, by which 84,000 sq. m. of Polish territory were divided between Russia, Prussia, and Austria. Renewed dissensions in 1792 led to a like result; a *second partition* (1793) gave Russia and Prussia another slice of 118,000 miles, in spite of the efforts of Kosciusko and other patriots. A Polish national rising was utterly unsuccessful, and merely precipitated the *third partition* (1795), when 82,000 miles of Polish soil were divided amongst Russia, Prussia, and Austria, and the Polish monarchy was at an end. Some readjustment took place by the Treaty of Vienna in 1815; and rebellions against Russian rule in 1830, 1848, and 1863 have only brought further humiliation on Polish hopes and aspirations.

The so-called 'Kingdom of Poland,' united to Russia in 1815, had its own constitution till 1830, and a separate government till 1864, when after the suppression of a widespread revolt, the last visible remnant of independence was taken away. The administration was at first given to eight military governors, and then to a commission sitting in St Petersburg. Finally, in 1868, the Polish province was absolutely incorporated with Russia, and the ten governments into which it was divided are grouped with the governments of Russia proper. In 1867 the area of this section of old Poland was about 49,000 sq. m., with a pop. of about 5,700,000, of whom 4,330,000 were Roman Catholics. In 1914 the ten Polish provinces—Kaliscz, Kielce, Lomza, Lublin, Piotrkow, Plock, Radom, Siedlce, Ssuwalki, and Warsaw—had a collective pop. of some 13,000,000. Commerce is still mostly in the hands of the Jews.

The Polish language, a typical representative of the western Slavonic, is a highly cultivated tongue, with a literature already extensive in the 16th century. Mickiewicz (1798–1855) is the greatest poet; Sienkiewicz one of the most esteemed and prolific of recent novelists. See historical works on Poland by Lelewel (French trans. 1844), Moltke's *Poland* (trans. 1855), and Morfill's *Poland* (1893).

Polar Seas, the seas about the North Pole and the South Polar land, are the Arctic and Antarctic Oceans, and have been separately discussed in this work under these heads.

Poldhu, a headland on the Cornwall coast, 7 miles NNW. of Lizard Point, with a Marconi wireless telegraph station.

Polesworth, a Warwickshire village, 4 miles ESE. of Tamworth; pop. of parish, 5600.

Poligny (*Pol-een-yee*), a town of the French dep. of Jura, prettily situated at the foot of the Jura, 18 miles NE. of Lons-le-Saunier; pop. 3500.

Pollanarrua, a ruined city of Ceylon, 60 miles ENE. of Kandy, with a massive dagoba, a rock-cut temple, and a wide area of ruined buildings that attest the size of the city, which became the capital about 770 A.D.

Pollokshaws, a manufacturing district in the S. of Glasgow, on the White Cart, till 1912 a burgh. It derives its name from the 'shaws' or woods of the estate of Pollok, held for more than six centuries by the Maxwells. It was made a burgh of barony in 1814; and its industries, started in 1742, comprise power-loom weaving, dyeing, tapestry and chenille manufacturing, bleaching, iron-founding, paper-making, &c. Pop. (1911) 12,932.

Pollokshields, a SW. suburb of Glasgow.

Polmont, a Stirlingshire village, 4½ miles W. by N. of Linlithgow; pop. 3000.

Polotsk, a town of Russia, on the Dwina, 62 miles by rail NW. of Vitebsk; pop. 25,000.

Polperro, a small Cornish fishing-town, 6 miles E. of Fowey.

Poltava. See PULTOWA.

Polynesia (Gr. *polys*, 'many,' *nēsos*, 'island'), a term applied collectively by some writers to all the Pacific islands of strictly oceanic character—i.e. either of volcanic or coralline origin; by others restricted to the eastern groups inhabited by the brown Polynesian race. Here it will be taken in the broader sense so as to include all the Pacific lands east of the Philippines, New Guinea, and Australia, except Japan, the Kuriles, Aleutians, Queen Charlotte, Vancouver, Revillagigedo, and Galapagos, which are geographical dependencies of the surrounding Asiatic and American continents. These Polynesian, or 'South Sea' islands (most of them annexed by one of the greater European powers), are distributed over a hundred degrees of longitude from New Britain (149° E.) to Easter Island (109° 17′ W.), and across seventy degrees of latitude from Hawaii (23° N.) to Stewart Island at the southern extremity of New Zealand (47° 20′ S.). But the aggregate extent of dry land in this boundless expanse of some 11 million square miles scarcely exceeds 170,000 sq. m., of which nearly two-thirds are comprised in the New Zealand Archipelago, while the total pop. is probably less than 2,000,000. Polynesia comprises the three broad divisions of Micronesia, Melanesia, and East Polynesia, which are determined partly by geographical position, and partly by ethnological conditions, and each of which is again subdivided into several secondary groups. Thus, Micronesia (Gr. *mikros*, 'small,' *nēsos*, 'island') lies in the extreme north-west almost entirely north of the equator, and consists exclusively of small volcanoes and atolls, forming the five archipelagoes, all inhabited by heterogeneous populations in which most of the oceanic and perhaps some of the continental elements are represented. So also Melanesia (Gr. *melas*, 'black') lies in the extreme west entirely south of the equator, and consists mainly of comparatively large upraised crystalline, coralline, and volcanic islands disposed in parallel chains from north-west to south-east, forming eleven archipelagoes, all inhabited by the Melanesian or dark Oceanic race. Lastly, East Polynesia lies on both sides of the equator, mainly east of a line drawn from New Zealand between Fiji and Samoa to Hawaii, and consists of twelve volcanic and coralline archipelagoes (suitable), besides the large sedimentary and igneous region of New Zealand and numerous sporadic islets, such as Norfolk, Chatham, Rapaiti, Easter, Manihiki, Tongareva, Uvea, and many others. This division is the exclusive domain, apart from recent white immigrants, of the large brown race, commonly called 'Polynesians' in a special sense. The table shows the size, population, and political connection of each group.

Group.	Area in sq. m.	Pop.	State.
MICRONESIA—			
Mariana	450	15,000	Ger. and U.S.
Pelew	200	3,000	Germany.
Caroline	400	60,000	Germany.
Marshall	160	18,000	Germany.
Gilbert (Kingsmill)	170	30,000	Britain.
MELANESIA—			
Admiralty	770	2,000	Germany.
Bismarck	16,000	188,000	Germany.
D'Entrecasteaux	1,100	1,000 (?)	Britain.
Louisiade	870	2,000 (?)	Britain.
Solomon	16,300	200,000	Brit. and Ger.
Santa Cruz	200	5,000	Britain.
Banks	190	4,500	Britain.
New Hebrides	5,000	62,000	Anglo-French.
New Caledonia	6,500	55,000	France.
Loyalty	1,100	20,000	France.
Fiji	8,000	140,000	Britain.
EAST POLYNESIA—			
Hawaii	6,700	192,000	Un. States.
Fanning	15	200	Britain.
Ellice	14	300	Britain.
Tokelau	12	1,000	Britain.
Samoa	1,000	44,000	Ger. and U.S.
Tonga	450	24,000	Britain.
Kermadec	40	4	Britain.
Austral	105	2,400	France.
Cook (Hervey)	140	11,500	Britain.
Tahiti (Society)	600	30,000	France.
Tuamotu (Low)	360	4,000	France.
Marquesas	480	4,000	France.
New Zealand	104,000	1,000,000	Britain.

Lying almost entirely within the tropics, and consisting nearly everywhere of igneous or coralline groups exposed to the same atmospheric and marine currents, Polynesia presents great uniformity in its climatic and biological conditions (New Zealand, however, differs widely). The rainfall is generally high, the flora relatively rich, the fauna remarkably poor, especially in mammals. There is a general consensus that Polynesia has been occupied from prehistoric times by two distinct races, the dark Melanesians, who belong to the same stock as the Papuans of New Guinea and Malaysia, and the brown Polynesians, called also Mahori and Sawaiori, whose racial affinities have not been satisfactorily determined. Nearly all the Pacific languages appear to be members of the great Malayo-Polynesian family; however it is to be explained, both the dark and brown peoples speak idioms derived from a common stock. For over a century the Oceanic peoples have been in contact with Europeans, and nearly all the Polynesians, as well as many of the Melanesians, profess some form of Christianity—the first mission established being that to Tahiti in 1797 by the London Missionary Society. But as western influences increase, the races themselves decrease. See works by Ellis (1829), Sir George Grey (1855), De Quatrefages (1866), Pritchard (1866), Angus (1867), Moresby (1877), Fornander (1878–86), Gill (1880), Keane (1880), and Codrington (1891), and the articles on the separate groups.

Pomerania (Ger. *Pommern*), a Prussian province, from 1100 to 1637 an independent duchy, bounded N. by the Baltic, and S. by Brandenburg. Area, 11,620 sq. m.; population, 1,717,000. It is one of the lowest and flattest regions in Germany, and has numerous lakes. Stettin (the capital) and Stralsund are the most important towns. Greifswald is the seat of a university.

Pomeroy, capital of Meigs county, Ohio, between the Ohio River and a range of precipitous hills, 133 miles by rail SE. of Columbus. Coal-mining and the manufacture of salt are the chief industries. Pop. 4000.

Pomfret. See Pontefract.

Pomona, or Mainland. See Orkney.

Pompeii (*Pompee'ī;* Ital. pron. *Pompay'yee*), once a seaport at the mouth of the Sarnus, on the Neapolitan Riviera, founded about 600 B.C. by the Oscans, and, after them, occupied by the Tyrrheno-Pelasgians, and by the Samnites, till these, about 80 B.C., were dispossessed by the Romans. From that time down to its destruction, 79 A.D., it became (with Herculaneum) a sort of Rome-super-Mare, frequented by the aristocracy; and its public monuments were out of all proportion to its size. On February 5, 63 A.D., by an earthquake, these buildings were all but levelled with the ground, and some years elapsed ere the fugitive citizens recovered confidence to re-occupy and rebuild. Reconstruction was carried out with haste and tawdriness. The city had relapsed into more than its former gaiety and licentiousness, when on the 23d August (or, more probably, on the 23d November) 79, with a return of the shocks of earthquake, Vesuvius was seen to throw up a column of black smoke, expanding into a great swarthy cloud, dense with ashes, pumice, and red-hot stones, which settled down on the doomed cities with a force increased by the rain-torrents that intermittently fell. Amid the impenetrable gloom the panic of the citizens was aggravated by repeated shocks of earthquake, and for three days the flight continued till Pompeii was abandoned by all who could effect their escape. The Emperor Titus organised relief on an imperial scale, and even undertook the rebuilding of the city. This attempt was soon abandoned, and Pompeii remained a heap of hardened mud and ashes, gradually overgrown with grass—the wall of the great theatre and the outline of the amphitheatre alone marking its site—till 1592, when the architect Fontana, in cutting an aqueduct, came on some ancient buildings. Unsystematic, unscientific excavations proceeded fitfully from 1748 till 1860, when the Italian kingdom took in hand the unearthing of the city. This was carried out with admirable ingenuity, care, and success; and the wonderfully preserved remains of temples, theatres, shops, and dwelling-houses attract pilgrims from all lands to study these unique object-lessons of the public and private life of antiquity.

See works by Neville Rolfe (1884), Mazois (Paris, 1812–38), Nissen (Leip. 1877), Overbeck-Mau (Leip. 1884), and Bagot Molesworth (1903); also Bulwer Lytton's *Last Days of Pompeii*.

Ponapé. See Caroline Islands.

Ponce, a town and port on the south coast of Porto Rico, 50 miles SW. of San Juan. Pop. 35,000.

Pondicherry (*Pon'di-sherr'ee*), the chief of the French settlements in India, on the Coromandel Coast, 90 miles S. by W. of Madras. It is divided into two parts by a canal, White (European) town being next the sea. It has handsome streets, a government house, a college, a lighthouse, and a cotton-mill employing 1500 hands. Pop. 48,000. It exports chiefly oil-seeds. The French colony of Pondicherry has an area of 115 sq. m. and a population of 185,000. Its governor is governor-general of French India. The French first settled here in 1674, but the town was held by the Dutch in 1693–97, and by the English in 1761–63, 1778–83, and 1793–1816.

Pondoland, a district of Kaffraria, on the Natal border, South Africa, was mostly annexed to Cape Colony in 1884–87, the remainder being incorporated in 1894; pop. 234,000.

Ponta Delgada. See Azores.

Pont-à-Mousson (*Pon^{g}-ta-Moosson^{g}*), a town in the French dep. of Meurthe-et-Moselle, on the Moselle, 18 miles NNW. of Nancy and 18 SSE. of Metz; pop. 14,000.

Pontarlier, a French town (dep. Doubs), 35 miles SE. of Besançon, on the main Jura route from Switzerland to France; pop. 9000.

Pontchartrain (*Pon-shar-train'*), Lake, in Louisiana, 5 miles N. of New Orleans, is 40 miles long and 25 wide.

Pontecorvo (*Pontehcor'vo*), a cathedral city of Italy, 37 miles NW. of Capua; pop. 12,000.

Pontefract, or Pomfret, a pleasant market-town in the West Riding of Yorkshire, on an eminence near the influx of the Calder to the Aire, 13 miles SE. of Leeds, 8 E. by N. of Wakefield, and 14 NNW. of Doncaster. It stands on the line of a Roman road, but seems to have arisen round its Norman castle, which, founded about 1076 by Ilbert de Lacy, was the scene of the execution or murder of the Earl of Lancaster (1322), Richard II. (1400), and Earl Rivers (1483), was taken in the Pilgrimage of Grace (1536), and during the Great Rebellion sustained four sieges, being finally dismantled in 1649, after its capture by Lambert. There are two old churches, a town-hall (rebuilt 1796), a market-hall (1860), a grammar-school of Edward VI. (1549), and large market-gardens and nurseries, the growing of liquorice for the lozenges called 'Pomfret cakes' being a specialty as old as about 1562. At Ackworth, 3 miles south, is a large Quaker school (1778). Pontefract, called *Taddenesscylf* in pre-Conquest times, seems to have received its present name between 1086 and 1135; why Pontefract ('broken bridge') is uncertain, see *Notes and Queries* for 1886–87. The borough, chartered by Richard III., lost one of its two members in 1885. Pop. parl. borough, 24,500; mun., 16,000.

Pontevedra (*Pontehvay'dra*), a cathedral town of Spain and capital of a Galician province, 30 miles S. of Santiago; pop. 25,000.

Pontiac, capital of Oakland county, Michigan, on Clinton River, surrounded by lakelets, 26 miles by rail NNW. of Detroit. It has a state reform school, a lunatic asylum, flour and planing mills, foundries, and brick-yards. Pop. 14,400.

Pontianak', capital of the western division of Dutch Borneo, near the mouth of the river Kapuas; pop. 10,000.

Pontigny (*Ponteen-yee'*), a village of the French dep. of Yonne, 18 miles SE. of Auxerre, with a famous Cistercian monastery. Three English archbishops retired hither—Becket, Langton, and St Edmund, the last being buried here. The monastery was devastated by the Huguenots in 1567, and destroyed at the Revolution; but the church (1150–70) is the most perfect Cistercian church in existence.

Pontine Marshes (Lat. *Pometinæ Paludes*), the S. part of the Roman Campagna. A law of 1899 provides for their reclamation in twenty-four years.

Pontresina (*Pontrehzee'na*), a tourist centre in the Swiss canton of Grisons, in the Upper Engadine, on the road to the Bernina Pass.

Pontypool, an urban district of Monmouthshire, on the Afon Llwydd, 9 miles N. by W. of Newport. Its 17th-century japanned wares have long been a thing of the past, and iron and tin-plate works, brewing, and coal-mining now furnish employment. Pop. 6500.

Pontypridd, a town of Glamorgan, 12 miles NW. of Cardiff by rail, at the junction of the Rhondda and the Tarf. It has a famous one-arched bridge (1750), iron and coal mines, iron and brass foundries, and chemical and other manufactures—to which is due its rapid growth from a mere village at the beginning of the 19th century. Pop. 43,200.

Poole, a Dorset seaport, 5 miles W. of Bournemouth and 30 E. of Dorchester. It stands on the north side of Poole Harbour (7 by 4¼ miles), an irregular inlet, formed by the projection of the 'isle' of Purbeck, almost dry at low-water, and having four tides a day. On Brownsea or Branksea Island, just within the narrow entrance to the harbour, is a castle dating from the time of Henry VIII. Poole has an old town-hall (1572), a guild-hall (1761), a town-house (1822), shipping, yacht-building, and trade in potter's clay and pipeclay. Its men were great fighters as buccaneers, smugglers, and Cromwellian soldiery. 'Arripay,' or Harry Page, about 1400 kept the seas against France and Spain; and William Thompson, with a man and a boy, captured a French privateer in 1695. Till 1867 Poole returned two members, till 1885 one. Pop. 40,000.

Poona, or PUNA, a town of India, 119 miles by rail SE. of Bombay, is the military capital of the Deccan and seat of the government of the presidency during half the year. The city is embosomed in gardens, but its streets are mostly narrow or crooked, and the houses poor. Under the peshwas the city was the capital of the Mahratta princes; it was occupied and annexed by the British in 1818. Here have been built the Deccan College and the College of Science, the latter for training civil engineers, a normal school and normal college, a high school, &c. The Europeans live chiefly at the cantonments, to the NW. The natives manufacture cottons and silks, gold and silver jewellery, ivory and grass ornaments, and clay figures. Pop. 160,000.

Popayan (*Popīan'*), formerly capital of Cauca in Colombia, stands in a fertile plain, 5700 feet above sea-level, near the river Cauca. It has a ruined cathedral, and had a university. Pop. 20,000.

Poperinghe (Fr. pron. *Poperan*^{g}), a town of Belgium, 4 miles from the French frontier and 8 W. of Ypres by rail. It manufactures lace, linens, and woollen cloths. Pop. 12,000.

Poplar, a metropolitan borough of E. London.

Popo'cate'petl ('smoking mountain'), a conical volcano (17,784 feet), 40 miles SE. of the city of Mexico. No great eruption has been recorded since 1540; it still smokes, however. In and around its crater much sulphur is obtained.

Porchester. See PORTSMOUTH.

Pordenone, a cathedral city of Venetia, 30 miles WSW. of Udine; pop. 10,000.

Port Adelaide. See ADELAIDE.

Portadown, a market-town of Armagh, Ireland, on the Bann, 6 miles S. of Lough Neagh and 25 by rail SW. of Belfast. It trades in farm-produce, and manufactures linen, cambric, and sheeting. Pop. 11,700.

Portage City, capital of Columbia county, Wisconsin, at the head of navigation on the Wisconsin River, and on the ship-canal to the Fox River, 177 miles NW. of Chicago. It has grain-elevators and ironworks, and manufactures leather, boots, clothing, &c. Pop. 5000.

Portage la Prairie, the market-town of a rich agricultural district in Manitoba, on the Assiniboine River, 56 miles by rail W. of Winnipeg. It has flour-mills and grain-elevators, brick-yards, &c. Pop. 5900.

Portalegre, a town of Portugal, 49 miles ENE. of Evora, has prehistoric, Roman, and Moorish antiquities, a cathedral, and woollen manufactures; pop. 12,000.

Portarlington, a market-town, partly in King's County, but chiefly in Queen's County, on the Barrow, 44 miles by rail SW. of Dublin. It was named from the Earl of Arlington, to whom Charles II. granted it. William III. planted in it a colony of French and Flemish Protestants. Until 1885 it returned an M.P. Pop. 2000.

Port Arthur, the terminus of the eastern division of the Canadian Pacific Railway, on Thunder Bay, an arm of Lake Superior, 993 miles by rail WNW. of Montreal. Pop. 12,000.

Port Arthur, or LUSHUNKO, a naval station and arsenal on the extremity of the rocky Manchurian peninsula of Liao-tung, which stretches southward between the Gulf of Pe-chi-li and the Yellow Sea. The port, which had been fortified by German engineers, was taken by the Japanese from China in 1894, but in 1898 it, with Ta-lien-wan (Dairen), was 'leased' to Russia, enormously strengthened, and made the main terminus of the Siberian railway system. In 1905 it was again taken by the Japanese, after eight months' siege.

Port Augusta, a town of South Australia, at the head of Spencer Gulf, 260 miles NNW. of Adelaide, in a rich mineral region. The Trans-Australian Railway to Kalgoorlie (1000 miles) was begun in 1912; that to Oodnadatta is destined to meet the Darwin line. Pop. 3000.

Port-au-Prince (*Por-to-Pran*^{g}*ss'*), the capital of Hayti (q.v.), is situated on the west coast, at the head of a bay of the same name; pop. 100,000.

Port Bannatyne, or KAMESBURGH, a village of Bute, 2½ miles NNW. of Rothesay; pop. 700.

Port Breton, the SE. part of New Ireland (now German), the scene in 1879 of a disastrous experiment in colonising by French Legitimists.

Port Chalmers, a port of New Zealand, on Otago Harbour, 8 m. ENE. of Dunedin; pop. 2100.

Port Clarence, a Durham seaport, at the mouth of the Tees, 9 miles S. of Hartlepool.

Port Darwin, one of the finest harbours in Australia, on the NW. coast of the Northern Territory of the Commonwealth. Its entrance is 2 miles wide. Darwin or Palmerston, on the E. shore, 1973 miles from Adelaide, is capital of the

Territory, terminus of the overland telegraph, of the cable to Java and Singapore, and of a railway (1891) to the goldfields 150 miles inland, destined to meet the line from Port Augusta to Oodnadatta.

Port D'Urban. See Durban.

Port Durnford, a harbour in British East Africa, a little more than 1° S. of the equator.

Port Elizabeth, a seaport of the Cape Province, on the western shore of Algoa Bay, 85 miles by rail SW. of Graham's Town and 350 S. of Kimberley. Founded in 1820, it is the principal seaport for the east part of the Cape Province and the Orange Free State. Its public buildings are the town-house, the provincial hospital, churches, the Grey Institute, a college, a library, a museum, &c. Its harbour is under the Harbour and Railway Board of the Union. An aqueduct, 28 miles long (1878), brings good water. The exports include wool, ostrich-feathers, Angora goats' hair, and diamonds. Pop. 30,000.

Port Erin, a village in the Isle of Man, 5½ miles W. of Castletown, with a breakwater, steamboat pier, and marine biological station (1892).

Portessie, a Banffshire fishing-village, 1¼ mile ENE. of Buckie.

Port Essington, an inlet in the Coburg Peninsula in N. Australia, forming a fine harbour, where in 1831–50 there was a penal settlement.

Port Famine, the name given by Cavendish in 1587 to a spot on the north coast of the Strait of Magellan, a Chilian penal colony in 1843–53.

Port-Glasgow, a town of Renfrewshire, on the southern shore of the Firth of Clyde, 3 miles ESE. of Greenock and 20 WNW. of Glasgow. It was founded in 1668 by the magistrates of Glasgow as a harbour for their city, the deepening of the Clyde (q.v.) not having yet been thought of. In 1710 it was constituted the head custom-house on the Clyde, and for a while took the lead of Greenock; in 1775 it was incorporated as a municipality; and by the Reform Bill of 1832 it unites with Kilmarnock, &c., to return one member. Built on low alluvial ground, and backed by hills 700 feet high, it has a Doric town-house (1815), a public hall (1873), ruined Newark Castle (1597), a wet-dock of 12 acres (formed since 1834), a large graving-dock (1874), extensive timber-ponds, shipbuilding-yards, iron and brass foundries, &c. Pop. 18,000.

Portglenone, a Londonderry village, on the Bann, 9 miles W. of Ballymena.

Port Gordon, a Banffshire fishing-village, 2½ miles SW. of Buckie; pop. 1400.

Port Hamilton, a spacious, well-sheltered harbour, formed by three islands of the Nan-how group, 30 miles S. of Corea and 45 NE. of Quelpart. It was discovered and named by Belcher in 1845, and held by Britain in 1885–86.

Port Harcourt, a new port in the east of Nigeria, from which a railway is to run to the Udi coalfield.

Porthcawl, a Glamorganshire seaport and watering-place, 6¼ miles SW. of Bridgend.

Porthcwrnow (*Porthcur'no*), a Cornish cove, 8 miles SW. of Penzance.

Porthleven, a Cornish seaport, 2½ miles WSW. of Hilston.

Port Hope, a port of entry of Ontario, on the north shore of Lake Ontario, 63 miles by rail E. of Toronto; pop. 5100.

Port Huron, capital of St Clair county, Michigan, is on the St Clair River, where it issues from Lake Huron, and at the mouth of the Black River, 59 miles by rail NNE. of Detroit. The city has a fine custom-house (1877), shipyards and dry-docks, sawmills, grain-elevators, and machine and railroad shops. A railway tunnel here passes under the St Clair (q.v.) River; there is also a steam-ferry to Sarnia. Pop. 19,000.

Portici (*Por'tichee*), a town of Italy, on the slope of Vesuvius, 5 miles by rail SE. of Naples. The royal palace (1738) is now an agricultural college. Pop. 15,000.

Port Isaac, a Cornish seaport, 6½ miles NE. of Padstow.

Portisham, a Dorset parish, 6 miles SW. of Dorchester. Here is a tower to Nelson's Hardy, who was a native.

Portishead, a Somerset watering-place, on the Severn estuary, 10 miles W. of Bristol; pop. of urban district, 3300.

Port Jackson. See Sydney.

Port Jervis, a town of New York, on the Delaware River, 88 miles by rail NW. of New York City; pop. 9300.

Portland, (1) the largest city and chief seaport of Maine, and capital of Cumberland county, on Casco Bay, 108 miles by rail NE. of Boston. It is situated on a narrow peninsula, 2½ sq. m. in area, with broad, shaded streets, a court and custom-house, post-office, city hall, observatory, and Baxter and Mechanics' Halls. There are rolling-mills; and locomotives, machinery, boilers, stoves, carriages, and shoes are manufactured, and sugar and petroleum refined. The harbour, defended by three forts, is large, deep, and well sheltered; there are wharves, elevators, and dry-docks, and steamers ply direct to Liverpool in winter. The place was settled by an English colony in 1632. In 1866 a fire destroyed $10,000,000 worth of property. Portland is the seat of Episcopal and Roman Catholic bishops, and was the birthplace of Longfellow. Population, about 60,000.—(2) Portland, the metropolis of Oregon, and capital of Multnomah county, is on the Willamette River, 12 miles from where it joins the Columbia, and 772 by rail N. of San Francisco. Large ocean-going ships come up to this point. A handsome city, well built, with fine, shaded streets, it has a court-house, a U.S. government building, and an asylum. There are iron-foundries, machine-shops, sawmills, canneries, breweries, and manufactures of furniture, flour, shoes, &c. Portland was founded in 1844, and became a city in 1851. Extensive harbour improvements have been undertaken. Pop. 207,000.

Portland, Isle of, a rocky peninsula of Dorsetshire, connected with the mainland by the Chesil Bank (q.v.), and 4 miles S. of Weymouth by a branch-line (1865). It is 4½ miles long, 1¾ wide, 9 in circumference, and 2890 acres in area. From its highest point, the Verne (495 feet), it shelves with a gradual and almost unbroken slope to Portland Bill (20 feet), the southern extremity, where stands a lighthouse (1903–4; 136 feet high), superseding two of 1716–89. Between it and the Shambles, a dangerous reef, 3 miles SE., a surf, called the Portland Race, is raised by the rushing of the impetuous tides. The cliffs have in places been worn into fantastic caverns; and ancient raised beaches are well marked near the Bill. Portland is one solid mass of oolitic limestone, which has been largely quarried for building purposes since the 17th century, when Inigo Jones employed it for Whitehall and Sir Christopher Wren for St Paul's. Goldsmiths' Hall, the Reform Club, and Pall Mall generally are also built of it; and the yearly export ranges between 50,000 and 70,000 tons. A magnificent harbour of refuge has been formed by the construction of two breakwaters (1849–72 and 1893–1904), each over 2 miles long, the latter extending from the north towards the former from the 'Isle.' Formidable fortifications have been constructed. New defence-works were constructed in 1894–1904. Other features of the 'Isle' are its great convict-prison, dating from 1848; Portland Castle (1520), built by Henry VIII., and held for Charles I. till 1646; Bow and Arrow Castle, ascribed to Rufus; and Pennsylvania Castle (1800), built by Governor Penn, the great Quaker's grandson. The inhabitants of the 'Isle' long remained a peculiar people. The 'Isle' itself is remarkable for its copious and excellent spring-water, and for the mutton of its small breed of black-faced sheep. Pop. (1851) 5195; now over 17,000. See Damon's *Geology of Weymouth and Portland* (1860), and an article in the *Cornhill* (1882).

Portlaw, a market-town on the Clodiagh, 11 miles W. of Waterford; pop. 1100.

Port Louis, the capital and principal port of Mauritius, is situated on an excellent harbour on the north-west coast, and is enclosed by a ring of lofty hills. It has graving-docks, is defended by forts (1887–91), is a coaling-station of the British navy, and has barracks and military storehouses. The city contains the goverment house, a Protestant and a Roman Catholic cathedral, a royal college, &c. It suffered terribly from the great hurricane of May 1892. Pop. 50,000.

Portmad'oc, a Carnarvonshire seaport, on Tremadoc Bay, 11 miles E. of Pwllheli. It ships slate and copper.

Port Mahon (*Ma-hoan'*; anc. *Portus Magonis*), capital of Minorca (q.v.), is beautifully situated on a deep, narrow inlet in the SE. of the island, its excellent harbour being protected by fortifications. Stone, shoes, cottons, cattle, and honey are exported. Pop. 20,000. The town was held by the English in 1708–56 and 1762–82.

Portmoak', a Kinross-shire parish, on Lochleven. The poet Michael Bruce was a native.

Port Moody. See VANCOUVER.

Port Moresby. See NEW GUINEA.

Port Natal. See DURBAN.

Port Nelson, a seaport of Manitoba, on Hudson Bay, at the mouth of the Nelson River, 420 m. NE. of Le Pas by the Hudson Bay Railway route.

Porto. See OPORTO.

Porto Alegre (*Pŏrto Alay'greh*), capital of the Brazilian state of Rio Grande do Sul, stands at the NW. end of the Lagõa dos Patos. Founded in 1742, it has a cathedral, an arsenal, and various manufactures. Pop. 100,000 (many Germans).

Portobello, a watering-place, since 1896 part of the burgh of Edinburgh. Its first house (1742) was built by one of Admiral Vernon's seamen in the expedition against Portobelo; but it dates, like its eastern extension Joppa, almost wholly from a time later than 1804. It has an esplanade, a promenade pier, Marine Gardens, and manufactures of pottery, bricks, bottles, &c. It unites with Leith and Musselburgh to return an M.P. Pop. 11,000.

Portobelo, a decayed seaport of Panamá, on the northern shore of the Isthmus of Panamá, almost due north of the town of Panamá. It has an excellent harbour, discovered by Columbus in 1502, but is very unhealthy, and has fallen into decay since 1739, when it was stormed by Admiral Vernon. Drake died off here. Pop. 1300.

Porto Ferrajo. See ELBA.

Port of Spain. See TRINIDAD.

Porto-Maurizio (*Mou-reetz'i-o*), a town of north Italy, stands embowered in olive-groves on the Gulf of Genoa, 69 miles by rail SW. of Genoa, and 41 E. by N. of Nice; pop. 8000.

Porto Novo, (1) a small port on the Coromandel coast of India, 145 miles S. of Madras by rail. Here, on 1st July 1781, Sir Eyre Coote, with 8000 men, defeated Hyder Ali and 60,000. Pop. 15,000.—(2) A trading-station in French Guinea.

Porto Rico (*Ree'ko*), or PUERTO RICO, a fertile West India island, 75 miles E. of Hayti or Santo Domingo; with an area of 3530 sq. m., it measures 110 miles E. to W. by 40. It is traversed from E. to W. by ranges of mountains (El Yunque, 3670 feet). From the base of the mountains rich alluvial well-watered tracts extend to the sea; the higher parts are covered with forests. The principal crops are sugar, coffee, and rice (the food of the people); tobacco, maize, yams, bananas, plantains, and tropical fruits are also grown. Cattle and horses are fed on the lowland pastures. The exports are sugar, coffee, molasses, tobacco, and cattle. Pop. (1800) 155,400; (1864) 615,844; (1910) 1,118,012. The towns are St John's (q.v.), the capital, and Ponce (63,500). Columbus discovered Porto Rico in 1493, and Ponce de Leon founded a settlement in 1510. The island was ceded by Spain to the United States after the war of 1898, and in 1900 civil government was conferred.

Portpatrick, a decayed fishing-village in Wigtownshire, 7¾ miles SW. of Stranraer by rail, and 21½ NE. of Donaghadee in Ireland. It was long the Gretna Green for Ireland, and a mail-packet station from 1662 till 1849. A pier was built in 1774, and a great harbour was commenced in 1821, but ultimately abandoned, the *Orion* steamship having been lost within the port in 1850. The lighthouse was removed in 1869, and the harbour-works fell quickly into ruin, after having cost £500,000. Pop. (1861) 1206; (1911) 517.

Port Phillip, the gate of Melbourne, discovered in 1802 by Murray, and named after Captain Phillip, first governor of New South Wales.

Portreath, a Cornish seaport, 4 miles NW. of Redruth.

Portree, a seaport village of Skye, on Portree Bay, 32 miles WSW. of Strome Ferry, and 120 NNW. of Oban. It got its name *Port-an-righ* ('king's harbour') from a visit of James V. in 1540. Pop. 900.

Port Royal. See JAMAICA.

Portrush', a watering-place with excellent golfing links in County Antrim, 6½ miles by rail N. of Coleraine, and 7 W. by S. of the Giants' Causeway, with which it is connected by an electric tramway (1883). Pop. 2100.

Port Saïd (*Sah-eed'*), a town of Egypt, on the west side of the Suez Canal, on a desolate strip of land between Lake Menzaleh and the Mediterranean. The place, which owes its origin to the Suez Canal (q.v.), is named after Saïd Pasha, and is mainly a coaling station. Pop. 50,000.

Portsea Island, a small island of Hampshire, 4 miles long, separated from the mainland by a narrow channel crossed by bridges, and containing the towns of Portsea and Portsmouth.

Port Simpson, a British Columbian port on the Portland Channel which separates Canada and Alaska, 25 miles NW. of Prince Rupert; pop. 1000, mainly Indians.

Portsmouth (*Ports'muth*), the chief naval arsenal of Great Britain, and an important seaport, market-town, and municipal, parliamentary, and county borough, in the south of Hampshire, stands on the south-west shore of Portsea Island (q.v.) at the entrance to Portsmouth Harbour, and opposite the town of Gosport (q.v.), with which it communicates by means of a steam-bridge. It is 74 miles SW. of London, 44 W. of Brighton, and 23 SE. of Southampton. The main Roman station in Portsmouth Harbour was at Porchester. Portsmouth includes Landport, Portsea, and Southsea; the parliamentary borough excludes the districts of Hilsea and Salterns. Pop. of the county borough (1821) 69,479; (1881) 127,989; (1901) 188,133; (1911) 231,141; parl. borough 230,520. Portsmouth has probably the most complete fortifications in Britain. These comprise, on the landward side, the outer line of the Portsdown forts and the Hilsea lines; to seaward, the Spithead (q.v.) forts. The greater portion of the imposing bastioned ramparts was removed after 1872; the Camber Bastion and a small section of rampart and moat near the Governor's Green have been left. Southsea, which is situated outside the walls skirting Southsea Common, is now a fashionable watering-place. Many impovements have been carried out in Portsmouth, including improved drainage, and the opening of the Victoria Park in 1878, a new town-hall opened in 1890, and a municipal college built in 1908. The church of St Thomas, whose chancel and transept date from the close of the 12th century, the nave and tower from 1698, contains a ghastly cenotaph in memory of the murdered Duke of Buckingham. The Garrison Chapel, Early English in style, and finely restored by Street in 1867, is a fragment of the hospital of St Nicholas, founded in 1212. In it Charles II. married Catharine of Braganza; and in front of it is buried the brave Sir Charles James Napier. The dockyard, in the district of Portsea, was till 1872 only 116 acres in extent; but the total dock area, including two dry-docks added in 1896, is now over 300 acres. Noteworthy features are the mast and rope houses, hemp-stores, rigging-stores, sail-loft, the dry-docks, the building-slips, the wood-mills, with the block-making machines, the smithy, with its Nasmyth's hammer, &c. Portsmouth Harbour, about 400 yards wide at its entrance, expands into a spacious basin, extending 4 miles inland, and having a breadth of 3 miles along its northern shore. Large war-vessels can enter and lie at anchor at all times of the tide, there being 4 fathoms of water in the channel at low-water. The outward entrance is defended by Forts Monckton and Gilkicker, and Southsea Castle. The harbour is situated in the middle of the channel, close to the magnificent anchorage of Spithead, where 1000 ships of the line may ride without inconvenience, and is under shelter of the Isle of Wight, and opposite the French arsenal of Cherbourg. The importance of this port dates only from the reign of Henry VIII. Its defences were commenced by Edward IV., and strengthened by Elizabeth and William III. Here, in a house that still remains, the Duke of Buckingham was assassinated by Felton. In 1782 the *Royal George* went down at Spithead, and nearly 1000 lives were lost. Charles Dickens was born at 387 Mile End Terrace, Commercial Road, Landport, Portsea; and other worthies have been Sir Walter Besant, I. K. Brunel, Jonas Hanway, Sir Frederick Madden, George Meredith, and John Pounds. See works by L. Allen (1817), H. Slight (1828), H. P. Wright (1873), W. H. Saunders (1880), and Murrell and East (1884).

Portsmouth, (1) the metropolis and only seaport of New Hampshire, on the Piscataqua's south bank, 3 miles from the Atlantic, and 57 by rail NNE. of Boston. Built on a beautiful peninsula, overlooking a capacious and deep harbour, it is a handsome old town, many of its streets lined with shade-trees, and is a favourite summer-resort. It has a custom-house; the manufactures include cotton, hosiery, shoes, iron-casting, and shipbuilding. At Kittery, on an island opposite, is a U.S. navy-yard. Here in 1905 peace was concluded between Russia and Japan. Pop. 11,300.—(2) Capital of Scioto county, Ohio, stands among hills in an iron region, on the Ohio River, at the mouth of the Scioto, and at the south terminus of the Ohio Canal, 106 miles by rail ESE. of Cincinnati; pop. 23,500.—(3) A city and port of Virginia, on the Elizabeth River, opposite Norfolk (q.v.). Gosport, with its navy-yard, &c., is a suburb. Portsmouth contains a dry-dock and a naval hospital. Pop. 33,200.

Portsoy′, a Banffshire seaport, 8½ miles W. of Banff, a police-burgh since 1889; pop. 2000.

Portstewart, a Londonderry watering-place, 3 miles WSW. of Portrush; pop. 1500.

Port Sudan, a Red Sea port of Anglo-Egyptian Sudan, 36 miles N. of Suakin, founded in 1905–9, has a railway to the Nile.

Port Sunlight, a beautiful model village of Cheshire, 3 miles SE. from Birkenhead, founded in 1888 by the proprietors of a neighbouring work for their workpeople.

Port Swettenham, a port of Selángor, 22 m. WSW. of Kwala Lampur; pop., with Klang, 5000.

Port Talbot. See ABERAVON.

Port Townsend, capital of Jefferson county, Washington, is on Puget Sound, near Juan de Fuca Strait, 47 miles N. of Seattle. It has a good harbour. Pop. 4200.

Portugal (named from *Portus Cale*, the Roman name of Oporto, q.v.), a republic of Europe, lying between Spain and the Atlantic, on the west side of the Iberian Peninsula, stretches 350 miles between 36° 59′ and 42° 8′ N. lat., and varies in width from 70 to 140 miles between 6° 10′ and 9° 31′ W. long. The area is 36,038 sq. m.—a little larger than Ireland. In 1851 the population numbered 3,487,000; in 1874, 4,160,315; and in 1911 it was 5,960,056. Some 60,000 persons emigrate every year, chiefly to Brazil. Lisbon, Oporto, and Braga (435,000, 194,000, and 30,000), are the only towns with above 25,000 inhabitants. The Azores and Madeira are always reckoned not as colonies but as parts of the mother-country.

The coast is mostly low and flat, except immediately north and south of the mouth of the Tagus, and at Cape St Vincent. The north of Portugal is diversified by spurs (5000 feet) of the mountains of Spanish Galicia. The Sierra da Estrella (6540 feet) is a westward continuation of the Spanish Sierra Guadarrama system. The Sierra Morena is continued westwards in southern Portugal. So the principal rivers of the country—the Guadiana in the south, the Tagus in the centre, and the Douro and Minho in the north—are simply the lower courses of Spanish rivers;

but the Mondego has its sources in the country. Minerals are little worked from want of fuel and cheap means of transit. Salt is prepared; copper, iron, lead, manganese, antimony, gypsum, lime, and marble are exported. The vicinity to the ocean tempers the climate, and exempts it from the dry heat of Spain. The inequalities of the surface produce, however, diversities of climate; for, while snow falls abundantly on the mountains in the northern provinces, it is never seen in the southern lowlands. Rain falls abundantly throughout the year. Malaria and fever prevail in the low flat lands and near the salt-marshes. The soil is generally rich, except in the mountainous parts; but agriculture is everywhere in a backward state, little more than half the area of the country being put to profitable use. Maize, wheat, rye, barley, and rice are grown, but not in sufficient quantity for the wants of the people; also potatoes, vegetables (especially onions), flax, fruits (oranges, lemons, chestnuts, almonds, &c.). But the vine and the olive maintain the most prosperous industries; the wine annually produced (especially port, named from Oporto) amounts to 88,000,000 gallons. Silkworms and bees are kept, and fish (tunnies and sardines) are abundant. Some 50,000 persons weave wool, and the others cut cork, manufacture cotton, linen, silk, leather, glass and porcelain, paper, and gold and silver filigree, &c. The mercantile marine comprises only 330 ships of little over 114,000 tons; most of the commerce is carried in British bottoms. The exports, principally wine (over a fourth of the whole, and sent mainly to Britain, also to Brazil), copper, salt, cottons, fish, oxen, fruits, vegetables, and wool, average 7 millions sterling in value annually. The value of all the exports sent to Great Britain every year ranges from 2½ to 4 millions sterling. From Great Britain Portugal imports chiefly cottons (2½ to 3½ millions sterling), woollens, coal, metals, machinery, and butter, to the annual value of ½ to ¾ million sterling. Her total imports, which also embrace bullion, flour and wheat, glass, live-stock, silk, timber, linen, &c., have reached the value of 15 millions. The revenue, about £14,000,000, is usually exceeded by the expenditure. The debt has reached near £180,000,000, and the finances are in an utterly deranged condition. There are some 1800 miles of railway. The army is about 30,000 men—on a war-footing, 100,000. The navy has five armoured cruisers and a number of third-class cruisers, besides torpedo-boats, &c.

The colonies of Portugal are as follows:

Africa—	Area in sq. m.	Pop.
Cape Verde Islands	1,480	150,000
Guinea	12,000	300,000
St Thomas and Prince's Island	360	45,000
Angola (Lunda, Benguela, Mossamedes, Loanda, and Congo)	484,800	5,000,000
East Africa	310,000	3,200,000
Asia—		
Goa (in India)	1,080	520,000
Diu, Daman, &c.	168	80,000
Timor, &c.	7,458	300,000
Macao (in China)	4	80,000
Total	817,350	9,675,000

Church (Roman Catholic) and state were separated in 1910. There are three ecclesiastical provinces presided over by the Cardinal Patriarch of Lisbon and two other archbishops, and fourteen bishops. The monasteries were dissolved in 1834. Compulsory education was enacted in 1844, but is very feebly enforced, and Portugal is far behind in public instruction. The one university at Coimbra (1300) is one of the oldest in Europe. Portugal was a constitutional monarchy till 1910, when a republic was established. The constitution of 1911 provides a Senate, elected by municipal councils, and a National Council, by direct suffrage.

The Portuguese are a mixed race—originally Iberian or Basque, with later Celtic admixture. Jewish and Arabic blood are strongly present in the centre, and African in the south. The Portuguese differ widely from their Spanish brethren, whom they regard with inveterate hatred and jealousy, mainly on account of their attempts to subvert the independence of Portugal. Like the rest of Iberia, Portugal (the southern part of which was known to the Romans as Lusitania, often taken as a poetical name for the whole country) was thoroughly Romanised after the conquest of the Carthaginians by the Romans in 138 B.C. Then the peninsula was overrun by the Visigoths, and next by the Saracens (see SPAIN). Northern Portugal fell under the influence of Castile; but under Alfonso I. (1143) Portugal became an independent kingdom, though the Saracens were not conquered in the south till 1250. Wars with Castile were frequent. Under John (1385–1433) began a close alliance between Portugal and England, and the Portuguese king John married John of Gaunt's daughter. With their son, Prince Henry the Navigator (died 1460), began the most brilliant era of over-sea enterprise and conquest, including the acquisition of Madeira, the Azores, and the doubling of the Cape of Good Hope (1486), the reaching of India by sea and settlements there (1497), and the discovery and occupation of Brazil (1500). In the 16th century Portugal was one of the most powerful monarchies of Europe, and most prosperous of commercial peoples; but its decline was swift, and Philip II. annexed Portugal to Spain for sixty years. English assistance secured the independence of the kingdom in 1640 (recognised by Spain in 1668); but the glory had departed. Portugal shared in the troubles of the French occupation and the Peninsular war; after Napoleon's defeat, the old family, which had taken refuge in Brazil, was restored; but the country was rent by intrigue, dissension, and civil war. The rush of the European powers to occupy central and southern Africa stirred Portugal to cling tenaciously to her once great colonial empire in Africa; but the march of events has given to Britain, Germany, France, and Belgium much that Portugal once claimed as hers.

See Crawfurd, *Portugal, Old and New* (1880); Salisbury, *Portugal and its People* (1893); Murray's *Handbook;* books by Koebel (1909) and Bell (1912–13); and the histories by M'Murdo (1888) and Morse Stephens (new ed. 1908).

Portugalete (*Por-too-ga-lay'tay*), a Spanish seaport in the province of Vizcaya, 8 miles NW. of Bilbao, with a remarkable swing-ferry; pop. 5000.

Portum'na, a Galway market-town, on the Shannon, 12 miles W. of Parsonstown; pop. 960.

Poscharevatz. See PASSAROWITZ.

Posen (Polish *Poznan*), a Prussian province, bounded by West Prussia, E. by Poland, S. by Silesia, and W. by Brandenburg; area, 11,178 sq. m. The navigable Warthe traverses it from E. to W.; the Vistula touches it on the NE. It belongs to the great plain of north Germany. Population, 2,100,000, nearly all Catholics, with 30,000 Jews. Over one-half are of Polish stock, and speak Polish and its dialects. The chief towns are Posen (the capital), Gnesen, Bromberg, Lissa, and Rawitsch. Posen formed part of Poland till 1772, when, at the first partition, the districts north of the Netze were given to Prussia; the rest was added in 1793. In 1807 Posen was included in the duchy of Warsaw; but in 1815 it was re-assigned to Prussia.

POSEN, the capital, and a fortress of the first rank (1827–53), is situated on the Warthe, 158 miles by rail E. of Berlin. It became the seat of a Christian bishop in 968, and it was the capital of the early Polish dukes. In the 16th century it was an important trading mart, but by 1600 had begun to decline. The fortifications have been strengthened by detached forts built in 1876–84. The cathedral, a Gothic pile dating from 1775, has attached to it the 'Golden Chapel' of Count Raczynski. Other buildings are the town-house (1508; restored 1913), the Raczynski Palace, the Dzialynski Palace, the archiepiscopal palace, and a provincial museum of antiquities. The manufactures are artificial manures, agricultural implements, furniture, carriages, &c.; and there are breweries, distilleries, and flour-mills. Pop. 156,700.

Posidonia. See PÆSTUM.

Posilip'o (from a villa here called *Pausilypon*, 'Sans-souci,' of the Emperor Augustus), a mountain on the north-west of Naples, close by the city. It is remarkable for the tunnel known as the Grotto of Posilipo, through which the road from Naples to Pozzuoli (anc. *Puteoli*) passes. The grotto is 20 to 80 feet high, 20 to 30 feet wide, and 755 yards long. It is traditionally ascribed to the reign of Augustus, and was long believed by the vulgar to have been made by the poet Virgil, whom they regarded as a great magician. Above the eastern outlet of the grotto is the so-called 'Tomb of Virgil;' at the base of the hill anciently stood the poet's villa. Two other tunnels penetrate the hill, one made at the command of Agrippa in 37 B.C.

Possession Island. See ANTARCTICA.

Possil Park, a northern suburb of Glasgow.

Potchefstroom (*Pot'chefstroam*), a town of the Transvaal, 105 miles SW. of Pretoria; pop. 12,500.

Potenza (*Potent'za;* anc. *Potentia*), a cathedral city of south Italy, in a valley of the Apennines, 103 miles E. by S. of Naples; pop. 16,700.

Poti (*Po'tee*), a seaport of Russian Caucasus, at the Rion's mouth, on the east shore of the Black Sea, 200 miles by rail W. of Tiflis. It ships maize, manganese, &c. Poti was seized by Russia in 1828. Pop. 10,000.

Potidæ'a, a Corinthian colony founded on the westernmost isthmus of the Chalcidice peninsula in ancient Macedonia.

Poto'mac, a river of the United States, formed by two branches which rise in the Alleghany Mountains in West Virginia, and unite 15 miles SE. of Cumberland, Maryland. Thence the river flows 400 miles SE., and falls into Chesapeake Bay, after forming an estuary nearly 100 miles long, and from 2½ to 7 wide. The largest ships can ascend to Washington, and the tide reaches Georgetown. A few miles above Washington the river forms a cataract 35 feet high; and between there and Westport it falls more than 1000 feet. The scenery here is wild and beautiful, especially where it breaks through the Blue Ridge at Harper's Ferry. The principal affluents are the Shenandoah, Cacapon, and Monacacy.

Potosí (*Pot-o-zee';* usually *Poto'zee*), capital of a Bolivian dep., and a famous, though decayed, mining-town, stands in a dreary, cold, and barren district, nearly 50 miles SW. of Chuquisaca. It is built on the side of the Cerro de Potosí (15,381 feet), at an elevation of 13,000 feet above the sea, and is thus one of the loftiest inhabited places on the globe. The public buildings include a handsome cathedral and a mint which employs 200 hands. The industry is limited to silver-mining. The Cerro is still rich in this ore, although the production has greatly fallen off. Potosí was founded in 1545, and in 1611 had 160,000 inhabitants. Its population does not now exceed 25,000.

Potsdam, chief town of the Prussian province of Brandenburg, and second residence town of the monarch, is situated on an island formed by the lake-like river Havel, a canal, and other waterways, 18 miles by rail SW. of Berlin. It is a handsome city, with broad streets, public gardens, and fine squares. The royal palace (1667–1701), in the park of which are statues of Frederick-William I., Alexander I. of Russia, and Generals Blücher, Gneisenau, Kleist, and Tauenzien; the town-house, a copy of that at Amsterdam; and the military orphanage are the principal public buildings. The Garrison Church, with a steeple 290 feet high, contains the tombs of Frederick-William I. and Frederick II.; and the Friedenskirche the tombs of Frederick-William IV. and the Emperor Frederick III. The Brandenburg Gate is a copy of Trajan's Arch at Rome. Near the town are more than half-a-dozen royal palaces, as Sans-Souci (1747), the favourite residence of Frederick the Great, surrounded by a splendid park and gardens, containing Rauch's monument to Queen Louisa; the palace of Friedrichskron, formerly the New Palace (1763–70); Charlottenhof (1826); the Marble Palace; and Babelsberg. Potsdam has an observatory, and a cadet and other military schools. Its manufactories produce sugar, chemicals, harness, silk, waxcloth, beer, &c. Flower-gardening, especially of violets, is a busy industry. Alexander von Humboldt was a native. Pop. 62,000.

Potteries, THE, a district in north Staffordshire, 9 miles long by 3 broad, the centre of the earthenware manufacture in England, includes the county borough of Stoke-on-Trent, Newcastle-under-Lyme, &c.

Potton, a market-town of Bedfordshire, 11 miles E. of Bedford; pop. of parish, 2000.

Pottstown, a borough of Pennsylvania, on the Schuylkill River, at the mouth of Manatawny Creek, 40 miles NW. of Philadelphia. It contains iron-foundries, blast-furnaces, rolling-mills, car-works, &c. Pop. 16,000.

Pottsville, capital of Schuylkill county, Pennsylvania, is built on the side of steep hills, on the Schuylkill River, at the entrance of Norwegian Creek, 93 miles NW. of Philadelphia. In the midst of a rich coal and iron region it has iron-furnaces, foundries, rolling-mills, machine-shops, sawmills, &c. Pop. 20,200.

Poughkeepsie (*Po-kip'si*), capital of Dutchess county, New York, on the east bank of the Hudson River, 73 miles N. of New York City, is finely situated on a tableland, 200 feet above the river. The Hudson is here crossed by a steam-ferry, and spanned by a railroad bridge (1888) of masonry, steel, and iron, 3094 feet long, or, including the approaching viaducts, nearly 7100 feet. Poughkeepsie is the largest town between New York and Albany; its manufactures include machinery, iron-ware, silk, boots and shoes, clothing, beer, &c. Two miles N. is the state hospital for the insane, which cost $750,000. Vassar College (1865), for the higher education of women, is just beyond the eastern city limit. Poughkeepsie was settled by the Dutch about 1680; in 1778 it was the state capital. Population, 30,000,

Poulton le Fylde, a Lancashire town, near the Wyre, 5 miles S. of Fleetwood; pop. 2400.

Poverty Bay. See GISBORNE.

Powerscourt, a Wicklow parish, 4½ miles SW. of Bray, on the Dargle, in whose glen is a waterfall of 300 feet.

Powis Castle. See WELSHPOOL.

Pozsony. See PRESBURG.

Pozzuoli (*Potz-oo-ol'ee*), a city of Italy, on the Bay of Naples, 7 miles W. of Naples by tramway, is interesting from its classic memorials—the cathedral (once the Temple of Augustus), the Serapeum, and the amphitheatre in which Nero fought as a gladiator, which could seat 30,000 spectators. There are also remains of temples to Diana and Neptune, and of the ancient harbour. Behind the town is the Solfatara, a half-extinct volcano, from which issue currents of hot sulphureous gases, and springs of saline water. In the neighbourhood are Avernus (q.v.); the royal hunting-lodge Astoni; the Lucrine lake, celebrated for its oysters; the ruins of Baiæ and Cumæ; and the Lake of Agnano, with the famous Grotta del Cane. A little west is a branch of the famous Armstrong works at Elswick, near Newcastle, established here (1888–90) with the support of the Italian government. Pop. 28,000. The ancient *Puteoli* was made a Roman colony in 194 B.C., and subsequently became virtually the port of Rome, and the first emporium of commerce in Italy. It was destroyed by Alaric, Genseric, and Totila, and, though rebuilt by Byzantine Greeks, it was sacked by Saracens (10th century) and Turks (1550), and ruined by earthquakes (1198 and 1538). St Paul landed there.

Præneste. See PALESTRINA.

Prague (Ger. *Prag;* Czech *Praha*), the capital of Bohemia, is situated at the base and on the slope of the hills which skirt both sides of the isleted Moldau, 217 miles by rail NNW. of Vienna and 118 SSE. of Dresden. It offers a highly picturesque appearance from the beauty of its site, and the numerous lofty towers (more than seventy in number) which rise above the palaces, public buildings, and bridges of the city. The fortifications have been demolished since 1866. The royal Burg, on the Hradschin (240 feet), the ancient residence of the Dukes of Bohemia, dates mainly now from the 16th and 17th centuries, and has 440 rooms. The neighbouring cathedral of St Vitus (1344) is still unfinished, though building was resumed in 1867. Here are the splendid royal mausoleum (1589) and the shrine (1736) of St John of Nepomuk, containing 1½ ton of silver. Of forty-seven other Catholic churches the chief are the domed Jesuit church of St Nicolas, and the Teyn church (1407; the old Hussite church), with Tycho Brahé's grave, and its marble statues of the Slavonic martyrs, Cyril and Methodius. Of five bridges and two railway viaducts the most striking is the Karlsbrücke (1357–1503, temporarily damaged by flood in 1890), 543 yards long, with gate-towers at either end, and statues of John of Nepomuk and other saints. Other noteworthy objects are the town-hall (1381–1884), the Pulverturm (1475), the new Czech Theatre (1883), the old Jewish graveyard, the Theresa Institution for Ladies, the vast Czerni Palace (now used as barracks), the Picture-gallery, and the Premonstratensian monastery of Strahow. Prague has numerous public gardens and walks, with several noble parks close by. The suburb of Karolinenthal, which is traversed by the great viaduct of the railway, and is of modern growth, has barracks, and manufacturing establishments; farther north is the great botanical garden. The university, founded in 1348, had 10,000 students at the beginning of the 15th century; but subsequently it had a long period of decay. It received a new constitution in 1881, having now two co-ordinate sides or sections, one German and one Czech, with respectively 150 and 200 teachers, and 1750 and 4200 students. It possesses a library of 400,000 volumes and 400 manuscripts, a fine observatory, a botanical garden, &c. The manufactures include machinery, chemicals, leather, cotton, linen, gloves, beer, spirits, &c. Pop. with suburbs (1880) 293,822; (1900) 385,240; of the town proper (1910) 224,721, of whom four-fifths were Czechs, 2 per cent. Protestants, and 7 per cent. Jews.

Prah, a river running between Ashanti and the Gold Coast, and then through the latter to the sea, 30 miles W. of Cape Coast Castle.

Praia Grande. See RIO DE JANEIRO.

Prato (*Prah'to*), a walled town of Italy, 11 miles NW. of Florence. It has a cathedral with frescoes by Filippo Lippi. Pop. 25,000.

Prawle Point, the S. extremity of Devon.

Prenzlau (*Prentz'low*), an agricultural town of Prussia, at the N. end of Lake Ucker, 67 miles by rail NNE. of Berlin. Pop. 21,400.

Presburg (Ger. *Pressburg;* Hung. *Pozsony*), a town of Hungary, on the Danube's left bank, 40 miles by rail E. by S. of Vienna. It is backed by the spurs of the Little Carpathians, and is a pleasant town. Its principal buildings are the Gothic cathedral (13th c.), in which the kings of Hungary used to be crowned; the church of the Franciscans (1290–97); the town-house (1288); and the parliament house, in which the Hungarian representatives met until 1848. The royal castle (1645) was reduced to ruin by fire in 1811. The manufactures are beer, dynamite, wire, starch, spirits, confectionery, biscuits, &c. The population is over 78,000. Presburg grew to importance during the 11th and 12th centuries. From 1541 (when the Turks seized Buda) down to 1784 it was the capital of Hungary. It was taken by Bethlen Gabor in 1619, by the Austrians in 1621, and was bombarded by Davout in 1809. Here in 1805 Napoleon concluded a treaty with the emperor after Austerlitz.

Prescot, a manufacturing town of Lancashire, 8 miles E. by N. of Liverpool. It has manufactures (introduced from Yorkshire in 1730; and revived since 1892) of watch-movements, watch-tools, small files, &c., and there are potteries near it. Prescot was the birthplace of John Kemble. Pop. 8100.

Prescott, a town of Arizona, lies 6000 feet above sea-level, 74 miles by a branch-line S. of Prescott Junction, which is on the Atlantic and Pacific Railroad, 595 miles SW. of Denver. Gold and silver are found in the neighbourhood. It was superseded by Phœnix as the state capital in 1891. Pop. 5000.

Pressburg. See PRESBURG.

Prestatyn, a Flintshire urban district, 4 miles E. of Rhyl; pop. 2000.

Presteigne (*Pres-teen'*), a Radnorshire (q.v.)

urban district, on the Lugg, 6½ miles ENE. of New Radnor; pop. 1100.

Preston, an important manufacturing town of Lancashire, a municipal, parliamentary, and county borough, at the head of the estuary of the Ribble, 14 miles from the Irish Sea, 28 NNE. of Liverpool, 31 NW. of Manchester, and 209 NNW. of London. Occupying an eminence 120 feet above the river, and built mostly of brick, it is on the whole well laid out, and is surrounded with pleasing scenery. The town-hall, built in 1862–67 from designs by Sir G. G. Scott at a cost of £80,000, is a French Gothic pile, with a clock-tower and spire 195 feet high. In 1882 were laid the foundation-stones of the Lancashire county hall and of the Harris free library and museum, to the latter of which in 1883 Mr R. Newsham bequeathed pictures and art-treasures worth £70,000. The places of worship are all modern, for even the parish church has been rebuilt. St Walburge's (Roman Catholic, 1850–66), by Hansom of cab celebrity, has a spire 306 feet high, the loftiest built in England since the Reformation, which amply redeems 'proud Preston' from its old 'no-steeple' reproach. Other edifices are the grammar-school (1550; rebuilt 1841), the corn exchange and market-house (1824), public baths (1851), a covered market (1870), militia barracks (1856), the infirmary (1869), &c. Three large public parks were laid out in 1867—the Miller and Avenham parks, and the former unsightly 'Moor' of 100 acres to the north of the town. In the first a statue was erected in 1873 of the fourteenth Earl of Derby; in Winckley Square is a monument to Sir Robert Peel. Preston was constituted an independent port in 1843; and great improvements have been effected at a cost of over a million under the Act of 1883, these including the deepening of the channel so as to admit vessels of 1000 tons, the construction of a dock of 40 acres (opened by the Duke of Edinburgh, 25th June 1892), the erection of warehouses, &c. Arkwright, who was born here in 1732, in 1768 set up here his famous spinning-frame; and Preston now is one of the principal seats of the cotton industry, which gradually superseded the linen manufacture. There are also iron and brass foundries, iron shipbuilding yards, engineering and machine shops, steam-boiler works, rope-walks, &c. A guild-merchant festival, first clearly heard of in 1397, has been held every twenty years since 1562—the last on 1st September 1902. Preston, the first of whose royal charters was granted by Henry VI., returns two members to parliament. The borough boundary was extended in 1885. Pop. (1811) 17,115; (1841) 50,073; (1881) 100,262; (1911) 123,691—117,088 within the municipal borough.

Preston arose whilst ancient *Coccium* or Ribchester, higher up the Ribble, decayed. In Athelstan's reign Amounderness, the hundred in which it is situated, was granted to the cathedral church of York; hence its chief town came to be known as Preston or 'priests' town.' Near Preston, in 1648, Cromwell routed the royalists; and Preston figures in both the Jacobite rebellions of 1715 and 1745. For Forster's little army surrendered here; and Prince Charles Edward occupied the town on both his march to and his retreat from Derby. In 1832 Joseph Livesey of Preston and six others here signed a pledge of total abstinence—the first ever taken in England. See works by Whittle (2 vols. 1821–37), Dobson (four, 1856–62), Hardwick (1857), Abram (1882), and T. C. Smith (1891).

Prestonpans, a coast-town of Haddingtonshire, 8 miles E. of Edinburgh. Its salt-pans flourished from the 12th century till 1825; now brewing and mining are the principal industries. Pop. 2000. To the SE., on 21st September 1745, was fought the battle of Prestonpans, Preston, or Gladsmuir, when in a five minutes' rush Prince Charles Edward's 2500 Highlanders routed 2300 disciplined soldiers under Cope and Gardiner.

Prestwich, a cotton town of Lancashire, 4 miles NNW. of Manchester, has a Gothic church (13th century; restored in 1861), many fine villas, and a large lunatic asylum; pop. 17,200.

Prestwick, a watering-place with famous golf-links, 2¾ miles N. by E. of Ayr; pop. 5000.

Pretoria, capital of the Transvaal Province, and administrative capital of the Union of South Africa, stands 4000 feet above the sea, 35 miles NE. of Johannesburg by rail, and is terminus of the line to Delagoa Bay. Founded in 1855, it was named after the Boer leader Andries Pretorius; and it was occupied by Roberts in 1900. It contains the Transvaal Museum with a zoological garden. Pop. 50,000.

Prev′eza, or PREVISA, a fortified seaport, won by Greece from Turkey (1912–13), stands on the north side of the entrance to the Gulf of Arta. The Venetians held it from 1683 to 1797. Pop. 7000.

Pribram, a mining-town of Bohemia, 48 miles by rail SSW. of Prague, employs 6000 men in the royal lead and silver mines, and various manufactures; pop. 15,000.

Pribylof Islands. See ALASKA.

Priego (*Pree-ay′go*), a town of Spain, 46 miles SE. of Cordova; pop. 20,000.

Priene (*Prī-ee′nee*), anciently one of the 'twelve' cities of Ionia, stood a little NW. of the mouth of the Mæander in Caria.

Pilu′ki, a town of Russia, 87 miles E. by N. of Kieff; pop. 20,000.

Primrose Hill, in the north-west of London, beside Regent's Park.

Prince Albert, a growing city of Saskatchewan, on the North Saskatchewan River, with lumber and other industries; pop. 6300.

Prince Edward Island, since 1873 a province of Canada, in the Gulf of St Lawrence, cut off by Northumberland Strait; area, 2184 sq. m. Pop. (1871) 94,021; (1901) 103,259; (1911) 93,728. It was discovered by the Cabots, but annexed by France; still, little was done towards its settlement until 1715, when its fertility attracted some Acadians from Cape Breton. It was finally ceded to Britain in 1763. At first a part of Nova Scotia, in 1768 it was made a separate province. The pop. in 1763 was 4000; but emigration set in, and the Acadians were expelled, so that in 1768 it had sunk to 1300. Until 1799 called St John's Island, it was then renamed Prince Edward Island, in compliment to the Duke of Kent, who paid it a visit. The local government passed a measure in 1875 giving them powers to buy out the landlords, most of them absentees, and to sell the land thus acquired (843,981 acres) to the tenants or others on easy terms. The surface is undulating, but never exceeds 500 feet; the soil is very fertile. All kinds of cereals, roots, and vegetables are raised. Oats and potatoes from the island enjoy a special reputation, as do also its sheep and horses. A natural manure, called mussel mud, and made of decayed oyster, clam, and mussel shells, is found on the coasts. Coal is known to exist, but not worked. The climate is milder than that of the mainland, and freer from fogs. Prince Edward Island is the best fishing-station in the Gulf of St Lawrence, but the habits of the inhabitants are so decidedly agricultural that the fisheries have been neglected. Mackerel, lobsters, herring, cod, hake, and oysters are taken, besides salmon, bass, shad, halibut, and trout. The coastline is a succession of bays and headlands; the largest bays are Egmont, Hillsborough, and Cardigan, which by penetrating into the land from opposite directions divide the island into three distinct peninsulas. The rivers are short but the province is well watered. Charlottetown is the capital, and has a pop. of 11,000. Other towns are Summerside, Georgetown, and Souris. A railway traverses the island. Free education has prevailed since 1853.

Prince of Wales Island. See PENANG.

Prince Rupert, a port of British Columbia, 550 miles NW. of Vancouver, is the terminus of the Grand Trunk Pacific Railway, and has great harbour-works; pop. 4000.

Princes Islands (anc. *Demonnesoi*), a beautiful group of nine islets near the eastern end of the Sea of Marmora, 10 miles SE. of Constantinople, the largest being called Prinkipo.

Princes Risborough, a town of Bucks, under the Chilterns, 7½ miles S. by W. of Aylesbury. It had a moated palace of the Black Prince. Pop. of parish, 2300.

Princeton, (1) capital of Gibson county, Indiana, 161 miles by rail E. of St Louis. It has woollen manufactures. Pop. 7000.—(2) A pleasant borough of New Jersey, 50 miles SW. of New York; pop. 8000. On January 3, 1777, the British were defeated here by Washington; here, too, the Continental Congress sat in 1783; and from Princeton Washington dated his farewell address to the army. Princeton, however, is chiefly celebrated as the seat of the College of New Jersey, better known as Princeton College, and since 1896 as Princeton University. Founded at Newark in 1746, it was in 1756 transferred to Princeton, on the erection of a hall named Nassau Hall in honour of William III. The university now has over 160 instructors and about 1400 students, with fine museums and laboratories, two observatories, and libraries with 300,000 volumes. Among its presidents have been Jonathan Edwards and Dr James M'Cosh.

Prince Town. See DARTMOOR.

Prior Park. See BATH.

Prisrend, a town of Servia, 72 miles E. by N. of Scutari, Turkish till 1912–13; pop. 20,000.

Pris'tina, a town of Servia, 59 miles by rail N. of Usküb, Turkish till 1912–13; pop. 18,000.

Procida (*Protch'ida*), an islet of Italy, between the island of Ischia and the mainland (Cape Miseno), 15 miles SW. of Naples; area, 1½ sq. m.; pop. 15,000. On its shores is the city of the same name, with a harbour, a royal palace, a state-prison, and a marine school.

Progres'o, a seaport of Yucatan, 25 miles N. of Merida. It stands on an open bay.

Prome, a town of Burma, on the Irawadi, 65 miles NW. of Rangoon by rail; pop. 30,000.

Prossnitz, a town of Moravia, 13 miles by rail SW. of Olmütz; pop. 30,000.

Provence (*Provon*^{g}*ss*), formerly a maritime province of France, was bounded on the S. by the Mediterranean, and comprised the modern deps. of Bouches du Rhône, Var, Basses-Alpes, and parts of Alpes Maritimes and Vaucluse. It included a portion of the Roman province of Gaul generally called simply *Provincia* ('the Province'), whence it derived its name; and it was united to France in 1486. The Provençal tongue was spoken over a much larger area. See Baring-Gould's *In Troubadour Land* (1891).

Providence, seaport and, since 1900, sole capital of the state of Rhode Island, is situated at the head of navigation, on an arm of Narragansett Bay known as Providence River, 35 miles from the ocean and 44 miles by rail SSW. of Boston. It covers a wide area on both sides of the river, which, above its two bridges, expands into a cove, a mile in circuit, on the borders of which is a handsome park, shaded with noble elms. It is a city of large commerce, manufactures, and wealth, abounding with beautiful villas and gardens. Founded before the conventional type of American cities had been discovered, its streets are pleasantly irregular, and the site singularly uneven, rising in one place to 204 feet above high-water, and in one ward, much of which is still in farms, there are numerous hills and valleys. Among the many notable public buildings and institutions of Providence are a city hall, of granite, which cost upwards of $1,000,000, and has facing it the state's soldiers' monument; the state-house; the custom-house and post-office; the Athenæum, and the buildings of the Rhode Island Historical Society; the arcade and the Butler Exchange; a great number of churches, schools, and libraries, hospitals and asylums, including a noble charity known as the Dexter Asylum for the Poor; the Friends' Boarding-school (popularly, 'the Quaker College'); and the Brown Baptist University (1764), with 900 students. Two small rivers afford abundant water-power; and the chief manufactures are silverware, jewellery, tools, stoves, engines, locomotives, cottons and woollens, laces, wicks, &c. Providence was settled in 1636, and till 1900 was only joint capital with Newport. Pop. (1870) 68,904; (1900) 175,597; (1910) 224,326.

Provins (*Provan*^{g}*'*), a town of France, 59 miles by rail SE. of Paris; pop. 8000.

Provo City, capital of Utah county, Utah, on the Provo River, between Utah Lake and the Wahsatch Mountains, 46 miles by rail SSE. of Salt Lake City; pop. 9000.

Prussia (Ger. *Preussen*), by far the most important state in the German empire, is a kingdom embracing nearly the whole of northern Germany, and owning also Hohenzollern (q.v.) and thirteen other detached territories lying within the bounds of other German states. The area is 136,000 sq. m. (one-tenth larger than the United Kingdom, or half the size of Texas), with (1910) 40,165,219 inhabitants—nearly two-thirds of the entire German empire, with three-fifths of the population. There are fourteen provinces—East and West Prussia, Berlin (city), Brandenburg, Pomerania, Posen, Silesia, Saxony, Sleswick-Holstein, Hanover, Westphalia, Hesse-Nassau, Rhenish Prussia, and Hohenzollern. About one-fifth of the present area has been acquired since 1853, the largest gains after the victorious war of 1866. The Prussia of Frederick the Great embraced only 47,800 sq. m. when he ascended the throne, and 75,000 when he died. Pop. (1819) 10,981,934; (1864) 19,254,649; (1871) 24,689,252.

More than two-thirds of Prussia belongs to the north European plain, already described at GERMANY, while less than a third, chiefly in the south-west, is hilly or mountainous. The Schneekoppe (5250 feet) in the Reisengebirge is the loftiest summit. The western and south-western parts of the country, comprising Rhenish Prussia, Westphalia, and Hesse-Nassau, cut off by the Teutoburgerwald, the Weser Hills, the Harz, &c., from the sandy and heathy wastes of the north, are quite distinct in their physical character from the rest of Prussia. They are divided by the Rhine into two portions. The soil is generally poor in these districts also, though they possess special sources of wealth in their iron and coal mines. The level country between the Rhine and the Maas, bordering the Eifel, is extremely fertile; and Hesse-Cassel is particularly so. Nassau is specially famous for its Rhine wines. The northern plain is watered by five large rivers—the Niemen, Vistula, Oder, Elbe, and Weser—all of which rise beyond the borders of the kingdom, and the Pregel, Eider, and Ems, which are exclusively Prussian. In the west the chief river is the Rhine. About 12,000,000 persons are engaged in agriculture. Of the total area, 50 per cent. is occupied by arable land, 9½ per cent. by meadows, and 11 per cent. by pasturage. The forest-lands, chiefly in East Prussia, Posen, Upper Silesia, Westphalia, Southern Hanover, and Hesse-Nassau, occupy 10,000,000 acres. The mineral products include, coal, iron, lead, zinc, copper, cobalt, antimony, manganese, arsenic, sulphur, alum, nickel, black lead, baryta, gypsum, slate, lime, freestone, salt, amber, agate, jasper, onyx, &c. Prussia yields about one-half of the annual zinc production of the world; and of the total output of coal in Germany, Prussia produces 93 per cent. The chief coalfields are in Silesia, Westphalia, and Rhenish Prussia, which are at the same time the chief industrial provinces of the kingdom. The region of the Harz in Hanover is also famous for its mining industries. All metals, salt, precious stones, and amber found along the Prussian coast from Danzig to Memel belong to the crown. Prussia has upwards of 100 mineral springs, of which the most noted are those of Aix-la-Chapelle, Ems, Schwalbach, Wiesbaden, Schlangenbad, and Selters. The principal manufactures are linens and cottons, also silk, wool, mixed cotton and linen fabrics. Other great industries are the preparation and manufacture of iron, steel (the steel and gun works of Krupp, at Essen, being world-famous), and other metallic wares, paper, leather, soap, oil, cigars, tobacco, beer, chicory, starch, beetroot, gunpowder, and glass. Berlin and Elberfeld rank as the two most important centres of manufacture on the Continent. The commerce of Prussia is materially facilitated by her central European position, and the network of river and canal navigation, which makes her territories the connecting medium between several of the great European states, and which, with 30,000 miles of railway, 50,500 miles of public roads, and a coastline of 1000 miles, gives her a free outlet to the rest of the world. About seven-eighths of the population of Prussia are Germans. Of the Slavonic tribes the most numerous are Poles, numbering 2½ millions. In Brandenburg and Silesia there are about 85,000 Wends; in East Prussia upwards of 150,000 Lithuanians; the western part of the kingdom has 10,000 Walloons, using the French language; intermixed in its generally German population Silesia has 55,000 Czechs or Bohemians; Sleswick-Holstein, 140,000 Danes—making in all about 3 millions who do not use the German language, or who employ it only as secondary to their native tongues. The dominant religion is Protestantism, and since 1817 the Lutheran and Reformed Churches have been united under the head of one common Evangelical Church. The Protestants are about 62 per cent. of the population, Roman Catholics about 37, and Jews over 1. Education is widely diffused, thorough, and compulsory, between the ages of six and fourteen. Prussia has ten universities—viz. Königsberg, Berlin, Greifswald, Breslau, Halle, Göttingen, Münster, Bonn, Kiel, and Marburg, which number above 1800 professors and teachers and 30,000 students; see GERMANY. In addition to the libraries of the several universities there is the Royal Library at Berlin, with 1,000,000 volumes and rich in manuscripts. Since 1848 Prussia has a Herrenhaus, or House of Lords, comprising princes, the heads of the nobility, some life peers, and a few representatives of provinces, large towns, universities, &c.; and a Chamber of Deputies of 443 indirectly elected members. The monarchy is hereditary in the male line, and is now conjoined with the dignity of German emperor. The sovereign and royal family must profess the evangelical confession of faith. In the year 1913 the budget-estimate of the receipts was 4,595,726,227 marks, just balanced by the expenditure. The total national debt is about £500,000,000. The Prussian contingent is the most important part of the German army, which is all under the command of the emperor-king. For the army, navy, &c., see GERMANY.

The Baltic lands now forming an important part of Prussia, were originally inhabited by the Slavonic Prussians, akin to the Lithuanians, who resolutely resisted all attempts of the dukes of Poland to christianise them, and were only converted by the warlike measures of the Teutonic Knights, who in 1230–83 became masters of the region, and gradually peopled it with German colonists. The knights, often at war with Poland and Lithuania, declined in power in the 14th and 15th centuries, and in 1466 had to cede West Prussia to Poland, holding the rest as fiefs of the Polish crown. In 1511 the knights elected a Hohenzollern prince as their head, who ultimately became Duke of Prussia. In 1618 the inheritance fell to another branch of the Hohenzollern house, which had since 1319 been margraves and ultimately electors of Brandenburg. Pomerania and parts of Franconia and other districts had already made the electorate a powerful state, which, however, suffered terribly in the Thirty Years' War. The 'Great Elector,' Frederick William, succeeded after 1640 in restoring prosperity, and made the electorate a European state, which in 1703 was recognised as a kingdom. Frederick the Great (1740–86) greatly aggrandised the state by his wars and administration, obtaining all West Prussia at the first partition of Poland. The second and third partitions were carried out under Frederick William II. (1786–97). Frederick William III. (1790–1840) had the difficult task of re-organising Prussia after the misery and ruin of the French occupation; after Waterloo Prussia regained almost all she had lost by the humiliating peace of Tilsit in 1807. The troubles of 1848 did not affect the area, which was added to under William I. and Bismarck by the incorporation of Hanover, Hesse-Cassel, Nassau, Frankfort, part of Hesse-Darmstadt, and Sleswick-Holstein, after the Austro-Prussian war of 1866, another result of which was that Austria ceased to be any part of Germany, and Prussia became the predominant German state. The Franco-German war of 1870–71 gave Prussia still greater predominance and the imperial crown. See books quoted at Germany, and the history by Tuttle (Boston, 1888).

Pruth (*Proot*), a left-hand affluent of the Danube, rises in Galicia, on the NE. side of the Carpathian Mountains, and flows 520 miles eastward past Kolomea and Czernowitz ; from where it leaves Austrian territory to its mouth in the Danube at Reni, 13 miles below Galatz, it forms the boundary between Russian Bessarabia and Roumania. It is navigable from near Jassy.

Przemysl, a town of Austrian Galicia, on an affluent of the Vistula, 61 miles W. of Lemberg by rail. It manufactures machinery, spirits, wooden wares, &c. Since 1874 it has been strongly fortified. Pop. 54,600, about one-third Jews.

Pskov, a decayed town of Russia, 9 miles SE. of Lake Pskov (50 miles long by 13 broad), 160 miles SSW. of St Petersburg. During the 14th and 15th centuries it was a Hanse town, with 60,000 inhabitants ; in 1510 it was annexed to Moscow. Pop. 35,000.—The *government* has an area of 17,000 sq. m. and a pop. of 1,400,000.

Pudsey, a municipal borough (1900) of the West Riding of Yorkshire, 3 miles E. of Bradford, with great manufactures ; pop. 14,000.

Puebla (*Pweb'la*), the third city of Mexico, capital of a state of the same name, stands on a fruitful plain, 7120 feet above sea-level, and 68 miles (by rail 116) SE. of the city of Mexico. In the vicinity are Orizaba, Popocatepetl, and other lofty mountains. It was founded in 1531, and is one of the handsomest towns in the republic, with theological, medical, art, and normal schools, a museum of antiquities (1728), two large libraries, hospitals, &c. On the great square stands the cathedral, a Doric building with two towers. The chief manufactures are cottons, paper, iron, glass, porcelain, leather. Pop. 100,000. Puebla was besieged for two months by the French, and then taken by storm, 17th May 1863.

Pueblo (*Pweb'lo*), capital of Pueblo county, Colorado, on the Arkansas River, at the mouth of Fountain Creek, 117 miles by rail S. by E. of Denver. Through its iron and steel industry it rapidly became the second city of the state and an important railway centre ; immense quantities of raw materials and fuel abound in the vicinity. In 1890 a Mineral Palace was erected to hold a permanent exhibit of Colorado's mineral productions—from stone and coal to pure gold. Pop., in 1880 only 3250, is now 44,400.

Puente Nacional (*Pwentey Nasional'*), a town of Colombia, in the north-east, on the Rio Suarez. Coal and iron are mined. Pop. 12,000.

Puerto Bello. See Portobelo.

Puerto Cabello (*Pwerto Cavel'yo*), a seaport of Venezuela, 78 miles W. from Carácas. It stands on a long, low, narrow peninsula on the Caribbean Sea, and has a safe, roomy, and fortified harbour. It is the port of Valencia, 34 miles distant by rail. Pop. 15,000.

Puerto Cortez, a port of Honduras (q.v.).

Puerto de Santa Maria, a seaport of Spain, at the mouth of the Guadalete, on the Bay of Cadiz, 22 miles by rail (all round the bay) NE. of Cadiz and 8 SW. of Xeres. It is a great export harbour for sherry, and makes silk, soap, hats, leather, spirits, beer, &c. Pop. 21,000.

Puerto Méjico. See Coatzacoalcos.

Puerto Plata (*Pwerto Plah'ta*), the chief port of the Dominican Republic, on the north coast of Hayti. It has an open roadstead. Pop. 16,000.

Puerto Principé (*Pwerto Preen'seepay*), an inland town in the east of Cuba, 40 miles SW. of its port, Nuevitas, by rail. Pop. 66,500.

Puerto Rico. See Porto Rico.

Puget Sound, a large inland sea in the northwest of Washington, U.S., communicating with the Pacific by the Admiralty Inlet and Juan de Fuca Strait. It is divided into several branches, penetrates far into the interior, and is everywhere navigable for the largest vessels. Great quantities of pine and fir are shipped.

Pulborough, a Sussex market-town, on the Arun, 9 miles N. by E. of Arundel. Pop. 2000.

Pulicat, a town of India, 20 miles N. of Madras, the first settlement of the Dutch in India ; pop. 6000. It stands on an island in a large sea-inlet called the Lake of Pulicat.

Pulkowa (*Poolko'va*), a village of Russia, 10 miles S. of the site of a magnificent observatory (59° 46′ 18″ N. lat. and 30° 19′ 40″ E. long.), the 'St Petersburg observatory,' built by the Czar Nicholas in 1838–39. In 1882 one of the largest telescopes in the world was erected here.

Pulo-Penang. See Penang.

Pulteneytown. See Wick.

Pultowa (*Poolto'va*), or Polta'va, a town of Russia, on a tributary of the Dnieper, 88 miles by rail SW. of Kharkoff, and 449 NE. of Odessa. A bishop's seat, it manufactures tobacco and leather, and has four great annual fairs. Here Charles XII. was defeated by Peter the Great on 27th June 1709. Pop. 65,000.

Pultusk (*Pool-toosk'*), a town of Poland, 32 miles N. of Warsaw. Here Charles XII. of Sweden defeated the Saxons in 1703, and here in 1806 the French defeated the Russians. The town was destroyed by fire in 1875. Pop. 20,000.

Punchestown, a racecourse close to Naas, 20 miles SW. of Dublin by rail.

Pungwe, a river of Portuguese East Africa, forming the principal waterway to Manicaland and Mashonaland ; its mouth is situated some 25 miles NE. of Sofala and 130 SW. of the Zambesi delta. After some diplomatic difficulties between Britain and Portugal, it was agreed (1891) by Portugal that British commerce should have unimpeded access by this route to the British sphere in the interior, the Pungwe being made freely navigable for British vessels. Beira, at its mouth, is the terminus of a railway to Salisbury and Bulawayo.

Punjab, or Panjab (*pánj-ab*, 'five rivers ;' the *Pentapotamia* of the Greeks), a province in the NW. of India, bordering on Cashmere, is watered by the Indus and its five great affluents—the Jhelum, Chenab, Ravi, Beas, and Sutlej. The formation in 1901 of the North-west Frontier Province (incorporating almost all the Punjab territory lying beyond the Indus), and the separation of Delhi as a chief commissionership in 1912, left the Punjab an area of 135,773 sq. m. and a pop. (1911) of 23,795,922—4,212,794 being in the numerous native states. The capital is Lahore. Amritsar, next in size, is the religious capital of the Sikhs. The northern parts are traversed by spurs from the Himalayas. In the south is the Salt Range, 2000 to 5000 feet high, between the Indus and the Jhelum. The Punjab was visited by a destructive earthquake on the 4th April 1905. The climate in the plains is most oppressively hot and dry in summer, reaching in May 87·4° to 116·6° F. in the shade ; but is cool, and sometimes frosty, in winter. Little rain falls except along the base of the Himalayas. Great irrigation works were partly in use in 1912. Trees are few and small, and cow-dung is used as fuel. Wheat of excellent quality is produced, and indigo, sugar, cotton, tobacco, opium, tea, rice, barley, millet, maize, and numerous vegetables and fruits are grown. The manufacturing industry—cottons, wood-work, iron, leather, gold and silver lace, silk, and shawls—is carried on for the most part in the great towns. Punjab exports indigo, grain, salt, metals, spices, tea, tobacco, manufactured cottons, hides, and leather to Kabul, Cashmere, Turkestan, and Tibet; and imports dyes, goats' wool, raw silk, fruits, ghee, horses, furs, timber, and shawl cloth. The inhabitants are chiefly Jats, Sikhs, Rajputs, and Pathans. Of the whole population, 51 per cent. were Mohammedans, 34 Hindus, and 5·5 Sikhs.

Punta Arenas (*Poonta Aray'nas*), (1) the chief port of Costa Rica on the Pacific, stands on a 'sandy point' jutting into the Gulf of Nicoya, 14 miles by rail WSW. of Esparza; pop. 5000.—(2) A town in Chilian Patagonia (q.v.).

Purbeck, Isle of, a peninsular district of Dorsetshire, 12 miles long and 5 to 9 broad, is bounded N. by the river Frome and Poole Harbour, E. and S. by the English Channel, and W. by the little stream of Luckford Lake, which runs from Lulworth Park to the Frome. The coast is bold and precipitous, with St Albans Head, 360 feet high; inland a range of chalk downs curves east and west, attaining a maximum height of 655 feet. The Purbeck Marble is a fresh-water limestone, composed almost wholly of shells. Nearly a hundred quarries are worked; the quarrymen still form a curious kind of trade's guild. Of old the 'isle' was a royal deer-forest. Swanage and Corfe Castle are the chief places. See works by Robinson (1882), and J. Braye (1890).

Purfleet, a village of Essex, on the north bank of the Thames, 15 miles by rail E. by S. of London and 8 miles E. of Woolwich, contains government powder-magazines, built in 1781.

Puri. See Juggernaut.

Purley, a residential district in Surrey, 2½ miles S. of Croydon. Purley House was the property of the regicide Bradshaw, and the residence afterwards of Horne Tooke.

Purmerend, a town of Holland, 10 miles N. of Amsterdam; pop. 6000.

Purniah (*Poor'ne-ah*), a town of Bihar, 230 miles NNW. of Calcutta; pop. 15,000.

Pusey, a Berks parish, 5 miles E. by N. of Faringdon Dr Pusey was born here.

Puteaux (*Pü-to'*), a town 2 miles from the western boundary of Paris, on the Seine's left bank, opposite the Bois de Boulogne; pop. 32,000.

Pute'oli. See Pozzuoli.

Putnam, a town of Connecticut, on the Quinnebang River, 56 miles ENE. of Hartford; pop. 6600.

Putney, a ward of Wandsworth borough, 6 miles WSW. of Waterloo, on the south side of the tidal Thames, which, here nearly 300 yards broad, is crossed by a new granite bridge (1884–86), leading to Fulham. It is a great rowing place, the starting-point of the Oxford and Cambridge boat-race; and from its ready access to town, the river, Putney Heath, and Wimbledon Common, has grown rapidly of recent years. The parish church, with a 15th-century tower, was mainly rebuilt in 1836; in the churchyard is Toland's grave. Putney is the birthplace of Thomas Cromwell and Gibbon, and the deathplace of Pitt, Fuseli, Leigh Hunt, and Swinburne. From its old bridge Mary Wollstonecraft tried to drown herself; and on its Heath Pitt and Tierney, Castlereagh and Canning, fought duels. Pop. 30,000.

Putrid Sea. See Azov.

Putumayo (*Poo-too-mī'o*), or Iça, from the E. side of the Andes in Colombia, flows SE. 950 miles to the Amazon. Peruvian atrocities against rubber-collecting Indians occurred in 1908–13.

Puy (*Pwee*), Le, or Le Puy-en-Velay, a French town (dep. Haute-Loire), 70 miles SW. of Lyons by rail, stands at the base and on the steep slopes of Mount Anis (2050 feet), from whose summit starts up precipitously the basaltic mass called Mont Corneille, crowned by a colossal figure (53 feet) of the Virgin, made of Russian cannon brought from Sebastopol. The most notable building is the Romanesque cathedral (6th–12th century), in the highest part of the town. Lace and thread work are manufactured. Pop. 20,000.

Puy-de-Dôme (*Pwee-de-Dome*), a central dep. of France. Area, 3070 sq. m.; population, 526,000. The western side is an elevated volcanic region, studded with numerous extinct cones; the highest Puy-de-Sancy (6188 feet). The principal rivers are the Allier, a tributary of the Loire, and the Dordogne. The dep. is subdivided into the arrondissements of Ambert, Clermont-Ferrand (the capital), Issoire, Riom, and Thiers.

Pwllheli (*Pool-hay'lee*), a Welsh seaport and watering-place, 22 miles by rail S. by W. of Carnarvon, with lobster and oyster fisheries. It is a municipal borough, uniting with Carnarvon, &c. to return one member. Pop. 3800.

Pynes, the seat of the Earl of Iddesleigh, 2 miles N. of Exeter.

Pyramids, monumental structures of stone or brick over the sepulchral chambers of Egyptian kings, built in the well-known pyramidal shape. The most famous are those of Gîzeh, on the other side of the Nile facing old Cairo and near the ancient Memphis. The largest, that of Chufu or Cheops, second king of the 4th dynasty (3750 B.C.?), was originally 481 feet high on a square base of 774 feet—higher than St Paul's on an area as large as Lincoln's Inn Fields—but many of its exterior blocks have been removed for buildings in Cairo. The second, that of Chephren, the successor of Cheops, was 450 feet high on a base of 700 feet square. The third is much smaller, and there are six others smaller still at Gîzeh; eleven at Sakkara, a few miles S.; others at Abou Roash, Abusîr, at Dahshûr, at Meydûm, in the Fayyûm, and in Nubia.

Pyr'enees, the mountain-chain that divides France from Spain, stretches from the Mediterranean to the south-east corner of the Bay of Biscay, a distance of 270 miles, its breadth varying between 15 and 70 miles. They form a regular and continuous chain, divisible into the Western, Central, and Eastern Pyrenees. The Central Pyrenees, extending from the Port de Canfranc to the Col de la Perche, contain the highest peaks and the most imposing mountain-masses, as Pic de Néthou (in Maladetta), 11,170 feet; Mont Perdu, 10,998; Vignemale, 10,794; Marboré, 10,673; and Pic du Midi, 9466. On both north and south the mountains sink down to the plains in a series of terraces, with precipitous faces, the slope on the Spanish side being steeper than on the French side. The valleys or ravines cutting into the mountain-mass on both sides terminate in caldron-shaped basins, called *cirques* or *oules* (= pots), the sides of which are precipitous and seamed with waterfalls; the most celebrated is the Cirque of Gavarnie, at the head of Gave de Pau, with a waterfall 1380 feet high. The streams on the Spanish side are mostly feeders of the Ebro, whilst the French streams feed the Adour, the Garonne, and some little Mediterranean rivers. The lower Pyrenean valleys through which these streams flow are in many cases covered with grass or forest, or even vineyards and olive-groves. Snow lies on the highest pinnacles, the snow-line being 9200 feet on the south side and at 8300 on the north. A narrow belt of glaciers runs from east to west just below the Central peaks, but almost wholly on the French side. Minerals are not generally abundant, though iron is worked in Basses-Pyrénées and Pyrénées-Orientales; coal exists on the Spanish side and lignite on the French. There are numerous mineral springs (several being hot), those of Eaux-Bonnes, Cauterets, Eaux-Chaudes, Bagnères de Bigorre and de Luchon, and Barèges being the best known. See Count Henry Russell, *Pau, Biarritz, and the Pyrenees* (new ed. 1891).

Pyrénées (*Pee-ray-nay'*), BASSES, a dep. of SW. France, having the Bay of Biscay on the west. Area, 3000 sq. m.; population, 433,000. It is divided into the arrondissements of Pau (the capital), Oloron, Orthez, Bayonne, and Mauléon.

Pyrénées, HAUTES, a dep. of France, lying east of Basses-Pyrénées, is part of the old province of Gascony; area, 1750 sq. m.; population, 206,000. Its arrondissements are Tarbes (the capital), Argelès, and Bagnères de Bigorre.

Pyrénées-Orientales (*Pee-ray-nayz'-O-ri-on^g-tahl'*), a southern dep. of France, bounded E. by the Mediterranean; area, 1600 sq. m.; population, 213,000. Its arrondissements are Perpignan (the capital), Prades, and Céret.

Pyritz (*Peereetz'*), a manufacturing town of Pomerania, 25 miles SE. of Stettin; pop. 9000.

Pyrmont (*Peer-mont'*). See WALDECK.

Pytchley, a village of Northants, 3 miles SW. of Kettering, whence the Pytchley Hunt takes name. See a work by Nethercote (1888).

QUANGTUNG. See CANTON.

Quantocks, a Somerset range of hills, extending 8 miles NNW. to the coast near Watchet, and culminating in Wills Neck (1262 feet). They have memories of Coleridge and Wordsworth.

Quarndon, a village, with sulphur baths, 3 miles NNW. of Derby.

Quatre-Bras (*Kâhtr-Brâh*), a village of Belgium, 10 miles SSE. of Waterloo, situated at the intersection of the great roads from Brussels to Charleroi, and from Nivelles to Namur, whence its name ('four arms'). Here, on 16th June 1815, two days before Waterloo, the English under Wellington defeated the French under Ney. A monument to the Duke of Brunswick, a bronze lion 10½ feet high, was erected in 1890.

Quebec (*Kwe-bek'*; Fr. *Québec*, pron. *Kay-bek'*), a province of Canada, between Ontario and New Brunswick; area (with additions up to 1912), 706,834 sq. miles. The surface comprises great rivers and lakes, large stretches of agricultural land, and immense forests. S. of the St Lawrence are the Notre Dame or Green Mountains, while on the N. is the Laurentian Range. The St Lawrence (q.v.) has many tributaries of great length, the Ottawa, St Maurice, Saguenay, &c. Of numerous lakes, the best known are Temiscamingue, Metapedia, Temiscouata, Memphremagog, and St John. What was once Ungava (354,961 sq. m.) was added in 1912. The winter is slightly colder than in the other parts of eastern Canada. The soil is rich and loamy, well adapted for cereals, hay, and root-crops. Indian corn, hemp, flax, and tobacco are also raised. Fruit is grown, especially apples and plums, which are exported; grapes ripen in the open air. Tomatoes are also a field-crop. Cattle-breeding is carried on, and large numbers of animals are exported to Britain. The fisheries in the River and Gulf of St Lawrence are very prolific, and all the smaller rivers teem with fish. Alluvial gold is found in various places, and copper in the eastern townships, while iron is very generally distributed. Other minerals are lead, silver, platinum, zinc, asbestos, and apatite, or phosphate of lime. Agriculture and dairy-farming form the chief occupations of the people; but lumbering, mining, shipbuilding, manufactures, fisheries, and commerce employ many. The affairs of the province, which is divided into 63 counties, are administered by a lieutenant-governor, an executive council of 24 life-members, and a legislative assembly of 73 persons elected every four years. The province is represented in the Dominion Senate by 24 members, and in the House of Commons by 65. Pop. (1871) 1,191,516; (1881) 1,359,027; (1911) 2,002,712, of whom about 80 per cent. were French-Canadians, descendants of the French settlers living in the country when it was transferred to Great Britain in 1763. The French population then did not exceed 70,000, so that the progress in 150 years is in strange contrast to the state of things in old France. Families of twelve and fourteen are quite common amongst French-Canadians. The English population does not increase in the same way. Farms are subdivided amongst all the children as in France. In religion the Roman Catholics naturally prevail, but the rights of the Protestant minority are protected by statute. The two Protestant universities are M'Gill at Montreal and Bishop's College at Lennoxville; Laval, the Catholic university, is at Quebec. The principal city in the province is Montreal (pop. 470,000), the commercial metropolis of the Dominion. Quebec, the most historic city in Canada, is the seat of the provincial government.

QUEBEC, the capital, is situated on a steep promontory, on the north-west bank of the St Lawrence, 300 miles from the Gulf of St Lawrence and 180 below Montreal (172 by rail). The highest part of the headland is Cape Diamond, 333 feet above the river. Quebec is the most important military position in Canada; its citadel occupies an area of 40 acres, and commands a magnificent view. The harbour is spacious, and the docks and tidal basin are perfect specimens of engineering skill; on the Levis side of the river is the extensive graving-dock. The city is divided into an Upper and Lower Town, whilst westward are the thriving suburbs of St John, St Louis, and St Roch's—the latter having immense warehouses and stores. South-west of St John the Plains of Abraham, the historic battlefield, with a column 40 feet high to the memory of Wolfe, were set apart as a national park in 1908, and a monument erected. Another, 65 feet high, dedicated to Wolfe and Montcalm, overlooks the St Lawrence. On the Ste Foye Road is an iron pillar crowned by a bronze statue, commemorating the deeds of the British and French under Murray and Levis in 1760. There is a shaft also to the memory of Jacques Cartier and Brébeuf. The National Trans-continental Railway crosses the St Lawrence by a great bridge (1912) above Quebec. Dufferin Terrace, 200 feet above the river, commands a noble view. The Grand Battery is picturesquely situated. Three handsome modern gates have replaced the old ones. The principal edifices are the parliamentary and departmental buildings, court-house, post-office, custom-house, city hall, masonic hall, basilica, the archiepiscopal palace, the Anglican Cathedral, Church Hall, and Young Men's Christian Association building. Laval University, named after the first Roman Catholic bishop of Quebec, who in 1663 founded the seminary, has a library of 150,000 volumes, a museum and art gallery, laboratory, &c. Morrin College (Presbyterian) is affiliated with M'Gill University. The water-supply is from Lake St Charles. The city is lighted with gas and electricity, the power for the latter being afforded by the Falls of Montmorency, 9 miles distant. Quebec is connected with all parts of America by rail. Shipbuilding has fallen off. The manufactures, besides rifles for the Canadian government, are worsted goods, iron-castings, machinery, cartridges, cutlery, nails, leather, musical instruments, boots and shoes, paper, tobacco, steel, &c. The chief exports are timber and lumber. Quebec is the seat of a R. C. archbishop and an Anglican bishop. Cartier visited the site, Stadaconé, in 1535; and in 1608 Champlain founded and named the town, which was the centre of French trade, civilisation, and missions till 1759, when it was captured by Wolfe. In 1763 it was ceded to Great Britain. Pop. (1852) 42,052; (1881) 62,446; (1911) 78,190. See works by Lemoine (1876), Mercier (1890), and Sir Gilbert Parker (1903); and for the siege, Doughty and Parnell (6 vols. 1903).

Quedah, or KEDAH, a state on the west side of the Malay Peninsula, with an area of 3600 sq. m. and a pop. of 200,000. Siam ceded the greater part to Britain in 1909. Capital, Alor Star (20,000).

Qued'linburg (*u* as *oo*), a town of Prussia, at the N. base of the Harz Mountains, 56 miles SE. of Brunswick, founded by Henry the Fowler in 924. On an eminence stands the old castle of its abbesses, in whose chapel rest Henry I., his wife Matilda, and the Countess of Königsmark. Here Klopstock and Karl Ritter were born. The town manufactures sugar, wire goods, and farinaceous foods. Pop. 27,000.

Queen'borough, a municipal borough on the Isle of Sheppey, 2 miles S. of Sheerness, was founded by Edward III. (1369), and named after Queen Philippa. Steamers ply to Flushing. Pop. 2500.

Queen Charlotte Islands, a group north of Vancouver Island, off British Columbia. Area, 5100 sq. m. The two chief islands, Graham and Moresby, are 160 miles long and nearly 70 broad. Anthracite, coal, copper and iron ore, and gold-bearing quartz are found. Pop. 1000 Indians.—*Queen Charlotte's Sound* is a strait separating Vancouver Island, on the N., from the mainland.

Queensberry, a Dumfriesshire mountain (2285 feet), 7 miles WSW. of Moffat.

Queensbury, a town in the West Riding of Yorkshire, 3½ miles NNE. of Halifax. Pop. 6100.

Queen's County, an inland county of Leinster, is bounded by King's County, Kilkenny, and Tipperary, and measures 33 miles by 37. Area, 424,854 acres. Pop. (1841) 153,988; (1861) 90,650; (1911) 54,629, 88·7 per cent. being Catholics. Nearly 14½ per cent. of the total area is barren. Queen's County is, for the most part, within the basin of the Barrow, and is flat and, except where bogs prevail, fertile. It is also drained by the Nore and crossed by the Grand Canal. On the north-western border lie the Slieve Bloom Mountains (1734 feet). Coal occurs in the south-east. Agriculture is the principal occupation; there is much dairy-farming. This district was made a shire in honour of Queen Mary, from whom also the chief town, Maryborough (pop. 3300), was called. The county returns two members.

Queensferry, a town of Linlithgowshire, 9 miles WNW. of Edinburgh, on the south shore of the Firth of Forth, which here is crossed by the great Forth Bridge (q.v.). Named after St Margaret, it has been a burgh of royalty since 1363, a royal burgh since about 1639, and a police-burgh since 1882; with Stirling, &c. it returns one member. It has remains of a Carmelite friary, converted in 1890 into an Episcopal church, and a new town-hall (1894); and one of its hotels is the Hawes Inn of Scott's *Antiquary*. Pop. 2800.—NORTH QUEENSFERRY is in Fife, at the other end of the bridge; pop. 1000.

Queensland, youngest and second largest of the states included, since 1901, in the Australian Commonwealth, comprises an area of 668,497 sq. m. It was little known until 1823, when Oxley discovered the river which he named the Brisbane, in honour of the governor of New South Wales; and it was first proclaimed a separate colony in 1859. The island-studded coast-line is 2250 miles in extent. The southern boundary generally follows the twenty-ninth parallel of S. lat. The northernmost point of the mainland is Cape York. Queensland is 1300 miles in length from N. to S., and 800 miles at the greatest breadth in the S. Its western boundary for the most part is 138° E. long. Running more or less parallel with the eastern coast, about 50 miles inland, is a backbone of mountains, the Main Dividing Range, a continuation of the Blue Mountains; the highest peaks are Bellenden-Ker (5500 feet) and Mount Dalrymple (4250). The east side is ridgy and thickly timbered with eucalypti; the country west of the mountains is to a large extent open downs and plains, often of the richest black soil, covered with the finest fattening herbage in the world. The largest rivers on the east coast are the Brisbane, Mary, Burnett, Fitzroy, Burdekin, and Johnston. On the western watershed are the Mulligan, Herbert, and Diamantina. The headwaters of the Thomson and Barcoo flow southward through the boundless prairie-country. The Flinders, Leichhardt, Gilbert, Mitchell, and Gregory flow northward to the Gulf of Carpentaria. Rockhampton is on the Fitzroy, Maryborough on the Mary, and Mackay on the Pioneer. The principal harbour in Queensland is Moreton Bay. The alluvial coast-lands are devoted to ordinary and semi-tropical agriculture and timber produce. The basaltic plains and tablelands beyond the Main Range, extending to the 'Never Never country,' are occupied by pioneer pastoralists with their herds of sheep and cattle. In such a colony, two-thirds of which lies within the tropics, there is a wide variety of climate and natural capabilities. The summer heat is undoubtedly great; but there is immunity from hot winds, and the heat being dry is bearable, though the maximum register is 108°. For seven months of the year the climate is most enjoyable. The state enjoys a high repute for health, gives a low death and a high birth rate, and is free from pulmonary and contagious diseases. Pop. (1871) 125,146; (1881) 213,525; (1911) 605,813, including some 5500 Chinese, but excluding about 22,000 aborigines. Comparative statistics will be found in the article Australia.

Much of the marked prosperity of Queensland is due to the development of ocean and intercolonial steam communication. The navigable streams have been dredged at enormous cost. The railway system of Queensland (5000 miles) connects with that of New South Wales, and there are some 10,500 miles of telegraph lines. In 1858–1910 its mines have produced 17,000,000 fine ounces of gold, value £72,000,000. In central Queensland is the remarkable Mount Morgan (q.v.) mine. Copper, tin, silver and lead, wolfram, molybdenite, and iron are found; and there are valuable coal-mines. Agates and fine opals are found, and specimens of the diamond, ruby, sapphire, and topaz. The exports of wool, hides, skins, and tallow, and of dairy produce, are important. The manufactories comprise metal-foundries, sugar-mills, tanneries, flour-mills, distilleries, sawmills. Tweed-factories are worked near Ipswich. Of late years the bêche-de-mer and pearl-fisheries of Torres Strait have been highly productive; and meat-preserving has also become an established industry. The seat of government is Brisbane, and the next largest towns are Rockhampton, Townsville, Maryborough, Gympie, Ipswich, Toowoomba, and Charters Towers. The governor is appointed by the crown, and there are an executive council and two houses of parliament. The state sends 10 members to the Commonwealth House of Representatives. Education is free, secular, and compulsory. There is a university at Brisbane (1910). A small permanent force and other bodies make up an enrolment 16,400 strong; but military training is compulsory, and every male between eighteen and sixty years old is liable for military service in an emergency. Apart from her share in the Royal Australian Navy, Queensland has some ships of her own. About 400 million acres of land still belong to the crown, leased mostly to squatters as sheep and cattle runs. Market-gardening in Queensland, even in the large towns, is principally done by Chinamen. On the Darling Downs, which is the garden of Queensland, wheat may be grown; and oats, barley, rye, maize, lucerne, and European vegetables and fruits are raised; elsewhere sweet potatoes, yams, and pumpkins. Sugar-growing is a great industry, and arrowroot and tobacco are grown. Cotton, rice, coffee, and even tea have been proved to be suitable. An immense variety of fruits, of both temperate and tropical climes, grow well; ginger, pepper, and nutmeg are indigenous. Amongst the hardwoods are the ironbarks, stringy-barks, gums, and bloodwoods, and there are many easily worked and beautiful softwoods. Snakes (some of them very poisonous) and alligators are the most dangerous wild animals. The fauna includes the usual Australian marsupials, with the platypus and the dingo. Kangaroos used to be a pest. Many of the birds are of gorgeous plumage. The emu roams the plains, and the cassowary is a rare appearance in the north. The rabbit has been fenced out from the southern borders with tolerable success. The sea-fishing is unsurpassed, and the Moreton Bay oysters are exported. From the dugong, besides the oil, is obtained a hide invaluable for thick machinery belting. Queensland suffers occasionally from floods and from droughts; the necessity for artificial irrigation is of paramount importance. Some 1600 artesian bores have been sunk, giving a daily flow of about 520,300,000 gallons.

See books by Bonwick (1880), Grant (1881), Russell (1888), Lumholtz (1889), Weedon (1898), the annual *Year-book*, and Rutlidge's semi-official *Guide to Queensland* (1899).

Queenstown, an Irish seaport, on the south side of Great Island, in Cork harbour, 12 miles by rail SE. of Cork and 177 SW. of Dublin. Its original name was Cove of Cork; the present name commemorates the visit of Queen Victoria in 1849. The town is built in parallel streets on the slopes of a hill shaped like an amphitheatre. Its climate enjoys a high reputation. The splendid Catholic cathedral for Cloyne diocese is the principal building. Queeenstown is an important port of call, the mails from the United States being landed here and sent overland by rail to Dublin; while the British mails are in part taken on board here. Population, 8200.

Queen's Town stands on an arm of the Klaas Smits River in the east of the Cape Province, 154 miles by rail N. by W. of East London; pop. 10,000.

Quelpart, a rock-bound, wooded island 60 miles off the S. coast of Corea, 40 miles long by 17 broad, attains in the volcanic Mount Auckland 6500 feet. It is fertile and populous.

Querétaro (*Kay-ray'ta-ro*), the capital of a Mexican state, on a hilly plateau, 6273 feet above sea-level, 153 miles by rail NW. of Mexico city. It contains a government palace, a cathedral, an aqueduct with arches 90 feet high, and two cotton-mills, employing 2300 hands. Here the Emperor Maximilian was shot in 1867. Pop. 33,000.

Quetta, or Shalkot, a fortified town, capital of British Beluchistan, strategically important as commanding the Bolan Pass (q.v.) and the Pishin Valley. It stands on the railway between Sind and New Chaman on the Afghan border, and since 1877 has been under British officers. Coal and petroleum were found in 1890. Pop. 25,000.

Quetzaltenango, the capital of a dep. of Guatemala, on the Siguila, 95 miles W. by N. of Guatemala city; pop. 30,000, mostly Indians.

Quiberon (*Kee'beron*^{g}), a small fishing-town of France (dep. Morbihan), at the extremity of a long narrow peninsula, 21 miles SW. of Vannes; pop. 3000. Here a body of French royalists landed from an English fleet in 1795, and endeavoured to rouse the people of Brittany and La Vendée. On 20th November 1759 Hawke defeated a French fleet in Quiberon Bay.

Quilimane (*Kee-le-mâh'nay*), a seaport of East Africa, in Portuguese territory, stands 15 miles from the mouth of the N. arm of the Zambesi; pop. 2000, including 400 Europeans and 300 Asiatics.

Quillo'ta, a town of Chili, in the fertile valley of the Aconcagua, 13 miles from its mouth, and 25 miles by rail NE. of Valparaiso; pop. 12,000.

Quiloa, or Kilwa, a seaport of German East Africa, 190 miles S. of Zanzibar; pop. 6000.

Quilon (*Qwee-lon'*), a town of southern India, in the state of Travancore, on the west coast, 85 miles NW. of Cape Comorin. A settlement of the ancient Syrian Church, it became Portuguese in 1503, and Dutch in 1653. Pop. 16,000.

Quimper (*Kan^g-pair*), a town of France (dep. Finistère), on the Odet, 11 miles from its mouth, and 63 by rail SE. of Brest. It has a stately cathedral (1239–1515), potteries, tanyards, sail-works, &c. Pop. 17,000.

Quimperlé, a pretty Breton town of 6000 inhabitants, amidst hills, 35 miles ESE. of Quimper by rail, with an old Romanesque church.

Quinag, a Sutherland mountain (2653 feet), on the N. side of Loch Assynt.

Quincy, (1) a city of Illinois, and capital of Adams county, is on the Mississippi River (here crossed by an important railway bridge), 160 miles above St Louis. It has a fine court-house, a medical college, an Episcopal cathedral, large flour-mills, machine-shops, foundries, saw and planing mills, breweries, and factories of stoves, furniture, carriages, tobacco, &c. Pop. 37,000.—(2) A town of Massachusetts, 8 miles S. of Boston by rail, famous for granite and as the birthplace of John Hancock, John Adams, and John Quincy Adams; pop. 33,000.

Quintana Roo, a territory of Mexico, separated in 1902 from Yucatan; area, 20,000 sq. m.; pop. 10,000. Capital, Santa Cruz de Bravo (pop. 2300).

Quiraing (*Kwee-rang'*), a fantastic rock mass (1779 feet) in the N. of Skye.

Quito (*Kee'to*), the capital of Ecuador, and of the province of Pichincha, lies in 0° 14′ S. lat., on the east side of the great plateau of Quito, at the foot of the volcano of Pichincha (q.v.), 9351 feet above the sea. Its site is cut up by numerous ravines; but the streets are laid out regularly at right angles, plunging into and scaling the sides of the valleys. In the square stand the cathedral, with its green-tiled dome, the archbishop's palace, the municipal building, and the capitol. Other public buildings are the university, a seminary, an institute of science, an observatory, a museum, a library of 20,000 volumes, a penitentiary, a hospital, many monasteries, &c. The manufactures include cottons and woollens and beer; the drying of bird-skins (humming-birds') and the production of sacred images rank as important industries. Founded in 1534, Quito has suffered frequently from earthquakes (especially in 1797 and 1854) and from revolutions (as in 1877 and 1883). Pop. 60,000, mainly Indians and mestizoes.

Quorn, or QUORNDON, a village of Leicestershire, 2½ miles SE. of Loughborough, gives name to a celebrated pack of foxhounds. Pop. 2400.

Quorra, one of the several names borne by the Niger (q.v.) in its upper course.

RAAB (*Râhb*; Hung. *Györ*), a town of Hungary, at the confluence of the Raab and the Little Danube, 67 miles WNW. of Buda-Pesth. It has a beautiful cathedral, and manufactures tobacco and cutlery. Pop. 44,000.

Raalte (*Râhl-teh*), a Dutch town, 11 miles NNE. of Deventer; pop. 6000.

Raasay (*Râh'zay*), an Inverness-shire island, between Skye and the Scottish mainland. It is 13 miles long from N. to S., 3½ miles in greatest breadth, and 24 sq. m. in area. Iron-mines were opened in 1911. Dun Caan (1456 feet) is the highest point, and ruined Brochel Castle on the east shore the chief object of interest. Pop. 300.

Rabat, or NEW SALLEE, a port of Morocco, at the mouth of the Ragreb, opposite Sallee (q.v.). It stands on cliffs amidst gardens, and has a fort and the ruins of the Sultan's palace. It was once the chief port for European commerce, but its harbour is silted up. Pop. 60,000.

Raby Castle, Durham, 6 miles NE. of Barnard Castle, the seat (1379) of the Nevilles, and now of the Duke of Cleveland.

Racalmu'to (*u* as *oo*), a town of south Sicily, 13 miles by rail NE. of Girgenti. Pop. 18,000.

Racconigi (*Racconee'jee*), a town of North Italy, 23 miles by rail S. of Turin. Pop. 10,000.

Race, CAPE. See NEWFOUNDLAND.

Racine (*Ra-seen'*), capital of Racine county, Wisconsin, on Lake Michigan, and on both sides of Root River, which is crossed by five swing bridges, and forms a good harbour. By rail it is 62 miles N. of Chicago and 23 S. of Milwaukee. Racine has a handsome post-office and city hall, a hospital, the Taylor Orphan Asylum, an Episcopal University (1852), a trade in lumber, flax, flour, and woollen mills, and manufactories of ploughs, boilers, pumps, wagons, linseed-oil, hardware, wire-work, cordage, furniture, refrigerators, boots, rubber, &c. Pop. 38,000.

Racow (*Ra-kof'*), a village in the south of the Polish government of Radom, was in the 16th century a Socinian centre. Pop. 2000.

Radcliffe, a town of SE. Lancashire, on the Irwell, 2½ miles SSW. of Bury and 7 NNW. of Manchester. It has an ancient parish church (restored 1873), a ruined tower, a market-hall (1852), a co-operative hall (1878), cotton and calico works, bleachfields, and neighbouring coal-mines. Pop. 25,700.

Radhanpur, chief town of a protected state (1150 sq. m.; pop. 60,000) in Bombay Presidency, 150 miles NW. of Baroda; pop. 10,000.

Radley, a Berkshire parish, near the right bank of the Thames, 5 miles S. of Oxford. The Bowyers' seat here was in 1847 converted into a High Church public school—St Peter's College. It has a fine chapel. Pop. 900.

Radnor, NEW, a Radnorshire village, on the Somergill, 7 miles WSW. of Presteigne; pop. 380. —OLD RADNOR (pop. 340) is 3 miles ESE.

Radnorshire, a border county of South Wales, bounded by the counties of Montgomery, Salop, Hereford, Brecon, and Cardigan. Measuring 36 miles by 30, and 470 sq. m. in area, it is the tenth in size and twelfth in population of all the twelve Welsh counties. The beautiful Wye traces all the south-western and southern boundary, the Teme the north-eastern; and the surface generally is hilly or mountainous, in the Forest of Radnor attaining 2163 feet. Of half-a-dozen mineral springs, those of Llandrindod are in most repute. The soil is poor, less than half of the total area being in tillage, whilst woods and plantations cover nearly 8000 acres. The rearing of stock is the principal industry. Radnorshire returns one member to parliament; and till 1885 another was returned by the Radnor district of boroughs, which comprises Cefnllys, Knighton, Knucklas, New Radnor, Presteigne, and Rhayader. Pop. (1801) 19,135; (1841) 25,458; (1911) 22,590. See Williams's *History of Radnorshire* (Tenby, 1858).

Rad'om, a town of Poland, on a sub-tributary of the Vistula, 60 miles S. of Warsaw; pop. 40,000.—Area of *government* of Radom, 4768 sq. m.; pop. 1,000,000.

Radstock, a town of Somerset, 7 miles NW. of Frome; pop. 3700.

Ragatz, a spa in the Swiss canton of St Gall, 68 miles by rail SE. of Zurich and 13 N. by W. of Chur (Coire); it stands at the mouth of the ravine leading to Pfäfers (q.v.), whence it gets its healing waters by a pipe (1838–40) 2½ miles long. Schelling is buried here; pop. 2000.

Raglan Castle, a noble ruin, 7 miles WSW. of Monmouth, was the seat of the Herberts, Earls and Marquises of Worcester, and belongs now to the Duke of Beaufort.

Ragley Hall, Warwickshire, 1½ mile SW. of Alcester, the Marquis of Hertford's seat (1750).

Ragu'sa (*u* as *oo*; Slav. *Dubrovnik*), a decayed city of Dalmatia, stands on the east shore of the Adriatic, 100 miles SE. of Spalato. Greek first and then Roman, Ragusa afterwards became an independent republic, and so maintained itself until 1808 under the protection successively of Byzantium, Venice, Hungary, and the Porte. Napoleon in 1809 incorporated Ragusa in Illyria; and since 1814, like the rest of Dalmatia, it has belonged to Austria. Ragusa had long before this declined from her former greatness, having suffered repeatedly from fires, plagues, and earthquakes. Chief amongst its buildings are the palace (1435–64) of the rectors (chief-magistrates), the custom-house and mint (*c.* 1312–1520), the Dominican church (1306) and monastery (1348), the Franciscan church and monastery (1317), and the church of St Biagio (Blaise), the patron saint of the town, built in 1348–52, but rebuilt in 1715. The old cathedral was destroyed by the disastrous earthquake of 1667; its successor (1671–1713) has some valuable silver ornaments. The harbour is now sanded up. Merchandise is landed and shipped at the harbour of Gravosa, to the N. Pop. 14,000. See T. G. Jackson's *Dalmatia* (vol. ii. 1887).

Ragusa (anc. *Hybla Heræa*), a town of Sicily, 31 miles WSW. of Syracuse, stands on the Ragusa, 14 miles from the sea; pop. 40,000.

Rahway (*Raw-way*), a city of New Jersey, on the Rahway River, 4 miles from its mouth, and 20 by rail W. of New York. It manufactures carriages, printing-presses, &c. Pop. 9000.

Rai Bareilly (*Rī Baray'lee*), a town of Oudh, stands 48 miles SE. of Lucknow, and has a fort (15th century), a magnificent palace, and some fine mosques; pop. 20,000.

Raichúr, a town of Hyderabad; pop. 23,000.

Rainford, a town of Lancashire, 4 miles NW. of St Helens. It manufactures tobacco, pipes, and crucibles. Pop. 3500.

Rainham Hall, Norfolk, the seat (1632) of the Marquis of Townshend, 3½ miles SW. of Fakenham.

Rainier, Mount. See Cascade Range.

Rainy Lake, on the boundary line between Ontario and the United States, 10 miles W. of Lake Superior. It is 50 miles long, and discharges by Rainy River into Lake of the Woods.

Raipur (*Rī-pore*), a town in the Central Provinces of India, stands on a plateau (950 feet), 180 miles E. of Nagpur; pop. 33,000.

Rajamahendri (nearly as *Rajahmundry*), a Madras town, on the Godavari, 30 miles from its mouth. From 1753 to 1758 it was held by the French. Pop. 40,000.

Rajkot, chief town of a native state in Kathiawar, Bombay; pop. 40,000.

Rajmahal, a decayed town of India, on a steep eminence on the right bank of the Ganges, 170 miles NNW. of Calcutta, with the remains of many palaces. In 800 it had 25,000 inhabitants, but now about 2000.

Rajputana (*Radjpootâh'na*), a territory of India, embracing twenty native states and the British district (2711 sq. m.; pop. 500,000) of Ajmere-Merwara. It lies between Sind (on the W.) and the Punjab (on the N.). Its total area is 132,979 sq. m., and its total pop. is about 11,000,000. The most important native states are Jaipur, Jodhpur, and Udaipur; next follow Alwar, Bhartpur, Kotah, and Bikaner. This region is crossed by the Aravalli Mountains, and consists in great part of sandy, barren plains. It gets its name from the ruling Aryan race, the Rajputs, a proud aristocracy, who have furnished ruling dynasties to many of the native states.

Rajshahi. See Rampur Beauleah.

Raleigh, the capital of North Carolina, is near the Neuse River, 186 miles (by rail 271) SSW. of Richmond. It is regularly built on an elevated site, with a central square, from which four principal streets radiate, each 99 feet wide, and in which stands the domed granite capitol, which cost over $500,000. The city manufactures cotton, fertilisers, tobacco, &c. Pop. 20,000.

Ralik. See Marshall Islands.

Ramillies (Fr. pron. *Ra-mee-yee'*), a village of Brabant, Belgium, 14 miles by rail N. of Namur. Here, on May 23, 1706, Marlborough defeated the French under Villeroy.

Ramnag'ar, (1) an Indian town of the United Provinces, on the Ganges, 2 miles above Benares; pop. 10,000.—(2) A decayed town of the Punjab, on the Chenab River.

Rampur', the capital of a native state (900 sq. m.; pop. 532,000) in the United Provinces, on the river Kosila, 110 miles E. by N. of Delhi. It manufactures damask, pottery, sword-blades, and jewellery. Pop. 74,000.

Rampur Beauleah, chief town of the Rajshahi district (area, 2361 sq. m.; pop. 1,500,000) of Bengal, stands on the north bank of the Ganges; pop. 25,000.

Ramsbottom, a town of Lancashire, on the Irwell, 4 miles N. of Bury. The first Sir Robert Peel established calico-printing here, and it now has manufactures of cottons, calicoes, ropes, machines, &c. Here lived the Grants, the 'Cheeryble brothers' of *Nicholas Nickleby*. Pop. 15,000.

Ramsey, (1) a seaport and watering-place in the north of the Isle of Man, 14 miles NNE. of Douglas, and by rail (1879) 18 NE. of Peel. It stands on a spacious bay, with a good sandy beach and a background of wooded hills (1842 feet), and from its beauty and salubrity has risen into a favourite resort. It has two promenades, a park, salt-water lake, a pier 730 yards long, and steamboat communication with Liverpool, Fleetwood, Glasgow, Greenock, Whitehaven, and Douglas. Pop. 5000.—(2) An urban district of Huntingdonshire, 12 miles NNE. of Huntingdon. It has a branch-line (1863) and remains of a mitred Benedictine abbey (969). Pop. 5300. Ramsey Mere is long since drained, and bears rich wheat crops.

Ramsgate, a watering-place of Kent, in the south-east of the Isle of Thanet, 72 miles E. by S. of London, 4 SSE. of Margate, and 15 ENE. of Canterbury. From a small fishing-village it began to increase in importance during the 18th century through successful trade with Russia, and through the formation here (1750–95) of a harbour of refuge for the Downs. That harbour, 51 acres in extent, with a sea-entrance 250 feet wide, is enclosed on the east and west by two piers 670 and 520 yards long. The aspect of the place, which George Eliot calls 'a strip of London come out for an airing,' is familiar through Frith's 'Ramsgate Sands' (1854); among its special features are an obelisk marking the spot where George IV. in 1821 embarked for Hanover, an iron promenade pier (1881), the fine Granville Hotel, a beautiful Roman Catholic church by the Pugins, a Benedictine monastery, college, and convent, and a Jewish synagogue and college, erected by Sir Moses Montefiore, who, like the elder Pugin, was a resident. To the north is Broadstairs (q.v.), beloved of Dickens; and to the west Pegwell Bay, with Ebbsfleet, the landing-place of St Augustine, and also, traditionally, of Hengist and Horsa. Here, too, is Osengall Hill, with an early Saxon cemetery. Ramsgate was incorporated in 1884. Pop. (1851) 11,838; (1881) 22,683; (1911) 29,603. See James Simson's *Historic Thanet* (1891).

Ranchi (*Rantchee*), a town of Lohardaga district, Chota Nagpur; pop. 26,000.

Rand, or Witwatersrandt. See Johannesburg.

Randazzo (*Randat'zo*), a town of Sicily, at the northern foot of Mount Etna. Pop. 12,000.

Randers, a town in Jutland, on the Randers-Fiord, 20 miles from its mouth in the Cattegat. Pop. 23,000.

Ranelagh (*Ran'e-la*), North and South, two suburbs of Dublin, lying south of the city.

Rangoon', the capital of Burma, stands on the Hlaing or Rangoon River, 20 miles from its entrance into the Gulf of Martaban. The existing city is almost entirely modern, built since the British took possession in 1852. It extends along the left bank of the Hlaing, the docks being opposite to it at the suburb of Da-la, on the other side of the river. Behind is the large military cantonment, grouped round the fortified hill (166 feet) on which stands the Shway-Dagôn pagoda, 'the most venerated object of worship in all the Indo-Chinese countries.' It is built of brick, is lavishly gilded, and tapers up to a cone 321 feet high; it is said to have been erected in the 6th century B.C. The streets are laid out regularly; the river is carefully embanked; there are five markets and an excellent water-supply; the thoroughfares are well lighted and traversed by tramway cars; and there has been an elective municipality since 1883. Forts and batteries protect the town. The principal buildings are the public and governmental offices, the Anglican cathedral (whose foundation-stone was laid by Lord Dufferin in 1886), the native pagodas, the chief jail of Lower Burma, the Phayre Museum in the horticultural gardens, St John's College, the high school, a hospital, &c. Along the riverside are numerous rice-husking-mills and saw-mills. Pop. (1852) 25,000; (1872) 89,897; (1881) 134,176; (1911) 293,316. Rangoon is the chief port of Burma (q.v.), about 86 per cent. of the total trade of that country passing in and out here. Under British sway, its trade has grown wonderfully. A town has existed here since the 6th century B.C., which was called Dagon till its capture by the Burmese sovereign Alompra in 1760, when it was renamed and rebuilt. It was first held by the British in 1825–27.

Rangpur' (*u* as *oo*), a town of Bengal, on the Ghaghat, an arm of the Brahmaputra, 110 miles SE. of Darjiling. Pop. 16,000.

Rannoch, a bleak, desolate moorland of north-west Perthshire, with a mean elevation of 1000 feet above sea-level, and measuring 28 miles by 15. It is crossed by the West Highland Railway (1894). In its western part is Loch Lydoch (5¼ miles × ½ mile; 924 feet above sea-level), which winds amid flat and dismal scenery. Stretching eastward from the moor is Loch Rannoch (9⅜ miles × 1⅛ mile; 668 feet), which is overhung by Schiehallion, contains a crannog with a later fortress, and sends off the Tummel 29 miles E. and SSE. to the Tay. Loch Tummel (2¾ miles × ½ mile; 480 feet) is an expansion of this river, on which are also the Falls of Tummel, 20 feet high.

Rapallo, a winter health-resort of Northern Italy, 17 miles by rail ESE. of Genoa, with a castle and the pilgrimage church of the Madonna (1557) on the Monte Allegro. Pop. 12,000.

Raph'oe, a market-town of Donegal, 15 miles SSW. of Londonderry. Its former see was united to Derry in 1835. Pop. 700.

Rapidan. See Rappahannock.

Rappahannock, a river of Virginia, rises in the Blue Ridge of the Alleghany Mountains, receives the Rapidan, and flows 125 miles south-east to Chesapeake Bay. It is tidal and navigable to Fredericksburg.

Raratong'a. See Cook Islands.

Ras'tatt, or Rastadt, a fortified town of Baden, on the Murg, 3 miles from the Rhine, and 15 SW. of Carlsruhe. Steel wares, beer, and tobacco are manufactured. Pop. 15,000.

Ras'trick, a town of Yorkshire, on the Calder, with cotton and woollen manufactures and quarries, now incorporated with Brighouse (q.v.).

Ratak. See Marshall Islands.

Rathang'an, a market-town on the Little Barrow, 6 miles NW. of Kildare; pop. 550.

Rathdowney, a town in Queen's County, 3½ miles S. of Ballybrophy station; pop. 1000.

Rathdrum', a market-town on the Avonmore, 9 miles SW. of Wicklow; pop. 680.

Rathenow (*Râh'te-now*), a town of Prussia, on the Havel's right bank, 43 miles W. by N. of Berlin; pop. 25,000.

Rathfry'land, a Down market-town, 9 miles SE. of Newry; pop. 1400.

Rathkeale', a town of Ireland, on the river Deel, 19 miles SW. of Limerick by rail; pop. 1700.

Rath'lin, a crescent-shaped island off the coast of Antrim, 6½ miles N. of Ballycastle. Measuring 6½ by 1½ miles, and 3398 acres in area, it has fine cliffs, and attains a maximum altitude of 449 feet. The valleys are fertile, but fishing is the leading industry. Rathlin is identified with the *Ricinia* of Ptolemy, and *Raghlin* or *Ragherin* ('fortress of Ireland') of later writers. St Columba established a church here in the 6th century; and Bruce in 1306 is said to have taken refuge in a castle, now a ruin. Pop. 350.

Rathmel'ton, or Ramelton, a Donegal market-town, on Lough Swilly, 7 miles NE. of Letterkenny; pop. 900.

Rathmines, a S. suburb of Dublin.

Rathmul'len, a Donegal village, on Lough Swilly, 7 miles NE. of Rathmelton; pop. 500.

Rathnew', a village, 2 miles W. of Wicklow.

Rath'o, a Midlothian village, 8 miles WSW. of Edinburgh; pop. 700.

Ratibor′, a town of Prussian Silesia, on the Oder, 44 miles SSE. of Oppeln, chief town of the principality of Ratibor, from 1288 to 1532, since 1742 subject to Prussia. It manufactures iron, tobacco, shoes, paper, glass, sugar, &c. Pop. 38,400.

Rat′isbon (Ger. REGENSBURG), a town of Bavaria, on the Danube's right bank, 82 miles by rail NNE. of Munich. Formerly a free city of the empire and seat of the Diet, Ratisbon presents a mediæval character, with narrow, crooked streets, and high gabled houses. The noble Gothic cathedral, begun in 1275, was not completed till 1534. The church of the Irish (*Scoti*) Benedictines dates from the 12th century, and is built in the pure Byzantine style. The old town-hall was (1645–1806) the place of meeting for the imperial diet. There are also the Thurn and Taxis Palace, the royal villa, &c. A stone bridge (1135–46), 1024 feet long, connects Ratisbon with the busy trading suburb of Stadt am Hof. The manufactures include porcelain and stoneware, brass and steel wares, leather, tobacco, lead-pencils, chemicals, &c., and there is an active trade, especially in corn and salt. Pop. (1875) 31,487; (1910) 52,540. Originally a Celtic town, Radasbona was made by the Romans a frontier fortress; later it was the capital of the Dukes of Bavaria, and one of the most populous cities of southern Germany. Here were signed the Ratisbon Interim in 1541 and the armistice between France and Austria in 1684. The city was stormed by Bernhard of Weimar in 1633, and by both Austrians and French in 1809. It was ceded to Bavaria in 1810.

Ratlam. See RUTLAM.

Ratnagiri (nearly as *Rutnagher′ry*), a coast-town of India, 136 miles S. by E. of Bombay; pop. 15,000.

Rattray, a police-burgh of Perthshire, on the Ericht, opposite Blairgowrie; pop. 1700.

Ratzeburg, a town of Lauenburg, 35 miles ENE. of Hamburg. Here Coleridge learned German. Pop. 5000.

Ravelston, a seat of the Keiths, 2½ miles W. of Edinburgh.

Ravenglass, a Cumberland seaport, 4½ miles N. by W. of Bootle.

Ravenna, a walled city of Italy, 43 miles E. of Bologna, once close to, but now some 5 miles from the Adriatic, with which it is connected by the Corsini Canal. It has been the seat of an archbishop since 438, and possesses a museum, a public library, a picture-gallery, municipal buildings (with a leaning tower), a theatre, &c. It manufactures silk, linen, paper, and glass. The streets are wide, and the squares are adorned with statues of the popes. Pop. 72,000. Deserted by the sea, and strongly entrenched by canals and marshes, Ravenna became the refuge of the Emperor Honorius (402), and the capital of Italy for the next 350 years. It attained its greatest glory under Theodoric the Ostrogoth (493–526), whose mausoleum (La Rotonda)—now empty—is without the walls. Conquered by the generals of Justinian, Ravenna was the seat of exarchs from Constantinople until 752, when it was taken by the Lombards, and afterwards by the Franks, by whom it was gifted to the pope. A republic in the early part of the 13th century, governed by its own dukes in the 14th, subject to Venice after 1440, it was won by Pope Julius II. in 1509, and continued papal until 1860. There are at least six churches of the time of Galla Placidia (390–450), the sister of Honorius and mother of Valentinian III. The *round* campaniles, perhaps of the 10th century, form an architectural feature peculiar to Ravenna. Dante died at Ravenna in 1321, and is buried there. A column, 2 miles from the walls, commemorates the fall of Gaston de Foix at the head of the French army of Louis XII., after a bloody and useless victory over the papal and Spanish troops in 1512. Byron resided at Ravenna, 1819–21.

Ravensburg (*Râh-fens-boorg*), a town of Würtemberg, 11 miles by rail NNE. of Friedrichshafen on Lake Constance. Pop. 14,600.

Ravenspur. See HUMBER.

Ravi. See PUNJAB.

Rawal Pindi, a town and military station of the Punjab, lies between the rivers Indus and Jhelum, 160 miles by rail NW. of Lahore. It has an arsenal (1883), a fort, a public park, and an active transit-trade with Cashmere and Afghanistan. Here the Sikhs surrendered in 1849. Pop. (1868) 28,586; (1881) 52,980; (1911) 86,483.

Rawdon, a Yorkshire town, 6 miles NE. of Bradford, with cloth manufactures; pop. 3200.

Rawitsch (*Râh′vitch*), a town of Prussia, 64 miles by rail S. of Posen; pop. 10,000.

Rawmarsh, a Yorkshire town, 2¼ miles N. by E. of Rotherham, with china and iron works and collieries; pop. 17,200.

Rawtenstall, a town of Lancashire, 4 miles W. of Bacup. A municipal borough (1891), it manufactures cottons and woollens. Pop. 30,500.

Ré, ÎLE DE (*Ray*; *Rex insula*), is a small, low-lying island off the French dep. of Charente-Inférieure, opposite La Rochelle. It is 18 miles long and 3 broad, measures 28 sq. m., and has about 14,000 inhabitants, who make salt. The west coast is rocky; on the east are good harbours. Oyster-fishing is an industry, and wine is exported. The chief town, St Martin (pop. 2000), was fortified by Vauban. Ars and La Flotte have each about 2000 inhabitants.

Reading (*Red′ding*), a municipal, parliamentary, and county borough, capital of Berkshire, on the Kennet, near its influx to the Thames, 36 miles by rail W. of London (by road 39, by river 74). Its castle was wholly demolished by Henry II.; but the splendid Benedictine abbey, founded in 1121 by Henry I., who was buried here, is represented by considerable ruins and a fine gateway, restored in 1861, and surrounded by public gardens. Nine parliaments were held within its hall; the last of its mitred abbots was hanged by Henry VIII., with two of the brethren. There are a university college (founded 1892); handsome municipal buildings and two excellent town-halls; a lofty clock-tower; a free library; concert room; museum; Italian assize courts (1861); a large grammar-school (1486; rebuilt 1870–71), of which Dr Valpy was long head-master; St Lawrence's Church (1434; restored 1868), with a flint tower 189 feet high; and the Royal Berkshire Hospital. Drainage-works were completed in 1874, water-works in 1878. One of the largest of the public parks was gifted in 1891 by Mr G. Palmer. Reading is an important mart for corn and other agricultural produce, and has manufactures of iron, paper, sauce, &c., whilst two of its industrial establishments are world-famous—Huntley and Palmer's huge biscuit factory and Sutton's seed-emporium. Reading, which is in the diocese of Oxford, gives title to a suffragan bishop. Its representation was reduced from two to one in 1885, when, however, the parliamentary borough was extended. The first charter was granted by Edward III. Pop. of county borough as extended in 1911, 87,800. Reading suffered much from the Danes between 868 and 1006, and in 1643 surrendered to Essex after a ten days' siege. It was the birthplace of Archbishop Laud, Justice Talfourd, and Goldwin Smith. It has memories also of Chaucer and Bunyan. See works by Coates (1802–9), Man (1816), Doran (1835), and J. B. Jones (1870).

Reading, (1) a city of Pennsylvania, capital of Berks county, on the Schuylkill River, 58 miles by rail NW. of Philadelphia. It draws from the neighbouring hills its water-supply and abundant iron ore, the principal manufactories being iron and steel works. It also makes shoes, hats, beer, cigars, leather, paper, bricks, &c. Settled in 1748, it became a city in 1847. Population, about 96,000, many of German descent.—(2) A town of Massachusetts, 12 miles NW. of Boston; pop. 6000.

Recanati, a town of Italy, 15 miles S. of Ancona, has a Gothic cathedral. Here Leopardi was born. Pop. 16,000. Porto Recanati, on the Adriatic, 6 miles NE., has a pop. of 5000.

Recife (*Ray-see′fey*). See PERNAMBUCO.

Recklinghausen, a town of Westphalia, 22 miles NW. of Dortmund; pop. 54,000.

Reculver, a village on the coast of Kent, 9 miles W. of Margate, with remains of the Roman station *Regulbium;* pop. 450.

Red′car, a popular bathing-resort in the North Riding of Yorkshire, 10 miles by rail NE. of Middlesbrough. Its smooth, firm sands stretch 10 miles from the mouth of the Tees to Saltburn. Pop. 10,500.

Redditch, a busy town on the borders of Worcester and Warwick shires, stands on an acclivity 13 miles SSW. of Birmingham by rail. Needles, pins, fish-hooks, and fishing-tackle are made extensively. Pop. 15,500.

Redesdale, the valley of the river Reed in Northumberland, extending 21 miles SE. and SW. from the Scottish border, until it opens into the valley of the North Tyne at Reedsmouth. Watling Street traverses its middle and upper part. Near the southern end of Redesdale is the famous field of Otterburn (q.v.); and near its source was fought the 'Raid of the Redeswire,' 7th July 1575.

Redhill, an eastern extension of Reigate (q.v.).

Redout Kalé (*Redoot′ Kah-lay′*), a fortified post on the Black Sea coast of Caucasia, 10 miles N. of Poti, captured by the British fleet in 1854.

Red River, the lowest western tributary of the Mississippi, rises near the eastern border of New Mexico, and flows 1600 miles E. and SE. through or along the borders of Texas, Oklahoma, Arkansas, and Louisiana, till it enters the Mississippi below 31° N. lat. Of its feeders the Washita (Ouachita) is the most important.

Red River of the North, a navigable river of the United States and Canada, rises in Elbow Lake, Minnesota, near the sources of the Mississippi, forms the boundary between Minnesota and North Dakota, and flows into Manitoba and through a flat country to Lake Winnipeg. Its course is 665 miles (525 in the United States). The Red River rebellion of the Canadian half-breeds (1869–70) was headed by Louis Riel, and suppressed by Colonel (Lord) Wolseley.

Red River Settlement. See MANITOBA.

Redruth (*Red′rooth*), a town of Cornwall, on a hillside (414 feet) in the centre of a great mining-district, 9 miles by rail W. by S. of Truro. It has a town-hall (1850), public rooms (1861), a miners' hospital (1863), &c. William Murdock here in 1792 first used gas for lighting purposes. Pop. 10,800.

Red Sea, an arm of the Indian Ocean, running NNW. from the Gulf of Aden, with which it communicates by the Strait of Bab-el-Mandeb, 13½ miles across. Its length is about 1200 miles, and its greatest breadth 205 miles; it narrows towards the southern entrance, while in the north it is divided by the peninsula of Sinai into two gulfs, the Gulf of Suez, 170 miles long by 30 miles wide, and the Gulf of Akaba, 100 miles in length. The Arabian coasts of the Red Sea are usually narrow sandy plains backed by ranges of barren mountains; the African coasts towards the north are flat and sandy, but southwards high tablelands rise inland, culminating farther south in the lofty mountains of Abyssinia. A marked feature of the Red Sea is found in the partly upraised coral-reefs running parallel to both eastern and western shores; the Farisan Archipelago is in the eastern and larger reef, and the island of Dahlak, off Annesley Bay, in the western reef. There is also a volcanic group lying in 14° N. lat., the largest of which rises 2074 feet. The principal harbours are Mocha, Hodeida, Lokeyyah, Jiddah, and Yenbo' on the Arabian coast, and Massowah, Suakim, and Port Sudan on the African coast. A great trade route till the rounding of the Cape of Good Hope, the Red Sea has become a vastly more important route since the construction of the Suez Canal. The tides are very variable, depending largely on the direction and force of the winds. The mean temperature of the air generally ranges between 70° and 94° F. during the day, though readings of over 100° are often registered in the shade; but during the night the temperature may fall to the freezing-point, owing to radiation in the clear and cloudless atmosphere. The mean temperature of the surface water varies at the northern end between about 65° and 79° F., in the central regions between 75° and 86°, and at the southern end between 78° and 89°. The salinity of the water is almost constant at about 1·030 (ordinary ocean water is about 1·026). No rivers flow into it, little rain falls, and evaporation is excessive. The greatest depth, near the centre, is about 1200 fathoms, and the mean depth about 375 fathoms. The marine fauna and flora are extensive. The origin of the name—Lat. *Mare Rubrum* and Gr. *Erythra Thalassa*—is much disputed.

Ree, LOUGH, a lake between Connaught and Leinster, is an expansion of the Shannon (q.v.).

Reed. See REDESDALE.

Regalbu′to (*u* as *oo*), a town of Sicily, 25 miles WNW. of Catania. Pop. 12,000.

Regensburg (*Ray′gens-boorg′*). See RATISBON.

Reggio (*Red′jo;* anc. *Rhegium Julii*), (1) a seaport of South Italy, stands on the Strait of Messina, 9 miles SE. of the city of Messina in Sicily. Its fine archiepiscopal cathedral was wrecked, with many other buildings, by the earthquake of 1908. Pop. 43,000.—(2) A walled city of central Italy, Ariosto's birthplace, on the ancient *Via Emilia*, 17 miles by rail SE. of Parma. It has a 15th-century cathedral, a fine theatre, and a model lunatic asylum. Pop. 70,000.

Regina (*Rejī′na*), capital of Saskatchewan, 357 miles by rail W. of Winnipeg, a rapidly growing distributing centre and manufacturing town, damaged by cyclone in 1912; pop. 30,000.

Reichenbach (*Rī'hhen-bahh*), (1) a manufacturing town of Saxony, 11 miles SW. of Zwickau, produces woollen fabrics—merinoes, flannel, shawls, quilts, cashmere—and has wool-spinning, dyeing, and calico-printing works; pop. 30,000.—(2) A town of Prussian Silesia, 46 miles by rail SE. of Liegnitz; pop. 16,000.

Reichenberg (*Rī'hhen-berg*), the chief seat of the cloth manufacture in North Bohemia, stands on the Neisse, 86 miles by rail NE. of Prague. Apart from the principal industry, which dated from the 16th century, and in which, in the town and neighbourhood, some 10,000 workmen are employed, cotton and woollen fabrics, machinery, and leather are manufactured. Pop. 64,000.

Reichenhall (*Rī'hhen-hăl*), an Alpine spa in the extreme south-east of Bavaria, 10 miles SW. of Salzburg. It was handsomely rebuilt after the great fire in 1834. It is the chief centre of the Bavarian salt-works, and in the manufacture of salt its inhabitants are mostly employed, though the delightful air of the valley in which it stands, and its fifteen saline springs, attract about 6000 visitors every summer. Pop. 5000.

Reigate (*Rī'gayt*), a thriving market-town of Surrey, at the southern base of the North Downs, 21 miles S. of London. Of the castle of the Earls of Warrenne little remains save a grassy mound, with large vaults or caverns beneath it. The church, with Transition Norman piers, but mainly Perpendicular, contains the grave of Lord Howard of Effingham, and a library (1701) with some curious MSS. and many of Evelyn's books. Other buildings are the public hall (1861) and the grammar-school (1675). Foxe the martyrologist is claimed for a resident; and Archbishop Usher died here. Till 1832 Reigate returned two members, then one till 1867. It became a municipal borough in 1863. Pop. (1851) 5000; now 28,500.

Reikiavik (*Rīk'ya-vik*). See ICELAND.

Reims. See RHEIMS.

Rembang, a town on the north coast of Java, capital of a residency that has an area of 2896 sq. m. and a pop. of 1,500,000.

Remiremont (*Re-meer-mon*^{g}*'*), a town of France (dep. Vosges), on the Moselle, 17 miles by rail SE. of Épinal, with sawmills and muslin, cotton, and leather factories. It was the seat of a famous Benedictine nunnery, founded in 620. Pop. 10,000.

Remscheid (*Rem-shide*), a town of Rhenish Prussia, 6 miles S. of Elberfeld-Barmen, manufactures iron wares, cutlery, &c.; pop. (1871) 22,000; now 70,000.

Renaix (*Re-nay'*), a Belgian town, 25 miles by rail S. by W. of Ghent; pop. 25,000.

Rendsburg (*u* as *oo*), a town of Sleswick-Holstein, on the North Sea and Baltic Canal, 19 miles W. of Kiel; pop. 17,000.

Ren'frew, an ancient royal and parliamentary burgh, the county town of Renfrewshire, stands on the south bank of the Clyde, 6 miles below Glasgow. A knoll called Castlehill marks the site of the original seat of the royal house of Stewart. Anciently the chief port on the Clyde, Renfrew builds dredgers, and is to have the largest graving-dock in the world (1912–20). There are great boiler-works. It is one of the Kilmarnock (q.v.) burghs. Pop. (1841) 2000; now 12,600.

Renfrewshire, a Scottish county, bounded N. by the river and firth of Clyde, and elsewhere by Lanarkshire and Ayrshire. It is 31 miles long by 13 broad, and contains 240 sq. m. Pop. (1801) 78,056; (1881) 263,374; (1911) 314,552. Till 1889–1912 some southern suburbs of Glasgow, with 35,449 inhabitants, included in the figures given above, were reckoned within the county. The surface is irregular: besides the low lands fringing the Clyde, there are three principal valleys, those of the Gryfe, Black Cart, and White Cart, with upland pastures and ranges of hills, the highest point being the Hill of Stake (1711 feet) on the Ayrshire border. Agriculture and the breeding of horses and cattle are carried on with success; dairy-farming is largely practised, owing to the proximity of large towns. Rather less than two-thirds of the whole extent is arable, mainly in pasture or grass crops. The minerals are coal, iron-stone, copper, barytes, shale, and lime. Besides mining and agriculture, the chief industries are the manufacture of thread, cotton, and chemicals, print and bleach works, shipbuilding, engineering, and sugar-refining. Renfrewshire is divided into two wards, Upper and Lower, and two parliamentary divisions, eastern and western, each returning one member. The chief towns are Renfrew, Paisley, Greenock, Gourock, Port-Glasgow, Johnstone, and Barrhead. Renfrewshire, or at least the western portion, was anciently called Strathgryfe, and it was the chief patrimony of the house of Stewart. In 1404 the title of Baron of Renfrew (still borne by the Prince of Wales) was conferred by Robert III. on his son James; and about the same time Renfrew was disjoined from Lanarkshire and made a separate county. See Crawford's *History* (1716), and *Archæological and Historical Collections* (Paisley, 1885 *et seq.*).

Reni (*Ray'nee*), a Russian town of Bessarabia, at the Pruth's influx to the Danube, 10 miles E. of Galatz. Pop. 6000.

Rennes (*Renn*; the *Condate* of the Redones), the capital formerly of the province of Brittany, and now of the dep. of Ille-et-Vilaine, is situated at the confluence of those two rivers, 234 miles WSW. of Paris and 51 SSE. of St Malo. A seven days' fire in 1720 destroyed nearly 4000 houses. The most noteworthy of the public buildings are the cathedral, finished in 1844, and Italian in style; Notre Dame, with its dome surmounted by a huge image of the Virgin; the archbishop's palace (1672); the stately Palais de Justice (1618–54); the university buildings (1855); the theatre (1835); the Hôtel de Ville, with a public library; and the Lycée. A railway centre, commanding good river and canal navigation, Rennes manufactures sail-cloth, table-linen, &c. Pop. 80,000.

Reno, a city of Nevada, on the Truckee River, 20 miles NW. of Virginia City, is a prize-fighting and divorce resort; pop. 11,000.

Renton, a town of Dumbartonshire, on the Leven's right bank, 2 miles N. by W. of Dumbarton. Founded in 1782, it has a Tuscan column (1774) to the novelist Smollett, who was born close by, and it carries on calico-printing, dyeing, and bleaching. Pop. 5000.

Repton, a Derbyshire village, 6½ miles SSW. of Derby and 4½ NE. of Burton-upon-Trent. Here was founded the first Christian church in Mercia, of which Repton for a while was the royal and episcopal capital. It was the seat from before 660 till its destruction by the Danes in 874 of a celebrated nunnery, as afterwards of an Austin priory from 1172 till the Dissolution. Remains of this priory are incorporated in the buildings of the free grammar-school, which, founded in

1556 by Sir John Porte, has risen to be one of the great English public schools, with some 30 masters and 360 boarders. The parish church has a graceful spire and a very interesting Saxon crypt, 17 feet square. Pop. of parish, 1850. See Bigsby's *History of Repton* (1854).

Requeña (*Ray-kayn'ya*), a town of Spain, 37 miles W. of Valencia; pop. 20,000.

Reshd, a town of Persia, capital of the province of Ghilan, stands near the south-west shore of the Caspian Sea, 150 miles NW. of Teheran. The port is Enzeli, on the other side of the bay, and 16 miles distant. Pop. 35,000.

Resina (*Rez'eena*), a town of Italy, 4 miles SE. of Naples, at the foot of Vesuvius, and facing the sea, on the site of Herculaneum; pop. 20,000.

Restalrig, a village close to Jock's Lodge (q.v.), within the city of Edinburgh.

Restigouche (*Restigoosh'*), a river of Canada, flowing 200 miles SE., E., and NE. through or along the borders of Quebec and New Brunswick, into the Bay of Chaleurs.

Retford, East, a Nottinghamshire market-town, on the right bank of the Idle, an affluent of the Trent, 24 miles E. by S. of Sheffield and 138 NNW. of London. It has a handsome town-hall (1867), a grammar-school (1552; rebuilt 1858), paper-mills, iron-foundries, &c. It was incorporated by James I., the municipal boundary being extended in 1878. The parliamentary borough was extended in 1829 to take in all Bassetlaw wapentake—since 1885 one of the four county divisions. Pop. of mun. borough, 13,400. See a History by Piercy (1828).

Rethel (*Re-tel'*), a French town (dep. Ardennes), 24 miles NE. of Rheims; pop. 5000.

Retimo (*Retee'mo*), a seaport of Crete, on its north coast, 40 miles W. of Candia; pop. 10,000.

Réunion (Fr. pron. nearly *Ray-een-yon*$^{g'}$), a French island in the Indian Ocean, 115 miles SW. of Mauritius and 350 E. of Madagascar. An ellipse in shape, it has an area of 970 sq. m., being 38 miles long and 28 broad. Population, 174,000, mostly Creoles, with 3000 negroes and over 8000 natives of India. The backbone of the island is a volcanic range, culminating in the Piton de Neiges (10,069 feet), and in Piton de Fournaise (8612 feet), an active volcano. Streams, although not large, are very numerous, and fall in cascades to the sea. The climate is hot, but on the whole not unhealthy. Cyclones sometimes do serious damage. One-third of the island is cultivated, one-third under timber, and one-sixth is grass-land. Tropical fruits, sugar (the staple crop), coffee, vanilla, cinchona, maize, vegetables (potatoes, &c.), spices, tobacco, &c. are grown. By far the chief export is sugar; coffee, vanilla, rum, potatoes, and tapioca are the other exports. The capital is St Denis, on the north coast, with 24,000 inhabitants, a college, a botanic garden, &c.; it is a bishop's seat. St Paul, on the north-west, has 19,000 inhabitants; St Pierre, on the south-west coast, 29,500. The coast towns are connected by a railway 78 miles long. Réunion and Mauritius, the 'Mascarene Islands,' were discovered by the Portuguese, Mascarenhas. The French took this island in 1649, calling it successively Île de Bourbon, Réunion (1798), Île Bonaparte (1809), and Réunion again since 1848. The island was held by Britain from 1810 to 1815.

Reus (*Ray'oos*), a town of Spain, 58 miles by rail SW. of Barcelona and 4 N. of its seaport, Salou. Its prosperity dates from 1750, when English merchants settled here. It manufactures cotton, silk, ribbons, wine, soap, brandy, and leather. Pop. 25,000.

Reuss (*Roìss*), a tributary, 190 miles long, of the Aar (q.v.), in Switzerland.

Reuss (*Roìss*), two sovereign principalities of Germany, lying between Saxony, Prussian Saxony, and Bavaria. Since 1666 the possessions of the House of Reuss have been divided between the Elder and the Younger lines. The principality of Reuss-Greiz (the Elder Line) is 122 sq. m. in extent, and has some 73,000 inhabitants; the chief town is Greiz (q.v.). The principality of the Younger Line is Reuss-Schleiz-Gera; area, 319 sq. m.; population, 153,000; capital, Schleiz. Of both principalities the surface is hilly, being traversed by the Frankenwald (Thüringer Wald), whose summits exceed 2000 feet. The chief rivers are the Saale and White Elster.

Reutlingen (*Roit'ling-en*), a pleasant town of Würtemberg, on a feeder of the Neckar, 8 miles E. by S. of Tübingen, manufacturing woollen and cotton yarns, cloth, leather, cutlery, hosiery, paper, &c. The noble church of St Mary (1247–1343), has a tower 243 feet high. Pop. 30,000.

Rev'al, or Revel, a Russian seaport, capital of Esthonia, stands on a small bay on the south side of the Gulf of Finland, opposite Helsingfors (52 miles distant), and 232 miles by rail WSW. of St Petersburg. The (old) upper town contains the cathedral, the castle, governor's residence, and the houses of the (German) nobility. There are several mediæval guild-houses, and an important museum of antiquities. Reval exports cereals (chiefly oats), spirits, flax, &c.; and imports cotton, coal, &c. Brandy, vinegar, and wool are manufactured. Pop. 80,000, one-half being Esthonians, and one-fourth of German descent. Founded by Waldemar II. of Denmark in 1219, Reval became a flourishing Hanse town. It was long held (from 1346) by the Livonian Knights, was made over to Sweden in 1561, and was annexed to Russia in 1710.

Revere, a town and bathing-place of Massachusetts, 5 miles N. of Boston, named after the patriot Paul Revere. Pop. 18,000.

Revilla-Gigedo (Span. pron. *Re-veel'ya-Hee-hay'do*), a rocky and uninhabited island-group in the Pacific, 400 miles W. of the coast of Mexico, to which it belongs. Socorro, a mountain-island 24 miles long, is the largest.

Rewá (*Ray-wa*), the principal native state of Baghelkhand (q.v.), named from a tributary of the Son, which flows NE. to the Ganges near Dinapur; its chief town, also called Rewá (pop. 25,000), is 130 miles SW. of Allahabad.—Rewá Kanthá ('Banks of the Rewá') is a political agency under the government of Bombay, containing sixty-one small states, mostly tributary to Baroda. Covering 4980 miles, with a pop. of 500,000, it lies mainly along the south bank of the lower Nerbudda, and on the west borders on Broach, Baroda, and Ahmadabad.

Rewari (*Ray-wâh'ree*), a town of Gurgaon district, 50 miles SW. of Delhi by rail; pop. 30,000.

Reyk'javik. See Iceland.

Rhætia (*Reeshia*), an ancient Roman province embracing a large part of the Alpine tract between the basins of the Po and the Danube, now included in the Grisons and the Austrian Tyrol.

Rhayader (Welsh, 'waterfall'), a Radnorshire (q.v.) market-town, on the Wye, 14 miles S. of Llanidloes; pop. of parish, 1000.

Rhé (*Ray*), Île de. See Ré.

Rhegium. See Reggio.

Rheidol, a Cardiganshire river, flowing 22 miles to the sea at Aberystwith.

Rheims (*Reems;* Fr. pron. *Ran*^{g}*ss*), or Reims, a city in the French dep. of Marne, situated on the Vesle (a tributary of the Aisne), 100 miles ENE. of Paris by rail. Strongly fortified with detached forts since the Franco-German war, when it was for a time the German headquarters, it is well built, and has a picturesque appearance. It is built on the site of *Durocortorum*, which Cæsar mentions as the capital of the Remi, from whom it subsequently took its present name. Under the Frank rule it was a place of much importance, and in 496 it was the scene of the baptism of Clovis and his chief officers by the bishop, St Remy. About 360 it became a bishopric, and in the 8th century an archbishopric. From 1179, when Philip Augustus was crowned here, it was the coronation place of the kings of France, who were anointed from a vessel of sacred oil, the *Sainte Ampoule*, said to have been carried to St Remy from heaven by a dove. Joan of Arc brought the dauphin hither, and the only sovereigns down to 1825 not crowned at Rheims were Henry IV., Napoleon I., and Louis XVIII. In 1793 the cathedral was attacked by the populace, and the sainte ampoule smashed by a sansculotte. The cathedral (1212–1430), although the towers of the original design are still unfinished, is one of the finest extant specimens of Gothic architecture. Its nave is 466 feet long by 99 in breadth, with a transept of 160 feet, and the height is 144 feet. Its grandest features are the west façade, which is almost unrivalled, with its magnificent doorway, and the so-called Angel Tower, which rises 59 feet above the lofty roof. The Romanesque church of St Remy (mainly 1160–80), with the saint's shrine, is nearly of equal size. Also noteworthy are the hôtel-de-ville (1627–1880); the ancient 'Maison des Musiciens' and archiepiscopal palace; the Porta Martis, a Roman triumphal arch; the Lycée, representing a former university (1547–1793); and statues of Louis XV. and two natives, Colbert and Marshal Drouet. Rheims is one of the principal entrepôts for the wines of Champagne, and the hills round the town are planted with vineyards. It is one of the great centres of the woollen manufacture in France, and its manufactures, embracing woollen goods (especially merinoes), mixed fabrics in silk and wool, &c., are known in commerce as *Articles de Reims.* Pop. (1872) 71,397; (1901) 108,385; (1911) 115,178.

Rheingau (*Rine'gow*), a wine-growing district, 14 miles long, stretching along the right bank of the Rhine, from opposite Mainz to the village of Lorch, 8 miles below Bingen.

Rhenish Prussia (Ger. *Rheinland*, or *Rheinpreussen*), the most western and most thickly peopled of the provinces of Prussia, lies on the Rhine and Lower Moselle, and is bounded W. by Luxemburg, Belgium, and the Netherlands. Long and narrow, it extends from Cleves in the north to Saargemünd in the south, and contains Cologne, Aix-la-Chapelle (Aachen), Treves, Coblenz (the capital), Elberfeld-Barmen, Essen, Bonn, Düsseldorf, and Crefeld. Area, 10,419 sq. m.; pop. (1885) 4,344,527; (1910) 7,120,519, of whom 69 per cent. were Roman Catholics and 15,000 Walloons. The surface is everywhere more or less mountainous, except in the extreme north, reaching 2500 feet on the west of the Rhine, but only 1800 on the east side. The valleys of the Rhine, Moselle, and Nahe are very fruitful, and so are the flat districts in the north. Of the total area, 64 per cent. is cultivated, including meadows and vineyards, and nearly 31 per cent. under forest. More than sixteen million tons of coal are mined in the year, also large quantities of iron, zinc, and lead ore. The sulphur-springs of Aix-la-Chapelle and Burtscheid have a European reputation. Industry and manufactures are prosecuted with the greatest energy and success, this province ranking first in all Prussia in this respect. It was formed in 1815 out of the duchies of Cleves, Jülich (Juliers), Guelders, Berg, &c.

Rheydt (*Rite*), a town of Rhenish Prussia, 19 miles by rail W. by S. from Düsseldorf. It manufactures silks, velvets, cottons, machinery, hardware, paper, dyeworks, and breweries. Pop. 44,000.

Rhin (*Ran*^{g}), Bas and Haut, until 1871 frontier deps. of France, corresponded nearly to what are now the two districts of Lower and Upper Alsace, in German Alsace-Lorraine (q.v.). See Belfort.

Rhine (Ger. *Rhein*, Fr. *Rhin*, Dutch *Rhijn*, Lat. *Rhenus*), one of the most important rivers of Europe. A large number of rivulets, issuing from Swiss glaciers, unite to form the young Rhine; but two are recognised as the principal sources—the Nearer and the Farther Rhine. The former emerges on the north-east slope of the St Gotthard mass (7690 feet above sea-level), the other side of which is the cradle of the Rhone; the Farther Rhine has its origin on the flank of the Rheinwaldhorn (7270 feet), not far from the Pass of Bernardino. The two mountain-torrents meet at Reichenau, 6 miles SW. of Coire (Chur) in the Grisons canton, after they have descended, the Nearer Rhine 5767 feet in 28 miles, the Farther Rhine 5347 feet in 27 miles. After ploughing its way N. for 45 miles between Switzerland and Austrian Vorarlberg, the river enters the Lake of Constance, soon after leaving which, its water a deep transparent green, it plunges down the falls of Schaffhausen, nearly 70 feet in three leaps, and flows westwards to Basel, separating Baden from Switzerland. In this stretch the river (490 feet wide), receives from the left the waters of the Aar. At Basel (742 feet), now 225 yards wide, it wheels round to the north, and traversing an open shallow valley that separates Alsace and the Bavarian Palatinate from Baden, reaches Mainz, split into many side arms and studded with green islands. Navigation begins at Basel. Of the numerous affluents here the largest are the navigable Neckar and the Main from the right, and the navigable Ill from the left. A little below Mainz the Rhine (685 yards wide) is turned west by the Taunus range; but at Bingen it forces a passage through, and pursues a north-westerly direction across Rhenish Prussia, past Coblenz, Bonn, Cologne, Düsseldorf, Ruhrort, and Wesel as far as the Dutch frontier; here it is 1085 yards wide and 36 feet above sea-level. The first half of this portion of the river from Bingen to Bonn is the Rhine of song and legend, the Rhine of romance, the Rhine of German patriotism. Its banks are clothed with vineyards that yield wine esteemed the world over; the rugged and fantastic crags that hem in its channel are crowned by ruined castles; the treasure of the Nibelungs rests at the bottom of the river (higher up, at Worms); the Bingerloch (see Bingen) and the Mouse Tower of Bishop Hatto, the fortress of Ehrenbreitstein, the rock of the siren Lorelei, the commanding statue of

Germania (the trophy of German victory in 1870), and innumerable other features lend interest to this the middle course of 'Father Rhine.' Between Bingen and Bonn the steep rocky walls that fence in the river approach so close that road and railway have to find their way through tunnels. The Nahe enters the Rhine at Bingen, the Moselle at Coblenz; from the right side the Lahn enters above Coblenz. Gigantic rafts are floated down from the Black Forest to Dordrecht in Holland. Below Bonn the Rhine is joined by the Sieg, Wupper, Ruhr, and Lippe from the right.

At Bonn the river enters the plains, and almost immediately after passing the Netherlands frontier its delta begins. The principal arm, carrying two-thirds of the volume, flows under the name of the Waal, and later the Mermede, to Dordrecht, picking up the Maas (Meuse) from the left. At Dordrecht the river again divides for a bit, one branch, the old Maas, running out to sea; the other, the Noord, forming a loop by way of Rotterdam. The northern arm sends one branch, the Yssel, due north to the Zuider Zee; the other branch is the Lek, which runs into the Waal-Maas arm above Rotterdam. A thin stream, called the 'Winding Rhine,' leaves the Lek and splits at Utrecht into two channels, of which the Old Rhine, a mere ditch, manages with the help of a canal and locks to struggle into the North Sea at Katwyk, NW. of Leyden, while the Vecht flows due north from Utrecht to the Zuider Zee near Amsterdam. In the delta the streams have to be bordered by dykes. The area drained by the Rhine is estimated to be 75,773 sq. m., and its total length to be 760 miles, of which 550 in all are navigable. By canals it is connected with the Danube, Rhone, and Marne. Salmon, carp, pike, sturgeon, and lampreys are fished. The Rhine was the Romans' bulwark against the Teutonic invaders. Under Charlemagne the Rhine valley became the focus of civilisation. Except between 1697 and 1871 the Rhine was always a purely German river; at the peace of Ryswick, Alsace-Lorraine was appropriated by France, and the Rhine became part of the dividing line between France and Germany. In 1801 Napoleon incorporated the whole of the left bank with France; in 1815 the arrangement in force before 1801 was restored; and after 1871 the Rhine became once more wholly German. Down to the 19th century navigation was hampered by the riparian sovereigns or petty princelings, who levied vexatious dues. From 1803 all the powers concerned, except Holland, abolished most of the shipping dues on their own vessels navigating the Rhine, and Holland followed suit in 1831; but it was not until 1st July 1869 that the river was declared an absolutely free waterway to the ships of all nations. The first steamboat churned up its waters in 1817; now scores ply between Rotterdam and Mainz, and others along other stretches. More than 18,000 vessels of about 2,000,000 tons burden pass the frontier town of Emmerich going up stream every year. See Murray and Baedeker, and books by Stieler (trans. 1878), Simrock (1865–1883), Mehlis (1876–79), and Mackinder (1908).

Rhinns. See WIGTOWNSHIRE.

Rhode Island, the smallest of the United States, and one of the original thirteen states of the Union, is not itself an island, but takes its name from the *island* of Rhode Island (perhaps a corruption of the Dutch *Roodt Eylandt*, 'Red Island') in Narragansett Bay, which is but 15 miles long by 3½ broad. The length of the state from north to south is not quite 50 miles, its width about 40 miles, and its area 1085 sq. m. The northern and eastern sections are hilly, and the land slopes toward a level region in the south. The coast along the Atlantic Ocean measures about 45 miles, but Narragansett Bay penetrates inland some 30. The southern coast west of Point Judith is low and sandy. To the west the shores are formed by high rocky cliffs interspersed with beaches of sand. Newport (q.v.), Narragansett Pier, and Watch Hill, on the ocean coast, are famous seaside resorts. Coal of inferior quality has been mined; and there are deposits of iron ore, and excellent limestones and granite. Market-gardening is a leading occupation. Cotton and worsted manufacturing, with dyeing and calico-printing, are the great industries. The principal towns are Providence (since 1900 sole capital), Pawtucket, Woonsocket, Newport (till 1900 joint capital), Warwick, and Central Falls. The Northmen are supposed to have visited Rhode Island in the 10th century. The first permanent settlement was made at Providence by Roger Williams in 1636. Pop. (1730) 17,935; (1830) 97,199; (1910) 542,610.

Rhodes, an island, once a wealthy state of ancient Greece, lies 12 miles off the SW. coast of Asia Minor. It is 49 miles long by 21 broad, and 563 sq. m. in area, and is traversed by a chain of mountains, which in Mount Artemira (anc. *Atabyris*) attain 4070 feet. The soil produces wine, oranges, figs, olives, and other fruits; but much land lies waste, and the population is decreasing —34,000 in 1843, now barely 30,000, all Greeks except 7000 Turks and 2500 Jews. Sponges are an article of export. The Rhodians submitted to the Persians in 490 B.C., and to Alexander of Macedon in 332 B.C., beating off Mithridates in 88 B.C., and sided with Cæsar. In 1309, after a three years' siege, the city fell into the hands of the Knights Hospitallers of St John. The Turks besieged them there in 1480, and in 1522–1523, when they compelled them to capitulate. Rhodes was taken by the Italians in 1912, and held in pledge for the fulfilment of the Treaty of Ouchy.—The *city* is at the north end, on the slopes of a natural amphitheatre; at the entrance of one of its two harbours stood the bronze colossus of Helios (280 B.C.), 90 to 120 feet high, one of the seven wonders of the world. The city has often suffered from earthquake; the buildings date mostly from the period of the Knights' occupation—the principal the Knights' hospital. The church of St John and the grandmaster's palace were wrecked by explosion (1856) and earthquake. Pop. 10,000. See works by Torr (1885–87) and Balabre (1909).

Rhodesia, named from Cecil Rhodes, founder of the British South Africa Company, is a vast region extending from the frontiers of the Transvaal and the 22d degree of south latitude to Belgian Congo, and from Portuguese West Africa to Portuguese East Africa, the British Nyasaland Protectorate, German East Africa. The region, sometimes called Zambesia, is divided by the Zambesi into (unequal) southern and northern divisions. In 1889 a charter was given to the British South Africa Company, with large administrative powers, for the development of the region now known as Rhodesia. Orders-in-council in 1891, 1894, 1898, 1899, 1900, 1903, 1909, and 1911 further prescribed the company's powers, and appointed Resident Commissioners to be nominated by the Secretary of State. *Southern Rhodesia*, which is much more fully developed than the northern portion, consists of the two provinces of Mashonaland and Matabeleland, and has an area of about 144,000 sq. m. and a native pop. of 743,000, besides about 23,600 Europeans and 2000 colonial natives and Asiatics. The seat of government is Salisbury (pop. 5000), the capital of Mashonaland. There are executive and legislative councils, a high court with civil and criminal jurisdiction, and magistrates' courts in the various districts, municipalities at Salisbury and Bulawayo (chief town of Matabeleland), with churches, banks, schools, hotels, public libraries, and telephones. There are in Rhodesia about 2400 miles of railway open, and the 'Cape to Cairo' line reached the Victoria Falls in 1904. Crossing by a bridge, it traverses Northern Rhodesia and runs into Belgian Congo. A line runs from Bulawayo to Salisbury and Beira. There are about 300 registered companies interested in mining and development work in the territory. The output of gold in 1890–1911 was 5,000,000 oz. Other minerals are silver, copper, chrome iron ore, arsenic, lead, and coal. The imports into Southern Rhodesia in 1910 were valued at £2,786,000, and the exports at £3,200,000. *Northern Rhodesia* (till 1911 subdivided into North-eastern and North-western) is still practically held by the natives. Northern Rhodesia is divided into ten magisterial districts, Livingstone, on the Zambesi, being the administrative headquarters. Other centres are Fort Jameson, Fife, Abercorn, Fort Rosebery, and Broken Hill. Ivory and rubber are exported, and cotton is being grown with success. The area of Northern Rhodesia is about 190,000 sq. m., and the native pop. is estimated at about 1,000,000, with 1500 Europeans, mostly British. Postal and telegraph services have been organised. The capital of the British South Africa Company is £9,000,000, and the administrative revenue for the whole region, from mining, trading, and professional licenses, hut-tax, customs, and postal and telegraph services, amounted in 1910–11 to £1,163,874, and the expenditure to £993,264.

Rhodope (*Rod'o-pee*), the ancient name of a mountain-chain (7474 feet) on the borders of Macedonia and Bulgaria. The Bulgarians call it *Despoto Dagh.* Of its many monasteries the chief is the Bulgarian fortress-monastery of Rilo,

Rhondda (*Ron'tha*) is, since 1894, the official name of an urban district (pop. 153,000) in Glamorgan, South Wales, formerly known as the township of Ystradyfodwg. The Rhondda Valley is a great centre of coal-mining.

Rhone (Lat. *Rhodănus*), the only important French river which falls into the Mediterranean, takes its rise in the Swiss Alps, on the western side of Mount St Gothard, at an altitude of 5752 feet, and not far from the sources of the Rhine. Its entire length, from its source to its mouth in the Gulf of Lions, is 504 miles. It first runs SW. through Valais to the Lake of Geneva (q.v.); thence it forces a passage westward through the Jura. At Lyons it is joined by its largest tributary, the Saône (q.v.), from the north, and flows southward by Avignon and Arles, where begins its delta. Affluents are, on the right, the Ain, Saône, Ardèche, and Gard; on the left, the Arve, Isère, Drôme, and Durance. From Lyons southward the Rhone is navigable, but by reason of the swift current, sandbanks, and other obstructions, communication with the Mediterranean is mainly by canals. Canals likewise connect the Rhone with the Rhine by the Saône, with the Seine, the Loire, and the Garonne. See a French work by Lenthéric (2 vols. 1892).

Rhône (*Roan*), a dep. of France, part of the former Lyonnais. Area, 1077 sq. m.; pop. (1881) 741,470; (1911) 915,581. Its arrondissements are Lyons (the capital) and Villefranche.

Rhuddlan (*Hrith'lan*), a parliamentary borough of Flintshire, North Wales, on the Clwyd, 3 miles SSE. of Rhyl. Its ruined castle, dating from 1015, and dismantled after its capture by the Roundheads in 1646, was the scene of the betrayal of Richard II. (1399); at the marsh of Morfa Rhuddlan, across the river, Offa defeated Caradoc (795). With Flint, &c., Rhuddlan returns one member. Pop. 1100.

Rhyl (*Hril*), a watering-place of Flintshire, North Wales, at the mouth of the Clwyd, 30 miles NW. of Chester. A mere fishing-village so late as 1830, it has fine sands, a promenade pier 705 yards long, built in 1867 at a cost of £17,000, an extensive esplanade, a dozen hotels, baths, &c.; and, though the country around is flat, it commands fine views of the Snowdonian mountains. Pop. 9000.

Rhymer's Glen, a traditional haunt of Thomas of Ercildoune, on Huntly Burn, near Abbotsford.

Rhymney, a town of Monmouthshire, on the river Rhymney (running to the Bristol Channel near Cardiff), 2½ miles W. of Tredegar. It is the seat of ironworks. Pop. 11,500.

Riad, capital of Nejd, a town in the highlands of central Arabia. Pop. 30,000.

Riazan (*Ree-a-zan'*), a town of Russia, near the Oka's right bank, 115 miles by rail SE. of Moscow. Pop. 37,000.—The *government* has an area of 16,200 sq. m. and a pop. of 2,400,000.

Ribble. See Preston.

Rib'chester, a town of Lancashire, on the Ribble, 5½ miles NNW. of Blackburn. It occupies the site of a Roman station. Pop. 1300.

Ribeauville (*Ri-bo-veel'*; Ger. *Rappoltsweiler*), a town of Upper Alsace, pleasantly situated amid vineyards at the west foot of the Vosges, 33 miles SSW. of Strasburg; pop. 6000.

Ribston Hall, a seat in the West Riding of Yorkshire, on the Nidd, 3½ miles SE. of Knaresborough. Here was grown the first 'Ribston pippin' in England.

Richborough. See Sandwich.

Richmond, an ancient municipal borough in the North Riding of Yorkshire, on the left bank of the deep-channelled Swale, 49 miles by a branch-line NW. of York. Its Norman castle (1072–1146), now utilised for barracks, stores, &c., has a very fine banqueting-hall and a keep 100 feet high. Other buildings are the parish church, with good wood-carvings; Queen Elizabeth's grammar-school (1567; rebuilt, 1849–68); the market-house (1854); and the Perpendicular tower of a Franciscan friary (1258). The racecourse (847 feet above sea-level) commands a magnificent view. Till 1867 Richmond returned two members, and then till 1885 one. Pop. 4000. See works by R. Gale (Latin, 1722), Clarkson (1821), Whitaker (2 vols. 1823), Robinson (1833), and Longstaffe (1852).

Richmond, a municipal borough (including Kew, q.v.) of Surrey, 8½ miles WSW. of London (by rail 9¼, by river 16), stands partly on Richmond Hill, partly on the level right bank of the Thames. The Terrace, stretching along the brow of the hill, commands an unrivalled prospect of hill and dale, woodland and winding stream; and one of the fairest river-views in England may be gained from Richmond Bridge, which, 100 yards long, was built in 1774–77 at a cost of £26,000. Only a gateway remains of the ancient royal palace of Sheen, where died Edward III., Anne of Bohemia, Henry VII., and Elizabeth, and which was rebuilt by Henry V. and Henry VII. (1499), who renamed the place Richmond after his own former Yorkshire earldom. That palace, which has memories also of Wolsey, Charles V., and many others, was dismantled in 1648; but the splendid deer-park, formed by Charles I. in 1634, remains. It covers 2253 acres; and its brick wall is nearly 8 miles in circumference. Scott here makes Jeanie Deans have her audience with Queen Caroline. The well-known 'Star and Garter,' which dates from 1738, was largely destroyed by fire in 1870, but rebuilt in 1872–74 at a cost of £24,000; its banqueting-house escaped, built by Barry in 1865. At the parish church are buried the poet Thomson, Kean, Lady Di Beauclerk, and Dr John Moore; and here, too, Swift's Stella was baptised. St Mathias' (1858) is a striking building by Scott, with a spire 195 feet high; the municipal buildings, opened by the Duke of York in 1893, cost £24,000; and there are also a Wesleyan theological college (1834), a free library (1881), &c.; whilst Richmond worthies, other than those above mentioned, have been Reynolds, Gainsborough, Collins, and Earl Russell. Market and nursery gardening is a chief industry. Richmond was incorporated as a municipal borough in 1890. Population, over 33,000. See works by Crisp (1866) and Chancellor (1885 and 1894).

Richmond, (1) capital of Wayne county, Indiana, on the East Fork of Whitewater River, 69 miles by rail NNW. of Cincinnati. It was founded by the Society of Friends, who in 1859 established Earlham College here, for both sexes. There are manufactures of agricultural implements, machinery, boilers, flour, &c. Population, about 20,000.—(2) Capital of Madison county, Kentucky, 120 miles by rail S. of Cincinnati. It was the seat of the Central University (Presbyterian; 1874–1901). Pop. 5000.—(3) The capital of Virginia, on the left bank of the James River, at the head of tide water, 150 miles from its mouth, and 116 by rail S. of Washington. It is a port of entry, and vessels drawing 16 feet of water can come up to the lower end of the city, where there are large docks. Richmond is picturesquely situated on a group of hills, the summit of one—Shockoe Hill—being occupied by the capitol (1796), which possesses a marble statue of Washington, and in whose grounds are statues of Henry Clay and 'Stonewall' Jackson, and the Washington monument, a noble bronze group by Thomas Crawford. Patrick Henry is buried in St John's churchyard, and President Monroe and Jefferson Davis in Hollywood Cemetery, where is a Confederate monument 90 feet high. In the city are Richmond College (Baptist; 1832) and the Virginia Medical College. The James River Falls here supply immense water-power for tobacco-factories, rolling-mills, iron-foundries, nail-works, machine and locomotive-works, flour, meal-flour, and paper mills, and fertiliser-works. The chief exports are cotton, flour, and tobacco. Richmond was founded in 1737, and became the capital in 1779. On 26th December 1811 the burning of a theatre cost sixty lives. In 1861 Richmond was selected as the Confederate capital, but on 2d April 1865 it had to surrender, after almost a year's siege and a series of sanguinary battles. A considerable portion of the city was burned by the retreating Confederates. Pop. (1860) 37,910; (1870) 51,038; (1900) 85,050; (1910) 127,628.

Richmond, a SE. suburb of Melbourne (q.v.).

Rickmansworth, a town of Hertfordshire, at the confluence of the Colne, Gade, and Chess, 4 miles W. by S. of Watford. It has a church (rebuilt in 1890) with interesting monuments; and near it is Moor Park, the seat of the ill-fated Duke of Monmouth. Pop. 6300. See R. Bayne's *Historical Sketch* (1870).

Riddings, a Derbyshire market-town, in Alfreton urban district, with neighbouring coal-pits and ironworks.

Riddon, Loch, an Argyllshire sea-loch, striking 4 miles N. from the Kyles of Bute.

Riesengebirge (*Ree'zen-ge-beer'geh, g's* hard; 'Giant Mountains'), a mountain-range, 23 miles long by 16 broad, separating Bohemia from Prussian Silesia. The highest peak is the Schneekoppe (5260 feet).

Riesi (*Re-ay'zee*), a town of south Sicily, 10 miles NW. of Terranova. Pop. 15,000.

Rieti (*Re-ay'tee;* anc. *Reate*), a walled city of Italy, 40 miles NE. of Rome; the fine cathedral has a monument by Thorwaldsen. Pop. 20,000.

Rievaulx Abbey (*Ree'voas*), 26 miles N. of York and 10 E. by N. of Thirsk, a ruined Cistercian monastery (1131), Norman and Early English in style, occupying a beautiful site in the valley of the river Rye. The meaning of Rievaulx is 'Rye vale.'

Riff, the coast districts of Spanish Morocco, extending from Ceuta to the western frontier of Algiers, and forming a line of steep cliffs with few harbours. Its Berber inhabitants, once savage pirates, are still turbulent.

Riga (*Ree'ga*), capital of Livonia, and next after St Petersburg and Odessa the third seaport of Russia, lies on the Dwina, 7 miles from its mouth, and 350 by rail SW. of St Petersburg. The old town has narrow streets and mediæval houses; but the suburbs are laid out in broad streets with handsome buildings. The chief edifices are the archiepiscopal cathedral, built in 1204, burned down in 1547, but rebuilt; St Peter's Church (1406), with a steeple 460 feet high; the castle of the old Knights of the Sword, built 1494–1515; and several old guild houses and Hanseatic halls. Its industries include the manufacture of cottons, machines, tobacco, corks, spirits, oil, metal wares, glass, paper, flax, jute, and oilcloth. The population is about 350,000. Nearly one-half are Germans (with German-speaking Jews), one-fourth Russians, and one-fourth Letts. Riga was founded in 1201, and soon became a first-rate commercial place and a Hanse town. It belonged to Poland from 1561, in 1621 was taken by Gustavus Adolphus, and in 1710 was annexed to Russia.

The Gulf of Riga is an inlet on the east side of the Baltic Sea, which washes the shores of Courland, Livonia, and Esthonia. It is 105 miles long from north to south, and 60 broad. The islands of Oesel, Dagö, Mohn, and Worms lie athwart the entrance, and there are many sandbanks. The Dwina falls into the gulf.

Rigi (*Ree'gee, g* hard), or Righi, an isolated Swiss mountain (5906 feet), standing between the Lakes of Lucerne, Zug, and Lowerz, commands views of some of the finest Swiss scenery. Verdant pastures clothe the summit, and the slopes are belted with forests. About 100,000 tourists ascend it every season, principally by means of two toothed railways—one from

Vitznau (1871) on the Lake of Lucerne, the other from Arth (1875) on the Lake of Zug, 4¼ and 7 miles long respectively. There are half-a-dozen hotels near or at the summit, as well as a Capuchin monastery (1689), whose church contains a wonder-working image of the Madonna.

Rilo. See Rhodope.

Rimini (*Rim'i-nee*), a walled city of Italy, stands on the Adriatic, 69 miles by rail SE. of Bologna. The cathedral, a beautiful Renaissance structure, dates from 1446–50; the church of St Giuliano is adorned with pictures by Veronese. The ancient castle of the Malatestas is now a prison. The little river on which the city stands is spanned by a five-arch white marble Roman bridge, 236 feet long. Beside one of the gates stands the triumphal arch, 46 feet high, erected in honour of Augustus. The spot where Cæsar stood to address his soldiers after crossing the Rubicon (q.v.) is marked in one of the squares by a monumental pillar. The city manufactures silks and sail-cloth. Pop. 20,000; with suburbs, 43,200. One of these suburbs is much visited for sea-bathing. Originally an Umbrian, and then for several centuries an Etruscan city, Rimini (Arimĭnum) fell into the hands of the Romans in 286 B.C. After being battled for by Goths and Byzantines, and held by the latter, the Lombards, and the Franks, it became a shuttlecock between the emperor and the pope. At last Rimini put herself under the protection of the House of Malatesta (1237), in whose family-history befell the killing of Francesca da Rimini and her lover by his brother (1285), and the story of Parisina, the subject of Byron's poem.

Rimouski (*Ri-moos'kee*), a Canadian town, on the south shore of the St Lawrence, at the influx of the Rimouski River, 182 miles by rail NE. of Quebec. It is a bishop's seat, a watering-place, and a telegraphing station for ships. Pop. 3000.

Ringwood, a town on the Hampshire Avon, 25 miles WSW. of Southampton. Pop. of par. 5000.

Riobamba. See Cajabamba.

Rio Bravo. See Rio Grande.

Rio Cuarto (*Ree'o Kwahr'to*), a city in the Argentine province of Cordoba, on the river of the same name, 500 miles NW. of Buenos Aires and 170 by rail S. of Cordoba; pop. 14,000.

Rio de Janeiro (*Ree'o deh Zha-nay'e-ro*), the capital of Brazil, stands on the west side of one of the most magnificent natural harbours in the world. An inlet of the Atlantic, the bay of Rio de Janeiro runs 15 miles northwards, varying in width from 2 miles to 7; it is girdled on all sides by picturesque mountains (1500 to 3000 feet), covered with tropical vegetation. The entrance, less than a mile wide, passes between two bold headlands, one of them called the Sugar-loaf (1270 feet). The city and its suburbs stretch nearly 10 miles along the shore. About 3 miles SW. of the city stands the precipitous cone of Corcovado (2336 feet), with a cog-railway up to the top. Public institutions are the vast hospital of La Misericordia (1200 patients), the national library (1807), with 300,000 volumes, the national museum, the large lunatic asylum (1841), the botanical gardens, with a celebrated avenue of palms, the observatory, the Geographical and Historical institute (1838), the former royal palace at São Christovão, the arsenal, the naval dockyards, the academy of fine arts, a cadet-school, a school of medicine, a conservatory of music, a polytechnic school, &c. Thanks to a good water-supply, chiefly by an aqueduct (1750) 12 miles long, and a new system of sewage-draining, the city is much improved in health; but surrounding hills shut out the breezes, and the heat grows intense in summer. Yellow-fever has been overcome. The Negro population suffer from smallpox. The population is estimated at 1,000,000, including many foreigners—Portuguese, British, French, and Germans. Rio is the commercial capital, sending out one-sixth of the total exports of Brazil, and bringing in 45 per cent. of the imports. The chief export is coffee; the imports include cotton, gold and silver, metals, wool, provisions, and machinery. The whole sea-frontage of the city is lined with quays, and in 1889 extensive new harbour-works were begun, embracing a dock of 75 acres, a breakwater 3200 yards long, an elevated railway, hydraulic cranes, warehouses, &c. The city possesses cotton, jute, and silk mills, tobacco and hat factories, machine-shops, tanneries, &c.

On 1st January 1531 a Portuguese captain, De Souza, entered the bay, and thinking it was the mouth of a large river he called it Rio de Janeiro—'January River.' The French held one of the islands in 1555–67. Rio was founded in 1566; was plundered by Duguay-Trouin in 1711; supplanted Bahia as the capital of the viceroy in 1763; and in 1822 was made the capital of the empire of Brazil. The revolution of 1889 centred in Rio; and after the reconstitution of the united states of Brazil Rio remained the capital, the federal district in which the city stands (area 538 sq. m.) being administered directly by the federal authorities. Rio suffered much from bombardment during the rebellion of the fleet (1893–94).—The maritime *state* of Rio de Janeiro has an area of 26,627 sq. m., and a pop., exclusive of the city, of 1,000,000.

Rio de la Plata. See La Plata.

Rio de Oro, a Spanish West African possession, S. of the Canaries, and under their governor.

Rio Grande (*Ree'o Gran'deh*), also *Rio Grande del Norte*, and *Rio Bravo del Norte*, a large river of North America, rises in the San Juan Mountains in SW. Colorado, and flows 800 miles to the Gulf of Mexico, forming the boundary between Texas and Mexico. Its chief affluent is the Rio Pecos.—See also Paraná.

Rio Grande do Norte (*Ree'o Gran'deh do Nor'teh*), a maritime state of Brazil, occupies the north-east angle of the country; area, 22,000 sq. m.; pop. 400,000, one-half Indians. It is named from the river Rio Grande, flowing into the Atlantic at the capital, Rio Grande do Norte or Natal (q.v.); but the principal river is the Piranhas.

Rio Grande do Sul (*Ree'o Gran'deh do Sool*; 'Great River of the South'), sometimes called San Pedro, the southernmost province of Brazil; area, 91,310 sq. m.; pop. 1,400,000, including many Germans and Italians. The principal towns are Porto Alegre (q.v.), the capital, Rio Grande, and Pelotas.—The *town* of Rio Grande stands on the south side of the strait leading into the southern end of the Lagôa dos Patos; pop. 25,000.

Rioja (*Ree-o'ha*), a western province of the Argentine Republic, with an area of 34,365 sq. m. and a pop. of 90,000.—Rioja, the capital, founded in 1591, lies at the foot of the Sierra Velasco, 350 miles by rail NW. of Cordoba; pop. 6000.

Riom (*Ree-on*^{g}), a town of Puy-de-Dôme, on a hill, 8 m. by rail N. of Clermont-Ferrand; pop. 10,000.

Rio Muni, or Spanish Guinea, a Spanish possession in West Africa, enclosed landwards by Cameroon; area, 12,000 sq. m.; pop. 200,000.

Rion. See PHASIS.

Rio Negro (*Ree'o Nay'gro*), a principal affluent of the Amazon, rises as the Guainia in SE. Colombia, and flows 1350 miles E., S., E., and SE. through Venezuela and Brazil, to the Marañon.—(2) A river of Argentina, which rises in the Andean lake of Nahuel-Huapi, and flows over 500 miles NE., E., and SE. to the Atlantic. It bounds and gives name to a national territory, formerly part of Patagonia, with an area of 81,895 sq. m. of mostly level but barren soil.

Rionegro, a town of Colombia, 15 miles SE. of Medellin; pop. 9000.

Rionero (*Ree'o-nay'ro*), a town of southern Italy, 12 miles N. of Potenza; pop. 13,000.

Rio Tinto (*Ree'o*), a river in southern Spain, in the province of Huelva, near whose sources are very rich copper-mines, worked by the Romans, and bought in 1872 by the Rio Tinto (London-Bremen) Syndicate for £4,000,000.

Riouw (*Ree-ow'*), capital of Bintang (q.v.).

Ripley, (1) a town of Derbyshire, 10 miles NNE. of Derby, with silk-lace manufactures and large neighbouring collieries and ironworks; population, about 12,000.—(2) A pretty village in the West Riding of Yorkshire, on the Nidd, 3½ miles NNW. of Harrogate. Rebuilt in 1829–30, it has an hôtel-de-ville (1854), an interesting church, and Ripley Castle (1555), where Cromwell slept the night before Marston Moor. Pop. 250.

Rip'on, a city in the West Riding of Yorkshire, on the Ure, 23 miles NW. of York, 28 N. of Leeds, and 11 N. of Harrogate. A monastery, founded here in 660 by St Cuthbert and other monks of Melrose, was granted about 664 to St Wilfrid, who rebuilt the church with stone, and dedicated it to St Peter. Willibrord, the apostle of the Frisians, was trained in this monastery, which in 678 was made the seat of a short-lived bishopric, re-erected in 1836 after a lapse of more than eleven centuries. The beautiful minster, which from the Conquest to the Dissolution was the church of Augustinian canons, was built between 1154 and 1520, so exhibits every variety of style from Transition-Norman to Perpendicular. A cruciform pile, 266 feet long, with three towers 120 feet high, which lost their spires in 1660, and with a Saxon crypt, where a hole called 'St Wilfrid's Needle' was anciently used as an ordeal of chastity, it suffered much through the Scots (1319), decay, and vandalism, but in 1861–76 was restored by Sir G. G. Scott at a cost of £40,000. An obelisk, 90 feet high, in the market-place was erected in 1781 by W. Aislabie, for sixty years one of the two members for Ripon, whose representation was reduced to one in 1867, and merged in the county in 1885. At the free grammar-school (1546) Bishop Stubbs was educated. Studley Royal, the fine seat of the Marquis of Ripon, is 2 miles south-west; and near it is Fountains Abbey (q.v.). Ripon spurs, once famous, belong to the past, but saddle-trees are manufactured, besides varnish, leather, machinery, &c. The municipal borough was chartered by James I. Ripon is a spa. Pop. 8200.

Risca, a town of Monmouthshire, on the Ebbw, 5½ miles WNW. of Newport; pop. 14,000.

Ri'singham, a Roman camp in Northumberland, on the Reed, 4¼ miles NE. of Bellingham.

Ristigouche. See RESTIGOUCHE.

Riva, a tourist-resort of Tyrol, at the head of the Lake of Garda; pop. 10,000.

Rivas (*Ree-vas*), a decayed town of Nicaragua, 6 miles from Lake Nicaragua; pop. 8000.

Rivaulx Abbey. See RIEVAULX.

Rive-de-Gier (*Reev-deh-Zhe-ay'*), a town of France (dep. Loire), on the Gier, in the middle of the best coalfield in France, 13 miles NE. of St Étienne by rail. In 1815 it had less than 4000 inhabitants; now it has about 16,000.

Rivera (*Reevay'ra*), a dep. in the north-east of Uruguay, separated by a mountain-chain from Brazil. Area, 3790 sq. m.; pop. 37,300.

Riverina (*Riveree'na*), a name given to the extensive grazing districts in the western part of New South Wales.

Riviera (*Ree-vee-ay'ra*; 'seashore'), a term applied to the narrow strip of coast-land bordering the Gulf of Genoa, strictly from Nice to Spezzia, but generally understood to include the whole coast of the dep. of the Alpes Maritimes, and the Italian coast as far as Leghorn. West of Genoa it is called the Riviera di Ponente, or western coast, and beyond Genoa the Riviera di Levante, or eastern coast. From Hyères to Genoa is 203 miles; from Genoa to Leghorn, 112. Sheltered on the north by mountains, the district enjoys an exceptionally favoured climate, no other region north of Palermo and Valencia being so mild in winter. The western section is the mildest and most frequented. It abounds in the most striking and beautiful scenery, and is planted with numerous health and fashion resorts —Nice, Monaco, Mentone, Ventimiglia, San Remo, Bordighera, &c.; and west of Nice are Hyères, Fréjus, Cannes, Grasse, Antibes. The famous *Corniche* (Ital. *Cornice*) road, widened by Napoleon I., leads along the coast from Nice to Genoa, and commands magnificent views. See guidebooks by Baedeker, Murray (1890), Black (1890), and Macmillan (new ed. 1892); Augustus Hare's *South-eastern France* (1890), and Miss Dempster's *Maritime Alps and their Seaboard* (1884).

Rivière du Loup. See FRASERVILLE.

Rivières du Sud ('Southern Rivers') was, up till 1893, the name of the coast region of French Guinea. See GUINEA, SENEGAMBIA.

Rivoli (*Ree'vo-lee*), a town of northern Italy, 8 miles W. of Turin; pop. 8000. It was not here, but at another Rivoli, 12 miles NW. of Verona, that Napoleon on 14th and 15th January 1797 defeated the Austrians.

Rixdorf, an industrial town of Prussia, S. of Berlin, of which it is practically a suburb; pop. 240,000.

Rizeh (*Ree'zeh*), a town of Asia Minor, on the Black Sea, 40 miles E. of Trebizond; pop. 3000.

Roag, a sea-loch 10 miles long and 8 wide across the entrance, on the W. side of Lewis.

Roanne (*Ro-ann'*), a town of France (dep. Loire), 52 miles by rail NW. of Lyons, stands on the left bank of the Loire, which here becomes navigable, and is crossed by a stone bridge (1820). It has an old castle, a new hôtel-de-ville with a museum, some manufactures, &c. Population, 36,400.

Roanoke (*Ro-an-oak'*), a river of Virginia and North Carolina, formed by the union, a mile above Clarksville, Virginia, of the Dan and Staunton rivers, which rise in the Alleghanies. It flows 230 SE. through the north-eastern portion of North Carolina to Albemarle Sound.

Roanoke, a city of Virginia, on the Roanoke River, 258 miles by rail W. of Norfolk. In 1880 it was a secluded hamlet; by 1890 it was grown to a bustling city, with a court-house, opera-house, hotels, churches, jail, gas and electric lights, large machine-shops, steel and iron works, a rolling-mill, tobacco, spoke, and canning factories, mills, bottle-works, &c. Population, 35,000.

Roaring Forties, a sailor's term for a region of the great Southern Ocean lying south of 40° S. lat. (especially south of 45°), where the prevailing strong WNW. and NW. winds are often stormy.

Robben Island (Dutch, 'seal island'), an islet of Table Bay, 10 miles NW. of Capetown, with a convict establishment and a leper colony.

Robin Hood's Bay, a fishing-village in the North Riding of Yorkshire, 6¾ miles SE. of Whitby by the coast railway (1885) to Scarborough. The bay is picturesquely fringed by lofty cliffs, the Old Peak, its southern horn, attaining 585 feet.

Robson, MOUNT, the highest point in the Canadian Rockies (13,700 feet), on the borders of Alberta and British Columbia.

Rocha, a SE. dep. of Uruguay, on the Atlantic; area, 4280 sq. m.; pop. 40,000.

Rochdale (*Rotch-dale*), a manufacturing town of Lancashire, a municipal, parliamentary, and county borough, on the Roche, 11 miles N. by E. of Manchester and 202 NNW. of London. St Chad's parish church, on an eminence approached by a flight of 122 steps, dates from the 12th century, but is mainly Perpendicular in style. It is a handsome edifice, on which £10,000 was expended in 1884–85. The town-hall (1866–71) is a very fine Domestic Gothic building. The town besides has an infirmary (1883), a free grammar-school, founded in 1565 by Archbishop Parker, and rebuilt in 1846, a free library (1884), a post-office (1875), public baths (1868), a bronze statue of John Bright (1891), technical and art schools, and a park. The trade in woollen goods dates from the days of Elizabeth, when cotton goods also were sold here, and coal-pits worked. It was not till 1795 that the first cotton-mill was built, in which in 1802 the father of John Bright began his career as a weaver. Flannels and calicoes are now the staple manufactures, but there are also cotton-mills, foundries, ironworks, machine-shops, &c. Rochdale is the birthplace of Co-operation, and the membership of its Equitable Pioneers' Society (1844) has increased from 28 to over 11,000, with an annual business representing more than a quarter million. Since 1832 Rochdale has returned one member to parliament, and in 1856 it became a municipal borough. The latter in 1872 was made coterminous with the parliamentary borough, whose boundary had been extended in 1867. The manor of Rochdale (*Recedam* in Domesday) was originally held by the Lacys of Pontefract, and through their descendants, the Dukes of Lancaster, passed to the crown. In 1628 it was sold to Sir John Byron, whose ancestors had been connected with it since 1462, and whose descendant, the poet Lord Byron, in 1823 sold it to Mr Dearden. Pop. of county borough as extended in 1900, 91,400; of parliamentary borough, 76,100. See Fishwick's *History of the Parish of Rochdale* (1889).

Roche Abbey, a ruined Yorkshire Cistercian monastery (*c.* 1147), 8 miles E. of Rotherham.

Rochefort-sur-Mer (*Rosh-forr'-sür-Mayr*), a French seaport, naval arsenal, and fortress of the first class, in the dep. of Charente-Inférieure, stands on the Charente's right bank, 9 miles from its mouth, and 18 miles SSE. of Rochelle, 89 SW. of Poitiers. It was founded in 1665 as a naval station by Colbert, and fortified by Vauban, being covered now on the sea side by strong forts; and it is a modern, clean, well-built place. The naval hospital (1783–88) has nearly 1300 beds and an artesian well 2758 feet deep. There are both a naval harbour and, higher up the river, a commercial harbour with three basins; and Rochefort besides possesses. rope-walks, cannon-foundries, &c. From 1777 till 1852 it was the seat of a great convict prison. Napoleon meant to take ship for America at Rochefort, but instead had to surrender to Captain Maitland of the *Bellerophon*, 15th July 1815. Pop. 35,000.

Rochelle, LA (*Ro-shell'*), a French fortified seaport, capital of the dep. of Charente-Inférieure, on an inlet of the Bay of Biscay, formed by the islands Ré and Oléron, 91 miles WSW. of Poitiers and 297 SW. of Paris. Its harbour, still showing the remains of Richelieu's famous dyke, is surrounded by fine quays, close to which lie the principal streets and squares. The most noteworthy public buildings are the hôtel-de-ville (1486–1607), the palais-de-justice (1614), and the heavy Grecian cathedral (1742–1862). Besides the fine promenade of the Place du Château, there are, outside the city, La Promenade du Mail and the Champs de Mars. Shipbuilding is carried on, specially for the Newfoundland fishing trade; as well as the manufacture of briquettes, textiles, porcelain, glass, and brandy, the tinning of sardines and tunny, and the refining of sugar and petroleum. Pop. 36,400. Known till the 12th century under its Latin name of *Rupella*, 'Little Rock,' of which its present name is a translation, Rochelle originated in a colony of runaway serfs of Lower Poitou. On the marriage of Eleanor of Aquitaine with Henry II., it came, as part of her dowry, to the English kings, who retained it till 1224; and, though it was restored to England in 1360, it has been French since 1372. A Huguenot stronghold, it was unsuccessfully besieged in 1573, and in 1627–28 it for fourteen months again offered a heroic though unavailing resistance to Cardinal Richelieu. Buckingham's expedition to relieve it failed, and at last the defenders, reduced from 27,000 to 5000, had to surrender. With the exception of three towers (1384–1476) its old fortifications were destroyed, and new lines of defences subsequently erected by the great Vauban. Réaumur, Bonpland, Billaud-Varenne, Fromentin, Bouguereau, and Admiral Duperré were natives. Of the last a statue was erected in 1869.

Rochester (*Rotch'es-ter*), a city of Kent, 29 miles ESE. of London, lies chiefly on the right bank of the tidal Medway, continuous with Chatham, and joined to Strood (a ward of the municipality) by an iron swing-bridge, reconstructed in 1912–13. The castle or keep (1126), which crowns a steep eminence near the bridge, is 104 feet high and 70 feet square, with walls 12 feet thick, and is a very fine specimen of Norman architecture; it was taken by John (1215), vainly attacked by De Montfort (1264), and taken again by Tyler (1381). Both castle and grounds were purchased in 1883 by the corporation from the Earl of Jersey. The episcopal see was founded in 604 by St Augustine, and the foundations remain still of his cathedral. Bishop Gundulf (1077–1107) built a new cathedral, part of whose crypt survives. This cathedral was rebuilt by Ernulf and John of Canterbury (1115–37), the existing nave and the choir was again rebuilt and enlarged in the 13th century in part out of offerings of pilgrims at the shrine of St William of Perth, a Scotch baker, who, on a pilgrimage to the Holy Land, was murdered near Chatham by his companion and adopted son. The tower was rebuilt in 1825 and in 1904, the choir and transepts restored by Scott (1871–77), and the west front restored by Pearson in 1891. The whole pile measures 306 feet in length, and has double transepts; and special features of interest are the Norman west doorway and nave, the Early English choir, the spacious crypt, and a fine Decorated doorway leading to the modern library. Of Rochester's bishops since 604, some eighty in number, may be mentioned Paulinus (previously first bishop of York), Gundulf, Walter de Merton, Fisher, Ridley, Atterbury, and Horsley. St Bartholomew's Hospital, founded in 1078 for lepers, was refounded in 1863; the Norman chapel remains. Watts' Charity House, founded in 1579 to lodge 'six poor travellers, not being rogues or proctors,' has been immortalised by Dickens, whose home, Gadshill (q.v.), is 3 miles distant. The cathedral grammar-school dates from Henry VIII., Williamson's mathematical school from 1701; other buildings are Satis House, Restoration House, the guild-hall (1687), and the corn exchange (1871). Rochester has some shipping, engine-building, an oyster-fishery, and manufactures oil, oil-cake, and cement; and the Chatham government works employ many of the inhabitants. Rochester—the Roman *Durobrivæ* and Anglo-Saxon *Hrofe-ceastre*—was made a municipal borough by Henry II. It lost one of its two members in 1885. James II. embarked here in his flight (1688). Pop. 31,400. See works by Wharton (1691), Thorpe (1769–88), Rawlinson (1717), Fisher (1772), Rye (1861–65), Walcott (1866), Langton (1880), and Pearman (1898).

Rochester, (1) capital of Monroe county, New York, is on the Genesee River, 7 miles above its entrance into Lake Ontario, 67 miles ENE. of Buffalo and 360 NW. of New York. The river has here three perpendicular falls of 96, 26, and 83 feet, and affords immense water-power. Among the principal buildings are the city hall, of blue limestone, and the court-house; a state industrial school for 500 boys and 200 girls; a Roman Catholic cathedral; the Free Academy; the Baptist university (1850), and a Baptist theological seminary (whose library of 21,000 vols. includes that of Neander). There is a handsome stone aqueduct of seven arches (850 feet long) by which the Erie Canal crosses the river. The principal industries are flour-milling, and the manufacture of ready-made clothing and boots and shoes, rubber goods, photographic apparatus, furniture, agricultural implements and machinery, steam-engines, glass, tobacco, perfumery, &c.; and there are besides numerous foundries, iron-bridge works, cotton-mills, breweries, seed-packing and fruit-canning establishments. Rochester, a port of entry, was settled in 1810 by Colonel Rochester, and incorporated in 1834. Pop. (1840) 20,191; (1880) 89,366; (1910) 218,149.—(2) Capital of Olmsted county, Minnesota, on the Zumbro River, 347 miles by rail NW. of Chicago. It has flour-mills, foundries, and manufactories of furniture, farming implements, &c. Pop. 8000.—(3) A town of New Hampshire, 22 miles by rail NW. of Portsmouth, with manufactures of flannel, blankets, shoes, &c. Pop. 9000.—(4) A borough of Pennsylvania, on the Ohio's north bank, at the mouth of the Beaver River, 25 miles NW. of Pittsburgh. Pop. 6000.

Roche-sur-Yon (*Rosh-sür-Yon*^{g}), capital of the French dep. of Vendée, on the Yon, 50 miles SSE. of Nantes by rail, has a prefecture, a lycée, a library of considerable size, a museum, and a theatre. In 1805 Napoleon selected it—then a mere village—to be the departmental capital. From 1815 to 1848 it was called *Bourbon-Vendée*, from 1848 to 1870 *Napoléon-Vendée*. Pop. 10,000.

Rochford, an Essex town, on the Roche, 16½ miles SE. of Chelmsford. Anne Boleyn was born at Rochford Hall. Pop. of parish, 1800.

Rockall, on a sandbank in the Atlantic 50 miles long and 25 broad, in 57° 36′ N. lat., 13° 41′ W. long., 184 miles W. of St Kilda, 290 from the nearest point of the Scottish mainland, and 260 from the north of Ireland. It is a granite rock of a rounded form, rising 70 feet above the sea, and about 100 yards in circumference; and is situated at a greater distance from the mainland than any other rock or islet of the same diminutive size in any part of the world.

Rockford, capital of Winnebago county, Illinois, on the Rock River, 86 miles WNW. of Chicago. It has foundries, flour, paper, cotton, and woollen mills, and manufactures of carriages, pumps, churns, furniture, cutlery, &c. Population, 45,400.

Rockhampton, a town of Queensland, Australia, on the Fitzroy, 35 miles from its mouth, and 420 NW. of Brisbane. It has wide tree-lined streets, and owes its beginning (1858) to extensive gold-fields, the annual yield of which is valued at £1,000,000 to £1,250,000; copper and silver are also worked. The industries include tanning, soap and boot making, and meat-preserving; and it is the chief port for central Queensland. A bridge across the Fitzroy, with five spans of 232 feet each, connects Rockhampton with its suburb North Rockhampton. Pop. 21,000.

Rockingham Castle, Northamptonshire, on the Welland, 10 miles ENE. of Market Harborough, is the ancient seat of the Watsons. See a work by C. Wise (1892).

Rock Island, capital of a county in Illinois, on the Mississippi, opposite Davenport, Iowa (the two are connected by a wrought-iron bridge which cost $1,300,000), 181 miles by rail WSW. of Chicago. The island from which the town is named is used as a public park; on it are also an arsenal and armoury. The channel to the east of the island has been dammed so as to furnish immense water-power, and the city has flour and saw mills, foundries, machine-shops, glass-works, &c. Pop. 24,300.

Rockland, (1) capital of Knox county, Maine, on the west side of Penobscot Bay, 88 miles by rail ENE. of Portland, with granite quarries, lime-kilns, iron and brass foundries, shipbuilding, &c. Pop. 8000.—(2) Rockland, Massachusetts, 19 miles by rail SSE. of Boston, has large boot and shoe factories. Pop. 7000.

Rockland Lake, near the Hudson, 30 miles N. of New York City, is 3 miles in circumference, and furnishes 200,000 tons of ice annually.

Rock River rises in SE. of Wisconsin, and flows (with many falls) 375 miles S. and SW. through Illinois to the Mississippi, 3 miles below Rock Island.

Rock Springs, a town of Wyoming, 258 miles W. of Laramie. Pop. 5000.

Rocky Mountains, the eastern ranges of the great Cordilleran system in North America, which attains its greatest breadth within the United States (over 1000 miles between 38° and 42° N.). The mountain-chains forming the western boundary of the plateaus of this highland region are the Sierra Nevada and the Cascade Ranges (q.v.), and the eastern chains stretching continuously from the southern borders of the United States through Canada to the Arctic Ocean constitute the Rocky Mountains. The name 'Rocky Mountains' is peculiarly appropriate, as there probably exists nowhere else such an extensive region of naked rock almost entirely devoid of vegetation. The geological structure is complex, but the greater part of the rocks exposed are Mesozoic intermingled with Tertiary and Quaternary deposits. In comparatively recent ages this whole region has been the scene of vast volcanic eruptions, and the lava overflows which have covered the stratified rocks in many places to a depth of thousands of feet have augmented the expanse of sterile surface. The high mountain barrier at the western boundary of the highland robs the winds which sweep across the Pacific of much of their moisture, and the great aridity of this region thus prevents the growth of vegetation. The surface is exposed to continued erosive action, and the region displays a labyrinth of naked crags and peaks rising from plateaus crossed by towering cliffs or deep cañons, with here and there an isolated butte. The wonderful *mesa* or plateau region extends from southern Wyoming through western Colorado, eastern Utah, and south into New Mexico and Arizona. The country is divided by faults, flexures, and deep cañons into numerous blocks or separate plateaus, and the carving of the rocks and the brilliant colouring of the exposed strata almost surpass belief.

A high plateau region in Wyoming, over which passes the Union Pacific Railroad, marks a separation of the Rocky Mountains into a northern and a southern group, each of which has its characteristic features; and in the continental divide here are found the head-waters of the three great river-systems of the United States—the Mississippi, the Columbia, and the Colorado. The ranges of the southern group are higher, and as there are several elevated valleys known as 'Parks' enclosed between the parallel ranges, are known as the Park System. Its greatest development is in Colorado, where there are nearly forty peaks over 14,000 feet in height. The Medicine Bow Range and the Colorado or Front Range form the eastern edge of the Rocky Mountain System, and rise abruptly from the gentler slope of the Plains. In this range are the well-known landmarks, Long's Peak (14,271 feet) and Pike's Peak (14,134 feet), as well as Gray's Peak (14,341 feet), its highest point, which is too far west to be visible from the Plains. In the Sawatch Range to the west are the Mount of the Holy Cross (14,176 feet) and Mount Harvard (14,375 feet). In the Sangre de Cristo Range, almost a continuation of the Sawatch, is Blanca Peak (14,463 feet), the highest point of the 'Rockies.' In the Parks rise the head-waters of the North and the South Platte, the Arkansas, the Grand, and the Rio Grande. The Uintah Mountains connect the eastern and western ranges of the Rocky Mountain System. The most important of the western ranges are the Wahsatch Mountains, which form a part of the eastern rim of the Great Basin, and which serve as the connecting link between the northern and southern groups of this system. The Wind River Mountains in Wyoming are the highest of the ranges in the northern group, with Fremont's Peak (13,790 feet). The mountains of the northern group are wilder and less accessible than those of the southern chains, but not so high. Yellowstone Park (q.v.) is famous for its wonderful scenery. Mount Robson, Mount Hooker, and Mount Brown are the most noted peaks beyond the Canadian line. The highland gradually descends northward to an elevation of about 800 feet near the Arctic Ocean.

Rocroi (*Rokr-wa′*), a fortress of France, dep. Ardennes, 24 miles NW. of Sedan, and 2 from the Belgian frontier. Here Condé defeated the Spaniards in 1643. Pop. 2000.

Rodez (*Ro-day′*), a town of southern France (dep. Aveyron), stands on a bold bluff encircled by the Aveyron, 148 miles by rail NW. of Montpellier. The Gothic cathedral (1277–1535) has a tower 260 feet high, crowned by a colossal image of the Virgin. There are several mediæval houses, remains of a Roman amphitheatre, and a restored Roman aqueduct. Coal-mining, cloth-making, tanning, and cattle-dealing are carried on. Pop. 12,000.

Roding, an Essex river flowing 30 miles to the Thames, near East Ham.

Rodos′to (anc. *Rhædestos*), a town of Turkey, on the north shore of the Sea of Marmora, 60 miles W. of Constantinople. Pop. 42,000.

Rodriguez (*Ro-dree′ghez*), or Rodrigues, a hilly volcanic island (1760 feet), 18 miles long by 7 broad, lies 380 miles E. by N. of Mauritius, of which it is a dependency. Hurricanes often cause great damage to the island, which is encircled by a coral-reef. It was discovered by the Portuguese in 1645, and has been a British colony since 1814. The chief port is Port Mathurin. Pop. 5000.

Roermond (*Roor-mond*), an old Dutch town, at the junction of the Roer and the Maas (Meuse), 29 miles N. by E. of Maestricht. The fine cathedral (1218) is Romanesque. Pop. 14,000.

Roeskilde (*Rus-keel′deh*), a city on the Danish island of Zealand, at the southern end of the Roeskilder Fjord, 20 miles by rail W. by S. of Copenhagen. Founded in 980, it was the capital of the Danish kings and the seat of the bishops. The 13th-c. cathedral contains the tombs of most of the kings. Here peace was signed between Sweden and Denmark in 1658. Pop. 10,000.

Rohilkhand, a division of the United Provinces of Agra and Oudh, has an area of 10,908 sq. m. and a pop. of 5,500,000.

Rohtak, a town of British India, in the Punjab, 42 miles NW. of Delhi. Pop. 16,700.

Rokeby, a parish in the North Riding of Yorkshire, 2½ miles SE. of Barnard Castle. Rokeby Hall (1724), after which Scott's poem is named, is the seat now of the Morritts.

Rokitno, a vast swampy region, now being gradually drained, between the rivers Pripet, Dnieper, and Beresina in West Russia.

Romagna (*Ro-man′ya*), a region of Italy, formerly the northern portion of the States of the Church, and comprising the *delegations* of Bologna, Ravenna, Ferrara, and Forli.

Romania, an old name for the eastern part of the Morea, and for Roumelia (q.v.).

Romans (*Romon*^{g}), a town of France (dep. Drôme), on the Isère's right bank, 12 miles by rail NE. of Valence. A 9th-century bridge connects it with Péage on the left bank. Romans owes its origin to an abbey founded in 837. Pop. 13,000.

Roman's Horn, a Swiss village on Lake Constance, 12 miles SE. of Constance. Pop. 6000.

Roman Wall. See Hadrian's Wall.

Rome, the capital of the modern kingdom of Italy, stands on the Tiber, about 15 miles from its mouth (from 35 to 44 hours' journey from Paris by rail). Roman legend ascribed its foundation to Romulus in 753 B.C.; but recent explorations have proved that the site was inhabited in the neolithic and early bronze period. In the time of the kings (753–510 B.C.) the city occupied seven hills (Palatine, Capitoline, Aventine, Cælian, Esquiline, Quirinal, and Viminal), whose summits rise from 80 to 120 feet above the river and the intervening valleys. The settlement on the Palatine attributed to Romulus was certainly fortified at a very early period. In the time of the later or Etruscan kings at least five of the settlements on the seven hills had been surrounded by separate defences. These fortified hills, with the marshy hollows between them, were enclosed under Servius by a huge rampart or *agger* of earth, faced with an exterior wall of unmortared masonry. For 800 years, till the reign of the Emperor Aurelian, the Servian agger formed the only defence of the city. The wall which bears the name of Aurelian is to a great extent identical with the present walls; it enclosed the suburbs which had grown up beyond the Cælian, the Esquiline, and the Quirinal, and included two additional hills, the Pincian, and part of the Janiculum, as well as the low-lying ground near the Tiber called the Campus Martius. The Aurelian Wall, begun by Aurelian in 271 A.D., completed by Probus in 280, restored by Honorius, and repaired by Belisarius, is 12 miles in circuit. The Leonine Wall, enclosing the Vatican Hill and the remainder of the Janiculum, was built by Leo IV. in 848. At the present time populous suburbs have arisen to the east and north beyond the walls, while to the south extensive spaces within the wall are uninhabited. Some 1500 acres, chiefly on the Cælian and the Aventine, are occupied by vineyards, fields, and gardens, while public gardens and squares occupy over 100 acres. To the period of the kings belongs the *Cloaca Maxima*, a huge arched sewer of Etruscan masonry. The so-called Mamertine prison at the foot of the Capitol was a deep vaulted well, and is perhaps the most ancient structure in Rome; in it, afterwards made into a prison, Jugurtha and the Catiline conspirators (and according to tradition St Peter) were confined. Of the fourteen aqueducts, with an aggregate length of 351 miles, several date from the republican period, some from the imperial age; these vast structures, striding on their huge arches across the Campagna, and still bringing water from the Apennines and the Alban hills, are among the most striking features of modern Rome.

In the time of the Republic the centre of the public life of the city was the *Forum Romanum*, an oblong space, containing about 2½ acres, and traversed by the *Via Sacra*. Here are still to be seen the remains of the temples of Saturn (491 B.C.), of Concord, of Castor and Pollux (496 B.C.), of Vesta, of Julius Cæsar, of Vespasian, and of Faustina. We see also the foundations of the Triumphal Arch of Augustus, the vast ruins of the Basilica Julia, and the milestone from which all Roman roads were measured. To the north of the Forum stands the Triumphal Arch of Septimius Severus, to the south the Arch of Titus. In the time of the emperors additional fora were laid out to the east, and remains still mark the Forum Julium, the Forum of Augustus, the Forum of Nerva, the Forum Pacis (built by Vespasian), and, most magnificent, the Forum of Trajan. Beyond it stands the great Column of Trajan, 124 feet in height, with spiral bas-reliefs representing scenes from Trajan's campaigns against the Dacians. Of inferior art is the Column of Marcus Aurelius (the Antonine Column) in the Piazza Colonna on the Corso. On the western side of the Forum Romanum rises the Palatine Hill, its summit covered with the substructures of the Palaces of the Emperors and the Houses of Augustus, Tiberius, Livia, Caligula, Domitian, Hadrian, and Septimius Severus. Of the 300 temples in ancient Rome, the names, and in many cases the sites, of 153 are known—several of them having been converted into churches. S. Maria del Sole is a round temple formerly called the Temple of Vesta, but now believed to be the Temple of Hercules Victor. Another temple, supposed to be the Temple of Fortuna Virilis, is now the church of S. Mary of Egypt. The church of SS. Cosmo e Damiano is the Temple of Sacra Urbs, erected by the Emperor Maxentius. The church of Santa Maria sopra Minerva stands on the ruins of a Temple of Minerva. In 27 B.C. Agrippa built a vast dome in front of the Thermæ which he erected in the Campus Martius; it is called by Pliny and other writers the Pantheon, and may have served as a sort of entrance-hall to the Thermæ. It is now known to have been rebuilt by Hadrian; in 608 it was consecrated as the church of S. Maria ad Martyres, but 'S. Maria Rotonda,' as it was called, is now a state building. The diameter (142 feet) of the dome, which is lighted only by a central aperture in the roof, is larger than the dome of St Peter's; the walls are 19 feet in thickness. The Thermæ of Agrippa were the earliest of the eleven great public baths—those of Trajan, of Constantine, &c. The Thermæ Antoninianæ, usually called the Baths of Caracalla, by whom they were begun in 212 A.D., and completed by Alexander Severus, were built to accommodate 1600 bathers; and, after serving for centuries as a quarry, they are still the vastest of all the ruins in Rome. A large marshy plain, which now forms the most densely populated part of Rome, lay outside the Servian Walls, extending from the foot of the Capitoline and Quirinal hills to the Tiber. This, being used for military exercises, was called the Campus Martius. On these fields were built the Baths of Agrippa and the Baths of Nero; and here were erected the Theatre of Balbus and the vast Theatre of Pompey, said to have contained seats for 40,000 spectators. Somewhat nearer to the Capitol was the Theatre of Marcellus, of which a considerable portion still stands. This theatre was begun by Julius Cæsar, and finished in the year 11 B.C. by Augustus, who named it after his nephew Marcellus. The great Flavian Amphitheatre, built for gladiatorial exhibitions and for the combats of wild beasts, goes by the name of the Colosseum; commenced by Vespasian, it was dedicated by Titus 80 A.D., and finished by Domitian. It is built in the form of an ellipse, the longer diameter measuring 613 feet and the shorter 510 feet. It rises to a height of 160 feet, covering 5 acres of ground. In the middle ages it was used as a fortress and afterwards as a quarry; but, though so large a portion has been demolished, it constitutes perhaps the most imposing monument of Roman magnificence which is left. The roads leading out of Rome beyond the Servian Walls were bordered by tombs, many of which, on the erection of the Aurelian Wall, were included within the city. On the Appian Way are the tombs of the Scipios. Outside the Aurelian Wall is the Tomb of Cæcilia Metella, wife of the triumvir Crassus, which in the 13th century was converted into a fortress; it is a cylindrical block of masonry, 65 feet in diameter, resembling the keep of a feudal castle. The most magnificent of Roman tombs was the Mausoleum of Hadrian, now the castle of S. Angelo. It was a cylindrical tower of masonry, 240 feet in diameter and 165 feet in height, surmounted by a colossal statue of the emperor. When the Goths besieged Rome the tomb was converted into a fortress by Belisarius. It afterwards became the castle of the popes, and citadel of Rome, and in 1527 was defended against the French by Benvenuto Cellini. The Mausoleum of Augustus formed, in the middle ages, the castle of the Colonna family, and is now occupied as the Augusteo concert-hall. Eleven Egyptian obelisks still ornament the gardens and piazzas of Rome, brought by Augustus and others. That in the Piazza of S. John Lateran, 104 feet in height, is the largest in existence. It was erected at Thebes by Thothmes III., and removed by Constantine to the Circus Maximus. The triumphal arches of Septimius Severus, of Titus, and of Constantine are still conspicuous. Of the bridges over the Tiber, three are ancient.

Of modern Rome, the pop. was 226,022 in 1870; 300,467 in 1881; and 538,634 in 1911. The walls are 14 miles in circuit. In the last thirty years of the 19th century many thousands of houses were built, miles of street constructed, and millions of money laid out. Under the strict building regulations adopted in 1887, the streets are much more spacious, and even the tenement-houses of better character; meanwhile the government has carefully guarded against the destruction of buildings of historic or antiquarian interest. During recent excavations interesting sites have been laid bare (especially near the Forum), and many statues, busts, inscriptions, and coins recovered. Old Rome stands on the left bank of the Tiber; on the right bank, occupying the Vatican and Janiculum hills and the low ground between these hills and the river, are St Peter's, the Vatican Palace, the Borgo, and the Trastevere ('*trans Tiberim*,' the section beyond the Tiber). The business part of the city occupies the plain on the left bank between the hills and the river, traversed by the Corso, the principal thoroughfare of Rome, about a mile in length, leading from the Porta del Popolo to the foot of the Capitoline Hill, where is the great national monument to Victor Emmanuel (1890–94). From the Piazza del Popolo two great streets diverge on either side of the Corso, the Via di Ripetta to the right, skirting the Tiber, and to the left the Via del Babuino, leading to the Piazza di Spagna, whence the Scala di Spagna, the resort of artists' models, ascends to the Pincian Gardens, on the site of the gardens of Lucullus, which command a splendid view of the city, and form the fashionable drive and promenade.

Before Rome became in 1870 the capital of Italy, the greater part of the Pincian, Quirinal, and Esquiline hills was occupied by villas of the Roman nobles, with extensive gardens planted with ilexes and vines. With two exceptions these have been destroyed, and their sites have been covered with modern houses, and too often by blocks of ugly barrack-like buildings, many stories in height, let out in tenements. The dirty but picturesque mediæval city is assuming the aspect of a modern capital, broad, straight thoroughfares having been driven through quarters formerly occupied by narrow streets and mean, crowded houses. Of the new streets the most important are the Via Venti Settembre, the Via Cavour, and the Via Nazionale. The older foreign quarter lay at the foot of the Pincian, around the Piazza di Spagna, but the healthier sites on the slopes and summits of the Quirinal and Esquiline are now more frequented.

Of the palaces the largest are the Vatican, the residence of the pope, and the Quirinal, now the residence of the king, but formerly a papal palace, in which the conclaves were held for the election of the popes. Many of the palaces of the Roman nobles contain collections of pictures and statuary. Chief among them are the Palazzo Borghese, containing, next to the Vatican, the best collection of pictures in Rome, the Palazzi Colonna, Doria, Barberini, Rospigliosi, Chigi, Torlonia, Farnese, Corsini, and di Venezia, now the Austrian embassy. Among the notable villas are the Villa Borghese, standing in a great park below the Pincian; the Villa Ludovisi, on the Pincian; the Villa Albani, outside the Porta Salara; and the Villa Medici, on the Pincian, now the Académie Française, with a splendid collection of casts. The Collegio Romano, formerly a great Jesuit college, is now occupied by a public library of modern books, by the Kircherian Museum of Antiquities, and by a well-arranged prehistoric and ethnological museum. The Palazzo dei Conservatori, on the Capitol, contains many of the best ancient statues. In the cloisters of the Carthusian convent in the Thermæ of Diocletian are stored the antiquities brought to light during the recent excavations. The Villa Medici contains a good collection of casts from ancient statues. The Lateran Palace contains an unrivalled collection of inscriptions and sculptures from the Catacombs, and a few good statues and mosaics. The chief papal collections are contained in the galleries attached to the Vatican, probably the largest palace in the world. In addition to the private gardens and apartments of the pope, the Vatican Palace comprises immense reception-halls with a series of chapels, libraries, picture-galleries, and vast museums of sculptures, antiquities, and inscriptions. The Sistine Chapel, built in 1473 by Sixtus IV., is covered with magnificent frescoes by Michael Angelo and the great Florentine masters. The Capella Nicolina, built by Nicolas V., and the Pauline Chapel, built by Paul III. in 1590, are also painted in fresco; the first by Fra Angelico, and the second by Michael Angelo. Raphael's Stanze and Loggie are halls and solars covered with inimitable frescoes executed by Raphael, Perugino, Giulio Romano, and others of their school. Beside the sculpture-galleries is the great picture-gallery. The Vatican Library, with its priceless MSS., its collections of early printed books, of Christian antiquities, ancient maps and jewellery, is contained in two immense halls. The vast sculpture-galleries, with their unrivalled collections, comprise the Museo Chiaramonte, the Braccio Nuovo, and the Museo Pio-Clemente, which includes the Cortile di Belvedere, containing the Laocoon, the Apollo Belvedere, and the so-called Antinous.

Of the churches, over 300 in number, many are rather mortuary or memorial churches, opened only once a year on the festival of their patron saint. The most noteworthy are the five patriarchal churches, the seven pilgrimage churches, and the eight basilican churches. Others are interesting either from their early date, their historical associations, the archæological or artistic treasures they contain, or the fragments of earlier structures which they enclose. St John Lateran (S. Giovanni in Laterano), between the Cælian and Esquiline hills, ranks as the first church in Christendom. It dates from the time of Constantine, and was, till the rebuilding of S. Peter's, the metropolitan cathedral of Rome. It retains its 5th-century baptistery and the beautiful 13th-century cloisters. The Santa Scala, said to have been brought by the Empress Helena from Jerusalem, is still venerated by pilgrims. The church itself was burned down and rebuilt in the 14th century; the adjoining palace of the popes is now a museum, chiefly of Christian antiquities. The Basilica of St Peter (S. Pietro in Vaticano), the largest church in the world, was rebuilt in the 16th century from the designs of Bramante, Michael Angelo, and Bernini. Begun in 1506, and consecrated in 1626, it is in the form of a Latin cross, with a vast central dome. The interior length is 615 feet, the height of the nave 150 feet, and of the cross which surmounts the dome 435 feet. S. Paul beyond the Walls, till the fire of 1823 a vast 4th-century church, has been rebuilt in a style of great magnificence. S. Lorenzo beyond the Walls was rebuilt in 578, and remodelled in the 13th century. The Basilica Liberiana, commonly called S. Maria Maggiore (as being the largest of the eighty churches in Rome dedicated to the Virgin Mary), is one of the oldest churches in Rome, the nave dating from the 5th century. These five patriarchal churches, together with S. Croce and S. Sebastiano, constitute the seven ancient pilgrimage churches. The five patriarchal churches, together with S. Agnese, S. Croce, and S. Clemente, are the eight basilican churches. S. Agnes beyond the Walls was founded by Constantine, and rebuilt in the 7th century. S. Croce is a 5th-century basilica. S. Clemente is the most archaic church in Rome. In addition to the eight basilican churches, others conserve the remains of earlier buildings. S. Pietro in Vincoli, a 5th-century basilica, with twenty ancient Doric columns, contains Michael Angelo's statue of Moses, and the supposed chains of St Peter. S. Maria sopra Minerva, near the Pantheon, the chief Dominican church, is the only Gothic church in Rome. Among the vast modern churches are the Gesù, the gorgeous church of the Jesuits, containing the tomb of S. Ignatius Loyola; S. Carlo al Corso, now the fashionable church of Rome; S. Andrea della Valle; SS. Apostoli; S. Maria Vallicella, commonly called Chiesa Nuova; and the Cappuccini. Other objects of interest are the vast Catacombs, extending underground for many miles, the Ghetto (now almost wholly reconstructed), the Sapienza, the Propaganda, and the Protestant cemetery with the tombs of Keats and Shelley. The imposing Victor Emanuel monument at the end of the Corso was inaugurated in 1911. The new Italian Art Galleries are part of the exhibition buildings of that year, in which was opened the new Palace of Justice, twenty years in building.

Rome now claims to be the healthiest capital in Europe; the sanitary conditions are very good, and Roman (malarial) fever is a thing of the past, save in cases brought to the hospitals from the country; and even including such *contadini*, the death-rate is usually only 16 per 1000. The water-supply is unrivalled both for quality and quantity; no city excels Rome in its public fountains. One of the greatest improvements which have been effected is the embankment of the Tiber, and the straightening and deepening of its channel. This has put a stop to the disastrous floods by which the lower parts of the city were formerly inundated. The opening of new streets and the widening of old ones have also had a favourable result on the public health. The streets are in great part lighted by electricity, and electric street tramways are in operation. There are practically no manufactures in Rome. Hats, gloves, neckties, false pearls, and trinkets are made, and there are cabinet-makers, printing-offices, and a few small foundries; but in comparison with other great cities the absence of factory chimneys is very notable. The chief industry is the manufacture of small mosaics, small bronzes, of statuary, casts, and pictures, either original or copies of the works of the great masters. The prosperity of the city depends on the expenditure of the courts of the Quirinal and the Vatican, of the army of functionaries in the public offices, of the garrison, and of the foreign visitors who crowd the hotels during the winter months. The railways from all parts of Italy converge outside the city, which they enter near the Porta Maggiore on the Esquiline, and have a common terminus on the summit of the Quirinal close to the Baths of Diocletian. The omnibus service is good, and well-managed tramways traverse several of the broad new streets.

The history of Rome was for centuries the history of the civilised world; and even after it ceased to be the capital of the empire it was the centre of Christendom and the most interesting and influential city on the planet. Rome was the capital of a kingdom which gradually grew till the foundation of the republic in 509 B.C. The republic steadily extended, and after wars with Æquians, Volscians, Latins, Samnites, Sabines, Tarentines, &c., Rome was mistress of Italy by the middle of the 3d century B.C. Then came the wars with Carthaginians and Macedonians, with Jugurtha and Mithridates, and Rome becomes the mistress of southern Europe, northern Africa, and western Asia. Gaul was conquered by Julius Cæsar (51 B.C.), and next south Britain. The republic was overthrown, and Augustus, the first emperor, was at peace with all the world soon after the birth of Christ. The empire was extended to Germany and Dacia, in Parthia and Asia; but in the 3d century A.D. the northern nations—especially the Goths and kindred nations—began to do more than hold their own, and the empire contracted on the north. The seat of the empire was removed from Rome to Byzantium or Constantinople by Constantine in 330 A.D., and in 364 the empire was divided into an eastern and a western empire, Rome remaining capital of the western half. Erelong Rome was taken and retaken by the barbarians (410, 476), and, retaken again by Belisarius, was made dependent on Constantinople in 553, her glory being departed. But as capital of the popes, new glories were in store for her; Charlemagne and Otho of Germany were crowned emperors of the west at Rome, and the city became the independent capital of the increasing papal dominions or States of the Church, the Romagna, Bologna, and Perugia being conquered by Pope Julius II. in 1503. Rome remained the mother city of Christendom, and continued to flourish in spite of the temporary sojourn of the popes at Avignon and the short-lived republic of Rienzi (1347). Again in 1798 the French proclaimed Rome a republic, and in 1808 the city became part of the French kingdom of Italy; it was restored to the popes in 1814, who, save during the troubles of 1848–49, retained it as capital of the States of the Church, under French protection. But in 1860 the papal states revolted to Sardinia, and in 1870 Rome became part of the Italian kingdom and national capital.

J. H. Parker, *Archæology of Rome* (1872–80); T. H. Dyer, *The City of Rome, its Vicissitudes and Monuments* (2d ed. 1883); F. Wey, *Rome* (trans. from Fr., new ed. 1886); R. Lanciani, *Ancient Rome in the Light of Recent Discoveries* (1888); with other works by Gell, Nibby, Hare, Middleton, Calza (1912), &c.; and the histories of the Roman state, or parts of it, by Mommsen, Duruy, Ihne, Merivale, Gibbon, Bury (1889), Hodgkin (1880–85), Gregorovius, Ranke, &c., besides the Church histories.

Rome, (1) capital of Floyd county, Georgia, on the Coosa River, 72 miles by rail NW. of Atlanta. Pop. 12,000.—(2) A city of New York, on the Mohawk River, 109 miles by rail WNW. of Albany, and at the junction of the Erie and Black River canals. It has mills and manufactories of iron, brass, copper, and other goods; and here is Fort Stanwix. Pop. 20,500.

Romford, a market-town of Essex, on the Bourne or Rom, 12 miles ENE. of London. It has large cattle and corn markets, iron-foundries, extensive market-gardens, and a very large brewery of 'Romford ale.' The church of St Edward the Confessor was rebuilt in 1850. Romford is the capital of the Liberty of Havering-atte-Bower, once part of the lands of the Saxon kings. Pop. of urban district, 17,000. See George Terry's *Memories of Old Romford* (1880).

Romney, New, a municipal borough and Cinque Port in the south of Kent, 8 miles SW. of Hythe. It ceased to be a port in the days of Edward, and is not now either on the seashore or on a navigable river. Pop. 1300. Old Romney, a small village, is 1½ mile further inland.

Romorantin, a town of France (dep. Loir-et-Cher), 45 miles by rail E. of Tours. Pop. 7000.

Romsdal, the valley in central Norway of the impetuous Rauma, which reaches the sea halfway between Bergen and Trondhjem. Its scenery is magnificent, the mountains culminating in the Trolltinder or Witch Needles (5880 feet).

Romsey, a municipal borough of Hampshire, on the Test, 8 miles NW. of Southampton. The fine cruciform abbey church, mainly Norman, was the church once of a Benedictine nunnery, founded about 910 by Edward the Elder. Sir William Petty was the son of a Romsey clothier; and Lord Palmerston, of whom there is a bronze statue (1868) in the market-place, lived close by at Broadlands. A corn exchange was built in 1865, a town-hall in 1866. Pop. 4700. See books by Littlehales (1886) and Liveing (1907).

Rona, an Inverness-shire island, between Skye and the mainland, 4 sq. m. in area, and 404 feet high. Pop. 130.

Ronaldshay, North and South, the most northerly and the most southerly of the Orkney Islands, 2¾ and 20½ sq. m. in area. South Ronaldshay attains 389 feet. Pop. 440 and 1700.

Roncesvalles (*Ron'se-val'les;* orig. *Rencesvals*, a Basque word), a hamlet on a small oval plain 25 miles NE. of Pampeluna, surrounded by Pyrenean ridges, where Roland and the rear of Charlemagne's army were cut off by the Basques.

Ronciglione (*Ron-cheel-yo'nay*), a town of Italy, 30 miles NNW. of Rome. Pop. 8000.

Ronda, a Moorish town of Spain, 43 miles W. of Malaga, on the gorge of the Guadiaro. One of two bridges is 255 feet from the water. Pop. 25,000.

Rondout', till 1872 a post-village of New York, on the Hudson River, now a part of Kingston.

Roquefort (*Rok-forr'*), a French village, dep. Aveyron, 44 miles N. by W. of Béziers, celebrated for its ewe-milk cheeses. Pop. 1000.

Roraima (*Ro-rī'ma*), an isolated, table-topped sandstone mountain, near the west border of British Guiana. First sloping gradually upwards 5000 feet above sea-level (2500 above the plain), it next shoots up 2000 feet more in a perpendicular cliff, furrowed with waterfalls. It was scaled by Sir E. im Thurn in 1884.

Rorke's Drift, a station on the Buffalo River, Zululand, South Africa, memorable for the heroic defence of Lieutenants Chard and Bromhead, with eighty men of the 24th Regiment against 4000 Zulu warriors the night after Isandula (q.v.).

Rosa, Monte. See Monte Rosa.

Rosario (*Rozâh'rio*), the third city of the Argentine Republic, with an excellent harbour and large commerce, is on the west bank of the Paraná, 190 miles by rail NW. of Buenos Ayres, 210 miles by river. Pop. 176,000.

Roscoff, a seaport and watering-place of the French dep. of Finistère, on the English Channel, 33 miles NE. of Brest, with a marine zoological station. Pop. 5000. Here Mary Queen of Scots landed in 1548, and Prince Charles Edward in 1746. It was long an emporium for smuggling into the south of England.

Roscommon, an inland county of Connaught, Ireland, bounded E. by the Shannon, is 62 miles long from N. to S., by 35 from E. to W. Area, 629,633 acres, of which barely one-fifth is under crops; more than one-half is permanent grass; one-sixth is waste. It belongs to the central plain of Ireland, but rises in the north into the Curlew (800 feet) and Braulieve (1377 feet) Mountains. Several lakes occur, as Allen, Boderg, and Ree, expansions of the Shannon, and Key, Gara, and Glinn in the north-west. The chief industry is the feeding, in the 'Plain of Boyle' and elsewhere, of sheep and cattle. The chief towns are Roscommon, Boyle, Castlerea, Elphin, and Strokestown. Pop. (1841) 254,551; (1861) 157,272; (1881) 132,490; (1911) 93,956—97·6 per cent. Roman Catholics. Roscommon returns two members. It possesses Celtic raths, remains of strong castles, and fine ecclesiastical ruins.

Roscommon, the county town, 96 miles W. by N. of Dublin, arose around a Dominican abbey, founded in 1257, and a castle built ten years later; the remains of both still exist. Pop. 1800.

Roscrea (*Ros-kray'*), a market-town of Tipperary, Ireland, 77 miles SW. of Dublin, is a very ancient town; here St Cronan built a church, and it had a celebrated school in the 7th century. Remains of a castle, a round tower (80 feet high), and ruins of two abbeys exist. Pop. 2200.

Rosehearty, an Aberdeenshire fishing-village, 4½ miles W. of Fraserburgh. Pop. (burgh), 1300.

Rosemarkie. See Fortrose.

Rosendale, a village of New York, by rail 8 miles SSW. of Kingston, or 53 S. of Albany, has a great manufacture of hydraulic cement. Pop. 1000.

Rosetta (Arab. *Raschid*, after Haroun el Raschid; anc. *Bolbitine*), a town of Egypt, on the old Bolbitic arm of the Nile delta, 9 miles from the sea and 44 by rail NE. of Alexandria. During the Crusades it was a place of great strength; St Louis in 1249 made it the basis of his operations. Sultan Beybers two years later founded the present city farther inland. Pop. 17,000. A few miles to the north of the town was discovered the Rosetta Stone, which gave the first clue to the interpretation of the Hieroglyphics. At Rosetta too is an irrigation barrage in the Nile, 508 yards long, originally constructed in 1843–61, and rebuilt by Scott Moncrieff in 1886–90.

Rosherville, gardens near Gravesend (q.v.).

Roslin, a Midlothian village, near the wooded glen of the North Esk, 6½ miles S. of Edinburgh. Its castle, dating from the 14th century, was the seat of the St Clairs, Earls of Orkney from 1379 to 1471, and afterwards of Caithness, and hereditary grand-master masons of Scotland from 1455 to 1736. The exquisite 'chapel,' built about 1450, is really the choir of an intended collegiate church, and is only 70 feet long, 35 broad, and 42 high. Its beauty lies not in the outline, but in the profusion of stone-carving lavished on pinnacles, niches, vaulted roof, and clustered columns, and especially on the famous 'Prentice pillar.' The building, essentially Scottish, has often been wrongly ascribed to Spanish, at any rate to foreign, masons. Much damaged by an Edinburgh mob in 1688, it was restored by the third Earl of Rosslyn at a cost of £5000, and has served since 1862 as an Episcopal church. On Roslin Moor the Scots thrice defeated the English on the 24th February 1303. Pop. 1000.

Rosneath. See DUMBARTONSHIRE.

Ross, a market-town in Herefordshire, on the Wye's left bank, 14 miles SSE. of Hereford. In the church (1316), whose 'heaven-directed spire' is 208 feet high, is buried John Kyrle, celebrated by Pope as the 'Man of Ross.' Pop. 4700.

Rossall College, a large public school on the Lancashire coast, 2½ miles SSW. of Fleetwood, was founded in 1844 for the sons of clergymen and others. See the *Jubilee Sketch* (1894).

Ross and Cromarty, a Highland county, the third largest in Scotland, extends from the German Ocean to the Atlantic, and is bounded N. by Sutherland, S. by Inverness-shire. In 1890–91 it was finally formed into a single county by the boundary commissioners, who also added to it the small Ferintosh (detached) district of Nairnshire, and a much smaller fragment from Inverness-shire. Its mainland portion measures 75 by 67 miles, and the total area is 2,000,000 acres, or 3090 sq. m., of which 103 are water and 736 belong to a dozen islands—the Lewis, Tanera, Ewe, &c. The east coast is indented by the Dornoch, Cromarty, and Moray Firths; the west coast by eight sea-lochs (Broom, Gruinard, Torridon, Carron, &c.). The chief of the innumerable streams are the Oykell, Alness, and Conon; the Falls of Glomach, on a head-water of the Elchaig, in the SW. are 370 feet high; and beautiful Loch Maree is the largest of nearly a hundred good-sized fresh-water lakes. Mam Sodhail (3862 feet), on the Inverness-shire border, is the highest of more than thirty summits exceeding 3200 feet above sea-level, others being Ben Dearg (3547), Benmore (3505), Ben Wyvis (3429), and Ben Attow (3383). The high grounds afford good pasture, and systematic sheep-farming dates from about 1764. It reached its zenith during 1860–70, when 400,000 sheep were grazed in the county. Whisky is distilled, and the salmon and sea fisheries are very valuable. Montrose was defeated at Invercharron (1650), and a small Jacobite force in Glenshiel (1718). The chief places are Dingwall, Tain, Stornoway, Fortrose, Cromarty, Strathpeffer, and Invergordon; and the county (apart from burghs) returns one member. Pop. (1801) 56,318; (1851) 82,707; (1911) 77,364.

Rossbach, a village in Prussian Saxony, 9 miles SW. of Merseburg. Here Frederick the Great defeated the French and Austrians in 1757.

Rosscar'bery, a Cork village, 12 miles E. of Skibbereen. Pop. 500.

Rossendale, a parl. division of Lancashire.

Ross Island. See ANTARCTICA.

Rossitten, a bird-migration observatory on the Kurische Nehrung.

Rossland, a centre of gold, silver, and copper mining in the very south of British Columbia, 6 miles from the U.S. frontier. Pop. 3000.

Rosslare, a port of County Wexford, 9 m. SE. of Wexford, has a harbour with a great breakwater, from which steamers cross to Fishguard.

Ross Sea. See ANTARCTIC OCEAN.

Rostock, in Mecklenburg-Schwerin, a busy Baltic port, stands on the Warnow, 7 miles from its mouth and 60 by rail NE. of Schwerin. It has busy fairs for wool, horses, and cattle; exports grain, wool, flax, and cattle; and has many industries. The university (1418; rebuilt 1867) has about 1000 students. St Mary's (1398–1472) is a noble Gothic church; St Peter's has a steeple 414 feet high. The ducal palace (1702) and the 14th-century Gothic town-house deserve mention. Blücher was a native. Pop. 65,400.

Rostoff, (1) an important manufacturing town of south Russia, at the head of the delta of the Don and on the railway from Moscow to the Caucasus. It exports grain. Pop. 121,300.—(2) One of the oldest towns of Russia, 129 miles by rail NNE. of Moscow. Pop. 15,000.

Rostre'vor, a Down seaport and watering-place, 8¾ miles SE. of Newry. Pop. 750.

Rosyth, a tract of land extending over 3 miles on the north shore of the Firth of Forth, at St Margaret's Hope, opposite Queensferry and just inside the Forth Bridge, acquired by the government in 1903 for the purpose of forming an extensive naval base. The ruined 16th-century castle of Rosyth, a rock-island connected with the shore by a causeway, was said by tradition (baseless) to have been the birthplace of Oliver Cromwell's mother (named Steward).

Rothamsted Park, 4 miles NW. of St Albans, seat of Sir J. Bennet Lawes (1814–1900), and scene of his and Sir J. Gilbert's agricultural experiments.

Rothay. See GRASMERE.

Rothbury, a town of Northumberland, on the Coquet, 11 miles SW. of Alnwick. Pop. 1100.

Rothenburg (*Ro'ten-boorg*), a mediæval-looking town of Bavaria, on the Tauber, 36 miles W. by S. of Nuremberg. A historical play commemorates periodically an episode in the Thirty Years' War. Pop. 9000.

Rother, a river (1) of Derbyshire and Yorkshire, flowing 21 miles to the Don; (2) of Hants and Sussex, flowing 24 miles to the Arun; and (3) of Sussex and Kent, flowing 31 miles to the English Channel near Winchelsea.

Rotherham (*Roth'er-am; th* as in *this*), a busy manufacturing town in the West Riding of Yorkshire, on the right bank of the Don, here joined by the Rother, 5 miles ENE. of Sheffield by a railway opened in 1838. Its chief glory is the magnificent 14th-century cruciform church, Perpendicular in style, with crocketted spire and fine west front; in 1875 it was restored by Sir G. G. Scott at a cost of £9000. A handsome Gothic edifice, built for an Independent College in 1875 at a cost of £26,000, was bought at £8000 for the old grammar-school (1483) at which Bishop Sanderson was educated. There are also a mechanics' institute (1853); a free library (1881);

an infirmary (1870); a covered market (1879); public baths (1887); a park (1876) of 20 acres, 300 feet above the town; and the Clifton Park of 57 acres. Rotherham is a county borough (1902). The manufactures include stoves, grates, chemicals, pottery, glass, railway carriages, &c. Ebenezer Elliott was a native of Masborough, incorporated with the municipality in 1871. Roche Abbey and Conisborough Castle are each 8 miles off. Pop. 62,500. See John Guest's huge *Historical Notices of Rotherham* (1879).

Rotherhithe (*th* as in *this;* but usually called *Redriff*), a London parish in Bermondsey, on the Thames, with docks.

Rothes (*Roth'ez*), an Elginshire police-burgh (since 1884), near the Spey, 11 miles SSE. of Elgin. Near it are distilleries. Pop. 1350.

Rothesay (*Roth'say; th* as in *thick*), a favourite Scottish watering-place, the capital of Buteshire, is beautifully situated on the north-east shore of the island of Bute, 40 miles by water W. of Glasgow and 19 SSW. of Greenock. 'Sweet Rothesay Bay,' rimmed by hills 400 to 530 feet high, offers safe anchorage in any wind, and is spacious enough to contain the largest fleet. Its charming scenery, its bathing facilities, its sheltered position, and the extreme mildness of its climate have rendered Rothesay a resort alike of holiday-makers and of invalids. A score of the Clyde steamers touch regularly at Rothesay, whose commodious harbour was constructed (1822–84) at a cost of over £30,000. An esplanade was formed in 1870; and among the chief edifices are the county buildings (1832–67), the public hall (1879), the academy (1869), and Glenburn Hydropathic (1843). The ruins of Rothesay Castle, founded about 1098, taken by Haco of Norway (1263), the death-place of Robert III. (1406), were repaired in 1871–77. Rothesay since 1398 has given the title of duke to the eldest son of the Scottish sovereign. Created a royal burgh in 1400, it returned a member from the Union till 1832. Pop. 9300. See books by J. Wilson (1848) and Thoms (1870).

Rothwell, (1) a Yorkshire town, 4 miles SE. of Leeds; pop. 14,300.—(2) A town of Northamptonshire, 4 miles NW. of Kettering; pop. 4400.

Rotoma'hana. See NEW ZEALAND.

Rotorua, a small lake of volcanic origin in the North Island of New Zealand, 20 miles NW. of Mount Tarawera and in the region of thermal springs, the Wonderland of New Zealand, where the government has established a sanatorium.

Rottenburg (*u* as *oo*), a town of Würtemberg, on the Neckar, 6 miles SW. of Tübingen, with a Catholic cathedral. Pop. 8000.

Rotterdam, the busiest port of Holland, stands on both sides of the Maas, 19 miles from its mouth, 16 by rail SE. of the Hague, and 45 SW. of Amsterdam. Its trade grew at an extraordinarily rapid rate after the separation of Holland from Belgium, and after the middle of the 19th century; the quays measure 15 miles, and there are spacious docks. Since 1872 sea-going vessels have ceased to approach Rotterdam by the old channel of Brill (Brielle); they have used instead the New Waterway—i.e. the Maas and the Scheur, the latter of which has been connected with the sea by a canal cut through the Point (Hoek) of Holland, which now has a depth never less than 22 feet at low tide, and big ships are able to reach the sea in two hours from Rotterdam. The imports consist principally of mineral ores and metals, grain (wheat, rye, oats, maize), coal, oil (petroleum chiefly), seeds, tallow and similar greasy substances, sugar, rice, tobacco, hides, indigo, &c.; whilst the more important exports are linen, flax, butter, cheese, cattle, and spirits (gin, &c.). There are iron and other metal works, shipbuilding, distilling, sugar-refining, and the manufacture of tobacco, chemicals, &c. The town is intersected by canals. On the south side of the river, opposite the city proper, are the iron-works, shipbuilding yards, and docks of the island of Fijenoord, connected with the other bank by two lofty bridges (one a railway bridge). In the city the more important buildings are the Gothic church of St Lawrence (15th century), with a very large organ, the tombs of Witt and other Dutch admirals, and a lofty tower (295 feet high); the Boymans Museum (1847), with a fine collection of paintings by Dutch masters; the yacht club-house, containing an ethnological collection; the town-house, exchange, and similar public buildings. The public institutions include an academy of art and science (nearly 1100 pupils), schools of music, navigation, and the technical arts, and an excellent zoological garden. Pop. (1830) 72,300; (1858) 104,724; (1909) 417,780. Rotterdam counts as her most illustrious sons Erasmus and the poet Tollens; James, Duke of Monmouth, Grinling Gibbons, and Mrs Molesworth were also born here. The place was captured by Francis of Brederode in 1488, lost to the Austrians in the following year, and occupied by the Spaniards in 1572.

Rotti (*Rottee*), a fertile Dutch island in the Indian Archipelago, SW. of Timor. It is 36 miles in length (655 sq. m.); pop. 80,000. The surface, though hilly, nowhere exceeds 800 feet in height.

Rottweil, a town of Würtemberg, on the Neckar, 68 miles SW. of Stuttgart. Pop. 10,000.

Rotu'mah (*u* as *oo*), an island in the south Pacific, 300 miles NNW. of Fiji, to which it was annexed in 1880. Area, 14 sq. m.; pop. 2700, all Christians.

Roubaix (*Roo-bay'*), a town of N. France (dep. Nord), 6 miles by rail NE. of Lille. Here cloth, shawls, velvet, &c. are manufactured to the annual value of £16,000,000, thread, sugar, beer, spirits, machinery, &c. being also produced. Pop. (1810) 9000; now 122,700.

Rouen (*Roo-ong'*; Lat. *Rotomagus*), formerly capital of Normandy, and now chief town of Seine-Inférieure, and a great manufacturing city, is situated on the Seine's right bank, 87 miles NW. of Paris. The ramparts have been converted into boulevards, and the modern streets are well and regularly built; but old Rouen still largely consists of ill-built picturesque streets and squares, with tall, narrow, quaintly carved, wood-framed and gabled houses. The Seine, over 300 yards broad, makes Rouen, although 80 miles from the sea, the fourth shipping port of France; and operations, in the way of deepening the river and building quays, are yearly adding to its capacity and importance, £750,000 having been expended on the port since 1831. A stone bridge and a suspension bridge lead to the Faubourg St Sever on the left bank. Rouen possesses several remarkably beautiful Gothic churches —in particular the cathedral (13th century onwards), St Ouen (14th–15th century; perhaps the best specimen of Gothic in existence), and St Maclou (florid style of the end of the 15th century). The archiepiscopal cathedral, begun by Philippe Auguste, has a very rich west façade, and two fine though unfinished west towers —the south one called the Tour de Beurre (1485–

1507), but is disfigured by a lofty cast-iron spire (487½ feet) erected upon the central tower in 1876. It contains in its twenty-five highly ornamented chapels numerous monuments of great interest, especially those of Rollo and of his son William Longsword. The heart of Richard Cœur de Lion, once buried there, is now preserved in the Museum of Antiquities. Among other noteworthy buildings in Rouen are the palais de justice (15th century); the hôtel-de-ville, with its public library and its picture-gallery; the Tour de Jeanne d'Arc; and the Hôtel Dieu. The principal branches of industry are manufactures of cotton, nankeens, dimity, lace, cotton-velvets, shawls, hosiery, mixed silk and wool fabrics, blankets, flannels, hats, cordage, cotton and linen yarns, shot, steel, lead, chemicals, paper, confectionery, &c. There are also shipbuilding yards and engineering works. The population is about 125,000. The first home of the Norman dukes, Rouen was captured by Philippe Auguste (1204), was regained by England (1419–49), and in 1431 witnessed the burning of Joan of Arc, a statue of whom adorns La Place de la Pucelle. Rouen was the birthplace of Corneille, Fontenelle, Boieldieu, and Armand Carrel, and the deathplace of Clarendon. It was occupied by the Germans in the war of 1870–71.

Rouergue (*Roo-erg'*), an old province of southern France, between Languedoc, Auvergne, and Guienne.

Rougemont Castle. See EXETER.

Roulers (*Roo-lay'*; Flem. *Rousselaere*), a town of Belgium, 19 miles SSW. of Bruges, manufacturing cottons, lace, and chicory. Here the French defeated the Austrians in 1794. Pop. 25,000.

Rouma'nia, a kingdom in SE. Europe, lying mainly between the Carpathians, the Pruth, and the Danube (the Dobrudja being south of the Danube); including the strip added from Bulgaria as 'compensation' for changes consequent on the Balkan war of 1912–13, from a point on the Danube above Silistria to Cape Sabla on the Black Sea. Bordering on Hungary, Russia, Bulgaria, and Servia, its area is 52,000 sq. m., and population 7,500,000—90 per cent. Orthodox Greeks, 4·5 per cent. Jews, with many gypsies. There are besides some 4,000,000 Roumanians in Hungary (especially Transylvania), Bukowina, Bessarabia, Servia, and Bulgaria. Roumania slopes down from the Carpathian Mountains (3000 to 9000 feet) to the northern bank of the Danube, and it is traversed by numerous water-courses (many of which are dry in summer). Roumania is divided into the two provinces of Wallachia and Moldavia, the first bordering on the Danube, the second on the Pruth, and formerly distinct principalities. The capital is Bucharest in Wallachia, about 30 miles from the Danube; and the chief town of Moldavia is Jassy, near the Pruth. Other towns are the seaports of Galatz and Ibrail (or Braila) at the mouth of the Danube, Craiova (Krajova), Botoshani, Ploiesti (Plojeschti), Pitesti, and Silistria (ceded by Bulgaria in 1913). The principal industries of Roumania are agriculture, salt-mining, and petroleum-making. Maize and cereals are largely exported, and amongst the fruits are gourds, plums, peaches, walnuts, apples, pears, and grapes. The manufacturing industries, which are greatly handicapped by the cheap productions of Germany and Austria, include flour and saw milling, match-making, and petroleum-distillation, tanning, boot and shoe making, and cement manufacture. The peasantry are mainly clothed in garments made by themselves of homespun, woven, and dyed fabrics, and they possess much skill in the ornamentation of cloth, gauze, and muslin. Before 1864 the whole of the land was practically held by the boyards or inferior nobles, who were frequently absentees, or by the state. But when the government became democratic it was determined to restore one-third of it to its original owners at moderate prices fixed by the state. The result was that there exist over 406,000 holdings, averaging about 10 acres each. The government is a hereditary limited monarchy, and the constitution provides for a council of ministers, a senate, and a chamber of deputies. The revenue is over £19,000,000, and more than balances the expenditure; the debt, £62,126,000. The value of imports varies from £10,000,000 to £17,000,000, and of exports from £10,000,000 to £22,000,000. The exports are chiefly cereals and seed; a third of the imports is from Germany.

The Roumanians are descended from the ancient inhabitants—probably Thracians or Dacians—of the country, modified by elements derived from the Roman, Gothic, Bulgarian, and Slavonic invaders. Dacia was a Roman colony from 101 A.D. till 274, when it became the prey of successive swarms of wandering tribes. Out of numerous small states, two, Wallachia and Moldavia, had become dominant, when they had to bow to the Turkish yoke, and became tributary to the Porte. They were governed by voivodes and hospodars nominated by the Porte, who were generally extortionate Fanariots, Greeks of Constantinople. Russian intervention during the 18th century somewhat improved the condition of the down-trodden principalities, which at times were wholly under Russian influence. In 1859 they elected the same prince Couza. He ruled till he was deposed for misgovernment in 1866, and was succeeded by Prince Charles of Hohenzollern. The Roumanians fought bravely on the Russian side in the Turkish war of 1877–78, and at the end obtained complete independence, though they had to give Russia part of Bessarabia for the Dobrudja. In 1881 the prince was recognised as a king. The Roumanian language is derived mainly from Latin, with Slavonic, Hungarian, and other elements. See Samuelson, *Roumania, Past and Present* (1882).

Roumelia, or RU'MILI ('Land of the Romans'—i.e. Byzantine Greeks), after the Turkish Conquest a name for Thrace and Macedonia, of which Eastern Roumelia is a portion; see BULGARIA.

Roundhay Park. See LEEDS.

Roundway Down, a hill 1½ mile N. of Devizes, in Wiltshire, the scene of Waller's defeat by the royalists under Lord Wilmot in July 1643.

Rousay, an Orkney island, 10 miles N. of Kirkwall. Area, 18½ sq. m.; pop. 500.

Roussillon (*Roos-see-yong'*), a former French province, surrounded by Languedoc, the Mediterranean, the Pyrenees, and the county of Foix, and now forming the dep. of Pyrénées-Orientales.

Roveredo (*Ro-ver-ay'do*), a town of the Austrian Tyrol, close to the Adige's left bank, 14 miles S. of Trent by rail. It has been since the 15th century the centre of the Tyrolese silk industry; it has also leather and tobacco factories. Pop. 12,000. Here the French defeated the Austrians, September 3–4, 1796. Rosmini was a native.

Rovigno (*Roveen'yo*), an Austrian seaport, on the west side of the peninsula of Istria, 40 miles S. by W. of Trieste. Pop. 12,000.

Rovigo (*Rovee'go*), a cathedral city of Italy, 27 miles by rail S. of Padua. Pop. 12,200.

Rovuma, a river of Africa, rises E. of Lake Nyasa, and flows 450 miles E. to the Indian Ocean N. of Cape Delgado, forming the boundary between German and Portuguese East Africa. It was ascended by Livingstone and Kirk in 1862.

Row (*Roo*), a village of Dumbartonshire, on the east shore of the Gare Loch, 2 miles NW. of Helensburgh by rail (1894). The saintly John M'Leod Campbell was minister from 1825 till his deposition for heresy in 1831. Pop. 1200.

Rowardennan, a steamboat-pier on Loch Lomond, at the base of Ben Lomond.

Rowley Regis, a town of Staffordshire, 3 miles SE. of Dudley, within whose parliamentary limits it partly lies. There are collieries, ironworks, quarries, potteries, implement-works, and breweries. Pop. 37,000.

Rowton Heath, a royalist defeat in the Great Rebellion, fought under the walls of Chester, September 24, 1645.

Roxburghshire, a Scottish Border county, bounded by Berwickshire, Northumberland and Cumberland, Dumfriesshire, Selkirkshire, and Midlothian. Its greatest length is 42 miles; its greatest breadth 30 miles; and its area 670 sq. m., or 428,494 acres. In the north the Tweed winds 25 miles eastward, receiving in this course Gala and Leader Waters and the Teviot, which last runs 37 miles north-eastward from above Hawick to Kelso, and itself receives the Ale, Slitrig, Rule, Jed, &c. Thus the whole county, often called Teviotdale, drains to the German Ocean, with the exception only of Liddesdale, or Castleton parish, in the extreme south, whose 106 sq. m. belong to the western basin of the Solway Firth. The Cheviots (q.v.) extend along the south-eastern boundary, their highest point here Auchopecairn (2382 feet); in the interior rise Ruberslaw (1392) and the triple Eildons (1385). Rather less than two-thirds of the entire area is in cultivation, and the raising of crops is of much less importance than the grazing of half a million sheep. The extinct burgh of Roxburgh, with a vanished castle, gave the county its name, but has been quite superseded by Kelso; and Jedburgh, the county town, is very much smaller than Hawick; other places are Melrose, Denholm, St Boswells, Yetholm, &c. Chief seats are Floors Castle, Mount Teviot, Minto House, and Abbotsford. The antiquities include hill-forts; the Catrail; the Roman station at Newstead; the castles or peel-towers of Hermitage, Branxholm, Harden, Ferniehirst, Smailholm, &c.; and the noble monastic ruins of Melrose, Jedburgh, and Kelso. Besides many more worthies, four poets—James Thomson, Jean Elliot, Leyden, and Aird—were natives; but although not his birthplace, Roxburghshire is pre-eminently the land of Scott. It witnessed many a fray, but no battle greater than Ancrum Moor (q.v.). The county returns one member. Pop. (1801) 33,721; (1861) 54,119; (1911) 47,192. See Jeffrey's *History of Roxburghshire* (1857–64), and Douglas's (1899).

Roxbury, formerly a separate city of Massachusetts, annexed in 1867 to Boston (q.v.).

Royal Canal, Leinster, from Liffey at Dublin to Shannon at Richmond Harbour, 96 miles long, was made (1789–1802) at a cost of £1,500,000.

Royal Leamington Spa. See LEAMINGTON.

Royan (*Rwah-yong'*), a French seaport and watering-place (dep. Charente-Inférieure), on the north side of the Gironde's estuary, 60 miles NW. of Bordeaux. Pop. 7000.

Royat (*Rwah-yah'*), a watering-place in the dep. of Puy de Dôme, 3 miles SW. of Clermont-Ferrand, has mineral springs. Pop. 1400.

Roy Bareilly. See RAI BARELI.

Royston, an urban district of Herts, 12½ miles ENE. of Hitchin. Pop. 4000.

Royston, a town of the West Riding of Yorkshire, 3 miles from Barnsley. Pop. 4000.

Royton, a town of Lancashire, 2 miles NNW. of Oldham, with cotton-factories. Pop. 17,000.

Rsheff, or RJEV, a river-port of Russia, on the Volga, 135 miles NW. of Moscow. Pop. 35,000.

Ruabon (*Roo-ah'bon*), a mining-town of Denbigh, 4½ miles SSW. of Wrexham. Pop. 3400.

Ruapehu, the highest mountain (9068 feet) in the North Island of New Zealand (q.v.), a volcano which was in eruption in 1895; with Mount Tongariro it is now a National Park.

Ruatan', or RATTAN, an island in the Bay of Honduras; area, 106 sq. m.; pop. 2000.

Ru'bicon, a stream of Central Italy, falling into the Adriatic a little north of Ariminum, which formed the southern boundary of Cæsar's province, so that by crossing it in 49 B.C. he virtually declared war against the Republic. It was probably the modern Fiamicino or Rujone.

Rüdesheim (nearly *Ree'des-hime*), a town of Prussia, on the Rhine's right bank, opposite Bingen, at the foot of the Niederwald (q.v.), and 16 miles W. of Mainz. Here is grown the famous Rüdesheimer Rhine-wine. Pop. 4800.

Rudolf, LAKE, a lake in British East Africa and Abyssinia, near the edge of the Kaffa or South Ethiopian highlands, is long and narrow, stretching 160 miles NE. and SW. by 40 broad, with an area of 3000 sq. m., at a height of 1300 feet above the sea. It is crossed by 4° N. lat. and 35° E. long. It has no visible outlet, and its waters are very brackish. It was discovered by Count Teleki in 1888. See his *Discovery of Lakes Rudolf and Stephanie* (Eng. trans. 1894).

Rudolstadt, capital of Schwarzburg-Rudolstadt in Germany, lies in a hill-girt valley on the Saale, 18 miles S. of Weimar. There are two royal castles, and factories of porcelain, chemicals, and wool. Pop. 13,000.

Rufiji (*Roo-fee-jee*), or LUFIJI, the chief river of German East Africa, which rising far in the interior enters the sea through a delta with shoals and bars opposite the island of Mafia.

Rugby, a town of Warwickshire, at the Swift's influx to the Avon, 83 miles NW. of London and 30 ESE. of Birmingham. It is an important railway junction, a great hunting centre, and the seat of a public school. Population, 22,000. The grocer, Lawrence Sheriff, founded the school in 1567; but it first became of national reputation under Dr Arnold (1828–42), whose successors have included Archbishop Tait, Dean Goulburn, Archbishop Temple, and Dr Jex-Blake. When the last-named resigned in 1887 he left behind him a school unrivalled in its appointments, including a new chapel (1872). Of illustrious Rugbeians may be named the poets Landor, Clough, and Matthew Arnold; Dean Stanley, Judge Hughes (the author of *Tom Brown's School-days*), Dean Vaughan, Lord Derby, Lord Cross, Lord Goschen, Sir R. Temple, Franck Bright and York Powell the historians, and Professor Sidgwick. See the *Rugby School Registers* (3 vols. 1881–

91); works by Dean Goulburn (1856), Bloxam and Payne Smith (1889), and Rimmer (1892).

Rugeley (*Rooj'ley*), a market-town of Staffordshire, on the Trent, 10 miles ESE. of Stafford. It has good public buildings (1879), a grammar-school, ironworks, and neighbouring collieries. Pop. 4500.

Rügen (*g* hard), a Prussian island in the Baltic, a mile from the coast of Pomerania. Greatest length, 33 miles; greatest breadth, 25 miles; area, 374 sq. m.; pop. 50,000. Chief town, Bergen (pop. 5000), in the middle of the island.

Ruhr (*Roor*), a right-hand affluent of the Rhine at Ruhrort, flowing 144 miles westward.

Ruhrort (*Roor-ort*), a town of Rhenish Prussia, now included in Duisburg, is one of the busiest river-ports on the Rhine. In the vicinity are ironworks and coal-mines.

Rullion Green. See PENTLAND HILLS.

Rum, a mountainous island of Inverness-shire, 15 miles N. by W. of Ardnamurchan Point. It is 8½ miles long, 8 miles broad, and 42 sq. m. in area, only 300 acres being arable, and the rest deer-forest and moorland. The surface presents a mass of high sharp-peaked mountains, rising in Halival and Haiskeval to 2368 and 2659 feet. In 1826 the crofters, numbering fully 400, were, all but one family, cleared off to America, and Rum was converted into a single sheep-farm; but in 1845 it was sold (as again in 1888) for a deer-forest. Pop. 100.

Rumania. See ROUMANIA.

Runcorn, a thriving market and manufacturing town and river-port of Cheshire, on the left bank of the tidal Mersey, 12 miles ESE. of Liverpool and 28 WSW. of Manchester. The river is crossed here by a transporting bridge (1902) and by a railway viaduct, which, erected in 1864–69, is 1500 feet long and 95 feet above high-water mark. An ancient place, where a castle was founded by the Princess Ethelfreda in 916, and a priory in 1133, it yet dates all its prosperity from the construction of the Bridgewater Canal (1762–72), which at Runcorn descends to the Mersey by a succession of locks. More canal-boats plied to and from Runcorn than from anywhere else in the kingdom even before the opening of the Manchester Ship-canal (1887–94); there are spacious docks, Runcorn being a sub-port under Manchester. The industries include shipbuilding, iron-founding, rope-making, the manufacture of chemicals, quarrying, &c. Hall Caine was born here. Pop. 17,400.

Runnimede, a long stretch of green meadow, lying along the right bank of the Thames, 1 mile above Staines and 36 miles by river WSW. of London. Here, or on Charta Island, a little way off the shore, Magna Charta was agreed to by King John, June 15, 1215.

Runn of Cutch. See CUTCH.

Rupert's Land, the name given, on the formation of the Hudson Bay Company (1670) by Prince Rupert and others, to a territory comprising all lands draining into Hudson Bay or Hudson Strait.
